She regretted that immediately after the cordial meeting between Mr. T. T. Krishnamachari and President Ayub Khan, Pakistan should have started agitating over Kashmir in the Commonwealth Conference and thus spoiled the atmosphere. That, she added, had unfortunately been the pattern in the past too.

Meeting Between President Ayub Khan And Mr. T. T. Krishnamachari:

President Ayub Khan and Mr. T. T. Krishnamachari in luncheon talks in London on July 11 dealt with the "question of maintaining the favourable atmosphere for discussions of Indo-Pakistan differences and taking various measures to that end"

An official Indian Press statement added: "It is possible that there will be a second meeting of the Home Ministers of India and Pakistan (Mr. Gulzari Lal Nanda and Khan Habibullah Khan) some time this month, or early in August and the President of Pakistan and the Prime Minister of India may be meeting later at a mutually convenient date".

Mr. Krishnamachari was accompanied by Mr. M. J. Desai, Secretary in the Indian External Affairs Ministry.

President Ayub Khan was assisted at the talks by Mr. Z. A. Bhutto, Pakistan's Foreign Minister, and Mr. Agha Hilaly, Pakistan's High Commissioner in London.

Mr. Desai told newsmen later that they had discussed many common problems. But he declined detailed comment.

Mr. Bhutto later told newsmen that the President had handed over a letter to Mr. Krishnamachari for Mr. Lal Bahadur Shastri, the Prime Minister of India in reply to a letter from Mr. Shastri which Mr. Krishnamachari had brought with him from New Delhi.

ASIAN RECORDER

September 2—8, 1964

Regd. No. D-727
Vol. X No. 36

AFGHANISTAN

A. New Constitution: Under the new Constitution announced on August 4, no member of the royal family can become Prime Minister or any other Minister, a member of the National Assembly, or Chief Justice of the Supreme Court. (Until now, Afghan Governments had been headed by uncles or cousins of the King.)

Among individual liberties to be guaranteed by the new Constitution, which has 11 chapters and has taken more than a year to prepare, is the right of free trial in all criminal cases. It allows the formation of political parties and freedom of speech and the Press.

The chief judge and members of the Supreme Court will be appointed or dismissed by the King, whose role under the new Constitution is one of co-ordinator and conciliator between the three branches of Government—the executive, legislature, and judiciary.

The Constitution also provides that only descendants of Muhammad Nadir Shah, father of the present King, Muhammad Zahir Shah, have the right to ascend the throne.

(*The Times*, London)

BURMA

A. Refund To Depositors Of Demonetized Notes: The Revolutionary Government has announced full refund up to the value of 4,200 kyats to those persons who had deposited demonetized notes of the denominations of 100 kyats and 50 kyats under the demonetization order promulgated by the Government on May 17.

The announcement said larger amounts deposited would also be refunded, but only up to the extent of 4,200 kyats at present and not more.

Arrangements would be initiated to make the refunds immediately.

According to Government statistics, the total amount of 100-kyat and 50-kyat notes in circulation at the time of demonetization stood at 1,202,000,000 kyats.

The total value of demonetized notes surrendered was 930,000,000 kyats. Demonetized notes not surrendered were valued at 272,000,000 kyats.

[Prev. ref. 5903:BUR:A]

CEYLON

A. Press Commission's Recommendations: Far-reaching changes in the set-up of the Press have been recommended in the *interim* report of the Commission appointed to inquire into the growth of Press monopoly in the country and recommend steps to prevent it.

The Government is understood to have decided, as a first step, to frame legislation for the establishment of a Press Council and a Press Tribunal. It has also been decided to present the Commission's report to Parliament as soon as the Sinhala and Tamil translations were ready.

The Commission has recommended that:

(1) The Lake House Group which publishes the **Daily News**, the **Evening Observer**, **Dinamina**, **Silumina**, etc., be acquired and vested in a corporation to be known as the Newspaper Corporation of Ceylon;

(2) **The Times of Ceylon** group be purchased and run by a co-operative union or a ceiling be fixed on the number of shares to be held by a single individual or family group;

(3) The Independent Newspapers, which publishes **Dawasa**, etc., convert itself into a public company;

(4) The **Virakesari** be converted into a public company, as also **Eezha Nadu**, which is being published from Jaffna. The time-limit of six months should be fixed for **Virakesari** and **Eezha Nadu** to convert themselves into a public company and no single individual or company or family should hold more than one-eightieth part of the total shares.

Non-Ceylonese are barred from possessing any shares in any of these companies. The share held by non-Ceylonese at present should be sold to the Ceylonese within six months. No non-citizen should be permitted to own any interest in newspapers, weeklies or periodicals which are printed and published in Ceylon for sale. Nor should any non-citizen be permitted to be employed without prior sanction of the Press Council.

The Commission observed that an analysis of the share-holdings of various newspapers showed that a small group of persons controlled each of these newspapers. "This concentration of ownership is incompatible with the freedom of the Press and, in conjunction with the circulation of these newspapers and their readership, it had produced concentration of power in the hands of a few men, which is capable of dangerous abuse and has in fact been gravely abused by suppression of opinion and distortion of facts, as is evident from the overwhelming evidence given before us. This concentration, if not broken up, would endanger not only the freedom of the Press, but the welfare of the country as well."

The report quoted elaborately from J. L. Fernando's book, **Three Prime Ministers**, and argued that the contents of that book, written authoritatively by a man who was chief policy-maker of Lake House at that time, showed the amount of influence which Lake House wielded in "making and unmaking" Governments in Ceylon.

Referring to the allegations made against the Lake House group that it was hostile to Buddhism and the Sinhala language, the report stated it was satisfied that those charges had been sufficiently established. A similar opinion was expressed in respect of the **Times** group also.

The Commission recommended the immediate establishment of a national news agency with extensive functioning and a five-member Press Council with wide powers, whose expenses should be met by a levy on newspapers.

The Press Council will safeguard the freedom of the Press, help the Press to maintain standards, draw up a code of conduct for journalists, introduce a scheme of salaries and wages to journalists and other employees, regulate the condition of employment, recruitment and training of journalists, fix prices and advertising rates, allocate space for news and advertisements, take action from time to time to break up undesirable concentration of shares, review every share transaction, and inquire into complaints against the Press, journalists, etc. by the public.

No newspaper, weekly or periodical should be permitted to be published without obtaining a licence from the Press Council on payment of a prescribed fee.

No person resident in Ceylon should be permitted to act as correspondent of any foreign newspaper, periodical or news agency unless he has previously registered himself as such with the Press Council. But a correspondent or other representative of such a newspaper, periodical or news agency arriving from abroad assigned for a special purpose or to cover a special event should be permitted to function as such pending such registration within 48 hours of his arrival.

Newspapers' Criticism:

Leading newspapers denounced the report of the Press Commission.

The Times of Ceylon said in a leading article on August 13 that the coalition Government seemed determined to silence the free Press "and make them echo the hollow nonsense emanating from the Government's chief medium of information, **Radio Ceylon**".

It added: "Steps have already been suggested by the Ceylon Equal Society (the Trotskyites) whereby the whole embarrassing process of democratic discussion may be short-circuited so that the totalitarian process will be shrouded from the glare of newspaper publicity. We have never allowed ourselves to be intimidated by the threat of extinction.... The nation's freedom and the individual citizen's fundamental liberties are in grave peril."

The Ceylon Observer said the Press Commission's report showed the Government a short cut in its drive towards dictatorship—through a Press Council and a Press Tribunal. The proposed ban on anti-social and anti-national news meant that any exposure of the misdemeanours of Ministers, their corruption and the patronage of the corrupt, would not be possible.

The Ceylon Daily News said that the various forms of control proposed for the newspaper groups all amounted to Government control either directly or indirectly, and if the three-member Commission's report was implemented, then "the three hangmen of Press freedom would have done their worst."

The Daily News said that it would be futile to presume that the proposed Press Council would be a counterpart of similar bodies in other parts of the world. The Council was to consist of five agents chosen by the Prime Minister alone, and to complete its domination of newspapers the Council was even to be charged with

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

recruiting journalists. "What is proposed for the present and the future is a nation-wide perpetuation of Radio Ceylon's lick-spittle techniques, which earned the epithet 'intolerable' in the House of Representatives. Distortion of news and curtailing of comment, now imposed from above on the State radio, will be extended to State-controlled newspapers as well."

(*The Times of Ceylon*, Colombo and *The Hindu*, Madras)

[Prev. ref. 5448:CEY:A]

B. "Radio Ceylon" Criticized: In the House of Representatives on August 12 the Speaker, Mr. Hugh Fernando, criticized the Government-owned and controlled *Radio Ceylon* for suppression of speeches made by Opposition members in Parliament.

He informed the House that he had investigated an alleged breach of privilege by Radio Ceylon, raised by Mr. J. R. Jayewardene, deputy leader of the United National Party, the biggest group in the Opposition.

The Speaker said he could not agree with Mr. Jayewardene's contention that Radio Ceylon had misrepresented a speech by Mr. Maithripala Senanayake, Minister of Industries, but he upheld Mr. Jayewardene's contention that speeches by Opposition members were not reported by Radio Ceylon.

The Speaker said: "It seems intolerable that nothing that is said on the floor of this House, other than by a Minister, is broadcast by Radio Ceylon". He had questioned Mr. S. B. Senanayake, Director-General of Broadcasting and Information, who stated that it was a long-standing practice not to report speeches by the Opposition or by Government back-benchers.

The Speaker said this was a serious defect in policy, and he had asked the Parliamentary Secretary of Information to bring this to the notice of the Government.

(*The Hindu*, Madras)

INDONESIA

A. No Aid To Indonesia—US Senate's Vote: The US Senate on August 13 voted overwhelmingly to prohibit any aid to Indonesia and to end the training of Indonesians at American military schools.

The ban, passed by 62 votes to 28, was approved as an amendment to President Johnson's Foreign Aid Authorization Bill.

The amendment, introduced by Republican Senator John Tower, denied aid to Indonesia under the Foreign Aid or any other Act and terminated training of Indonesian military and police personnel at US bases or military schools or under US contracts.

It still has to be approved by the House of Representatives, but in its present form it goes beyond the US Government's action in deciding to stop new assistance projects, but continue existing commitments.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5209:IND:A]

B. Closure Of British Council Ordered: The Government announced on August 12 that it had decided to close British Council branches throughout Indonesia.

It said the Council should withdraw by the end of August.

A Foreign Ministry announcement said that Mr. P. R. Oliver, the British Charge d'Affaires, had been informed that the Government no longer considered it necessary for the Council's services to continue.

Mr. Oliver said he understood that although the Indonesians would insist on the Council ending its activities by the end of the month, the members of the staffs would be given longer to leave, depending on circumstances. He said he had told a Foreign Ministry representative that the decision was "unreasonable".

The Council's office in Djakarta, which was not harmed when Indonesians burned the British Embassy in September, 1963, was staffed by six Britons. There were branches, each staffed by one Briton, at Bandung and Surabaja. There were also two British lecturers at the University in Jogjakarta, one in Bali, and one in Malang.

IRAQ

A. Co-operation Between Iraqi and Egyptian Revolutions: Co-operation between the Iraqi and Egyptian Revolutions was hailed on August 2 in an official *communique* issued in Cairo at the end of the visit of an official Iraqi delegation to the UAR.

The Iraqi Premier, Lt.-Gen. Taher Yahya, and President G. A. Nasser expressed appreciation of the will for revolutionary changes shown by the recent socialist decrees promulgated in Iraq.

The communique, which was released simultaneously in Baghdad and Cairo, said that the UAR Revolution was the basis of all Arab revolutions and the driving force behind them.

It said that "the UAR armed forces stand in the vanguard of the struggle for the liberation of the Arab nation" and that the "UAR places them in the service of the major goals of the Arab nation."

The following is the communique:

"In these historical days through which our Arab nation lives, having at its disposal the means of making its own future and of attaining its dearest aspiration for unity—an aspiration long cherished by the successive generations of the Arab people and for the attainment of which the liberation revolutions which took place on the territory of the great Arab fatherland have worked, in consolidation of the ties of joint struggle, and on the occasion of the 12th anniversary of the Revolution of July 23, 1952, there arrived in Cairo on July 22, 1964 an official and popular delegation from the Iraqi Republic headed by Lt.-General Taher Yahya, the President of the Council of Ministers of Iraq.

"Members of this delegation included some members of the Iraqi Cabinet, the full-time Iraqi Ministers on the Joint Presidential Council, a number of officers of the Armed Forces, senior Government officials and representatives of the Arab Socialist Union in Iraq.

"The purpose of this visit was to congratulate the UAR people and to participate with them in their celebration of the 12th anniversary of the glorious July 23 Revolution—that revolution which was the basis of all Arab revolutions and the driving force for the pursuance of revolutionary work, in which the Arab people have imposed their will of revolutionary change with a view to establishing a society of sufficiency and justice and to affording the Arab nation a chance to carry out its humanitarian mission.

"These forces are the vanguard of the heroic struggle for the liberation of the Arab nation. They are placed by the UAR at the disposal and at the service of the great national aspirations of the nation, and to assist every Arab people who attain, through their struggle, the stage of revolution, as well as to eliminate imperialist influence in all parts of the great Arab world, especially in Palestine.

"During its visit the delegation followed the progress of the UAR in all fields of industry, agriculture, and construction, as a result of the application of socialist principles. The delegation also acquainted itself with the great development attained by the UAR in the various fields.

"And, in implementation of the May 26 agreement, several meetings took place during the visit between members of the delegation and the responsible officials of the UAR as well as between the full-time members of the Joint Presidential Council, during which several matters were discussed, relating to the implementation of the aforesaid agreement and concerning the confirmation of the existing co-operation between the two countries in the fields of education, agriculture, agrarian reform, planning and other domains.

"At the same time, and for the same purpose, several other meetings were held between the two sides, foremost among which the meeting between President Gamal Abdul Nasser and the members of the Iraqi delegation which took place on July 25, during which the President has welcomed the members of the delegation and expressed to them the importance of the encounter between the Revolutions of July 14 and 23 along the road of freedom, socialism and unity.

"He also expressed to them his appreciation of the will of revolutionary change in the Iraqi Republic, that will which was realised by the issuance of the recent socialist decisions.

"In their various meetings the two sides have confirmed their adherence to the decisions of the Arab Summit Conference as an effective means of combating Israel and its ambitions, as a means of restoring in full the usurped Arab rights in Palestine, and as an important factor in consolidating brotherly relations between the Arab countries.

"The two sides have also discussed Arab liberation causes in general and decided to continue to extend their material and moral support to the causes of Arab liberation in the Occupied Arab South, Oman and elsewhere until every part of the Arab fatherland is liberated from imperialist bases.

"The UAR side also had the opportunity to acquaint itself with the accomplishment of November 18 Revolution in attaining stability, maintaining peace throughout Iraq, and consolidating the national unity between the citizens and brotherly co-operation between the Arabs and the Kurds with a view to realising prosperity and well-being.

"The Iraqi delegation was afforded the opportunity to witness the termination of the work of the African Summit Conference, the issuance of its decisions and its success in confirming the unity of the African peoples and their solidarity for the sake of freedom and independence.

"The two sides were happy to note the declarations made by some of the African Heads of State concerning the rights of the Palestine people and the Arab people's right to unity."

ISRAEL

A. World Jewish Congress: Resolutions calling for action on behalf of Russian Jewry, stigmatizing anti-Semitism and neo-Nazism, demanding the abolition of the Statute of Limitations in regard to Nazi criminals, and urging measures against the activities of German scientists in Egypt were passed by the World Jewish Congress Executive at its closing session in Jerusalem on July 19.

The meeting had opened on July 12 and lasted five days, with the participation of over 100 delegates from abroad.

A major resolution called for direct talks between representatives of the Jewish people and the Soviet Union regarding the present position and future of the three million Jews living in Russia. Deep concern was expressed by the Congress for the fate of Russian Jewry, who, the resolution said, are being denied the basic rights of national and religious freedom and are cut off against their will from their Jewish brethren in other parts of the world.

The Congress appealed to the Russian authorities to permit the reunion of families who were torn apart as a result of the Second World War. It expressly dissociated world Jewry from any involvement in cold war politics.

The Congress warned against the resurgence of anti-Semitism in some countries and in particular against neo-Nazi activities in Latin America and Europe, and stigmatized the help given them by Arab League propagandists.

Another resolution called upon the West German Government to extend the Statute of Limitations in regard to Nazi war criminals and to ensure that they be put on trial. The Bonn Government was also asked to indemnify those victims of the Nazis who, in accordance with the present regulations, do not receive restitution.

A further resolution called for concrete steps by the West German authorities to prevent German scientists working for the Egyptian military industry, which is aimed at annihilating Israel.

The Congress appealed to other Governments to accelerate the extradition of Nazi war criminals, in order to have them tried and punished according to law. A resolution was also passed calling on all member-States of UN to take legal, administrative and educational measures against racial discrimination.

The Executive expressed its appreciation to the Polish Government for its efforts to perpetuate the memory of the Jewish victims of the Holocaust.

JAPAN

A. Increase In Exchange Reserve Rate: Exchange banks have been instructed by the Bank of Japan to raise their minimum exchange reserve rate against their borrowings of short-term foreign funds from 20 to 25 per cent.

The higher reserve took effect on August 1.

The funds include Euro dollars, call money, clean loans from foreign banks and non-residents' deposits of free yen.

(*The Times*, London)

[Prev. ref. 5611:JAP:A]

JORDAN

A. Mr. B. Talhouni's Policy Statement: In a statement before the Chamber of Deputies in Amman on July 29, the Prime Minister, Mr. B. Talhouni, said that the Palestine question "is the corner stone of Jordan's policy, because for Jordan it is a case of life and death."

He said Jordan needed continued assistance from sister Arab countries because Jordan "stands on the longest defence line of the Arab world in the face of the enemy lying in wait for us".

He said that the first Arab Summit Conference, held in Cairo in January formed "a new Arab defence line in the face of Zionist dangers and imperialist ambitions".

He promised that his Government would exert every effort to maintain and consolidate its relations of amity and brotherhood with other Arab countries and would contribute to the clearing of the Arab atmosphere and the maintenance of cordial relations among all Arab countries.

"The Jordanian Government will pursue this policy because it believes in a common Arab destiny and the inevitability of victory for the message of nationalism in realising freedom, unity and a better life".

Mr. Talhouni, who formed his Cabinet on July 6, said the first Palestinian National Conference held in Jerusalem recently was the "biggest positive step for the organization of the Arabs of Palestine to enable them to play their role side by side with other Arabs for the liberation of the usurped land of Palestine."

He said his Government was determined to promote Jordan's relations with Islamic countries "and continue its relations of cordiality and friendship with foreign countries on stable foundations of complete equality and mutual respect". "The Jordanian Government will not spare any effort to support liberation movements in the world."

He said that Jordan adhered to the United Nations Charter and the Universal Declaration of Human Rights "for the realization of more prosperity and progress for the whole of humanity."

Outlining his Government's domestic policy, he said his Government believed in the dignity and freedom of the Jordanian citizen.

The Jordanian Government intended to cut down expenditure and devote the largest part of its funds for the provision of a better life in accordance with the principle of the just distribution of services.

Referring to the Government's economic policy, he said the Government believed that "the Jordanian citizen is the country's wealth".

He declared that the Government would carry out economic development programmes in all fields within the framework of the freedom of Jordanian capital. Jordan would also welcome foreign capital, particularly from Arab countries, and would take measures to ensure that economic activities are free from exploitation and monopoly.

He said his Government would make every effort to strengthen the Jordanian armed forces in their stand on the longest defensive line of the Arab nation in the face of the treacherous enemy.

In the tourist field the Jordanian Government would inaugurate a sea tourist line between Jordan and the United Arab Republic through the port of Aqaba.

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5996:JOR:A]

B. Second Instalment Of Kuwait Loan: It was stated on July 31 that the Jordan Treasury had received a sum of JD1,000,000 from the Kuwait Government as the second instalment of the JD5,000,000 loan negotiated in April.

The first payment of JD3,000,000 was made two weeks after ratification of the Agreement and the final instalment is due within the next three months.

There has been a change in the financial policies of the Kuwait Government since this loan was made in April, and all loans are now made through the Kuwait Fund for Arab Economic Development (KFAED), rather than as direct Government-to-Government loans. By October, 1963, disbursements to Jordan through the KFAED had totalled KD812,-240. By April the amount disbursed from the Fund had reached KD1,046,666, and since then other amounts have been sent to Jordan to meet costs of the projects in progress (including the Yarmuk irrigation project and the development of the phosphates industry) out of the KD7½ million loan granted by the KFAED in 1962.

Disbursements from the Fund are not made in instalments in accordance with any fixed schedule, but are made to finance agreed lists of goods and are thus ruled solely by the progress of the project being financed.

(*Middle East Economic Digest*, London)

[Prev. ref. 5930:JOR:A]

KUWAIT

A. Budget Approved: According to information available on July 31, the Parliamentary Finance Committee made several amendments to the estimates in the draft Budget during its passage through the National Assembly and the following figures were finally approved:

Ordinary budget expenditure: KD111,-387,744 (a reduction of KD8,471,388 in the original allocation of KD119,359,132 but still some KD3,662,680 more than last year's figures); general reserve: KD3,569,773 (a reduction of KD9,317,217 on the original estimate and considerably less than the KD16,274,638 allocated to the reserve last year); development projects and property acquisitions: KD89,922,279 (an increase of KD17,788,605 on the original estimate and KD17,850,724 more than last year).

The Minister of Finance and Industry originally asked for an extra KD20 million for acquisition of property to be drawn from the general reserve, but it now appears that this sum has been provided for within the frame-work of the revenue estimate without recourse to the general reserve.

Some items of expenditure in the 1964-65 Budget are as follows, with the 1963-64 figures in brackets: Public Works KD8,-894,084 (KD8,284,616); Tele-communications KD2,128,835 (KD1,690,156); Education KD14,430,541 (KD12,627,513); Defence KD-10,500,000 (KD12 million); Public Health KD11,242,730 (KD10,212,010); Water and Electricity KD5,854,382 (KD5,625,880); Customs and Ports KD4,501,624 (KD4,717,-207); Housing KD2,425,510 (KD2,474,307); Emergency Reserve KD2 million (KD2,-702,683) and Aid to Arabian Gulf Emirates and Yemen KD2,528,253 (KD600,000).

Revenue from oil royalties and companies' income-tax is put at KD191,186,000 compared with KD183,500,000 in 1963-64, the increase being accounted for by a rise of KD7,186,000 in income-tax and KD2 million in royalties payable by the Kuwait

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Oil Company and a rise of KD500,000 in royalties payable by the Arabian Oil Company. There is an increase of KD866,-440 over last year in income from customs duties, stamp duties, etc. (KD6,245,012 as opposed to KD5,478,563 last year) and of KD8,808,539 in income from sales of State land and property, water and electricity rates, posts, tele-communications, etc. (KD204,879,796 compared with KD193,071,-257).

In the 1964-65 Budget the allocation for development projects and the acquisition of property represents 43.89 per cent of the total revenue compared with 36.75 per cent in 1963-64.

(*Middle East Economic Digest*, London)

[Prev. ref. 5912:KWT:A]

LAOS

A. 14-Nation Conference On Laos —Support To Soviet Proposal: A *communique* issued after a Cabinet meeting in Vientiane on August 4 said the Government welcomed "very favourably" the Soviet proposal for a meeting of the 14-nation Conference on Laos.

A New China News Agency report said on August 11 that the Pathet Lao leader, Prince Souphanouvong, had alleged massive attacks on Pathet Lao strongholds by Rightist and Neutralist forces. He demanded an immediate end to the attacks.

He made the demand in a letter dated August 6 to the co-Chairmen—Britain and Russia—of the Geneva Conference on Laos. He alleged that troops under Gen. Kong Lae had launched massive attacks in the north-central Plain of Jars to occupy the vital areas on strategic highways No. 7 and No. 13.

Prince Souphanouvong demanded withdrawal of Right-wing troops from Pathet Lao territory and urged the co-Chairmen to take "speedy measures to enforce strict implementation" of the 1962 cease-fire order.

He also urged the co-Chairmen to expedite the holding of another Geneva meeting attended by all signatory nations to the 1962 Geneva Conference to "safeguard the Geneva Agreements, ease the Laotian situation and maintain tranquillity in Indo-China and the rest of South-East Asia."

India's Support:

It was stated in New Delhi on August 5 that India had informed the Soviet Union of its full support to the latter's proposal for convening a 14-nation Conference on Laos at the earliest possible date.

A spokesman of the External Affairs Ministry said the Government hoped that other Geneva Conference countries were agreeable to the holding of the Conference "for consideration of urgent measures which would provide a peaceful settlement in Laos in accordance with the Geneva Agreements of 1962."

The Government instructed the Indian representative in Viet-Nam to have discussions with the Canadian and Polish members of the International Control Commission and also with the three Laotion groups to enlist their co-operation for the early convening of the 14-nation Conference.

The Indian representative was also instructed to suggest to the three factions in Laos that they could meet in Switzerland prior to the 14-nation Conference if they so desired.

British Stand:

At a news conference in Moscow, the British Foreign Secretary, Mr. R. A. Butler, explained his Government's stand on the Laotian question, particularly in the context of his discussions with Soviet leaders.

He said: "One of my major preoccupations in these talks (in Moscow) has been the situation in Laos. For more than a decade, Anglo-Soviet co-operation has helped to prevent the conflict in this small and distant country from spreading further. Twice, in 1954 and again in 1961, this Anglo-Soviet co-operation averted a real threat of war.

"As I told both Mr. Khruschev and Mr. Gromyko, we want this co-operation to continue—not in purely British interests, for we have none of our own in Laos, but for the sake of world peace. That is why I responded to the Soviet statement by proposing an invitation from the co-Chairmen to a Conference. When that proved unacceptable, I suggested that the co-Chairmen should make arrangements for the three parties in Laos to meet in Europe—a meeting which we understand is acceptable to both Prince Souvanna Phouma and Prince Souphanouvong. Alternatively, the co-Chairmen would have asked the International Commission to do so.

"It is my earnest hope that we shall soon find a way to continue our co-operation in this field. Meanwhile, as I explained to Mr. Gromyko, I feel I must make one more effort on my own to promote a conference on acceptable terms. I have accordingly asked the Governments represented on the International Commission in Laos—India, Canada and Poland—to try to arrange a meeting of the three parties in Laos. If the Laotians themselves could get together in the more tranquil atmosphere of Switzerland, perhaps they could agree on the terms for reconvening the Geneva Conference on the settlement of the Laotian question."

Asked whether he thought the Russians would abandon the co-Chairmanship, he replied that the Russians were awaiting replies to their suggestion for a conference of the original Geneva Powers on Laos, and they would not take a decision on leaving the co-Chairmanship until they got these replies. They had not made up their minds finally.

Asked whether he had sent a message to the member-countries of the International Control Commission to ask for their help in convening a Laotian meeting, he replied that from his contacts with the Indian and Polish Governments he knew that they were keen on helping to arrange this meeting. He had sent messages to the Governments of India, Canada and Poland, asking them to try to arrange a meeting of the three Laotian parties.

Asked whether this proposal was the same as the original Polish proposals, he explained the history of the two Polish proposals. He said he set hope on the idea of Prince Souvanna Phouma, after an approach by Prince Souphanouvong, that the Laotian parties should get together at a meeting to prepare an international conference. The idea was that such a meeting was to be the preliminary to a conference.

Answering a question about the Polish Government changing its position as a result of the visit, he said that he had no indication that the Polish Government had given up its idea of trying to hold a meeting. It could be that on his return to London there would be a further message from the Poles.

Asked what he thought the Russians expected would emerge from the holding of an unconditional conference, he replied that they would expect to achieve neutrality for Laos, and that the British Government was in agreement with the Russians. That was why he hoped the Russians would not abandon the co-Chairmanship. Neutrality was the only answer—that and the union of the three parties in Laos.

He noted that the Soviet Government thought that the Conference of the original Geneva Powers should be held without conditions, while other countries, including Britain, felt that a cease-fire and similar questions should be borne in mind and settled before a conference. That was why it was important for the three parties to meet first before the Conference.

Paris Chosen As Venue:

Meanwhile, the Prime Minister, Prince Souvanna Phouma, agreed on August 9 to a suggestion by Prince Souphanouvong that the tripartite meeting—of Rightist, Neutralist and Pathet Lao—be held in Paris for ending the civil war.

The meeting had been delayed as the parties could not agree to the choice of venue. New Delhi was one of the places suggested earlier, but the Pathet Lao leader did not agree to it.

[Prev. ref. 5943:LAO:A]

B. Collaboration With USA—Charge By North Viet-Nam: North Viet-Nam on August 5 accused Laos of placing its territory "at the disposal of USA and its accomplices with a view to launching attacks against North Viet-Namese territory."

This, it said, in a "strong" protest Note to Laos, was in complete violation of the 1962 Geneva Conference declaration on Laotian neutrality.

The North Viet-Namese news agency said the protest Note was sent to the Laotian Premier, Prince Souvanna Phouma, by the North Viet-Namese Foreign Minister, Mr. Xuan Thuy.

The protest Note mentioned the alleged bombing by four US planes coming from Laos of the North Viet-Namese frontier post of Nam Can and Noon village.

Mr. Xuan Thuy said these acts were "a flagrant provocation against the Democratic Republic of Viet-Nam. The provocations mentioned are part of the US plan of provocations against North Viet-Nam by intensifying the war of aggression in South Viet-Nam and by military intervention in Laos."

Laotian Denial:

The Viet-Namese charge was denied by the Laotian Government.

The denial was made in a letter addressed to Mr. Xuan Thuy, and signed by Gen. Phoumi Nosavan, a Deputy Prime Minister.

The letter said: "The Royal Government has never given authorization of this sort. Concerning the use of Lao territory by the Americans the Government makes a formal denial of this.

"To give formal proof of this, the Lao Government agrees to authorize the International Control Commission to make all necessary enquiries."

PAKISTAN

A. Exploitation Of India's Problems—Pakistan's Stand: In an article captioned "Pakistan's hand of friendship—an opportunity for India" issued by the Government's Press Information Department for publication in the Independence Day issues of newspapers on August 14, the Government said it could have exploited "to our advantage and with a great deal of justification" the situation in India following Mr. Nehru's death and the earlier Sino-Indian conflict, but for her goodwill towards the people and Government of India.

The article said that the death of Mr. Nehru "had plunged India into a great deal of confusion and nervousness". It was "synchronised with increasing internal and external problems in India". Had Pakistan any evil designs against India, she could have turned Mr. Nehru's death and the earlier Sino-Indian conflict "to her advantage and could have created a lot of embarrassment, if not difficulties, for that country." As a matter of fact, Pakistan could have done so "with a great deal of justification."

Increasing internal and external problems facing India, the article added, again could have been a reason for Pakistan seizing the opportunity against India. But the fact that she should have come forward with a "formal and public offer of a renewed desire to bring the two countries together on the basis of equality and mutual respect for the sovereignty of each other" was a clear proof of her goodwill towards India, in spite of "extremely negative gestures from the other side".

Ever since Mr. Nehru's death 2½ months ago, one of the favourite themes of Pakistan's leading political figures and newspapers has been "India's fast disintegration" and "her inability to keep various forces together."

They had also been claiming that Pakistan had done a great favour to India by having her flags flown at half-mast on Mr. Nehru's death and sending her Foreign Minister, Mr. Z. A. Bhutto to attend the funeral.

The article also spoke of India's "illogical attitude" on the Indo-Pakistan differences, particularly on Kashmir and went on to say that "it might be possible for India to make a fresh heartsearching and thus make a new approach." It was in the "interests of India itself and the sub-continent to come out with a constructive and courageous approach."

In view of "new political developments in India", it should be possible for her "to face facts and come to a settlement with Pakistan".

(*The Times of India*, New Delhi)

[Prev. ref. 5932:PAK:A]

B. Election Bill Passed: The National Assembly approved on August 8 a Bill to provide for the holding of elections to the National and Provincial Assemblies in 1965.

The Bill was passed without a division as the Opposition's views were accommodated by the Law Minister to a large extent by amending eight clauses.

The provision on oath, which had been strongly criticized by the Opposition, was changed to include a solemn declaration by a candidate to be faithful to Pakistan and the Government established by law. Every candidate will have to file such a declaration at the time of submitting his nomination papers.

Another significant amendment was to the effect that a candidate will not be declared elected unopposed on the rejection of the nomination papers of his rival or rivals unless any appeal filed against the rejection has been disposed of.

The Bill, comprising 114 clauses, provides that in future six women's seats in the National Assembly will be filled by candidates elected by the male members of the National Assembly on a zonal basis. Previously National Assembly women members were elected by the Provincial Legislatures.

Politicians disqualified under the Elective Bodies Disqualification Order up to December, 1966 have been debarred from contesting the 1965 elections.

However, a concession has been made in the case of politicians who were disqualified because of their detention under the Security Act. Those who were detained for less than nine months or politicians whose release from detention had taken place five years before the poll will be able to stand for election.

Winding up the week-long debate, the Law Minister claimed credit for President Ayub Khan's regime for holding elections on schedule. He said this was the first Government to give sufficient powers to the Election Commission in the interest of free and fair elections.

With the passage of this Bill, the Election Commission, headed by Mr. Muenuddin, will begin preparations for the General Election.

The election of 80,000 Basic Democrats who will constitute the electoral college for the legislatures and presidential election will be completed by October.

The President's election will be held in early March, 1965 to be followed by elections to the legislatures in May, 1965.

While the National Assembly will comprise 156 members, including six women, each of the two Provincial Legislatures will consist of 155 members.

(*The Statesman*, Calcutta)

C. F-M Ayub Khan Announces Candidature For Presidency: President Ayub Khan offered on August 14 to stand for another term as President, beginning in March, 1965.

Addressing a public meeting, he said he was not fond of staying in office. It was for the people to choose the next President and if they asked him, he would be available for another term.

He asked the people to exercise their vote in favour of one who could serve them best. He said he was not in favour of unopposed election.

This was the first public announcement by President Ayub offering himself for the next term for Presidentship.

A few minutes before he addressed the gathering, estimated at 25,000, there was an explosion. A long column of smoke could be seen from the Press enclosure, which was immediately below the dais.

(*The Statesman*, Calcutta)

[Prev. ref. 5820:PAK:B]

D. Withdrawal Of Accreditation To Newsmen: The Press Information Department of the Government has revoked accreditation to several journalists and photographers without assigning any reasons.

The Karachi Union of Journalists, in a resolution criticising the Department, named Mr. M. A. Mansoori, Special Representative of Karachi's Dawn as among those from whom accreditation facilities had been withdrawn. Mr. Mansoori was formerly the Dawn correspondent in New Delhi.

The resolution said if journalists of Mr. Mansoori's standing and integrity could be denied accreditation, "it can only lead to the conclusion that screening of journalists has at last started".

(*The Statesman*, Calcutta)

[Prev. ref. 5446:PAK:F; 5466:PAK:E; 5542:PAK:J]

E. Script Reform Committee Set Up In West Pakistan: The West Pakistan Government constituted on August 12 an 18-member Committee comprising leading educationists, litterateurs and journalists to examine the question of introducing *naskh* script in the writing and printing of Urdu.

The Committee, which is headed by Mr. Justice S. A. Rahman of the Supreme Court, will also examine the question as to how the change-over from the nastaliq to the naskh script could be done smoothly and what would be the implications in adopting the script in a reasonably early time.

The Central Secretary for Information and Broadcasting, Mr. Altaf Gauhar, and the Central Secretary, Education have been appointed as advisers to the Committee.

The West Pakistan Education Minister, Mr. Mohammad Yasin Wattoo, told a news agency that the Committee had been set up in accordance with a decision taken at the Governors' Conference held on May 22.

President Ayub Khan, he said, was very keen and had desired that the change-over should take place as early as possible.

[In his address delivered at the foundation-laying ceremony of the Urdu College, Karachi, in May, President Ayub Khan had remarked that "it is high time to consider the question of the future of Urdu script."]

VIET-NAM (DR)

A. Incidents In Gulf Of Tonkin—US Air Strikes: *Maddox*, a US Navy destroyer of the Seventh Fleet, was attacked by PT-boats belonging to North Viet-Nam in the Gulf of Tonkin off North Viet-Nam

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

on August 2. The attacks were repulsed.

American ships had moved into the area as part of the US efforts to strengthen its military build-up in South Viet-Nam.

[The US Seventh Fleet, the largest and most powerful American naval unit, is composed of 125 warships, including three aircraft carriers and 30 destroyers. Among the warships are the aircraft carriers Constellation and Ticonderoga, and the destroyers Maddox and C. Turner Joy, all at present patrolling in the Gulf of Tonkin. Some 60,000 men are assigned to ships in the Fleet, which operates in the Pacific. Among them are 1,800 US Marines. Commanded by Vice-Admiral Roy L. Johnson aboard the USS Providence, the Seventh Fleet possesses some 650 naval aircraft. Among these are fighter and interceptor aircraft equipped with the most modern weapons. The Seventh Fleet is divided into five "task forces". Seven or eight submarines are assigned to the Fleet. Marines aboard various ships in the Fleet can be used, if necessary, as a preliminary landing force to be re-inforced later by units of the First Division of Marines stationed at Okinawa —a division composed of 20,000 men.]

A North Viet-Nam Government spokesman on August 2 accused USA of using Laotian territory "to send military aircraft to bomb the territory of North Viet-Nam". (Please see page 5933 for intensification of US efforts to eliminate Viet-Cong in South Viet-Nam).

Following the Maddox incident, President L. B. Johnson of USA ordered the US Navy to double its destroyer force off the North Viet-Nam coast and to provide sufficient air cover to destroy any attacker.

He summoned newsmen into the White House on August 3 to inform them of this response to attack on Maddox, which was the first significant naval engagement of the war.

He said: "I have instructed the Navy: (1) To continue the patrols in the Gulf of Tonkin off the coast of Viet-Nam; (2) To double the force by adding an additional destroyer to the one already on patrol; (3) To provide a combat air patrol over the destroyers; (4) To issue instructions to the combat aircraft and to destroyers: (a) to attack any force which attacks them in international waters; (b) to attack with the objective of not only driving off the force but of destroying it.

"These instructions were conveyed yesterday to the appropriate people and they will be carried out."

He made no reference to North Viet-Namese allegations that American aircraft had attacked a village north of the border with Laos on August 1 and that American warships had shelled the two offshore islands of Hon Me and Hon Ngu on July 31. He entertained no questions, but the State Department later described both allegations as "without foundation."

American Charge Of Second Attack:

The US Defence Department announced on August 4 that a force of North Viet-Nam torpedo boats had made a deliberate attack during darkness on two American destroyers off the North Viet-Nam coast. Two of the attacking vessels were believed sunk.

A few hours before the new attack was revealed the State Department published a protest Note to North Viet-Nam giving a warning of the "grave consequences" of any further such incident. But authoritative sources said that by then the new incident had already begun.

They said the battle between the destroyers and supporting American aircraft against the North Viet-Nam torpedo boats lasted three hours. The weather at the time was "miserable", according to Defence Department officials.

The torpedo boats were driven off finally with no US casualties suffered, and no hits or damage on either destroyer. Although the announcement said the size of the North Viet-Nam force was undetermined, it was believed that at least two boats were sunk and two others damaged.

Retaliatory Air Strikes:

On August 5, the United States retaliated with crushing air strikes on five North Viet-Nam coastal installations.

President Johnson promised that that retaliatory strikes would be limited for the present.

About 60 small bombers, armed with bombs, rockets and cannon, and supported by 30 jet fighters, inflicted serious damage on four patrol boat bases and an oil depot in retaliation for the attack by torpedo-boats.

Flying 64 sorties in the space of five hours, the powerful Seventh Fleet lost two aircraft, but according to the US Secretary of Defence, Mr. Robert McNamara, destroyed or damaged approximately 25 torpedo boats and virtually destroyed an important oil bunker at Vinh. No nuclear weapons were used.

President Johnson ordered this severe but circumscribed retaliation after prolonged consultation with diplomatic and military advisers and congressional leaders. He also sent personal messages to Sir Alec Douglas-Home of Britain, President de Gaulle of France, Dr. Erhard of West Germany and other allied leaders, summarizing the action and informing them of his intended response.

Substantial Army, Navy, Air Force and Marine re-inforcements were sent to South-East Asia from the Western Pacific and were themselves replaced by units from USA. Supersonic jet fighters were sent to Saigon in case of retaliatory action by North Viet-Nam, and the nation held its breath to see how the communist forces intended to respond.

Addressing the American nation after midnight (August 5), President Johnson assured the people that for the moment US response to the North Viet-Namese attack would be limited and fitting. "We Americans know, although others appear to forget, the risks of spreading conflict. We still seek no wider war."

He said: "My fellow Americans: As President and Commander-in-Chief, it is my duty to the American people to report that renewed hostile actions against United States ships on the high seas in the Gulf of Tonkin have today required me to order the military forces of the United States to take action in reply.

"The initial attack on the destroyer Maddox, on August 2, was repeated today by a number of hostile vessels attacking two United States destroyers with torpedoes. The destroyers, and supporting aircraft, acted at once on the orders I gave after the initial act of aggression. We believe at least two of the attacking boats were sunk. There were no United States losses.

"The performance of commanders and crews in this engagement is in the highest tradition of the United States Navy.

"But repeated acts of violence against the armed forces of the United States must be met not only with alert defence, but with positive reply. That reply is being given as I speak to you. Air action is now in execution against gunboats and certain supporting facilities of North Viet-Nam which have been used in these hostile operations.

"In the larger sense, this new act of aggression, armed directly at our own forces, again brings home to all of us in the United States the importance of the struggle for peace and security in South-East Asia. Aggression by terror against the peaceful villagers of South Viet-Nam has now been joined by open aggression on the high seas against the United States of America. The determination of all Americans to carry out our full commitment to the people and Government of South Viet-Nam will be redoubled by this outrage.

"Yet our response, for the present, will be limited and fitting. We Americans know, although others appear to forget, the risks of spreading conflict—we still seek no wider war.

"I have instructed the Secretary of State to make this position totally clear to friends, to adversaries, and indeed to all. I have instructed Ambassador Stevenson to raise this matter immediately and urgently before the Security Council of the United Nations.

"Finally, I have today met with the leaders of both parties in the Congress of the United States, and I have informed them that I shall immediately request the Congress to pass a resolution making it clear that our Government is united in its determination to take all necessary measures in support of freedom, and in defence of peace, in South-East Asia.

"I have been given encouraging assurance by these leaders that such a resolution will be promptly introduced, freely and expeditiously debated, and passed with overwhelming support.

"It is a solemn responsibility to have to order even limited military action by forces whose overall strength is as vast and as awesome as those of the United States of America. But it is my considered conviction, shared throughout your Government, that firmness in the right is indispensable today for peace. That firmness will always be measured. Its mission is peace."

Hanoi Denial Of Second Attack:

Radio Hanoi denied on August 5 the US report of a second torpedo attack on American warships.

It called the report "a sheer fabrication by US imperialists aimed at covering up their illegal acts which brazenly violated the security of the Democratic Republic of (North) Viet-Nam and are aggravating further the situation in South-East Asia."

Referring to the first (August 2) exchange of fire between torpedo boats and the Maddox, it said this occurred in North Viet-Nam's territorial waters.

The American warship, it said, "encountered our patrol boats between Hon Me and Lach Truong in our territorial waters. In the face of provocations by the sea rovers, our patrol ships took action to defend our territorial waters. Afterwards our patrol ships returned to their base".

Quoting a spokesman of the North Viet-Nam People's Army High Command the agency said the "US imperialists and their henchmen" had sent new warships to encroach upon North Viet-Nam's territorial waters and shell Hon Me and Hon Ngu islands.

These activities coincided with those of US aircraft which took off from bases in Thailand and Laos to bomb the Nam Can border post and fire rockets on Noong De village near the Viet-Nam-Laos border. "The Government of the Democratic Republic of Viet-Nam (North Viet-Nam) regards them as extremely serious violations of the 1954 Geneva Agreements on Viet-Nam."

The High Command of the North Viet-Nam People's Army warned the US Government and its "henchmen in South Viet-Nam and Laos" that they "must bear responsibility for all consequences arising from their acts of provocation, sabotage and encroachment".

Casualties:

Radio Hanoi said later in the night (August 5) that anti-aircraft bat-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

teries defending the coast had shot down five US Air Force aircraft and damaged three others.

A statement said that one of the pilots of the aircraft brought down had been captured.

The Army High Command statement reported that the armed forces were "overjoyed by their successes" and were increasing their vigilance and combat readiness.

The statement broadcast by Radio Hanoi said the report of American losses was a preliminary one. It gave no details about the capture of the pilot. "This is an extremely brazen act of aggression and provocation of United States imperialists against the Democratic Republic of Viet-Nam."

In Washington Mr. McNamara told a news conference on August 6 reconnaissance photographs showed that the United States air strike against North Viet-Nam had destroyed seven anti-aircraft installations, as well as torpedo boats and a petroleum storage dump.

He said that the anti-aircraft installations were at Vinh, where the petroleum storage dump was attacked. He reported that there had been no further attacks on United States ships in the Gulf of Tonkin, and routine patrols there had been resumed.

He said he thought it probable that the Chinese communists would introduce some combat aircraft into North Viet-Nam. There was no indication that they had arrived.

New American Moves:

The US Defence Secretary, Mr. R. McNamara, said on August 5 that he had moved to re-inforce the Pacific area.

These moves included: (1) transfer of an aircraft carrier group from the First Fleet in the Atlantic to the Western Pacific; (2) movement of intercepter and bomber aircraft into South Viet-Nam; (3) movement of fighter bombers into Thailand; (4) transfer of intercepter and fighter bomber squadrons from the United States "to advanced bases in the Pacific"; (5) movement of an anti-submarine force into the South China Sea; and (6) the alerting and readying of selected army and Marine forces.

He stressed that "there were no civilian centres near the bases" that were attacked in North Viet-Nam.

Meanwhile, swarms of American jet fighters flew into Saigon from bases in Japan, the Philippines and Formosa as part of the military action ordered by President Johnson.

Russian Criticism:

Tass in a statement on August 5 called the presence of US ships and planes in the Gulf of Tonkin "absolutely unjustified" and part of an openly hostile act towards North Viet-Nam and China.

The Tass statement added: "Already now it is becoming clear that the presence of US naval forces in the Gulf of Tonkin has created there a situation fraught with dangerous complications. One cannot but consider that the new American military actions are undertaken under the conditions when reactionary forces in the United States and the South Viet-Namese military, who are obeying their will, are persistently clamouring for extending the sphere of American intervention, and military operations to the Democratic Republic of Viet-Nam. In this connexion it should be recalled that on August 1 there already took place an intrusion into the air-space of the Democratic Republic of Viet-Nam when four American planes, as the Democratic Republic of Viet-Nam Government had stated, bombed and strafed a frontier post and a village in the Ky-son area 20 kilometres from the Viet-Namese-Laotian frontier.

"All this is in plain contradiction to the statements of the American side to the effect that it does not seek to extend the war in South-East Asia.

"Competent Soviet circles resolutely denounce the aggressive actions of the United States in the Gulf of Tonkin which lead to a dangerous exacerbation of the situation in South-East Asia, tense as it is. Such actions, further rash steps or provocations in that area, could cause events capable of converting the incidents that took place there into a broad conflict with all the ensuing dangerous consequences. The responsibility for such consequences would, naturally, devolve on the United States of America."

Chinese Warning:

China warned USA on August 6 that its attack on North Viet-Namese bases meant aggression against China and had gone over the "brink of war."

A Government statement said that the "debt of blood" to the Viet-Namese people must be repaid. The Chinese people would not sit idly by without lending a helping hand.

It said USA must stop "armed provocations" against North Viet-Nam, "otherwise the US Government must be held responsible for all the grave consequences arising therefrom."

It charged that US attacks on North Viet-Nam constituted the first step in extending the war in Indo-China.

Of the incident on August 4 in the Gulf of Tonkin, the statement added: "The facts proved and will continue to prove that this so-called incident is an out-and-out-lie, purposely fabricated by US imperialism in order to extend the war in Indo-China."

British Support For US Action:

A statement from the British Premier's office declared Britain's support for the US action.

It said: "The Prime Minister and the Foreign Secretary have reviewed the situation in South-East Asia. As regards the North Viet-Namese attacks on the United States naval forces, Her Majesty's Government made their position clear in the Security Council when they supported the action taken by the United States Government in accordance with the inherent right of self-defence recognized by Article 51 of the Charter of the United Nations.

"They share the desire of the President of the United States to avoid the risk of spreading conflict. Her Majesty's Government intend to play their full part in the Security Council, and are determined to do what they can to assist in reducing the international tension that has inevitably resulted from these North Viet-Namese attacks."

India's Concern:

A Government of India spokesman said in New Delhi on August 5: "The Government of India has been distressed to learn about the latest serious clashes between the North Viet-Namese and US naval units in the Gulf of Tonkin following earlier incidents in the same region between North Viet-Namese torpedo boats and the US ship *Maddox* on August 2.

"The Government of India had learnt from President Johnson's broadcast this morning about the action taken by US forces against North Viet-Namese torpedo-boats and 'certain supporting facilities.'

"The Prime Minister has also received a message from President Johnson on the subject. These incidents have caused grave concern.

"The Government of India is deeply disturbed at these developments as they threaten peace in South-East Asia. It hopes that the explosive situation created by these incidents will not be further aggravated. It is imperative that at least the uneasy peace which prevailed in this area before these incidents should be restored immediately. It trusts that consideration of the situation by the Security Council will help to prevent further clashes and incidents."

The Indian Prime Minister, Mr. Lal Bahadur Shastri, on August 8 welcomed Mr. Adlai Stevenson's statement in the Security Council that USA would welcome the restoration of the 1954 position in Viet-Nam.

He told newsmen that he "wholeheartedly" agreed with this view, since India herself was "hundred per cent in favour of restoring the 1954 position."

India, he stressed, did not want an escalation of the conflict in Viet-Nam. The Government had already expressed its views on the unfortunate developments there. It would be better to wait and see how the Security Council proposed to tackle this problem.

He had no definite information whether North Viet-Nam would take part in the Security Council debate. "If North Viet-Nam goes, only then will the representative of South Viet-Nam go."

Addressing the Congress Parliamentary Party, the Foreign Minister, Sardar Swaran Singh, said earlier that India viewed the recent naval incidents in the Gulf of Tonkin with grave concern. He also expressed the hope that the Security Council would be able to deal with this situation satisfactorily and help restore peace in Viet-Nam.

Despite questions by several members, he did not disclose whether India proposed to make any specific move to resolve this conflict. He conceded, however, that as Chairman of the International Control Commission India had certain responsibilities for the maintenance of peace there.

North Viet-Nam Government's Statement:

The North Viet-Nam Government issued on August 6 a statement saying that American jets had bombed and strafed a "number of places in the Vinh Ben Thuy area, in the Gianh river mouth, and close to Hon Gay town, causing losses to the people there".

The statement "strongly denounces to world public opinion" the United States "war acts", and demanded that USA "stop at once all provocative and sabotaging acts against the Democratic Republic of Viet-Nam."

It described the attacks as "obviously a premeditated war act" which "exposes even more clearly the design to invade North Viet-Nam and extend the war there".

The US action was "an extremely crude violation of international law and the 1954 Geneva Agreements on Indo-China, and increases the danger of war expansion in Indo-China and South-East Asia".

The statement added: "Any provocative and sabotaging act against the Democratic

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Republic of Viet-Nam will certainly be brought to failure by the strength of the entire Viet-Namese people. The United States Government and its henchmen must bear full responsibility for the serious consequences of their bellicose acts in that area."

The Foreign Minister, Mr. Xuan Thuy, protested on August 5 against "provocative attacks" by "the United States and its agents."

The protest was contained in a letter addressed to Britain and Russia, co-Chairmen of the 1954 Geneva Conference, other participants in the Conference, and countries making up the International Commission in Viet-Nam—India, Poland and Canada.

Mr. Xuan Thuy's letter said that on the night of July 30, the United States and the South Viet-Nam administration "dispatched naval vessels to intrude into the territorial waters of the Democratic Republic and simultaneously to shell two of her islands—Hon Ngu and Hon Me".

"At noon on August 1, 1964, four United States T-28 fighter-bombers coming from Laos bombed and fired rockets at the Nam Can frontier-post visibly flying the national flag, about seven kilometres (about 4½ miles) from the Viet-Nam-Laos border. They also raided the Noong De village about 20 kilometres (about 12 miles) from the same border. The two places belong to Ky Son district, Nghe An province.

"At noon on the following day (August 2, 1964) seven United States AD-6 and T-28 fighter-bombers coming from Laos launched a second attack against the Nam Can post." These "provocative raids" injured five persons.

Appeal To ITSC:

The Government of North Viet-Nam appealed to the International Truce Supervisory Commission (ITSC) to investigate the naval incidents in the Gulf of Tonkin and the subsequent US bombing.

The appeal was made by the Foreign Minister of North Viet-Nam, Mr. Xuan Thuy in a Note to the Indian Chairman of the International Commission.

A copy of the Note was later handed to the Commonwealth Secretary, Mr. C. S. Jha, by the North Viet-Namese Consul-General in New Delhi.

According to New Delhi reports the Indian view was that the Commission could only investigate complaints against countries covered by the Geneva Agreement, which USA is not.

[An account of the discussion on the Gulf of Tonkin incidents in the UN Security Council will appear in a subsequent issue of **Asian Recorder**.]

(*The New York Times*, *The Times*, London, *Tass* and *The Times of India*, New Delhi)

[Prev. ref. 5933:RVN:A]

VIET-NAM (RVN)

A. Evacuation Of US Troops—Soviet Appeal: The Soviet Union has called for total evacuation of US troops and military equipment from South Viet-Nam.

The move came in a proposed draft message from the co-Chairmen of the 1954 Geneva Agreements—Britain and the Soviet Union—handed to the British Embassy on July 6.

The draft proposal—reported by Izvestia—said the co-Chairmen "expect that the United States halt its interference in the internal affairs of South-East Asia and completely evacuate military personnel and armaments from Viet-Nam."

The draft also proposed that the co-Chairmen warn the United States "about its responsibilities for the strict observance of the Geneva accords of 1955."

According to a report from Tokyo, China warned on July 7 that she would not stand idle if the South Viet-Namese war was expanded to the Communist-controlled North. "China and the Democratic Republic of (North) Viet-Nam are fraternal neighbours closely related like the lips and teeth. The Chinese people cannot be expected to look on with folded arms in the face of any aggression against the Democratic Republic of Viet-Nam."

The assurance of helping North Viet-Nam was given by China's Foreign Minister, Marshal Chen Yi, in a letter to the North Viet-Namese Foreign Minister, Mr. Xuan Thuy. The text of Marshal Chen Yi's letter was made public on July 7 in a broadcast.

Filipino Aid In War Against Communists:

Meanwhile, President D. Macapagal proposed on July 7 that the Philippines give economic aid and technical assistance to South Viet-Nam to support its war effort against communist guerrillas.

He made the proposal to Congress on the recommendation of the National Security Council, a top-level advisory body which includes Cabinet members and political leaders of both parties.

He urged Congress to approve the proposal and appropriate the necessary funds before the current special session ended.

(*The Times of India*, Bombay)

[Prev. ref. 5854:RVN:A]

B. White Paper On Communist Aggression: The Government issued on July 14 a White Paper on Communist aggression to inaugurate a "National Shame Week."

The "Week" commemorated the signing at Geneva on July 25, 1954 of the Geneva Agreement that ended the Indo-China war and split Viet-Nam into two. The Viet-Namese blame the French authorities for "selling North Viet-Nam to communism."

Distributing the White Paper the Foreign Minister, Mr. Phan Huy Quat declared: "This year we are commemorating this day in distress and hate because more than ever this year is marked by savage Viet-Cong attacks against the civilian population and by violent fighting by entire units of soldiers coming from North Viet-Nam".

The White Paper, giving details of crimes and atrocities by the Viet-Cong, contained confessions from Viet-Cong prisoners about the training they had received in North Viet-Nam and their infiltration routes into the South, and also pictures and details of Communist weapons found after battles in South Viet-Nam.

He said his Government "is not keen" on expanding the war into North Viet-Nam. He threatened, however, that "if the Viet-Cong persist in pursuing their aggression in the South they will bear all the consequences of such an adventure."

Asked by newsmen if this constituted an ultimatum to North Viet-Nam, he said: "It is to show clearly to the Communists our determination in the coming months, if the situation obliges us to act strongly, that we have concrete measures to make sure we survive."

North Viet-Nam Charge Against USA:

The same day (July 14), the Hanoi Government charged that USA was not only stepping up the war in South Viet-Nam, but was "plotting to expand it to the whole of Indo-China."

The indictment was contained in a Note addressed to Britain and Russia, the co-Chairmen, the member-countries constituting the International Control Commission and the signatories to the 1954 Geneva Agreement.

The Note was timed to coincide with the 10th anniversary of the signing of the Agreement (July 20).

The Hanoi administration accused USA of betraying its pledge at the Geneva Conference. USA had instigated Saigon to prevent the holding of a consultative conference and a general election to bring about the re-unification of Viet-Nam.

US Stand:

Meanwhile, on July 1, the US Secretary of State, Mr. Dean Rusk, said that it should be possible to achieve peace in South-East Asia, ensuring the independence of the countries in the region, "without any extension of the fighting."

He told a news conference: "Our first objective is to explore that possibility." But he emphasized that US interest in peace did not mean "acquiescence in aggression" by the Communists in Laos and South Viet-Nam.

Asked whether the Administration was blowing hot and cold on South-East Asian war dangers, he said that the situation was indeed very risky and gravely dangerous in that USA did not control all the critical decisions, which would depend on what the Communists did.

He described the future as "crowded with uncertainty." He did not see any possibility that Laos or South Viet-Nam could be moved towards peaceful solutions by "throwing the question overnight into the United Nations."

He sought to minimise recent Washington reports that the Johnson Administration was prepared to risk war with China, if necessary, to stem the Communist tide in Asia.

He said there was a "risky and dangerous situation" in South-East Asia, but "everyone knows the United States wants peace there—a peace allowing Laos and South Viet-Nam to maintain their independence without interference from North Viet-Nam and China. Now peace obviously is not obtained by going out and looking for war—although there is always the risk of further development in dangerous confrontations of this sort. Peace ought to be possible in South-East Asia without any extension of the fighting.

"Therefore, the first objective of our policy and our desire in South-East Asia is to exploit that possibility.... But peace cannot be obtained by acquiescence."

He said he shared with Mr. Henry Cabot Lodge an optimism that with perseverance the campaign to stamp out Viet-Cong guerrillas in South Viet-Nam would be won.

He was asked what further steps he felt would be necessary for USA to take if Communist forces failed to halt their aggression in South-East Asia.

In a long reply, he declared that it was difficult to talk with any precision about the future because there were many Governments and authorities involved, as he put it, in "the writing of this scenario."

He cited the Governments and peoples of South-East Asia, the members of S-EATO, the Communist authorities in Laos, North Viet-Nam, China, the Soviet

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Union and the three Governments of the International Control Commission—India, Canada and Poland.

"What seems to me to be very simple," he said, "is that the US objective, as President Johnson has stated, is peace in South-East Asia."

U Thant's Proposal:

The UN Secretary-General, U Thant, told a news conference in New York on July 9 that the reconvening of the 14-nation Geneva Conference on Viet-Nam was the only sensible way to solve the crisis in that country.

His comments added strength to the growing opinion in South-East Asia that the South Viet-Nam problem was primarily a political question and that it could not be solved by military means.

In Washington, the US State Department indicated it did not support U Thant's view that the Geneva Conference on Viet-Nam be reconvened.

Mr. Richard Phillips, State Department spokesman, declined to comment officially on U Thant's suggestion. But he recalled the Secretary of State, Mr. Dean Rusk's statement that it would be preferable for Viet-Nam's neighbours to respect the 1954 Agreement on Viet-Nam and leave the country alone than to call an international conference.

In London, U Thant's proposal to reconvene the Geneva Conference was received with surprise. Whitehall circles said they had received no previous warning whatever and the news had caused lively interest in diplomatic circles.

Informed British circles said that U Thant's proposal particularly concerned the co-Chairmen of the Conference, Britain and the Soviet Union, and they thought it probable that U Thant would lose no time in making Britain and the Soviet Union aware of his thinking on the matter.

US rejection of U Thant's appeal was a foregone conclusion. But the main American worry over it would be the effect of this pronouncement, involving as it does the prestige of the UN Secretary-General, on the momentum of increased US war effort in South Viet-Nam.

Americans had made no secret of their pique at the French proposal to neutralize the Indo-China States. U Thant's forthright endorsement of a political solution could, therefore, only increase American dismay.

During the recent Laotian crisis it had been USA's constant endeavour to restrict an eventual 14-nation Geneva Conference to Laos. This American pre-occupation had stemmed from the fact that as and when Washington was ultimately forced to the conference table on the South Viet-Nam issue, it should be in a better bargaining position than it was now.

Meanwhile, the South Viet-Nam Foreign Minister, Dr. Phan Huy Quat, has invited U Thant to come to "this country to register the facts and have a realistic idea about the situation here."

C. Intensification Of War Against Viet-Cong Guerrillas: Reports from Saigon and Washington in the last week of July suggested that President L. B. Johnson had ordered intensification of the war against the Viet-Cong guerrillas.

The President, it was said, had decided to send between 5,000 and 6,000 more men to South Viet-Nam in a major effort to crush the guerrilla campaign.

There are about 16,000 Americans serving as military advisers to the South Viet-Nam Government, as training staff for local forces and anti-guerrilla units, and as combat advisers in action against the Viet-Cong in the field. The imminent increase of more than one-third in the number of Americans was said to reflect the President's determination to give all possible aid to the Prime Minister, General Nguyen Khanh.

More than 1,100 Americans have been killed, wounded, or reported missing in United States operations in South Viet-Nam since the beginning of 1961 when the American build-up in the country started.

Reports of the increased American military aid effort were confirmed in Saigon by an official announcement on July 27.

The announcement said: "The Prime Minister (of South Viet-Nam) has been informed by Ambassador (Maxwell D.) Taylor that in support of the pacification programme mutually agreed upon between the Republic of Viet-Nam and the Government of the United States, the Government of the United States has approved a substantial increase in the number of American military and civilian advisers in Viet-Nam.

"The major portion of this increase in American military and civilian personnel will be devoted to strengthening the present American advisory effort in four major areas:

"(1) It will extend and re-inforce the American military advisory effort with the lower echelons of the regular Viet-Namese armed forces, particularly with army battalions, navy patrol units and air force squadrons.

"(2) It will provide a major increase in US special forces to augment training and operational support for our own special units to enhance capacity for guerrilla actions against Viet-Cong units and bases and to deal with infiltration across our borders.

"(3) It will increase the American military advisory assistance throughout the provinces in order to place greater stress on improvement of our regional and popular forces.

"(4) It will increase the number of American civilian advisers at all levels in order to provide for even closer co-operation with Viet-Namese officials in such fields as economic development, public administration, health, police forces, agriculture and general welfare.

"This increase in American personnel, which will commence immediately, will be paralleled by an increase in US support elements to include helicopters, transport aircraft, communications and service personnel.

"The augmentation of the American effort in Viet-Nam does not reflect any change in concepts agreed to between the Republic of Viet-Nam and the Government of the United States that American personnel will serve in an advisory capacity nor will it change present operating relationships between Viet-Namese and American officials.

"Accordingly, the American personnel are serving and will serve in Viet-Nam in their capacity as advisers only.

"This increase in American assistance, coupled with the constantly increasing support of many other nations in response to our call for aid, should serve as a warning to the Communist aggression in Hanoi that the 'free world' is determined to help the Viet-Namese Government and people in their struggle for freedom and independence.

"The American assistance serves particularly as concrete evidence of America's continued determination to provide whatever resources are necessary to assist us in this effort.

"The Republic of Viet-Nam welcomes this action of the Government of the United States."

Gen. de Gaulle's Proposals:

Observers saw in increased American military assistance the US Government's total rejection of the proposal of the French President, Gen. de Gaulle, for neutralization of Viet-Nam.

Addressing a news conference in Paris on July 23, Gen. de Gaulle had proposed that the United States, the Soviet Union, China and France agree to get out and stay out of the Indo-Chinese peninsula as a means of ending the fighting in Laos and South Viet-Nam.

He had named these four Powers as those that had "direct responsibility" for the past and future of Viet-Nam.

France's interest springs from cultural and economic ties formed when Indo-China was a French Colony.

This was the first of the General's two conditions for peace in South-East Asia.

The second was a proposal for a massive programme of economic and technical aid for the peoples of North and South Viet-Nam, Laos and Cambodia once the fighting had ended.

He asked for a return to the Geneva Agreement that no foreign Power should intervene in any fashion in "these unfortunate countries." The French proposed that the nations who signed the 1954 accords should be summoned to organize necessary guarantees against foreign intervention.

[The US State Department turned aside President de Gaulle's proposal for a new international conference on South-East Asia. In London, British officials did not appear to be impressed by his renewed call for neutralization of Indo-China; they said that neutralization was no longer practical.]

Chinese Support To Guerrillas:

Addressing a rally in Peking on July 20, the Chinese Premier, Mr. Chou En-lai, pledged his country's support to the guerrilla forces in South Viet-Nam.

The rally marked the climax of a "week of common struggle in support of the Viet-Namese peoples' opposition to US imperialist aggression" which has coincided with the 10th anniversary of the signing of the Geneva Agreements on Indo-China.

A Government statement obliquely threatening to send troops to Indo-China if the Americans extended their war of aggression there took pride of place in Chinese newspapers under the banner headline: "China won't sit idly by while the USA extends the war of aggression in Viet-Nam and Indo-China."

Elaborating the statement in an editorial, the **People's Daily** told the US Government it would do well to bear in mind that "the Chinese Government and people always mean what they say."

Meanwhile, in Saigon the Government on July 20 made another veiled threat to carry the war to the (Communist) North.

A Government statement, marking the 10th anniversary of the Geneva accords declared: "If Red China and Red Viet-Nam...continue their war of aggression, the Government and the entire people of Viet-Nam will step up the war with determination until total victory liberates the whole of our national territory."

In North Viet-Nam **Radio Hanoi** made a special announcement to coincide with the anniversary.

It said: "From 1961, the North Viet-Namese people and their armed forces

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

annihilated and put out of action 323,000 enemy troops including 2,281 American aggressors, shot down or damaged 1,363 aircraft, destroyed 1,000 armoured amphibious cars, sank 620 gunboats and motor boats including the 15,000-ton aircraft carrier Card, overturned 55 military trains and captured 35,000 guns of various sizes.

"Besides, they destroyed about 6,500 'strategic hamlets', liberating eight million persons and three-quarters of South Viet-Nam's territory.

"In the same period, political struggles against US imperialists and their henchmen drew large numbers of people totalling some 90 million."

In an interview with **L'Humanite** of Paris on the 10th anniversary of the Geneva Agreement, Dr. Ho Chi-Minh laid the blame for the situation in South-East Asia entirely on the "American policy of aggression."

He said USA had "shamelessly violated" Articles 16 and 17 of the Agreement expressly forbidding the dispatch to Viet-Nam of any re-inforcements of arms and ammunition of any type.

He said: "The aggravation of the situation in Viet-Nam and in Indo-China is precisely due to the fact that during the last 10 years USA has trampled on the Geneva Agreement and followed a policy of intervention and aggression in this part of the world."

He accused USA of burning and destroying hundreds of villages, massacring thousands of people and driving millions into concentration camps in its "pursuit of peace".

He also charged USA with utilizing South Viet-Nam to intervene in Cambodia and Laos.

(*The Times*, London, *The New York Times* and *The Times of India*, Bombay)

[Prev. ref. 5768:RVN:A]

D. Emergency Proclaimed: The Prime Minister, Major-General Nguyen Khanh, declared on August 7 a State of Emergency throughout the country.

He also urged the people of North Viet-Nam to "stand up and overthrow the dictatorial party rule" of their communist Government.

He ordered immediate implementation of a series of stringent measures tightening his Government's control over the population and safeguarding the country against threatened large-scale communist attacks.

The measures included censorship of the Press and all public information media, controls on travel and food distribution, the establishment of regional curfews where dictated by local security requirements, enlarged authority of detention and house arrest, unlimited search rights in private houses, and a ban on strikes and demonstrations or meetings "considered harmful to public order".

The death penalty after an urgent trial before a military court was ordered for persons caught in terrorist activity.

The same day (August 7) the Government announced a curfew in Saigon from 11 p.m. to 4 a.m.

Maj.-Gen. Khanh said his Government had intelligence reports that Chinese troops had been massed along the southern frontier of China and furthermore were "stationed—not infiltrated but stationed—in North Viet-Nam itself."

YEMEN

A. Co-ordination Pact With UAR: At a ceremony in Cairo on July 15, a Co-ordination Agreement between Yemen and UAR was signed by President Abdullah Sallal and President G. A. Nasser.

President Nasser said that with the signing of this Agreement there was now common action between the United Arab Republic, Iraq, Algeria and Yemen.

President Sallal described the Agreement as the "signal marking the start of our movement on the road of Arab unity".

The following is the Agreement:

"Having faith in the Arab entity and in order to assert the unity of the Arab nation, springing from the common thought, conscience and destiny shared by the Arabs and to achieve their hope which derives its essence from the facts of history and the reality of the Arab nation's life, the Arab nation, in struggling to realise its great objectives, finds itself constrained to hold on to its unity, in belief and action, and to strive to restore to life on its soil its true image and genuine nature.

"The Arab nation, in its struggle, realises through conviction and experience that the present political disintegration of the Arab homeland, is but a false image which reflects an artificially divided State-barriers imposed by imperialism to accord with its ambitions and to enable it to exploit and dominate the Arab nation.

"It has become clear, genuinely and without doubt, from the pioneering experiment by Arab people in Syria and Egypt, which gave birth to the United Arab Republic, that the hope of the Arab nation in union is not a remote one but a reality, ever present in the life of the Arab nation in all its dimensions and normal elements.

"The forces of imperialism and reaction joined in an alliance against the cherished hope of the entire Arab nation and the forces of evil joined hands with them to plot the crime of secession in order to preserve the artificial conditions in the Arab homeland, as they were imposed for spoliating the rights of the Arabs.

"From the execution of the crime of secession, a moral, rich in lessons, came to light, further illuminating the paths of Arab struggle, revealing their details to the Arab people that they might arm themselves with all manner of protection for their unity as they march on.

"The forces of evil, injustice and imperialism entertained the illusion that the tide of Arab struggle would recede and waste itself away after the secession. But the revolution for liberation, carried out by the Arab people in Yemen against the rule of despotism, exploitation and backwardness, provided conclusive proof of the vitality of the Arabs and the strong sinews of the Arab nation, undeflectable in its persistence in wresting its right to freedom and social justice—that right ordained by God's law and the doctrine of His Prophet. The Yemeni revolution was a major turning point in the Arab struggle.

"The revolution of the Yemeni people broke out despite the severe circumstances around it and the many forms of intense terrorism, to which it was subjected. The Yemeni revolution proved the obstinate will of the Arab people's struggle for the truth of their revolution and their persistent striving to bring about profound change in their life and realise the great aspirations of the Arabs.

"The forces of evil, allied with imperialism, rose to stand against the revolution of Yemen, throwing all their weight in their bid to destroy it and execute a fresh crime against the legal right of the Yemeni people to revolution, freedom and progress. But the road of struggle before the Arab nation had now gained the protection of experience gained from the crime of secession.

"The United Arab Republic, conscious of its responsibilities as the base of Arab struggle for the consolidation of Arab freedom and the protection of the Arab nation's legitimate right against any aggression, hastened to rally to the side of the Yemeni people's revolution since the very moment the forces of aggression revealed their intentions.

"The United Arab Republic extended to the Arab revolution in Yemen all aid and strength, joining with it in the battle for life, rights and freedom, against the armed imperialist-reactionary aggression until victory for the Arab people of Yemen was confirmed.

"The blood of the heroes of the two peoples, the Egyptian and the Yemeni, wrote the articles of true union which will live on immortally, while winning victory for the great Arab struggle and for the Arabs.

"The battles fought together on the soil of Yemen imposed a strong union between the two peoples when the blood of their heroes blended on the fields of their heroic battles against the enemies of the Arab nation. It was there that this profound unity was written before any talks were held for setting up organizations for co-ordinating steps for putting it into constitutional form.

"The two peoples were joined together in a common revolutionary concept for setting up a society where sufficiency and justice prevail, to which the Arab social struggle aspires and strives with God's help and according to the teachings of the islamic faith, in order to give Arab unity a social as well as a political foundation, expressing the Arab peoples' determination to build themselves a new and free future.

"Pursuing these objectives and setting a solid foundation for them and in the name of God and with His help, Abdullah el Sallal, the President of the Arab Republic of Yemen and Gamal Abdul Nasser, the President of the United Arab Republic, have set their hands to the following, on behalf of the peoples of the United Arab Republic and the Arab Republic of Yemen, and their Governments:

"**Article 1:** A joint Co-ordination Council between the United Arab Republic and the Arab Republic of Yemen shall be formed of the President of the UAR, the President of the Arab Republic of Yemen and a number of members.

"**Article 2:** (a) The joint Co-ordination Council shall meet once every three months, and it shall meet in urgent cases with the agreement of the Presidents of the two contracting Republics; (b) The headquarters of the joint Co-ordination Council is the city of Cairo and the Council may be convened in another place with the agreement of the two Presidents.

"**Article 3:** Resolutions of the joint Co-ordination Council are binding and are effective immediately after approval of the Council, except for those resolutions which require the making of a law. The latter shall be put into effect after approval according to the constitutional process in each of the two countries.

"**Article 4:** The joint Co-ordination Council follows the internal regulations which shall be laid down by the Council and will be effective immediately they are approved by the Council.

"**Article 5:** The joint Co-ordination Council is concerned with the following:

(a) The study and implementation of the necessary steps for the establishment of unity between the two countries;

(b) The planning and co-ordination of the policies of the two countries in political, military, economic, social, cultural and information fields;

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(c) The achievement of intellectual unity between the two peoples of UAR and the Arab Republic of Yemen through the two people's organizations in the two countries and by working for the unification of the two organizations in the future.

"Article 6:

(a) Each Government appoints their members on the Council as follows: (1) Three full-time members with ministerial status; (2) Three part-time members from among the members of the Government;

(b) The full-time members will follow up the implementation of the joint Co-ordination Council resolutions, co-ordinate work between the joint committees, and submit studies and recommendations to the joint Co-ordination Council when convened;

(c) The joint Co-ordination Council and the joint committees may invite experts and technicians from the two countries to attend their meetings if necessary.

"Article 7: The following joint organizations shall be formed: (a) Political committee. (b) Military command. (c) Economic committee. (d) Cultural and information committee. (e) Unification of thought committee between the two countries. (f) People's organization committee. (g) Any other committees, the formation of which is found necessary. These committees shall study and prepare the various subjects calculated to realise the object of this Agreement as well as the subjects referred to by the joint Co-ordination Council.

"Article 8:

(a) The joint military command shall be concerned with co-ordinating, arming, training and equipping the Armed Forces of the two countries.

(b) The joint military command shall take the necessary measures to face war. Any attack or threat to attack on any of the two contracting parties shall be considered as directed against the other contracting party.

"Article 9: The Council shall have a general secretariat with its seat in Cairo. It will be administered by a secretary-general with the rank of Minister. Its duties shall be as follows:

(a) To extend invitations for the convocation of the joint Co-ordination Council.

(b) To prepare issues to be discussed by the Council.

(c) To record the minutes of the sittings of the joint Co-ordination Council and the joint organizations and the publication of the decisions after their approval by the constitutional methods adopted in each of the two countries.

(d) To draw up the budget of the Council, the general secretariat and the joint organizations specified in Article 7.

"Article 10:

(a) The budget of the joint Council and joint organizations shall be borne by the two contracting Governments in the proportion of 90 per cent by the United Arab Republic and the remaining 10 per cent by the Arab Republic of Yemen.

(b) Each of the two contracting States shall bear the salaries and compensations in respect of the members and the officials appointed by it in accordance with its own financial regulations.

"Article 11: There is nothing in the provisions of this Agreement to prejudice the rights and obligations incurred or which may be incurred by either country in accordance with the United Nations Charter. Nor is there anything in the foregoing provisions which is prejudicial to the provisions of any Agreement included within the frame-work of the Arab League Charter.

"Article 12: This Agreement shall remain valid until the necessary arrangements for the setting up of unity have been made.

"Article 13: The Agreement shall be considered effective immediately after its ratification by the constitutional process of each of the two countries."

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5825:YEM:B]

B. Saudi Arabian Plan To End War: Saudi Arabia on July 10 reportedly suggested a plan for a UN Commission to help settle the Yemen civil war.

Diplomatic sources said the Saudi Ambassador, Mr. Jamil M. Baroody, had brought up the idea in talks with the UN Secretary-General, U Thant on the year-old UN-Yemen observation mission, extended for another two months, till September 9.

They said Yemen was cool to the idea and U Thant preferred summit talks between Saudi Arabia and UAR.

The Saudi proposal was that the Security Council should send a commission to Yemen which should mediate between the factions there for a transitional coalition government. Within six months under such a government, UAR troops should withdraw and the commission should question tribal leaders as to what kind of government their people wanted. That kind of government should be set up to replace the transitional administration.

The sources said when this idea was put to the Yemeni delegate, Mr. Yahya H. Geghman, he asked why there should be such as opinion poll in Yemen when there was none in Saudi Arabia.

(*The Times of India*, Bombay)

[Prev. ref. 5599:YEM:A]

C. UN Mission Extended: The UN Secretary-General, U Thant has extended the UN Yemen Observation Mission (UNYOM) from July 4 to September 4, 1964.

This action followed informal talks with members of the Security Council.

The following is a summary of his report to the Council dated July 2:

"No military supplies have been seen crossing the northern border with Saudi Arabia, although small groups of armed royalists have crossed it. It is estimated that the strength of United Arab Republic forces in Yemen has been reduced by 3,000.

"The formation in May of a new Government promised improvement in the political stability and independence of Yemen. That Government has given an assurance that it desires good and peaceful relations with its neighbours. However, its formation has not yet resulted in any accommodation with royalist leaders.

"The military stalemate appears to continue. The implementation of the disengagement agreement is still far from complete, insofar as the United Arab Republic troops are concerned. The Secretary-General is now even more strongly of the view that real progress towards a disengagement and an understanding to co-operate can be hoped for only through high-level talks between Saudi Arabia and the United Arab Republic.

"UNYOM has helped towards removing the threat to international peace and security implicit in the Yemen problem, and towards keeping open the possibilities for a final settlement. The Secretary-General appeals most urgently to the parties concerned to meet at the highest level to achieve full and rapid implementation of the disengagement agreement.

"If in the next two months there is no substantial progress towards fulfilment, or the firm prospect of immediate fulfil-ment, he would have difficulty envisaging a further extension of UNYOM in its present form and with its present terms of reference and purpose."

(*United Nations*)

[Prev. ref. 5877:YEM:C]

D. Recognition By Jordan: Jordan recognized Yemen on July 22. Saudi Arabia remains the only Arab country not to have done so.

King Hussein of Jordan agreed to the proposal of his Government to recognize Yemen in line with Jordan's general policy of maintaining friendly relations with all Arab nations. This recognition accords with Jordan's recognition of the Republican regime in Iraq.

(*Middle East Economic Digest*, London)

[Prev. ref. 5010:YEM:A; 5059:YEM:A]

E. UAR-Yemeni Company To Promote Salt Industry: Dr. Aziz Sidky, UAR Deputy Prime Minister for Industry and Mineral Wealth, and Mr. Abdullah Jazeilan, Yemeni Deputy Prime Minister for Economic Affairs, signed on July 31 in Alexandria an Agreement for the establishment of a UAR-Yemeni Company for the production and marketing of salt.

The capital of the Company will be about £E800,000 (divided into 80,000 shares), 51 per cent to be raised by Yemen and 49 per cent by UAR.

The Chairman of the Board of Directors will be a Yemeni citizen; the Board of Directors will also comprise two UAR members and two Yemeni members. The Company will be under the supervision of the Yemeni Minister of Economy.

After signing the Agreement, Mr. Jazeilan said that the Agreement was one of the sure steps to unity among the Arab States and an assertion of economic independence which was one of the mighty weapons for eliminating imperialism.

He added that the exploitation of Arab resources by Arabs was the only means for avoiding foreign influence.

Dr. Aziz Sidky said that this was the second joint agreement for carrying out projects in the Yemeni Arab Republic financed by UAR and Yemeni capital. "We are thus taking one further step towards co-operation between the UAR and the Yemeni Republic."

He added that the Company will extracted salt from its natural deposits within the boundaries of the Yemeni Republic, market salt and establish a number of industries that depend mainly on salt. The co-operation between the two countries would lead to the realisation of hopes thanks to the guidance of President Abdullah Sallal and President Nasser.

In conclusion, he said that the UAR would place all its potentialities at the disposal of the sister Arab Republic of Yemen, the people of which had for long looked forward to economic development.

It was decided that the head offices of the Company would be established in Hodeida. An office for co-ordinating the activities of the new Company would also be established. This would comprise the Chairman of the Egyptian Mining Organization and the Chairman of the Salt Lakes Company on behalf of UAR, while the Yemeni side would be represented by the Yemeni Deputy Minister of Economy and the Chairman of the Board of Directors of the new Company.

ASIA OUTSIDE ASIA

A. Trade Deficit Of Developing Countries—FAO Study: Trade deficit of developing countries is likely to widen further if agricultural targets are not fulfilled, according to a study by the Food and Agriculture Organization (FAO).

The study points out that trade deficit of developing countries had already increased five-fold between 1953-55 and 1959-61. These deficits, however, did not create any balance of payments problems for these countries because it was offset by a corresponding increase in concessional imports.

Mr. B. R. Sen, Director-General says in an introduction to the study that no single measure can bring about adequate rise in foreign exchange earnings from agricultural exports.

The study suggests a number of measures to increase exports by developing countries. These include:

(1) Removal of trade barriers in non-competing commodities.

(2) More liberal import policies for competing commodities, sugar in particular.

(3) Expansion of processing industries in developing countries through reduction of trade barriers in developed countries and regional arrangement between developing countries.

(4) A more rapid rise in imports from centrally planned countries.

The study describes the task ahead as "formidable", requiring close international co-operation between developing and developed countries and within these two groups.

It stresses that through concerted measures net agricultural exports from developing countries to the rest of the world might rise by about 4 per cent a year.

Since it can be expected that progress could also be made in the non-agricultural sector, total export earnings of the developing countries might increase by about 5 per cent a year.

As regards prices of agricultural commodities, the study says that in order to maintain or increase the level of world prices, production might be regulated through a system of export quotas to be determined preferably in co-operation with importing countries. This has been done in the case of coffee and sugar.

The study suggested that such commodity agreements might make provision for an international fund to be used for diversification in producing countries. Such a fund will resemble the national funds created in some industrialized countries to finance structural adjustments in farming. The fund can also be used to counteract short-term fluctuations, including possibly the establishment of buffer stocks, promotion campaigns and marketing improvements, statistical surveys, economic studies and eventually also surplus disposal programmes.

(*United Nations*)

[Prev. ref. 5770:AOA:I]

B. One-Man State Proclaimed: A New York despatch on July 8 said that a new State had been proclaimed by its founder-President, Mr. Leicester Hemingway (59), younger brother of the late novelist, Mr. Ernest Hemingway.

The State is New Atlantis and its biggest distinction lies in the fact it is the smallest country ever founded. Its population is 1, area 8 square yards, and altitude three inches above sea level when the sea is calm.

Mr. Hemingway built the new Republic on what used to be a submerged sandbar 6½ miles off the south-west coast of Jamaica, British West Indies. He built it with borrowed rocks and soil (the place cannot be disclosed because it is a New Atlantis State secret) and about $50,000 for transporting the materials from the place (which cannot be disclosed because it is a New Atlantis State secret).

Mr. Hemingway said he had issued a Declaration of Independence, drawn up a Constitution and notified the UN Secretary-General, U Thant, and President Johnson. He hastened to assure them that "we are a peace-loving nation."

(*The Times of India*, New Delhi)

C. West Berlin Film Festival: The Indian film director, Satyajit Ray, won the best-director prize for his film *Mahanagar* at the West Berlin Film Festival which ended on July 7.

In Mahanagar, Ray, who produced the world-famous **Apu** trilogy, pleads for the emancipation of women by work.

Most of the top awards of the Festival were carried away by Near and Far East countries.

The grand prize was awarded to the Turkish film **Susuz Yaz** (summer without water) which has a story of life in an Anatolian village, and was privately entered in the competition at the invitation of the Festival against Government advice.

The best actress award went to Sachiko Hidari, star of the Japanese film, **Nippon Konchuki** (the woman insect), and the best actor award went to Hollywood's Rod Steiger for his performance in **The Pawn Brokers.**

Another surprise was the jury's award of a special prize, also a Silver Bear, to Brazilian Director Ruy Guerra. It was given for "the originality and intensity of his talents," in being both author and director of **The Rifle.**

Bert Haanstra, of Holland, took three prizes—a first prize, the Youth Prize and the International Cinema Critics' Award.

Max Lersch, Austrian co-author and director of **Kirdi**, about an isolated and primitive African tribe, won the award for the best short film.

D. Sanskrit Manuscript Found In Turkmenia: An ancient Sanskrit manuscript, in three parts, has been found in a decorated vase excavated at the site of an ancient town, Oldmerv, in Turkmenia, by a Moscow archaeologist, Mr. G. Koshelenko.

The manuscript, consisting of palm leaves, had remained hidden in the vase for more than 15 centuries. It has been handed over to experts for restoration and deciphering. Soviet orientologists are awaiting the results of the work of these experts, for the manuscript may well throw new light on the wide cultural links which existed in the ancient past between India and Central Asia.

The vase itself, belonging to the fourth or fifth century AD, is considered unique by archaeological experts. It is the first piece of painted pottery which has been found in this area. It is adorned with a beautiful painting depicting banqueting and hunting scenes. The colours of the painting are still vivid.

Oldmerv was located on one of the main highways of Central Asia.

[Prev. ref. 5624:AOA:J]

E. Russian Monograph On Dravidian Languages: A Moscow despatch on June 5 said that a monograph on the Dravidian languages by a leading Soviet philologist, Mr. M. Andropov, had appeared in Moscow bookstalls a few days earlier.

The monograph deals with 20 languages and dialects of the Dravidian group, including those which have as yet no script. No work in this sphere, whether in India or abroad, covers such a large number of languages. It deals also with the influence of foreign languages, such as the Turkic and the Ural-Altai languages of USSR, and on the formation and development of vocabulary of the Dravidian languages.

The book will soon be translated into English so as to make it accessible to Indian and other foreign experts in the field.

The author of the book visited India and stayed there for a year to collect the material for the book as well as another projected book. The latter—**Spoken Tamil and its Dialects**—was published earlier. It deals with one of the most interesting and least explored sections of Tamil linguistics. It is the first attempt of its kind to map out the general foundations of Tamil dialectology and to establish a clear line of demarcation between the modern spoken language and the obsolete written one.

[Prev. ref. 5624:AOA:J]

F. Chemical Structure Of Trypsin Enzyme: A New York despatch on July 26 said that after five years' work, scientists have determined the exact chemical structure of trypsin, an enzyme that breaks down proteins in the food you eat so that the proteins become available for nourishment.

The human body has hundreds of enzymes, each engaged in marking some particular chemical reaction take place. The trypsin research provides a springboard for studying how enzymes perform their amazing duties.

Determination of the structure was achieved by Dr. Hans Neurath, Dr. Kenneth A. Walsh, Dorothy L. Kauffman and Dr. K. S. V. Sampath Kumar of the University of Washington in Seattle.

Trypsin is produced in the pancreas enzymes, containing a total of 223 amino acids (the "bricks" of proteins), arranged in a long chain, and in a precise sequence of just 20 of the amino acids. This sequence is the "sentence".

Trypsin is produced in the pancreas gland in an inactive form called trypsinogen. It is converted in the intestine to the active form, or trypsin by action of another enzyme which breaks off one-fortieth of the larger trypsinogen molecule.

The scientists worked out the exact sequence of the 229 amino acid residues in trypsinogen, and gained insight into how the enzyme is produced in the necessary shape or configuration to become active.

ASIAN RECORDER

September 9—15, 1964

Regd. No. D-727
Vol. X No. 37

INDIA

SUMMARY: Independence Day Celebrations; Concessions To Displaced Persons; Economic Co-operation With Italy; Total US Assistance; Army Appointments.

A. Independence Day Celebrations: The first Independence Day without the late Prime Minister, Mr. Nehru for 17 years was celebrated throughout the country on August 15.

In his first Independence Day address at Red Fort in New Delhi, the Prime Minister, Mr. Lal Bahadur Shastri expressed the hope that his forthcoming talks with President Ayub Khan of Pakistan would create a cordial atmosphere conducive to the solution of Indo-Pakistan problems.

He hailed President Ayub's desire for unity and collaboration and warmly reciprocated his sentiments. "India is all for a united approach. Continued wrangles and border clashes are bad for both. Movement of refugees across the borders does credit to none. It is imperative that we find a way out," he said.

In his 25-minute summing-up of the state of the nation, he assured quick and firm decisions. Both in the national sphere and the external field—food crisis and relations with immediate neighbours—he seemed keenly aware of the need for prompt decisions. "Our future is bright and success assured."

He re-affirmed India's goodwill for Burma, Ceylon, Nepal and Afghanistan. Happy at the visit to New Delhi of the Ceylon Premier, Mrs. Sirimavo Bandaranaike in October and the Foreign Minister, Sardar Swaran Singh's scheduled trip to Burma, he was sure that the issue of settlers of Indian origin would be settled satisfactorily.

As regards China, he reminded the people that the direction of the Peking aggression remained unchanged and "so does our mood." India, he stressed, was prepared to have talks, consistent with its dignity and respect, but will not be browbeaten by force. He affirmed: "Bayonets and atom bombs cannot bend us. We are strong enough to meet any danger."

On foreign policy, generally, he pledged himself to adhere to the Nehru way—non-alignment, co-existence, disarmament and opposition to racial policies. "We will resist racial discrimination, whether in South Africa or elsewhere. Similarly, we want the Portuguese colonies to go."

As was natural, the food difficulties and the high prices seemed to preoccupy Mr. Shastri's mind. He pleaded with the countrymen to limit consumption of foodgrains and avoid all extravagance by doing away with lavish dinners and lunches. As a symbolic gesture, "Ministers will not accept invitations to formal parties. It will not mean much by itself, but help mould the nation's thinking."

The food situation—tight, a month ago, in Uttar Pradesh, Bihar, West Bengal, Maharashtra, Gujerat and parts of Rajasthan—had eased somewhat now. The Centre had rushed imported stocks and arranged for supplies from surplus States like Punjab, Madhya Pradesh and Andhra. "Not that we are out of the woods, but the improvement is perceptible," he remarked and hoped to overcome the difficulty completely in a month or two.

He wanted the affluent to share the sufferings of the less fortunate. The situation called for courage. The Government drive to step up farm output—through good seeds, manure, loans and fair price for the producer—needed to be supplemented by the Gandhian technique of inspiring the villager.

His worry over the high rates for the common man's necessities led him to suggest a price display system by traders, with strict enforcement by the Government. He promised firm steps, keeping the goal of socialist order in view.

He spoke of the economic forces at work currently. In the three Plans, for instance, the investments will total Rs. 30,000 crores and if the production does not rise proportionately, it will inevitably result in inflation.

Conceding the right of the Opposition to criticise the Government, he pointed out that the Emergency called for national unity and mentioned food as an issue for all-party co-operation.

He also warned the people against quarrels on language, caste and communal issues, saying: "Our stock in the world will be high only if we are strong and united."

Dr. S. Radhakrishnan's Broadcast:

Broadcasting to the nation on the eve of Independence Day, the President, Dr. S. Radhakrishnan asked all parties to work together to tackle the food and price situation and to put down any expression of violence. "Democracy and lawlessness are inconsistent with each other".

He devoted a major part of his message to the internal situation, which he said should be faced with "concerted action".

Dr. Radhakrishnan, who began his broadcast with a moving reference to Mr. Nehru, said that the country still had with it the problem of "the hungry, the neglected, the poor and the downtrodden." He thought that all measures to bring about greater equality should be taken.

The other main problem facing the country was that of national integration. There was a basic unity in the country—as demonstrated during the Chinese attack and when Mr. Nehru died—and he hoped that members of all communities would seek areas of agreement and co-operation and not of discord and dissension.

He spoke of the expectation that normal conditions would be restored in Nagaland and hoped that the present attempts at settlement would succeed.

On foreign affairs, he welcomed the progress towards disarmament, but felt that there was need for the establishment of concepts and institutions that would adjust the minds of people to a world without arms.

He said that India's relations with her neighbours, particularly with Pakistan and China, were not very satisfactory. He said that "we shall not relax our effort until these differences are settled with honour and dignity."

He also made a reference to the "harsh treatment" meted out to the people of Indian origin in the neighbouring countries and said: "Their contributions are forgotten. I hope that these irritations will be removed in the near future".

Mr. Y. B. Chavan's Message To Armed Forces:

In an Independence Day message, the Defence Minister, Mr. Y. B. Chavan, called upon the armed forces to honour the sacred memory of Mr. Nehru "by each one of us discharging his duty in the manner Jawaharlal Nehru would have liked us to do."

He said that the past year had witnessed substantial progress in the defence preparedness against "the ever-present external dangers." In view of the developments on India's borders with China and Pakistan, the Government had come to the conclusion that the defence preparedness must in future be regarded as a long-term responsibility.

He said that "in the not too distant future" India would be able to launch a programme of construction of destroyers and frigates for the Navy.

The following is the text of the message:

"Today we are celebrating the 17th anniversary of our independence. On this happy occasion, I extend to all ranks of our armed forces my hearty greetings and good wishes.

"Our happiness on this auspicious day is overcast with sadness within our hearts. For the last 16 years, on this day, we have seen and heard our leader, Jawaharlal Nehru, standing majestically on the ramparts of Red Fort and giving us messages of faith and hope. Today he is no more with us.

"In the armed forces, we feel this absence all the more because Jawaharlal Nehru used to take deep interest in the functioning of the armed forces and the welfare of the men and others. He was a great inspiration to us.

"Although he is no longer physically present today, his memory will remain with us reminding us of our duty to the nation and its people. We can all honour his sacred memory best by each one of us discharging his duty in the manner Jawaharlal Nehru would have liked us to do.

"Since I spoke to you last year on Independence Day, there has been substantial progress along the road to our defence preparedness against the ever-present external dangers.

"Our programme of recruitment of men and officers is almost complete. The training and modernization of our Army and its equipment are progressing satisfactorily. Similarly, in the Air Force, the programme of training and modernization is going ahead. An event of some importance which occurred during the year was the handing over earlier this year to the Indian Air Force of the first two Marut supersonic fighters. These aircraft have been designed, developed and manufactured at the Hindustan Aircraft Factory at Bangalore.

"We are continuing efforts to replace some of the over-aged ships of the Indian

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Navy by more modern ships and I hope that in the not too distant future we shall be able to launch the programme of construction of destroyers and frigates in our country.

"The year that has passed has been of concern to us. We have felt concerned at the growing evidence of collusion between China and Pakistan. China has continued to consolidate her positions on the northern borders. Pakistan has been continuing to keep tension alive on the cease-fire line and the international border in Jammu and Kashmir.

"Taking these developments into account, we came to the conclusion that our defence preparedness must in future be regarded as a long-term responsibility. Towards this end, we have drawn up a five-year defence plan. The plan in essence is for strengthening and modernizing our Army and our Air Force and establishing an adequate defence production base in the country. With such assistance as is made available to us by other friendly countries, we have to ensure that our defence plan is implemented with vigour.

"During the past year I have had several opportunities of personally meeting many of you. Your discipline and high morale have been my source of strength.

"Many of you are stationed in high mountains on our northern borders. Many are working on the roads and lines of communication in difficult terrain and hazardous conditions. I would like particularly to convey to you the nation's gratitude and good wishes. I wish you all good luck."

B. Afro-Asian Conference At Bandung—USSR Not To Press Claim To Seat: The Government of India has been informed of the Soviet Government's decision not to press its claim to a seat at the Bandung-type Afro-Asian Conference to be held in March.

It was India which had first proposed at the recent preparatory ministerial meeting at Djakarta that the Soviet Union should be invited to the Second Afro-Asian Conference.

Ceylon and some Afro-Asian countries had strongly supported the Indian proposal which had pointed out that geographical and other factors entitled the Soviet Union to a seat at the Conference.

China had vehemently opposed the Indian proposal at Djakarta. Pakistan had also questioned the validity of geographical reason for admitting the Soviet Union to the Afro-Asian Conference.

Observers think that the Soviet decision stems from her anxiety not to give a handle to China to disrupt Afro-Asian unity.

According to these observers, the decision of the Soviet Union does not mean that the question of her admission to the Afro-Asian Conference will not be raised at the appropriate time.

The Djakarta meeting had left it to the Summit Conference itself to decide the question.

[Prev. ref. 5838:IND:A]

C. Concessions To Displaced Persons From East Pakistan: The Government announced on August 14 certain age and fee concessions to displaced persons from East Pakistan who migrated to India on or after January 1, 1964.

The concessions seek to mitigate the hardship of the displaced persons in the matter of their employment in services or posts under the Central Government. To qualify for the concessions a candidate will have to produce a certificate that he had migrated after the due date. The certificate should be from the camp commandant of the transit centres of Dandakaranya Project or the relief camps in various States or the district magistrate of the area where a candidate might be residing for the time being.

So far as the fee concession is concerned, the Union Public Service Commission has been authorized to remit fees where they are satisfied that the applicant is a bona fide displaced person and is not in a position to pay the prescribed fees. This is regarding the posts advertised by the Commission or for admission to competitive examinations conducted by it.

It has also been decided to allow a relaxation of age-limit up to three years in excess of the normal upper age-limit and the maximum age-limit for entry into Government service as well as for permanent absorption is relaxed up to 45 years.

For persons belonging to scheduled castes or scheduled tribes these age-limits have been further relaxed by five years both in the case of gazetted and non-gazetted posts in the Central Services as well as All-India services.

These concessions will remain in force for three years up to the end of December, 1967 and will apply only to future recruitments.

[Prev. ref. 5713:INI:B]

D. Economic Co-operation With Italy: The Minister for Petroleum and Chemicals, Mr. Humayun Kabir, said in Rome on August 12 that Italy had agreed to extend beyond June, 1965 her credit of $100 million to India.

Mr. Kabir had discussed the question of extension of this credit and greater economic co-operation between Italy and India with the Italian Minister for Finance, Mr. Colombo, the Minister for Foreign Trade, Mr. Mattarella and the Minister for State Participation, Mr. Bo, during his five-day stay in Italy. He also had discussions with the State-owned ENI authorities.

The ENI had been co-operating with the Oil and Natural Gas Commission and had extended a credit of $100 million to India. So far only $45 million had been utilized and the extension of the credit would enable India to use the balance.

Mr. Kabir said that he had impressed on the Italian authorities that the ENI should help India to develop her oil, petro-chemical and fertilizer industries by equity participation in new ventures. Hitherto, Italian help to India had been in the form of supply of equipment and services only.

He said that Mr. Mattarella, who was formerly Minister for Agriculture, had showed keen interest in the development of India's agriculture. Mr. Mattarella told him that his country had earlier fixed 10 to 15 acres as an economic unit but from experience they found that it was not economical and were now encouraging farms of 30 acres and more.

[Prev. ref. 5885:INI:E]

E. Lease Of Aksaichin To China —Mr. J. P. Narayan's Proposal: Mr. Jaya Prakash Narayan, the Sarvodaya leader suggested on August 16 the lease of Aksaichin to China as a possible solution to the Sino-Indian border dispute.

Addressing a public meeting in Ahmedabad, he said that this should be discussed at a round-table conference between India and China and the initiative for such a conference should be expected not from China but from the Colombo Powers.

He said China's occupation of Tibet had made that country a neighbour of India for the first time in history and the two countries could solve their differences only through mutual understanding and adjustment.

He was certain that China was not much interested in N-EFA and its claim to this territory was purely a bargaining counter to its claim to Aksaichin.

He said it was true the geographical and other evidences supported India's claim to Aksaichin. But China had made it abundantly clear it was not prepared to go by the evidences India was able to produce.

China, he said, would lose nothing by the continuance of the present deadlock, for it was already possessing more than it required. But the deadlock was not in India's interest. India could not seek any military solution to this border dispute because China still possessed logistic advantages besides immense military superiority.

He said he could not agree with the view expressed by the Prime Minister, Mr. Lal Bahadur Shastri in his Independence Day speech that India's attitude to China would not change so long as China did not change its attitude to India. China would not change its attitude because it had no need to do so. But India would have to come to terms with China if she was to solve her most pressing problem—the problem of mass poverty.

He asid it was for India to show good-neighbourliness by recognizing China's need for Aksaichin to administer the Sinkiang Province. India had already indicated its willingness to lease the area for civil purposes and must now consider whether it would not be possible to lease Aksaichin for other purposes if such a move would lead to a solution of the border dispute.

The Colombo Powers had already sounded India on the possibility of a demilitarized zone in N-EFA and Ladakh. They must now ascertain the views of China on different possible solutions and try to bring the two countries to the conference table.

(*The Times of India*, Bombay)

[Prev. ref. 5989:INI:A]

F. Total US Assistance For Economic Development: India has so far received Rs. 2,602.5 crores of assistance from USA for economic development.

Of this, assistance totalling Rs. 648.8 crores has been in the form of grants, Rs. 829.4 crores as loans repayable in dollars and Rs. 1,124.3 on local currency repayment basis.

Thus, only 32 per cent of total American aid to India involves repayment in foreign exchange. The bulk of this amount bears very low rates of interest and is repayable over a period of 40 years.

Nearly 25 per cent of total US aid is in the form of grants. The loans repayable in rupees constitute 43 per cent of the total. The repayments not only save foreign exchange but also do not entail export of goods from the country.

Out of the total assistance of Rs. 2,602.5 crores committed so far, aid from the Technical Co-operation Mission has amounted to Rs. 250.3 crores. Development loans (repayable in dollars) from the US Agency for International Development have totalled Rs. 558.5 crores.

The Development Loan Fund has extended credits to the extent of Rs. 243 crores, repayable in rupees.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Grants and loans under PL 480 programmes have amounted to Rs. 1,277.2 crores. This is exclusive of the wheat loan of 1951 amounting to Rs. 90.3 crores, repayable in dollars, and Rs. 2.6 crores of non-repayable emergency food and famine relief grants.

The Export-Import Bank has given Rs. 180.6 crores of loans repayable in dollars.

Since the beginning of the current financial year, there have been seven loans from the AID and two from the Export-Import Bank, totalling Rs. 64.8 crores. The largest among these loans, amounting to $50 million, is intended for maintenance imports.

G. **New Malaysian And Nigerian Envoys:** Mr. Zaiton Ibrahim has been appointed the next Malaysian High Commissioner to India.

Mr. Ibrahim (43) was a former Ambassador of Malaysia to the Philippines. Since 1963 he had been on special duty in the Malaysian Ministry of External Affairs.

Mr. Adedokun Haastrup, an official in the Nigerian Ministry of External Affairs, has been named Nigerian High Commissioner to India.

Mr. Haastrup (43) has been in Government service for 10 years and had been a member of Nigerian delegations at several international conferences.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5462:INI:J]

H. **Army Appointments:** A few top Army appointments were officially announced in New Delhi on August 14.

Lt.-Gen. P. P. Kumaramangalam, GOC-in-C, Eastern Command, will take over on November 16 as the Deputy Chief of Army Staff, in place of Lt.-Gen. M. S. Wadalia, who will be retiring from service.

Lt.-Gen. S. H. F. J. Manekshaw, GOC-in-C, Western Command, will take over by November 12, as the GOC-in-C., Eastern Command.

Lt.-Gen. Harbaksh Singh, at present Corps Commander, will take over by November 10 as GOC-in-C., Western Command.

Maj.-Gen. G. G. Bewoor, Director, Military Training, Army Headquarters, will take over on November 6 as Corps Commander, with the acting rank of Lt.-General.

Lt.-Gen. Moti Sagar, Chief of the General Staff, has been approved for appointment as GOC-in-C., Southern Command, in place of Lt.-Gen. L. P. Sen, who will be retiring from service.

(*The Times of India*, New Delhi)

[Prev. ref. 5189:INI:O]

I. **Air Force Appointments:** Air Vice-Marshal P. C. Lal, AOC-in-C, Western Air Command, has been appointed Vice-Chief of the Air Staff.

Air Vice-Marshal P. Rajaram, who has been holding the post of the Deputy Chief of the Air Staff at Air Headquarters, will take over as Air Officer Commanding-in-Chief, Western Air Command, in place of Air Vice-Marshal Lal.

Air Vice-Marshal M. M. Engineer, AOC-in-C, Eastern Air Command, has been appointed Deputy Chief of the Air Staff.

Air Vice-Marshal Y. V. Malse will relinquish his post on the senior directing staff of the National Defence College and assume charge as AOC-in-C, Eastern Air Command.

The vacancy on the senior directing staff of the National Defence College will be filled by Air Vice-Marshal K. L. Sondhi.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5858:INI:C]

J. **New Deputy Commander Of Bhutanese Army:** Brig. Thangpi has been appointed Deputy Commander-in-Chief of the Bhutanese Army.

He succeeded Brig. Namgyal Bahadur, who was executed on May 17 for complicity in the assassination of the late Prime Minister, Mr. Jigme Dorji.

(*The Statesman*, Calcutta)

[Prev. ref. 5953:INI:F]

K. **Increase In Wages For Bank Employees:** An agreement between the bankers and their employees' representatives signed in New Delhi on August 18 provided for an *ad hoc* increase of 6 per cent of basic wage for the clerical staff and 8 per cent for the subordinate staff.

This increase, mainly to correct "certain faults" in the index numbers, was given effect to by banks from August 1. This benefit—up to a maximum of about Rs. 8.40 for an individual—will be in addition to whatever a bank employee may be getting under the Desai Award. This will cost the bankers Rs. 1.20 crores more in the wage bill.

It was also agreed to abolish the Class IV area in respect of Class 'A' banks in September this year as has been done in case of the State Bank.

The agreement, according to the Chief Labour Commissioner, Mr. Teja Singh Sahni, who had intervened in the dispute, has been based on an assurance by the employees' representatives that there will be complete normalcy in the working of banks.

Other outstanding points of dispute, such as the abolition of Class IV areas in respect of other classes of banks, the quantum of gratuity and provident fund and the general question of revision of wages will be taken up by a tripartite sub-committee which met in Bombay on August 28.

Till the last stage of their discussions, representatives of the two employees organizations—All-India Bank Employees' Association and All-India Bank Employees' Federation—refused to sit together at the tripartite talks.

After the conclusion of the agreement, representatives of both the organizations explained that the signing of the agreement did not mean that they were giving up their original demands.

(*The Statesman*, New Delhi)

[Prev. ref. 3325:INI:G]

L. **Distribution Of Land To Agricultural Workers:** According to the latest official figures available in New Delhi on August 13, 83,00,000 acres of land had been distributed to landless agricultural workers during 12 years of planned development ending 1962-63.

Of these, 13,00,000 acres were distributed in the first two years of the current Plan. Schemes of resettlement of agricultural labour on distributed lands are, however, reported to have made slow progress. Recently, patterns of assistance for resettlement and colonization have been liberalized.

The Central Advisory Committee on Agricultural Labour headed by Mr. Shriman Narayan, member of the Planning Commission, met in New Delhi on August 17 to review the progress of these schemes and to frame proposals for the Fourth Plan period.

In view of the difficulties encountered in speedy execution of resettlement schemes, a modest target of bringing 15,00,000 acres under colonization and resettlement programmes during the Fourth Plan period is envisaged. About 214,000 agricultural labour families are likely to be benefited by these programmes.

The tentative target of 15,00,000 acres—10,00,000 acres under colonization and 5,00,000 acres in smaller blocks—does not include land declared surplus for distribution after fixation of ceilings in various States. Another 10,00,000 acres are expected to be covered under the latter category.

The total outlay for settlement in land in the Fourth Plan is estimated at Rs. 50 crores by a working group on the basis of an average cost of colonization at Rs. 3,000 per family and of settlement on other lands at Rs. 1,000 per family.

The Central Committee for Agricultural Labour, which keeps a constant watch over the implementation of settlement schemes, had noted at its last meeting that the progress of the Rs. 7-crore Centrally-sponsored scheme for settlement of landless agricultural labour had made slow progress.

The Government of India, accepting the Committee's recommendations, has recently raised the provision for initial working expenses per family from Rs. 500 to Rs. 750, the provision for land reclamation from Rs. 150 to Rs. 300 per acre and the ceiling for colonization schemes from Rs. 4,000 to Rs. 5,000 per family. The State Governments have been asked to submit proposals on the basis of the revised pattern of assistance to expedite the settlement operations.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5837:INI:S]

M. **Second Wage Board For Textile Industry:** The Government has appointed a second wage board for the textile industry to consider further revision of the wage structure.

Mr. K. Bhimasankaram, retired judge of the Andhra Pradesh High Court, is the chairman of the board which has six members—two representing employers and workers each and two independent members. The board will have its headquarters at Hyderabad.

The employers' representatives are Mr. D. C. Kothari and Mr. Surottam P. Hutheesing.

The employees' representatives are Mr. G. Ramanujam and Mr. A. N. Buch.

The two independent members are Mr. Tulsidas Jadhav, MP, and Prof. M. B. Desai.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 3215:INI:K]

N. **Cease-fire In Nagaland:** The Naga rebels were reported to have agreed to a cease-fire from midnight of September 5-6.

Rev. Michael Scott obtained the rebels' acceptance of all the terms and timing of the cease-fire at a meeting with their representatives on August 17.

Rev. Scott, who was accompanied by two other church leaders, Rev. H. K. Lungalong and Rev. Shihoto Suetho, returned to Kohima on August 18 and informed the Nagaland Government of the outcome of his meeting with the rebels' representatives.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

In a statement issued in Kohima, Rev. Scott said: "A meeting was held near Yareba yesterday with representatives deputed by the Naga leaders (underground) to negotiate the terms of a cease-fire. They signified their acceptance of the terms communicated to them by the peace mission and the date from which the cease-fire will begin, namely, the midnight of September 5-6, 1964.

"The representatives were Mr. Zashei Huire, Mr. Biseto Medon and Mr. L. Z. Zhenito."

Yareba, the historic rendezvous, is in the Chakhesang area, about 40 miles from Kohima.

Immediately on his return, Rev. Scott called on the Nagaland Chief Minister, Mr. Shilu Ao, and the Chief Secretary to the Government and informed them that the underground leaders had accepted and endorsed the Government's cease-fire proposal and had agreed to end all hostilities at the same time as proposed by the Government.

The underground leaders have given the assurance that they would ensure scrupulous adherence to the truce agreement by all their units.

According to the peace mission headquarters, steps for a preliminary peace conference, with the Government of India team and the underground leaders participating, will be initiated soon and the conference itself is expected to get on to a start soon after the cease-fire comes into force.

A letter written to the peace mission by the Governor of Nagaland on August 14 outlining the terms and conditions of the cease-fire agreement was released on August 18.

The letter gave details pertaining to the guarding of the international frontiers, patrolling of the highways and the movement of both the security forces and the armed units of the underground, as part of the cease-fire agreement.

Peace prospects brought great relief to Kohima town. Most parts of the State with a population of 400,000 had been under curfew from sunset to sunrise for about a decade. The only cinema house in Kohima would have only matinee shows.

The Nagaland authorities have proposed that a day of thanksgiving should be observed to mark the cease-fire agreement. The day was expected to synchronize with the coming into operation of the cease-fire.

(*The Statesman*, Calcutta)

[Prev. ref. 5836: INI:Q]

O. Jammu And Kashmir National Conference Convention: Nearly 3,000 delegates from different parts of Kashmir met in Srinagar on August 12 for a two-day Convention of the National Conference to re-organize the ruling party and to discuss in detail the political situation in the State.

Addressing the Convention, the acting President of the Conference, Mr. G. M. Sadiq, said that the programme and principles of the National Conference were correct, but they should be backed by the right type of action.

Emphasizing the need to purge the ruling party of opportunists and self-seekers, he said that in future a worker would be judged by his actions "so that our organization goes ahead with force as it did in the past".

He said the National Conference workers should be politically mature and clear in their convictions to carry movements forward.

He said Kashmir's freedom movement had joined the mainstream of the Indian freedom movement as early as 1937 and the accession of the State to the Indian Union in 1947 was only the fulfilment of certain constitutional formalities. "Kashmir's relationship with India is as firm as the mountains around us," he declared amidst cheers.

He welcomed efforts to bring about Indo-Pakistan amity. He, however, said that there was no Kashmir dispute. "Kashmir has its own place in the Indian Union and none can change it."

He wished free intercourse and free trade between India and Pakistan. This, he said, would remove tension between the two countries and the resultant benefits would also extend to Kashmir as part of India.

Tracing the history of Kashmir's freedom movement since 1931, he reminded delegates of the support lent to it by progressive forces in India. On the contrary, the Muslim League had openly opposed "our movement" and Mr. Jinnah described the National Conference as a party of goondas. It was Pakistan that unleashed "unprovoked aggression against us" in 1947.

Earlier addressing the Convention, Syed Mir Qasim, General Secretary of the National Conference, said that past mistakes had to be rectified and individual interests surrendered for the good of the State.

Reform Programme Approved:

The Convention approved on August 13 a nine-point programme drawn up by a sub-committee for revitalizing the National Conference.

It also approved the Conference Working Committee's recent resolution empowering Mr. Sadiq to make the necessary changes in the organization.

The report by the sub-committee appointed by the National Conference Working Committee to consider and recommend measures to re-orientate and revitalize the ruling party said the sub-committee noted with concern that the National Conference had in the recent past strayed at times from its appointed path and was stultified by the growth of certain selfish elements that invariably clashed with the larger interests of the people.

The report said the people of the State had always demonstrated respect for the traditions of secularism and tolerance.

The two-day Convention ended on August 13 after expressing full confidence in the leadership of Mr. G. M Sadiq who was authorised to take steps to re-constitute party units all over the Valley.

The General Secretary, Mir Qasim said Kashmir was proud of being part of the secular, democratic, socialist Republic of India. Kashmiris also believed in similar ideals.

Mr. Sadiq in his concluding remarks, expressed satisfaction that the image of the National Conference as a revolutionary party had been restored.

P. Jan Sangh General Council Meeting—Aims And Principles: The meeting of the Jan Sangh General Council in Gwalior on August 17 formulated an important document which defines, for the first time, what the principles and aims of the party are.

The 42-page document, entitled "Principles and Policies," has been written by its general secretary, Mr. Deen Dayal Upadhyaya, and is considered by Jan Sangh members to be of the utmost importance.

In a sense, the document seeks to provide the philosophical basis for the existence of the party. It is still incomplete and so far is available only in Hindi (probably the reason why it has not received publicity).

After it has been discussed by the district and State units of the party, which have been asked to suggest amendments to it, the document will be examined by the Working Committee towards the end of November.

It will then be adopted as the Jan Sangh's platform by the General Council at Vijayawada on January 23. A party spokesman said: "Whatever the people may think of it, we shall stand by it".

The document seeks to make what it calls "Bharatiya sanskrit aur maryada" (Indian culture and tradition) the raison d'etre and philosophical basis of the Jan Sangh; all the political, social, and economic policies that it seeks to propagate stem from this.

The aim of the party is thus to rebuild "Bharat" on the basis of Indian culture and tradition (the word Hindu in place of Indian, is pointedly avoided) "as a political, social and economic democracy granting equality of opportunity and liberty of the individual so as to make Bharat a prosperous, powerful and united nation which is progressive, modern and enlightened and able to withstand the aggressive designs of others and to pull her weight in the councils of nations for the establishment of world peace".

This forms the basis of the Jan Sangh policies on the issues of today. Most of these are already known; the document merely spells them out in detail and in a comprehensive form.

On the question of minorities, the Jan Sangh does not recognize their existence on the basis of religion. It wants the abolition of the States and the State Legislatures and their replacement by "Jan Paths" (large districts) with no legislative functions, which would be reserved for the Central Parliament.

It is in favour of the immediate replacement of English by Hindi and the regional languages and the compulsory teaching of Sanskrit.

On economic policies, it lays down a series of priorities headed by defence preparations and seeking full employment, providing the needs of a family (not individuals), reducing inequalities, aiming at self-sufficiency in capital and consumer goods and increasing agricultural production (in that order).

The section on foreign policy is yet to be added, but is expected to call for the "re-unification of India" (that is, undoing of the Partition of the subcontinent) and containment of China by closer co-operation (as distinct from an alliance) between Asian countries.

The General Council meeting also defined its attitude towards the other parties.

By deciding not to enter into permanent alliance with any other party or merge with it, the General Council ruled out any formal permanent association of the Jan Sangh with the Swatantra Party, a proposal which had been made about six months ago.

But the Jan Sangh has not ruled out "electoral adjustments" with other parties, nor co-operation with them on specific issues. The only exceptions will be the Communists and the Muslim League.

Thus, on such issues as food and prices, the Jan Sangh may still "co-operate" with other parties and enter into electoral arrangements with them to their mutual advantage.

A peculiar result is that the Jan Sangh expects greater "co-operation" with even

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the Congress. At the General Council meeting, it was learnt that the Jan Sangh leaders made it clear that they believed the post-Nehru era would lead to greater identity of views between the two parties, particularly on their attitude towards the Communists.

Thus, while the Jan Sangh has decided to contest about 40 or 50 seats during the forthcoming Kerala elections, it hopes to be able to make some kind of arrangement with the Congress in due course against the Communists and the Muslim League.

Q. Samyukta Socialist Party—National Committee Meeting: The National Committee of the Samyukta Socialist Party (SSP), in a resolution adopted at the end of a four-day session in New Delhi on August 13, demanded a fresh General Election in the country, declaring that the people had lost their confidence in the Congress Government's capacity to defend the country and build up the economy.

The National Committee, which is the central executive of the SSP, said the ruling party should "renew without delay" the mandate it had secured in 1962.

In its view, the mandate had been exhausted because of the continued Chinese occupation of Indian territory, the "bankruptcy" of the Government's price policy, the "stagnation" in agriculture, the "miserable failure" of the Third Plan, and the "poisoning" of national life by corruption.

The resolution on a "programme of struggle" against the Government's price policy was silent on the issue of a joint front with other Opposition groups and on the invitation of the Communist Party to join it to organize a national general strike ("Bharat Bandh") on September 7, the day Parliament would reconvene.

The resolution merely directed the Party committees to carry forward a four-point programme of struggle "in co-operation with allied mass organizations".

This was interpreted by some party spokesmen as a rejection of the idea of a joint front strongly pressed by the Lohia group in the SSP.

The spokesmen said the resolution was the "consensus" of the Committee and members could not, after 19 hours of debate, agree on an unanimous stand on the joint front issue.

The SSP "struggle" against the Government's price policy included also "disciplined marches on hoards and godowns to enforce sale of foodgrains at 50 p. a kg".

Mr. D. B. Desai, general secretary of the Peasants and Workers' Party which may merge with the SSP, attended the National Committee session.

(*The Statesman*, New Delhi)

[Prev. ref. 5886:INI:N]

R. Lt.-Commander M. S. Kohli To Lead Everest Expedition: Lt.-Commander M. S. Kohli has been selected leader of the Indian Expedition to *Mount Everest* in 1965.

Capt. Narinder Kumar will be deputy leader.

Both Lt.-Cdr. Kohli and Capt. Kumar are veteran mountaineers, with a number of mountaineering achievements to their credit and know the Everest area well.

They were both members of the first Indian Expedition to Everest in 1960. Lt.-Cdr. Kohli was also deputy leader of the second Indian expedition to Everest in 1962.

While Lt.-Cdr. Kohli successfully climbed **Nanda Kot** (22,510 feet) in 1959 and **Annapurna III** (24,858 feet) in 1961, Captain N. Kumar led the successful expeditions to **Trisul** (23,360 feet) in 1958, **Nilkantha** (21,645 feet) in 1961 and **Nanda Devi Main** (25,645 feet) in 1964.

JAPAN

A. Relations With China: Mr. Hayato Ikeda, now re-elected Premier for a third term (see page 5981), referred to Japan's relations with China at a news conference in Tokyo on July 20.

He said the Communist China issue was central to Japan's policy towards its Asian neighbours. He was all for improving relations with Peking provided trade could be kept separate from policies; he was confident it could be done.

He had no intention of responding to the Chinese proposal for joint ambassadorial talks in some neutral capital, such as the Americans had conducted in Warsaw. Yet he made it clear he was counting on a change in American attitude after the presidential election—on the unspoken assumption of a Democratic victory.

Before promoting relations with neighbours, however, he advocated closer relations with European nations, concerning whom, he said, Japan should acquire a stronger voice. The next step would be to command respect from communist countries.

In this connexion he announced that he hoped to attend the United Nations General Assembly session. Mr. Etsusaburo Shiina, his new Foreign Minister, would go on a round of visits in the Autumn to Britain, West Germany and France.

Mr. Shiina is an expert on Japan's international trade. He has already suggested slowing down residual liberalization of foreign imports for protectionist reasons. Delaying free car imports until next Spring seems the probable first step.

In the second week of August, officials from the "two Chinas" arrived in Tokyo with the obvious intention of competing in the establishment of the closest possible relations with Japan.

Formosa was represented by Mr. Chung Chan, chief secretary to Generalissimo Chiang Kai-shek, while China was represented by Mr. Sun Ping-hua, Deputy Secretary-General of the Commission for Cultural Relations with Foreign Countries. Mr. Sun arrived on August 13 as the virtual head of a five-man team that had been granted residence in Japan on a semi-permanent basis to facilitate China-Japan trade.

Mr. Chung Chan's visit was described as a "return call" for the trip of a former Premier, Mr. Shigeru Yoshida, to Formosa in February.

However, observers noted his unusual activity in contacting politicians belonging to the "Taiwan Lobby" consisting of Conservative political leaders like a former Prime Minister, Mr. Nobusuke Kishi, and some top-level economic leaders. He at least succeeded, during his 10-day sojourn, in securing an assurance that an indefinitely postponed meeting of the China-Japan Co-operative Commission—a private group to promote economic and political relations between Formosa and Japan—would be held after the Olympics. He did not succeed in any other direction.

On the other hand, political activities by the visitors from Peking were strictly forbidden—in fact, such prohibition formed part of the terms for the entry of the Chinese team into Japan. They were expected to concern themselves only with the implementation of the Trade Agreement which may result in trade of nearly $300 million worth of goods in 1964.

[Prev. ref. 5982:JAP:C]

B. Credits To Developing Countries—Government Plan: The Government has made a proposal to extend credit to developing countries with whom Japan enjoys a favourable trade balance.

Under this scheme Japan will extend loans to the extent of $100 million, the funds to come out of the Government's Overseas Economic Co-operation Fund.

According to reports, the plan drawn up by the Ministry of International Trade and Industry at the instance of Mr. H. Ikeda envisages loans for 20 years or longer to these developing nations at low interest of 4.5 per cent or less.

The loans will be generally intended for improving the quality of primary products in the recipient countries and to reduce their costs.

Quarters in the Ministry concerned with the formulation of the plan, however, said the plan had not been finalised and it was too early to predict what shape it would take. Not all the 28 developing nations who have unfavourable trade balances with Japan would qualify for receipt of aid under the plan.

JORDAN

A. Biblical City Unearthed: The Director of the Department of Antiquities, Dr. Awani al-Dajani said in Amman on August 16 that an American expedition led by Professor Ernest Wright of Harvard University had unearthed the Old Testament city of Shechem with its huge walls and big gates.

He said the expedition had uncovered the layers of the ancient city from the Islamic, Christian, Roman, Greek, Iron and Canaanite ages.

The expedition began work in 1956 and has so far spent $125,000 on excavations. The team is expected to continue excavations for a few more months.

[Prev. ref. 3480:LEB:A]

MALAYSIA

A. Security Measures: A royal proclamation on August 12 declared that all the shores of Malaya and Singapore were security areas and, under the Internal Security Act any one found with illegal arms was liable to be hanged.

Those found consorting with persons armed illegally may be sentenced to death or be gaoled for life.

The Yang di-Pertuan Agong (the Supreme Head of State) in a proclamation said that the security areas, under the Internal Security Act, included all the territorial waters of the States of Malaya and Singapore and the land areas within a distance of two miles landward, measured from the low water mark.

These measures were necessary because public security was seriously threatened.

The Singapore marine police, assisted by Royal Malaysian Navy patrol boats, have ordered Indonesian barter craft out of Malaysian waters in accordance with a Central Government decree. Throughout the night on August 12 Malaysian boats stopped Indonesian craft to warn the crews of the ban, imposed because some have been used to smuggle Indonesian agents, arms, and explosives into Singapore and Malaya.

Army Expansion Programme:

On August 10 Tun Abdul Razak, the acting Prime Minister, who is also the Minister of Defence, said that under the army expansion programme another brigade would be raised soon to meet the Indonesian threat.

He was speaking at the national service recruit training centre at Port Dickson on the west coast of Malaya, which he visited with the Yang di-Pertuan Agong.

Steps To Curb Barter Trade:

Meanwhile, the Government has announced that it will ban barter trade between Indonesian trading craft and Malaysian merchants.

The Government said on August 13 that that a large number of Indonesian craft had been used to carry arms and saboteurs.

This barter trade between Malaysia and Indonesia, especially through Singapore port, has been going on for decades and the trade was not considered illegal so long as duty was paid. This trade had run into hundreds of million dollars per annum.

In July, Indonesia took a series of steps to curb the barter trade. The Chief of the Indonesian Navy, Vice-Admiral Martadinata said on July 18 that "the fight against smuggling should be waged not only at sea but co-ordinated with similar operations on land." Police action in Djakarta later resulted in the arrest of many merchants and confiscation of foreign currency with them.

Recently a naval air command was opened at the naval base in Surabaya to safeguard territorial waters in co-ordination with other branches of the fleet.

Since the beginning of the "confrontation" policy there had been occasional incidents between Malaysian craft and Indonesian vessels.

[Prev. ref. 5982:MAL:A]

VIET-NAM (DR)

A. Attack On US Ships By Torpedo Boats—Security Council Meeting: The UN Security Council met on August 5 to consider the American complaint that torpedo boats of the Hanoi *regime* had attacked US *ships in international waters.*

[For background please see Incidents in Gulf of Tonkin under Viet-Nam (DR) on page 6019].

At the outset the representatives of Czechoslovakia and the Soviet Union asked for a postponement until the following day to permit receipt of instructions from their Governments. The United States, however, was of the view that further delay in a meeting would be improper, since the Council should be informed of the situation.

The representative of the Soviet Union then said that he was prepared to hear the United States representative.

Mr. Adlai E. Stevenson of the United States then informed the Council that attacks had been carried out on United States naval units by North Viet-Namese motor torpedo boats. The United States had carried out aerial strikes against North Viet-Namese torpedo boats and their support facilities.

After statements by other members, the Council agreed without a vote that its President, Mr. Sivert A. Nielsen of Norway, would consult informally with members on the basis of a suggestion that he invite a representative of the Democratic Republic of Viet-Nam to participate in the Council's debate.

The following is a summary of the statement of Mr. Stevenson:

On August 2, a United States destroyer, **Maddox**, about 30 miles off the mainland of North Viet-Nam, was approached by three North Viet-Namese torpedo boats. The ship fired three warning shots across the bows of these boats, while an aircraft carrier sent four aircraft to provide cover. The pilots were ordered not to fire unless the **Maddox** was first fired upon.

Two of the torpedo boats fired torpedoes, which the **Maddox** evaded, and all directed machine-gun fire at the destroyer. One torpedo boat was struck by fire from the **Maddox**.

USA had taken steps to convey to the Hanoi regime a Note warning fo the grave consequences which would inevitably result from any further unprovoked offensive military action against United States forces. The notification was in accordance with the provisions of the Geneva accords.

On August 4, **Maddox** and another destroyer, **C. Turner Joy**, were attacked by an undetermined number of motor torpedo boats of the North Viet-Namese Navy. They were at that time 65 miles from shore. There could be no doubt that this was planned, deliberate military aggression against vessels lawfully present in international waters.

The North Viet-Namese acts of aggression defied rational explanation except as part of a larger pattern with a larger purpose—to subjugate South-East Asia.

United States peace aims in South-East Asia had been defined in a statement before the Council two months ago. Order could be restored there if all foreign troops withdrew from Laos, if all States in that area left their neighbours alone, if the subversion of other people's independence ceased, if clandestine and illegal transit of national frontiers were ended, if the export of revolution and the doctrine of violence were halted, and if a stop were put also to the violations of the political agreements reached at Geneva.

When the political settlements reached in Geneva were enforced, the independence of South-East Asia would be guaranteed; when the peace agreements, reached long ago, were made effective, peace would return and military power could be withdrawn.

The following is a summary of the statement of Mr. Platon D. Morozov of the Soviet Union:

As of this moment, the Council had only one-sided information on the alleged attacks against United States warships. Any objective approach required that a request must be sent to the Democratic Republic of Viet-Nam to send information on the United States complaint.

The Democratic Republic of Viet-Nam had protested against the sending of United States ships and vessels of their minions in South Viet-Nam into its territorial waters. If the Democratic Republic of Viet-Nam wished to participate in the Council's discussion, it would be the duty of the Council to invite it to do so under the provisions of Article 32.

[Article 32 states: "Any member of United Nations which is not a member of the Security Council or any State which is not a member of United Nations, if it is a party to a dispute under consideration by the Security Council, shall be invited to participate, without vote, in the discussion relating to the dispute. The Security Council shall lay down such conditions as it deems just for the participation of a State which is not a member of United Nations."]

"On the basis of what was known, the Soviet Union cannot fail to condemn the acts of the United States." The Soviet Union condemned, with all the force at its command, the bombings of the territory of North Viet-Nam, which were acts of aggression. These actions created a situation fraught with danger in South-East Asia. The Soviet Union expected the United States to end such actions.

The Soviet Union proposed that the Council request its President to ask North Viet-Nam to submit to the Council all information connected with the complaint of the Government of the United States; and that the Council invite representatives of North Viet-Nam immediately to take part in its meetings.

Mr. Roger W. Jackling of the United Kingdom stated in part: "The United States had reported to the Council the action it had taken in self-defence. The

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

attacks on the United States vessels, according to information given to the Council, had taken place some 65 miles from land. Having regard to the repeated nature of these attacks and their mounting scale, the United States had a right to take action to prevent recurrence.

"Such preventive action was an essential right embraced by any definition of self-defence as interpreted in international law. The United States action was fully consistent with Article 51 of the Charter."

[Article 51 states: "Nothing in the present Charter shall impair the inherent right of individual or collective self-defence if an armed attack occurs against a member of United Nations, until the Security Council has taken measures necessary to maintain international peace and security. Measures taken by members in the exercise of this right of self-defence shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security."]

This action was a limited response tailored to circumstances, and the United States had re-emphasized its deep concern for peace and security in the area.

The United Kingdom viewed with abhorrence unprovoked attacks on warships proceeding on their lawful occasions on the high seas. In the present case, there had been repeated attacks, whose nature indicated they were deliberately mounted.

The Council was duty bound to support action taken in accordance with the Charter to prevent the repetition of such attacks. There was an obligation to uphold, the right recognized in Article 51.

Mr. Liu Chieh of China (KMT Administration) said the United States action was entirely justified by the established rules of international law and under the provisions of the United Nations Charter. To invite the Hanoi regime to come before the Council would be to give it an undeserved status and give it an opportunity to obstruct the work of the Council.

Mr. Roger Seydoux of France stated that in keeping with the Charter the parties to a dispute should be heard by the Council. The President of the Council should be entrusted with the task of inviting a representative of North Viet-Nam to participate in the debate. This should be done without a vote on a resolution, the wording of which might cause dispute.

Mr. Stevenson said he had no objection to the "authorities of North Viet-Nam" being heard and answering for their actions. However, if they were to be invited, representatives of the Republic of Viet-Nam should be heard since charges against that Government had been made by the Soviet representative.

The best way to proceed, he added, would be by informal consultations among members of the Council.

North Viet-Namese Reaction:

On August 9, North Viet-Nam rejected the invitation by the Security Council to take part in the debate on the new South-East Asian crisis.

"The UN Security Council has no right to examine" the August 4 armed clash between the United States and North Viet-Nam", the Foreign Ministry said in a statement broadcast by **Hanoi Radio.**

It said: "Only the two co-Chairmen (Britain and the Soviet Union) and the countries who took part in the 1954 Geneva Conference have competence to examine the extremely dangerous war acts committed by the US Government against the Democratic Republic of (North) Viet-Nam."

On the other hand, South Viet-Nam in an official reply to the Security Council invitation on August 13 offered all co-operation and any information about the incidents in the Gulf of Tonkin.

US Support To South Viet-Nam:

President L. B. Johnson pledged on August 12 that the United States' firmness at moments of crisis would continue to be matched by restraint "so long as I am President."

In a speech to the American Bar Association, he said USA was working for world order and peaceful progress in Viet-Nam and in Cyprus and for legal order at home on the civil rights problem.

He gave a firm answer to those who, he said, were eager to enlarge the conflict in Viet-Nam. "They call upon us to supply American boys to fight with Asian boys and to take reckless action which might risk the lives of millions, engulf much of Asia, and threaten the peace of the entire world. Moreover, such action would offer no solution at all to the real problem of Viet-Nam.

"Americans can and Americans will meet any wider challenge from others. But our aim in Viet-Nam, as in the rest of the world, is to help restore the peace and re-establish a decent order."

He re-iterated US determination to help South Viet-Nam, saying: "The United States cannot, and will not, turn aside and allow the freedom of a brave people to be handed over to Communist tyranny."

Yugoslav Criticism:

In Belgrade on August 11, President Josip Broz Tito of Yugoslavia condemned American "aggression" in Viet-Nam, Turkey's "aggressive undertaking" in Cyprus and the use of "foreign armed forces" in Congo.

These were the main points of a wide-ranging statement he gave to the **Tanjug** news agency at Brioni on recent "dangerous events" in international relations.

He said the crises in Viet-Nam, Cyprus and Congo marked a dangerous turning away from the recent trend towards peaceful co-existence. The crises pointed towards "the use of force with the aim of imposing unilateral solutions."

The Powers responsible, he said, had begun "a dangerous game of extremism and adventurism which threatens to take the world back to the cold war era, and might lead to new world conflicts in which these Powers themselves may be destroyed."

"The recent air attack on North Viet-Nam, irrespective of what preceded it, can by no means be justified. Such an attack, which has caused losses of human life and imposed material damage on the innocent population of a small country, deserves condemnation and causes concern."

Support By China:

In an interview given to a Pakistani journalist and published in a Hong Kong journal on August 13, the Chinese Foreign Minister and Vice-Premier, Marshal Chen Yi, said his country would stand beside Viet-Nam (DR) in repulsing any aggressor.

He said the present situation in South-East Asia was very grave and brought about solely by USA. "The situation in Indo-China and the whole of South-East Asia directly affects China's security; China cannot but be concerned about it."

The correspondent asked whether China would be immediately involved should a major war break out in South-East Asia, even if China was not a victim of direct aggression.

He replied: "If USA insists on enlarging its aggressive war in Viet-Nam and Indo-China, there is no reason whatever to expect that China would look on with folded arms".

Asked how Sino-American relations might be normalised, he said his country was willing to sit down and negotiate a peaceful settlement of their dispute.

But, he added: "Sino-US relations can be normalised only when USA withdraws from Taiwan and stops being hostile to China."

The same day (August 13), **Peking Radio** broadcast a **New China** News Agency report of a letter from Marshal Chen Yi to the Foreign Minister of North Viet-Nam, Mr. Xuan Thuy, re-iterating Chinese support to North Viet-Nam.

On August 17, Marshal Chen Yi said the matter of the US attack on North Viet-Nam was "far from being over... The initiative is entirely in our hands."

Quoted by the **New China** News Agency, he said at an Indonesian Embassy reception in Peking that "the US aggressors" had said the matter was over. "This is a fraud. We hereby tell them frankly that the matter is far from being over." The aggressor must be punished, the debt of blood must be repaid. "The people have gained the right of action to fight against aggression... The initiative is entirely in our hands."

Observers saw the speech as a new threat of Communist counter-action in Indo-China, although it again failed to commit China to any overt action in the area.

He delivered a violent personal attack on President L. B. Johnson of USA, describing him as "even worse than Mr. Dulles" and surpassin gthe latter's "brinkmanship" policy. Mr. Johnson and Senator Goldwater were "jackals of the same lair," who were "competing in warlikeness."

He re-iterated China's support for Indonesia's "just struggle" against Malaysia and attacked British and American policy on the question.

On North Viet-Nam he said: "After committing a towering crime the US aggressor now says that the matter is over. This is a fraud."

ASIA OUTSIDE ASIA

SUMMARY: "Ranger VII" Lands On Moon; ILO Conference; US Supersonic Military Aircraft; Mr. A. Mikoyan Elected President of USSR; World Economic Survey.

A. "Ranger VII" Lands On Moon: America's *Ranger VII* roared into space from Cape Kennedy on July 28 atop an *Atlas-Agena* rocket. It made a crash-landing on the Moon on July 31 after all six of its television cameras transmitted the first close-up pictures of unknown terrain.

The 806-lb, 10-foot-long, 5,000 miles-an-hour spacecraft's final moment came at 13.25 GMT, ending a frustrating two-year attempt by USA during which all lunar probes had failed.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The pictures cost more than $28 million, most of that spent on four previous futile attempts at close-up lunar photography.

Ranger VII smashed into the target, the Sea of Clouds just below the equator on the left side of the Moon's lighted portion right on schedule.

Jubilant scientists at the California Institute of Technology's jet propulsion laboratory—where the **Ranger** was developed and built—had a magnetic tape of the radioed pictures flown to California after special development.

The pictures had streamed some 228,500 miles through space from the Moon in the form of "excellent" sing-song radio signals transmitted by the insect-like spacecraft in its death dive. They poured into two huge 85-foot parabolic antennae at the Goldstone tracking station in the Mojave desert. The signals were recorded on magnetic tape and also converted back into pictures on 90 feet of 35 mm. film.

Tracking experts said the straight line distance to the Moon at the time of impact was 228,686 miles. The **Ranger's** path to the Moon was curved and it took 67 hours, 35 minutes to make the 243,665-mile flight.

The historic pictures were expected to number about 4,000. The first ones, snapped 16 minutes and 40 seconds before the final crash, when **Ranger VII** was some 1,300 miles out from the Moon, took an area of some 180,000 square miles of the Moon's left side. The last ones, snapped a fraction of a second before the crash, were expected to show what is now the graveyard for the spacecraft's remains—an apparently smooth plain in the north-west corner of the Sea of Clouds just to the left of a hilly area called the Procellarum Highlands, dominated by the Parry and Fra Mauro craters.

A group of observers at Cape Kennedy rocket centre who were watching the Moon through a huge television telescope reported that they saw a small white cloud appear at the predicted impact point about 20 seconds after the **Ranger's** impact time. The telescope screen showed the crater Copernicus at top centre, the Riphaeus mountains on the left and the Parry and Guericke craters on the right.

Ranger VII became the fourth known man-made object to crash onto the Moon. It was some 950 miles south south-west of the remains of **Lunik II**, the Soviet Moon probe which crashed between the craters Aristylus and Archimedes on September 14, 1959.

Its predecessor, the ill-fated **Ranger VI**, lay in ruins at the western edge of the Sea of Tranquillity about 650 miles south-east of **Lunik II**. It crashed there on February 2 after a perfect flight from Cape Kennedy, but its cameras had apparently been short-circuited during the launching.

The third known man-made object was **Ranger IV** which crashed on the unseen back-side of the Moon after its "brain" failed during launching on April 26, 1962.

The Soviet Union was the first nation to photograph the Moon with a spacecraft. Its **Lunik III** looped around the back side of the Moon in 1959 and took pictures from 37,001 to 43,000 miles out. However, their quality was equal only to that obtainable with Earth telescopes.

Close-up Pictures:

Ranger VII's first close-up pictures of the Moon, released on July 31, showed the surface in its impact area to be a smooth plain with hundreds of small craters.

The clustering of the craters, invisible to telescopes on Earth, indicated that they were caused by rocks that had hurtled down from the larger crater of Copernicus, 200 miles north of the Sea of Clouds where **Ranger VII** hit.

Dr. Gerard Kuiper of the Lunar Planetary Laboratory of the University of Arizona at Tucson told a news conference that the pictures were truly remarkable and said they showed a phenomenal progress in lunar photography.

The pictures, taken by two wide-angle and four narrow-angle cameras in the last 16 minutes 40 seconds before impact, were hailed as a huge stride towards a lunar landing by astronauts. Dr. Kuiper said in all 4,316 photographs were obtained. "This gives you an idea of the amount of work ahead for us".

The first picture shown as a lantern slide was comparable to one that might be obtained from a 100-inch telescope on Earth.

There was slightly more detail on the second and Dr. Kuiper said the numerous craters on the third would be "totally unobservable" from Earth.

The fourth slide showed what Dr. Kuiper called "a remarkable clustering of very small craters" apparently produced when the larger Copernicus "tossed out small rock fragments and made secondary craters." He said this area was rough and "a region as badly battered as this ought to be avoided" by astronauts.

He said a crater clearly visible on the fifth slide was only 50 to 300 feet in diameter. This picture, taken by **Ranger's** narrow-angle cameras, was snapped at an altitude of 100 feet and covered an area of about 60 to 100 feet. Distinguishable in the frame were craters down to three feet in diameter which he said was 1,000 times better in resolving power than any pictures ever taken of the Moon.

He said two important things learned from the pictures were the rounded features of small craters and the large numbers of new craters discovered.

"Perhaps the most significant observation is that these pictures have not resulted in any totally unpredicted problems for lunar landing." For example, "it is now known that the craters come as small as three feet in diameter." Among other things, "this clearly shows we are not dealing with large areas of dust—it's not like sand". This was quite significant since it seemed to alleviate earlier fears that lunar landings might be made difficult because of the possible existence of large fields of dust in which space ships might sink out of sight on landing.

He said the consensus of scientific investigators was that the best areas for landing astronauts would be in the broad plains at some distance from the large craters. The clusters of secondary craters would be avoided by landing craft. Not all of the pockmarks, however, were caused by rocks from the larger craters. Many, he said, seemed to be due to meteorites and other space debris bombarding the Moon.

There was plenty of evidence of volcanic activity. Most of the craters seemed to have resulted, from impacts of space debris. These he called primary craters. Bits of rock thrown out by the explosion at the time of impact, he said, had created the secondary craters.

Dr. Eugene Shoemaker of the US Geological Survey in Flagstaff, Arizona, said the photographs indicated that the primary surface of the Moon, under a layer of dust up to a foot thick, was basically hard. "The nature of the top layer of course is not definitely known, but there is evidence the material is quite porous and has been pulverized".

"The information we have obtained from these photographs encourages a belief that the lunar surface does not represent a problem to Moonlanding vehicles as far as roughness is concerned".

He said there was no way of measuring the bearing strength of the lunar surface—determining whether it would support the weight of a manned spacecraft—without an actual landing.

No Trace Of Life On Moon:

It was stated in Washington on August 4 that the close-up pictures of the Moon's surface taken by *Ranger VII* had shown no trace of living organisms on the Moon.

But a few scientists again voiced the theory that at least part of the Moon could consist of basaltic rock. On the Earth, basalt contains water, which, at least in theory, can make possible the existence of living organisms.

This scientific minority even voiced somewhat fantastic plans to have such water evaporated by teams of astronauts in order perhaps to create an artificial atmosphere on the Moon.

However, actual proof of the existence of water on the Moon can only be brought back by the first US Surveyor spacecraft to be launched in 1965.

Plans For Shots To Mars:

A message from Cape Kennedy (Florida) said that US scientists, with the success of the *Ranger VII* project behind them, were preparing for two picture-taking probes of the planet Mars.

Both expeditions will be launched during a 28-day period starting in late October—a period that is favourable for reaching Mars. The trips will take eight months.

Named **Mariners III** and **IV**, the two shots will closely resemble the **Mariner II** probe that successfully flew past Venus in 1962. The two **Mariners** are to fly by Mars, take television pictures and gather scientific data.

The parade of Moon expeditions—leading towards the Apollo Man to the Moon Programme before 1970—will include two more **Rangers** and several launchings in two advanced programmes, **Surveyor** and **Lunar Orbiter**.

The Moon shot programme is scheduled to resume in January, 1965 with **Ranger VIII**. It will have essentially the same mission as **Ranger VII**—take close-up television pictures. The area and type of target it will seek will be determined after the **Ranger VII** pictures are analysed.

Ranger IX, with a similar assignment, is to follow in February or March, 1965 to conclude the **Ranger** project.

The first **Lunar Orbiter** is scheduled for launching in 1966. It will orbit the Moon, approaching as close as 30 miles, taking high resolution photographs of most of the surface. Tracking of the craft's orbit will permit precise calculation of the size and the shape of the Moon and the nature of its gravitational field.

B. **ILO Conference:** On the last day of the International Labour Organization (ILO) Conference on July 9, a convention and a recommendation were approved on man-power use designed to bring about full employment throughout the world.

The Conference was held in Geneva under the auspices of the International Labour Organization (ILO). It began on June 17.

Both the convention and the recommendation are aimed at stimulating economic growth and development, raising living standards, meeting man-power requirements and overcoming unemployment and underemployment.

Among other things, the documents recommend the creation of effective employment services, development of reliable statistics on employment situations, measures to care for workers whose jobs become obsolete, the building up of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

new enterprises, use of food aid to promote employment, an end to trade policies, and greater efforts to stabilize markets for primary commodities.

Conventions are binding on ILO member-States once they have been ratified by Parliament or other appropriate national authority. Recommendations are advisory.

The final vote on the Man-power Convention was 206 for, 55 against, and 37 abstentions. The United States Government and workers' representatives voted for and the US employers' representative abstained.

The recommendation was approved by 275 votes for, none against and 10 abstentions. All US representatives voted in favour.

Objections to the convention generally were based on the difficulty some nations have in ratifying conventions because of the complexities of their legislative processes. Speakers taking this position said a recommendation served the purpose better than a convention.

During discussions on the man-power policy, Mr. Alfred L. Green, speaking for the US Government delegation, said it could help achieve full employment and a decent standard of living for all.

He noted that USA in a sense had anticipated the ILO recommendations by launching an effort "to eradicate poverty wherever it exists in our nation." Among other things, he called attention to programmes for retraining workers made jobless by mechanization and automation.

Election Of President:

When the Conference met on June 17, Mr. Andres Aguilar of Venezuela was unanimously elected President.

In a statement, he discussed development problems which he said were of interest to industrialized and developing countries. The Organization had a contribution to make to the solution of those problems examined by the UN Trade and Development Conference which fell within its competence.

The Conference was attended by over 1,100 delegates and technical advisers from 99 countries.

Issue Of Racial Inequalities:

The question of racial inequalities was discussed on June 19.

Mr. Anwar Salama, the Minister of Labour of UAR, said that the continued membership of South Africa in the International Labour Organization would be "an insult and a shame to the Organization's objectives and principles." He pointed out that when 40 Arab and African countries withdrew from last year's annual session in protest against South Africa's apartheid policy, it was not intended as a mere demonstration or a theatrical act.

Referring to South Africa's withdrawal from membership of ILO, he stated that this act perfectly reflected the "facist and racial character" of that country.

Mr. Amin El-Husselny, Jordan's Minister of Social Affairs and Labour, asked ILO for concentrated assistance for her vocational education institutes. He said that in his country, less than three out of 1,000 students study in vocational schools. "This is a situation which needs deep thought."

He also expressed his appreciation of the ILO Director-General's report mentioning the racial discrimination which was so much abhorred by all free and peace-loving nations."

Mr. G. B. K. Magezi, Uganda's Minister of Housing and Labour, said that every action must be taken to save the men and women suffering under "the brutalities and inhuman tortures of the present South African regime".

Mr. W. Willard Wirtz, United States Secretary of Labour, said that all discrimination of race, belief or colour must be stopped. "It must be completely established that one human being's rights are as important as another's".

1965 Budget Approved:

On June 26, the Conference approved its Budget for 1965 totalling $18,684,000.

The French Government delegate, Mr. Henri Hauch, expressed reservations about the increases proposed in the Budget.

ILO Condemns Apartheid:

The special committee of the Conference on July 3 adopted a draft declaration condemning *apartheid* as "dangerous, criminal and inhuman."

It also adopted an amendment to the ILO constitution allowing for the suspension of any member-State using a declared policy of apartheid.

The declaration on apartheid, adopted unanimously, did not propose any economic or diplomatic sanctions against South Africa, but called on the Government to renounce apartheid and to repeal all apartheid legislation.

C. **Commonwealth Defence Experts' Peace-Keeping Study:** The three-day study in Britain by Commonwealth military experts of the hypothetical problem of a United Nations-sponsored Commonwealth task force operating in a peace-keeping role ended on August 7.

Defence experts from Britain and 15 other countries, meeting at the Staff College at Camberley, took part in the study. Representing India were General J. N. Chaudhuri, Chief of the Army Staff, and Lieut-General S.H.F.J. Manekshaw, General Officer Commanding-in-Chief, Western Command.

The exercise in which they participated, named **Hercules**, was organized by Britain's Chief of the General Staff, General Sir Richard Hull.

After the exercise, General Hull emphasized that the study had been concentrated on the purely military difficulties and problems of such a task force. The theme had been chosen as long ago as September, 1963 and the exercise had been placed in an entirely fictitious setting and in a time scale towards the end of the present decade.

The exercise had proved valuable, showing the defence experts some of the problems which they would face should a force be required in the future.

It had posed the problems of the United Nations command, of initial planning, the force's task, and also the command arrangements for such a force. It had also studied the problems of logistics—of the supply of food and ammunition—in a fictitious background which provided not only a military situation but, for good measure, an earthquake, and the need to get a large port back into operation.

Finally, the exercise had considered the problem of counter-subversion when the military threat had receded.

A consideration of Commonwealth military training matters, in which the visiting experts took part, followed the study of the problem of the peace-keeping force.

The Commonwealth experts at Camberley were also concerned with the Staff College's normal course of instruction for officers of Defence for the Army, Mr. James Ramsden; the Chief of the Defence Staff, Admiral of the Fleet, the Earl Mountbatten of Burma; and the Chief of the General Staff, General Sir Richard Hull.

Besides India, other overseas countries represented at the Camberley exercise were Canada, Australia, New Zealand, Pakistan, Ghana, Malaysia, Nigeria, Southern Rhodesia, Northern Rhodesia, Sierra Leone, Jamaica, Trinidad and Tobago, Uganda, Kenya and Malawi.

[Prev. ref. 2920:AOA:J]

D. **New US Supersonic Military Aircraft:** The US President, Mr. Lyndon B. Johnson, announced on July 24 the development of a new long-range military aircraft which will be part of the most advanced reconnaissance system in the world.

The SR-71 strategic-manned aircraft which, he said, would be test-flown in 1965, would fly at more than three times the speed of sound and operate at altitudes in excess of 80,000 feet. "The system will be used during periods of military hostilities and in other situations in which the United States military forces may be confronting foreign military forces."

The aircraft, to be employed by the Strategic Air Command, had been successfully developed in a $1,000-million programme begun in February, 1963. Deployment of production units would begin shortly after flight testing.

He said the SR-71 was heavier and had a longer range than the A-11 experimental aircraft he announced on February 29.

The A-11 experimental plane was tested in sustained flight at more than 2,000 miles an hour and at altitudes in excess of 70,000 feet.

The SR-71 would use the same J-58 engine developed for the A-11, but it was substantially heavier and had a longer range. The considerably heavier gross weight permitted it to accommodate the reconnaissance equipment needed by the Strategic Air Command to accomplish surveillance missions.

[Prev. ref. 5759:AOA:B]

E. **Ion Rocket Test In USA:** The USA on July 19 proved that the "ion engine", hailed as the best hope for high-speed travel in deep space, can work successfully in space.

It sent two of the engines on an hour-long looping flight, 2,500 miles up and 2,000 miles along the Atlantic range, during which one operated for half-an-hour, turning on and off several times.

Carried into space on an ordinary four-stage chemical rocket, it operated by turning mercury into "ions" of electrically charged particles, and emitting them at such high speed that despite their tiny mass they propelled the ion rocket in the opposite direction. The second ion rocket, using caesium as propellant, lit on schedule but produced no thrust because of an electrical short circuit.

An ion engine produces only a tiny amount of thrust when working perfectly, but can be effective in deep space because the thrust is produced constantly over a long period, permitting a gradual build-up of almost unlimited speeds.

The Statesman's science correspondent wrote: "An ion rocket was conceived many years ago. The first concept was of a rocket that would be propelled by recoil from the emission of high-velocity nuclear particles from a radio-active substance. (The particles which shoot out from the atomic nuclei of a radio-active

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

substance have very high speed and hence, in spite of their extremely small mass, the momentum is relatively large.)

"Later came the idea of a rocket that would be propelled by recoil from the motion of electrically charged nuclear particles (which are called ions) which had been further accelerated by appropriate electrical and magnetic fields, as is done in a cyclotron. Such acceleration could give the ions velocities near that of light, and even allowing for their small mass, the thrust would be tremendous. By such means a rocket could attain velocities very much higher than is possible with chemical fuels which produce jets with limited speeds.

"This has been seen as the only hope for travelling to other stars or in interstellar space. The star nearest to our solar system is about four light-years away, and a rocket travelling at 11 miles a second (which is more than double the speed of the present satellites) would take more than 70,000 years to reach it. But it has been estimated that a rocket, 90 per cent of whose mass consisted of fuel which was entirely converted into particles of radiation (photons), would reach a final speed equal to 98 per cent of that of light. One could think of interstellar flights only with such rockets.

"Those acquainted with some of Einstein's bizarre conclusions would immediately foresee the curious consequences of travelling at such high speeds. Mass would increase and time contract. But for a very long time such consequences will remain only in the realms of fancy, because a photon rocket is a far cry from the ion engine which has now been successfully tested. The immediate task will be to improve the efficiency of the ion rocket by imparting more energy to more massive ion beams. Plans for human travel by such rockets must also take into account the difficult problem of radiation protection".

(*The Statesman*, Calcutta)

F. Soviet Memorandum On UN Peace Force: The Soviet Union suggested in a memorandum published at United Nations on July 11 that some member-States of UN should place military contingents under UN to meet threats to the peace and acts of aggression.

It would be "inadvisable" that any such contingents should be drawn from the armed forces of the permanent members of the Security Council—USA, Russia, Britain, France and Formosa.

But it declared that the UN Military Staff Committee, composed of high military officers of the permanent member-States, must prepare a plan for a UN force. The Committee had done nothing in UN's peace-keeping operations in West Asia, Congo and Cyprus. U Thant, and the late Mr. Dag Hammarskjoeld with the assistance of their own military advisers, had exercised direction over all of these operations.

The memorandum was delivered to U Thant and representatives of many member-Governments earlier in the week, but had not been published in detail before.

On the composition of a UN force, it said contingents from Western and neutral countries and from Socialist (Communist) countries should all be included.

"This means, too," the Soviet Government observed, "that representatives of the Socialist countries would participate in the command of United Nations armed forces established by the Security Council in a given situation." (Yugoslavia has been the only Communist State to be asked to contribute troops to UN.)

The memorandum said Russia would be "prepared to take part with other members of the United Nations in defraying the expenditure involved" in the maintenance of armed forces established to maintain international peace and security.

It stressed Russia's contention, disputed by the West, that "under the Charter, the only body authorised to take action in the maintenance or restoration of international peace and security is the Security Council."

It said developments in the past 10 years gave every reason to believe that "much can be done to enhance the ability of United Nations to thwart attempts to disturb the peace and to prevent conflicts" by peaceful procedures, such as negotiation, good offices and conciliation.

But, in some cases there might arise a situation in which the maintenance of peace in a given area might be difficult to secure by peaceful means alone. In such cases it was right for the Council to adopt non-military measures including the interruption of economic relations, severance of diplomatic relations and other related steps.

"The Soviet Government has repeatedly supported in the Security Council the demands of African States for the application of such measures to the Republic of South Africa...and also to Portugal."

The proposal which was widely debated in diplomatic circles was related to the functions of the Military Staff Committee.

At present the top-ranking member of the Committee is General Robert Porter of the US Army. Britain is represented by a Vice-Admiral, a Major-General and an Air Vice-Marshal, while Russia has two Major-Generals, three Colonels and three naval Captains serving on it.

The Committee meets formally on the first Thursday of every month, and its chairmanship has changed regularly according to alphabetical order among the five member-States. But there has been no discernible contribution by the Committee to the work of the Security Council, of which it is a subsidiary body.

US Stand:

A New York message on July 9 said that US officials had welcomed the Soviet Union's proposal for an international peace force and said that while there were several features in it which were not acceptable to USA, the plan put both the countries "within negotiating distance".

It was clear from the comment of US officials that they are opposed to the key portion of the Soviet proposal, namely, that all such peace-keeping operations should be set up and conducted under the direction and supervision of the Security Council.

The USA insists on maintaining the present position under which peace-keeping operations can be set up through the General Assembly if a veto blocks such operation in the Council.

The USA would want a continuation of the present procedures where if Security Council action were blocked by the Big-Power veto, the issue could be transferred to the General Assembly where no veto operates.

Officials also said that the Soviet offer would apparently bar the five major Powers from contributing to the proposed UN force. They intimated that this would be objectionable as far as USA was concerned.

The overall attitude, however, was to say that if the Soviet memorandum offered any hope for further exchanges, that would be regarded as positive.

U Thant's Comment:

At a news conference on July 8, the UN Secretary-General, U Thant, commented on the Soviet memorandum on the UN programme of a peace-keeping force.

He said that the main purport of the Soviet memorandum on measures to strengthen the effectiveness of United Nations in the maintenance of peace and security was the thesis that the Security Council alone was competent to deal with peace-keeping operations.

The Soviet memorandum and the tentative proposals of some Western Powers, he said, were very helpful to all member-States in arriving at a suitable formula, and they were a good augury for future negotiations.

He added that the Soviet memorandum did not deal specifically with "stand-by" forces. It dealt primarily with the implications of Chapter VII of the UN Charter.

(*The Times of India*, Bombay and *United Nations*)

[Prev. ref. 5827:AOA:C]

G. Mr. Mikoyan Elected President Of USSR: On the recommendation of the Soviet Prime Minister, Mr. N. Khruschev, Mr. Leonid Brezhnev was relieved on July 15 of his post as President of USSR and Mr. Anastas Mikoyan was elected to succeed him.

The nomination was made by Mr. Khruschev at the closing session of the Supreme Soviet, Russia's Parliament, which ratified the change.

Mr. Brezhnev was relieved of his post to enable him to concentrate his activities as Secretary of the Central Committee of the Soviet Communist Party. He was elected to this post in June, 1963.

Mr. Khruschev described Mr. Mikoyan as a worthy successor as Chief of State. (Officially, the post is that of President of the Presidium of the Supreme Soviet.) He said that Mr. Brezhnev was needed for full-time work in the Communist Party.

Mr. Mikoyan, who was relieved of his post as a First Deputy Premier, was wished success by Mr. Khruschev.

Mr. Mikoyan said to the crowded hall where Russian Tsars were once crowned: "I will do my best to justify your confidence, to fight, to work for the victory of communism together with you."

Mr. Mikoyan, Armenian born, was a Bolshevik revolutionary in the stormy days of the Russian Revolution. His twisted nose is a memento of the old days in which he survived street-fighting and civil war. Once he was sentenced to death before a firing squad. He will be 69 on November 25. He had a genius for staying alive through Stalin purges and Soviet power struggles.

He is an expert in Soviet foreign and domestic trade. He also showed many talents, among them a flair for diplomacy to serve as a salesman for the Russians. These talents sent him on travels to other parts of the world. He made three trips to America. He is credited with one of the Soviet Union's significant coups—the intrusion into the Western hemisphere by way of Cuba. He turned up in Cuba early in 1960, was lionized by the Cuban Premier, Dr. Fidel Castro and brought about a multi-million-dollar agreement for Soviet purchase of Cuban sugar. It was the beginning of the sweep of Cuba into the Soviet camp. He was in Cuba again in the Fall of 1962, at the height of the dangerous Cuban crisis after President J. F. Kennedy demanded the withdrawal of Soviet missile sfrom the Island. Dr. Castro—though obviously feeling abused—was mollified.

Mr. Mikoyan came from a prosperous family in Armenia, then a cruelly exploited colony of the Tsar, and was educated for the Russian Orthodox priesthood. He chose revolution instead. Under Stalin he rose swiftly in the Communist party. In the mid-1930s he was assigned to the Ministry of Foreign Trade and

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

much of his activity since then was in that field. Since 1939 he was a member of the inner circle—the Politburo under Stalin and the Communist Party Presidium under Mr. Khruschev. Much decorated, he holds three Orders of Lenin—the highest Soviet award—the Red Banner of Labour, Hero of Socialist Labour and many lesser honours.

Mr. Brezhnev joined the Party in 1931 at the age of 25. He worked only a short time as a steel engineer before concentrating on Party work in his native Ukraine region, the scene of Mr. Khruschev's own rise. He reached the upper ranks as a Party Secretary and a candidate member of the Central Committee's Presidium in 1952. But he lost the jobs in the reshuffle after Stalin died in March, 1953.

When Mr. Khruschev defeated his rivals in 1956 and assumed general control, he put Mr. Brezhnev back into the Secretariat and the Presidium. As President Mr. Brezhnev gave up the job of Party Secretary.

(*The Hindu*, Madras)

H. **Session Of UN Committee On Colonialism:** The UN Special Committee of 24 on the ending of colonialism, in a session which began on February 25 and ended on July 3, adopted 11 resolutions, reached a decision by consensus in one instance, and heard 15 petitioners.

The action taken by the Committee was with respect to the questions of Southern Rhodesia, Aden, Malta, South-West Africa, British Guiana and the territories under Portuguese administration, all of which were on the agenda for the current session.

Also on the Committee's agenda were territories in the Caribbean, in the Americas, in the Pacific and adjacent to Africa and Asia, which it had not previously considered.

Of the resolutions adopted by the Committee, six embodied decisions on Southern Rhodesia, two on Aden, one on South-West Africa, one on British Guiana, and one on the territories under Portuguese administration. A consensus was reached on Malta. Three of the resolutions involved the appointment of visiting missions.

The Sub-Committee on Southern Rhodesia visited for talks with the British Government from May 30 to June 5. The Sub-Committee on Aden visited Cairo on July 4.

The Committee heard 15 petitioners: two on Southern Rhodesia, two on Aden, one on Malta, four on South-West Africa, three on British Guiana, two on the territories under Portuguese administration and one on Bermuda.

The Committee's decisions on Southern Rhodesia were taken at different times and in response to new developments. On March 23 the Committee invited Britain to hold a constitutional conference without delay to make arrangements for the independence of the Territory at the earliest date. It urged Britain to warn the "minority settler government" of Southern Rhodesia against the consequences of a unilateral declaration of independence and called upon her to declare categorically that independence would not be granted until majority rule was established on the basis of universal adult suffrage.

On March 24 the Committee requested Britain to use all its power and prerogatives to save the lives of political prisoners who had been condemned to death under the amended Law and Order (Maintenance) Act and to ensure the release of all political prisoners.

On April 27, the Committee voiced deep concern at the serious deterioration of the situation in Southern Rhodesia following the arrests of Mr. Joshua Nkomo and other political leaders and requested Britain to take the necessary steps with a view to effecting their immediate release. It repeated its call to hold a constitutional conference in order to make arrangements for the independence of the territory.

On May 18, the Committee resolved to send a sub-committee of five members to London to discuss with Britain the implementation of the resolutions of the General Assembly as well as of the Special Committee concerning Southern Rhodesia.

On May 22, it authorized the Sub-Committee to visit "such places in Africa" as it might consider necessary in connexion with the implementation of the resolutions on Southern Rhodesia.

Finally, on June 26 it deplored the "negative attitude" of Britain and further deplored its "persistent refusal" to co-operate with United Nations in the implementation of the resolutions concerning Southern Rhodesia. It endorsed the conclusions and recommendations of its Sub-Committee and decided to draw the report to the immediate attention of the Security Council.

The Committee considered the question of Aden twice during its session.

On April 9, it declared that the policies pursued by Britain had increased tension in the area. It called on Britain to lift the State of Emergency; to repeal all laws which restricted public freedoms; to release all political prisoners and detainees; to allow political exiles to return; and to cease all repressive action, particularly military expeditions and bombings, against the people. It stated that the military base was prejudicial to peace and called for its early removal. Moreover, it decided to establish a sub-committee of five to keep the situation under constant review and to arrange, in consultation with the Administering Power, for visits to the Territory as might be deemed necessary.

On May 11, the Committee deprecated the military action undertaken by the British authorities in Aden against the people of the Territory and urged Britain to cease its military measures forthwith.

In addition, it resolved to call the attention of the Security Council to the "dangerous situation" prevailing in the area.

According to the consensus which was adopted on Malta on April 30, the Committee noted with satisfaction that the accession of Malta to independence was planned for May 31, 1965, but it also noted that controversies existed among the various political parties with respect to the Constitution of the Territory.

It appealed to Britain to take the necessary measures to assure the transfer of power to the people of Malta in accordance with their freely expressed wishes and with the provisions of the Declaration on independence.

It also agreed to ask Britain to ensure that all political parties in Malta should have freedom of expression so that the aspirations of the people might be safeguarded.

Regarding South-West Africa, the Committee on May 21 called upon South Africa to desist from implementing the recommendations of the Odendaal Commission of inquiry into South-West African affairs.

The Committee stated that it considered any attempt to annex a part or the whole of South-West Africa as constituting an act contrary to international law, and a clear violation of the UN Charter which would endanger international peace and security. It condemned South Africa for its "persistent refusal" to co-operate with United Nations. It decided to request the Secretary-General to take steps to establish the office of a UN Technical Assistance Resident Representative in South-West Africa. Moreover, it resolved to draw the attention of the Security Council to the "critical situation" in the Territory.

Following an examination of conditions in British Guiana, the Committee took a series of decisions on June 24.

It called on Britain to fix without delay the date for the independence of British Guiana. It appealed to all the political leaders of the country and all others concerned to take immediate steps to restore harmony and peaceful conditions in the Territory. It also called on Britain to release all political prisoners and detainees; to refrain from taking any action which would aggravate the present situation; and to co-operate with the Special Committee in implementing resolutions on the question.

In addition, it decided to establish a "good offices" sub-committee of three to visit the Territory and take any other measures necessary for the implementation of resolutions adopted on the Territory.

Finally, it requested the Secretary-General to renew his efforts to facilitate the implementation of the recommendations of the Sub-Committee on British Guiana established in 1963.

The Committee took action on the territories under Portuguese administration on July 3.

In the resolution embodying its decisions, it noted with deep concern the activities of foreign economic and other interests in the territories and stated that they were detrimental to the political aspirations of the indigenous people. It decided to request the Sub-Committee to study their activities.

The Secretary-General was requested to invite the attention of the High Commissioner for Refugees and the specialized agencies concerned to consider the possibility of extending medical and other assistance to the "increasing numbers" of refugees from the Territories under Portuguese administration. The Committee also condemned the Government of Portugal for its "continued refusal" to implement the declaration on independence and decided to draw the attention of the Security Council to the "deteriorating situation" with a view to its securing compliance with the relevant resolutions.

The Committee made particular reference to the Security Council resolution of July 31 which, among other things, called for the immediate recognition of the right of the people to self-determination; the immediate cessation of repressive acts by Portugal; and the withdrawal of forces used for that purpose.

It also urged negotiations with the authorized representatives of political parties within and outside the territories with a view to transferring power to freely elected political institutions, and advocated the granting of independence immediately afterwards.

(*United Nations*)

I. **World Economic Survey:** The United Nations, after its annual review of the world's economic health, on July 3 reported widespread expansion of production in the past year, almost universal gains in world trade, and a rise in commodity prices that increased the earning power of many of the developing countries.

The evaluation appeared in the **World Economic Survey, 1963, Part II**, entitled "Current Economic Developments".

On the bright side, the Survey cited, for example, findings such as:

(1) Value of world trade—up by 9 per cent between 1962 and 1963.

(2) Gross product or national income—up by 4 to 5 per cent in the various groups of countries (industrialized primary exporting or with centrally planned economies).

(3) Price index for primary products (such as foods, fibres, fuels and minerals)—average restored to its 1958 level after a downward trend since 1957.

(4) Developing countries as a group—a trade deficit "smaller in 1963 than in any year since 1954."

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(5) Industrial countries—a "continuing upswing".

(6) Countries with centrally planned economies accounted for "the most dynamic element" in the trade of the developing countries, with exports to the latter up almost 75 per cent between 1960 and 1963.

On the other hand, the Survey pointed to a number of "sources of imbalance" that showed little tendency to lessen in 1963. They include inflationary pressures in several industrial nations and continued unemployment in one of the others; "disappointing returns from agriculture" in some of the centrally planned economies; and up-spiralling living costs in a number of developing countries.

Further, despite a "vigorous expansion" in exports of the developing countries, their rate of growth in 1960-63 continued to lag behind the rates achieved in industrial and centrally planned economies, and there "has been an even slower growth" in the imports required for development programmes.

Part II of the Survey consists of an introduction which reviewed over-all trends; three chapters, giving details of the industrial countries, the primary exporting countries, and countries with centrally planned economies; and an annex on the primary commodity situation in 1962-63 and 1963-64.

The expansion of production between 1962 and 1963 was "probably more widespread among countries and more uniform among the major regions than in previous years."

In the industrialized market-economy countries, gross national product rose an average of 4 per cent. The average increase in gross domestic product in the primary exporting countries, and in national income in the centrally planned economies, was "probably nearer 5 per cent". These rates of growth represent a slight acceleration over the 1961-62 rates for the first group, a continuation of the previous rate in the second, and a slight deceleration for the third.

In general, the principal factor in the production increase was a rise in output of manufactured goods—by 5 to 6 per cent in the industrial countries and the primary-exporting group (measured by the so-called "value-aided index") and by about 7 per cent in the centrally planned economies (measured by gross output).

In contrast, production of primary products tended to lag. Preliminary estimates suggest that, outside Mainland China, world output of the major primary commodities entering international trade was only about 2 per cent above the 1962 level —a rate of increase about half of that registered between 1961 and 1962. Partly because of unfavourable weather, world production of basic foods was no greater in 1963 than in 1962.

The poor crops in many countries, along with other factors such as widespread increases in income, stimulated demands on the world market and led to continued expansion of international trade.

The demand for exports contributed to "one of the most notable features" of 1963—a "sharp reversal" in the price index of primary commodities moving in international trade. After a downward trend since 1957, the average of the index for 1963 was 6 per cent above the 1962 figure and thus was restored to the 1958 level.

The price increases had a significant effect on the foreign exchange earnings of a great majority of the less developed countries as well as the exporting nations of North America and Oceania.

The purchasing power of the shipments from the primary exporting countries rose by about 4 per cent in the course of 1963. As a result their combined national income probably increased somewhat more than the 4 to 5 per cent by which the volume of their gross product expanded.

The rise in prices of primary commodities resulted not only from the effect of bad weather but also from "a more significant improvement in the balance between production and consumption."

"The vigorous growth in international trade which has characterized most of the post-War period continued in 1963."

The value of world trade in 1963 was about $153 billion—an increase of $12 billion or almost 9 per cent, from the 1962 figure. "All regions participated in this expansion, but almost two-thirds of it was accounted for by the industrial countries of North America, Western Europe and Japan."

Exports from the centrally planned countries of Eastern Europe, the Soviet Union and Mainland China rose by almost $1.3 billion or 7 to 8 per cent above the 1962 level. Shipments from the primary exporting countries rose by about $2.9 billion, an increase of between 8 and 9 per cent.

The expansion in the exports of the developing countries in 1963 helped to raise the rate of growth in their export earnings to an average of between 4 and 5 per cent a year for the 1960-63 period. However, this rate was "well below those attained in the other regions." The comparable rate of growth in export earnings of the industrial market economies was between 6 and 7 per cent a year and for the centrally planned economies was between 7 and 8 per cent a year.

In tracing patterns of commerce, the Survey found that "the most dynamic" element in the trade of the developing countries was the flow of goods from countries with centrally planned economies. This increased relatively little between 1962 and 1963, but in 1963 it was 75 per cent—almost $1 billion greater than in 1960. On an over-all basis, however, the countries with centrally planned economies provided the developing countries with only 5 per cent of their imports in 1963.

In contrast, trade among the developing countries themselves rose by little more than 3 per cent a year in the 1960-63 period. Shipments from the industrial countries to the developing countries were actually lower in 1963 than in 1960, even though they had increased between 1962 and 1963.

The "most dramatic expansion" in trade during the early years of the Development Decade has been among the industrial market-economy countries. It rose by $8 billion (10 per cent) between 1962 and 1963, and by more than 8 per cent a year in 1960-63, for a gain of $14.5 billion in three years. More than three-fourths of the expansion occurred within Western Europe, and almost 40 per cent of it within the European Economic Community.

On the latter point, the Survey noted that between 1962 and 1963 exports to the EEC rose by almost 9 per cent from North America, about 11 per cent from the European Free Trade Association, more than 17 per cent from within the Community, and more than 20 per cent from Japan. In addition, exports from the less developed countries to the Community "increased sharply", by about 11 per cent.

In a year of general trade expansion, a "relatively small" number of inter-regional flows contracted. They included a decline in the movement of goods to Latin America and a decline in exports from Latin America to countries with centrally planned economies, "reflecting in part a reduction in sugar shipments from Cuba".

Countries of the European Free Trade Association imported less from Asia than in 1962 (from Mainland China and Japan as well as from Southern and South-East Asia). There was also a decline in the trade of Mainland China with the other regions with centrally planned economies, as well as with North America.

Trade between North America and West Asia was below the 1962 level. West Asia received less from Eastern Europe and the Soviet Union, and Western Europe exported less to the Soviet Union.

"For the rest, expansion was almost universal", and the gain was "particularly notable among the primary exporting regions which had not shared fully in the growth of trade in the previous years."

In some regions, such as Africa, South-ern and South-East Asia and Oceania, the increase in export proceeds between 1962 and 1963 exceeded the increase in the two preceding years, largely because of rising prices.

As a result of the sharp increase in exports, there was a significant improvement in the balance of payments of Canada and, to a less extent, the United States.

The combined trade deficit of the developing countries was "smaller in 1963 than in any year since 1954", since the rise in their spending for imports "lagged well behind the upswing in export earnings".

On this point, the Survey reported that world exports to the developing countries rose at a rate of only 2 to 3 per cent a year in 1960-63, compared with growth rates of 6 per cent yearly in exports to the countries with centrally planned economies and almost 8 per cent a year in exports to the industrial countries.

"For economic growth to continue at a satisfactory rate, imports will have to be increased. Such an increase got under way in the course of 1963 in many of the developing countries; for it to be sustained, world demand for their export products will have to rise at an adequate pace. The margin of safety achieved under the generally favourable market conditions of 1963 is a small one in relation to the longer-term growth needs."

Despite the gains registered in 1963, a number of different types of problems continued to exist, or were intensified, in various regions.

In some countries of Western Europe, for example, the rise in commodity prices tended to exacerbate existing inflationary pressures. In the United States, industrial capacity was not fully utilized, and "the continued growth of the economy had very little impact on the level of unemployment".

In the countries with centrally planned economies, "imbalances have resulted in surpluses of some consumer items and shortages of others". Efforts to raise the productivity of agriculture were "greatly intensified" in several of the countries in that group. "The process of adapting methods of planning and management to the more intricate requirements implicit in economic diversification and growth" also continued in all centrally planned economies." There was "a distinct tendency to increase the degree of autonomy" of individual economic enterprises.

Weakness in agriculture was also evident in a number of the primary exporting countries. In some of the developing countries, production was no higher in 1963 than in 1962, or was actually lower, and in a number of others "the growth of agriculture is barely keeping pace with the expansion in population".

A widespread acceleration in the wage-price spiral occurred in several of the developing countries, and the number of countries where cost of living rose by a fourth or more was "significantly greater" than in 1962.

In addition, some of the primary exporting countries lost foreign exchange reserves in 1963—reflecting acute internal disequilibrium—and some sought adjustment by devaluing their currencies. Others were able to maintain external equilibrium by holding down imports, although some were aided by the favourable turn in prices of many primary products.

ASIAN RECORDER

September 16—22, 1964

Regd. No. D-727
Vol. X No. 38

ADEN

A. Closure Of People's Socialist Party HQ: The police on August 15 locked up the headquarters of the People's Socialist Party (PSP) after a raid, and seized all files, documents, typewriters and a duplicating machine.

A police guard was posted at the premises.

Mr. Rashad Mohamed Sheibany, head of the PSP branch in Crater Town, said the police had also raided his house and carpentry shop at the same time. Books and files found at his house were later returned to him at the police station.

[Prev. ref. 5963:ADN:A]

B. Protest Against Federal Order Prohibiting Circulation Of Arabic Newspaper: The Government of Aden State and the South Arabian Federation again clashed over the Federal Government order of August 12 prohibiting the circulation of Aden's Arabic newspaper *Al Ayyam*.

Mr. Hassan Ismail Khodabux Khan, acting Chief Minister for Aden, said that his Government had made a written protest to the acting British High Commissioner against the ban, which he described as "a blow to the Aden Government and another example of interference in our internal affairs".

The Aden Government, he said, was the licensing authority and the Federal Government therefore should not have taken action without Aden's approval.

In his order to Mr. Muhammad Bashraheel, Al Ayyam's owner-editor, Mr. Abdul Rahman Girgrah, the acting Federal Minister of National Guidance and Information, said that the newspaper contained matter prejudicial to the Federation's internal security.

AFGHANISTAN

A. Independence Day Celebrations: August 23 was celebrated as the 46th anniversary of independence throughout the country.

In a message broadcast to the nation, King Zahir Shah said that Afghanistan's foreign policy was based on neutrality and free judgment, not on participation in military pacts.

He said her policy was based on mutual respect and respect for the United Nations' Charter.

He said Afghanistan would take part in the second conference of 69 neutral nations opening in Cairo in October.

He expressed the hope that a solution to the Pakhtoonistan issue would be found very soon.

The King, speaking immediately after an Independence Day parade, referred to the issue of Pakhtoonistan and said: "Today when we celebrate this day, our thoughts go out to our Pakhtoon brethren who still are not independent. Very soon we should be able to achieve through peaceful means a solution of this issue."

Dr. M. Yusuf's Message:

An Independence Day message from the Prime Minister, Dr. Mohammed Yusuf, to the nation was broadcast by *Kabul Radio* on August 27.

He said that his Government was meant to bring real freedom to the nation and to develop the country. He expressed satisfaction that real democracy would come into existence as a result of the new basic Constitution. There would be real justice. In this atmosphere, the country would be able to take quick steps for the development of its resources.

Commenting on Afghanistan's friendly relation with other countries, he said good contacts with friendly nations were expanding day by day and these were based on mutual respect.

Turning to relations with Pakistan, he said it was Afghanistan's wish to have friendly relations with that country. But Pakistan's position on the Pakhtoonistan issue was standing in the way of realizing this wish. He recalled that when the President of Pakistan arrived in Kabul for a short visit, the Afghan Government took advantage of the occasion and once again made its stand clear on this issue. He expressed the hope that this difference with Pakistan would disappear, once the Pakhtoonistan question was solved in accordance with the wishes of the Pakhtoons.

He said Afghanistan had been trying to solve the problem through peaceful methods and in accordance with social justice. He added that the Government of Pakistan had never taken any sincere steps to solve this issue justly. That was the reason why the issue had remained unsolved.

(*Kabul Radio*)

[Prev. ref. 4813:AFG:A]

B. Soviet Aid: Under an Agreement signed in Kabul on July 13, the Soviet Union is to lend Afghanistan the equivalent of £10,500,000 for levelling and asphalting a highway in northern Afghanistan.

Afghanistan is receiving an increasing amount of aid from the Soviet Union for various development projects, especially in the field of power and energy. Among the projects which are being assisted by the Soviet Union is the Sardesh Dam in Ghazni in eastern Afghanistan, which should be ready by the end of this year. It will irrigate 37,500 acres and has a storage capacity of 200,000,000 cubic metres.

Prospecting for oil and natural gas is continuing in northern Afghanistan and a pipeline is being constructed from the Shebirgan deposits to Soviet Tajikistan. The export of natural gas will enable Afghanistan to pay back the credits she receives.

Work is also proceeding on the drafting of the project to utilize the vast power resources of the Panj and the Amu Darya for the benefit of both countries. The Dasht-i-Jum Dam, in the power complex of the confluence of the Panj and the Vaksh, is expected to be 350 metres high. No structures such as these have ever been built, particularly in a seismic area.

(*Middle East Economic Digest*, London)

[Prev. ref. 5699:AFG:A; 5987:AFG:A]

BURMA

A. Col. Saw Myint Dismissed From Ministership: The Chairman of the Revolutionary Council, Gen. Ne Win, relieved on August 18 Colonel Saw Myint, Minister of Information and Culture, pending inquiries instituted under the law relating to demonetization of high denomination currency notes.

Colonel Hla Han, Minister of Education, will take charge of the Ministry in addition to his own portfolio.

Colonel Saw Myint returned from Britain in July after medical treatment for an ear. As Minister he also held the post of organizational secretary of the Burmese "Way to Socialism" party. This post now goes to Brigadier San Yu, the Finance Minister.

(*The Statesman*, Calcutta)

[Prev. ref. 5903:BUR:A]

B. Buddhist Monks' Demand: A meeting of Buddhist monks held in Rangoon on August 23 asked the Government to refund in full all demonetized currency notes belonging to pagoda trust funds and Sangha common funds.

It appealed to newspapers and printing presses not to print or publish anything which might create discord and misunderstanding between the monks and the Government.

By a resolution, it condemned the disturbances created in Mandalay by a section of the young monks on the nights of August 15 and 16.

The disturbances followed the publication by a newspaper of an advertisement in connexion with religious affairs. The young monks of Mandalay, resenting it, destroyed the newspaper office and the press in which it was printed. The house of the editor was also damaged.

Meanwhile, Col. Van Kulh, Chairman of the Security and Administration Committee, Mandalay Division, appealed to the Buddhist clergy in Mandalay to co-operate with the Government and assist in preventing such incidents.

He said that the monks who felt offended by the "announcement" concerning a

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

religious matter should have complained to the Government and the Government would have dealt with the matter according to law. The Government would not any more tolerate the clergy taking the law into their own hands.

(*The Times of India*, New Delhi)

[Prev. ref. 5903:BUR:A]

CEYLON

A. Federal Party Convention: The annual Convention of the Federal Party, the principal political organization of Tamils, decided in Trincomalee on August 23 that the time was not opportune for the members of the Party to resign their seats in Parliament.

The decision, passed by 95 votes to 62, was a rejection of the decision of the working committee of the Party taken in June that Party members should vacate their seats in Parliament as a protest against the Government's policy of having Sinhala as the only State language.

Earlier, the subjects committee of the Convention rejected by 22 votes to 15 a proposal by the Colombo unit of the Party to amend the Party's constitution to enable it to launch a struggle for a separate Tamil State.

Muslim members of the Party said that if the Tamils asked for Tamilnad (a Tamil State) it would be necessary for the Muslims in the party to agitate for a Muslimnad.

(*The Hindu*, Madras)

[Prev. ref. 5699:CEY:A]

CHINA

A. Tolerance Of Colonialists —Soviet Accusation: The Soviet news agency *Tass* on August 19 accused China of conducting extensive trade with South Africa and tolerating colonialist oppression in Hong Kong and Macao.

Denouncing Chinese expressions of support for "national liberation" movements as faked, Tass said: "It is no secret that the British Colony of Hong Kong would have perished within months but for China's support.

"While advocating the struggle and liberation of African peoples the Chinese Government easily puts up with the fact that millions of Chinese people are still suffering under the colonial oppression by British and Portuguese colonialists in Hong Kong and Macao.

"The Chinese champions of freedom are not at all worried by this situation as they actually share the profits with the imperialists who exploit the Chinese population of Hong Kong."

Tass charged that foreign ships transported goods from China to South Africa, among them "great quantities of dynamite" for use against the African population.

It added: "It goes without saying that the Peking Government's secret connexions with the Verwoerd regime are carefully concealed and it is hard to obtain any exact figures on this score."

(*The Times of India*, Bombay and *Tass*)

INDIA

SUMMARY: Relations With China And Pakistan; US Loan; US Team's Report On Land Reform Programme; Pondicherry Elections; State Loans.

A. Relations With China And Pakistan—Sardar Swaran Singh's News Conference: At a news conference in New Delhi on August 21, the Minister for External Affairs, Sardar Swaran Singh, said that the Government had no evidence of China's willingness to withdraw its posts from the demilitarized zone in Ladakh. Nor had any friendly country given India any evidence on which this possibility was based.

He refused to comment on Mr. Felix Bandaranaike's speech in the Ceylonese Parliament hinting at Chinese agreement to withdraw the posts in Ladakh. He said he had still to study the text of Mr. Bandaranaike's speech.

In reply to questions, however, he made it clear that India-China talks following the actual withdrawal of the posts would be held within the frame-work of the Colombo proposals. Withdrawal of the Chinese posts would amount to a substantial fulfilment of an essential precondition mentioned in the Colombo proposals. The basis would then be laid "for making further progress in the matter of steps enunciated in the proposals themselves."

[In its Notes to China following the presentation of the Colombo proposals, the Government of India had envisaged the following steps: (1) The acceptance by both sides of the Colombo proposals can be followed up by a meeting of the officials to arrive at a settlement of various matters left by the Colombo Powers for direct agreement between the parties and to decide the details regarding the implementation of the proposals on the ground. (2) The officials of both sides can then take action to implement these proposals on the ground so that agreed cease-fire arrangements are made on the ground. (3) Thereafter, in the improved atmosphere, India and China can take up the question of their differences on the boundary question and try to reach a mutually acceptable settlement in one or more than one stage. If a settlement is reached, it can be implemented in detail on the ground.]

Sardar Swaran Singh told a questioner that the Government had not approached either the Ceylonese Government or any other Government to suggest that China itself should convey to India its readiness to withdraw the posts in the demilitarized zone. India had not moved any Government "to persuade China to adopt this or that course."

He was asked if Mr. Jaya Prakash Narayan's suggestion for leasing Aksaichin to China for civil purposes would not weaken India. He replied: "I don't see how it should weaken the Indian stand, although we may not like the suggestion. An inconvenient suggestion need not weaken our stand."

Asked if a dialogue was going on between India and China, he replied in the negative.

He was then asked a number of questions about India-Pakistan relations. He said that there had been an exchange of correspondence between India and Pakistan on the proposal about a summit meeting some weeks ago, "but of late I don't think there has been any move from either side." One should wait for the outcome of the proposed Indo-Pakistan Home Ministers' Conference. After that the convenience of the President of Pakistan and the Prime Minister of India could be ascertained and the proposal for their meeting considered. He agreed that such a meeting would be a good thing.

He was asked if, after his meetings with Sheikh Abdullah in Srinagar and New Delhi, he felt that a summit meeting would be successful. He replied: "I don't think that the success of a summit meeting should in any way be linked with my talks with Sheikh Abdullah. Summit meetings should always yield good results. They improve the atmosphere.

"I held talks with Sheikh Abdullah. The overall impression left on my mind was that he is devoted to the cause of amity and friendship between India and Pakistan. It is a desirable objective."

He said there was no proposal for a meeting of the Foreign Ministers of India and Pakistan before the Ayub-Shastri meeting.

[The Home Ministers of India and Pakistan were to have met some days earlier. But the Home Minister of Pakistan fell ill and the meeting could not take place. Depending on the convenience of the Home Minister of Pakistan, the next meeting of the Home Ministers of the two countries would be fixed.]

He said that if there was an invitation from Pakistan, he would be glad to visit that country. Asked whether he had seen the Pakistan Foreign Minister, Mr. Bhutto's reported remarks that he would welcome a meeting with him, he said that he had seen that statement. "I welcome that sentiment but I have not heard from him." Invitations to visit countries were not extended through the Press.

Asked what role India would play at the non-aligned conference in October, he said: "India will play a humble role. It will contribute a little bit towards consolidating the idea of non-alignment and peaceful co-existence which are the main objectives of the conference. India feels happy that the number of countries which follow the policy of non-alignment is increasing. India has no particular plans to push through. But she will try to give a real content to the concepts of non-alignment and peaceful co-existence."

He said that India would continue to take the stand that the Soviet Union should attend the second Afro-Asian Conference to be held in 1965. India and some other countries felt that the Soviet Union should be invited for this Conference, as these countries considered the Soviet Union as an Asian country because a major part of that country was in Asia.

(*The Times of India*, New Delhi)

[Prev. ref. 5968:INI:A]

B. India To Ratify Amendments To UN Charter: The Government decided on August 20 to ratify the amendments to the UN Charter in accordance with two draft resolutions which were passed by the UN General Assembly on December 17, 1963.

Although the UN resolutions had called for ratification of the proposed amendments by September 1, 1965, the Organization of African Unity had suggested their ratification by African members of UN by August 31 this year.

India, having always supported enlargement of the membership of the Security Council and the Economic and Social Council and further played an active and leading role in the negotiations leading to the passing of the resolution in the UN Assembly, considered their ratification as another step forward in keeping with the aspirations of the Afro-Asian members of UN.

One of the draft resolutions proposed the following changes: (1) The number of non-permanent members in the Security Council is to be increased from ex to 10; (2) it would provide for a majority

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

of nine to pass a resolution in the enlarged Security Council, instead of seven, as at present; (3) among the 10 non-permanent seats, the distribution proposed was five from African and Asian States, one from East European States, two from Latin America and two from West European and other States.

The other draft resolution provided for enlarging the membership of the Economic and Social Council from 18 to 27. The resolution also proposed that of the enlarged membership, 12 should go to African and Asian States, five to Latin American States, four to Western Europe and other States, two to Eastern Europe and four should be from among the permanent members of the Security Council.

C. **US Loan For Cochin Oil Refinery:** Cochin Refineries has arranged a loan of $18 million from private US sources.

The loan consists of two parts—a short-term loan of $6 million from three US banks and $12 million in the form of a series of long-term loans issued to private US investors through a trust. The latter arrangement is considered particularly favourable from the point of view of the company and India's foreign exchange position, as the notes would mature in semi-annual instalments during the 10-year period commencing from 1970.

The transaction, which was completed on August 14, involves, among other things, an initial withdrawal of $5.85 million out of the long-term amount to cover dollar commitments made by Cochin Refineries so far.

The company, which was formed by an agreement between the Central Government, Phillips Petroleum Company (US and Duncan Brothers, Calcutta), has made considerable progress in its purchases. Several hundred tons of steel items have already arrived at the Cochin site and construction work is progressing satisfactorily.

(*The Hindu*, Madras)

[Prev. ref. 6005:INI:C]

D. **New Cabinet Secretary:** The Prime Minister, Mr. Lal Bahadur Shastri approved on August 22 the appointment of Delhi's Chief Commissioner, Mr. Dharma Vira, as Cabinet Secretary.

He is expected to assume charge on November 19 when Mr. S. S. Khera, the present Cabinet Secretary, relinquishes office. Mr. Khera had been Cabinet Secretary since April, 1962.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5863:INI:A]

E. **Land Reform Programme —US Expert Team's Criticism:** According to a survey by a team of US experts, led by Mr. Wolf Lap Ladejinsky, faulty land reform laws and the "negative attitude of Government officials at the State, district, block and village levels" were responsible for unsatisfactory tenurial conditions to "package programme" districts.

"Such tenurial conditions are obviously not conducive to agricultural production," the team observed.

The team visited four representative districts—Aligarh (UP), Ludhiana (Punjab), Shahabad (Bihar), Tanjore (Madras) and West Godavari (Andhra Pradesh)—covered by the intensive agricultural programme, popularly known as the package programme.

Excepting Aligarh, the tenurial situation in the other districts covered by the survey was stated to be unsatisfactory. A sizable area was cultivated by tenants, and most tenancies were oral leases.

In Tanjore, West Godavari, and Shahabad land records did not contain any information about tenants. The landlords still continued to change tenants from plot to plot to defeat the tenancy laws. Thus a large number of cultivators held no title to the leased lands, paid high rents, and were never certain of their status. They were left with little to subsist on and much less to invest.

The situation was further aggravated by the reluctance of village level workers to prepare production plans for the "pure" tenant-farmer and, in respect of leased lands, for the owner-tenant farmer, unless the landlord agreed to it.

As part of this situation, a co-operative society would not provide the tenant with a short-term loan unless he produced a lease deed from the landlord of his signatures on the loan application. Even where a tenant succeeded, the maximum loan that he could get was very small. "There is ample evidence, therefore, that the vast majority of tenant-cultivators are poor investors and the package programme aimed at reaching every farm family is bound to suffer accordingly."

The team was of the view that "the reason for this state of affairs is twofold: one is faulty legislation, and the second is the negative attitude of Government officials at the State, district, block and village levels."

In Madras and Andhra Pradesh the present land reform law was of a temporary stop-gap nature; comprehensive legislative measures had yet been enacted. In Bihar, the law in force was still the Tenancy Act of 1885 with some modifications which were "wholly inadequate." Legislation in Punjab was "extremely defective and needs complete overhauling." Only in Uttar Pradesh a well-thought-out and comprehensive legislation had been enacted and effectively implemented.

According to the team, a factor in the tenurial situation which needed to be singled out was that in all the four districts where leasing was permitted, a large number of small landowners have leased small plots to make up viable units of cultivation.

The problem was compelling in the districts of Tanjore and West Godavari where 50 per cent or more of farmers cultivate wholly or partially leased lands, mostly on oral leases. "If land tenure conditions were a part of the criteria for selecting a package district, West Godavari and Tanjore would not qualify at all."

In Tanjore—"a district with one of the nation's worst land tenure systems"—there was a "vast army" of tenants and agricultural labourers. Personal cultivation was not popular in this district. The owners, big and small, were "gentlemen farmers." Rents ranged from 60 to 65 per cent of the crop—although the Fair Rent Act of 1956 provides for 40 per cent of the normal gross produce to be paid as rent. "Officials behave as if the Act was not meant to be enforced and, in the circumstances, landlords see no cause for being on the defensive."

There was a "startling" lack of security of tenure. Nor had the tenants benefited from the Land Ceiling Act, which according to the team, was "a paper proposition." "Only a great optimist would say that the district has a bright future, unless the land system is completely overhauled."

In West Godavari, an estimated 1,000 tenants out of a total of 2,000 farm families held no titles to land they cultivate, pay exorbitant rents, and were never certain of their status. Even the high rate of fair rent fixed by law—50 per cent of the gross produce—was not being observed. Two-thirds of the gross produce as rent was quite common, and in some cases it was even higher.

The team observed that the law relating to fair rent was itself defective, as it introduces no "tools of enforcement."

In Shahabad, the situation was no better. Evictions were endemic in the absence of a correct record of rights. According to the team, the hard core of the tenurial structure in Bihar had not been affected in any great measure by zamindari abolition and other tenurial reforms implemented so far. Even now about one-third of the total number of farmers or more were either pure tenant-cultivators or owner-tenant-cultivators and they paid exorbitant rents. The security of tenure offered to tenants by law was "unreal, illusory and ineffective." "Even the senior officers in the administration do not care to raise this problem, and surely are not prepared ot meet it."

Ludhiana, too, had its tenants and tenancy problems. The Punjab Security of Land Tenure Act, 1953 visualised that all tenants cultivating lands within the permissible limit of owners would be ejected and settled on the surplus lands of those who cultivated lands in excess of the permissible area. The tenant settled in the surplus land would remain a tenant and the right to purchase ownership of the land would accrue to him after he had held the land for six years. But in Ludhiana district only 137 of the great majority of about 28,000 tenants had been settled so far.

According to the team, the failure of the land reform laws in Punjab was not due, as elsewhere, to the lack of tools of enforcement; the reason for the failure lay in bad conception of the Act. "A land reform programme which seeks the improvement of tenancy conditions by aiming to evict about 5,00,000 tenants and settling them on new holdings is highly illogical, to put it mildly."

The team's first recommendation envisaged the preparation of a basic record of tenancies as an aid to officials in the preparation of this record. A committee should be set up in each village or group of villages consisting of two tenant-farmers, one part-owner-part-tenant-farmer and one landlord. As soon as the basic record was prepared, each tenant farmer should be provided with a certificate showing the plots he cultivates. Without this, the provisions for security of tenure, which were "crucial" to the whole scheme of land legislation, could not be enforced.

The team felt that the right to resume land for self-cultivation by the landlord had tended to defeat the provisions for the security of tenure. Resumption was all the more damaging in the case of small landowners who had made up viable units of cultivation by leasing an additional acre or two of land. It would be in the best interest of agriculture, therefore, to restrict resumption severely: no resumption should be permitted to absentee owners and others whose principal occupation was not cultivation, and it should be so regulated that the holding of the tenant cultivator was not reduced below the size of, say, a family holding.

In view of the "proverbial weakness" of the tenant vis-a-vis the landlord, the team recommended that steps should be taken for the early transfer of ownership to all tenants in respect of their non-resumable lands. The procedures for the transfer of ownership and determination of compensation should be simple, easily enforceable and widely publicised. The team considered an amount equal to 15 to 20 times the net income of the owner with payments spread over a period of about 10 years as quite reasonable to both the tenant and the landlord.

Referring to the stand taken by the co-operatives in refusing credit to a large number of tenants, the team suggested that, if necessary, the Government should assist the tenants through taccavi loans, by-passing the co-operatives.

Planning Commission Rejects Report:

The Planning Commission has rejected the conclusions of the "one-man team" of Mr. Wolf Ladejinsky in regard to tenurial conditions in the intensive agricultural districts and their effects on agricultural production.

Disclosing this in a statement on August 24, Mr. Shriman Narayan, Member of the Planning Commission, said a few State Governments had ordered a detailed inquiry in the concerned districts in regard to the tenurial conditions obtaining there and found that the conclusions of Mr. Wolf Ladejinsky were "untenable and unfounded."

He said that several States had strongly contested the findings of the one-man team submitted to the Commission in June, 1963 and come to the conclusion that the facts mentioned in the report were exaggerated, partly because the coverage of the villages in one district were quite limited, at the rate of only about ten villages in a district.

He was commenting on a news agency report on the team's survey which, he said, was a "confidential document."

He "strongly deprecated" the tendency of "unauthorized publication" of confidential documents "only to create a wrong impression about Plan programmes."

He said in view of the rejection of the conclusions of the team as "unfounded," the Planning Commission did not think it worthwhile publishing the report and considered broadly some of the observations made in the report.

He said while it was true that the progress of land reforms in the country had not been as satisfactory as was desired, the fact remained that a good deal of work had already been accomplished in this sphere during the past decade. Intermediaries in all States, except in a few small pockets, had been abolished and legislation had been enacted in regard to tenancy reforms and ceiling on land holdings. Considering the democratic process and the social and economic conditions that obtained in the Indian countryside, much of this legislation had been fairly progressive and creditable.

He expressed the hope that agrarian reforms already introduced in various States would show better results in the near future. "I see no cause for undue pessimism or despair."

F. P-SP Members Join Congress: About 900 workers of the Asoka Mehta group of Praja-Socialists in Maharashtra joined the Congress Party at a special convention in Bombay on August 23.

The "family reunion," as it was called, was hailed by the Defence Minister, Mr. Y. B. Chavan as a historic event to strengthen the Congress and take the country forward towards democratic socialism.

If the socialists had not gone out of the Congress in 1948, he said, the course of history might have been different. With Mr. Nehru no more at the helm of the Congress, it was necessary for all socialist forces to unite under the banner of the Congress.

Mr. Asoka Mehta, Deputy Chairman of the Planning Commission, blessed the decision of his followers "to strengthen the forces of change" in the Congress and hoped their example would prove convincing and contagious.

The organizer of the convention, Mr. Rohit Dave, said though they were joining the Congress in a body, they had no desire to form any separate group. "We want to be one with them and to work shoulder to shoulder for a common goal."

The resolution welcoming the appeal of the Congress President, Mr. K. Kamaraj to all socialists to band together in the Congress for the establishment of a socialist order and to implement the Lucknow decision of socialists to join the Congress was moved by Mr. Shivaji Patil, former chairman of the Maharashtra unit of the P-SP and member of the Maharashtra Legislative Council.

G. HMT Report For 1963-64: A dividend of 10 per cent for the fourth consecutive year and a net profit of Rs. 3.01 crores were some of the outstanding features of the annual report of the State-owned Hindustan Machine Tools (HMT) for 1963-64.

The year's profit represented a return of 37.8 per cent on the share capital of Rs. 8 crores and compared with the previous year's 33 per cent when the net profit was Rs. 2.15 crores.

Releasing the report on August 22, Mr. S. M. Patil, Managing Director, said that HMT had been able to plough back into expansion Rs. 5.97 crores.

He said HMT had offered to meet approximately 50 per cent of the country's demand for Rs. 100 crores worth of machine tools during the Fourth Five-Year Plan. This was proposed to be achieved by establishing five additional factories. The capital of Rs. 20 crores required for this purpose would be met entirely from the internal resources of the company.

At the moment, besides the watch factory, three factories of Hindustan Machine Tools—two in Bangalore and one in Pinjore—are in production. The fourth unit of HMT is coming up in Kalamassery near Ernakulam in Kerala and this is expected to go into production by the end of this year. Construction work on the Hyderabad unit has started.

The total production of the Bangalore factories—HMT I and II—came to about 2,000 standard machines.

HMT received in 1963 orders for the supply of 2,270 machines and was able to despatch 1,982 of them. During the corresponding period in the previous year, HMT had orders for 2,137 machines against which it despatched 1,673.

In the last year ,the Hindustan Machine Tools watch factory turned out 1,21,600 watches compared to 51,562 in the previous year.

In addition to its original lines of production, two varieties of gents' and one variety of ladies', the HMT watch factory turned out watches with luminous dials specially meant for defence service personnel.

HMT, which has on its rolls over 9,000 workers, continued to pay enhanced dearness allowances to its employees in conformity with the scales applicable to Central Government employees, besides providing amenities like subsidised housing, subsidised transport and subsidized canteen services, education facilities and free medical aid.

Technical Collaboration With West German Firm—Agreement Signed:

An Agreement providing for seven-year technical collaboration in the manufacture of a range of heavy duty gear hobbing machines was signed in Bangalore on August 23 between HMT and Liebherr of Machinenfabrik of West Germany.

The Agreement will enable HMT to manufacture this type of machine for the first time in India.

According to the Agreement, HMT will have full rights to sell these machines in India and abroad including USA, UK and Western Europe.

According to HMT officials, India will need about 100 such machines annually by 1965-66. In keeping with its industrial development the country's requirement is expected to rise to 200 machines per year by the end of the Fourth Plan, i.e. 1970-71.

[Prev. ref. 5980:INI:H]

H. Pondicherry Election Results: The Congress Party came out triumphant in the Pondicherry State Assembly elections, winning 22 out of the 30 seats in the elections held on August 23.

The community-sponsored People's Front secured four seats and Independents four.

The final party position in the Assembly was: Congress 22, People's Front four, Independents four.

Mr. Edouard Goubert, Chief Minister of Pondicherry, Mr. A. S. Kankeyan, Speaker of the Pondicherry Legislative Assembly and also a sitting Congress MLA, and Mr. V. Venkatasubba Reddy, Planning Minister, were the three prominent Congress candidates among the declared candidates.

Mr. V. Subbiah, prominent People's Front leader, was declared elected from Modeliarpeth constituency, defeating his Congress rival, Mr. K. Srinivasan, by a small margin of 269 votes. Another People's Front candidate came out successful from Nellitope constituency, defeating his Congress rival by just 16 votes.

An Independent from Courvinatham succeeded against three other candidates, one Congress, one People's Front and one Independent. He polled 3,167 votes, as against the Congress candidate's 1,760.

I. State Loans: Thirteen State Governments announced on August 3 the issue of their 4¾ per cent 1976 loans for Rs. 100 crores.

All loans except that floated by the Kerala Government opened for subscription on August 24 and closed on August 28. The Kerala Government's loan opened on August 25 and closed on August 31.

Maharashtra topped the list with a loan of Rs. 15 crores at an issue price of Rs. 100. Madras came next with Rs. 14 crores at an issue price of Rs. 99.75.

The Gujerat State loan of Rs. 7 crores also had an issue price of Rs. 100.

The following are the State-wise details of the loans with the issue price in brackets:

Andhra Pradesh Rs. 11 crores (Rs. 99.50), Assam Rs. 3 crores (Rs. 99.50), Bihar Rs. 4 crores (Rs. 99.50), Kerala Gujerat Rs. 7 crores (Rs. 100), Madhya Pradesh Rs. 4 crores (Rs. 99.50), Madras Rs. 14 Rs. 5 crores (Rs. 99.50), Maharashtra Rs. 15 crores (Rs. 99.75), Mysore Rs. 7 crores (Rs. crores (Rs. 100), Orissa Rs. 8 crores (Rs. 99.50), Uttar 99.50), Rajasthan Rs. 5 crores (Rs. 99.75), and Pradesh Rs. 10 crores (Rs. 99.75), West Bengal Rs. 7 crores (Rs. 99.75).

The loans would be redeemable at par after 12 years. Interest would be paid half-yearly, on February 24 and August 25 in the case of all loans except the Kerala loan for which it would be paid on February 25 and August 25. Interest in respect of all loans would be liable to tax under the Income-Tax Act, 1961.

All the loans were fully subscribed.

J. National Income — "Quick" Estimates: The national income in real terms is estimated to have recorded a rise of 4.3 per cent in 1963-64 over 1962-63 as against 2.4 per cent and 2.6 per cent in 1962-63 and 1961-62 respectively over the preceding year.

This was revealed by the "quick" estimates prepared by the Central Statistical Organization on the basis of the trends disclosed by the current available data.

Of this overall rise, 0.5 per cent is from agriculture whereas the remaining sectors contributed the rest 3.8 per cent.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5716:INI:K]

K. Link Between Harappan Culture And Buddha Age—Archaeological Finds In Bihar: Recent archæological discoveries in Bihar supply what is believed by experts to be the "missing link" between the Harappan culture (1500 B.C.) and the age of the Buddha (600 B.C.).

Very little is known of the cultures which flourished between the decline of Harappa and the rise of the Buddha, and the period has been described as the "dark age" of Indian history. The discoveries now made are believed to belong to this "dark age".

The archæological finds which include a variety of rare terracotta, ivory antiquities, bone arrowheads, and polished stone-axes and chisels have been exhibited at the National Museum, Delhi.

The excavations began at Sonepur and Chirand in Bihar in 1957. While they have been practically completed in Sonepur, work is still in progress at Chirand.

Belonging to the chalcolithic culture, with undertones of Iranian influence, the discoveries show that there was much uniformity in the cultures of north-western, northern, eastern and central India.

The excavations at Sonepur have for the first time revealed the existence in Bihar of a chalcolithic culture using tools of copper and stone. The first settlers of this site did not know how to construct mud or brick houses. They lived in circular huts made of reed or leaves. In pottery they had acquired great perfection. Hunting was one of their main occupations but agriculture played an equally important part in their economic life. Charred remains of rice have been found at the site.

Excavations so far show that Rajasthan was the cradle of this culture. From there it seems to have spread to central and eastern India.

The culture died a natural death in the course of time and was followed by another culture around 600 BC. The people of this new culture knew how to manufacture iron and glass. Among the finds exhibited at the Museum is a rare crystal pendant with the face of a village belle drawn on it.

INDONESIA

A. Procedure For Take-over Of British Firms: In his Independence Day speech in Djakarta on August 17, President Sukarno said the procedure for take-over of British-financed enterprises in Indonesia would be nationalized with compensation. "The method to be followed will depend on British standpoint vis-a-vis the liquidation of Malaysia."

British observers interpreted this passage as meaning that Britain might have to lose her claims for compensation for property confiscated by the Government if the Malaysia issue was not settled.

Hi suggested that the British Government re-open talks with Mr. Azahari, leader of the "unitary state of North Kalimantan (Borneo)". Britain had said before that these matters concern the Government of Malaysia, and not the British Government.

Tens of thousands of Indonesians packed Merdeka (Freedom) Square and cheered as he urged them to keep "pounding away" in order to continue to "crush Malaysia."

Other points from his speech were:

President de Gaulle's Asian policy "shows a sense of reality"; Indonesia would be glad to offer her Capital as the site for talks between the three Laotian factions; he hoped the question of participants in the Second Afro-Asian Conference in 1965 would not cause a rift among progressive revolutionary forces (taken by observers to refer to the argument over whether the Soviet Union should attend).

Meanwhile, a despatch in **The Times**, London said on August 19 that the European managers had now been pushed out of all British companies in Indonesia except Shell, whose oil operations, in common with those of American companies, just remained viable after prolonged negotiations with the Indonesian Government before confrontation began. One of the last to be taken over was Nebritex, a joint British-Indonesian company. The Indonesian share of it was originally seized from the Dutch.

Including Shell, which is a British-Dutch undertaking, the total value of British enterprises in Indonesia is probably between £160 million and £180 million. Shell's own estimate of investment in Indonesia is some £35 million. The asset value of its property there is two or three times this amount. Originally the Shell interest in Indonesia was almost wholly Dutch, but after Independence the British element predominated. As the Dutch are now in favour and Britons not, the Dutch proportion has been judiciously increased again.

The oil companies are in a special position because their exports are the only part of Indonesia's foreign exchange earnings which have been increasing.

Shell expatriate staff in Indonesia three years ago numbered about 2,000, and other British expatriates probably about 1,000. Other enterprises varied greatly in size and success. There were estate management companies which made Indonesia the centre of their operations, undertakings by large companies with world-wide interests.

None of these enterprises has shown very prosperous in the books in recent years. Profits remittances, at a level of about 20 per cent, have been permitted so far for operations up to the third quarter of 1957. There has been no remittance of dividends for years. The only foreign firms which have made a significant amount out of Indonesian operations have been those which also controlled sales in the importing countries.

The pattern of take-over has been, first, the seizure of British installations by the Indonesian workers' unions; secondly, the installation of Government-appointed supervisory teams, originally to "protect" the properties; finally, the expulsion of expatriate staff.

According to the despatch, compensation for seized property, British, Dutch, or anything else, is unlikely for years and perhaps for ever. The Bank of Indonesia gave up assessing overseas debt three years ago. It is now estimated that the United States some $900 million, the Soviet Union $700 million and sizable sums to West Germany, Italy, France, and Yugoslavia. The servicing of this debt alone accounts for at least two-fifths of foreign exchange earnings, and possibly as much as half. The proportion has increased steadily for 10 years and sharply for three.

B. Missile Production Plan: *Antara* quoted on August 24 a senior Air Force Officer as saying that Indonesia would be able to produce missiles of various types for its armed forces by the end of 1966.

The news agency quoted the Deputy Air Force Commander, Commodore Budiardjo, as saying that Menang project, under way, will eventually produce "air-to-air, air-to-ground, air-to-surface and ground-to-air missiles."

Antara did not mention the site of the project, nor did it give other details.

Commodore Budiardjo, according to Antara, said the Menang project would also be in a position to produce about half of the country's present needs for explosives by October, 1964.

IRAQ

A. Soviet Offer Of Military Equipment: The Chief of Staff, General Abdel Rahman Aref, said in a newspaper interview published in Baghdad on August 18 that the Soviet Union had offered to supply Iraq with all modern armaments and military equipment that she needed.

He said the Iraqi Army would be equipped with the most recent types of armaments, and would become the most efficient army of the Middle East.

The General, whose statements were published by the **Baghdad News**, said the Iraqi Army was being trained in anti-guerrilla fighting.

He said the modernization of the army was being carried out for defensive purposes.

He said the new armaments included most recent and fastest types fo fighters unique in the Middle East, and long-range bombers.

Yugoslavia and some West European countries had recently offered to supply arms to Iraq.

ISRAEL

A. Transfer Of Area To Jordan: A Jerusalem report on August 14 said that an area of about 1,500 square metres in the Beit Safafa area near Jerusalem is to be transferred by Israel to Jordan.

This was being done after a survey, which was carried out by Israel with the co-operation of the UN authorities for the purpose of correcting a fence. The survey has established that the area really belongs to Jordan. There are five buildings in the area, inhabited by six Arab families.

Rectifications of the Armistice Lines have been carried on continuously since 1949.

Surveys for this purpose have been conducted by Israel alone, with the co-operation of the UN Observers, as Jordan apparently did not wish to be accused of recognizing the Armistice Lines. At the same time, she gave silent consent to these operations and kept a close watch on them.

A temporary fence was set up in Beit Safafa, where the border passes through an Arab village, in 1949, and it has now been decided to mark the Line more accurately, to prevent incidents and clarify the status of the Arabs concerned, who hold Israeli identity cards but have been paying rent and taxes to the Jordanian authorities for their houses.

They have now been given the opportunity to decide to which country they wish to belong. Four families have moved to other accommodation in Israel, while two have elected to remain in the area and give up their Israeli citizenship.

Negotiations on the necessary arrangements, through the Israel-Jordan Mixed Armistice Commission, have not yet been completed.

(*The Israeli Digest*, Jerusalem)

[Prev. ref. 5972:ISR:A]

B. Two Fiscal Bills Passed: The controversial Inheritance Tax Amendment Bill became law on July 30 by a vote of 43 to 29.

Mapam and the Communists joined the Coalition Parties in supporting the measure, while Herut, the Liberals and Agudat Yisrael voted against it.

Mr. Israel Guri, Chairman of the Finance Committee, said that the aim of the Amendment was to prevent concentrations of great wealth in the hands of the few. "This aspect seems to us to be most important, in view of the growth of a new class of millionaires in Israel, a class that already numbers several hundred persons."

He said that the amended inheritance tax would yield less than I£5 million a year, which was less than a quarter of one per cent of all tax revenue. He therefore felt that the protest had been unwarranted.

The following are the principled deductions authorized by the new law:

Standard deduction I£10,000; widow(er), I£25,000; children 22 and over I£10,000; children under 22 I£15,000; parents supported by the deceased I£5,000 each—but if no children, then I£10,000 even for an only parent; if the deceased died while on active service with the Forces, complete exemption.

If the estate includes a flat occupied by the deceased and his heir, and which the heir will continue to occupy, the flat will be exempt if the total estate comes to less than I£150,000 and the flat is worth not more than I£50,000 as an occupied flat. (This means that the value of the flat when vacant is three times as much, or I£150,000.)

Bequests to the State, local authorities, Jewish National Fund, Keren Hayesod, or a recognized institution of higher learning will not be regarded as part of the estate. Exemption is granted to the following objects, provided they are not sold within five years: manuscripts, objets d'art, religious articles, scientific collections. On pictures the maximum exemption is I£15,000.

Gifts made by the deceased within five years before his death will be considered part of the estate. An exception is made for wedding gifts to the deceased's child, provided the amount is "not exaggerated."

Tax On Large Flats:

A Bill to levy a tax on large flats —those with 125 square metres of floor space, including balconies and walls—passed its third reading in the Knesset on July 30. There were no opposing votes, but Herut abstained.

The tax—payable when the building licence is issued—will be I£100 for each square metre between 125 to 150 square metres; I£150 for each square metre between 150 to 250 square metres; and I£200 for each square metre over 200 square metres. (These rates are higher than those originally proposed by the Government.)

(*Jerusalem Post Weekly*)

[Prev. ref. 5888:ISR:B]

C. Dispute Between Benei Israel And Chief Rabbinate: At a meeting called by President Zalman Shazar on July 31, a formula was proposed to settle the dispute between the Benei Israel community of Indian Jews in Israel and the Chief Rabbinate.

The Benei Israel had complained that the marriage directives issued by the Chief Rabbinate two years ago discriminated against them and cast doubts on their Jewishness. In August, 1963 a group of Benei Israel families held a sit-down strike in Jerusalem, demanding the withdrawal of the directives, and a similar strike was started in July this year.

Chief Rabbi Yitzhak Nissim and Dr. Zerach Warhaftig, the Minister of Religious Affairs, who were present at the meeting endorsed the following proposal:

"The Chief Rabbinate re-iterates its announcement that the Benei Israel from India are Jews in every sense. The questions which are put at the time of marriage according to the Directives of 1962 apply to immigrants from every distant land, and do not in any way discriminate against the Benei Israel."

The proposal was not accepted, however, at a meeting of representatives of the community on August 2.

The Minister of Religious Affairs, Dr. Warhaftig, wrote to President Shazar clarifying the position of the religious authorities on the matter. "According to investigations and the halachic decision of the Chief Rabbinate of Israel, the Benei Israel are considered Jews in every respect," he stated in his letter. "I have announced on several occasions, both in the Government and the Knesset...., that the Benei Israel are Jews in every respect, both in principle and in practice.

"There is no difficulty and no discrimination in marriage arrangements between members of the community or between them and members of other Jewish communities. During the past two years not a single case has been brought to my attention in which the Benei Israel have encountered difficulties in marriage matters."

Chief Rabbi Nissim, who promulgated the controversial directives, had made similar statements concerning their practical implications, and had also declared that "the Benei Israel are considered Jews in every respect."

The Secretariat of Mapai, the Israel Labour Party, announced on August 7 that, while not approving of the methods used by the Benei Israel and their supporters, it intended to take the lead in the struggle for the annulment of the directives.

The Central Committee of the Histadrut, the General Federation of Labour, resolved to "put the full moral force of the labour movement behind the Benei Israel and their struggle for equal rights."

A special session of the Knesset to discuss the problem had been called in response to a requisition submitted by the opposition parties.

Rabbinate Asked To Revoke Directives Against Indian Jews:

A "State versus synagogue" crisis erupted in the Knesset on August 17 when the Prime Minister, Mr. Levi Eshkol, called on the Chief Rabbinate, the supreme Jewish religious body in the country, to revoke the special directives affecting the personal status of the Benei Israel.

The Knesset interrupted its Summer recess for the debate on this issue which had been agitating public opinion for some time.

Referring to the fact that under Israeli law matters of marriage and divorce are the exclusive jurisdiction of the Rabbinate, Mr. Eshkol warned that the Rabbinate's stand on the Benei Israel issue could undermine this situation.

He said that on its part the Rabbinate should act in accordance with the needs of this generation.

Most speakers in the debate—with the exception of members of religious parties —criticized the Rabbinate's directives on the ground that they were liable to be interpreted as discriminatory.

Mr. Eshkol himself said the directives, calling for a careful check on the "legality" of the marriage of the ancestors of a Benei Israel prospective bridegroom or bride, aroused the wrath of a community which saw in them an affront. He said the sensitivity of members of the community was understandable.

The issue had much wider applications since Israel hoped for large immigration from other countries where Jewish communities had been prevented from adhering strictly to Jewish religious rules.

Rabbi Isser Yehouda Unterman, one of the country's two chief Rabbis, had earlier rejected any attempts by the secular authority to impose its will in matters of religious law.

At the end of the six-hour debate the Knesset adopted a resolution endorsing the Government's statement re-affirming the "full equality of the Benei Israel community".

The resolution said the Knesset regarded members of the Benei Israel community as Jews in every sense, equal to all other Jews in all matters.

On August 18, leaders of Benei Israel called on the Prime Minister, Mr. Levi Eshkol, to thank him for the Government's support in their fight against discrimination by Israeli religious leaders.

Earlier, they ended their 18-day sit-down strike during which the Indian Jews, with their women and children had remained near the Chief Rabbinate, sleeping in tents.

JAPAN

A. Loan To South Korea: The Government decided on August 18 to give South Korea a $20-million loan as "interim aid" pending the establishment of diplomatic relations between the two countries after which Tokyo proposes to extend long-term assistance amounting to $600 million to Seoul.

The terms of the current aid provide for exports of industrial materials to be paid for by South Korea in two years after a waiting period of one year. The annual interest rate would be 5.75 per cent.

South Korea was not expected to agree to the Japanese terms unconditionally. It had earlier requested a $50-million commodity aid as a relief measure against its steadily deteriorating economic situation.

Informed sources said the Japanese aid proposal was bound to create political disputes both in Japan and in South Korea. It was pointed out that the national turmoil in South Korea which led to the imposition of Martial Law in June had been partly due to student demonstrations against the "humiliating attitude" of the Park Government in negotiations for the establishment of diplomatic relations with her former colonial master.

B. Trade Protocol With West Germany: Trade talks between West Germany and Japan initiated in Bonn in September, 1963 were concluded, and the relevant Protocol was signed, between delegates from the two countries in April.

The negotiations were held to discuss matters in relation to import restrictions imposed by West Germany on Japanese goods.

In the trade negotiations, according to the announcement, it was recognized by Japan that West Germany promised to liberalize its import restrictions on or before January 1, 1965 for eight items, in terms of the Brussels Tariff Nomenclature, on Japanese goods including metallic toys, lighters, household sewing machines, and other goods, and as a result, the number of import goods restricted by West Germany on Japanese goods would be reduced to 20 items.

It was also reported that West Germany promised to increase its import quota during 1964 for goods now restricted to DM15,080,000 or 28 per cent more than that of the preceding year and, besides, would continue to discuss further liberalization with Japan as soon as possible regarding its unfreed 20 items, among them textile goods, ceramics and products, and others, the times of liberalization of which had not yet been decided, and to make efforts to gradually increase their import probability at the same time.

Meanwhile, Japan promised to take similar steps and would confer with West Germany with a view to promoting import liberalizations and to increase its import quota.

LAOS

A. Pathet Lao Leader Commends French Attitude: In an interview given to the French Communist newspaper, *L'Humanite*, the Pathet Lao leader, Prince Souphanouvong, said in the last week of August that France should go all out for reconvocation of the international conference on Laos.

He said: "I consider that France as a signatory of the 1962 Geneva Agreements on Laos has the obligation to respect them and apply them correctly. Also France must help in having them respected. This is the only approach in conformity with the interests and honour of France.

"It was a wise decision on her part to refuse to participate in the consultations of the six countries at Vientiane organized by Britain according to the American plan and to back the international conference of the 14 countries."

Talks With Chinese Leaders:

During the same week, Prince Souphanouvong visited Peking where he held talks with Chinese leaders.

At a Peking banquet on August 23, the Foreign Minister, Marshal Chen Yi, hoped that the forthcoming Paris conference between the leaders of the three Laotian political groups would result in bringing about "the stabilization of the situation in Laos, peace and neutrality for Laos, and the early meeting of the Geneva Conference."

In reply, Prince Souphanouvong recalled that his party had always insisted on a solution based on the Geneva Agreements.

US Pledge:

Meanwhile, on August 17 in Washington the US State Department expressed its willingness to take whatever action necessary, including the use of armed force if requested, to support the neutralist Government of Laos.

The Press Officer, Mr. Robert J. McCloskey, said that this was a "statement of position and not an indication the United States is seriously considering further action."

Reports said USA would intervene forcefully if the Pathet Lao made a major move to take over the Mekong River valley bordering on Thailand.

[Prev. ref. 5998:LAO:A]

LEBANON

A. Plotters Sentenced: A military court in Beirut on August 11 passed sentences ranging from 10 years' hard labour to one year's imprisonment on five men accused of trying to carry out terrorist acts, carrying explosives and weapons and attempted kidnapping.

The convicted men included Lieutenant Jalal Mirhej, a Syrian, who was sentenced to ten years' hard labour. Another Syrian, a civilian, was sentenced to seven years' hard labour.

A Lebanese civilian was sentenced to three years' hard labour and two other Lebanese, including former deputy Kahtan Hamadeh, to one year's imprisonment.

The court acquitted Dr. Aly Jaber, described as a leading member of the Baath Party, which is unlicensed in Lebanon, and two Syrians. Dr. Jaber told the court he had resigned from the Party some time ago.

The Syrian Lieutenant was convicted of conspiring to carry out acts of terrorism, carrying unlicensed weapons and drugs, instigating kidnapping and forging the seal of the Lebanese State.

Hamadeh was convicted of complicity in instigating the kidnapping.

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5612:LEB:A]

MALAYSIA

A. Reported Landing By Indonesian Troops: Kuala Lumpur reports said on August 17 that Indonesian forces had landed on the west coast of Johore.

A Royal proclamation issued the same day (August 17) declared Johore, Malacca and Negri Sembilan as security areas.

A Government statement placed the number of Indonesians who had landed at between 30 and 40. Among them were members of the regular Indonesian Navy and some Malaysians, Malays and Chinese.

The statement said that the remainder had attacked security forces in the Pontian Besar district with mortar fire and hand grenades, but there were no casualties. Arms and ammunition had been seized and mopping-up operations were in progress.

Tun Abdul Razak, the Deputy Prime Minister of Malaysia, at a conference in the national operations room in Kuala Lumpur, said that two boats had been found on the east coast of Johore, but it was not certain whether a landing had been made there. The situation was serious. Indonesia had committed an act of aggression and the world should know; the President of the United Nations Security Council would be informed.

The Territorial Army had been mobilized throughout the country to guard strategic points and members of the vigilante corps now being formed were asked to help trace the infiltrators. All people over the age of 12 must carry identity cards at all times. People found with arms without lawful authority would be liable to the death penalty.

The Defence Ministry said on August 18 that security forces had killed two heavily armed raiders on the west coast of Johore. Several others were captured. The number of those caught was not specified. There were no more landings.

The Prime Minister, Tengku Abdul Rehman, warned the people against agents provocateurs. He called the landings "a brazen act of aggression."

The following day (August 20), he charged that one of the principal objectives of the guerrillas who landed on the west coast of Johore was to assassinate political leaders in Malaysia and to stir up trouble generally.

He said that the time was not ripe now to take up in the UN Security Council the landing of Indonesians on the Malayan coast. All the members of the Security Council had been informed of aggression.

He said: "We know there are countries which are pals of Indonesia who might veto any move. We must wait and secure sufficient evidence to convince the Council members that Malaysia is a victim of unjustified aggression."

He was referring to Russia which had been supporting Indonesia against Malaysia.

He told newsmen in Kuala Lumpur on August 22 that the landings on Malaya's east coast might be followed by large-scale infiltration along the coastal region of the heavily jungled Thai-Malaysian border.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

He disclosed that the Deputy Premier and Defence Minister, Tun Abdul Razak, had left for Bangkok to discuss "measures to counter any such move by the Indonesians." He was to meet the Thai Premier, Mr. Thanom Kittikachorn, and other Ministers.

Thai Support For Malaysia:

In Bangkok on August 24, the Thai Foreign Minister, Mr. Thanat Khoman, said that co-operation between Malaysian and Thai security forces in policing their jungle frontier had been useful in the past "and we will continue such co-operation."

He told newsmen that he had conferred with Tun Abdul Razak in Hua Hin, south Thailand. They discussed the situation that had arisen in Malaysia.

Mr. Thanat did not specifically mention the Indonesian guerrilla landings in south Malaysia, but said that Malaysia feared an "enlargement in the situation."

Indonesian Denial Of Landings:

Mr. Ganis Harso, a spokesman of the Indonesian Foreign Office, said in Djakarta on August 18 that the report of landings by Indonesian guerrillas was a "made-up piece."

He said the Indonesian Government was not so foolish as to send "chaps like that" and have them caught.

(*The Times*, London, *The Malayan Times*, Kuala Lumpur and *The Statesman*, Calcutta)

[Prev. ref. 6000:MAL:A]

NEPAL

A. Sardar Swaran Singh's Visit: The Indian Minister for External Affairs, Sardar Swaran Singh arrived in Khatmandu on August 23 on a three-day visit.

On his arrival, he was given a warm welcome. Among those who received him at the airport were the Nepalese Foreign Minister, Mr. Kirtinidhi Bisht, the Nepalese Ambassador in India, Mr. Yadunath Khanal, the Indian Charge d'Affaires, Mr. K. Dalal, and members of the diplomatic corps.

King Mahendra was represented by his Principal Secretary, Mr. Hans Man Singh.

Sardar Swaran Singh was accompanied by Mr. Y. D. Gundevia, Foreign Secretary, Mr. D. K. Srinivasachar, Joint Secretary, Commerce Ministry, and Mr. M. R. Rasgotra, Deputy Secretary, External Affairs Ministry.

In a statement to the Press, Sardar Swaran Singh said he was happy to visit Nepal first as Indian Foreign Minister, bringing with him the greetings and good wishes of the President, the Prime Minister and the people of India to the Government and people of Nepal.

He said it was a matter of personal happiness that Nepal was the first country he was visiting on his tour of neighbouring countries. This was no accident but was the result of the very close and friendly relations existing between the two neighbours which was "a shining example of friendship, understanding and mutual co-operation in more spheres than one". He said Indo-Nepalese relations were always close and that he had come to this country as a friend and brother, sharing the common heritage and ideals of the people of Nepal.

The warm welcome he received reflected the close relations between the two countries. He felt that he was not visiting a foreign country. Relations between India and Nepal had been very good in the past and he hoped that they would grow from strength to strength to the benefit of both. It would be his endeavour to strengthen these relations further.

Talks:

On August 23, Sardar Swaran Singh had general exploratory talks during his audience with King Mahendra and meeting with the Foreign Minister, Mr. Kirtinidhi Bisht.

Sardar Swaran Singh discussed "matters of mutual interest" with the King for an hour and later told correspondents that he was "glad to see such complete identity of views between the two Governments".

Replying to a question, he said that according to present plans King Mahendra was likely to attend the second non-aligned nations' Conference in Cairo in October.

His first round of talks with Mr. Bisht began at the Secretariat. He told newsmen that they had exchanged views on a number of international matters in a general way. He had invited Mr. Bisht to visit India. Mr. Bisht announced that he had accepted the invitation.

Asked whether any particular matter between India and Nepal figured in his talks, he said there was no complicated or difficult matter between Nepal and India.

Road Agreement:

On August 25, Sardar Swaran Singh and Mr. Surya Bahadur Thapa, Vice-Chairman of the Nepal Council of Ministers, signed an Agreement committing India to build a 128-mile highway between Sunauli, a border town in the plains, and Pokhra Valley in mid-western Nepal at a cost of over Rs. 9 crores.

The Agreement was signed at the conclusion of Sardar Swaran Singh's three-day official visit.

Survey for the road has already been completed and construction will begin in October.

The road is expected to be completed in December, 1968. It will benefit a population of 15,00,000 in the immediate neighbourhood. The road will facilitate quick movement of surplus produce and will increase manyfold Nepal's customs and excise revenue.

The highway, the second major road project to be undertaken by India in Nepal, was promised by the late Mr. Nehru when King Mahendra visited India in 1963.

News Conference:

Sardar Swaran Singh told a news conference on August 25 that India hoped that the forthcoming meeting between India's Prime Minister, Mr. Lal Bahadur Shastri and President Ayub Khan of Pakistan would yield good results and create a proper atmosphere for a solution of outstanding disputes between the two countries.

He also hoped that after the meeting, a great deal of controversy now surrounding the Kashmir question "will subside when the atmosphere improves."

He said India had always expressed her readiness to settle all outstanding differences with Pakistan and had always been ready to find solutions which might remove whatever irritants existed between the two countries. "We have also offered to enter into a no-war pact with Pakistan."

A correspondent asked why, despite India's policy of non-alignment, she was becoming virtually aligned while on the contrary, Pakistan, despite her alliances, was virtually non-aligned.

Sardar Swaran Singh replied: "If India's non-alignment has attracted a number of like-minded countries to her side, it means she has a large number of friends. That is not alignment. If Pakistan's alignment has created a situation where they feel somewhat isolated in both camps, it is not the fault of India."

He said that the Government of India had not been approached by the Nepal Government for undertaking construction of any part of the east-west highway.

He assured Nepali correspondents that within the permissible limits of Indian laws and the Constitution, the Indian Government would discourage hostile activities by Nepali residents in India against the set-up in the Kingdom. He was not aware of any such activity and at no time did India encourage or would ever encourage it. It had, however, to be appreciated that in India people had certain freedom of expression and action.

"We are of the view the system of government is essentially the concern and responsibility of the country concerned and we as a Government have always looked with sympathy and understanding at the system of government that prevails here.

"Our friendship with Nepal is so close that the form of government that is here is not a matter about which we offer any criticism. In fact, as to what form of government suits what country according to its requirements or interests is a matter primarily for the country concerned to consider and adopt. We have nothing but a feeling of goodwill for the Government of Nepal."

A correspondent asked whether in view of the Chinese claim that Tibetan refugees were returning home the Governments of India and China would negotiate an agreement for the return of Tibetan refugees in India.

Sardar Swaran Singh said: "I am not aware that any Tibetan in India has expressed a desire to go back to China. If any one wants to go to China we do not want to come in his way. We ourselves do not encourage or discourage people from following the course of action which their conscience dictates. They would be left to decide for themselves."

Joint Communique:

The Indo-Nepalese joint *communique* issued on August 25 at the conclusion of Sardar Swaran Singh's visit underlined the vital interest of the two countries in each other's welfare, prosperity and strength.

The **communique**, released simultaneously in New Delhi and Khatmandu, also took note of their "basic unity and identity of approach to international issues."

Sardar Swaran Singh's talks with King Mahendra, the Chairman of the Council of Ministers, Dr. Tulsi Giri, the Foreign Minister, Mr. Kirtinidhi Bisht and other Nepal Ministers, the communique said, were marked by great cordiality, understanding and friendship. Such high-level talks would be held periodically.

The **communique** said Dr. Giri had accepted an invitation by the Prime Minister, Mr. Lal Bahadur Shastri to visit India. The date would be fixed later. Mr. Sardar Swaran Singh's invitation to Mr. Bisht would also visit India in the near future.

Sardar Swaran Singh described Nepal as "India's closest and most friendly neighbour." He also assured Nepal of India's continuing interest in its economic development and of further economic aid

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

after 1966 when India's current aid programme would come to an end.

The communique announced that it had been decided to make periodic reviews of Indo-Nepalese development projects to ensure their expeditious implementation. The first review would be held in October this year when an Indian official delegation would visit Khatmandu.

It further said that the details of an Agreement concerning the execution of the Sunauli-Pokhra road had been negotiated and the Agreement signed on August 25. The work on the project, to be constructed by an agency of the Government of India at a cost of Rs. 9.11 crores (Indian currency) would commence in October this year and might be completed by December, 1968.

Among other things, the communique said, "the Minister of External Affairs and the Nepalese Ministers discussed questions relating to supplies of essential materials such as iron and steel to Nepal from India. The Minister of External Affairs assured His Majesty's Government of India's anxiety to meet Nepal's needs to the greatest extent possible. As a result of these discussions, the supplies of iron and steel and transport vehicles, which are needed in Nepal, will be very considerably augmented and the speed of supplies accelerated.

"The Minister of External Affairs assured His Majesty's Government of India's continuing interest in Nepal's rapid advancement and that such further assistance and co-operation as was in India's power to give would be made available to Nepal after 1966 when India's present programme of assistance comes to an end.

"The development projects to be undertaken with India's co-operation and assistance during the five-year period 1966-71 will be determined in consultation between the two Governments.

"The position concerning matters relating to facilities for transit across India for Nepal's trade with third countries was also reviewed. The Minister of External Affairs conveyed to His Majesty's Government the desire of the Government of India to help Nepal in every possible way.

"The Government of India would sympathetically consider the suggestions made by His Majesty's Government in this matter in the course of the talks. These matters will be further considered at the talks, scheduled to take place in Khatmandu in October, 1964, between the delegations of the two countries."

PAKISTAN

A. Independence Day Celebrations: Independence Day was celebrated all over Pakistan on August 14.

Elaborate programmes were made by political parties and social organizations to observe the 18h anniversary of independence.

In Rawalpindi a 31-gun salute heralded the day. Simultaneously 21-gun salutes boomed in Lahore and Dacca. This was followed by thanksgiving prayers in the principal mosques.

The highlight of the celebrations in Rawalpindi was a public meeting addressed by President Ayub Khan. The meeting was organized by the Pakistan Muslim League.

Rallies of boy scouts, girl guides and school children were the other items included in the celebrations.

At several functions tributes were paid to the founder of Pakistan, Mr. Mohammed Ali Jinnah.

President Ayub Khan's Broadcast:

In a broadcast to the nation on the eve of Independence Day on August 13, President Ayub Khan said:

"We celebrate today the beginning of yet another year of our independence; and on this happy occasion I extend to you all my very warm felicitations.

"An occasion like this evokes memories of the past, of the struggle to achieve Pakistan—led so valiantly and determinedly by the Quaid-e-Azam (may his soul rest in eternal peace), and of the sacrifices rendered by so many others in the cause.

"The high hopes with which Pakistan came into being were soon belied by the political weaknesses that began to appear in the early fifties. Each year that passed brought more and more dismay and despair to those who wished to see Pakistan strong and prosperous. We were on the brink of disaster when the Revolution came.

"By the grace of Allah, the years of political and economic stability which have followed since, have made our independence meaningful and our goal as a free nation possible of achievement. In fact, as we celebrate the anniversary of our Independence today, we can derive some satisfaction from the thought that Pakistan is well set on her course of progress and prosperity.

"Satisfaction, however, is dangerously close to complacency; and I would urge upon everyone a personal rededication to the tasks ahead of us. Indifference towards our duties to the country at this stage of our development would be fatal. We must, one and all, resolve once again to place the interests of our country above our own.

"International events, particularly during the last few years, have brought us a graver realization of the difficult role our nation has to play. We seek the guidance and protection of Almighty God, who gave us the precious gift of Pakistan, in our efforts to live a life of self-respect, independence and security, Ameen.

"A wind of change has happily set in with the recent understanding reached with our brave and open-hearted friends in Iran and Turkey. They will collaborate with us in many fields of development. Given the will and determination to make good there is no reason why this collaboration should not lead to permanently beneficial results.

"We are also happy at the goodneighbourly relations that are beginning to grow with other countries around us. We very much hope that India will also realize the advantages of living with us as a good neighbour. Our common enemies are poverty, malnutrition and backwardness. We cannot afford the luxury of working against each other's interests at very heavy cost to both of us.

"It is a pity that prejudices and passions should prevent such clear facts from being seen and should drive us to quite unnecessary suffering and loss. What is required is a change of heart.

"Progress and peace: towards these we shall continue to strive. You would like to join me, I am sure, in my fervent prayer that in the days to come this region, of which we are a part, will see peace and goodwill prevail so that our people begin to share in the world's prosperity so long denied them."

Relations With India—Official Document:

India has been painted as a villain among Pakistan's neighbours in an official release entitled "Pakistan's Good-neighbourly Policy".

The release, one of a series issued on the occasion of Pakistan's Independence Day (August 14), invariably projects India as intransigent and unreasonable in her dealings with all her neighbours, notably Pakistan.

It said: "The country with which Pakistan has not so far been able to iron out its differences is India. But in this case Pakistan is not to blame because it is not the only country with which India has had continued differences.

"India is embroiled in differences and disputes with almost all her neighbours, not to speak of distant countries. This position of Pakistan having no disputes with any of her neighbours excepting India and India having no smooth relations with her neighbours will show that the blame does not lie on Pakistan."

Detailing the growing ties between Pakistan and Nepal, the release had a fling at India again by saying: "It is, however, unfortunate that India has not found it possible to facilitate Nepal-Pakistan trade and Nepal's in-transit traffic via Pakistan."

A similar fling was obvious in a review of Pakistan's relations with Burma and Ceylon. "The attitude which Pakistan adopted in respect of Pakistani citizens affected by the Burmese nationalization laws was one of immense patience and understanding and stands out in sharp contrast to the attitude adopted elsewhere (an obvious reference to India) in respect of the same nationalization policy in Burma.

"Pakistan has agreed to discuss the question of the people of Pakistani origin in Ceylon in an attempt to resolve the matter to the satisfaction of both countries. The attitude of Pakistan in this case is visibly more conciliatory and accommodating than the attitude elsewhere in respect of the same problem."

The release devoted considerable space to the growing Sino-Pakistani ties and listed the following in support of a "rapid widening of the field of co-operation" between the two countries:

(1) The so-called Boundary Agreement of 1963 between Pakistan-held Kashmir and Chinese Sinkiang.

(2) The Trade Agreement in 1963 under which China has become the main importer of Pakistan's raw cotton.

(3) The cement-jute Barter Agreement of September, 1963.

(4) The Air Agreement which led to the inauguration of air services between the two countries in April, 1963.

(5) The Sino-Pakistani Agreement, as envisaged in the joint communique issued at the end of the Chinese Prime Minister's visit to Pakistan in February, embracing such issues as Kashmir, colonialism and disarmament.

(6) Exchange of several delegations comprising businessmen, technicians, physicians, engineers, scientists and writers.

In the end the release hoped that "India will realise the importance of a friendly Pakistan."

[Prev. ref. 5428:PAK:A]

B. Presidential Election Bill Passed: The National Assembly passed on August 18 the Bill for conducting election to the office of the President.

Winding up the discussion the Law Minister, Mr. Khursheed Ahmad, said an efficacious machinery was being provided for holding a free and fair election. The passage of the Bill completed the legislation on holding of various elections. He said the election would in no case be impeded now.

He regretted that extraneous issues had been dragged in for criticism. Once a

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

decision was taken by the majority in the Assembly it should be accepted. Those who were critical could go to the people, carry their support and make amendments to the Constitution. This alone would serve the cause of democracy.

About the allegation of defective electoral rolls he said there were remedies for getting this grievance redressed. He said on all legislations on elections the views of the Election Commission were invited.

Earlier, the Parliamentary Secretary for Defence, Mr. Mohammad Qasim Malik, defended various provisions of the Bill. He said the provision of Rs. 1,00,000 to selected candidates was in accordance with the suggestion of the Opposition to enable the poorest man to seek election to the highest office. He said the provision for screening was to avoid too many candidates.

According to him the Government Party would put up only one candidate and as such there would be hardly any need of screening if the Opposition also set up one candidate.

He defended the system of indirect election and maintained that in the previous elections to Provincial Assemblies which were held on direct basis, only 16 per cent of votes were cast.

(*Dawn*, Karachi)

[Prev. ref. 5817:PAK:A]

C. F-M Ayub Khan Nominated For President: The Working Committee of the Pakistan Muslim League meeting in Rawalpindi on August 19 adopted F-M Ayub Khan as party candidate for the next Presidential election to be held in February, 1965.

President Ayub Khan accepted the nomination. Besides the members of the Working Committee, the Governors of East and West Pakistan attended the meeting by invitation.

The Working Committee unanimously passed a resolution which said: "In the interests of Pakistan's political, economic and social stability and solidarity, the country needs continuity of its present inspiring leadership under President Ayub Khan. The Working Committee, therefore, unanimously, and with acclamation, adopts President Ayub as the Muslim League candidate for the forthcoming election."

This was the first time that a political party had nominated a candidate for the office of the Head of State since the creation of Pakistan. Mr. Mohammed Ali Jinnah, the first Head of State, had assumed that office at the request of the All-India Muslim League. None of his successors was appointed to that office through the elective process.

VIET-NAM (DR)

A. Relations With Indonesia: It was officially announced in Djakarta that beginning August 17 the Embassy of the Republic of Indonesia had started functioning in Hanoi.

Mr. Mohammed Ali Moersid was appointed **Charge d'Affaires ad interim** at the Embassy.

South Viet-Nam has severed diplomatic ties with Indonesia.

(*The Statesman*, Calcutta)

[Prev. ref. 2825:VND:B]

VIET-NAM (RVN)

A. US Diplomat's Mission To Europe: President L. B. Johnson of USA sent the former American Ambassador to South Viet-Nam, Mr. Henry Cabot Lodge, to Europe in the third week of August to explain the American stand on Viet-Nam to West European leaders.

On August 18, he expounded Washington's views to the Atlantic Council in Paris and said later he felt confident that five or six NATO countries—perhaps more—would individually agree to help USA "carry the load in South Viet-Nam."

He emphasized at a news conference that he had not asked the Council for aid; the subject had arisen from the many questions put to him during its two-hour meeting. Such aid, he said, would be distinctly welcome.

He indicated also that this was not a question of military aid, but of medicine, food, doctors and experts of all kinds provided by a consortium of countries, as he put it, concerned with Viet-Nam.

He said he had not come to Europe to give assurances that there would be no extension of the Viet-Nam conflict. This was fairly well understood. His purpose was to acquaint European Governments with Washington's estimate of the situation and with its intentions and policies.

Americans he said, believed this was a world issue on a par with Berlin and Germany.

The fall of South Viet-Nam to communism would, in the American view, not only be disastrous to surrounding countries, but would have dramatic consequences for Australia and New Zealand.

What would be the effect in Europe if the United States was shown to be unwilling or unable to protect a small country in South-East Asia? What would be the effect in the United States, and on the still powerful urges towards "Fortress America"?

Korea had been seen to have great immediacy for Europe. So had Viet-Nam. He could not understand why people did not look at it in the same way. It had been shown that the United States was not a "paper tiger", and there was no question of Americans' determination "to see this thing through to the end", for which they had as much time as any one else.

He insisted, however, that the United States sought a political rather than a military solution—to create a political atmosphere in which the Viet-Cong terrorists could no longer operate. It would be hard and difficult, but not impossible; the situation was evolving and, in some respects, was better than it was in October, 1963.

He did not imply that his mission had made much impression on the French position, though he said there was agreement on both sides that South-East Asia should not fall under communist domination. The disagreement was about methods; but his talks in Paris had helped to bring the two positions into sharper focus.

He said USA was not opposed in the abstract and for all eternity to the idea of a conference, but the conditions had to be right. One would be that the Viet-Cong had ceased its "murderous incursions" into the South. Of this there was no sign, and a reconvened Geneva Conference would be a scene of bitter disagreement which would make the situation more dangerous.

(*The Times*, London and *The New York Times*)

[Prev. ref. 5833:RVN:A]

YEMEN

A Budget For 1964-65: At the end of July, the Finance Minister announced the first annual Budget in Yemen's history, totalling 32,32,889,000 rials (about £11,000,000), excluding 15,000,000 rials granted to the Government in the form of loans for develpoment projects.

In July, 1963 a Budget of 7,000,000 rials was approved covering the three months July-September, and this had been renewed in quarterly periods ever since; 2,800,000 rials is allocated to education and, in addition, Kuwait, UAR and Iraq are to provide schools and colleges at their own expense in Yemen.

(*Middle East Economic Digest*, London)

[Prev. ref. 5671:YEM:A]

ASIA OUTSIDE ASIA

SUMMARY: Soviet Stand On Second Afro-Asian Conference; Anniversary Of Moscow Test Ban Treaty; USSR Launches "Cosmos" Satellites; Commonwealth Prizes Institute.

A. Second Afro-Asian Conference —Soviet Government's Statement: On August 14, the Soviet Government stated its position on the forthcoming Second Afro-Asian Conference. It forwarded to the Governments of the countries of Asia and Africa the following statement:

"The question of inviting the Soviet Union to the Second Conference of Afro-Asian countries has been discussed in recent months in many States that are preparing for participation in this Conference. It has been learned that certain quarters in some countries seek to convert the normal exchange of opinion on this question into a groundless unsound discussion. In doing so they are not stopping at the use of the most unscrupulous means, including speculations on racial motives, gross distortions of the position of the Soviet Union and all kinds of insinuations against it. These quarters even go to the length of trying to compel Afro-Asian countries in examining the composition of the Conference participants to have the same approach to the Soviet Union as to the colonial Powers with possessions in Asia and Africa.

"In the obtaining situation, in face of the rude attempts by certain quarters to split the ranks of the States parties to the planned Second Conference of Afro-Asian countries, the necessity arises of explaining in greater detail the Soviet Union's view-point with regard to its participation in the Conference.

"In the well-known Soviet statement, published early in May this year, it was pointed out that the Soviet Union would support the convocation of the Second Conference of Afro-Asian countries if the purpose of this Conference was to unite all forces that are fighting against imperialism and colonial slavery, and, being one of the big States of Asia, was ready to do everything in its power for the success of such a conference. Nor could we take another stand since it flows from the very existence of the Soviet State whose birth heralded the beginning of the liberation of the oppressed peoples of the East.

"Since then the peoples of USSR and the peoples of Asia and Africa are ad-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

vancing in one serried rank in the struggle against imperialism and colonialism. The Soviet people are in full support of the goals of the proposed conference. They have shown not by words, but by many deeds their genuinely fraternal attitude to the peoples of Asia and Africa, their deep understanding of their needs and interests, their steadfast abidance by the idea of Afro-Asian solidarity. Throughout its almost half-a-century-long history, the Soviet Union has come out as an active and consistent fighter against imperialism and all forms of colonialism and racialism. It contributes to the full political and economic liberation of all the oppressed and exploited peoples and is their reliable friend and defender from the aggressive designs of the colonialists. This is well known in all parts of both the continents.

"Friendship and alliance with the peoples that have thrown off the colonial and semi-colonial yoke are among the most important principles of Soviet foreign policy, behested by the great Lenin. And, of course, the Soviet people will not make this principle, so sacred for them, dependent on participation or non-participation in these or other conferences. It is generally known that the Soviet Union did not attend or raise the question of its participation in the first Afro-Asian Conference at Bandung. There were due reasons for this. It suffices to stay that at that time, when many peoples still awaited the hour of their liberation, there was a spirit of solidarity and mutual understanding among the Conference participants. The initiators and sponsors of the Conference, including the PRC, came out jointly from positions of peace, the relaxation of international tension, the unity of all fighters for national freedom and progress.

"And, in effect, there were no forces at the Conference which could divert it from these aims. At that time there were no foundations for alarm over the future of the unity that was taking shape and the community of actions of the world liberation forces, which has been caused by some recent events, beginning with the tragic conflict on the frontier between the People's Republic of China and India and the open manifestation of the narrow nationalistic, hegemonistic tendencies of the Chinese leaders.

"Now, when the situation has been changed in many ways, one can fully understand those States which would like to see the Soviet Union at the Second Conference of Afro-Asian countries, thus attaching greater weight to the contribution of the Conference to the cause of the consolidation of peace, relaxation of international tension and national liberation of the peoples.

"These States, evidently, also took into consideration the benefit which could be yielded by direct co-operation with the Soviet Union in the solution by the Conference of Afro-Asian countries of problems connected with world trade and economic intercourse, with the liquidation of existing inequality and discrimination in this sphere. The United Nations Conference on Trade and Development, which has just been concluded in Geneva, has shown that such co-operation produces good results.

"The Conference which is being referred to is a conference of Afro-Asian countries. It is, therefore, but natural that there arose the question of the participation of the Soviet Union as one of the biggest countries whose territory belongs to the Asian continent, stretching over almost two-fifths of its expanses. And no subterfuges and exaggerations in politics and geography will be able to move the Urals Range which divides Europe from Asia to the shores of the Pacific.

"The attitude of the Soviet Union to the questions which are recommended for inclusion in the agenda of the Afro-Asian Conference is well known. It fully meets the interests of all countries which fight for the consolidation of their independence, for the independent development of their economy; the interests of all the peoples which are still striving for their right to free and independent existence.

"All this shows that objections against the Soviet Union's participation in the Second Afro-Asian Conference contradict the principles, aims and the very foundations on which this Conference is being called. It is obvious that if some forces, proceeding from their factional goals, do not wish the Soviet Union to attend the Conference, this line harms the national liberation movement, undermines the cause of rallying the peoples together. The representatives of these forces have declared that if the Soviet Union is invited they will not attend the Conference. This statement proves precisely that these forces put above all else their factional goals, for the sake of which they are ready to ignore the vital interests of the peoples.

"It is common knowledge that the Soviet Union has not itself raised the question of participation in the new Afro-Asian Conference. This question was raised by other States, to which the Soviet Government has expressed and expresses its gratitude. Proceeding from the interests of the common cause, the Soviet Government did not object to the consideration of this question at the preliminary meeting in Djakarta.

"But even when the friendly States explored the possibility of the Soviet Union's agreement to take part in the Conference, the Soviet Government did not deem such participation obligatory. It is becoming even more convinced of this now. The Soviet Union cannot allow the question of its invitation to be embarrassing for these or other Afro-Asian countries, the more so its use by anybody for sowing discord among them and diverting their attention from the big tasks put before the Conference by life itself.

"The Soviet Union took no initiative in raising the question of its participation in the Second Conference of Afro-Asian countries. It does not do so now and does not bind either itself or others by any decisions on this score. But the non-participation of the Soviet Union in this Conference is one thing, and it is quite another thing if all kinds of artificial objections to its participation are advanced and a dishonest game is played around this. That is why the Soviet Government deemed it necessary to return to the question of the Conference of Afro-Asian countries that is being prepared.

"Irrespective of participation in the planned Conference, the Soviet Union will follow its tried and tested course in foreign affairs. This is the clear and universally understood course towards the consolidation of peace, peaceful co-existence, relaxation of international tension, development of friendship and all-round co-operation with the young independent States, support for the peoples who have risen in struggle against their oppressors—the imperialists and colonialists. This is the course of rallying together and uniting all progressive, freedom-loving forces of the world, irrespective of race, nationality and geographical areas."

Indian View:

A spokesman of the Indian External Affairs Ministry said in New Delhi on August 17 that the issue of Soviet participation in the Second Afro-Asian Conference to be held early in 1965 was still open.

The Government did not interpret the Soviet statement—that it did not wish to press for a seat in the Conference—as a withdrawal of its claim for participation in the Afro-Asian meeting.

The Soviet Note on the subject was given to the Indian Government on August 1 and was discussed with the Russian envoy in New Delhi. Far from withdrawing the Russian claim, it further re-inforces" the arguments that were put forward by the Soviet Union and others in favour of Russian participation.

All that Russia had done was to make it clear that its claim for a seat in the Conference "is not aimed at a breach in Afro-Asian solidarity which they would always wish to avoid."

The Note showed that there were others who had made "this just claim" of Russia an excuse for attempting to divide Afro-Asian countries. "And here there is a definite hint at China."

So far as the Government of India was concerned, its sponsorship of Russia was based on "solid and substantial grounds and was not the result of any prompting by the Soviet Union". The Government adhered to its view that Russia was justly entitled to take part in the Conference, as her participation would be a source of strength to the Afro-Asian world.

B. First Anniversary Of Moscow Test Ban Treaty—Joint Statement By Russia, Britain And USA: Russia, Britain and the United States on August 5 pledged themselves to do everything possible for the solution through negotiation of unresolved international problems.

The statement said:

"One year ago today the Treaty banning nuclear weapon tests in the atmosphere, in outer space, and under water was signed by representatives of the United States, the United Kingdom, and the Soviet Union. This Treaty moved our planet toward a further strengthening of peace. It helps restrict the arms race. It gives all men and women confidence that they and their children will be breathing purer air and living in a healthier, a less contaminated world.

"The States taking part in the disarmament negotiations at Geneva made their contribution to this cause. The positive role played by the Secretary-General of United Nations, U Thant, in the conclusion of the Treaty banning nuclear weapon tests in the three elements is worthy of note. Since the signing of the Treaty, most of the world's States—more than 100—have joined the three original signatories.

"Since then, also, additional—if limited—steps have been taken to reduce nuclear hazards to mankind. Such are the resolution of the General Assembly of October 17, 1963, on the banning of weapons of mass destruction in outer space and the steps taken by the United States, United Kingdom, and Russia to cut back production of plutonium and enriched uranium in the early months of this year.

"These have been significant and valuable steps, but only first steps. Serious problems and differences remain to be dealt with in order to achieve a downturn of the arms race, effective disarmament and secure peace. With a sincere concern for the true interests of all nations and through a constructive effort to achieve agreement consistent with those interests, we can seek to move along the road to understanding and to peace.

"In marking the first anniversary of the signing of the Treaty banning nuclear weapons tests in the atmosphere, in outer space, and under water, we declare our intention to do everything possible for the solution through negotiations of unresolved international problems in order to strengthen general peace, the benefits of which would be enjoyed by all States, big and small, and by all people."

C. "Syncom III" Diverted To Relay Tokyo Olympics By TV: The United States on August 19 rocketed the *Syncom III* communications satellite towards a stationary post high over the Pacific where it is intended to relay television coverage of the Tokyo Olympic Games to North America and Europe.

The National Aeronautics and Space Administration (NASA) reported that the first part of the difficult mission was successful, but that the satellite must execute intricate maneuvers over the next 11 days before it reached its final station high over the Equator at the International Date Line.

A three-stage TAD (thrust-augmented Delta) rocket with almost double its usual power propelled **Syncom III** into a great egg-shaped orbit ranging from about 695 to 23,675 miles (1,112 to 27,830 kilometres) above the Earth. Each orbit takes about 11 hours.

About 28 hours after launching when **Syncom** was near, but not at the top of its third looping orbit, a small rocket in the satellite was to be fired by ground command, "kicking" the satellite into a circular orbit precisely 22,300 miles (35,700 kilometres) high. At that height the satellite's speed would match the Earth's rotation so that it would appear stationary in space. Transfer into the circular orbit would occur above Sumatra. Then for the next 10 days the space-craft must be guided to its final position by small jets firing on command from the ground.

The more powerful Delta, in use for the first time, permitted **Syncom** to change direction in space after launch so that the craft is moving now in a true Equatorial path around Earth. Two earlier Syncoms achieved the 22,300-mile (35,700 kilometres) synchronous orbit but not the Equatorial paths needed for a true stationary orbit. **Syncom III**, an experimental satellite originally designed to handle telephone traffic, was modified at the last minute to handle television transmission.

If successful, **Syncom** would relay Olympic telecasts, beginning October 10, to a US station on the West Coast at Point Mugu, California, for showing in the United States. A ground micro-wave link from California to Montreal, Canada, is to carry the pictures to Canada as they are received. Videotapes made in Montreal will be flown to Europe by special charter planes for showing in Western Europe.

The Communications Satellite Corporation (COMSAT) arranged the agreement for the Tokyo telecasts. Among parties to the agreement are the Japanese Government, the Japanese Broadcasting Corporation, NASA, Hughes Aircraft Corporation (builder of **Syncom**), the European Broadcasting Union and the Canadian Broadcasting Corporation.

On August 20, US space scientists successfully carried out a manoeuvre to place the new communications satellite **Syncom** into an orbit directly in line with the Equator.

A radio signal activated a small hydrogen-peroxide jet motor aboard the satellite that "kicked" **Syncom** into its new orbit.

The US Space Agency on August 21 achieved a near-stationary orbit and said it was confident the communications package could be manoeuvred into position as the world's first stationary satellite—one that hovers over a single spot on Earth.

An order beamed from Salisbury (Australia), pushed the satellite, towards the "stationary" orbit over the Pacific.

[Prev. ref. 5408:AOA:C]

D. Russia Launches "Elektron III" And "Elektron IV": On July 11, Russia launched a "space system" consisting of two scientific stations—*Elektron III* and *Elektron IV*.

A Tass message said the craft were put into widely differing orbits with the help of a single powerful booster rocket.

The Russians launched a similar project in January with two vehicles called **Elektron I** and **Elektron II** which are still in orbit. It was described at the time as an investigation of the upper layers of the atmosphere and outer space.

Tass said: "The purpose of the launch is to continue the comprehensive study of the Earth's radiation belts, the various kinds of radiation coming from the depth of cosmic space, the Earth's magnetic field, and the physical conditions in the upper layers of the atmosphere."

According to preliminary data, **Elektron III** is in an orbit ranging between 253 miles and 4,400 miles from the Earth, and circling every two hours 48 minutes.

Elektron IV is in an orbit ranging between 285 and 41,397 miles from the Earth, circling it every 21 hours 54 minutes.

(*The Statesman*, Calcutta and *Tass*)

[Prev. ref. 5709:AOA:A]

E. USA Launches Two Nuclear-Detection Satellites: A US Air Force spokesman said on July 20 that America's two nuclear-detecting satellites, thrust into space along with a pygmy space-craft on the nose of a single rocket, were successfully in orbit.

The two, known as the **Sentries**, are operating 130 degrees apart in an orbit of about 57,000 miles (91,200 kilometres) and telemetry is good.

The satellites rode into space on July 17 from Cape Kennedy, Florida, on an Atlas-Agena rocket. The third passenger was a 41-lb satellite that will measure natural radiation in the Van Allen radiation belts.

The **Sentries** were guided by remote control from their original elliptical orbit into circular, high-altitude courses.

On July 19 a ground station at New Boston, New Hampshire, transmitted an electronic signal that ignited a small motor aboard one of the **Sentries**. The firing of the motor shoved the **Sentry** out of an eggshaped course into its circular path. The manipulation of the satellite duplicated the positioning of the other **Sentry** on July 17, thus placing them on opposite sides of the Earth, about 100,000 miles apart.

The two space-craft now can detect and electronically report to Earth data on X-ray, gamma and neutron radiation such as that produced by nuclear bursts as far as 100 million miles away.

Two other US nuclear detection satellites were launched in October, 1963 and continue to radio back information they pick up on their watchdog assignments. The **Sentries** help guard against clandestine nuclear tests that would violate the 1963 Treaty that bans testing, except underground.

(*US Embassy*, New Delhi)

[Prev. ref. 5939:AOA:I]

F. Russia Launches Three Sputniks With One Rocket: Soviet rocket experts on August 18 achieved another first—the launching of three sputniks with a single booster rocket of a new type.

The three satellites, **Cosmos XXXVIII, XXXIX** and **XXXX**, are travelling on similar orbits. They carry equipment for exploring outer space.

The Soviet Union had launched two satellites with the same rocket twice before but the rest of the **Cosmos** series had been launched singly.

According to the preliminary data they were moving on close orbits of 96 deg. 2 minutes. The maximum distance from Earth during orbit is 876 km (544.3 miles) and the minimum 210 km (130.5 miles).

The equipment in all three satellites was functioning normally. The launching had confirmed the high technical characteristics of "the new carrier rocket."

Four More Satellites Launched:

The Soviet Union launched three more satellites on August 22—*Cosmos XXXXI, XXXXII* and *XXXXIII*.

The **Cosmos** programme is a research programme which Western observers believe is aimed at a manned flight.

Tass reported that **Cosmos XXXXII** and **XXXXIII** were launched from a single rocket booster.

On August 27, Russia launched **Cosmos XXXXIV**.

(*Tass*)

G. Commonwealth Prizes Institute: Cash prizes for Commonwealth citizens similar to the Nobel Prizes will be offered by the Commonwealth Prizes Institute, whose formation was announced in London on July 22.

The announcement at a House of Commons news conference said: "There is an obvious similarity to the Nobel system. But this is not a carbon copy. Our prizes will be smaller, confined to the Commonwealth, and spread over a wider range of activities."

The Institute planned to raise money for the prizes by launching an appeal fund in the Autumn. It hoped that firms, foundations and citizens of the Commonwealth would contribute.

The prizes would be distributed on an annual merit award system. The number would depend on the amount of money the Institute was able to raise through its appeal, but the target figure was 10 prizes of £1,000 each annually.

The prizes would be given in education, medicine, science, the arts, literature, social welfare, sports and "any other fields of activity of useful, charitable, or public nature."

The prizes would be presented with citations at a series of ceremonies in the countries to which the winners belonged. These ceremonies could take place on Commonwealth Day, May 24.

ASIAN RECORDER

September 23—29, 1964

Regd. No. D-727
Vol. X No. 39

ADEN

A. Military Commander's Support For Ex-Sultan Of Fadhli: Major Nasser Saleh al-Fadhli, "Military Commander of the Fadhli District" arrived in Cairo on August 4 and announced his loyalty to the deposed Sultan of Fadhli.

The Sultan told newsmen that the Major, who is his nephew, boarded a plane at Aden bound for London to go to military college in Britain for training, but arrived in Cairo instead.

Cairo Radio said "his conscience and nationalism prevented him from continuing his journey to London and accepting the British plan" for studying at the military college. "The decision to send him to Britain aimed at taking him far away from the Fadhli Sultanate in which he is considered the ablest Commander in the District."

Major al-Fadhli said the British authorities in the Federation had used "various ways of temptation, including offering bribes to civilians, army officers and tribal chiefs" in order to gain their support. He said he had been offered a bribe. But "those British acts had no effect whatsoever on the people's revolution against the British occupation and their determination to carry on the struggle and stand by the (deposed) Sultan (Ahmed Bin Abdullah) al-Fadhli for the sake of liberation and Arab nationalism."

(*Dawn*, Karachi)

[Prev. ref. 5975:ADN:A]

B. Hunt For Dissidents: The Supreme Council of the Federation of South Arabia on August 4 ordered a nation-wide pursuit of dissidents by the Federal National Guards.

The Council also threatened "severe steps" against any one sheltering or assisting dissidents.

Meanwhile, the Supreme Council accepted the resignation of Sheikh Said Mohammed Ashal as Federal Justice Minister.

(*The Indian Express*, Bombay)

[Prev. ref. 5855:ADN:A, 5963:ADN:A]

C. Dinar To Replace East African Shilling: The Finance Minister of the South Arabian Federation, Mr. Abdullah Salim Basandwah, said at a news conference in Aden on August 19 that the East African shilling, legal tender in South Arabia since 1951, was expected to be replaced by the dinar.

The Federal Supreme Council (Cabinet) had approved a draft Bill covering the introduction of the dinar and the Federal Council (legislative body) was expected to meet in two months' time to approve it before issuing the dinar. He added that negotiations were under way with the Eastern Aden Protectorate states outside the Federation with a view to making the dinar legal tender there as well.

The decision to replace the East African shilling, which ousted the Indian rupee in 1951, was made after a report by Mr. J. B. Loynes, a senior adviser in the Bank of England, who was asked two years ago by the British Government to examine the monetary situation in the area and make recommendations. In his report Mr. Loynes said it was impossible for the Federation to use the East African shilling indefinitely, particularly after member-countries of the East African Currency Board—Kenya, Uganda, Tanganyika, and Zanzibar had become independent. (The Board, now based in Nairobi, was set up in 1919 to replace the Indian rupee in member-countries.)

Mr. Loynes also recommended the establishment of a "South Arabian currency authority" which would have some 85 to 90 per cent of its currency reserve in sterling and British Government securities and the remainder in sterling securities issued by the Aden State Government.

The dinar will be at par with 20 East African shillings or £1 sterling and heavily backed by sterling convertible at a fixed rate. The new currency, now being minted in London, will be of five dinars, one dinar and 500 and 250 fils paper denominations, and coins of 50, 25, five and one fils denominations.

Meanwhile, the Federal Ministry of Commerce and Industry said in a statement that the introduction of the new currency would not affect the Federation's membership of the sterling area.

(*The Times*, London)

[Prev. ref. 5963:ADN:A]

AFGHANISTAN

A. Sardar Swaran Singh's Visit: The Indian External Affairs Minister, Sardar Swaran Singh, was given a warm welcome when he arrived in Kabul on August 27 on a two-day goodwill visit.

Speaking to newsmen he underlined the good relations existing between India and Afghanistan and expressed the hope that they would be further strengthened.

He was received at the airport by the Afghan Minister of Education, Dr. Annas, officials of the Ministry of Foreign Affairs, and members of the Indian Embassy.

He then visited the Dilkusha Palace and signed in the special book. He also placed a wreath on the tomb of the late King Nadir Shah.

Reception:

Later in the day (August 27) the Prime Minister, Dr. Mohammed Yusuf gave a reception in honour of Sardar Swaran Singh.

Speaking at the reception, Dr. Yusuf said that the policy of non-alignment and joint endeavours of India and Afghanistan in maintaining world peace and security were important factors in assuring continuity of understanding and goodwill between the peoples of the two countries.

Sardar Swaran Singh said that almost all members of the present Government of India had worked with the late Mr. Nehru and shared the spark of his great devotion to world peace and helped in raising the standard of living of the poor. Pursuit of the same policy of secularism and development in an orderly manner would continue.

India would also continue the policy of non-alignment and peaceful co-existence, of ending all forms of colonialism and easing tension.

He added that both India and Afghanistan were going through an exciting adventure in the development field. Nothing would please India more than being of help, may be of a marginal character, "if we could also participate in the exciting adventure of developing your country."

Returns Home:

Sardar Swaran Singh, who returned to New Delhi on August 29, said that India had offered to participate in the economic development programme of Afghanistan.

He said there were many spheres where useful economic collaboration and technical assistance could materialize.

During his talks with Afghan Government leaders certain specific fields where India could extend assistance were mentioned. These included agricultural small-scale industries and training facilities.

He said that during his discussions with the Afghan Prime Minister, Dr. Mohammed Yusuf, it was felt that the necessity to pursue vigorously the policy of non-alignment and peaceful co-existence was greater today and that a great deal of vigilance was necessary to maintain peace in the world.

He said he and members of his delegation were welcomed in a hospitable manner not only at the official level but also by the loving and affectionate people of Kabul.

India had always had the most friendly and cordial relations with Afghanistan and his visit had further strengthened his belief about the abiding friendship between the two countries.

He had extended an invitation to Dr. Yusuf on behalf of the Indian Prime Minister to visit New Delhi and he had accepted it.

On the night of August 28, Sardar Swaran Singh had talks with King Zahir Shah, who was host at a dinner in honour of the Indian visitor.

Observers said the gesture highlighted the close and cordial relations between India and Afghanistan as the King did such an honour only to Heads of State.

A statement issued jointly on behalf of the two delegations after the talks said that satisfaction was expressed on friendly relations and that the talks revealed an identity of views on major international matters.

BURMA

A. Voluntary Dissolution Of Teachers' Association: The All-Burma Teachers' Association decided on May 10 to dissolve itself and to surrender its monetary assets and buildings to the Government.

It also asked the Government to use the assets for financing the construction of a primary school each year in any centre chosen by the Government.

It also endorsed the Government's Socialist education policy and pledged on behalf of teachers in general to give all-out co-operation in carrying out this policy.

The Association President, U Kun, who presided, recalled that the Association had originally been founded for raising education standards in the country, promoting unity and solidarity among all teachers throughout the Union, improving the individual qualifications and efficiency of its members and for protecting the rights and privileges of members of the profession.

However, he explained that as the fundamental rights and responsibilities of the workers—of whom the teachers represented one sector—had now been defined, there was no more need for the Association to continue to exist.

(*The Nation*, Rangoon)

[Prev. ref. 5903:BUR:C]

B. Sheikh Sabah's Visit: The Foreign Minister of Kuwait, Sheikh Sabah Al Ahmed Al Sabah, paid a visit to Burma from May 9 to 11.

He arrived in Rangoon as a representative of the Council of Kings and Heads of State of the Arab League which met in Cairo in January.

During the visit, he held talks with the members of the Burmese Government and explained to them the decisions of the Cairo Conference with particular reference to the Palestine question.

A joint communique issued in Rangoon on May 11 said: "The Government of the Union of Burma welcomed the positive contribution made by the Cairo Conference to the cause of unity and solidarity of the Arab people.

"They expressed their understanding and sympathy for the legitimate and just claims of the Arab people in Palestine. They further expressed their hope and support for efforts at the settlement of the Palestine question in accordance with the principles of the Charter of the United Nations and the resolutions adopted by the United Nations in this behalf.

"Both the Minister of Foreign Affairs of Kuwait and the members of the Government of the Union of Burma noted with satisfaction the friendly relations existing between their two countries and expressed their common desire to strengthen them further to their mutual benefit."

(*The Nation*, Rangoon)

[Prev. ref. 5997:KWT:A]

C. Religious Freedom Affirmed By Revolutionary Government: In a special broadcast on August 27, the Revolutionary Government declared it was not Communist and that it fully recognized the people's right to freedom of religion.

It explained that unlike in Communist countries, in Burma members of the Government-sponsored Burma Socialist Programme Party are permitted to follow any religion they choose.

The broadcast was made in connexion with lawlessness created by some monks at Mandalay who, on August 15 and 16, attacked the Bahosi newspaper office and a printing press following the appearance of an advertisement in the newspaper by a monk named Shin Ottama. This particular monk had been held as a heretic by most monks of the orthodox school.

The broadcast said certain persons in the guise of monks had been trying to create misunderstanding between the Government and genuine monks as well as the people by spreading the rumour that the Government was Communist.

It warned that the Government would in future take serious notice of such people.

(*The Statesman*, Calcutta)

[Prev. ref. 5830:BUR:A]

CAMBODIA

A. Border Dispute With South Viet-Nam—UN Recommendations Rejected: The *New China* News Agency reported on September 1 that Cambodia had rejected the recommendations made by a UN investigation commission to solve the border dispute between Cambodia and South Viet-Nam.

The Agency said Cambodia had accused the UN Security Council of "flagrant intervention" in Cambodia's internal affairs.

Quoting a dispatch issued in Pnom Penh, it said the Cambodian Government had accused the investigation commission of being derelict in its investigations and submitting recommendations which "are entirely unacceptable to Cambodia."

The Agency said the commission "has only given conditions about what it called 'border incidents' but failed to name who were responsible for the aggression."

[The three-man commission had recommended to the Security Council on July 28 that the Council should appoint a mediator agreeable to Cambodia and South Viet-Nam to get the two to resume talks on the border dispute and possibly re-establish diplomatic relations. The two nations severed diplomatic relations in August, 1963.]

(*The Times of India*, Bombay)

[Prev. ref. 5976:CAM:A]

INDIA

SUMMARY: A-ICC Meeting; Chinese Reject Colombo Proposal; Ties With Latin America; Indian Oil Corporation; Bonus Commission's Recommendations.

A. A-ICC Meeting: Addressing a meeting of the All-India Congress Committee (A-ICC) in New Delhi on August 29, the Prime Minister, Mr. Lal Bahadur Shastri, referred to the international situation and reminded USA and USSR of their responsibility to maintain peace.

He pointed, in particular, to the "dangerous" situation in such areas as South-East Asia and Cyprus and appealed to the two Great Powers to help maintain peace in small countries. Unless this was done, it would constitute a threat to the peace of the entire world and also retard the development of the small countries concerned.

He also referred to India's border problems and expressed his regret that these had not been settled yet. A further delay in reaching a settlement, was not the way out; the people should have the courage to find an answer. But he made it clear that he was not thinking in terms of any particular solution.

He was trying to go ahead from the position at which the late Mr. Nehru had left the border dispute. But in doing so there could not be "one-way traffic". "If our neighbours do not see reason or say one thing and do another, then it will make things more difficult."

The late Prime Minister had adopted a peaceful and firm approach to problems. But he had taken a welcome initiative at the Bombay session by stressing that the world and the times could change. It would be his endeavour also not to be inflexible and to follow in Mr. Nehru's path with firmness and courage.

The void created by the absence of the central figure in all such gatherings and deliberations over the past three decades was poignantly felt when the first A-ICC session without Mr. Jawaharlal Nehru began.

The Congress President, Mr. K. Kamaraj, said: "We are meeting for the first time without the inspiring presence of Jawaharlalji. Even though he is not with us, I am sure his spirit will be guiding us in all our deliberations and in meeting difficult situations in the country. We are determined to pursue the path and policies laid down by him. Let us go forward with the implementation of those programmes."

He added that after Mr. Nehru's death, Mr. Lal Bahadur Shastri, who had been elected Prime Minister, had been functioning with efficiency and effectiveness. "In all his attempts, we should give our full co-operation."

He moved a condolence resolution mourning the loss of Mr. Nehru and the meeting observed a few minutes' silence, standing.

The resolution, read out by the General Secretary, Mr. G. Rajagopalan, re-affirmed the nation's resolve to continue Mr. Nehru's policy of non-alignment, friendship to all and of strengthening the forces of peace in the world.

Resolution On Food Situation:

On August 29, the A-ICC adopted the Working Committee's resolution on the food situation after a nine-hour sitting, but only after the Government's handling of the situation ran into heavy weather during the debate.

Some sharp criticism, particularly by such senior Congressmen as Mr. N. V. Gadgil and Mr. K. Hanumanthaiya, of the Government soon after the session began made it clear that not all the members were satisfied by the optimistic tone of the resolution.

It was only the intervention of the Prime Minister and the Food Minister, Mr. C. Subramaniam towards the end of the day, by which both managed to effectively convey the Government's determination to overcome the crisis, that changed the bleak impression that was formed earlier.

Both Mr. Shastri and Mr. Subramaniam spoke of the short and long-term aspects of the crisis. To deal with the former, it was made clear by both that imports, however distasteful and undesirable, were unavoidable.

Criticism of the fact that India was relying on other countries for its basic needs—voiced during the debate by several members—was thus rejected outright; it was made clear that only through imports could the present crisis be tided over.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

It was on the long-term aspect that both Mr. Shastri and Mr. Subramaniam gave a more hopeful picture, placing in perspective the steps that the Government was taking to increase production, improve distribution and check the rise in prices.

Mr. Subramaniam, for instance, made it clear that he felt several important decisions would have to be taken soon on a number of issues and these would have to be based upon a broad, national approach.

He made no secret of the fact that the zonal system—also criticized by several delegates—was a harmful one and that it would almost certainly be abolished before the next harvest season. Whatever the policy decided upon, he was firm in stating it would have to be followed by all the States sincerely; great harm had been done by inter-State rivalry.

Both Mr. Shastri and Mr. Subramaniam also clarified the price policy. The basis of this would have to be its effect on production and, therefore, prices had to be fixed accordingly, even though the consumer might suffer.

The Agricultural Prices Commission would thus fix prices that were remunerative (a persistent demand for which was made during the debate) and thus provide an incentive to the farmer to raise production by increasing investment on his land.

The Commission was likely to start functioning by January, 1965 but in the meantime, also, Mr. Subramaniam said, an ad hoc committee would fix prices. He hoped to announce the prices for the kharif crop by the middle of September.

On the method of administering the prices, Mr. Subramaniam explained the working of the proposed Foodgrains Trading Corporation, making it clear that the Government did not have the resources to completely take over trading, nor did it trust traders to go it alone.

The Corporation was an "intermediate stage" towards State trading and it would have extensive powers to check malpractices, such as compulsory acquisition of stocks and a monopoly over movement of grain by train. Should the traders prove to be unco-operative, they would be eliminated.

Mr. Lal Bahadur Shastri's speech was in more general terms. He gave assurances of firm, courageous leadership and answered criticism against some steps he had taken like the appeal to traders to bring their hoards into the open and the fortnight's grace period for them. He felt that an attitude of hatred should not be adopted, particularly against a community.

He also expressed his confidence at being able to tide over the present crisis, admitting that the country was going through a difficult time of food shortages and soaring prices. To check these, he said controls, particularly those over prices, were inevitable. He was especially concerned at the prices of necessities.

He appealed to Congressmen to help in tiding over the crisis. This they could do by taking the message to the farmers that higher production was needed. If production could be raised, reserve stocks of food built up and prices controlled, the problem would be solved.

Debate On Kamaraj Plan:

A tense seven-hour battle at the A-ICC session on August 30 over the Kamaraj Plan ended after the Prime Minister, Mr. Lal Bahadur Shastri, disclosed the inside story in order to dispel the erroneous impression sought to be created by some that the Plan was a diabolical plot to oust some of the top leaders from power.

Mr. Shastri, Mr. U. N. Dhebar, Mr. S. K. Patil and other leaders regretted that such motives which could blur the image of Mr. Nehru and also of the Congress organization should have been attributed to the Plan.

Several participants in the debate spoke with indignation, and others with deep emotion, against the non-official resolution moved by Mr. Trikamlal Jamunadas Patel demanding the withdrawal of the Plan. They took particular exception to his observations questioning the bona fides of those who had conceived the Plan.

The author of the Plan, Mr. Kamaraj, himself sat stoically throughout the acrimonious debate, not uttering a word. After Mr. Shastri's intervention, Mr. Patel withdrew his resolution.

This and the earlier resolution charging the Working Committee with non-implementation of the past non-official resolutions adopted by the A-ICC (which was also subsequently withdrawn) looked like an open challenge to the authority of the High Command, judging from some of the hard-hitting utterances. These were, however, effectively countered by other speakers.

The Prime Minister, in a mild but telling speech, first clarified the position that the Kamaraj Plan was conceived by none other than the present Congress President. After his discussions with Mr. Nehru it was unanimously adopted by the Working Committee. Till the very last, Mr. Nehru had resisted undertaking the sole responsibility of deciding who among the leaders should be permitted to retire from office. He had all the time insisted upon a committee of three or four persons to undertake the task.

Mr. Shastri recalled how when Mr. Morarji Desai's name came up, Mr. Nehru had observed that if Mr. Desai was desirous of giving up office he would certainly attain a much higher stature and become a more important leader.

Mr. Shastri recounted his association with Mr. Nehru for more than 37 years and said it would be completely wrong to associate any attributes of intrigue or manoeuvring with Mr. Nehru. He never functioned with any group or party nor thought of getting rid of anybody in order to strengthen his own position.

Mr. Shastri pleaded "guilty" to the charge of committing the first break of the Kamaraj Plan.

He urged that there could not be a hard-and-fast rule in regard to who should take up party work and who should be in the administration. He was prepared to consider any elaboration or improvement of the Plan, but they had to keep that concept going in order to activise the organization.

Moving his resolution, Mr. T. J. Patel explained the reasons for his conclusion that the Kamaraj Plan had failed. He said in the first place, the only person who had been authorised by the A-ICC to implement the Plan was Mr. Nehru and after his death nobody else had the right to implement it. Secondly, Mr. Lal Bahadur Shastri and Mr. S. K. Patil, who had given up office under the Kamaraj Plan, were now back in the Government. Thirdly, no organizational work was assigned to those who had given up office. In his view, therefore, the Plan was "dead."

Mr. Patel recalled how the Plan had been conceived in the wake of the serious setbacks for the Congress in the by-elections at Amroha, Farrukhabad at Rajkot. Six Central Ministers and six Chief Ministers had retired under the Plan but no party work was assigned to them.

After Mr. Nehru's death there was nobody to execute the Plan unless the A-ICC adopted a fresh resolution that it should be carried on. In his view, that was not likely to happen.

According to Mr. Patel, the Plan was nothing more than a "calculated and deliberate action to pick out some people and put them out of power." Now, three ex-Presidents of the Congress—Mr. D. Sanjivayya, Mr. Sanjiva Reddy and Mrs. Indira Gandhi—had assumed office. Some of those who had retired were, however, still out of office. This had given rise to a feeling of wrath and anger among their followers that their leaders had been let down.

He said Mr. C. B. Gupta, considered as the "iron man" of UP was not even elected to the Working Committee at Bhuvaneswar and when he was declared elected President of the UPCC, the High Command stepped in and altered the situation.

Nothing was being heard of Mr. B. N. Jha, former Chief Minister of Bihar, or of Mr. Mandloi, ex-Chief Minister of Madhya Pradesh. Regarding the former Chief Minister of Orissa, he said if the High Command had any charge against him, why not confront him with it openly instead of allowing things to be misunderstood? Why was Bakshi Ghulam Mohammad disturbed from his Premiership of Jammu and Kashmir?

He wanted that the Kamaraj Plan should now be treated as ineffective and all those leaders who had left office should be called back.

Mr. Mansingh Shah, seconding the resolution, did not agree with all that Mr. Patel had said. He wanted the spirit behind the Plan to be revitalised. He was not sure that the same policy was being followed by the High Command with regard to all the States. He demanded that the A-ICC should give a verdict that the Plan was dead, or else its spirit should be revitalised.

Mr. S. K. Patil then said that the purpose of his entering into the debate at an early stage was to request Mr. Patel to withdraw the resolution. A great calamity had befallen the country after the drafting of the resolution and the vacuum created had not been filled—emotionally, at any rate. It was, therefore, not proper to allow things which might lead to controversies.

The Plan, when it was conceived, was intended to correct an impression in the country that Congressmen were addicted to power. Mr. Kamaraj set the example in his own State by stepping down from Chief Ministership. It was in such a noble spirit that the Plan was conceived and not with some diabolical objective as was being suggested. The soul of the Plan was that Congressmen, whether a Minister or an ordinary member, were prepared to respond to the call of the party.

Such a plan, he asserted, could never die. It was immortal. The need of the hour was to tide over the present difficulties, whether in regard to food or prices and the spirit of selfless work had to be generated among Congressmen. "A great leader is gone. When a huge tree is uprooted, there are other trees, no doubt, but they are so small that we still see the emptiness." If they continued with the discussion, they might be going into dangerous avenues.

Mr. U. N. Dhebar, a former Congress President, pleaded with the members to consider the sum total of the speeches made—whether it did or did not affect the image of Mr. Nehru and of the Congress Party. What was the purpose of the resolution? Was it to put forward somebody's case?

He urged the meeting to reflect upon what Mr. Nehru had meant for the country. He was the soul and spirit of the Congress which he had served for half-a-century with devotion. There could be nothing greater to be treasured than his memory. The background and purpose of the pledge they had taken both at Jaipur and Bhuvaneswar were to introduce a new social order and to raise the standard of life of the people within the next 10 years so that at least their elementary needs were satisfied.

Mr. Mahavir Tyagi deplored that at a time of crisis—food, prices and the refu-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

gee problem—the A-ICC should hold such a debate. Was it that a person could serve the country only as a Minister? He was prepared to give up office if need be. A Congress leader's stature and importance should not be measured in terms of whether he was in office or outside it.

Mr. S. N. Mishra said that the idea of Party before post was not quite new. As a member of a three-man committee appointed by Mr. Nehru in 1959, he had suggested that some important Congressmen should keep out of the Government and even legislatures for a period of five years at least. His contention was that the Kamaraj Plan was no longer in existence except for the "troika"—Mr. Jagjivan Ram, Mr. C. B. Gupta and Bakshi Ghulam Mohammad. Mr. B. N. Jha and Mr. Mandloi had been offered governorships while Mr. Morarji Desai was invited to join the Cabinet.

As for party work, even the three-man anti-corruption committee had ceased to function. It would be extremely hypocritical to claim that the Plan still existed. He, therefore, moved an amendment that it was no use keeping the Kamaraj Plan merely on paper.

Non-Implementation Of Earlier Resolutions—Discussion:

Earlier, a non-official resolution was introduced by Mr. Kedar Pandey (Bihar) criticising the non-implementation of certain resolutions passed by the A-ICC. Although the resolution received strong support, it was withdrawn following an effective reply by the General Secretary, Mr. G. Rajagopalan.

Mr. Pandey listed four non-official resolutions adopted by the A-ICC which, he said, had remained only on paper. He particularly, referred to the scheme prepared some years ago to impart proper training and education to Congress workers which had remained unimplemented.

In a highly critical speech, Mr. S. N. Mishra (Bihar) warned that if the Congress was to survive, it must implement all the resolutions passed at various sessions.

Mr. Mishra, who had also tabled an identical resolution, said he had no intention to censure the Congress leadership. "All that we want now is an assurance that no slackness will be shown in future in implementing the resolutions."

Mrs. Tarakeshwari Sinha (Bihar) said she had no doubt that the country would have made rapid advance on the economic front if all the resolutions passed by the Congress had been implemented. She was sorry that the Nagpur resolution on co-operative farming had been put in cold storage. This had created misgivings in the minds of farmers.

Mr. Abid Ali (Maharashtra) said no power on earth could come in the way of the Congress if it implemented its decisions and resolutions properly. Congressmen must remain constantly in touch with the people, particularly in villages and explain to them the party's policies and programmes. They should not go to them for merely getting votes during the elections.

Replying to the debate, Mr. Rajagopalan said that action had been taken on all the resolutions mentioned by the mover. The first resolution passed in 1960 related to the annual programme for every Congress Committee from mandal upwards. The former Congress Secretary, Mr. Sadiq Ali, had reminded all the PCCs soon after the resolution was adopted, for its speedy implementation. Implementation was the responsibility of the PCCs; the A-ICC could only send circulars.

The second resolution, adopted in April, 1963, enjoined upon the A-ICC to present annual reports on the implementation of the decisions taken by it. The report of the Congress secretaries presented to the annual Congress session dealt with this aspect fully.

The third resolution related to the education and training of Congress workers. An all-India training camp was organized in 1961 in Naini Tal for this purpose. Similar camps were arranged by the Pradesh Congress Committees. Due to elections in 1962 and the Emergency other camps could not be held. The presidents and secretaries of the PCCs were asked recently at Bhopal to implement the training programme more vigorously. It was decided to conduct another training camp in Bombay from November 14.

The fourth resolution concerned the appointment of a standing committee on plans. This would be set up shortly.

Mr. Rajagopalan pointed out that most of these resolutions had to be implemented by the PCCs. It would have been much better if the Bihar PCC (most of the speakers were from Bihar) had taken a leading part in implementing them.

Mr. S. N. Mishra joined issue with Mr. Rajagopalan and said that he had slurred over some important facts. The Congress Secretaries' report did not contain all the details. He was sorry that the A-ICC had made no contribution so far to the formulation of the Fourth Plan.

The A-ICC meeting ended on August 30.

B. Withdrawal Of Civilian Posts From Ladakh—Chinese Rejection Of Colombo Proposal: The *New China* News Agency said on August 29 that "it is China's internal affair to set up civilian posts in these places (Ladakh). There is no reason whatsoever for the Indian Government to ask China to withdraw its civilian posts on its own territory on the western sector of the Sino-Indian boundary."

The broadcast, monitored in Tokyo, was commenting on statements by Indian leaders recently, including the Foreign Minister, Sardar Swaran Singh, that India would negotiate with the Chinese only after they withdrew their posts in Ladakh.

When Mr. Felix Bandaranaike, Parliamentary Secretary to the Ceylon Prime Minister, expressed the hope that China might be willing to vacate the posts, the Minister for External Affairs, Sardar Swaran Singh, had said that India at least was not aware of any evidence to support such a belief on the part of Ceylon. He had also made it clear that India had requested neither Ceylon nor any other friendly country to persuade China "to adopt this attitude or that."

Observers in New Delhi interpreted the latest statement from Peking as her refusal to accept the Colombo proposals.

India had made it quite clear that the demolition of the seven posts would be considered a substantial fulfilment of the Colombo proposals.

The Chinese statement only heightened the belief in New Delhi that Peking was in no mood to pursue peaceful methods to solve the boundary dispute.

Indian Comment:

An Indian Government spokesman said on August 31 that the Chinese stand on withdrawal of posts in Ladakh, as spelt out by the *New China* News Agency, showed that China was interested neither in the Colombo proposals nor in direct negotiations with India at present.

He said the Colombo proposals were not Indian pre-conditions but recommendations made by six Afro-Asian countries at the Colombo Conference. The suggestion that negotiations be held on the basis that neither side should have posts in the demilitarized zone was made by friends of China and India in order to overcome one of the major objections raised by Peking to the Colombo proposals—that there should be no Indian civil posts in the 20 km demilitarized area.

In reacting favourably to this suggestion, India had actually made a conciliatory gesture in order to enable negotiations to take place and was not putting obstacles in the way of opening negotiations.

It was "significant" that NCNA and the People's Daily of Peking had chosen to describe the Indian gesture as another pre-condition.

Officials also described as "preposterous" the statement in the People's Daily that the 20 km demilitarized area was Chinese territory.

[It is well known that China has seized 14,500 square miles of Indian territory in Ladakh by force and aggression. The 20 km demilitarized area is part of this Indian territory taken illegally by force. This demilitarized area has relevance only in the context of the Colombo proposals which contain recommendations for agreed cease-fire arrangements, whose implementation can prepare the ground for discussion of the main question—the differences between India and China on the boundary question. In the discussions, the question of the entire Indian area of 14,500 square miles forcibly taken over by China would obviously figure along with other matters concerned with this boundary.]

D. Commercial Ties With Latin America—Trade Delegation's Visit: It was made known in New Delhi on August 3 that India was taking steps to develop commercial and industrial contacts with Latin American countries, following the visit to that area recently of an official trade delegation which found it a vast growing market.

A developing area like India, Latin America has a total import bill of over Rs. 4,000 crores of which India's share is a bare Rs. 17 crores—more than 90 per cent of it from jute export. Imports from Latin America total only Rs. 3 crores.

The delegation, which was led by Mr. G. J. Malik of the Commerce Ministry, feels that apart from increasing traditional jute exports to Latin American countries, there are opportunities of setting up industries both there and in India as joint ventures based on their mining products.

There is also a possibility of increasing exports of such goods as superior-quality textiles, silks, handicraft, domestic electri-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

cal and other hand-operated appliances, and certain light engineering goods.

Latin American countries have invited capital investment also, and a curious result of this might well be a decline in certain Indian exports to them. This, the delegation feels, has to be accepted as inevitable.

Brazil and Peru, for instance, have now decided to increase their jute production and want India to send machinery and experts to help them in developing the industry. Although this might lead to a decline in jute exports eventually, India has no option but to help these countries. Otherwise others would probably step in and the result would be a loss of machinery exports.

The delegation has also pointed out that, although India is trying to increase her exports to Latin America, she has Embassies in only three countries there. None of these has any commercial and trade section.

Another finding of the delegation is that so far China has made no commercial inroads in the area. A Chinese delegation did visit Brazil recently, but its visit coincided with a revolt in that country and its members found themselves in jail as a result.

F. **US Loan Offer:** The US Government has offered a loan of Rs. 11.9 crores ($25 million) to the Government of India to finance the purchase of American capital equipment and services required for development projects in the public and private sectors.

The loan, advanced through the US Export-Import Bank, is repayable over a period of 12 years from 1967. It bears interest at 5½ per cent.

The total amount of assistance extended by the Bank to India exceeds Rs. 180.6 crores ($379.3 million). The Bank's assistance is part of the US aid to India, which now totals Rs. 2,547 crores ($5,348 million).

H. **Indian Oil Corporation Set** A new integrated undertaking look over the functions of Indian Oil Company and the Indian Refineries Corporation on September 1. To be known as the Indian Oil Corporation, it is headed by Mr. P. A. Gopalkrishnan, who has been designated chairman of the new board of directors.

The integrated set-up consists of two divisions. The refineries division is headed by Mr. N. N. Kashyap, Joint Secretary in the Ministry of Petroleum and Chemicals. He is managing director of the refineries unit, with headquarters in New Delhi.

The marketing unit has Mr. Gopalkrishnan as its managing director and its headquarters continue to be at Bombay.

Mr. Kashyap will be succeeded by Mr. S. K. Guha, at present Deputy Secretary in the Ministry.

[Prev. ref. 5632:INI:K]

I. **FICCI Conference On Agriculture:** A two-day Conference on agriculture organized by the Federation of Indian Chambers of Commerce and Industry (FICCI), which ended in New Delhi on August 29, said there was "no reason for the whole business community being maligned" and held responsible for the current food crisis.

It was unfortunate that the trade had been subjected to criticism for a failure for which it was not responsible.

While those who indulged in malpractices such as hoarding, profiteering and speculation might be dealt with severely, there was no justification for precluding the trade from "playing its traditional role". The trade could function usefully "under a well conceived and accepted set of rules and regulations which could be followed without the constant risk of harassment at the hands of the administration."

The Conference suggested that advisory bodies composed of producers, traders and experts should be formed. These should be consulted regularly by the Government about distribution, fertilizers, marketing, pricing and other related matters.

The Conference criticized the zonal system of food distribution. The present distribution arrangements "reflect the absence of a co-ordinated approach and militate against the basic postulates of distribution policy which should aim at maintaining a smooth flow of foodgrains to the various parts of the country and make them available to the public at prices which can be deemed reasonable".

The Government's policy of placing a ceiling on land holdings also came in for criticism. The land released by this measure, it felt, would be "too inconsequential" as compared to the total area under cultivation.

It suggested that a spirit of enterprise should be injected into the countryside. Dynamic and progressive farmers were emerging as "the main spearhead of improvements in agriculture." Such farmers who constituted "the new rural elite" should be given protection and encouragement so that their potentialities were fully utilized in the national interest.

The present land policy of the Government and the laws introduced so far had created a sense of insecurity among the farmers and they were not willing to invest more money in land. This apprehension should be removed from their minds.

The Conference also stressed the need of improving agricultural administration and speeding up the implementation of various schemes to raise farm output.

Addressing the concluding session, Mr. Shriman Narayan, member for agriculture in the Planning Commission, said that if only the business community were to realize its responsibility it would not be necessary for the Government to "multiply bureaucracy" by taking over the grain trade.

(*The Statesman*, New Delhi)

J. **Bonus Commission's Recommendations Accepted By Government:** The Government has accepted the Bonus Commission's recommendations subject to certain modifications relating to prior charges on gross profits before amounts available for distribution are computed. Such prior charges include direct taxes and fixed percentages of return on capital as well as provision of reserves.

The Commission's formula is applicable also to public undertakings which compete with the private sector.

Existing agreements between managements and their employees providing for a large amount of bonus will not be disturbed but whenever a dispute arises the Commission's formula will prevail.

The modifications introduced by the Government are:

(1) In computing the "available surplus," all direct taxes for the time being in force will be deducted as prior charges. Tax concessions given to industry to provide resources for development will also be accepted as prior charges. Steps are to be taken to ensure by law that the amounts involved in such concessions are used for the purposes for which they are given.

(2) The rate of return on capital to be allowed as a prior charge deductible before calculating available surpluses should be: (a) the actual rate payable on preference share capital; (b) 8.5 per cent, taxable, on paid-up equity capital, and in the case of banks 7.5 per cent; and (c) six per cent on reserves—in the case of banks five per cent.

(3) The Government considered it desirable that beyond a certain maximum the bonus should be paid in the form of securities or investment, instead of in cash. This matter is to be discussed and decided by negotiation with the parties concerned, including labour organizations, and, if necessary, by tripartite discussions.

Suitable legislation is to be promoted to give effect to the proposals which have been accepted by the Government.

A consequential modification relates to the giving of retrospective effect to the decision. In cases where any retrospection has been settled through agreement or by a decision having been given, the matter would not be re-opened. In other cases, where a dispute is raised or is pending, it will be related to the accounting year ending on any date in the calendar year 1962. In all other cases, it will be related to the calendar year 1963.

The broad features of the Bonus Commission's formula are as follows:

The "available surplus" from out of which bonus will be paid should be arrived at after deducting from the gross profits the following prior charges: (a) Depreciation as admissible under the Income-Tax Act; (b) Income-Tax and Super Tax; and (c) Return at the actual rate payable on the preference share capital at 7 per cent on ordinary capital and at 4 per cent on reserves.

Sixty per cent of this "available surplus" should be distributed as bonus subject to a minimum equivalent of 4 per cent of the annual basic wages and dearness allowance, or Rs. 40, whichever is higher, and a maximum equivalent of 20 per cent of the annual basic wages and dearness allowance. The payment should

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

be in cash. Where the amount allocatable as bonus exceeds the maximum of 20 per cent of the earnings, the excess up to a further limit of 20 per cent is to be carried forward to be "set off" in the succeeding years up to a period of the next four years. Similarly, where there is no "available surplus" or the amount of the "available surplus" allocatable as bonus is a sum less than 4 per cent of the annual earnings, the whole of the quantum of 4 per cent or the amount necessary to make up 4 per cent, as the case may be, should be carried forward and 'set off' in the succeeding years up to a period of four years.

The formula will apply to those public sector undertakings which are not departmentally run and which compete with the establishments in the private sector. For this purpose, if not less than 20 per cent of the gross aggregate of sales turn-over of a public sector undertaking consists of sales of services or products which compete with the sales of services or products by units in the private sector, that undertaking will be deemed to be competitive with the private sector.

Where in particular undertakings, employers and units have adopted or may adopt in future, annual bonus linked with production or productivity in substitution of bonus based on profits, the Commission's formula will have no application. Similarly, where industry-wise agreements already exist, the parties are at liberty to renew the agreements with such modifications, if any, as may be agreed to by them.

The formula will not apply to new concerns until they have recouped all early losses including all arrears of normal depreciation admissible under the Income-Tax Act subject to a time-limit of six years.

The Commission recommended that its proposals should apply to all bonus matters relating to the accounting year ending on any day in the calendar year 1962 other than those cases in which settlements have been reached or decisions have been given.

One member of the Commission representing the private sector employers had differed from the main recommendations of the committee on some points of detail. His view was that in calculating the "available surplus" direct taxes like Super-Profits Tax and suitable allowance for rehabilitation should also be included as prior charges and that the rate of return on capital as a prior charge should not be less than 8.5 per cent of paid-up capital and 6 per cent for reserves. He had suggested further that in the case of certain industries like jute plantations, coal and other mines the limits of minimum and maximum should be fixed at 2 per cent and 10 per cent of the year's basic wages and dearness allowance as against limits of 4 per cent and 20 per cent in the case of other industries.

L. Refinance Corporation Taken Over By Industrial Development Bank: The Industrial Development Bank of India took over from September 1 the entire undertaking of the Refinance Corporation for Industry Ltd., in terms of the Industrial Development Bank of India Act, 1964.

Announcing the merger, the Bank in a Press communique said that the facilities extended by the Refinance Corporation would be continued by the Development Bank of India Act, 1964.

The present limit of refinance of Rs. 50,00,000 for any one industrial concern has been raised to Rs. 100,00,000 and the limit will be related to outstanding balance in a refinanced loan account and not to sanction.

The upper limit of Rs. 50,00,000 in respect of refinance for medium-term export credits has been altogether removed.

The Development Bank has paid to the Refinance Corporation as compensation, an amount equal to its paid-up capital of Rs. 2.50 crores for distribution to the shareholders as provided in the Act.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5886:INI:J]

M. Measures To Uncover "Black Money": The Central Finance Minister, Mr. T. T. Krishnamachari said in Hyderabad on August 28 that the Government hoped to uncover all "black money" in due course. The law was stringent and it should be possible to get at the concealed money.

Asked by newsmen on arrival if there were no "short-cuts" to finding unaccounted money, he said that if the Government resorted to any drastic steps, it might be accused of harassing the people. Because the recent raids on film stars' houses in Bombay had yielded results, the people might not accuse the Government of high-handedness now.

Answering questions whether currency notes could not be replaced by new ones to deter people from concealing money, he said it was physically impossible to replace all currency. It might take a long time to print new notes to replace the old ones.

He said that the "iceberg" theory was true of some "great people." Explaining the theory, he said very little of a floating iceberg could be seen. The larger part of it was concealed under water. Similarly, very little of the wealth of "great people" was known.

He said the Government was studying a proposal to acquire some fast seacraft to operate along the country's coastline to prevent smuggling of gold into India.

He said that the smuggling of gold into the country was not a new thing. It could not be the result of the Gold Control Order. The country could afford to import gold. India would require Rs. 1,000 crores annually if gold was to be imported freely.

(*The Hindu*, Madras)

[Prev. ref. 5531:INI:B]

N. Transfer Of Union Territories To Central Home Ministry: It was officially announced in New Delhi on August 31 that the responsibility for the administration of the Union Territories of Pondicherry, Goa, Daman and Diu and Dadra and Nagar Haveli had been transferred from the Ministry of External Affairs to the Central Home Ministry.

Pondicherry, which includes Karaikal, Mahe and Yanum, came under India's de facto control in November, 1954. The treaty of cession with France was ratified in August, 1962. The Government of Union Territories Act was extended to Pondicherry in July, 1963. A popular Ministry was formed subsequently and the Advisory Council became Legislative Assembly for the Union Territory.

The Union Territories Act was extended to Goa, Daman and Diu after the General Election there in November, 1963. The enclave of Dadra and Nagar Haveli was liberated from the Portuguese in August, 1954. The territory is being administered under the Dadra and Nagar Haveli Act 1961.

O. Increase In Railway Facilities—Mr. S. K. Patil's News Conference: At a news conference in New Delhi on August 28, the Railway Minister, Mr. S. K. Patil, announced that 62 new passenger trains would be introduced on October 1—the largest expansion in passenger train traffic at any one time during the past 10 years.

Among the new trains will be the "Taj Express", a fast vestibule train between New Delhi and Agra, the Assam Mail between Delhi and Barauni, the Cochin-Bangalore Express, the Brindaban Express between Bangalore and Madras and the Chandigarh Express between Ferozepore and Kalka.

Mr. Patil claimed that facilities for moving freight had now outstripped the demand. In fact, about 20,000 wagons on the broad-gauge and 3,000 on the metre-gauge remained unused every day.

Referring to coal and steel traffic, he said that the freight moved had actually been 3.24 million tonnes less during the first four months of this year as compared to the corresponding period last year.

Movement of iron-ore for export and other goods traffic had shown an increase, but even this was less than what had been planned.

He said that priority had been given to the movement of grain. Special arrangements had been made for the clearance of imported grain unloaded at various ports. About 700,000 tons could be moved now from the ports to various inland centres.

He also spoke of the encouraging decline in serious rail accidents and said that modern signalling techniques based on developments in electronics were being increasingly installed.

Many other safety devices were also being introduced, two of the most important being the automatic warning arrangements worked by approaching trains and fixed flashing lights at unmanned level-crossings. Experiments were being made on these and if such devices proved successful, he expected that criticism of unmanned crossings would end.

He referred to the praise the foreigners had for Indian Railways. An indication of this was the ease with which development loans could be obtained from abroad. A new $60 million loan from the World Bank for rolling stock, steel products, etc., had been agreed upon and a delegation would

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

[Prev. ref. 5813:INI:J]

P. **Fertilizer Factory Near Visakhapatnam:** India's largest fertilizer factory to be located near Visakhapatnam is expected to be commissioned by December, 1966.

The Rs. 32.5-crore project in the private sector is being financed by sale of capital stocks and long-term borrowing.

The details were formally approved on August 31 by the Coromandel Board, of which Mr. H. V. R. Iengar, former Governor of the Reserve Bank, is Chairman.

A loan of $27 million from the US Export-Import Bank and another of Rs. 8.5 crores from the US Agency for International Development will be used to finance the project. A 400-acre site has been leased from the Vizag Port Administration. It will have dock, rail and highway facilities.

The fertilizer produced in the plant is expected to result in a saving of Rs. 11 crores of foreign exchange.

The project envisages the construction of godowns in Visakhapatnam, Kakinada and other towns in the interior. Negotiations are in progress for the construction of a wharf in the Vizag harbour to be used exclusively by Coromandel Fertilizers.

The project also envisages the creation of an organization to sell and transport 1200 tonnes of fertilizer daily.

[Prev. ref. 5472:INI:B]

Q. **Public Trustee Appointed:** The appointment of a Public Trustee has been announced by the Central Finance Ministry with the object of ensuring that the funds of trusts are spent in accordance with their objects and generally to see that they function properly.

The Public Trustee is Mr. M. N. Kaul, retiring Secretary of the Lok Sabha, who took up his new duties on September 1. His appointment has been made under the Companies Act.

Under the Act, as amended in 1963, a trustee is required to make a declaration to the Public Trustee by October 31, 1964 in respect of shares or debentures held by him in trust on September 1, 1964, and regarding other cases within 60 days from the date on which the shares or debentures are held in trust.

A trustee is required to send a copy of his declaration to the company concerned within 21 days after he has sent the declaration to the Public Trustee.

No declaration by a trustee is necessary in respect of a trust which has not been created by an instrument in writing. Even where the trust is created by an instrument in writing no declaration is necessary in cases where the value of the shares or debentures of a company held in trust does not exceed Rs. 1,00,000 or exceeds Rs. 1,00,000 but does not exceed either Rs. 5,00,000 or 25 per cent of the paid-up capital of the company, whichever is less.

Where a trustee has made a declaration to the Public Trustee he will cease to exercise the rights and powers exercisable by him as a member at any meeting of the company. Such rights and powers will be exercised by the Public Trustee from December 1, 1964.

In order to enable the Public Trustee to exercise his rights and powers, he will, among other things, be entitled to receive from the company concerned all books and papers under the Companies Act which a member is entitled to receive.

(*The Times of India*, New Delhi)

R. **Kohima And Mokokchung Declared Normal Areas:** Kohima and Mokokchung districts in Nagaland ceased to be disturbed areas with effect from September 6.

Special powers of the armed forces in these areas ceased from the same date.

The Nagaland Governor agreed to take these steps in order to normalize the situation during the forthcoming peace talks with the representatives of the hostile Nagas.

Various prohibitory and restrictive notifications relating to permits under the Nagaland Security Regulations have also been withdrawn with immediate effect. The present practice of issuing permits for visits by Nagas to territories outside Nagaland has also been suspended with immediate effect.

During the period of the peace talks from September 6 no special permits will be required for the movement of vehicles within the State. All checkposts on the roads except those for checking inner-line permits will be withdrawn.

The checkposts for inner-line permits will be manned by Nagaland police. Any checkpost maintained by the security forces on the roads will only be for the purpose of checking military vehicles.

Necessary instructions have also been issued to the public prosecutor to withdraw all cases pending under security regulations except those against the new hostiles who had been recently captured.

[Prev. ref. 6004:INI:B]

S. **Suit Against Rulers Of Former Princely States:** Nearly 1,000 applications seeking permission to sue rulers of former princely States have reached the Central Government since the Constitution came into force.

The Government was believed to have granted consent in 500 cases.

Prior to the integration of the States with India the rulers enjoyed immunity from the process of law in the British Indian courts as foreign rulers. The covenants and merger agreements signed by the rulers provided that they be entitled to all personal privileges, dignities and titles enjoyed by them before August 15, 1947.

To implement this assurance, the Civil and Criminal Procedure Codes were amended in 1951. Section 87-B of the Civil Procedure Code bars legal action against rulers except with the consent of the Central Government, and Section 197-A of the Criminal Procedure Code stops courts from taking cognizance of any offence alleged to have been committed by rulers except with the previous sanction of the Central Government.

Applications for consent to sue a ruler are received by the Central Home Ministry and processed by the Law Ministry. The Ministries confine themselves to examining facts and not contentions.

According to a Government spokesman, the principle followed is that "normally consent should be given in every case where the plaint makes out a prima face and justifiable claim".

Mr. C. C. Biswas, former Law Minister, laid down the policy in 1953 thus: "In considering the case, the attitude should be in favour of giving consent rather than of refusing it."

The Government spokesman says that consent is refused if the "object of the suit appears to be exploitation, blackmailing or vexatious harassment", or where from facts within the knowledge of the Government the allegations appear to be unfounded.

Similarly, permission is refused if it will amount to a breach of any guarantees or assurances given to the ruler or where the suit is in respect of "anything done or omitted to be done by the ruler or under his authority during the period of his administration of the State".

INDONESIA

A. **Cabinet Re-shuffle:** President Sukarno on August 27 re-shuffled his Cabinet, bringing in a Communist for the first time.

The Communist is Mr. Njoto, Deputy Chairman of the Communist Party, who becomes a Minister attached to the Presidium.

President Sukarno, who made 14 changes and divided some Ministers' duties, said the new administration would emphasize the crushing of Malaysia and the programme he set out on Independence Day 10 days earlier—**Vivere Pericoloso**, a year of "living dangerously".

The appointment of Mr. Njoto gives Indonesia its first "Nasakom" Cabinet—representatives of the three major forces, the nationalists, religious groups, and communists. A Nasakom Cabinet had been President Sukarno's stated objective for some time.

The new Cabinet is:

Presidium—First Deputy Prime Minister, Dr. Subandrio; Second Deputy Prime Minister, Dr. J. Leimena; Third Deputy Prime Minister, Dr. Chaerul Saleh; Ministers attached to Presidium, Mr. Oei Tjoe Tat, Mr. Njoto, Dr. Arifin Harahap and Brigadier General Murdjoko;

Co-ordinator Minister of National Development Plan—Dr. Suharto;

Co-ordinator Minister-Chairman of Finance Supervisory Body—Sri Sultan Hamengkubuwono;

Foreign Affairs:

Co-ordinator Minister and Minister of Foreign Affairs and Foreign Economic Relations—Dr. Subandrio;

Justice and Home Affairs:

Co-ordinator Minister—Dr. Wirjono Prodjodikoro;

Minister of Home Affairs—Brig.-Gen. Dr. Sumarno;

Minister of Justice—Dr. Astrawinata;

Minister|Chairman of the Supreme Court—Dr. Wirjono Prodjodikoro;

Attorney General—Col. Sutardjo;

Defence and Security:

Co-ordinator Minister, Chief of Armed Forces and Defence Minister—Gen. Abdul Haris Nasution;

Army Commander—Lieut/-Gen. Ahmad Jani;

Navy Commander—Rear-Admiral E. Martadinata;

Air Force Commander—Air Vice-Marshal Omar Dani;

Police Commander — Commissioner Sutjipto Dukusumo;

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Finance:

Co-ordinator Minister—Dr. Sumarno;

Minister of States' Revenue, Financing and Auditing—Mr. Muhammad Hassan;

Minister of Central Bank—Dr. Jusuf Muda Dalma;

Minister of State Budget—Dr. Sujardi;

Development:

Co-ordinator Minister—Dr. Chaerul Saleh;

Minister of Private Bank and Capital —Mr. J. D. Massie;

Minister of Labour—Mr. Sutomo;

Minister of National Research—Dr. Djuned Pusponegoro;

Minister of Public Works and Energy —Maj.-Gen. Suprajogi;

Minister of People's Industries—Maj.-Gen. Azis Saleh;

Minister of Veterans and Demobilization—Maj.-Gen. Sarbini;

Minister of Basic Industries and Mines —Dr. Chaerul Saleh;

State Minister attached to Department of Development—Mr. Ahem Erningpradja;

Agriculture and Agrarian Affairs:

Co-ordinator Minister—Dr. Sadjarwo;

Minister of Estates—Dr. Frans Seda;

Minister of Forestry—Mr. Sudjarwo;

Minister of Fishery—Commodore Hamzah Admohandojo;

Minister of Agraria—Mr. Hermanses;

Minister of Rural Development—Mr. Ipik Gandamana;

Distribution:

Co-ordinator Minister—Dr. J. Leimena;

Minister of Trade—Mr. Adam Malik;

Minister of Land Communication, Tele-communication and Tourism—Lieut.-Gen. Hidajat;

Minister of Communication—Maj.-Gen. A. Adikin;

Minister of Air Communication—Vice-Marshal Iskandar;

Minister of Transmigration and Co-operatives—Mr. Achadi;

People's Welfare:

Co-ordinator Minister—Mr. Muljadi Djojomartono;

Minister of Religion—Hadji Saifuddin Zuchri;

Minister of Social Affairs—Mrs. Rusiah Sardjono;

Minister of Health—Maj.-Gen. Dr. Satrijo;

Minister of Religious Liaison—Mr. Fattah Jassin;

Education and Culture:

Co-ordinator Minister—Dr. Prijono;

Minister of Basic Education and Culture—Mrs. Artati Marzuki;

Minister of Higher Education and Science—Maj.-Gen. Dr. Sjarif Thajib;

Minister of Sports—Mr. Maladi;

People's Relations:

Co-ordinator Minister—Dr. Ruslan Abdul Gani; and

Minister of Information—Maj.-Gen. Achmadi.

JAPAN

A. Nuclear-Powered Submarines' Visit Permitted: After 20 months of sporadic but meticulous negotiations, the Government agreed on August 27 to permit US nuclear-powered submarines—albeit conventionally armed—to call at ports in Japan.

Tokyo reports said the Government proposed to take a series of safety precautions and make compensation arrangements.

The Government decision provoked a bitter campaign of protest by the Left Opposition parties.

In a statement, the Government declared that the submarine visitors would be of the Nautilus and not the Polaris types, and emphasized that there was no question of deploying nuclear weapons in Japan.

It added its conviction of the submarines, safety and stated that they would be engaged in the defence of Japan like other American vessels there, thus falling within the scope of the United States-Japan Security Treaty.

An American public statement made no mention of missiles. It affirmed that with the exception of propulsion systems the submarines were no different from other United States vessels there, and thus enjoy the same entry rights. However, in respect of other matters requiring prior consultation (which presumably covers missiles), the United States Government "has no intention of acting in a manner contrary to the wishes of the Japanese Government".

Permission Withdrawn:

The Government decided on September 2 to refuse permission to US submarines equipped with nuclear warheads to enter its ports unless their warheads were removed.

The decision was a victory for the opponents of the entry of nuclear-equipped submarines into Japanese ports. The opponents had threatened to launch a massive agitation if the Government allowed the submarines to enter Japanese ports.

The chief Cabinet spokesman, Mr. Zenko Suzuki, explained that nuclear-equipped US submarines would be subject to the provision of prior consultation in the US-Japan Security Treaty.

MALAYSIA

A. Restrictions On Import Of British Goods Imposed By Singapore: The Singapore Finance Minister, Dr. Goh Keng Swee, said at the opening of a textile factory on August 23 that Singapore proposed to ban the import of certain classes of British goods if the British Board of Trade refused to negotiate on its restrictions on imports of Singapore-manufactured goods.

At that time he did not indicate what these goods would be, but said that his Ministry was making plans "for the progressive prohibition of imports from Britain."

He added: "I do not propose... an entire prohibition...but we are prepared to escalate to that position as quickly or as slowly as it (the Board of Trade) wishes."

He said that the British restrictions came at a time "when Singapore has been shouldering the main burden of Indonesian economic confrontation. The recent closing of the barter trade with Indonesian islands near by (see page 6032) has added to our difficulties".

He added that there was nothing that Singapore imported from Britain that could not be imported from other countries. If Britain invoked action under the General Agreement on Tariffs and Trade (GATT), "there are other measures by which we can close the doors to British exports to Singapore".

He referred to a statement of the problem made by a local garment manufacturer, Mr. Lam Thian, who charged that "the Board of Trade action had prevented the establishment of some 50 factories in the state, representing a loss of 10,000 jobs".

He deplored the Board of Trade's refusal to negotiate, declaring: "We were made to understand that it will be useless to discuss this matter before the British General Elections".

He said that he had threatened retaliatory action when he first heard of the intentions of the Board of Trade early this year, but he had apparently not been believed. "As a result we are placed in an intolerable position where not only our enemies are making life difficult for us but even our allies."

A British Board of Trade official said in London later in the day: "We are at the moment negotiating with Malaysia about the future level of their exports of cotton textiles to Britain."

The official, referring to Dr. Goh, added: "It is not clear whether this is a threat or a promise. Naturally we wish for some settlement in the talks which is as reasonable as possible under the circumstances. I cannot really comment on it as we need official confirmation of the threat first from our Embassy.

"I should point out that Britain does have one of the most liberal policies for importing cotton textiles of any other country in the world. But we have to negotiate levels, and the exporters are never really satisfied.."

A total of 46 types of commodities manufactured in Britain were banned from Singapore on August 26. All other British goods would require specific import licences.

Dr. Goh said that he hoped the ban would remove any further misunderstanding in London.

In Kuala Lumpur on August 26, Mr. Tan Siew Sin, the Malaysian Finance Minister said that Singapore had a good case.

He agreed with Singapore that the British action was rather precipitate in view of the fact that negotiations for a new level of exports from Malaysia as a whole had not yet been completed and in view of the assurance said to have been given that pending the completion of the current negotiations there would be no prohibition of textile exports to Britain.

He said that Spain was allowed a level of import 12 times greater than that given to the former Federation of Malaya, and Hong Kong was allowed about 40 times more. Malaysia was not only a loyal member of the Commonwealth, fulfilling all its obligations and responsibilities, but still continued to be the Commonwealth's largest net United States dollars earner, earning even more than Britain herself. All those dollars went into the sterling pool to benefit the Commonwealth as a whole. Singapore had a good case and the Central Government should pursue the matter with Britain on its behalf and also that of Malaysia.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Government officials and Malayan manufacturers had gone to great pains to emphasize that the ban would not affect the people of Singapore because some of the prohibited commodities were produced locally and the rest could be obtained from West Germany, Japan, New Zealand and Australia.

Restriction On Import Of Dutch Goods:

The Singapore Government said on August 24 that the import of goods of Netherlands origin consigned from any country into Singapore would be subject to specific import licensing from August 25.

This measure was necessary because of the help which the Dutch Government had extended to Indonesia, thus enabling it to continue its economic confrontation against Malaysia.

Singapore, it was stated, had borne the brunt of that policy. The prohibition of specific imports from Holland was being considered.

Earlier in the month, the Dutch Government announced the grant of considerable export credits to Indonesia. (There has been increasing co-operation between the two countries since diplomatic relations were resumed last year after a three-year breach over West Irian).

The Malaysian Cabinet discussed on August 26 the implications of Dutch economic assistance to Indonesia and the British Board of Trade's curtailment of imports of cotton textiles from Singapore. Dutch support for President Sukarno was understood to have been regarded by the Cabinet with grave concern because it was tantamount to offering aid to a declared enemy of Malaysia.

The Cabinet endorsed without equivocation the decision to make subject to licence the import of Dutch goods to Singapore and also to prohibit 46 commodities of British manufacture and to license other British products. The retaliatory action against Britain found warm support.

Malaysia's attitude is that the issue could have been avoided if British officials in Kuala Lumpur had been in the picture and available.

Mr. A. V. Cordeiro, the acting Controller and Registrar of imports and exports in Singapore, gave importers seven days in which to produce documentary evidence that they had established irrevocable letters of credit for Dutch goods. Imports from Holland, including foodstuffs, radio and television sets, gramophones and records, totalled 40 million Malayan dollars (about £4,000,000) in the first half of this year.

The Dutch Government announced recently the granting of an £11,500,000 export credit to Indonesia and has also indicated that it is willing to import a considerable amount of Indonesian goods.

Official sources in Britain confirmed that negotiations on import levels had been going on with Malaysia and could continue. The action of the Singapore authorities according to them might well be aimed at forcing the separate negotiations with Britain desired by Singapore.

British Reaction—Ban Lifted:

The British High Commissioner to Malaysia, Lord Head, said in Kuala Lumpur on August 27 that the Singapore decision was unique in Commonwealth relations.

The trade dispute, he said, was showing signs of causing a substantial rift in the excellent relations that existed between Britain and Malaysia, about which he was deeply concerned.

Britain was a major consumer of cotton and cotton goods and had a large cotton textile industry. It had suffered a sharp reduction in recent years because of the very great expansion of imports from many countries. Whereas 325,000 people were employed in it in 1951, in 1963 there were only 125,000. Last year Singapore was given a clear warning that she should not count on building up her cotton industry by exporting to Britain, but it was disregarded and the textile industry was built up without any attempt to reach agreement on a quota for imports to Britain.

In May of this year, he said, Britain announced that in view of the very large amount of outstanding contracts no further import licences would be issued until agreement on a quota had been reached, and negotiations started. Singapore declined Britain's initial proposal of a quota covering exports from Singapore and Malaya. Since then the Board of Trade had given further consideration to the situation as a whole and was given detailed information by the Singapore Government on August 13 after an inquiry. In other words, the information was supplied less than two weeks before the ban was placed on 46 items of British goods. This unilateral action without awaiting the outcome of negotiations on the British proposals was, he understood, unique throughout the whole field of Commonwealth relations.

In London, the Board of Trade said that it was seriously concerned at the Singapore restrictions on British goods without consultation with the Government, and that the matter was being taken up with the authorities in Malaysia.

The statement said: "The Board of Trade have at all times been willing to negotiate with the Government of Malaysia on the question of restraint on exports of cotton textiles to the United Kingdom from both the states of Malaya and Singapore. Indeed, in the view of the Board of Trade, such negotiations were already in progress.

"At a meeting between officials of the two Governments in May last, representatives of Malaysia and Singapore declined Britain's proposal that there should be a single quota covering exports from Singapore as well as from the states of Malaya. Their alternative proposals included the provision that there should be no limit on exports of cotton textiles from Singapore to Britain. This was clearly unacceptable to the British Government.

"The Board of Trade told Mr. Lim Kim San, Singapore Minister of National Development, on July 22, during his visit to this country, that it was for the Malaysian Government now to submit fresh proposals of a more realistic nature. The Board also requested further information on July 21 from the Singapore authorities. This was received on August 13. Since then the Board have been considering whether they could advance new proposals.

"The British Government's policy towards imports of low cost cotton textiles was announced by the President of the Board of Trade in Parliament on June 6, 1962. This was to the effect that countries with no traditional trade in cotton textiles should not count on being able to build up a new market in Britain. This policy was announced in view of the serious difficulties of the domestic cotton industry and the fact that it would be wholly unfair to those countries which were exercising restraint (including India, Pakistan and Hong Kong) to allow new suppliers to develop trade in the British market.

"Nevertheless, orders for rapidly increasing quantities of textile goods from Singapore and other countries were placed for admittance into this country and it became necessary to hold the situation by the imposition of import licensing on May 1, 1964, pending the completion of negotiations with the countries concerned.

"The matter is being taken up with the authorities in Malaysia."

On August 28, Dr. Lim Swee Aun, the Malaysian Federal Minister for Commerce and Industry, had talks with Mr. Lee Kuan Yew, Lord Head and a nine-man delegation from the cotton manufacturers of Singapore. The manufacturers claimed that five of the 23 cotton textile factories in Singapore had been forced to close, while plans had been cancelled for the opening of 18 new factories.

As a result of the negotiations, the ban on British goods was lifted with effect from September 1.

The announcement said that the decision to lift the ban was made after discussions between the British High Commissioner, Lord Head, the Singapore Prime Minister, Mr. Lee Kuan Yew and the Malaysian Minister of Commerce and Industry, Dr. Lim Swee Aun.

It said: "Negotiations between UK and Malaysian officials will resume within the next few days."

NEPAL

A. King Mahendra's Address To Ministerial Council: Addressing the Ministerial Council in Khatmandu on August 30, King Mahendra called for a war on under-development and poverty "with total mobilization and invincible determination."

He asked everyone "to accept his responsibility."

In his speech, a report of which was circulated by the Government-owned National News Agency, he remarked that in a fast-changing world Nepal could not retain her independence without keeping pace with the changes. He recalled that the changes in 1960 (dissolution of Parliament) had become inevitable.

Poverty of the people was being exploited to further party interests. The parliamentary system was so expensive that political parties could not meet their expenses without external support and this made them dependent on others.

One of the main objectives of the changes made in December, 1960, he said, was to establish political stability through the partyless democratic panchayat system.

In about 43 months his Government had to its credit six major achievements which included Nepal's adherence to a non-aligned foreign policy and laying of the foundation for partyless democratic system on panchayats.

The traditional bureaucratic machinery had become inadequate to meet the challenge of the time and the "urgency of the situation called for a revolutionary attitude at every step." To reach that goal Nepal must have a new cadre of workers for the partyless panchayat system.

nauli-Pokhra road project, to evaluate its progress and remove any difficulties that might crop up from time to time.

The committee is headed by the Transport and Communications Minister, Dr. Nageswara Prasad. The other members are Nepal's Transport and Communications Secretary, the Chief Engineer (Roads), the Director of Indian Aid Mission, Mr. D. R. Kohli and the Indian Chief Engineer of the Sunauli-Pokhra road project.

The agreement on the 128-mile road was signed on August 25 before the Indian External Affairs Minister, Sardar Swaran Singh's departure for New Delhi (see page 6043).

Survey work relating to the road has already been completed and construction will be taken up in October. The road is expected to be completed by December, 1968.

[Prev. ref. 6046:NEP:A]

PAKISTAN

A. National Economic Council Approves Outline Of Third Plan: The National Economic Council, which met in Dacca on August 27 under the chairmanship of President Ayub Khan, "generally endorsed" the outline of the country's Third Five-Year Plan, which is to be launched on July 1, 1965.

The gross size of the Plan has been fixed by the Council at Rs. 5,200 crores with the public sector being allotted Rs. 3,400 crores and the private sector Rs. 1,800 crores.

Total spending in the East Wing will be of the order of Rs. 2,650 crores and in the West Wing Rs. 2,550 crores.

Out of Rs. 3,400 crores proposed to be spent in the public sector during the Plan period Rs. 1,800 crores have been allocated to East Pakistan and Rs. 1,600 crores to West Pakistan.

An official source said that the outline of the Plan was thoroughly discussed by the Council members before it was generally endorsed. It was also decided that the outline should be circulated to elicit public opinion.

The Council also considered proposals for development of fertilizer industries and petrochemical complexes in both the Provinces based on the existing natural gas resources.

It was, therefore, decided to work out detailed plans for these industries in consultation with Provinces and Ministries concerned.

The principal objectives set for the Third Plan are to attain a rapid growth of the national economy with a view to ensuring a break-through to self-sustained growth in the shortest possible time. It was proposed to aim at a minimum increase of 20 per cent in national income over the five-year period from 1964-65 to 1969-70.

In order to reduce the degree of inter-regional and intra-regional disparity, it was proposed to reduce the existing level of disparity in income per head between East and West Pakistan by about one-fifth.

With a view to preventing any aggravation of the existing unemployment situation, it will provide at least 4.5 million new job opportunities.

The Plan envisages the strengthening of the balance of payments by increasing the country's foreign exchange earnings at a rate faster than GNP and by driving ahead with the import situation. It was expected that the country's earnings of foreign exchange will reach a level of Rs. 425 crores by 1970 compared with about Rs. 295 crores at the end of the Second Plan.

Other objectives of the Plan are to develop basic industries for the manufacture of producer goods so that the requirements of further industrialization can be met mainly from the country's own capacity; to secure the transformation of agriculture, by increasing productivity and expanding purchasing power in rural areas through a massive works programme; to arrest the menacing growth of population by taking decisive steps towards population control; to provide better housing, more health services and greater facilities for education, especially for the lower income groups.

The Plan is also designed to make substantial progress towards achieving certain specific social objectives such as diminishing inequalities in the distribution of income, wealth and economic power, providing a measure of social security and promoting social and cultural change conducive to accelerated economic expansion.

The national income data that have become available recently reveal that the growth rate has been faster than previously estimated for the Second Plan. In the first four year of the Plan, national income increased by about 22 per cent or over 5 per cent per annum. Even assuming a modest growth rate in the last year of the Plan, the target of 24 per cent is certain to be exceeded. On current indication, an increase of 26 to 27 per cent in national income is likely to be achieved with an estimated total development expenditure of Rs. 2,500 crores during the Second Plan period. This also points to the possibility of obtaining higher increase than 30 per cent in the Third Plan with the proposed allocation.

President Ayub Khan's Foreword:

The following is President Ayub Khan's foreword to the outline of the Third Five-Year Plan approved by the National Economic Council:

"I look back upon the economic progress in the last five years with sincere happiness and deep humility. We made our Second Five-Year Plan in the shadow of the past. Then our problems were grave and they appeared intransigent. Our resources were small and our needs enormous. The financial and economic system was precariously poised and endangered by policies of drift.

"Today one looks back on the progress made in the years of the Second Plan and one gives silent thanks for what has been achieved and says a silent prayer for the years ahead when the Third Plan will be in operation and the country will be advancing into the future with fresh hopes and aspirations.

"A national plan of development embodies the economic and social philosophy of a country. The successive Five-Year Plans indicate the sense of direction and national purpose that is inherent in economic planning. A Five-Year Plan must, therefore, be viewed not only as a collection of complex facts and figures and lists of schemes but as a projection of a nation's effort to reach goals of human happiness.

"There are various ways of assessing national progress. The usual measure is the increase in national income or income per head. By this measure Pakistan has already increased its national income by about 60 per cent and will achieve a further increase of 200 per cent in the next 20 years. The advance is in geometrical progression. But figures are meaningless unless they are related to the welfare of the common man.

"The real index of economic development is not cold statistics, but the visible effects on the pattern of the daily life of the people and it is here that we have to go far beyond the usual economic measurements and consider the cultural, social and religious enrichment of life, besides the material progress and it is for this reason that economic planning has to be conceived as a part, and only as a part, of the broader social and economic frame-work which is rooted in our cultural and religious traditions.

"To provide a decent life to nearly 110 million people, which number will increase by another 80 million over the next 20 years, is a vast challenge. We have accepted this challenge. As a nation, we are also conscious that the path chosen by us to economic development should be guided by our own political ideals, our long-term social objectives and our proud cultural heritage.

"We must evolve a synthesis between economic growth and moral and spiritual values. Of course, the need of the hour is to move speedily towards a progressive, technological, industrialized society. Basic to such a society is the spirit of inquiry and criticism and it is inevitable that many traditional institutions should change in the process if they stand in the way of rapid progress.

"But here are parts of our heritage so valuable that they must be preserved. There is for instance the family life as it is organized at present with its close ties, its traditional simplicity, its warmth and depth. It will be a poor bargain if this were replaced by an impersonal urbanised society, however developed it may be materially.

"The emancipation of a great number of people from dire poverty in the next few decades will certainly give them greater control over their environment, but it will not necessarily make them happier unless the moral, cultural and spiritual values of life are also preserved.

"We, as a nation, are committed to planned development. For us Five-Year Plans represent a concrete programme of action. We gave unstinted political support to the Second Five-Year Plan and its success owed itself largely to the economic discipline that the country was willing to accept. We are equally determined to make the Third Plan our platform for action in the economic field. Our approach to economic planning has been pragmatic all along. It has been the constant endeavour of the Government to mobilise the creative energies of the nation and to give all possible incentives for the stimulation of private initiative. The Government has limited its own role to providing a suitable frame-work for the private sector which had neither the ability nor the willingness to develop. There have been no grand experiments in nationalization, no fancy slogans about socialism, no under-intervention in the private sector.

"In fact, the Government has gradually removed most of the administrative and bureaucratic controls which hampered the progress of the private sector. The result of this approach has been the rapid growth of private capitalism in Pakistan.

"This has certainly yielded high rates of growth, especially in recent years, but it has also led to certain problems. Private capitalism all over the world has already undergone a profound transformation and its character today in the Western countries is far different from the private capitalism of the 18th and 19th centuries which was characterized by excessive profits, brutal treatment of labour and disregard of the larger welfare of society.

"We have to ensure that in Pakistan, too, private capitalism moves towards that stage of enlightenment where making of high profits and their re-investing

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ment ceases to be the sole or even the major criterion of success and the private sector is motivated by the larger interests of society.

"It will be our firm policy, therefore, to prevent excessive concentration of income and wealth in the hands of a few, to distribute economic opportunities more widely and to regulate further development of private capitalism in the best national interest. It is our intention to humanise all such vested interests as stand in the way of a progressive, dynamic society.

"The feudalistic structure in the rural areas has already been humanised through land reforms. We are determined to see that such a feudalistic pattern does not emerge elsewhere, whether in the industrial field or in the social sphere. The rising industrial aristocracy must turn its undoubted energies to efficient economic management of the country and refrain from conspicuous consumption and luxurious living and developing any political interests so that the need for corrective action does not arise.

"The ultimate aim of all our efforts in economic and social spheres can only be to move speedily towards the attainment of Islamic socialism in Pakistan. The term Islamic socialism is almost interchangeable with welfare state. In addition to the familiar welfare goals Islamic socialism implies that the cultural and religious heritage of the country should be preserved and not allowed to be destroyed by the fruitless pursuit of economic development. It is, therefore, a concept much broader than the welfare state and embraces all the phases of an individual life.

"What is basic to the establishment of Islamic socialism is the creation of equal opportunities for all rather than equal distribution of wealth. In fact, equality of incomes has never been achieved, not even in the Communist countries, because differences in aptitudes and talents make for differences in incomes even when individuals start off with equal opportunities.

"And this is as it should be. The important thing is that every individual must be given the fullest opportunity to develop his natural talents and that he should not be inhibited by an oppressive economic and social frame-work. There are three corner-stones of this policy of ensuring equal opportunities to which we are committed; first, it is the intention of the Government to provide universal free primary education to all; secondly, it is our aim to ensure a system of merit scholarships at the secondary education level; thirdly, we intend to provide competitive entry to jobs at all levels. These objectives are already embodied in the Constitution, their achievement will automatically ensure that a child gets the maximum possible opportunity for advancement irrespective of his economic or social class.

"Besides providing equal opportunities in the field of education and jobs, the Government is also committed to providing all the welfare facilities which are by now a common feature in the Western world. Our resources will not permit us to provide the kind of health services and social security benefits which are prevalent in UK and Sweden today but we certainly intend to cover a large part of the population with social security legislation over the period of the Perspective Plan (1965-85). Thus the coverage of health services will be increased about 10 times and every family will be provided with a decent house to live in by constructing about 16 million new housing units in the next 20 years.

"The Government is also determined that a certain minimum income should be assured to every citizen. At present, about 40 per cent of the total households in East Pakistan and about 24 per cent in West Pakistan obtain a monthly income of less than Rs. 100. Such a maldistribution of income is totally unacceptable. We are determined to ensure that no household should have a monthly income of less than Rs. 100 by 1985. This will at least provide the minimum facilities of life and protect a large segment of the population against the constant fear of privation and hunger.

"One of the fundamental objectives of our policy is to bring about a better cohesion between East Pakistan and West Pakistan in all fields,—economic, political and social. We are firmly committed to eliminate disparities in per capita income in the shortest possible time and this has been made a specific objective of the Perspective Plan. But the process of national integration has to extend far beyond the economic field and must embrace all the phases of an individual's life. At the same time, we should also take advantage of the possibilities of regional co-operation on a broader scale, particularly with the neighbouring Islamic countries. The recent moves towards regional economic co-operation between Pakistan, Iran and Turkey should be looked at in the context of this long-term goal of extending our regional ties as broadly as possible.

"This is only an outline of the Third Plan. This is not the final Plan. It is being released to elicit public opinion. Economic planning is an exercise in which not only the technicians but the whole nation participate. We are already bringing about a democratization of the planning and implementation process through the recent decentralisation of development functions of the Government. This is creating an unprecedented enthusiasm for planned economic development, particularly the Rural Works Programme, which has carried development to the very heart of the countryside and caught the imagination of the people. We are convinced that it is only through mobilization of the creative energies of the entire nation that economic planning can really succeed."

B. US Naval Ships' Visit To Karachi—Indian Report: A New Delhi report on August 6 said that a US aircraft carrier armed with nuclear weapons had paid a visit to Karachi the previous week and stayed there for two days.

This information was available in New Delhi on August 26 in spite of the fact that it was not publicized at all in Pakistan.

The nuclear carrier, **Enterprise**, was accompanied by **Long Beach**, a cruiser, and **Bainbridge**, a "guided missile frigate".

As far as could be ascertained, the ships came to Karachi from the West, via the Cape of Good Hope, and left southwards for an undisclosed destination.

Normally the goodwill visit of one country's ships to another is widely publicized. But the Pakistan Government blacked out the news of the US naval ships with their nuclear cargo presumably because of the embarrassment it would have caused Pakistan with its newfound ally, China.

Pakistan also apparently apprehended displeasure from non-aligned countries of the region which protested strongly when USA first announced its intention to send its 7th Fleet for a cruise in the Indian Ocean.

Another New Delhi report on August 29 said that further details were available of the visit to Karachi by the US aircraft carrier **Enterprise** and its accompanying naval ships.

According to the report, the US naval vessels were engaged in exercises which were watched by senior naval officers of Pakistan as well as the military attaches to the US Embassy and the British High-Commission in Karachi.

Some Pakistani naval officers were also reported to have flown in one of the aircraft which took off from the US carrier.

According to available information, the US carrier and the accompanying vessels were on a world cruise on what was called "endurance test". The idea was to find out how far the carrier, among the largest in the world, can go without refuelling.

The USA has already given Pakistan a submarine and a fleet tanker. The main use of the latter is that it can refuel naval ships on the high seas.

(*The Statesman*, Calcutta)

[Prev. ref. 5889:PAK:C]

C. Air Pact With Kuwait Initialled: A draft for a bilateral Air Agreement between Pakistan and Kuwait was initialled at the Pakistan Civil Aviation headquarters in Karachi on August 22.

Air Commodore B. K. Das, Director-General of Civil Aviation, initialled the draft Agreement on behalf of Pakistan while Mr. Abd Allah Samhan, Director-General of Kuwait Civil Aviation, initialled it for his country.

The draft Agreement was finalised on August 21 between the visiting four-member Kuwaiti delegation and Pakistan Civil Aviation and PIA authorities.

Kuwait Airways and the PIA might soon enter into an interline agreement for pooling their passenger services, Mr. Abd Allah Samhan indicated on August 22. He told newsmen before formally signing the Agreement with Pakistan that opportunities existed for co-operation between the PIA and the Kuwait Airways in many fields. The two airlines had just concluded a semi-official accord for the use of each other's spare-parts stores.

He said PIA's progress during the last few years was fascinating and unbelievable. The airline deserved all congratulations for operating its planes on the Chinese route with "hundred per cent success." "We sincerely hope that this service progresses rapidly and the frequency of flights on this route is increased."

(*Dawn*, Karachi)

[Prev. ref. 6001:PAK:D]

D. Shipping Policy: The Central Communications Minister, Mr. Khan A. Sabur, said in Dacca on August 25 that a fleet of 35 seagoing ships would be purchased within the current Plan period.

In an interview, he said that of the total of 35 ships, there would be 15 new ships and 20 modern second-hand fast ships. They would replace 16 ships in the private sector and nine would be placed under the disposal of the National Shipping Corporation. The remaining 10 ships, to be imported from West Germany, would be allotted to the newcomers from East Pakistan.

At present, he said, the country had a fleet of 43 ships, against only three old ships at the time of Independence. Twelve ships were now operating on foreign routes, besides two tankers for importing oil from the Persian Gulf.

The domestic trade, he added, was reserved for national flag ships and it was the policy of the Government to reduce its reliance on foreign carriers, "who were prone to resort to monopolistic abuses like arbitrary increase on foreign rates, etc."

He said that as a result of the enhanced share secured by USA on the UK-Continent route, "we are committed to increase our fleet of six on that route to 14 modern and fast ships."

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The foreign exchange earnings of the country on shipping had increased from Rs. 43,00,000 during January-June, 1962, to Rs. 180,00,000 during July-December, 1962, through the route participation on the United Kingdom and northern part of the Continent.

He however, hoped that with the implementation of the new policy, the earnings would be increased roughly to Rs. 600,00,000 annually.

Explaining the new shipping policy of the Government, he said that it envisaged effective and larger participation and modernization of the existing fleet, re-organization of the domestic services and stream-lining of the procedures and practices in the field of shipping.

The policy sought to enhance the current Plan ceiling from Rs. 10.30 crores to Rs. 38 crores so as to permit acquisition of the 35 ships. The policy also envisaged the creation of the National Shipping Corporation with 25 per cent Government shares for handling the liner trade on some of the foreign routes.

Referring to Mercantile Marine Academy, which had been established at Jaldia, near Chittagong, he said the Academy aimed at imparting technical and professional training to 21 nautical and 21 engineering officers and four radio operators of the Pakistan Merchant Navy.

ASIA OUTSIDE ASIA

A. Possibilities Of Water Desalination—UN Survey: Cautious optimism concerning the role of water desalination in assisting water-short areas in developing countries was expressed in a report published on July 17 by United Nations.

Prepared by the UN Department of Economic and Social Affairs, the report, **Water Desalination in Developing Countries**, was to be considered at the current session of the Economic and Social Council in Geneva.

Based on a survey of 43 developing countries and territories carried out during 1961 and 1962, the optimism expressed in the report cited not only the rapid growth in demand for water in water-short areas, but also "the increasing pace of development being experienced in some of the water-short areas in developing countries". The growing industrial and research efforts being undertaken to expand the types and sizes of desalination plants "promise a growing variety of equipment at competitive prices and foreshadows a continuing decline in equipment cost per unit of output". An anticipated increase in the per person income in developing areas would improve the prospects of placing the relatively high cost of desalinated water within the reach of users.

For potentially water-short areas, desalination gives some assurance that fresh water will continue to be available in the future, provided it can be economically justified and provided such areas are within a reasonable distance from the sea or an inland brackish water body.

The survey findings highlighted the fact that there appear to be at least 50 water-short areas in the countries and territories examined, in which technical and economic feasibility studies were warranted to establish whether or not possibilities exist for the economic utilization of desalinated water. However, it was stated that "in most developing countries there is a strong need to undertake an inventory of existing fresh and brackish water reserves in areas with water needs prior to determining what should be the role of desalination within the frame-work of water resources development programme". The installation of a desalination plant prior to a comprehensive inventory may become relatively less important as a water supply source if, subsequently, ground water is discovered in adequate quantities, or water from other areas becomes available.

Present processes of desalination involve either the extraction of fresh water from salty solutions or the removal of salts from water. The former method is by distillation—most widely used at present—while the latter employs electrodialysis or freezing. Other processes are still in an experimental or pilot plant stage.

The survey focused on the provision of fresh water for non-agricultural uses, as desalinated water has not yet proved to be economical for irrigation requiring large quantities of cheap water.

The survey of potential economic applications of desalination was in response to an Economic and Social Council resolution of April 21, 1960 calling for further action in the field of water resources development. Full implementation of the project was made possible by a grant of $75,000 by the Ford Foundation.

Seventy-four countries and territories were invited to co-operate in the survey, and they received copies of a basic questionnaire to be used for each water-short area selected. Staff members of the UN Resources and Transport Division and consultants specially recruited for the purpose undertook field missions to the 43 countries and territories finally selected. These included 14 countries and territories in Africa, 13 in Latin America and the Caribbean, 10 in Asia and the Middle East and 6 in Europe.

The survey has already prompted a number of countries—Argentina, Netherlands Antilles, Saudi Arabia, Tunisia and United Arab Republic—to undertake further investigations and to request UN assistance. In the case of Tunisia, a team of technical assistance experts has already prepared a report on fresh-water problems in Tunisia's southern region and on the economic alternatives to desalination.

The report revealed that fresh-water shortage in the areas surveyed was the principal limiting factor to economic development and that water desalination was thus becoming a useful way, when economically and technically feasible, of improving the possibilities of economic growth. However, the cost of supplying fresh water from a desalination plant was at present considerably higher than that of water supplied from available conventional sources. In the areas surveyed, information was gathered on 61 operating desalination plants with a total daily capacity of some 77,000 cubic metres (one cubic metre equals 264 US gallons). Prices of desalinated water ranged from $0.37 per cubic metre at the plants in Kuwait producing 27,273 cubic metres per day to $9,000 per cubic metre at the relatively small installation in Port Etienne (Mauretania) producing 115 cubic metres per day.

The majority of the desalination plants surveyed commenced production after 1950, and at the end of 1962, 19 new plants with a combined daily capacity of 43,000 cubic metres had been approved or were under construction in Africa (5), in Asia and the Middle East (7), in Latin America and the Caribbean (6) and in Europe (1). The largest new plants are at Curacao (Netherlands Antilles) and Doha (Qatar). Their installed daily capacities are 12,000 and 6,000 cubic metres respectively.

As for the further application of water desalination in developing countries, the report advised that:

(1) In countries where low-cost energy is available, desalination by electro-dialysis, which was electricity-intensive, should be given preference; under other conditions, it was advisable to turn to such processes as freezing or vapour compression distillation;

(2) Distribution facilities for desalinated water should be taken into account, when relevant, in planning new desalination plants;

(3) Governments in developing countries should clearly consider the relationship between desalinated water costs and prices and its possible influences on the efficiency with which the desalinated water is used.

As a result of progress in the last five years, the conversion cost for saline water has been reduced to a range of $.25 to $.34 per cubic metre. These figures, however, refer to large-sized plants in industrialized countries, where electricity is available at very low cost. Further improvement in the three major desalination processes in use today (distillation, electro-dialysis and freezing) will likely occur and, according to the report, new developments may be possible in the solar distillation field. Also, desalination by freezing is expected to lead to substantial reductions in energy requirements; a number of other processes are under investigation at the laboratory stage.

As for the possibility of using electricity produced in nuclear power stations for desalination and of producing steam in a nuclear reactor and using such steam for desalination, the report said: "Nuclear power could be utilized for desalination only if in the modest quantities needed for desalination plants (in under-developed areas), such power could be produced at relatively low cost. However, the cost of power generation by a nuclear plant must be compared to that supplied by a conventional plant. At the present time, conventional generating stations are, in all cases, still producing power at lower cost than nuclear plants of equal size in a given location. And it will be appreciated that there are many uncertainties involved in attempting appraisals of future nuclear power costs in comparison with future conventional power costs. A nuclear reactor to produce steam in competition with a conventional boiler is also a technical possibility. At present, there is no basis to assume that a process steam reactor will produce steam at a lower cost than conventional boilers."

B. Russia Launches "Cosmos XXXVI": Another artificial satellite, *Cosmos XXXVI*, was launched on July 30 by the Soviet Union.

The sputnik carried scientific equipment to continue the exploration of outer space under the programme announced by Tass on March 16, 1962.

Apart from scientific instrumentation, the satellite carried a radio system for accurate measurement of orbital elements; a radio-telemetric system for relaying to the Earth data on the operation of the instruments and scientific equipment.

The equipment installed in the satellite was functioning normally. The incoming information was being processed at the co-ordinating-computing centre.

ASIAN RECORDER

September 30—October 6, 1964

Regd. No. D-727
Vol. X No. 40

ADEN

A. Proposal For Fisheries Harbour: The Economic Intelligence Unit of the South Arabian Federation was commissioned in August to prepare a report on the economic possibilities of the proposed major international fisheries harbour at Aden.

A number of overseas investors are interested in the project, which is designed to meet the varying needs of the fishing industry, from fishermen using simple canoes to large trawlers scouring thousands of miles in search of tuna fish.

The report will assess the importance of Aden's position in relation to the known developments taking place in the Indian Ocean and the Red Sea and Gulf fisheries, especially in relation to the £400,000 UN Fund for Economic Development grant for a two to three-year investigation into the fishery potential of the whole area.

As well as the proposed harbour, a number of schemes are to be implemented to improve the means of marketing fish landed from traditional craft at Aden and neighbouring Federal States. The Co-operative Development and Marketing Department has almost completed the installation of a cold store at Shuqra which will open up wider markets for the fresh fish catch.

In Aden itself, a second cold store and blast freezer are to be installed providing facilities for the production of fish fillets and steaks to compete against the present overseas imports. The Van Camp Sea Food Company is reported to be interested in entering the production field should the report on the exploratory work be favourable.

[Prev. ref. 5795:ADN:B]

AFGHANISTAN

A. Pact Between Pakistan, Iraq And Turkey—Afghan View: A Press despatch on August 30 said that the Istanbul Pact between Pakistan, Iran and Turkey, forged in July at the initiative of Pakistan, was considered by Afghanistan more as a "political show" than a link for economic collaboration.

Afghan Government leaders have unequivocally declared that their country's basic policy is not to join any kind of regional groupings unless they are in line with the United Nations Charter or in the spirit of co-operation between the Afro-Asian group of countries or non-aligned nations.

According to Dr. Farhadi, an Afghan Foreign Office spokesman, Kabul has no intention of joining the Istanbul Pact. In fact, he said, Afghanistan had not been invited to join the alliance.

It is known that Pakistan had made informal overtures to Kabul to enter into the Istanbul agreement, but was politely told that Afghanistan saw no reason to join the group although it was interested in economic co-operation. Kabul sees no room for economic collaboration between Pakistan, Iran and Turkey as their economies are not complementary to each other. They have all joined for different political purposes.

The Pakistan President had in July talked of a united front of Pakistan, Afghanistan, Iran and Turkey to "raise our voices jointly in a world of Great Powers—the Soviet Union, USA, China as well as India because of its 450 million people." But since there was no positive response, they thought it was better to leave political issues and talk of "something harmless to everybody."

Observers in Kabul have also taken note of the fact that the three countries are all members of the Western-sponsored Central Treaty Organization (CENTO); Turkey of NATO and Pakistan of S-EATO. But Afghanistan, like India, recognizes that the alliance cannot further genuine Afro--Asian or world peace causes.

(*The Times of India*, Bombay)

[Prev. ref. 5984:PAK:A]

BURMA

A. Sardar Swaran Singh's Visit: The Indian Minister for External Affairs, Sardar Swaran Singh, arrived in Rangoon on September 2 on a three-day goodwill visit at the invitation of the Revolutionary Government.

He was given a warm reception on arrival. At the airport he said: "This is my first visit to Burma as Foreign Minister. Burma is one of the countries which I thought I should visit in the first round of my travels.

"I bring to the Government and people of Burma warm wishes and friendly greetings of the people and Government of India. Our relations have been friendly and cordial. Since Independence, we have had good neighbourly and friendly ties. Characteristic of this is that there has been no occasion for conflict and strife. There are historical ties binding us. We have contacts in the economic and cultural fields.

"It may be good to recall the Treaty of Friendship signed by our countries in 1951. According to this Treaty, there shall be everlasting peace and unalterable friendship. I hope my visit will further strengthen the cordial relations between our two countries. Our representatives will meet from time to time and as often as occasion requires for exchange of views on matters of common interest."

Talks:

Sardar Swaran Singh went through a packed programme of talks with Burmese leaders and State receptions during his visit.

During his talks with the Burmese counterpart, U Thi Han, he was accompanied by the Indian Ambassador, Mr. R. D. Katari, Mr. C. S. Jha, Commonwealth Secretary, Mr. N. P. Alexander, Deputy Secretary, External Affairs Ministry, and Mr. Eric Gonsalves, First Secretary of the Indian Embassy.

Sardar Swaran Singh said: "We had very cordial and friendly talks on matters of mutual interest to India and Burma."

U Thi Han was assisted by U Soe Tin, Permanent Secretary at the Foreign Office, U Ohn Khin, Foreign Office Executive Secretary, U Ba Chit, Chief of the Political Division, and other officials during the talks.

In the course of his talks, Sardar Swaran Singh was believed to have urged on Burma's representatives the importance India attached to Burma's role in international affairs and the need for Burma's leaders to visit India not only to strengthen the bonds of friendship existing between the two countries but also to further the cause of world peace through policies of peaceful co-existence and non-alignment.

His talks with the Minister for Agriculture, Brigadier Tin Pe and the Health Minister, Colonel Hla Han covered economic matters. The prospect of increasing the trade between the two countries, exchange of research and training facilities and generally bringing the two countries closer in the economic sphere were discussed in detail. The talks will be pursued through diplomatic channels to evolve concrete measures.

The problem of the Indian community affected by Burma's nationalization laws came up for discussion. The issues involved are too many and too complicated to lend themselves to any easy or quick solution.

Joint Communique:

A joint *communique* was issued at the end of Sardar Swaran Singh's visit.

It said: "At the invitation of U Thi Han, Burmese Minister for Foreign Affairs, Sardar Swaran Singh paid a goodwill visit to Burma from September 2 to 5 accompanied by Commonwealth Secretary C. S. Jha and other officials of the Ministry of External Affairs.

"Sardar Swaran Singh called on the Chairman of the Revolutionary Council of the Union of Burma and held talks with U Thi Han, and also with Brig. Tin Pe, Minister for Agriculture and Forests, Supply and Co-operatives, Land Nationalization and Trade Development, and Col. Hla Han, Minister for Education and Health, and Information and Union Culture.

"The talks provided a welcome opportunity for a free and frank exchange of views in an atmosphere of cordiality and mutual understanding on matters of common interest to the two countries as well as on certain international issues affecting peace and security, particularly in Asia.

"The talks between the Ministers of the countries disclosed broad unity and identity of approach on international issues and it was recognized by both sides that periodical exchange of views could help co-ordinate the efforts of the two countries in the cause of peace and friendly relations among nations and would serve to strengthen further the relations between the two countries.

"The two Ministers noted that in the conduct of their foreign relations, both India and Burma are wedded to the principles of equality, mutual respect, non-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

alignment and peaceful co-existence. These and the other principles embodied in the Bandung Declaration would continue to govern the relations between the two countries.

"Sardar Swaran Singh and the Burmese leaders also studied the various problems which have arisen in connexion with the departure of a large number of Indians from Burma and exchanged views on ways of settling these problems. This matter will be pursued further.

"On behalf of the President of India, Sardar Swaran Singh renewed the invitation to the Chairman of the Revolutionary Council of the Union of Burma to visit India at a time convenient to him. Gen. Ne Win re-affirmed his acceptance of the invitation and expressed thanks for it.

"The Minister of External Affairs of India also extended an invitation to U Thi Han to visit India at a time convenient to him. The invitation was accepted and it is hoped that that U Thi Han will be able to visit India in the near future to review the valuable personal contact between the two Governments at ministerial level."

Statement In Indian Parliament:

The plight of Indians in Burma and the visit of Sardar Swaran Singh to Rangoon was the subject of several questions in the Lok Sabha in New Delhi on September 7.

Mr. Hem Barua (P-SP) said despite assurances given to the Foreign Secretary, Mr. Y. D. Gundevia, during his visit to Rangoon some months ago, the hardships of Indians had considerably increased. Mr. Barua wanted to know the outcome of the Foreign Minister's talks with Burmese leaders and also whether he was satisfied that they were prepared to implement the assurances they had previously given.

Sardar Swaran Singh said that he had no doubt that the Burmese Government would implement whatever assurances it had given or might give. But the difficulty was that the arrangements so far agreed upon did not provide much relief to the Indian repatriates. Whatever agreement had already been reached between the two Governments was being given effect to. However, the important question concerning the repatriation of assets of Indians wanting to return to India still remained to be settled.

In reply to supplementaries by Dr. I. M. Singhvi (Ind) and Mr. P. K. Deo (S), Sardar Swaran Singh said it was wrong that Indian nationals in Burma were not being treated in the same manner as other foreign nationals. There had been no discrimination against them. "We should accept the assurances of the Burmese Government which are borne out by circumstances."

Mrs. Tarkeshwari Sinha (C) asked whether it was true that the Burmese Government was encouraging the labour class among the Indians to stay there.

Sardar Swaran Singh replied that this matter had been briefly mentioned in the joint communique on the talks. It had been stated that those Indians or other foreign nationals who were prepared to live in the changed conditions in Burma were welcome to do so. He received assurances from top leaders that their security and dignity would be the responsibility of the Burmese Government. This had a reassuring effect on some Indians in that country.

He made it clear that the trade establishments taken over by the Burmese Government belonged to Indians, Chinese and Pakistanis. The same law was applicable to all irrespective of their nationality. It was wrong that the majority of these establishments belonged to Indian nationals or persons of Indian origin.

Earlier, the Deputy Foreign Minister Mr. Dinesh Singh said that agreement had been reached with the Burmese Government on several questions connected with Indian nationals returning home. The procedures regarding departure formalities had been straightened out and various documents required by foreigners wishing to leave Burma were now being issued to them expeditiously, particularly in case of persons not paying any income-tax.

Several additional flights had been arranged between Calcutta and Rangoon. Three ships were also plying between Rangoon and Madras. Up to September 5, there had been nine sailings to Madras and two to Visakhapatnam. By the first week of December, these ships would have made 28 trips. Further sailings were also envisaged. About 28,755 Indians had left Burma this year.

The Burmese Government had announced that equitable compensation would be paid for property taken over by it. No payment had, however, been made so far. The Indian Embassy in Rangoon had been pursuing the matter.

A scheme for temporary relief and rehabilitation of repatriates had been worked out. The Central Government would meet the major part of the expenditure.

[Prev. ref. 5976:BUR:A]

B. Government Takes Over Newspaper: The Burmese-language newspaper *Mirror*, which was suspended in August, was taken over on September 1 by the Government.

Its premises and equipment are being put under the Ministry of Information, which will operate it as a nationalized newspaper. Arrangements are being made to resume publication soon.

The **Mirror**, regarded as pro-communist, is the first newspaper to be nationalized in Burma. The Government announcement said that publication was suspended 12 days ago because the publisher, U Thaung, had no official permission to act as editor.

U Thaung was taken into protective custody on August 20.

(*The Statesman*, Calcutta)

[Prev. ref. 5807:BUR:A]

CHINA

A. Alleged Claim On Russian Territory: Russia on September 2 accused China of questioning the Soviet Union's rights to more than 1,500,000 square kilometres of its Siberian territory and warned the Chinese leaders that "any attempt to recarve the map of the world" could lead to the most dangerous consequences.

A long editorial article in **Pravda** said that Mr. Mao Tse-tung "is not just claiming this or that part of Soviet territory, but is portraying his claims as part of some general territorial question. We are faced with an openly expansionist programme with far-reaching pretensions".

The **Pravda** article, filling a page was in response to a news conference in Hong Kong at which a group of Japanese socialists had reported on an interview which they had had with Mr. Mao on July 10. This interview was not reported by the official **New China** news agency.

Questioned about his views on the Kurile Islands which Japan ceded to Russia in 1945, Mr. Mao was said to have remarked that "the places occupied by the Soviet Union are too numerous". According to some Asian newspapers he mentioned, among these places, the area north of the Amur river, Outer Mongolia and "parts of Eastern Europe".

Pravda quoted Mr. Mao as saying that China had "not yet called for an account" of the fact that "about 100 years ago the area to the east of Lake Baikal became the territory of Russia and from then on Vladivostok, Khabarovsk, Kamchatka, and other points are the territory of the Soviet Union". The article said that history was full of examples of the emergence and fall of States and the establishment of peoples during which the borders between States changed more than once.

Historic references on borders could prove anything. "For instance, one can prove that England is French territory because she was once the possession of the Duke of Normandy. One can prove on the contrary that France is an English possession because in her turn, during the Hundred Years War, she was nearly completely conquered by the English. With the help of such arguments one can prove that the borders of China pass only along the line of the Great Wall of China, which is less than 100 kilometres from Peking."

Hard words passed between Moscow and Peking last year on the subject of what China calls the "unequal treaties" by which Tsarist Russia—and by succession the Soviet Union—acquired large tracts of Chinese territory. The vehemence of **Pravda**'s reply to Mr. Mao's restatement of his views—which was not even widely reported in the West—may be part of a move to prepare Russian public opinion for a serious deterioration in State relations between the two countries and possibly a rupture of diplomatic relations.

The article anticipated the public reaction in the Soviet Union. "Do those who question the Soviet Union's possession of a territory of more than 1,500,000 square kilometres", it asked, "think how these claims will be taken by Soviet people who have been living and working on this land for several generations and consider it their homeland?"

The article also reflected Soviet indignation at Chinese meddling in the sensitive issue of Sakhalin and the Kuriles, which have bedevilled Soviet-Japanese relations for some years. The curious reference to Eastern Europe—whether it is taken to apply to the Soviet Baltic republics or to excessive Russian influence over its Balkan and Central European allies—is certain to have caused great offence in Moscow.

Pravda said that in 1954 China had published a history textbook which included a map showing Burma, Viet-Nam, Korea, Thailand, Malaya, Nepal, Bhutan and Sikkim as "state territory of China", taken away from her during the opium wars. It said that in the north "the border ran along the Stanovoy mountain range, cutting the maritime territory from the Soviet Union. In the west a part of Kirghiziya, Tadzhikistan and Kazakhstan (up to Lake Balkash) was also included in China. Sakhalin was also shown as Chinese territory.

The claims to Soviet-held territory north of China cover the maritime areas acquired by Russia under the Treaties of Aigun, 1858 and Peking, 1860. In replying last year to Mr. Khrushchev's taunt that they were talking about revolution and liberation elsewhere but in fact tolerating Hong Kong and Macao on the Chinese mainland, the Chinese called these "unequal treaties" among the instruments which they intended to "recognize, abrogate or re-negotiate when conditions are ripe".

Pravda said that if all States followed the Peking recipe for border revision claims, there would be "an inevitable aggravation of international tensions ... fraught with military conflicts". Warning Peking against trying to carve up the map of the world. **Pravda** said that "China has every right to press for the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

liberation and re-unification of Formosa and Hong Kong, which are part of the country and the majority of whose population are Chinese. Such examples are numerous".

It expressed indignation at Mr. Mao's saying that Mongolia was under Soviet rule. Mongolia, it said enjoyed all the rights of an independent State. Referring to Mongolian alignment with Russia in the ideological dispute, it continued: "The existence of an independent Mongolian State, which maintains friendly relations with the Soviet Union and other countries of socialism, does not suit the Chinese leaders. They would like to deprive Mongolia of its independence and make it a Chinese province."

The Chinese, according to **Pravda**, had tried to reach agreement on this when Mr. Khruschev visited Peking in 1954, but he had refused to discuss it, pointing out that only the Mongolian people could decide on their country's destiny.

The article ridiculed what it described as Mr. Mao's new theory of the world divided into a "Soviet-American" zone and an "intermediate" zone including China as well as nearly the whole "capitalist" world outside the United States. Under this theory, it held, General Franco would be welcome in China's ranks and General de Gaulle would become "one of the most active fighters against American imperialism."

Chinese Accusation:

Earlier on August 30, the Chinese Communists in a letter accused the Soviet Union of "actively supporting the United States attempt to intervene in Viet-Nam through the United Nations."

"While you pursue this anti-communist, anti-popular and anti-revolutionary line, how can the Marxist-Leninists reach any agreement or take any common action with you?", they asked.

The letter was the latest in an exchange between the Chinese Communist Party and its Soviet counterpart on the disputed Soviet move to call an international communist conference in mid-1965.

It rejected the Soviet proposal and repeated the Chinese stand for an international meeting "on the basis of Marxism-Leninism, to be held after ample preparation".

It said: "We will never be taken in by your fine words, never submit to your threats, never be accomplices in your divisive activities and never share with you the responsibility for splitting the international communist movement.

"If we were to take part in your schismatic meeting, it would be tantamount to legalizing your illegal activities ... to accepting the Communist Party of the Soviet Union as a patriarchal father party."

The letter said that December 15, 1964, when the Soviet Union is to convene a conference-drafting committee of 26 parties designated by itself, would go down in history as "the day of the great split".

The letter added: "We have already warned you that the day you call a schismatic meeting will be the day you step into your grave.... We hope you will weigh the pros and cons and choose carefully between continuing on the road to doom and turning back to safety."

Border Incidents In Ili Region:

China said on September 3 that the Soviet Union had again been "creating constant border incidents" in the Ili region of Sinkiang, China's far north-western province.

The charges were made in a report to a party congress of Ili and Kazakh peoples in Sinkiang and made public by the New China news agency.

Last year the Chinese communists declared that in 1962 Russians in the Ili region had "enticed and coerced tens of thousands of Chinese citizens into going to the Soviet Union".

The news agency said that deputies of 13 nationalities in the region had condemned "the Khruschev revisionist clique" for its subversive and sabotaging activities in the Ili area. The report added that economic achievements had been made in the course of the struggle against this sabotage, but the Soviet Union had not accepted defeat and was attempting new subversive and sabotage activities.

Since April, the report stated, the Soviet Union had been attacking the Communist Party of China and its leader, Mr. Mao Tse-tung, in broadcasts and in its Press and "distorting the history" of the regions and "trying to poison relations among the various nationalities of this area in order to undermine our national unity."

Mr. Irhali, the chairman of the Ili-Kazakh autonomous administration, was reported as saying: "Still more outrageous is the fact that the Khruschev revisionist clique has been creating constant border incidents and attempting to disrupt our production work in the border area.

"We must enhance our vigilance against the ambitions behind these criminal activities of the Khruschev revisionist clique. We must firmly smash all schemes of sabotage."

The **People's Daily**, in the first detailed comment on the American election campaign, on September 3 carried a long article which accused "modern revisionists"—Mr. Khruschev and his supporters—of supporting President Johnson because they were afraid that the election of Senator Goldwater would "upset all their plans to reach a compromise with United States imperialism or even capitulate to it."

"They are mortally afraid that their painstaking quest for United States-Soviet co-operation to dominate the world will be dashed to the ground. They therefore pile up their stakes on Lyndon Johnson. They go to the extent of giving him a helping hand in his election campaign at the expense of the fundamental interests of the world's people."

The article said that though there might be some apparent differences between the two American parties, this was not actually so. "Those who judge things for what they really are, and not what they seem to be—another obvious dig at Mr. Khruschev—would easily recognize this." The policies of both parties were aimed at turning the tide for American imperialism.

(*The Times*, London and *The Statesman*, Calcutta)

[Prev. ref. 5807:CHI:A]

B. Attack On Party Official: Mr. Yang Hsien-chen, a leading member of the central committee of the Chinese Communist Party and principal of its higher party school, on August 31 came under sharp attack for his opposition to the current dialectical thinking of Mr. Mao Tse-tung.

An article in **Red Flag**, the party theoretical journal, accused him of intentionally meeting the needs of modern revisionists and supporting the bourgeois outlook towards China.

The attack brought to a head a debate which has been raging for several weeks in the Chinese Press on the dialectical point of whether "a whole divides into two" or "two combine into a whole." Mr. Yang Hsien-chen was accused of propagating the latter idea in opposition to the former one which Mr. Mao Tse-tung and other Chinese leaders use as a dialectical basis for their internal and international policies.

Observers said it seemed no coincidence that the attack on Mr. Yang Hsien-chen was on the same day as the letter rejecting the Soviet Party's invitation to attend a preparatory meeting in Moscow in December to prepare for a world communist conference in the middle of 1965 on restoring communist unity. Mr. Yang Hsien-chen is by far the highest Chinese party official to be accused openly of siding with the Russians.

(*The Statesman*, Calcutta)

[Prev. ref. 6003:CHI:A]

C. Peking Symposium: China is to set up a permanent new organization for scientists from Asia, Africa, Latin America and Oceania. Known as the liaison office of the Peking symposium, the new body is seen as a rival to the Moscow dominated World Federation of Scientific Workers.

It is the first such organization with headquarters in Peking. Its founding was announced at the closing session on August 31 of an 11-day Peking symposium attended by more than 300 scientists from countries outside Europe and the United States.

It was also announced that a larger Peking symposium would be held ni 1968 while smaller specialized seminars would be held meanwhile in various member-countries.

More than 10,000 people, including the Foreign Minister, Marshal Chen Yi, attended a day-long closing ceremony in Peking's Parliament building. Foreign correspondents were excluded from all but the formal opening and closing sessions, and were prevented from making contact with delegates.

More than 200 papers, many on political subjects, were read during the the symposium.

(*The Times*, London)

D. Elections To National People's Congress: Mr. Mao Tse-tung, the Communist Party Chairman, and Mr. Chou En-lai, the Prime Minister, were among those unanimously elected to represent Peking as deputies to the new National People's Congress (Parliament).

Mr. Mao, now 70, retained his seat in the Congress when he gave up his position as Head of State in favour of Mr. Liu Shao-chi in 1959. He holds no other post outside the party.

The Peking deputies elected on September 12 numbered 101, compared with 29 in 1959. This was in line with a decision taken last year to increase the membership of the Congress more than two-fold.

The Peking Congress, now ended, was held in private, but according to accounts it dealt mainly with industrial production and intensification of the "socialist education" movement in order "thoroughly to uproot capitalism and revisionism."

INDIA

SUMMARY: Consolidation Of Chinese Position Along Border; Pakistan Violations Of Ceasefire Line; US Credit; Postal Agreements With Nepal.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

A. Consolidation Of Chinese Position Along Sino-Indian Border —Mr. A. M. Thomas' Statement In Lok Sabha: The Minister for Defence Production, Mr. A. M. Thomas, told the Lok Sabha on September 8 that the Chinese had been concentrating their troops and developing communications and airfields all along the Indian border.

"They are consolidating their positions and improving their logistic capacity", he said in response to a calling attention notice by Mr. P. C. Borooah and 13 others.

He added that "we have strengthened our forces and taking all precautions" on the Sikkim side where a Chinese intrusion took place on August 27. It was a fact that a Chinese patrol had intruded into Sikkim, at 6-30 p.m. on August 27, a Chinese patrol of three men was seen 150 yards inside Sikkim.

"The place is about 900 yards north-west of Nathula and about 14 miles north-east of Gangtok. An Indian patrol was sent immediately to investigate and intercept the Chinese patrol, but in the dark the latter withdrew across the border on seeing the Indian patrol. A protest has been lodged with the Chinese Government about this intrusion."

The same evening, about 7-15 p.m. Indian troops at Nathula saw a powerful light on a hill feature in Tibetan territory about 500 yards north of Nathula. A white tent and 90 yaks were seen for the first time on the other side near Nathula.

Some other Chinese activity was also noticed earlier. In June an Indian patrol at Tangkharla (11 miles east-north-east of Chunthang) observed two bunkers and three Chinese soldiers in blue uniform, about a mile away on the other side of the border.

Recently on August 20, one thatched hut, four stone pillars and two bunkers were seen about a mile from the border, about 17 miles east of Gangtok.

India had told China that its latest intrusion into Sikkim was a "calculated violation" of a well-recognized boundary and a projection of the aggressive concentration of troops and military installations by it in the Chumbi Valley.

Protest Notes:

In a protest Note handed to the Chinese Embassy in New Delhi on September 5, the Government of India said that the Chinese military concentration and intrusions across the borders were undoubtedly part of its scheme for keeping up tension along the Sino-Indian boundary.

The Note said: "The Chinese Government is well aware that under the Anglo-Chinese Convention of 1890 between Great Britain, acting for the Government of India and China, the boundary between Sikkim and Tibet was clearly recognized by both sides.

"The Government of the People's Republic of China, in various Notes exchanged with the Government of India, has also recognized this position.

Mr. Prakash Vir Shastri (Ind) complained that there was a discrepancy in Mr. Thomas' statement. While stating that the place of intrusion was 14 miles north-east of Gangtok, the Minister said the Chinese penetrated only 150 yards inside Sikkim, whereas it must have been actually about 23 miles.

Mr. Thomas explained that there was no discrepancy. The Chinese had intruded from the Chumbi Valley which was a southward projection into the Sikkim region.

The Speaker also observed that the place concerned could be on another side of the border where the distance from Gangtok might not be the same as Mr. Shastri had apparently in mind.

Mr. Hem Barua (SSP) referred to the Chinese attitude that according to them Bhutan and Sikkim were sovereign States and they would not acknowledge India's special relations with those States. This could be a fore-warning to an attack by the Chinese. Mr. Barua wanted to know whether the Government could assure the House that any attack on Sikkim would be treated as an attack on India.

Mr. Thomas replied that it was India's responsibility and a protest had been lodged with the Chinese against the recent intrusion.

One of three Notes placed on the table of the Lok Sabha on behalf of the Minister of External Affairs on September 8 related to the Chinese intrusion into Sikkim.

In lodging a strong protest against the Chinese action, the Government of India pointed out: "The Chinese Government is well aware that under the Anglo-Chinese Convention of 1890, between Great Britain, acting for the Government of India and China the boundary between Sikkim and Tibet was clearly recognized by both sides. The Government of the People's Republic of China, in various Notes exchanged with the Government of India, has also recognized this position. The latest Chinese intrusion into Sikkim is, therefore, a calculated violation of a well-recognized boundary and a projection of the aggressive concentration of troops and military installations by China in the Chumbi Valley. In the context of the Chinese Government's negative and intransigent attitude towards the Colombo proposals and other constructive suggestions made by India for a peaceful and honourable settlement of the border problem, these military concentrations, and intrusions across the border are undoubtedly part of China's scheme for keeping up the tension along the Sino-Indian boundary. The Government of India hereby lodges a strong protest against this intrusion into the Sikkim State and ask the Government of China to desist from such aggressive activities."

The second Note dated September 5, was in reply to a Chinese Note of July 7 in which Peking had alleged trespass by Indian troops.

The Indian reply said the Chinese Government was fully aware that although the Government of India had at no stage accepted the Chinese version of the so-called "line of actual control", it had exercised supreme self-restraint and not sent any Indian troops across that line, even though the international frontier in the western sector of the India-China border lay far to the east of that line. "In these circumstances, it is fantastic that the Chinese Government should have alleged intrusions by Indian troops across Nathula. The Chinese Government is fully aware that the India-China boundary in this sector is not only well-defined but has been actually demarcated on the ground."

It was ironic that China should accuse India of expansionist ambitions, when China openly preached violence, revolution and the overthrow of established Governments in Asia, Africa and other parts of the world, and when China continued to occupy by force, 14,500 square miles of Indian territory in the Ladakh region. "The expansionist nature of the Chinese Government itself is further demonstrated by the fact that many of the places, where the so-called violations by Indian aircraft are alleged to have taken place in the Chinese Note, are in acknowledged Indian territory.

"In the light of the above facts, it is obvious that the Chinese Government has made the false allegations in its Note of July 7, 1964, merely to serve the ends of its anti-Indian propaganda and to heighten the tension on the India-China border. This is confirmed by the veiled threat introduced in paragraph 5 of the Note, that the Chinese Government hopes that the Indian side will change its course, stop its intrusions.... so as to keep the Sino-Indian border situation [illegible]. It is clear that the Chinese Government has fabricated these so-called Indian 'intrusions' solely for the purpose of stepping up more and more tension on the border."

The third was the Chinese Note containing allegations of intrusions by Indian troops and aircraft.

Meanwhile, according to official information, the Chinese have constructed a net-work of roads in the area bordering India and have connected all the seven posts which they have established in the usurped territory in Ladakh.

The Chinese are also building a major railway line between Peking and Lhasa which is nearing completion and is expected to be opened early in 1966.

The Aksaichin road which has been widened and linked to the main road which starts from beyond Poch'e in Sinkiang goes right up to Kaehrmul in Shanghai province.

The Aksaichin is one of its offshoots and turns from Pishan (Guma). This diversion now comes right through Bazar Dara, spans the Valleys of Chip Chap and Galwan and connects Rudok in Tibet.

This road, more than 2,000 miles long passes through Thog Jalung (Chalum) and Ed Dzong and connected the hinterland of China.

The highway passing through Rudok is connected by another road which extends right up to Demchok, forcibly occupied by China in 1962. This road then turns back and joins Thog Jalung to merge with the main road passing through Tibet.

Feeders have been built to link the seven Chinese posts in Ladakh—Shensenwian, Tienwentian, Hot Springs, Kongka Pass, Nyagzu Pass, Kurnak Fort and Spanggur.

Connecting the horizontal highway passing through Tibet is a vertical road constructed from Dagtse Tsha which passes through Lingakok, bridges Brahmaputra and connects Shigatse, which has already a road up to Gyangtse and goes further along the borders of Sikkim and Bhutan.

From Lhasa to Chonggye Dzong exists a road which passes through Tseethang. This has now been extended to Thimbu on the Sikkim border, ending near Chumbi Thang. The road passes through Dhama Dzong and skirts Bhutan.

A road between Lhasa and Nagchhu Dzong has been in existence. It has now been connected with Huang Chung, a distance of more than 1,000 miles, and goes right up to Peking. Another road from Huang Chung has been connected with Yushu and extended to Tibet.

China is also working on several other roads through the most difficult terrain in the world to open Tibet, Sinkiang and Yunnan. Gorges between 8,000 and 10,000 feet deep are being bridged. The Chinese are said to be using a version of the World War II "Bailey Bridge" which can be thrown across a canyon while putting up the support at the same time.

A 76-mile-road is also being built from the Tibetan border to Khatmandu. It is expected to be completed some time in 1965.

The Hunza-Sinkiang trading route between Pakistan and China is to be opened soon. The two countries have reached an understanding on this. The route was closed in 1958. The re-opening coincides with the completion of Pakistan's first all-weather link with the northernmost outposts, Gilgit and Hunza, at the Chinese border.

Mr. Lal Bahadur Shastri's Letter To Mrs. S. Bandaranaike:

Meanwhile, the Prime Minister, Mr. Lal Bahadur Shastri, has replied to the recent communication from the Ceylon Prime Minister, Mrs. Sirimavo Bandaranaike.

In his letter, Mr. Shastri was reported to have said that India had been approached more than once to find out whether

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

she would be willing to start negotiations on the border dispute if China were to vacate the seven posts in Ladakh. But no effort had been made to ascertain Peking's mind.

From the reports emanating from Peking, it was clear that China had no intension to withdraw from the posts it had established in the demilitarized zone in Ladakh. Mr. Shastri also quoted the despatch of the New China News Agency, which said on August 30: "There is no reason whatsoever for the Indian Government to ask China to withdraw its civilian posts".

He pointed out to Mrs. Bandaranaike that he at least was not aware of any evidence to support Ceylon's belief that China might be willing to vacate the posts. He has, however, assured that the vacation of seven posts would be considered a substantial fulfilment of the Colombo proposals. But he emphasized that the Peking Government should have "a proper approach" in the matter.

In her communication Mrs. Bandaranaike had asked Mr. Shastri if she could take up with Peking the question of China's vacating the seven posts.

India's policy has been enunciated again and again, and it has been said that China must accept the Colombo proposals in toto without any preconditions to enable New Delhi to go to the negotiating table.

(*The Statesman* and *The Times of India*, New Delhi)

[Prev. ref. 5989:INI:A]

B. Commonwealth Premiers' Conference—Mr. Lal Bahadur Shastri's Statement In Parliament: The Prime Minister, Mr. Lal Bahadur Shastri said in both Houses of Parliament on September 7 that India could not accept the view that the Commonwealth Prime Ministers' Conference should be used as a forum to discuss differences between member-countries.

He made this categorical statement in reply to questions when proceedings in both Houses were interrupted to enable him to make an identical statement on the reference to Indo-Pakistan differences in the London Conference communique.

The reference, he felt, should not be construed as a violation of the convention that inter-Commonwealth disputes should not be discussed at the Conference. He was convinced that it was merely a "general expression of goodwill."

India had publicly expressed her desire for the peaceful settlement of differences with Pakistan in a manner consistent with her honour and dignity. This had been misunderstood in India and misrepresented in certain quarters abroad and "we firmly and categorically repudiate the suggestion contained in such misunderstandings and misrepresentations."

He faced several sharp questions after he had read his statement, particularly on the failure of India's representatives to enlist the support of Commonwealth countries on the Sino-Indian dispute and their "submission" to Pakistan's demand for the reference of her differences with India in the communique.

He defended both Mr. T. T. Krishnamachari and Mrs. Indira Gandhi, saying they had worked jointly and well; their work had been commended by the Prime Ministers present at the Conference.

He said Mr. Krishnamachari had made a "categorical reference" to the India-China dispute in his opening speech and later discussed it at informal meetings with the heads of Government present in London.

But he admitted that the matter was not raised at the Conference table as such. He thought that such an issue could not be discussed there, nor would anything have been achieved had it been raised there.

In reply to a question on whether the reference to Indo-Pakistan differences had been mentioned for the first time he felt there had been no departure from past practice.

But he took the opportunity to point out that the "character of the Conference has changed" because of the admission of new members to the Commonwealth. The new members, he said, were "more active" and wanted subjects discussed that had not been taken up before.

He also made it clear that no specific reference to Kashmir had been made in the Conference and there was no question of India accepting any mediation or the good offices of any third party on the matter.

(*The Statesman*, New Delhi)

[Prev. ref. 6010:AOA:A]

C. Pakistani Violations Of Cease-fire Line In Jammu And Kashmir—Statements In Parliament: The Prime Minister, Mr. Lal Bahadur Shastri assured both Congress and Opposition members in the Lok Sabha on September 7 that Indian troops had been dealing with increasing Pakistani violations of the cease-fire line in Jammu and Kashmir in an effective manner. "We have been very effective in dealing with them during the last few months."

Mr. Nath Pai (SSP) referred to Mr. Shastri's statement the previous day at a meeting of the Congress Parliamentary Party that President Ayub Khan had adopted a "constructive" attitude on Indo-Pakistan problems and asked how it could be reconciled with the increased cease-fire violations by Pakistan.

Mr. Shastri said that the Pakistan President wanted these violations and conflicts to stop. He was keen that representatives of the two countries should sit down and try to settle all their disputes. The violation of the cease-fire line would be one of the subjects for discussion at these talks.

Earlier, Mr. A. M. Thomas, Minister for Defence Production, said that there had been 426 cease-fire line incidents from June 1 to August 29. Twenty-two Indians were killed and 32 wounded during this period. The Government had lodged several protests with Pakistan. Cases of serious violations had been brought to the notice of the Security Council. He referred to the recent letter written to the Security Council President by India's Permanent Representative at UN.

He shared the concern of the members and said every effort was being made to stop them.

He confirmed that a number of Pakistani "irregulars" in military uniforms were operating along the cease-fire line.

Asked about the origin of the arms and ammunitions captured from Pakistani intruders during these incidents, he said most of these belonged to the pre-Partition period. There was no evidence to show that they were US arms.

In reply to another supplementary, Mr. Lal Bahadur Shastri said that the Government was in favour of supplying arms to people living in border areas in Kashmir. Any step in this matter would have to be taken after consulting the Kashmir Government.

He denied that incidents occurred more in the areas held by the Jammu and Kashmir Militia.

In reply to another question, he said the Centre would consult the Jammu and Kashmir Government on the question of supplying weapons to the border population to protect themselves against attacks.

Mr. Thomas told the House that Indian forces had been able to inflict a number of casualties on the intruders. A number of Pakistani irregulars like the Razakars and Mujahids were also operating on the cease-fire line and many incursions were made by them.

The question on the cease-fire violations was tabled by Mr. Surendra Pal Singh and 44 other members.

(*The Times of India*, New Delhi)

[Prev. ref. 5989:INI:B]

D. Economic Co-operation With Saudi Arabia: India and Saudi Arabia have agreed to set up a joint commission to work out proposals for greater trade and economic co-operation between the two countries.

The accord was reached at the talks between the Central Minister for Commerce, Mr. Manubhai Shah, and Mr. Abid Sheikh, the Saudi Arabian Minister for Commerce and Industry.

Mr. Sheikh, who arrived in New Delhi on September 1 at the invitation of the Government of India, had prolonged talks with Mr. Manubhai Shah.

In a statement issued on September 4 at the end of their talks, the two Ministers stated that the proposed joint commission should meet every six months alternatively in Jeddah and New Delhi to review the progress of the proposals in the field of trade and economic co-operation.

The two Ministers discussed the scope and possibility of Indian entrepreneurs participating in the industrial development of Saudi Arabia.

It was considered that Indian participation could take the form of project surveys, supply of raw materials and components, provision of technical 'know-how' and the supply of machinery.

For this purpose, visits of technical experts and businessmen would be facilitated and encouraged by the two Governments.

Mr. Shah suggested at the talks that there was a good field for investment of Saudi Arabian capital in Indian undertakings and for this purpose talks with the Saudi Arabian investment institutions in respect of specific schemes could be undertaken.

He also offered technical assistance for the establishment of industrial estates by the Government of Saudi Arabia. India could supply the technical 'know-how' and equipment required for such industrial estates.

Mr. Sheikh told Mr. Shah that Indian businessmen and Indian organizations were welcome to export their goods to Saudi Arabia through existing importing and trading firms in Saudi Arabia.

He invited the Indian Government to expand its trade centre in Jeddah to include more manufactured goods from India.

It was suggested that India should buy some sulphur from the Saudi Petroleum and Minerals Organization. Mr. Shah said he would explore such a possibility and expressed the hope that it would be possible for the Saudi Petroleum and Minerals Organization and other Saudi Government agencies to buy some of their requirements from India.

(*The Times of India*, New Delhi)

[Prev. ref. 1986:INI:E]

E. US Credit: The US Government announced on August 25 the signing of a $25,000,000 line of credit in favour of the Government of India. The credit was extended by the US Export-Import Bank.

The proceeds of the credit will be used to finance the purchase of American capi-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tal equipment and services required by the public or private sectors engaged in development programmes and projects within India.

Three earlier credits for similar purposes had been authorized by the Bank in favour of India for a total of $225,000,000. These credits also financed capital goods such as mining and construction equipment, transportation and earth-moving equipment, communications equipment and machinery for the textile, aluminium, chemical and automobile industries.

The Loan Agreement, signed on August 25, is repayable over a period of 12 years commencing in 1967 and bears interest at 5½ per cent.

The Export-Import Bank announced in Washington on September 2 a $6,825,000 loan to Central Pulp Mills Limited, Poona, to assist in the establishment of a bamboo pulp mill at Fort Songad, 150 miles north of Bombay.

Central Pulp Mills was created in 1960 by five of India's older and more successful paper makers. Initial capacity of the new bamboo pulp mill will be 24,800 tons annually, to be increased to 33,000 tons in the seventh year of operations.

The new mill will supply the long fibre essential to newsprint manufacturers for blending with their main short-fibre raw material. It will also be used in manufacturing writing paper.

Central Pulp Mills will repay the loan over eight years beginning 1967. The interest rate is 5½ per cent.

Also on September 2, the Export-Import Bank authorized a loan of $2,100,000 to the Mysore Acetate and Chemical Company of Bangalore, to purchase American equipment and services for the construction of a cellulose plant.

The proposed $8,700,000 plant, to be located near raw material sources of cotton, acetic acid, and anhydride at Mandya near Bangalore, is expected to produce India's first cellulose acetate at an annual rate of some 3,300 metric tons. The product is used in film manufacture and as a moulding compound.

The loan carries interest at 5½ per cent and is repayable over a period of eight years.

(*USIS*, New Delhi)

[Prev. ref. 6005:INI:C]

F. Scientific Collaboration With UAR—Agreement Signed: India and UAR signed in New Delhi on September 7 an Agreement for close collaboration in the fields of science and technology.

Mr. M. C. Chagla, Central Education Minister, and Mr. Ahmed Riad Turki, UAR Minister of Scientific Research, signed the Agreement. It provides for exchange of scientists and technologists, grant of fellowships to scientists and advanced students of technology, import and export of scientific equipment, and exchange of literature and publications between scientific documentation centres, libraries and museums in India and UAR.

A joint scientific board, which will meet once a year, will formulate the general policy of scientific and technical co-operation, draft plans, study current programmes and review implementation. Ministers in charge of science of the two countries will be presidents of the board in alternate years.

The UAR proposes to send research workers for training in CSIR laboratories, while the CSIR may send some senior scientists to work in UAR research centres in chemical engineering, aeronautics (wind tunnels), electronic engineers and experimental medicine for periods of three months.

The Agreement is a supplement to the Indo-UAR Cultural Agreement of 1958.

Mr. Turki said after the signing ceremony he was certain that UAR would benefit very much from such collaboration.

Mr. Chagla referred to the "cordial and most intimate" relations between the two countries and said that the late Mr. Nehru and President Nasser were great personal friends. "I feel this agreement emphasizes and underlines our close relations".

G. Postal Agreements With Nepal: Three Postal Agreements relating to the exchange of letters, insured mail and parcels between India and Nepal were signed in New Delhi on September 1.

The Agreements will come into force on April 13, 1965, after ratification by the two Governments.

Mr. Maheshwar Dayal, a member of the Posts and Telegraphs Board, and the Nepalese Ambassador, Mr. Yadunath Khanal, signed the Agreements on behalf of their respective Governments.

Mr. Khanal expressed his country's thanks to India for providing postal services to the people of Nepal.

Mr. Dayal said that the Indian Posts and Telegraphs Department would deem it a great privilege to assist Nepal in the development of her postal services.

Before April, 1959, when the provisions of the Universal Postal Convention were applied to Nepal, postal services between India and Nepal were regulated by a bilateral agreement of 1936, which provided for the exchange of only unregistered letters between the two countries.

Since 1959 Nepal has developed her own international letter post service. Other services like insurance and parcel facilities were provided for Nepali citizens by the Indian Embassy post office in Khatmandu.

I. Cease-fire In Nagaland Comes Into Force: "Thanksgiving Day" was observed throughout Nagaland and Manipur on September 6, marking the suspension of operations in Nagaland and in the disturbed areas of Manipur State, following the truce agreement concluded between the Government and the underground Nagas (see page 6029) which came into effect at midnight on September 5.

In Kohima, the Capital of Nagaland, solemn thanksgiving prayers were held at midnight in all churches and public congregations.

The people of Kohima woke up to the pealing of church bells and the singing of prayer songs in rhythmic refrain. Popular enthusiasm was at its peak everywhere and the people danced in the streets for joy.

Reports of similar celebrations have come from all over the State. No incidents were reported since the coming into force of the truce.

The day was hailed by a Peace Mission spokesman as a new dawn in the history of Nagaland.

He said that the turbulent atmosphere of disorder and armed clashes which had lasted more than a decade in the State had now given place to a new spirit of calm and freedom from tension. It should now be possible for both sides, he said, to move about freely and to hold necessary consultations in an effort to bring about lasting peace to the State.

Under the terms of the truce agreement, the present cease-fire will be in force for one month initially. The main purpose of the suspension of operations is to bring the underground leaders to a conference table to facilitate peace talks.

In Shillong, Assam, a united Naga devotional service was held at Linam Hall to celebrate the cease-fire.

Addressing the congregation, Mr. Vishnu Sahay, Governor of Assam and Nagaland, said the cessation of hostilities had brought great relief not only to the people of Nagaland but all over India. He hoped that anxieties, miseries and sufferings of the people would be over now.

He said that the late Prime Minister, Mr. Nehru, was anxious for a solution of the problems of the Naga people.

He emphasized the need for mutual understanding. The problem should be solved in a realistic and practical manner.

He paid warm tributes to members of the Peace Mission and the Baptist Church Council leaders for their tireless work to restore normalcy.

Messages:

The President, Dr. S. Radhakrishnan and the Prime Minister, Mr. Lal Bahadur Shastri hailed the suspension of the operations in Nagaland and expressed the hope that a solution to the State's problems would emerge at the forthcoming talks between representatives of the Central Government and the Nagas.

Mr. Shastri commended the "valiant efforts" of the Peace Mission, which led to the cease-fire agreement. He said peace would be "the first condition which would help us to take up other activities in order to develop Nagaland into a prosperous area."

The following is the text of Dr. Radhakrishnan's message:

"Today is a happy day for the people of Nagaland as well as for the people in the rest of India. After years of disturbances and unrest, peace will be returning to Nagaland. This day, I hope, marks the beginning of an era of firm reconciliation so that the Nagas will be able to devote themselves to the development of their State. I send my best wishes for a happy future of the Naga people."

Mr. Shastri in his message said:

"No one has felt happy about the existing situation in Nagaland. There have been clashes and conflicts and the people in general have suffered. The Government of India some time back decided to give Nagaland the fullest opportunity for self-government. The State of Nagaland has been established and a Government has also been formed responsible to the people of the State. In spite of this there has not been peace in Nagaland. There is, however, no doubt, that almost all the people are keen to restore peace and normal conditions in that State. I am glad that efforts have been made in that direction and the 6th of September will surely be a happy day for the people who live in Nagaland.

"We are grateful to the members of the Peace Mission for their valiant efforts. It is my sincere hope that a practical solution may evolve from the talks that are about to take place which would undoubtedly bring real happiness and solace to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the people of Nagaland. Peace will be the first condition which will help us to take up other activities in order to develop Nagaland into a prosperous area. May the efforts of all these friends result in the fulfilment of the hopes and aspirations of the people of Nagaland and of the rest of India."

Mr. Lal Bahadur Shastri's Statement In Parliament:

Doubts and apprehensions expressed by some Opposition members that Naga hostiles might import arms from Pakistan and China and send persons for training abroad during the truce period were removed by the Prime Minister, Mr. Lal Bahadur Shastri, while answering several interpellations in the Lok Sabha on September 7.

Mr. Shastri said that Naga underground leaders had been told in clear and unambiguous terms that they could not import any arms during this period. They had given an assurance to this effect and he hoped they would abide by it.

Asked by Mr. Indrajit Gupta (Com) why this assurance had not been recorded, Mr. Shastri said this was not necessary. Nagaland was a part of the Indian Union and it must be taken for granted that Nagas could not go to any other country for training or for arms. Only then the proposed peace talks between the Government and the underground leaders could take place.

Answering other questions, he said that most of the underground leaders had agreed to the terms laid down by the Government. But there might still be some small groups who might continue to create trouble. The Government would face them squarely. But he was confident that there would be no trouble during the talks.

He urged members to be patient as this was a delicate matter. They must see that the talks proved fruitful.

He informed Mr. Prakash Vir Shastri (Ind) that there were no foreign missionaries in Nagaland. The present peace efforts had been initiated by Indian missionaries whose role had been extremely helpful.

Mrs. Lakshmi Menon, Minister of State for External Affairs, laid on the table a statement containing the terms and conditions for suspension of operations in Nagaland.

To a question by Mr. Yash Pal Singh (S) as to why Rev. Michael Scott had been allowed to visit Nagaland, Mrs. Menon replied he was permitted to go there because the Nagaland Government was convinced of his bona fides.

[Prev. ref. 6004:INI:B]

J. Progress Of Oil Exploration: At a news conference in New Delhi on September 4, the Minister for Oil and Chemicals, Mr. Humayun Kabir, disclosed that exploration during the last six or seven months had indicated "some more oil reserves".

He did not mention the areas where these signs had been noticed, but promised more definite information in the next two to three weeks.

In two of these areas, he said, the reserves might approach what "we have found already" in Assam and Gujerat. Assam at present produced over 1 million tons and Gujerat a little less than 1 million tons of crude, although the capacity of each was 3 to 3.5 million tons.

Because of these developments, he was confident that the Third Five-Year Plan target for crude production—6 to 7 million tons annually—would be reached.

He reviewed the progress of exploration, expansion of refining capacity, and the distribution machinery for indigenous products and explained the tentative targets for the next Plan, including the ambitious programme for the development of petro-chemical industries. He claimed the progress of the industry had been steady.

He said the Government proposed to set up "at least one more, if not two" refineries in the Fourth Plan, when the capacity of the existing units might also be expanded. All these issues would be considered after work had started on the Madras and Haldia projects.

A vital consideration in this connexion would be the rate of increase in the consumption of petroleum products. Since December, 1962 there had been a slight fall in the rate—from 10 per cent to 8 per cent annually. But "my feeling is", he said, the figure would go up again. He attributed this drop partly to the fact that a large number of vehicles which had been commandeered in the wake of the Emergency were not being used.

He refused, however, to be drawn into a discussion again on the claim of the former Oil Minister, Mr. K. D. Malaviya, that India need not expand its refinery capacity immediately.

He re-iterated the Government's policy in regard to the setting up of new refineries and petro-chemical industries. All new refineries in future would be in the public sector. So would be naphtha crackers.

As regards intermediates and end products of petro-chemical complexes, besides the Gujerat and Bombay units the Government would reserve the right to participate wholly or as a major partner wherever it was strategically important or exceptionally profitable.

Broadly, he explained the Government's policy by saying that every new refinery in future would have as its adjunct a group of industries to utilize its by-products. Also more attention would be given to the use of gas.

Henceforward, he added, great emphasis would be laid on developing local technical 'know-how' for the purpose of both project designing and production. A specialized agency had recently been created to design refineries. The question of having a similar set-up for chemical industries was being considered.

He admitted that there would be a shortfall so far as the Third Plan target for fertilizer production was concerned. But he hoped to fulfil it by 1968 and gave an assurance that no efforts would be spared to achieve the Fourth Plan target for nitrogenous fertilizers—2 million tons.

He said the Fourth Plan target for production of crude had tentatively been fixed at 14 million tons and hoped it would be met. He estimated that by 1971 the consumption of crude would go up to 30 million tons.

His estimate of expenditure likely to be incurred during the next Plan period on exploration was Rs. 225 crores of which about 50 per cent would be in foreign exchange. The Government had asked for Soviet assistance of Rs. 50 crores on this account.

Petro-chemical industries proposed for the Fourth Plan would cost Rs. 600 to Rs. 800 crores, over 50 per cent of this being in foreign exchange. Asked if he would be able to get sufficient funds for all these projects, he remarked: "I think I will."

Asked how many of his Ministry's schemes were likely to be effected by the Prime Minister's plea for economy, he said the criteria laid down by Mr. Lal Bahadur Shastri could not apply to fertilizer or refinery projects. "Most of the industries under me are basic industries and would yield high profits."

[Prev. ref. 5861:INI:N]

K. Flood Havoc: According to a detailed statement placed on the table of the Lok Sabha on September 7 by the Central Minister for Irrigation and Power, Dr. K. L. Rao, unprecedented floods caused by the erratic pattern of the Monsoon this year had so far affected 55,00,000 acres involving a population of 5.8 million.

The statement said that 24,00,000 acres of standing crop valued at Rs. 20 crores had been damaged. More than 73,000 houses had been washed away or destroyed involving a loss of over Rs. 32,00,000.

The statement said that 65 people and 894 head of cattle had lost their lives. The damage to public utilities was estimated at Rs. 8,00,000. The badly affected States were Assam, Bihar, Punjab, Rajasthan, Delhi, UP and West Bengal.

The statement observed that the pattern of rainfall this year had been different from the conventional pattern. There was more rain in the plains than in the hills and much of the rain was continuous thus causing unusually heavy floods, especially in the smaller rivers.

The statement said tha Rs. 1 crore had already been given to Rajasthan for flood relief work and Rs. 1,15,000 to other States from the Prime Minister's National Relief Fund.

In Assam, the floods had affected all parts of the State causing extensive damage to property and crops. The statement noted that the embankments constructed in Assam in the past had proved to be extremely useful in checking floods.

In Bihar, the major rivers (Kosi and Gandak) had not given any trouble although much money had to be spent to protect the Kosi embankments. An intensive study had to be made of the flood havoc that had occurred in North Bihar this year to find out how such small rivers had created so much damage. It had to be examined whether dredging of the beds of these rivers was necessary. A detailed and thorough technical study would be undertaken shortly to deal with the problem.

Punjab had experienced floods of high intensity owing to excessive rainfall. The damage to crops and property had been considerable and a larger number of villages in some of the areas had been "very badly affected".

INDONESIA

A. Text Of Dutch-Indonesian Communique: The Dutch Foreign Minister, Dr. Joseph Luns, visited Indonesia from July 25 to August 2. (A brief account of the visit appeared on page 5993).

Dr. Luns in his talks with the Foreign Minister, Dr. R. Subandrio, and other Indonesian leaders agreed that both their Governments should post Ambassadors accredited to each other.

A joint communique was signed after five days of negotiations on August 1 by Dr. Luns and Dr. Subandrio.

The following is the text of the communique:

"The talks, which were conducted in an atmosphere of utmost cordiality, were designed to give further substance to the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

present relations between the two countries in order to promote the normalization of these relations and to establish a new basis for a continuous and mutually advantageous growth thereof.

"To this end, the two Foreign Ministers explored a range of related subjects. In conformity with the Agreement reached on April 3, 1964, the Ministers have agreed that both Governments will submit soon a request for an agreement for their respective Ambassadors. The Netherlands Foreign Minister informed his Indonesian colleague that, with the concurrence of the Government of Surinam, the exequatur for a Consul-in-charge of the Indonesian Consulate-General in Paramaribo will be issued soon.

"At the request of the Netherlands Government, the Indonesian Foreign Minister expressed his Government's consent to conclude a War Graves Agreement.

"Both Foreign Ministers noted with satisfaction that the Mixed Commission referred to in Article XXII, Section of the West Irian Agreement of August 5, 1962, has been set up and has commenced its work.

"On the question of repatriation of Indonesians from the Moluccas at present living in the Netherlands and wishing to return to Indonesia, the Foreign Minister of Indonesia informed his colleague from the Netherlands, that, as requested by the Netherlands, the necessary time schedules and related procedures for a regular repatriation are being prepared and will be duly communicated to the Netherlands Government.

"Extensive discussions took place on the immediate implementation of the Technical Co-operation Agreement of April 3, 1964, after its ratification, on the basis of requests submitted to send experts. Pursuant to these requests the Netherlands is prepared to send experts, receive trainees and finance bilateral projects. Indonesia on its part agrees to send Indonesian guest-professors to the Netherlands, and receive Netherlands scholars in Indonesia for specialized studies.

"In pursuance of the agreement reached during the visit of Minister Subandrio at The Hague, the two Ministers started the discussion about the pending financial problems.

"The decision has been reached that shortly the exchange of views will be continued in a Joint Committee. The task of this Committee will be to study the relevant facts and data and to prepare a definitive settlement. It was confirmed that as soon as possible still existing discriminations in the financial and economic relations between the two countries will be discontinued on both sides. This will also open the possibility of furthering the economic co-operation.

"Further talks on a technical level will be held between representatives of the two Governments in September next.

"In order to review the development of relations and to discuss subjects of mutual interest, the Ministers deem it desirable to have another meeting in the course of next year."

(*Information Service Indonesia*)

[Prev. ref. 5993:IND:B]

ISRAEL

A. Status Of Indian Jews—Knesset Passes Resolution: Meeting in a special session on August 17, the Knesset (Parliament) voted in support of a Government resolution calling on the Chief Rabbinate to find a way of removing the causes of any feeling of discrimination among the Benei Israel (Community of Indian Jews).

The vote on the resolution, presented by the coalition parties, Mapai, NRP and Ahdut Ha'avoda, was 43 to 2, with 30 abstentions. Agudat Israel voted against and the other opposition parties abstained.

The resolution affirmed that the Knesset views the Benei Israel as "Jews in all respects, without qualification and with the same rights as all other Jews, including matters of personal status."

It also called on the Benei Israel to take the Knesset decision into account and end their strike.

A Herut resolution calling for cancellation of the Chief Rabbinate's directive and condemning attempts to besmirch the Rabbinate was defeated 11 to 44. The Liberals, Mapam, and the Communists submitted identically worded—but separate—resolutions calling for nullification of the directive.

The vote followed a three-hour debate on the statement by the Premier, Mr. L. Eshkol, in which he began by outlining the Government's decisions:

(1) The Benei Israel are Jews in all respects, without any limiting qualifications.

(2) Both the Minister of Religious Affairs and the Rabbinate have repeatedly declared that the Benei Israel are authorized to marry other Jews; in all the investigations into individual applications no reason has ever been found to ban such a marriage.

(3) The Benei Israel and a large section of the public are no longer willing to accept the discrimination involved in the directives, and this creates a public problem that demands consideration.

(4) It has become necessary for the Rabbinate to consider the public opinion in this matter and seek a way out of the difficulties.

(5) The Government expresses sharp criticism of the irresponsible and objectionable aspects of the demonstration held by the Benei Israel.

He recalled the history of the Benei Israel, with whom contact was first renewed in India about 200 years ago. Questions concerning marriage with the Benei Israel first arose in connexion with the arrival in India of members of the Iraqi community, but after some decades of debate, both the late Chief Rabbis Herzog and Uzziel had ruled that marriages between members of this community and all others were perfectly acceptable.

Following some cases in which rabbis had refused to carry out such marriages the Chief Rabbinate Council had studied the question and decided that there was no reason to forbid the marriages. Chief Rabbi Nissim was authorized to circulate this ruling, together with explanations and instructions to the officiating rabbis.

While there were no further difficulties concerning individual marriages, the public effect of the directives was not satisfactory. The Benei Israel claimed that if their position was that of all other communities, no special instructions were in place concerning investigations. The point particularly objected to was that these investigations were to be carried out only where a member of the Benei Israel wished to marry a member of another community; the rabbis thus were not concerned with what happened inside the Benei Israel community itself. This differentiation was not contained in the decisions of the Chief Rabbinate Council which had authorized Rabbi Nissim to send his instructions to the officiating rabbis.

Mr. Eshkol emphasized that the Rabbinate had been entrusted by the State with sole authority in matters of Jewish marriages, but with this went the obligation to make it possible for the people to live their lives and for immigrants to come. This concerned not only the Benei Israel, but others who might come later and had perhaps also lived for a period under conditions in which it had not been possible to observe halacha. The religious leaders must find a solution in keeping with the nation's needs, as the leaders of Israel had done in all generations.

(*Jerusalem Post Weekly*)

[Prev. ref. 4698:ISR:B, 6044:ISR:C]

B. New Year Celebrations: Jews in Israel and the world over celebrated the beginning of the Jewish year 5725 on September 7 and 8.

Rosh Hashana, the New Year, marks the beginning of the Solemn Days, when the people gather in the synagogues for prayer and heart-searching, and the Ten Days of Penitence, which culminate in Yom Kippur, the Day of Atonement.

The Prime Minister, Mr. Levi Eshkol, issued the following New Year message to Jews everywhere:

"I am happy to extend the greetings of the Government of Israel and my own personal wishes to the people of Israel in their own land and in the Diaspora on the approach of the New Year.

"We express special greetings to the immigrants who have recently arrived, for whom this is the first New Year in their own, free land and to the immigrants who will come during this next year. May they soon strike root in the land and become a part of its life, so that they derive from it the strength to absorb, together with us, those who will follow them.

"May this New Year bring its blessing to those who are devoted to our land and to those who engage in its defence. May the work of their hands be blessed; may they be given the strength which is the guarantee of peace.

"Foremost in our thoughts are the Jewish communities in lands of dispersion marked by persecution and separation from our people. We are today again witnesses to Jewish communities facing the danger of rising anti-Semitism in the lands where they dwell. Jewish communities, and among them a very large one, live cut off from the body of the Jewish people, without ways of expressing their Jewishness and prevented from coming and joining their families in Israel. We know their distress. They are our brothers, in the past, the present, and the future, in suffering and in hope: we wish them a year of pride and redemption.

"We send our greetings to our millions of brothers in the lands of abundance. May this year be a year of deepening their Jewish identity, a year of fruitful activity on behalf of Jewish education, and the strengthening of Israel.

"In Israel itself, we are called upon, during this New Year as well, for increased efforts to strengthen our security, to improve our society, to advance our economic basis, and for a great programme to deepen and broaden our education and enrich our spiritual activity. We shall face the test of a free democracy in the election campaign which should take place this year.

"May it be given all of us to succeed in the test of determining Israel's road to strength, pioneering and progress, in gathering the exiles, and educating her sons to halutziut and loyalty."

JAPAN

A. Export Credit Contract To Russia: In defiance of American opposition, contract details of the sale to Russia of a $10 million urea

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

fertilizer plant, with payment deferred throughout eight years, were settled in Tokyo on September 3 after Government authorization for the credit.

This is the first export credit contract to Russia in excess of five years to be underwritten by the Government.

The official Export-Import Bank is underwriting for the first five years, with the remainder guaranteed by private commercial banks. Terms are a 20 per cent down cash payment with interest at 5 per cent.

The contractor is the Tokyo Engineering Company, with Toho Bussan handling the trading arrangements. The price includes technical advice.

The change of policy is clear. The contract is the first concluded on the so-called $350 million "shopping list" indicated by Mr. Mikoyan during his Spring visit. Everywhere he went he promised orders in return for extended credit, and thereafter, under pressure from industry, the Government began scrutinizing arrangements in Western Europe. What they saw, particularly of British offers, convinced them they were being left at the post.

Subsequently, American expressions of disapproval were met with the obvious retort that what Japan intended was already "within the scope" of European relations.

Part of the American objection was that since Japan's credit resources were limited they ought to be directed more usefully towards developing countries, but the Japanese seem to have reassured them that this is not the opening of the flood gates and that each case will be examined strictly on commercial merit.

Government authorization coincided neatly with the departure on September 3 for Moscow of the first Japanese Parliamentary delegation to visit Russia since the War. Travelling by way of Karachi and Tashkent, their airliner was the first Japanese aircraft over Russia since the War.

Meanwhile, the same day (September 3) the Government announced that it had again postponed for another year its approval for a five-year export credit for a $30 million vinylon plant to China. The contract was initialled in May, 1963, but in its trade with China the Government was clearly preoccupied with keeping going the current improvement in relations with the nationalists in Formosa.

JORDAN

A. King Hussein's Visit To UAR: King Hussein arrived in Alexandria on August 15 on a five-day visit to the United Arab Republic.

He was accompanied by his brother, Emir Hassan, the head of the Royal Cabinet, Sherif Hussein Ben Nasser, and his Secretary, Emir Raad Ben Zaid.

King Hussein was received at the airport by President G. A. Nasser, Field-Marshal Abdul Hakim Amer, First Vice-President and Deputy Supreme Commander of the Armed Forces, other Vice-Presidents of UAR and high ranking officials and political leaders.

King Hussein flew back to Amman on August 20. He was seen off at Alexandria airport by President Nasser, Field-Marshal Amer and other UAR leaders.

President Nasser had earlier called on his distinguished guest at the Ras El Tin Palace, remaining with him for some time before accompanying him to the airport.

On his arrival at Amman, King Hussein sent a cable to President Nasser in which he said: "At the moment when my plane lands in the capital of your own land, Jordan, I send your Excellency the deepest thanks and gratitude for the warm welcome and the splendid hospitality accorded to me and my party by your Excellency and your honourable colleagues in my own land the United Arab Republic, the land of our kinsmen and compatriots.

"I shall ever cherish the most enjoyable holiday spent with you.

"Until we meet again shortly I pray the Almighty to grant you His blessings, with my most sincere wishes for your happiness, health and welfare."

President Nasser sent the following message of thanks to King Hussein in reply to his message:

"I received with great pleasure the message you have sent following your return to your dear country.

"The noble feelings contained in your message have deeply impressed me. I shall always be pleased to meet you in the United Arab Republic. May you accept my thanks as well as my sincerest wishes for health and happiness."

LEBANON

A. Budget For 1965: The draft Budget for 1965 was submitted to the Cabinet in August by Dr. Khattar Shebli, Director of the Budget Office.

Expenditure is estimated at £L555,584,-200, an increase of £L33,946,200 on the 1964 figure of £L521,638,000. Of this total, £L48,283,600 (£L45,238,000 in 1964) belongs to the self-financed annexed Budget which includes expenditure on the telephone service, the national lottery, the Cereals Office and Lebanon University, bringing the total for the ordinary budget down to £L507,300,600, an increase of £L30,900-600 on last year's estimate.

The biggest increase this year are in the allocations for defence (£L89,536,600), compared with £L78,844,800 in 1964; and education £L72,848,600 compared with £L63,299,100 in 1964. Other items of expenditure are: social services £L19,256,700 (£L11,951,300 in 1964), public works £L116,688,269 (£L135,005,400), office of the President of the Council £L17,714,900 (£L10,457,300), national economy £L6,499,-300 (£L10,458,800) and Plan Organization £L2,697,000 (£L3,313,400). The sum of £L84,838,500 has been earmarked for the repayment of loans, compared with £L19,858,000 last year and £L17,121,031 for unforeseen expenditure compared with £L9,421,200 in 1964.

The deficit in Lebanese Budgets has been growing steadily in the past years, from £L53.7 million in 1962 to £L63 million in 1963 and £L83 million in 1964, and in his budget speech, Dr. Shebli stated that the deficit this year is likely to be of the order of £L100 millon. In the past, the budget deficit had been met out fo reserves, But Dr. Shebli said that long-term foreign loans are now essential to meet the country's commitments under the present policy of social and economic development. A group of foreign firms and financiers are ready to finance a number of development projects if repayment of the necessary loans totalling some £L180 million is guaranteed by the Government. About £L75 million of this sum would be forthcoming from USA, £L55 million from Kuwait and £L50 million from various other sources.

(*Middle East Economic Digest*, London)

[Prev. ref. 5538:LEB:A]

B. New Real Estate Law: A new law has been passed which limits the purchase of real estate and property in Lebanon by foreign investors and foreign-controlled joint stock companies to 10,000 square metres of land in any one district.

According to details of the law, available on August 28, unlimited land may still be purchased by joint stock companies with 50 per cent Lebanese shareholdings and with two-thirds of their Boards of Directors Lebanese.

The object fo the law is to prevent massive foreign acquisition of land and property, but the move has not been welcomed in commercial circles where it is feared to be a step towards nationalization.

(*Middle East Economic Digest*, London)

C. MEA Annual Report: The annual report (available on August 28) of the Board of Directors and shareholders of Middle East Airlines (MEA) released by Sheikh Aajib Alamuddin, Chairman of the Board and President of the Airlines, stated that 1963 was a year of expanding operations and record achievements.

Of the Airline's expenditure for equipment and other capital items, "at the present rate of repayment all current equipment and other capital expenditure obligations can be cleared by the end of 1967." MEA's total revenue in 1963 rose by 29 per cent to £L84,941,542 compared with £L65,597,165 in 1962, its previous best year. The Company's operating profits for 1963 amounted to £L7,083,918, the highest since MEA's establishment in 1945, while the net profit amounted to £L3,123,-086.

Passenger revenue on scheduled services rose by 44 per cent in 1963 the number of passengers increasing by 38 per cent from 230,343 in 1962 to 316,790 last year. The company's main development in 1963 was the merger with Air Liban and the joint exploitation of Air Liban routes to Paris, West Africa, Kuwait Jeddah, Dahran, Nicosia, Cairo, Jerusalem and Aleppo. Jet aircraft were used for the first time during the year for flights to West Africa and the surplus capacity which arose from the end of MEA's association with Jordan Airways was used to meet the new commitments arising from the joint exploitation agreement with Air Liban.

Other outstanding events were the ordering of two Concords, the delivery of two Caravelles 6N and the ordering of a third. Mass holiday travel, according to

MALAYSIA

A. Commonwealth Finance Ministers' Conference: Finance Ministers of the Commonwealth met in Conference in Kuala Lumpur on September 1 and 2.

The Conference was attended by 18 countries. It has been the practice for the Finance Ministers of Commonwealth countries to hold a meeting of the Commonwealth Economic Consultative Council in advance of the annual meetings of the World Bank and the International Monetary Fund.

In his opening address, the Malaysian Finance Minister, Mr. Tan Siew Sin, said that such a family gathering in Kuala Lumpur was a morale-booster to the people of Malaysia, who were facing a grave external threat.

He re-affirmed Malaysia's faith in the Commonwealth. Malaysia, he said, regarded it a special honour to be host. The meeting had a further significance in that it was being held at a time when the World Bank and the International Monetary Fund were venturing into less familiar but more ambitious fields.

The meeting, therefore, apart from "providing us with the usual opportunity to review Commonwealth problems and Commonwealth challenges, should enable us to contribute our rich and varied experience to the solution of those greater world problems with whose large prosperity ours is so intimately bound."

He said there might be differences, but "they are the kind which are bound to exist in any large and high-spirited family. What is sometimes forgotten are the links which bind us."

Immediately after his speech the Nigerian Finance Minister, Mr. Okotie-Eboh, proposed Mr. Tan as Chairman of the Conference.

Later, the delegates held closed sessions. During the discussions under-developed nations were understood to have pleaded strongly for more opportunities of trade with developed nations and easier trade terms.

Communique:

A *communique* issued at the close of the Conference said the Ministers, reviewing trends in world trade and payments, noted the improved world economic situation and continuing strength of the balance of payments position of the sterling area.

They had referred to economic prospects of their respective countries and their problems, particularly the need to step up the growth rate in developing countries.

They emphasized the need for a continuing increase in aid to developing countries and expressed appreciation for measures already taken by certain countries to make aid available on favourable terms. But developed nations should consider providing a higher proportion of aid on more liberal terms.

The results of the Conference were valuable only as a first step, the communique said. Much remained to be done in following up the work done there.

The Ministers hoped that October's Tokyo meeting of the International Monetary Fund would agree on the need to increase its resources and extend its facilities. They attached the highest importance to the Fund.

The following is the text of the communique:

"A meeting of the Commonwealth Economic Consultative Council was held at the Parliament House, Kuala Lumpur, on September 1 and 2 under the chairmanship of Mr Tan Siew Sin, Finance Minister of Malaysia. All 18 independent countries of the Commonwealth were represented. There were also representatives from Mauritius Malta and Hong Kong.

"The Council reviewed trends in world trade and payments and noted the improvement in the world economic situation and the continuing strength of the balance of payments position of the sterling area as a whole.

"The Ministers referred to the economic prospects for their respective countries and the problems which they faced, in particular the need to step up the rate of growth in the developing countries.

"While there had been an improvement in the trading position of the sterling area as a whole, this had been unevenly spread and the basic weakness of many primary commodities pointed to the need for new approaches to the problem.

"The Council recognized the importance of the United Nations Conference on Trade and Development. It was noted that the results of the Conference were valuable only as a first step, and that much remained to be done in following up the work of the Conference.

"The need was also stressed for facilitating to a greater extent the access of manufactured goods from developing countries to the markets of the industrialized countries as well as devising means to ensure stable and reasonable commodity prices.

"The Council expressed the hope that the Kennedy round of trade and tariff negotiations in the GATT would achieve positive results of benefit for all members of the Commonwealth.

"In a discussion on the importance of maintaining adequate international liquidity and strengthening the international monetary system, Ministers expressed the hope that the meeting of the IMF in Tokyo would be able to reach agreement on the need to increase the resources and extend the facilities of the Fund to whose position in international monetary matters they attached the highest importance."

[Prev. ref. 5578:AOA:G]

B. Parachute Landings By Indonesian Soldiers: About 30 members of the Indonesian regular Army landed by parachute in the Labis area of Johore on September 2.

The Government described it as another act of aggression which would be reported to United Nations.

The police, warned by villagers, attacked the Indonesian commandos and killed one and captured several others. Arms, ammunition, food supplies and first aid kits were recovered in crates dropped by parachute. Troops, jungle squads and other security forces had joined the police in trying to track down this latest batch of Indonesian infiltrators. Labis and the surrounding areas were put under a 24-hour curfew.

The Malaysian Ministry of Defence said in Kuala Lumpur that a Hercules-130 aircraft left Djakarta, the Indonesian Capital at 9 p.m. on September 1 and refuelled after midnight at Medan, a port on the north-east coast of Sumatra, opposite the west coast of Malaysia. The aircraft then flew to Labis and the parachute troops understood to be part of a commando brigade formed to invade West Irian, were dropped.

The crew had circled the area and dropped flares over the landing zone. Villagers in the vigilance corps established all over the country since Indonesian guerrillas landed at Pontian on August 17, told the police. The police engaged the commandos in a sharp skirmish.

The first indication that there had been any further aggression was when the Malaysian Prime Minister, Tengku Abdul Rehman, told correspondents that an Indonesian aircraft had dropped arms and food in the Labis area. When it was learnt that armed men had landed, the Tengku said that United Nations and Malaysia's allies would be told. Negotiations would have to be held on counter-measures.

Labis is the centre of the rubber and palm oil industry and is on the main trunk road and railway line. It is 100 miles north of Singapore, the capital of Malaysia.

Indonesian Denial:

Mr. Ganis Harsono, an Indonesian Foreign Ministry spokesman, denied on September 3 in Djakarta that Indonesian parachute troops had been dropped on the Malaysian mainland.

He told newsmen that an Indonesian C-10 Hercules transport aircraft had flown over Singapore because of a navigational error. He said it was on its way to Pnom Penh and Hanoi carrying home Cambodian and North Viet-Namese dancers who had performed during Indonesian independence festivities.

He added that Indonesia, in line with President Sukarno's recent statements, was still in favour of a negotiated settlement of the Malaysia issue.

In answer to a question he said that President Sukarno had cancelled all leave of the Indonesian armed forces and Government officials as "a precautionary measure." Malaysia would not be quiet, "so we have to face all eventualities coming from their side."

New Zealand Troops' Support:

New Zealand and Gurkha troops of the Commonwealth Strategic Reserve on September 3 moved into central Johore to track down the Indonesian parachute troops and to replace the Malaysian forces transferred to Singapore to assist the civil power in dealing with riots in which eight persons were reported killed.

By then, four of the Indonesian invaders, of whom there were believed to have been about 30, had been killed and seven captured.

Britain, Australia and New Zealand agreed to give further assistance to Malaysia to expand the security forces.

The Chancellor of the Exchequer, Mr. Reginald Maudling, who left Kuala Lumpur on September 4 on his way to Tokyo to attend the annual meetings of the World Monetary Fund, was reported to have said that Britain would send economic and military aid as quickly as possible. The immediate aid would be in the form of more arms and the sooner they were sent the better. The Malaysian Government had submitted a list of requirements to Britain, Australia, and New Zealand for assistance in defence and relative fields and they had agreed to give a large sum.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Announcing in Wellington that New Zealand troops of the Commonwealth Strategic Reserve would be used in Malaya against Indonesian infiltrators, the Prime Minister, Mr. K. Holyoake said on September 4 that the Government had repeatedly stated that it was prepared to assist Malaysia to maintain its independence against the threat of armed attack. The dropping of Indonesian parachute troops inside Johore had all the marks of a "blatant act of aggression", New Zealand assistance was particularly necessary at the moment because of difficulties created for the Malaysian Forces by the Singapore riots, which the Malaysian Forces were restraining. The Government had no hesitation in expressing its readiness to see the New Zealand battalion now stationed in Malaya used against the infiltrators.

The battalion, about 760 strong, is part of the army brigade component of the Commonwealth Strategic Reserve stationed at Terendak.

The Malaysian Cabinet, meanwhile decided to send Dato Ismail, Minister of Home Affairs, and other Malaysian officials to New York to present Malaysia's case to United Nations against Indonesian aggression, both overt and covert.

State Of Emergency Declared:

All Malaysia was put under a State of Emergency on September 3 after the Central Government in Kuala Lumpur had discussed at great length landing of Indonesian parachute troops in Johore and its implications.

Tengku Abdul Rehman said that the proclamation of a State of Emergency should not affect the lives of ordinary people. There would be no restriction of movement or of food.

He said he believed that President Sukarno was planning something serious against Malaysia; the fact that he had cancelled all leave for the Indonesian forces meant that things might worsen. The seaborne landings at Pontian on August 17 and the air landings at Labis in central Johore had been made possible through the co-operation of Malaysians who had gone to Indonesia to be trained.

He said that there was evidence that the enemy was preparing for a big offensive by agents and saboteurs within Malaysia. The agents were planning to create chaos and havoc by disrupting the administration and endangering national security. Malaysia had been lenient and as a result people found with enough gelignite to blow up a building had been sentenced to only three months' imprisonment. With the proclamation of the Emergency they would be liable to the death penalty.

He said that in the past, Indonesian aggression had been reported to United Nations for information, but after the landing at Labis it had been decided to ask the United Nations Security Council for action. Close consultations had been held with Britain, Australia and New Zealand before the decision was taken and they had agreed.

[Prev. ref. 6000:MAL:A]

PAKISTAN

A. National Assembly Debate On Foreign Policy: Winding up a one-day debate on foreign policy in the National Assembly on August 21, the Foreign Minister, Mr. Z. A. Bhutto, said that Pakistan would welcome any development that would contribute to a settlement of Indo-Pakistan differences.

Regarding a meeting between President Ayub Khan and the Indian Prime Minister, Mr. Lal Bahadur Shastri, he said Pakistan would be happy to discuss Kashmir and other issues. But for any negotiation to be productive it was necessary that there be a change of heart and that India was really anxious to settle the Kashmir dispute.

He said Pakistan would make every effort to bring about an equitable and honourable settlement of the Kashmir question. She would never tire in her efforts to secure for the people of Kashmir the right of self-determination, which was Pakistan's "duty and obligation."

Referring to the suggestion by the Opposition leader, Mr. Yusuf Khattak, that they should rule out war and resort to negotiations with India to settle the Kashmir question he said negotiations meant "a spirit of give and take, accommodation and conciliation."

The basic difficulty, he claimed, was that India would never come to the negotiating table in that spirit.

Referring to the suggestion for a meeting between the Heads of Government, he said it had to be necessarily the last step. It was essential that there were indications of progress at the preparatory level.

He alleged that India was a "colonial Power" keeping "the colony of Kashmir under bondage" and added that she should "free Kashmir" at least to be "relieved" of her present food shortage.

He hoped that "international situation and domestic circumstances in India will compel her to come to terms with Pakistan."

He criticised India also for not negotiating on what he called the issues of eviction of "Indian Muslims," which he described as "economic aggression." "The situation may deteriorate. We may have to resort to the principle of eye for eye and tooth for tooth."

He characterized misgivings in the Arab Press at the Turkey-Iran-Pakistan regional agreement as outpourings of "some daily rag or other in some city or other."

He said there was no reason why the Arab world should react adversely to the agreement. If they thought calmly, they would find some advantages in it.

To Opposition demands for Pakistan to quit pacts with USA and UK, he said Pakistan was not going to leave them or basically change her foreign policy. She had achieved an independent status without having to quit pacts. This was a great step from pre-Ayub regimes when Pakistan had the status of a "satellite" and "stooge" of USA.

Pakistan did not want to strain her relations with USA with whom she had many common interests and from whom she received great assistance for her economic welfare. But if unfortunately she had to differ with any of her friends in promoting her own interests, Pakistan would do so.

Earlier, during the debate, the Government's policy on Kashmir came under heavy fire at the hands of the Opposition and the subjects which invariably used to command the largest amount of unanimity provoked sharp differences.

Mr. Khattak said that Pakistan on her part should create, as was being done in India, a climate of opinion in which they could assist such people in India who were working for the settlement of the Kashmir question and for a "decent life" for Muslims in India.

He said they had to rule out war on the Kashmir issue, having missed the chance twice—once in 1948 failing to destroy bulk of the Indian army in Kashmir and then in 1962, on the occasion of the Sino-Indian conflict.

There was no alternative except negotiations. No doubt, he said, Indian "intransigence" had been rendering negotiations fruitless so far but the wind of change was blowing in India itself. Mr. Rajagopalachari and Mr. Jaya Prakash Narayan were working steadfastly to bring about a solution to the Kashmir issue and improve Indo-Pakistani relations. Mr. Shastri had himself spoken of the need for improved relations.

Deploring the cult of personality that the Pakistan Government had been developing around Sheikh Abdullah, he said the Sheikh's position on the movement for plebiscite was not clear.

Mr. Farid Ahmed, an Opposition members from East Pakistan (Islamic Democratic Front) said that whether Pakistan admitted it or not, India's image among the Arab nations of Africa was that of a "mighty, benevolent force trying to keep peace between warring nations".

He said wherever he went, he found goodwill towards Pakistan and appreciation of her stand on the Kashmir issue. "Nevertheless the issue is not free from doubt."

[He recently toured Algeria, Morocco, Tunisia and other African countries as a member of a non-official team to canvass support for Pakistan's case on the Kashmir issue.]

He said that before Partition, Pakistan and India, were one—both under the Mughals, and the British. The image of India with its ancient civilization and culture had been projected all over the world. But after Partition, India alone was the inheritor of the past. In Africa, and Latin America, India was known as the land of Gandhi and Nehru, who had fought for liberty and freedom and peace.

Pakistan, he said, was isolated in the Arab world. She was unknown in Africa. Wherever he went, he was confronted with questions by the people from the common man to the Minister, as to what sacrifice Pakistan herself would be willing to undergo to realise her case in Kashmir. People did not believe Pakistan was ready to do anything.

B. State Bank Report For 1963-64: The report of the State Bank for 1963-64, released in Karachi on September 2, referred to increased domestic production coupled with enlarged imports, improvement in the growth rate of economy, and expansion of banking facilities as well as of industrial finance.

It also mentioned a sizable deficit of Rs. 81 crores in the balance of payments on current account, introduction of a quota system in respect of scheduled banks borrowings against Government securities from the State Bank and the rise in money supply to the extent of Rs. 100.21 crores during 1963-64.

The increase in GNP estimated at 6.5 per cent compared with the growth rate of 2.6 per cent last year. The overall index of agricultural production recorded an increase of over 6 per cent, due largely to an all-time high production of rice up to 116,29,000 tons, representing an increase of 18.6 per cent as compared to 1962-63.

The index of industrial production which had risen to 133.6 in 1962-63, rose further to 156.5 by October-December, 1963.

Increased domestic production coupled with enlarged imports brought about a a notable improvement in overall availabilities.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

This, according to the report, helped maintain domestic price stability notwithstanding larger monetary expansion.

Commodity markets displayed mixed trends during the year under review. The production of jute declined from 65,00,000 bales in 1962-63 to 60,00,000 bales in 1963-64. The production of cotton, on the other hand, attained the record level of 23,70,000 bales, about 13 per cent higher than in 1962-63 exceeding the Second Five-Year Plan target by 70,000 bales.

Tea production in 1963-64 increased to 55 million lbs. from 52 million lbs. in 1962-63, due to the Government's compulsory extension programme.

Money supply rose by Rs. 100.21 crores during 1963-64, exceeding the previous record expansion of Rs. 88.16 crores last year. This raised the total monetary expansion over the first four years of the Second Plan period to Rs. 213.60 crores as against Rs. 150 crores envisaged for the entire Plan period. The largest money-creating influence during the year emanated from the Government sector which amounted to Rs. 62.67 crores as against Rs. 16.46 crores in 1962-63. The domestic private sector also exercised a larger expansionary influence during 1963-64.

Bank credit continued to expand at a brisk pace and recorded a rise of Rs. 112.13 crores to Rs. 479.13 crores during 1963-64. In contrast to a larger growth in bank deposits (general) than in bank credit in 1962-63, bank deposits registered a rise of Rs. 99.11 crores to Rs. 570.61 crores over 1963-64.

The rise in deposits during 1963-64 was almost equally shared by demand and time deposits the former increasing by Rs. 49.42 crores to Rs. 327.40 crores and the latter by Rs. 49.69 crores to Rs. 243 21 crores.

As the expansion in deposit resources fell short of the rise in demand for bank funds, the scheduled banks' borrowings from the State Bank rose considerably over the year from Rs. 38.58 crores to Rs. 78.30 crores.

The balance of payments on current account, according to the State Bank's annual report, recorded a sizeable deficit of Rs. 81.00 crores during 1963-64 as compared with a deficit of Rs. 8.78 crores in 1962-63. A substantial part of the current account deficit was financed by the inflow of foreign capital so that the gold, dollar and sterling reserves declined from Rs. 143.62 crores at the end of June, 1963 to Rs. 113.50 crores at the end of June, 1964.

The report said that the total foreign aid committed from July, 1960 to March 31, 1964, excluding the assistance received under the US PL 480 Title I and the contributions for the Indus Basin Replacement Works came to $1,480 million. Total disbursements from aid commitments during the period amounted to $928 million.

Expansion of banking facilities proceeded at a rapid pace during the year, with 348 new offices of the scheduled banks opened during 1963-64. Credit provided by the State Bank for agricultural purposes also continued to expand and so did the industrial financing.

Outstanding advances of the Industrial Development Bank stood at Rs. 13.21 crores as on June 30, 1963, as against Rs. 10.00 crores on June 30, 1962.

In the case of the Pakistan Industrial Credit and Investment Corporation the total number of loans as on June 30, 1964 stood at 382 aggregating Rs. 65.00 crores. Total loans sanctioned during the year under review amounted to Rs. 19.25 crores and reflected an increase of 13.50 per cent over the year.

(*Dawn*, Karachi)

[Prev. ref. 5467:PAK:G]

C. **Student Demonstrations In East Pakistan:** Violent demonstrations at several places marked a Province-wide strike on August 29 by East Pakistan students, which synchronized with the laying of the foundation stone of a new university at Chittagong by President Ayub Khan.

A student mob attacked passenger trains and blocked railway tracks and stations near Chittagong. Several persons, including Government officials and journalists returning to Dacca after the Chittagong function, were injured when the students smashed the windows of the Dacca-bound mail train.

Inside the University campus in Dacca, police fired tear-gas at student demonstrators who stoned the police from places of concealment. Several arrests were made.

The students were demanding an end to the "Government's repressive policy" against students, restoration of democratic rights and release of political prisoners.

In Comila the students had an added grievance—that the new university should have been located in their district instead of at Chittagong.

An order under Section 144 Cr. P.C. was imposed in Khulna town following an attack by some goonda elements on a students' procession in the evening. One student was arrested.

According to the local students' union sources, demonstrations were held in Pabna, Sirajganj and Mymensingh also.

(*The Indian Express*, Bombay)

[Prev. ref. 5767:PAK:A]

D. **Remains Of Early Arab Capital Revealed—Archaelogical Survey:** A Karachi report on August 30 said that archaeological excavations had revealed that the remains of the early Arab Capital, Mansura (8th to 13th century), is situated about eight miles south-east of Shahdadpur in Sanghar district, covering an area of one mile on the banks of the now dried-up branch of the Indus.

These findings, according to Dr. F. A. Khan, Director of Archæology were the results of preliminary survey of the site conducted by his Department.

He said that some limited and imperfect excavations in 1854 by Messrs Bellasis and Richardson and again by Mr. Cousens in 1897 and 1908 showed that Mansura was founded at the site of ancient Bahmanabad, also called incorrectly as Brahmanabad.

At different points at Banbhore a considerable area at the site has been uncovered bringing to light the remains of early Islamic culture and that of the non-Muslim period. Except about 900-feet-long fortification wall at the south-eastern corner, the whole defence wall around the citadel has been exposed in the previous year.

To uncover the greater area of the pre-Islamic levels at the western sector the Department will resume digging in the Temple area to know its dimensions with associated relics. There, the extension of the concrete and shell floor and mud-brick walls shall be traced out by extending the area towards south and west.

The excavation work at Taxila, another important site, was undertaken long ago and three important cities, namely, Bhir Mound, Sirkap and Sirsukh were uncovered. These cities were originated in three different periods. Their inter-relationships with each other could not be properly established. So, in order to discover the cultural affinities and social progress of the people of the area it was proposed that the excavation may be carried out soon in some important places where the structural remains and cultural sequences can be located right from the Archaemenid dynasty or earlier till the latest settlement in one and the same area.

Dr. Khan said during the current financial year excavations of the cells on the south-west and western sides of the Mainamati in East Pakistan will be taken up to recover more material. Previously, the cells around the central shirne at Salban Vihara and yielded a very rich collection of coins, copper plates and bronze sculptures. Seventy cells have been exposed so far.

Talking about other sites to be excavated he said work would be taken in hand at Rupban Mura, situated in the middle of the Lalmai-Mainamati ridge. The sites where diggings were executed so far represent religious establishments only. The whole of Lalmai-Mainamati ridge was the centre of cultural, religious and political activities of Chandres, who came to power in the beginning of the 10th century AC.

The Department now proposes to unearth the city proper, which could not have lain very far from them and to ascertain the cultural affinities with other sites already excavated.

Besides these excavations, the Department will collaborate with the following foreign archæological missions. (1) Italian Archæological mission—excavations in Swat State; (2) Kyoto University Archæological mission—excavations in Mardan district; (3) French Archæological mission—excavations in Kalat district.

The conservation of national monuments forms a major part of the Department's activities. Outstanding monuments and sites in both the Wings of the country, ranging in date from pre-historic to Muslim period, will be repaired and conserved. According to the present plans special repairs are to be carried out to excavate sites such as Mohenjo-Daro, Mainamati, Pabarpur and Banbhore, Makli and Thatta monuments.

In East Pakistan special attention will be paid to the conservation of several monuments such as Satra Ratna Temple Talban Vihara, Charpatra Mura, in Comilla district and Khotibari, the residence of the late Dr. Tagore in Kushtia. Repairs are also to be carried out to the exposed ruin at Paharpur, Sotyapir Bhita and Rajshahi and to the Mosque at Robijoypur, Haman Khana at Iswaripur and Bibi Begni's Mosque in Khulna district.

In Karachi the construction work of the large four-storeyed Central Museum building at Burn Garden will be completed by the end of the current financial year. A sum of Rs. 4,14,000 has been provided for the building during this year.

In East Pakistan the construction of the Ethnological Museum at Chittagong will be completed during the current year at a cost of Rs. 1 17,000. The conservation of Lalbagh Fort, Dacca, will be undertaken at a cost of Rs. 50,000 during the current financial year.

ASIAN RECORDER

October 7—13, 1964

Regd. No. D-727
Vol. X No. 41

AFGHANISTAN

A. Highway Link With USSR: King Zahir Shah on September 4 opened the £16 million Salang highway linking Kandahar in South Afghanistan with Kushka, the southernmost town in Russia.

The road, over the Hindu Kush mountain range, took nearly four years to build. It is expected to bring in an annual income of more than £1,800,000.

Mr. Alexei Kosygin, Soviet Deputy Premier, headed a Russian delegation which attended the opening ceremony.

Mr. Kosygin and members of the Soviet Government delegation were received in Kabul on September 4 by King Zahir Shah.

The talks passed in a friendly atmosphere. Questions relating to Soviet-Afghan co-operation were discussed. In the evening the King gave a dinner in honour of the delegation. Earlier, they had a meeting with the Prime Minister, Dr. M. Yusuf.

On September 3, the Soviet Prime Minister, Mr. N. Khruschev and the Soviet President, Mr. A. Mikoyan, sent messages to King Mohammed Zahir Shah congratulating him on the completion of the construction of the motor road across the Hindu Kush.

The messages said: "The new road driven through the Hindu Kush is a symbol of the fruitful co-operation of the fraternal peoples of our two countries. This is a vivid manifestation of the traditional Soviet-Afghan friendship, the foundations of which were laid by the great Lenin."

[Prev. ref. 4971:AFG:A]

BURMA

A. Government Re-affirms Socialist Aims: The Revolutionary Government has in a manifesto reaffirmed its intention of building a completely socialist society. The pattern is not communist.

The 10,000-word manifesto points out the differences between "purely Burmese" socialism and international communism.

The manifesto followed in the wake of Buddhist unrest in Upper Burma where militant young monks had charged the Government with Leftist tendencies.

In an earlier statement, the Government denied any links with communism. The latest, much lengthier manifesto, explained the denial in detail.

The manifesto said: "Under Burmese socialism there is full freedom of conscience and religious worship is encouraged although there is respect for the rights of "non-believers and free thinkers."

(*The Statesman*, Calcutta)

[Prev. ref. 5795:BUR:A]

B. Train Sabotage By Rebels: A land mine planted by rebels on the railway track exploded on September 8 near Amawbi station, 25 miles from Rangoon, causing derailment of the engine and 14 wagons of a goods train.

The train was proceeding from Rangoon to Prome.

The sabotage cost the railway nearly 1,00,000 kyats. Railway traffic between Rangoon and Prome was temporarily dislocated as a result of the explosion.

In a series of clashes in the past few days, patrolling troops killed nine rebels —two Kachins, two Shans and five Communists—and captured another.

One soldier was killed and another slightly injured on the Government side.

(*The Times of India*, Bombay)

[Prev. ref. 5675:BUR:A]

CEYLON

A. Problem Of "Stateless" Citizens: Three important conferences took place recently, in all of which the citizenship issue of the "Stateless" people figured prominently.

The general view expressed at these conferences was that no useful purpose would be served by discussing the problem at the Prime Ministers' level unless an amicable settlement was reached in advance in Ceylon between the Government and the leaders representing the "Stateless" people.

Mr. A. Aziz, President of the Democratic Workers Congress, told the annual session of the Congress at Hatton that the very fact that the Governments of India and Ceylon had not been able to solve the citizenship problem of the "Stateless" people all these years only indicated that a solution over the head of persons actually concerned was doomed to failure. He hoped the Ceylon Prime Minister would at least now take cognizance of this fact and have talks with the representatives of the "Stateless" before she went to New Delhi for discussions with the Indian Premier, Mr. Lal Bahadur Shastri.

The most feasible solution, Mr. Aziz suggested, would be on the following lines:

(1) Ceylon should announce a new inducement scheme;

(2) A time-limit should be fixed for choosing either the inducements and go back to India or reject them and continue to claim Ceylon citizenship;

(3) On the expiration of the time-limit, those who do not opt for Indian nationality should be accepted as Ceylon citizens.

The inducement scheme already announced set no time-limit and did not indicate what would happen to those refusing the inducements.

He rejected as baseless the charge that the "Stateless" people and their organizations looked to the Government of India for help. While they had been urging the Ceylon Government to start negotiations with the representatives of the people concerned, the Ceylon Government was compelling them to go to the Indian Government which all along they had resisted. They should seek the help of the Indian Government only in regard to the repatriation of those persons who were willing to take up Indian nationality as a result of an understanding between the parties concerned.

Once the citizenship issue was settled, he pointed out, the Government could utilize the surplus labour in the estates for development of the dry zones and the production of food crops, thus reducing the drain on the foreign exchange reserves caused by grain imports.

Mr. S. Thondaman, who at the annual session of the Ceylon Workers Congress at Badulla claimed he had a ready-made solution for the settlement of the citizenship problem, said he would like to keep it a closely-guarded secret until the Government thought fit to initiate talks with his organization.

The Federal Party held its ninth National Convention at Trincomalee recently (see page 6040) under the chairmanship of Mr. S. J. V. Chelvanayagam, the veteran Tamil leader.

In his presidential address, Mr. Chelvanayagam dealt at great length on the sinister plan that was evolved to deprive the Tamil people in the plantations of their right to send their representatives to Parliament. If those Tamil workers had the franchise, he said, they could have returned 12 members of their choice to the House. Had not the Tamil people been deprived of their votes. Mr. Bandaranaike would not have had a Sinhala majority support for his Official Language Act of 1956, "an ultra communal piece of legislation making Sinhala the only official language in a country where over 30 per cent of the people were speaking Tamil".

Mr. Chelvanayagam felt that all language disputes and connected racial troubles in Ceylon were traceable to the citizenship laws of the Island.

CHINA

A. Chinese Territorial Ambition —Soviet Allegation: In an editorial in *Pravda* on September 2, Russia accused the Chinese leaders of questioning Soviet rights to more than 1,500,000 square kilometres of territory.

It said that Mr. Mao Tse-tung had stated that "the places occupied by the Soviet Union are too numerous".

It devoted an entire page to a new broadside against Peking, in which it accused the Chinese of playing a dangerous political game in an attempt to isolate the Soviet Union. It said it was hard to believe that Mr. Mao was not aware of the most dangerous consequences which could result from any attempt to re-carve the map of the world in present conditions.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

It alleged that Mr. Mao had called the ideological struggle between China and the Soviet Union a "paper war" which "does nobody any harm since no one is killed in it." This was an admission that the Chinese leaders regarded their differences with Russia and the parties which agreed with her as a kind of war.

The Pravda article was commenting on a report published in Japan of an interview which Mr. Mao gave to Japanese socialists visiting China. "He is not just claiming this or that part of Soviet territory", it said, "but is portraying his claims as a part of some general territorial question. We are faced with an openly expansionist programme with far-reaching pretensions".

It said that in 1954 China published a history textbook which included a map showing Burma, Viet-Nam, Korea, Thailand, Malaya, Nepal, Bhutan, and Sikkim as "state territory of China" taken away from her during the opium wars.

It said that in the north "the border ran along the Stanovoy mountain range, cutting the maritime territory from the Soviet Union; in the west a part of Kirgiziya, Tadzhikistan, and Kazakhstan (up to Lake Balkash) was also included in China. Sakhalin also was shown as Chinese territory.

It quoted Mr. Mao as saying that China had "not yet called for an account" of the fact that "about 100 years ago the area to the east of Lake Baikal became the territory of Russia and from then on Vladivostok, Khabarovsk, Kamchatka, and other points are the territory of the Soviet Union."

It said that history was full of examples of the emergence and fall of States and the resettlement of peoples during which the borders between States changed more than once. Historic references on borders could prove anything. "For instance, one can prove that England is French territory because she was once *the possession of a Duke of Normandy*.

"One can prove, on the contrary, that France is an English possession because in her time, during the Hundred Years War, she was nearly completely conquered by the English. With the help of such arguments one can prove that the borders of China pass only along the line of the Great Wall of China which is less than 100 kilometres from Peking.

"One can only be amazed that there are people questioning the right of workers and peasants to the land where they are living and working from ancient times only on the grounds that once upon a time one emperor defeated another....

"Do those who question the Soviet ownership of a territory of more than 1,500,000 square kilometres think how these claims will be taken by Soviet people who have been living and working on this land for several generations and consider it their homeland?"

The editorial said that if all States followed the Peking recipe for border revision claims there would be "an inevitable aggravation of international tensions... fraught with military conflicts". Any attempt to re-carve the map of the world could lead to the most dangerous consequences.

However, China had every right to press for the liberation and re-unification of Formosa and Hong Kong, which were part of the country and the majority of whose population were Chinese.

Pravda expressed indignation at Mr. Mao's remark that Mongolia had been placed by the Soviet Union "under... its rule". It said that Mongolia enjoyed all the rights of an independent country. "The existence of an independent Mongolian State, which maintains friendly relations with the Soviet Union and other countries of socialism, does not suit the Chinese leaders. They would like to deprive Mongolia of independence and make her a Chinese province."

The article said that when Mr. Khruschev and other Soviet leaders visited Peking in 1954 the Chinese leaders suggested that they should reach agreement on this, but Mr. Khruschev refused to discuss it and said Mongolia's destiny could be settled only by the country's working people themselves.

Pravda ridiculed what it described as Mr. Mao's new theory of a world divided into two zones. The "Soviet-American" and the "intermediate", included China as well as nearly the whole "capitalist" world outside the United States. As a result, it commented, President de Gaulle was no longer a "fascist and bandit" but "one of the most active fighters against American imperialism".

Perhaps, it added, even General Franco would be welcomed to China's ranks in the fight against imperialism.

INDIA

SUMMARY: Loan Agreements With Britain: Trade With East Germany; Code Of Conduct For Ministers; Reserve Bank's Annual Report; Foreign Missionaries.

A. Seven Loan Agreements With Britain: Seven Agreements for loans totalling £14.5 million by Britain to India were signed in New Delhi on September 9.

The Agreements were signed by the British High Commissioner, Sir Paul Gore-Booth, on behalf of his Government and Mr. P. Govindan Nair, Additional Secretary, Department of Economic Affairs, Ministry of Finance, on behalf of the Government of India.

The loans will benefit India's oil, heavy electrical, coal-mining and power-generating industries. They will also assist certain Indian private sector industries at present running below full capacity for lack of foreign exchange to buy vitally needed spares and maintenance items.

The loans form part of the £30 million aid programme for India in 1964-65 pledged by Britain at the Aid-India Consortium meeting in Washington on May 26.

The balance of the £30 million aid—£5.5 million—will be given mainly in the form of general purpose loans. (An Agreement for a loan of £10 million was signed some time ago.) The Government of India may allocate funds from the balance in payment for cargo ships to be built in British dockyards.

In the context of the general purpose loans given within the Consortium pledge for 1964-65 special arrangements have been made for certain types of steel. India will place an order in Britain worth £2 million for the purchase of high speed and tool steels, steel castings and alloys, stainless and heat-resisting steels.

Another £4 million will be used for improving the operating efficiency of manufacturers in India who traditionally look to Britain for supplies and who are having trouble because of India's tight foreign exchange position.

A sum of £2 million will be allocated for the import of large components such as transformers and switch gear for the Heavy Electricals.

The aid given previously by Britain for the new colliery at Singareni will be increased by £1.25 million. Power stations in Madhya Pradesh and West Bengal will benefit from a loan of £3.225 million for turbines.

For oil exploration and development by Oil India, £1.5 million is being provided. For the private sector there will be a loan of £1.525 million for capital goods and £1 million for components for British-oriented industries.

The £20 million aid for the current financial year is in addition to the aid already promised by Britain for the expansion of the Durgapur Steel Works.

Speaking on the occasion, Sir Paul Gore-Booth said he hoped the Agreement for the balance of £5.5 million would be signed in the Autumn. He was happy that within 16 weeks of the pledging of £30 million aid to India by his country, Agreements had been signed for utilizing most of it.

He said: "It speaks well for the good relations and mutual understanding that exists between us that it has been possible to achieve agreement on so many issues in such a short space of time."

British aid so far for the Third Five-Year Plan was £155 million (Rs. 208 crores).

Mr. Govindan Nair said the conclusion of Agreements on so many matters in so short a time, was undoubtedly due, in a great measure, to Britain's willingness to suit her credits to India's needs.

He thanked the British Government, the British people and Sir Paul for the assistance given by them to India for her development plans. He particularly thanked Britain for the non-project assistance given, which, he said, was very important from India's point of view. Over 70 per cent of Britain's aid this year would be non-project assistance.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5979:INI:B]

B. Shipping Agreement With USA: An Agreement was signed in New York on September 11 between the Government of India and the United States-India Conference Lines covering shipment of governmental cargoes to India.

According to Indian sources, the new Agreement will result in a net saving of about $2,000,000 annually exclusive of the savings effected by the decision of the Conference Lines announced in August to cancel a surcharge on shipments to Bombay.

The Agreement covers cargoes for the Government of India, State Governments and nearly 250 public sector projects in India.

Under the terms of the Agreement, 75 per cent of Governmental cargoes will be allocated to the Conference Lines, but the Government of India has reserved the right to allocate 25 per cent of the remainder.

There will be special reductions in the rates for heavy list cargoes like heavy electrical equipment, earth-moving equipment, power plants and the like.

The additional charges on cargoes shipped to ports like Kandla, Madras, Cochin and Visakhapatnam will be withdrawn.

(*The Statesman*, New Delhi)

[Prev. ref. 5437:INI:F]

C. Trade With East Germany: Trade between India and East Germany will reach the Rs. 40-crore mark in 1966—double that in 1963—according to letters exchanged in New Delhi on September 12 extending trade arrangements between the two countries.

Apart from traditional goods, East Germany has agreed to purchase from India non-traditional items like motor vehicle components, radiators, machine tools, electrical equipment, car batteries, chemicals and drugs.

India will import from East Germany

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

fertilizers like ammonium sulphate, nu-
riate of potash, various items of industrial
raw materials like alloy steel, pig-iron,
caustic soda, heavy soda ash, dye interme-
diates and various chemicals.

East Germany will also supply machine
tools, rotary printing machines and other
printing machinery, textile machinery
and various other items of capital goods.

The letters were exchanged between
Mr. D. S. Joshi, Secretary, Central Mini-
stry of Commerce, and Mr. Kurt Epper-
lein, Deputy Foreign Trade Minister of
East Germany.

Speaking to newsmen, Mr. Kurt Epper-
lein said his country was in a position
to supply to India chemical and synthetic
fibre plants, equipment for power stations
and for the manufacture of pig-iron
based on low shaft furnace.

His country had also offered a credit of
Rs. 22.7 crores to supply these equipment.
Although the Government of India had
not accepted the credit, the negotiations
were not complete. He hoped India would
ultimately accept his country's offer.

He said he had urged that India should
open a trade representation in East Ger-
many to enable his country to purchase
more non-traditional goods from it. But
India maintained it was satisfied with its
participation in the Leipzig Fairs both in
Summer and Autumn.

D. **Code Of Conduct For Minis-
ters Approved By Central Cabinet:**
The Central Cabinet approved on
September 15 a comprehensive code
for Ministers—Central and State—
which is expected to come into force
soon.

Under the code, every Minister will have
to make a declaration of his assets—to the
Prime Minister at the Centre, and the
Chief Minister in a State—on assuming
office, and subsequently every year.

The code also restricts the commercial
and business interests a Minister may
have while in office and prohibits Mini-
sters and the Central Home Mini-
ster from misusing their authority to fur-
ther the business interests of their rela-
tives and friends.

Of special significance is the code's
clause laying down the do's and don'ts
about collection of funds for political par-
ties by Ministers. This activity is sought
to be circumscribed sustantially.

In some respects the most important
part of the code is the section prescribing
the procedure for dealing with the alle-
gations that a Minister has contravened
the code of conduct or otherwise departed
from standards of integrity and honesty.

It has been laid down that in the case
of allegations against a Central Minister,
the Prime Minister will decide whether
the charges have any substance meriting
further action.

In the case of a Minister in a State this
decision will be taken by the Chief Mini-
ster. When the Chief Minister himself is
the target of attack, the decision will be
taken by the Prime Minister and the Cen-
tral Home Minister.

This method for the disposal of charges
against Ministers is thus clearly different
from the procedure suggested by the San-
thanam Committee on Corruption (page
[illegible]), which felt that wherever there
were charges against a Central Minister
or 10 MPs and a Minister in a State by
[illegible] MLAs, a commission of inquiry should
be formed automatically.

(*The Statesman*, New Delhi)

E. **Indus Commission's Report
for 1963-64:** The India-Pakistan
Indus Commission in its report for
1963-64, published in India on Sep-
tember 11, said that the Commission's
work was marked by a spirit of good-
will, understanding and co-operation.

[The Commission was set up under the
Indus Waters Treaty signed by India and
Pakistan in 1960.]

The Commission at its three meetings
during the year considered the request of
Pakistan that India should set up wireless
stations for transmitting flood warnings to
Pakistan, and India's request for recovery
and restoration to owners of timber and
other property floating down the river
across the border. The Commissioners
agreed to discuss both issues at further
meetings.

The Commission undertook four general
tours and one special tour of inspection
of the rivers to ascertain facts about
various development works.

A]

F. **Reserve Bank's Annual Re-
port:** In its annual report released
in Calcutta on September 10, the
Reserve Bank of India urged caution
in relation to the size and priorities
of the next Plan.

The report contained prescriptions
for policy which reflect its grave
concern over the strains arising from
the superimposition on development
outlays of expenditures on defence
and refugee rehabilitation.

Taking a serious view of the inflationary
pressures generated by the steep rise in
bank credit which reached an all-time
peak durng the last busy season, the
Bank urged a "strict" scrutiny of Govern-
ment expenditures with a view to "weed-
ing out" less essential items. "Even if this
results in temporarily slowing down of
developmental activities in some areas, it
may in the long run prove beneficial."

Looking to the future the report said
that the strains would persist even on the
most optimistic assumptions about agri-
cultural production and the availability
of foreign exchange. It suggested there-
fore that the "size" and "content" of de-
velopment should be "carefully consider-
ed" from this angle and a solution worked
out to permit growth in "an environment
of stability".

Urging price stability as a major objec-
tive of policy, it pled for a "sizable" in-
crease in the output of consumer goods.
The plea was re-inforced by the specific
recommendation that long-term policy
should give the highest priority to an
increase in agricultural output. Price
incentives for the cultivator and buffer
stock operations were posed as essential
components of a sound farm policy.

The Bank conceded that defence has "a
certain priority." The "onus of adjustment"
should fall, therefore, on other sectors.
Taxation may be used as an instrument of
adjustment but the warning was sounded
that frequent changes would inevitably
have "unsettling effects" on the climate
of investment.

Noting the encouraging increase in ex-
ports in recent years, the report said the
pace must not only be maintained but
improved upon since aid alone cannot
cover the "indispensable" import content
of development. It urged the Centre and
the States to adopt "appropriate" mea-
sures to sustain and encourage exports.
At the same time it called upon the busi-
ness community to make greater efforts.

On the specific issue of price trends,
the Bank pronounced against res-
trictions on inter-State movement and the
system of compulsory levy which had, in
its view, aggravated the shortage of grain.
Other contributory factors were the in-
crease in the holding capacity of big far-
mers and speculative activity by the
trade. The result had been to raise prices
"beyond the level justified by the basic
supply and demand position".

Reviewing the Government measures on
the price front, the report said that "the
all-round co-operation to hold the price
line, which looked so assured in the cri-
tical months of the Emergency, was not
much in evidence subsequently". It came
to the conclusion that in spite of recent
measures, the price level remained a
"highly disturbing" factor in the economy.

Looking at the capital market, it said
that investor confidence had not shown
any significant revival. Share prices
moved up in expection of reliefs in the
last Budget, but disappointment reversed
the trend after March. Total of consents
granted during 1963-64 for issue of capital
was Rs. 138 crores, some Rs. 20 crores less
than last year, but more significant was
the marked decline in equity issues re-
flecting the difficulty in attracting risk
capital.

These domestic difficulties notwith-
standing, the climate for foreign invest-
ment in India had in the Bank's judg-
ment improved. Consents for issue of
capital to non-residents, which is the best
available index of investment intentions,
moved up from Rs. 56 crores in 1961 to
Rs. 130 crores in 1963. (This figure relates
to the calendar year and is not compar-
able therefore with the figures in the pre-
ceding paragraph for the Bank's year
running from July to June.)

The external position of the economy
showed several heartening improvements,
reflected in a rise in reserves. This rise
would have been of the order of Rs. 49
crores over the period April, 1963 to
March, 1964, against a fall of Rs. 14 crores
in the previous year.

The improvement of Rs. 119 crores in
export earnings was attributed to buoyant
conditions in world trade which registered
a growth of 8 per cent in 1963. The Bank
was particularly heartened by the fact
that two-thirds of the expansion in Indian
exports was accounted for by items which
do not receive any special assistance by
way of incentives. The small rise in ex-
ports to Western Europe and the UK was
noted with disappointment which sug-
gested to the Bank that little benefit had
accrued to India out of the expanding im-
ports of this region.

Higher exports combined with a 31 per
cent rise in utilization of foreign aid to
permit larger imports. The import bill
which rose by Rs. 85 crores in 1962-63
went up by a further Rs. 19 crores in
1963-64. The whole of the increase was,
however, on account of Government im-
ports—a rise of Rs. 86 crores on account
of capital equipment imported for public
sector projects, and an additional Rs. 31
crores spent on food imports. Private im-
ports actually fell by Rs. 6 crores.

(*The Statesman*, Calcutta)

[Prev. ref. 5452:INI:I]

G. **Export-Import Advisory Co-
uncil Meeting:** Opening a two-day
meeting of the Export-Import Advi-
sory Council in New Delhi on Sept-
ember 12, the Central Minister of
Commerce, Mr. Manubhai Shah, said
that the estimated foreign exchange
requirements of the Fourth Five-Year
Plan were between Rs. 6,900 and
Rs. 7,800 crores.

He said that a minimum annual rate of
growth of seven per cent during the
Fourth Plan was necessary to combat
under-development and backwardness. To
achieve this minimum rate of growth, he
said, India would undoubtedly require as-
sistance from friendly countries at a
much higher level than during the Third
Plan.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

To achieve the export target of Rs. 5,100 crores during the Fourth Plan period, he called upon the people to make some sacrifices. He appealed to every industry to earmark a portion of its production for export.

About the import policy in the next six months—October-March licensing period—he said that while every effort would be made to meet the increasing needs of defence, agriculture, export-oriented and basic industries, it would not be possible to liberalize the general level of other imports however, the Government would try to provide somewhat larger amounts for the small-scale industries.

Reviewing the economic situation, he said that while the upward trend in industrial production had continued in the first half of the current year, the increase in output was not commensurate with the growing needs of the economy. Nor was it enough to cater to the needs the growing population even in terms of its basic necessities such as food, clothing and shelter.

The recent pressure on prices, which had been causing some concern, basically reflected a short-fall in supplies. It was in this context, he added, that the Prime Minister, Mr Lal Bahadur Shastri had recently emphasized the need for ensuring that plans and programmes should result in increased production in the short run without any slackening on the long-term implementation and not any diversion of funds from one field to another as had been misunderstood in some quarters.

He said that a study team, consisting of officials and non-officials under the chairmanship of Mr. H. C. Mathur, MP, had been appointed to locate the causes of delays in the disposal of applications for import licences and to streamline the procedures.

He said that a committee on tea finances had recently been set up to study the problem of financial requirements of the industry and to suggest ways and means to enable it to undertake developmental measures. In the coming years, it was estimated that the tea industry would have to undertake new plantings of 24,000 acres per year to ensure a steady rise in production.

While congratulating the jute industry and jute goods exporters on the record export performance of 1,334,000 tons in 1963-64, he said that there were reports that the 1964-65 jute crop was not as good as last year due to damage to crops. The Government was watching the situation and necessary arrangements would be made to ensure the adequate availability of jute fibre so as to maintain production at higher levels in this important industry.

Plan to Boost Exports:

While again ruling out any possibility of import liberalization, the Commerce Minister, Mr. Manubhai Shah, announced on September 13 a new export incentive scheme for those industries which were already being given foreign exchange and import licences.

Addressing the concluding session of the Export-Import Advisory Council, he said that "import priorities" would be worked out on the basis of export performance of units in such industries. Those units which showed better export figures would be given higher foreign exchange allocations for their imports than others.

He also thought that substantial foreign exchange earnings could be made by increasing the unit value of the goods already being exported. What he suggested was the increasing diversification of exports so that more finished and processed goods found their way to foreign markets than before.

In effect what he suggested was that labour should be made a foreign exchange earner; by replacing raw finished goods, the cost of labour would form part of the price paid by the foreign buyer.

Among such potentially exportable item, he also included steel. He did not think that steel exports would be at the cost of internal consumption; he envisaged only the export of a certain percentage of the progressively higher steel production. In Asia alone, there was a potential market for steel worth Rs. 153 crores.

To conserve foreign exchange, he suggested establishment of a novel "hospital for broken vehicles" which would completely overhaul vehicles lying idle for want of spare parts, the annual demand for which he estimated at Rs. 100 crores.

He also thought that the time had come for entrepreneurs to start thinking in terms of starting ancillary industries in the country, such as those making spare parts. This would help not only save foreign exchange but also earn it, as the export market for spares was a big one.

Earlier, he had intervened in the discussion—during which representatives of various industries and export promotion councils had suggested ways to increase their exports—to make a strong defence of small industries.

He disagreed with the view that small industries were wasters of foreign exchange, he felt that their rapid development was the only way of ending the present imbalance between the rural and urban sectors and of encouraging new entrepreneurs.

[Prev. ref. 5715:INI:J]

H. Foreign Missionaries: The number of foreign missionaries in India has nearly doubled since Independence—from 2,270 to 4,280.

These figures do not include missionaries from Commonwealth countries. It was decided some time ago that they also should, like other foreign missionaries, obtain "special endorsement for India" on their passports before embarking on the journey.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 2960:INI:E]

I. Annuity Deposit Scheme Comes Into Force: A scheme by which annuity deposits, which are to be made by those with incomes above Rs. 15,000 per annum, as required under the Finance Act of 1964, are to be in the form of 10-year certificates came into force on October 1.

The certificates will be in denominations of Rs. 10, Rs. 100 and Rs. 1,000. After the first year, the depositor will get Rs. 1.25 for every Rs. 10, the rate of interest working out to a little over 4¼ per cent.

A **Gazette of India Extraordinary** containing the text of the annuity deposit scheme was published on September 10. It said:

"From October 1, deposits under the scheme will be accepted at all offices of the Reserve Bank and branches of the State Bank of India and its subsidiaries. Deposits may be made in cash or by cheque drawn in favour of the bank at which the deposit is made. Accompanying the deposit money will be an application for the issue of 10-year annuity deposit certificates for the amount. Where the deposit is made by an unregistered firm, an association of persons or a body of individuals, a declaration regarding its constitution should be attached to the application. Deposits can be made in instalments during a year. When the deposit money is tendered at a bank, an interim receipt will be given. This would, after a given period, be exchanged for annuity deposit certificates issued by the Public Debt office.

"These certificates will be issued in denominations of Rs. 10, Rs. 100, and Rs. 1,000. Beginning from one year after the date on which the deposit has been made, the depositor will receive an annuity of Rs. 1.25 for every Rs. 10. The rate of interest works out to a little over 4¼ per cent. Payment of the annuities will be spread over 10 years. Depositors may draw their annuities either through their bankers or ask for remittance by postal money order. Individual depositors may nominate a person or persons who will receive the annuities in the event of their death.

"In computing the taxable income of the depositor, the amount of the deposit at the rates prescribed in the Finance Act will be allowed as a deduction. The annuities are, however, liable to tax as income. When a depositor receives his annuity deposit certificates he should inform the income-tax officer within 14 days that he has made the deposit and send him the counterfoils of the annuity deposit certificates.

"Application forms for 10-year annuity deposit certifications and other relevant forms will be available at the deposit offices.

"The annuity deposits to be made during the financial year 1964-65 fall into two categories, namely:

"(1) Deposits to be made for the assessment year 1964-65.

"(2) Deposits to be made in advance for the assessment year 1965-66.

"For the current assessment year, deposits may be made on the basis of an assessment of income-tax made by the assessee himself or by the income-tax officer. Where a self-assessment has been made the annuity deposit is required to be made within 30 days of an assessee's filing his income-tax return. However, assessees who have already filed their returns of income or file them by the end of September, 1964, can make their annuity deposits by October 31, 1964.

"In cases where the assessment is made by the income-tax officer, he will also determine the amount of annuity deposit due and call upon the assessee to make the deposit.

"In regard to deposits to be made in advance for the assessment year 1965-66, the income-tax officer will issue a notice of demand. He will also lay down the number of instalments in which the deposit could be made and the dates on which they should be made. However, individuals who have not been assessed to income-tax so far and who expect their assessable income to exceed Rs. 15,000 should themselves make an estimate of their annuity deposit liability. They should inform the income-tax officer accordingly before March 1, 1964, and also make the deposit by that date. Assessees may make their annuity deposits even before they are formally called upon to do so by the income-tax officer."

(*The Times of India*, New Delhi)

[Prev. ref. 5711:INI:A]

J. Gold Control Bill—Select Committee's Recommendations: Among the changes proposed in the controversial Gold Control Bill by the Joint Select Committee are those providing for certain exemptions from making declarations to the Government.

The Committee, whose report was presented to Parliament on September 11, suggested that people owning gold ornaments worth not more than Rs. 25,000 and families owning ornaments worth not more than Rs. 50,000 should be exempt.

Another amendment sought to exempt a family consisting of a husband, wife and one or more minor children from making a declaration if the total weight of the gold owned by them (other than in the form of ornaments) does not exceed 100 grammes.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The Committee also recommended that only those "officers" should conduct searches and make seizures under the Act who had been authorized to do so by the Administrator (to be appointed under the measure) thereby deleting the reference to "any person".

It also suggested an amendment to confer powers on courts to award less than the minimum period of six months' imprisonment for offences under the Act should this be thought necessary for adequate reasons.

The Committee also felt that the existing provision for stamping of primary gold was too rigorous as it imposed an obligation for stamping each piece of gold on private individuals who intend to sell one or two pieces.

It also felt that the stamping of special forms of primary gold, such as wires and leaves, was not practicable. It thus suggested that the Administrator be empowered to exempt such cases from the stamping requirement.

Another amendment sought to enable the Government to impose restrictions relating to the purity and weight of gold in ornaments remanufactured out of gold ornaments containing gold of a purity exceeding 14 carats.

But another change sought to make it clear that no restriction should be made on the purity or form of gold which may be received as an offering by any religious institution.

Nine minutes of dissent, some of them suggesting that the entire Bill be scrapped, were appended to the report.

(*The Statesman*, New Delhi)

[Prev. ref. 5886:INI:L]

K. **Ilyushin Crash In Jammu And Kashmir—Inquiry Commission's Report:** A commission of inquiry which was appointed to inquire into the crash of an IAF Ilyushin aircraft in the Banihal Pass area on February 17 (see page 5777) has ruled out sabotage or misdirection from Pakistan as causes of the accident.

A statement containing the gist of the court's findings was placed on the table of the Lok Sabha on September 14 by the Minister for Defence Production, Mr. A. M. Thomas, in reply to a question by Mr. H. V. Kamath and several others.

Mr. Thomas said it was not in the public interest to lay the entire report on the table. He turned down the demand for the same.

The court was satisfied that no sabotage could have taken place, having regard to the general security conditions which existed and other relevant factors. On the basis of available evidence, no person, or persons could be blamed directly or indirectly for the accident.

The court expressed the opinion that soon after crossing the Banihal Pass the aircraft inadvertently flew into a very turbulent cloud. The flight into the cloud resulted in the loss of control over the aircraft which ultimately crashed at 3-40 p.m. on the mountain side.

The ill-fated aircraft was flying from Srinagar to Udhampur. On board the aircraft were Maj.-Gen. R. S. Grewal, Brig. J. M. Das and other Army officials. The party was going to Udhampur to attend a conference.

According to the report, the aircraft took off from Srinagar at 3-14 p.m. It ceased to have radio contact with Srinagar airport at 3-31 hours, when it was presumably over the Banihal Pass on top of clouds at a height of 14,500 feet.

At 3-32 p.m., the signaller informed the Air Movement Control Centre that he was expecting to cross over Banihal in three minutes and was flying in clouds. At 3-37 p.m., the Jammu airfield picked up the call-sign of the aircraft. It immediately called up the aircraft twice, but there was no response.

The wreckage of the Ilyushin-14 was found on a mountain slope in the Banihal area towards the end of May. Bodies of Maj-Gen. Grewal, Sqn.-Ldr. K. G. Kanitkar (pilot) and Maj. Niranjan Singh were recovered. Some other remnants of human bodies were also found.

The court was satisfied that all the crew and passengers on board were killed as a result of the accident.

It found that the aircraft was fully serviceable for the flight; it was correctly loaded. The crew was competent and physically fit to undertake the flight; the crew was properly briefed and correctly authorized; the pilot was competent to undertake the flight in the weather conditions existing at the time.

Mr. Thomas declined to give any further information in reply to supplementaries by Mr. Kamath and Mr. Tridip Kumar Choudhury.

L. **Ban On Forward Trading In Groundnut Lifted:** The ban on forward trading in groundnut and groundnut oil was lifted on September 15 by the Central Government.

Recognized associations in the country will be permitted to resume forward trading in the two commodities for the new season's contracts, subject to such safeguards as may be imposed by the Forward Markets Commission.

The crop for the next season is expected to be very large and it was, therefore, felt that resumption of hedge trading may fetch the farmers a good price.

[Prev. ref. 5960:INI:G]

M. **Vote Of No-Confidence Against Kerala Government Passed:** The Congress Government headed by Mr. R. Sankar was voted out of office in the Kerala Assembly in Trivandrum on September 8.

Mr. Sankar and his Cabinet colleagues called at Raj Bhavan and submitted their resignation to the Governor, Mr. V. V. Giri. The Governor asked the Chief Minister to continue in office until alternative arrangements were made.

The Samyukta Socialist Party-sponsored no-confidence motion against the 23-month-old Ministry was passed by 72 votes to 50. All the 15 dissident Congress MLAs present in the House voted with the Opposition.

The Speaker adjourned the House sine die after the motion was passed.

Result of the voting was greeted with loud thumping of desks by the Opposition and dissident Congress members. Two independent members—Mr. Balakrishna Menon (until recently an SSP member) and Mr. Mahabala Bandari—were not present at the time of voting.

Poll on the the motion, moved by Mr. P. K. Kunju, leader of the SSP, was demanded by both Mr. C. Achutha Menon, leader of the Rightist Communist opposition and Mr. T. O. Bawa (Congress).

The demand for poll came when the Speaker, after asking those members who were in favour of the motion to raise their hands, had declared the motion carried.

All the 15 dissident Congress MLAs, the Rightist and Leftist Communist groups, the SSP, the Muslim League and three other independent members—Mr. K. V. John, Mrs. Aisha Bai, and Mr. V. R. Krishna Iyer, Communist-supported independent—voted in favour of the motion.

The dissident Congress MLAs included two women members.

All the Congress Party members, totalling 50, voted against the motion. (The House had a strength of 125, excluding the Speaker. One other seat was vacant after the death of Mr. P. T. Chacko.)

Minutes before the voting, Mr. Sankar, concluding his reply to the debate, told the House that "there is no doubt about the result of the voting on the motion." "Don't think that the Ministry alone will go down. With it you (members of the Opposition) will also go down."

He vehemently denied a dissident Congress member, Mr. R. Balakrishna Pillai's allegation that he had spent Rs. 6,00,000 on filling up 20 acres of kayal (backwater) land belonging to him near Trivandrum.

"If you had the slightest responsibility you should have spent four annas for bus travel and gone there to see if I have done anything like that," he told the member.

He said his wife had nine acres of land by way of share of property her father had acquired 60 years ago. "Not an inch of land has been added to it and the boundaries remain the same."

Dismissing as "wild and baseless" another allegation of the dissident Congress member that he had given 125 sovereigns to a goldsmith for making ornaments, he said "not a grain of gold" had been given by him.

"Members should be ashamed of making such baseless and frivolous charges taking advantage of the protection afforded by the forum of the House," he added amidst cheers from Congress benches. "You should play fair in politics. This kind of making baseless allegations would not sell. This kind of allegations against everybody will be the undoing of public life in the State. Only truth and dharma should prevail."

Cabinet Resigns:

The Kerala Governor, Mr. V. V. Giri, accepted with effect from September 10 the resignation of Mr. Sankar and his Cabinet colleagues.

Mr. Giri, in an appeal to the people, sought their whole-hearted support and co-operation in the efficient and smooth running of government.

He said: "As far as government is concerned, I can assure one and all that we will give prompt attention to agricultural and industrial advancement under planned economy.

"Adequate steps will be taken to see that our share in the Plan are fully assured.

"The President hopes that all concerned shades of opinion will so compose themselves in the common field of economic reconstruction as to help Government in fulfilling its tasks and duties."

He said he had taken over the administration of the State from September 10 on behalf of the President.

President's Rule Promulgated:

A proclamation issued from Rashtrapati Bhavan in New Delhi on September 10 said that the President had suspended the Constitution in the State and taken over all powers resting with the Government there. The State Legislature stood dissolved, its authority being transferred to Parliament.

The Central Home Minister, Mr. G. L. Nanda, made a statement to the same effect in the Lok Sabha just before the House rose for the day.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The Governor, on whose report this action had been taken, was appointed the President's agent in exercising all functions so far discharged by the State Government subject to the supervision and control of the President.

The proclamation followed consideration of the matter by the Central Government at the highest level earlier in the day. The basis of this discussion was a report by the Governor, Mr. V. V. Giri, who explained that his consultations with leaders of different political groups in the State had convinced him that there was no prospect of a stable Ministry being formed there following the defeat of the Sankar Ministry.

The President's proclamation explained that following the receipt of a report from the Governor that formation of a Government in the State was impracticable and being satisfied otherwise that this was so, the President had decided under Article 356 to suspend the Constitution in the State.

He had taken over all functions and powers of the State Government and the Governor. He had also assured the authority to transfer these powers to the Governor and an order issued on September 10 said that such transfer had already been made.

This was the second time that President's rule was introduced in Kerala State. It was introduced previously in 1959 following the dismissal of the Namboodiripad Ministry.

The following is the text of the proclamation by the President:

"Whereas I, Sarvapalli Radhakrishnan, President of India, have received a report from the Governor of the State of Kerala and after considering the report and other information received by me, I am satisfied that a situation has arisen in which the Government of that State cannot be carried on in accordance with the provisions of the Constitution of India (hereinafter referred to as the Constitution);

"Now, therefore, in exercise of the powers conferred by Article 356 of the Constitution and of all other powers enabling me in that behalf, I hereby proclaim that I—

"(a) Assume to myself as President of India all functions of the Government of the said State and all powers vested in or exercisable by the Governor of that State;

"(b) Declare that the powers of the legislature of the said State shall be exercisable by or under the authority of Parliament; and

"(c) Make the following incidental and consequential provisions which appear to me to be necessary or desirable for giving effect to the objects of this proclamation, namely:

(i) In the exercise of the functions and powers assumed to myself by virtue of Clause (a) of this proclamation as aforesaid, it shall be lawful for me as President of India to act to such extent as I think fit through the Governor of the said State;

(ii) The operation of the following provisions of the Constitution in relation to that State is hereby suspended, namely:

So much of the proviso to Article 3 as relates to the reference by the President to the legislature of the State;

So much of Clause (2) of Article 151 as relates to the laying of the reports before the legislature of the State;

Article 163 and 164, Clause (3) of Article 166, Articles 167 and 169, Clause (1) and Sub-Clause (A) of Clause (2) of Article 174, Articles 175 to 186 (both inclusive). Clause (3) of Article 187 so far as it requires consultation with the Speaker of the Legislative Assembly, Article 188 and 189, Articles 193 to 196 (both inclusive), Articles 200 and 201, so much of Clause (3) of Article 202 as relates to salaries and allowances of the Speaker and the Deputy Speaker of the Legislative Assembly, Articles 208 to 211 (both inclusive), the proviso to Clause (1) and the proviso to Clause (3) of Article 213; and

So much of Clause (2) of Article 323 as relates to the laying of the report with a memorandum before the legislature of the State;

(iii) The Legislative Assembly of the said State is hereby dissolved;

"(d) Any reference in the Constitution to the Governor shall in relation to the said State be construed as a reference to the President, and any reference therein to the legislature or Legislative Assembly of the State shall, insofar as it relates to the functions and powers thereof, be construed as a reference to Parliament, and in particular the references in Article 213 to the Governor and to the legislature or Legislative Assembly of the State shall be construed as references to the President and to Parliament respectively:

"Provided that nothing herein shall affect the provisions of Article 153, Articles 155 to 159 (both inclusive), Article 299 and Article 361 and Paragraphs 1 to 4 (both inclusive) of the Second Schedule or prevent the President from acting under Sub-clause (1) of this Clause to such extent as he thinks fit through the Governor of the said State;

"(e) Any reference in the Constitution to Acts or laws of or made by the legislature of the State shall be construed as including a reference to Acts or laws made, in exercise of the powers of the legislature of the State, by Parliament by virtue of this proclamation, or by the President or other authority referred to in Sub-clause (A) of Clause (1) of Article 357 of the Constitution and the Interpretation and General Clauses Act (Act VII of 1125), as in force in the State of Kerala and so much of the General Clauses Act, 1897 (10 of 1897) as applies to State laws, shall have effect in relation to any such Act or law as if it were an Act of the legislature of the State."

N. Mr. R. V. Reddiar Elected Leader Of Pondicherry Legislature Congress: Mr. R. Venkatasubba Reddiar was unanimously elected on August 31 Leader of the Pondicherry State Legislature Congress Party.

All the members of the party were present. Mr. Edouard Goubert, Chief Minister in the outgoing six-man Ministry, was also present.

Mr. R. Venkataraman, Industries Minister of Madras, conducted the election.

The 30-member Assembly consists of Congress 22, Communist-sponsored People's Front 4, and Independents 4.

Cabinet Sworn-in:

A four-member Cabinet for Pondicherry was sworn-in on September 11 by the Lt.-Governor, Mr. S. L. Silam.

The Cabinet, headed by Mr. V. Venkatasubba Reddiar, includes Mr. A. S. Kankeyan, former Speaker of the Assembly, Mr. P. Shanmugham, and Mr. V. M. C. Varada Pillai, a former Minister.

[Prev. ref. 6042:INI:H]

O. Mr. D. Z. Palaspagar Resigns From Maharashtra Cabinet: The Maharashtra Prohibition Minister, Mr. D. Z. Palaspagar, was dismissed on October 1 by the Governor, Mrs. Vijayalakshmi Pandit, acting on the advice of the Chief Minister, Mr. V. P. Naik.

The Governor used her powers under Article 164 of the Constitution to dismiss Mr. Palaspagar.

So far the demand for Mr. Palaspagar's resignation had been attributed to his domestic troubles—the divorcing of his wife who, in turn, filed a case against him alleging that her signature had been obtained under threat and coercion. Mrs. Palaspagar's complaint and a defamation suit filed subsequently by Mr. Palaspagar against his wife and the editor of a Marathi paper are pending in courts.

But now Mr. Naik took this extreme step, following complaints that Mr. Palaspagar had misused official machinery for his personal ends.

Mr. Naik explained that he had received complaints during the past six months that Mr. Palaspagar had ordered two officials of his home district to go to another district to bring undue pressure on some party. He (Mr. Naik) had, however, refrained from taking any "harsh" step for so long because he felt that Mr. Palaspagar was in a "disturbed mood" owing to domestic trouble. By the middle of August, however, certain stories appeared in newspapers which tended to bring the Ministry into disrepute. Mr. Naik had accordingly sought the advice of the Prime Minister and the Congress President who had agreed that Mr. Palaspagar should be relieved of his post.

He said that Mr. Palaspagar had defied the Congress President's directive calling upon him to resign within a week. Mr. Naik decided to take action against him 12 days after the directive.

He added that every Congress Minister had to observe certain discipline. He could not behave as he liked. Defiance of the Congress President's directive was not a small thing.

P. Co-operative Project To Be Launched In Maharashtra: A Rs. 20-crore co-operative project which when complete will include Asia's biggest poultry farm producing 1.5 million eggs a day, a newsprint factory and a bacon and ham factory, is to be launched shortly in Maharashtra.

The project aims at raising in about 10 years the per capita income of people living in a pocket of 150 villages from Rs. 500 per annum to Rs. 2,000. This will also bring prosperity to the neighbouring districts.

According to Mr. Y. J. Mohite, Deputy Agriculture Minister of Maharashtra and one of the prime movers of the project, co-operative schemes including a sugar mill, a power alcohol plant and some ancillary units have raised the income of people in 150 villages of Satara district from Rs. 200 to Rs. 500 per head in four years.

The bulk of the finance for the project will come initially from the Government and the Industrial Finance Corporation. But once established its expansion is expected to be mainly self-financing.

The project will mark a new stage in the progress of the co-operative movement in India. While in most of the States it has remained at the elementary level of agricultural credit societies—many of them defunct—in Maharashtra it has reached the secondary stage of co-operative processing.

The poultry farm to be started shortly will cost Rs. 84,00,000 initially. Covering an area of 150 acres and with 10,000 birds it will also have a feed factory, a cold storage, incubators and a central hatchery.

Within five years the investment on the poultry will be increased to Rs. 4.5 crores. Every family in about 100 villages will keep a small poultry farm with 25 to 500

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

birds. The eggs will be collected and marketed by central co-operatives. The number of birds with members of co-operatives is expected to be 2.1 million.

Four co-operative sugar mills in the region—Krishna, Shetkari, Varna and Panchganga—will start the newsprint plant, which will have a capacity of 100 tons a day and will use the cane crushed by them as raw material. It will cost Rs. 12 crores and is expected to go into production within five years.

The bacon and ham factory will be in the area served by the Krishna Sahkari sugar factory. About 5,000 families will have their own piggeries and sell 200 pigs a day to the factory. Pigs have been imported from America and Denmark for this scheme.

The Krishna Sahkari sugar mill which has initiated the poultry, newsprint and piggery schemes is planning a number of other projects.

Eight co-operative societies are being formed to provide lift irrigation for sugarcane fields. Water is to be lifted from the Krishna with modern pumps.

The co-operative also intends to start a fertilizer factory, a modern workshop and some ancillary industries.

JAPAN

A. Japan-US Security Consultative Committee Meeting: The fifth meeting of the Japan-US Security Consultative Committee was held in Tokyo on August 31.

An official Press release issued by the Foreign Office after the meeting stated that the Committee members exchanged views on "the current international situation as it affects the security of Japan and the Far East and discussed matters relating to the defence of Japan." All the participants answered questions at a Press briefing held immediately after the meeting.

The Japanese Foreign Minister, Mr. Etsusaburo Shiina, insisted that even if and when China carried out its nuclear explosion this would cause no change in Japan's long-stated position that it would not possess atomic weapons under any circumstances.

Reports said that Japan and the United States were in agreement in dismissing the military importance of a nuclear explosion by China which has been working feverishly towards that end for the past several years.

They also shared the view, however, that when China exploded a nuclear device it would have a great psychological impact on the Asian countries in this area including Japan.

[Prev. ref. 4804:JAP:A]

B. Military Action Against North Viet-Nam From US Bases—Soviet Warning: The Soviet Government warned Japan on September 10 that she could be drawn into an armed conflict if US bases on Japanese soil were used for military action against North Viet-Nam.

The Soviet statement said the Japanese Government must bear a major responsibility for the "aggravation of the situation" in South-East Asia and for what were termed provocations in and near the Gulf of Tonkin (see pages 6019 and 6032).

Tass said the statement had been handed to the Japanese Foreign Ministry.

The statement added: "This re-affirms the validity of the warnings voiced by the Soviet Government more than once against the danger the Japanese-American Military Treaty and the deployment of foreign military bases on Japanese territory is fraught with, above all for Japan herself".

The statement charged that Japan supported USA by providing territory for the preparation and carrying out of the attack.

(*The Times*, London and *The Japan Times*, Tokyo)

[Prev. ref. 6032:VND:A]

C. Credit To India: The Foreign Office said on September 2 that Japan would extend India a credit of 21.6 billion yen ($60 million) for its Third Five-Year Plan.

The Foreign Ministry announcement said the credit would be advanced by Japan's Export-Import Bank together with private Japanese banks to assist in the financing of purchases from Japan of machinery and commodities required for the economic development of India.

The yen credit—the fourth to India—will also be used for financing fertilizer factories and steel plant and other projects.

Out of the total credit, 144 billion yen ($40 million) will be repayable in 15 years and the remaining 8.2 billion yen ($20 million) in 18 years.

The announcement said after concluding the Japan-India talks representatives from both sides expressed 'mutual hope and confidence that relations would be further enhanced and promoted by the ever-increasing economic co-operation between Japan and India."

It was learnt that the bulk of the credit intended for projects would be taken up by the Durgapur alloy steel plant and the Gorakhpur and Gujerat fertilizer projects. The non-project credit will be utilized for the purchase of plant and equipment, steel rolls, insulators, power tillers and other goods like last year.

A small portion may be allocated to the proposed electric foundry to make castings for the Bhopal Electricals if satisfactory agreement is reached in the current negotiations between the Indian Government and Hitachi.

Meanwhile, India's purchase of ships, machinery and equipment from Japan on a deferred payment basis this year (quite apart from purchases under the yen credits) may total between $55 million and $60 million. This would be an increase of about 30 per cent over the figure for 1963 which amounted to $40 million.

Of the planned purchases for 1964, ships are expected to take up about $19 million to $20 million and textile machinery between $10 and $15 million. Other miscellaneous items like oil pipes and sheet piles will take up a few million dollars.

Negotiations are under way for the inclusion of a $20-million thermal power project for Ramagundam in Andhra Pradesh for purchase on the same basis and if the Japanese Government gives its approval for this, as it is expected to, the total figure comes to about $60 million. (The thermal power plant project for Ramagundam being promoted by Dr. J. D. Teja of Jayanti Shipping Company, is somewhat unique in conception in that, under it, he will be entirely responsible for putting up the power plant and this includes raising the funds required. The plant will then be handed over to the State Government as a going concern. The project is acceptable to the proposed collaborators in Japan who appear to be confident of obtaining the Japanese Government's approval for export on a deferred payment basis).

India also wants to purchase products like steel and fertilizer and include, if Japan agrees, certain projects which cannot be included in the yen credits.

The ships planned to be ordered this year include two bulk carriers for the Great Eastern Shipping Company, an oil tanker for the Ratnakar Shipping Company, and a bulk ore carrier for Chowgule of Goa. Agreements for the first three ships have already been reached between the respective parties concerned and their approval by the Japanese Government is regarded as certain. However, there is some doubt as to approval for the bulk carrier for Chowgule. The cost of ships ordered last year on the same basis amounted to $19 million.

As regards textile machinery, last year's purchases amounted to $7 million as against plans for this year's $10 million to $15 million. Among the other items, $7 million worth of oil pipes were ordered last year.

MALAYSIA

A. Further Security Measures: The whole of Malaysia on September 6 became a security area, and the police and security forces were given wide powers to deal with external aggression and internal subversion.

A week before, the nation was placed under a State of Emergency because of growing Indonesian hostility.

The states of Malacca, Johore, and Negri Sembilan were declared to be a security area on August 17 after armed Indonesians landed on the west coast of Johore.

A royal proclamation, effective from September 6, extended the restriction to all the other states in Malaya and to Singapore, Sarawak, and Sabah.

The decision was taken "because public security is seriously threatened by reason of action taken by a substantial body of persons to cause a substantial number of citizens to fear organized violence against persons and property".

Penalties for offences committed in the security area are:

(1) Death for possession of fire-arms, explosives or ammunition.

(2) Death or life imprisonment for consorting with armed terrorists or subversives.

(3) Life imprisonment for demanding, collecting or receiving supplies for terrorists or subversives.

(4) Imprisonment not exceeding 10 years for failing to give information to the police.

All people over the age of 12 must carry an identity card, which bears a photograph and thumbprint.

Police officers have been given authority to impose curfews. The internal Security Act, under which the proclamation was made, gives the Government power to gazette danger zones where unauthorized persons may be shot at sight. The regulations empower the police to arrest any suspect without a warrant; and they, or any member of the security forces, may without warrant stop and search any vehicle, vessel, train, aircraft or individual whether in a public place or not.

A magistrate or coroner may dispense with holding inquiries or inquests on any police officer or member of the security forces, and an inquest will not be necessary if a coroner is satisfied that a civilian is killed in the security area in an operation.

The Prime Minister, Tengku Abdul Rehman, told a conference on September 5 that he was willing to send pro-Indonesians back to Djakarta so that they could see for themselves the conditions under which the people were living. Malaysia was facing one of her most critical moments, but he emphasized that there were plenty of opportunities for people of all races to live in peace.

Dato Ismail, the Minister of Home Affairs, and a team of four flew from Kuala Lumpur the same day (September 5) to New York to present photographic and documentary evidence of Indonesian aggression to the United Nations Security Council.

Parliament Approves State Of Emergency:

On September 10, Parliament unanimously approved the Government's imposition of a State of Emergency throughout the Federation.

It did so after hearing Tengku Abdul Rehman accuse certain unnamed political parties in the country of actively collaborating with Indonesia in its campaign to smash the Federation.

He emphasized that the landings by sea and air of Indonesian regular and irregular armed forces in Johore recently (see page 6045) could not have been achieved without the co-operation of Indonesian agents and communists in Malaya.

He also accused Indonesian fifth columnists and communist agents of instigating the racial riots in Singapore. Volunteers from Malaya who planned to liberate West Irian had undergone intensive, anti-Malaysian political indoctrination in Indonesia and had been sent back to Malaya in December, 1962 to carry out subversion. In Malaya and Singapore members of some political parties, legal and illegal, began to support Indonesia and joined disloyal elements working to try to crush Malaysia.

Some political organizations, he continued, had told youths not to defend the country and not to register for national service. The disturbances in Singapore had been caused by Indonesian agents in the hope that communal clashes would tie the Government's hands in dealing with external aggression. It was hard to control the troubles because the influence of Indonesian agents in the areas where the trouble broke out—the predominantly Malay district of Gelang—was strong.

He disclosed that in Sabah and Sarawak the enemy casualties up to July 31 were 208 killed, 150 captured, 55 surrendered, and 83 wounded and escaped, against 45 members of the security forces killed and 60 wounded. He said there was evidence that Indonesia intended to harass Malaysia further and it was obvious that, unless the Government acted now, the situation would worsen. The glaring fact remained that the Indonesians would never have been able to land on the mainland without the support of disloyal elements and communists.

MONGOLIA (Outer)

A. Reported Massing Of Chinese Troops On Border: Yugoslav sources have reported that China is concentrating strong military forces along the 2,500-mile Sino-Mongolian border.

A despatch by the Moscow correspondent of **Belgrade Radio**, claiming that this latest military demonstration was causing serious apprehension in Ulan Bator, the Mongolian Capital, was given front-page prominence in the newspapers on September 10.

According to the Yugoslav correspondent, the Mongolian Government had expressed grave concern over the concentration of Chinese troops, and although it was thought unlikely that Peking would take military action, Mongolian frontier patrols have been re-inforced.

In view of the length of the border it was difficult to have an effective control, the correspondent wrote, and it was therefore still not possible to see what precisely was the purpose of China's latest move.

The fact that the Chinese troops had also been concentrated on the border with India was said to give more ground for suspicion that China may be having "intentions other than merely to prevent people from fleeing into Outer Mongolia."

The correspondent recalled that in an article published in **Pravda**, Mr. Pospelov, a member of the Soviet Communist Party Central Committee, had accused Peking of having territorial pretensions against its neighbours.

The correspondent said that as Mr. Mao Tse-tung had raised the issue of China's territorial claims in his conversations with Japanese socialists, Moscow expected Peking to raise this issue in a concrete form.

Criticism Of Mr. Mao Tse-tung:

Earlier, on September 9, Mongolia criticised the recent statements by Mr. Mao Tse-tung, Chairman of the Chinese Communist Party, and denounced his "expansionist moves and unfounded territorial pretensions regarding neighbouring Socialist countries."

The attack came in an "authorized statement" published by the Mongolian **Monzame** Press Agency and reported by **Tass**.

The statements it criticised were made by Mr. Mao Tse-tung to a group of Japanese Socialists on July 10.

The Mongolian statement condemned the attitude of "Chinese nationalists, who have always been upset by the existence of an independent Mongolian State."

TURKEY

A. Oil Strike: A London report on August 23 said that Mobil Exploration Mediterranean had made the richest oil discovery in the history of the country in the Selmo area of south-eastern Turkey.

Further development drilling is now in progress and two more wells are being tested. The new field is on a 54,221-acre tract in which Mobil took over an 80 per cent interest from Panoil of Dallas, leaving Panoil with the remaining 20 per cent. The oil in the field is relatively light compared with the heavy crude in the Siirt region which is processed at the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

State refinery at Batman for local consumption. The Turkish Government has approved a project for a 350 to 400-mile crude pipe-line to some point on the Mediterranean coast, either the Caltex-TPAO refinery at Izmir or the Shell-Mobil-BP plant at Mersin, but the heavy crude create some pipeline problems. A sizeable reserve of lighter crude would make the pipeline project about 20-30 per cent cheaper to build and much cheaper to operate.

N. V. Turkse Shell, the only other private company with any significant production in Turkey, has also discovered a new field of light crude in the same general region as the Mobil discovery, which has produced 600 b/d of 31° gravity in a zone the company found at 7,912 feet.

In an interview with **Petroleum Intelligence Weekly** Mr. Kemal Aksal, head of Turkey's State-owned oil company, said that within a few years the country may be able to meet all its own crude requirements. At present, the production of 72,000 b/d covers only one-fifth of local demand, but by 1968 production is expected to reach 90,000 b/d.

[Prev. ref. 6010:TUR:B]

B. Changes In Armed Forces: Important changes in the higher ranks of the Turkish armed forces were announced in Ankara on August 21.

General Ali Keskiner, the Commander-in-Chief of the Land Forces, was replaced by General Cemal Tural, Commander of the Second Army and former Martial Law Commander in Ankara. General Keskiner became a member of the Supreme Military Council.

Lieutenant-General Refik Tulga, Commander of the Third Army based on Erzurum, became Deputy Chief of the General Staff in place of Lieutenant-General Memduh Tagmac, who took over the Third Army.

Vice-Admiral Hayadar Olcaynoyan, the Commander-in-Chief of the Fleet, became head of the Turkish standing group in Washington. His place was taken by Rear-Admiral Bahattin Ozulker. General Cevdet Sunay, the Chief of Staff, had his term of duty extended by a year.

Some of the changes—which altogether affected two full generals, three lieutenant-generals, 12 major-generals, a vice-admiral and two rear-admirals—may be connected with the internal stresses in the armed forces resulting from the abortive coup in May, 1963.

(*The Times*, London)

[Prev. ref. 5287:TUR:A]

C. Proposal For Joint Chamber Of Commerce For Turkey, Pakistan And Iran: A report prepared by the Union of Chambers of Commerce suggesting ways and means for the establishment of a joint Chamber of Commerce for Turkey, Pakistan and Iran was submitted on September 3 to the Ministry of Foreign Affairs and the Ministry of Trade.

The joint Chamber of Commerce, according to the report, will include a Conference, a Council and a Secretary. Administration will be the responsibility of the Secretariat, and the General Secretary will be a regular member of the Conference and the Council.

Members of the Council will be elected out of the members of the executive bodies of the Tehran Chamber of Commerce and the Unions of Chambers of Commerce of Pakistan, and Turkey. The number of members elected from each country may be between three and five. The head of the Council will be elected from among the heads of Unions of Chambers of Commerce in Pakistan, and Turkey and the head of the Tehran Chamber of Commerce, by rotation.

The Conference will include 10 members from each of the three countries out of the members of the executive bodies of the Union of Chambers of Commerce of Pakistan and Turkey and the Tehran Chamber of Commerce, as well as out of well-known personalities of each country in the field of commerce, industry, finance, transport, insurance and economics.

The headquarters of the joint Chamber of Commerce will operate in Tehran, Karachi and Ankara alternatively. The first centre of the operations of the joint chamber of commerce will be Tehran. Personnel will be provided by Pakistan, Turkey and Iran. An equal contribution will be made by the three countries towards the expenditure involved.

(*Dawn*, Karachi)

VIET-NAM (RVN)

A. Anti-Khanh Riots—Changes In Government: The Prime Minister, General Nguyen Khanh, proclaimed an Emergency Constitution on August 16 with himself as President.

This action provoked violent demonstrations which gained considerable momentum in a week.

Student demonstrators on August 23 sacked the Government radio station in Saigon and threatened to burn down the Information Ministry unless the Government bowed to demands for more freedom.

The students complained that the radio had distorted the outcome of political talks the previous week between student leaders and President Nguyen Khanh, falsely reporting that they were satisfied.

About 500 students held two rallies during the day where leaders called for the removal of President Nguyen Khanh, scrapping of the new Constitution and shifting the Government from military to popularly elected civil rule.

The students demanded that the Constitution be annulled, that curfew and censorship be lifted immediately, that all the generals return to military units, that all members of the late President Diem's party be removed from the Government and that the Military Revolutionary Council be replaced by a civilian Revolutionary Council.

While the students were meeting, a crowd of about 3,000 Buddhists gathered at the new national pagoda on the outskirts of the Capital for a series of speeches insisting on religious freedom and demanding "elimination" of alleged anti-Buddhist elements remaining in high places from the former regime of President Diem.

Major-General Nguyen Khanh (37) became President of South Viet-Nam only ten days earlier, 6½ months after he seized power as Prime Minister in a bloodless coup.

He ousted Major-General Duong Van Minh ("Big Minh"), leader of last year's coup against President Diem, and installed him as token Head of State.

On August 16, the 58-man military junta elected General Khanh as President, completing the ousting of General Minh—and causing a wave of unease at what seemed to be the imposition of a "military dictatorship."

[A keen poker-player, General Khanh was born in South Viet-Nam in 1927, graduated from Dalat Military Academy in 1947, and joined the Viet-Minh underground resistance against the French. But after a time he joined the French, receiving higher military training both in France and the United States, and became aide-de-camp successively to General De la Tour, Commander-in-Chief, Cochin-China and General Nguyen Van Xuan, Prime Minister, under Emperor Bao Dai in 1949.]

Student and religious agitation flared into violence for the second successive day on August 24.

Youths, urged on by student leaders, stormed the Ministry of Information in Saigon a few hours after a band of teenagers had set fire to the Students' Association headquarters, wrecking the building.

A crowd of several hundred persons went past scarcely resisting police cordons at the Ministry of Information, broke down a heavy gate, and entered ground-floor offices. They made no attempt to move upstairs, where the Minister's office was, but they tipped over desks and tore up files in the lower offices.

Colonel Tran Ngoc Huyen, Deputy Minister of Information, came down to meet the students, stood patiently as they poured out their complaints, and then promised to relax Press censorship. On other demands he referred the students to the presidency.

Incidents were also reported in the northern cities of Hue, Da Nang and Qui Nhon. Reports from Da Nang said two persons were killed and number of others injured when a crowd estimated at 1,500 entered a primarily Catholic enclave and set houses on fire. Part of the crowd stoned an American enlisted men's billet nearby after American soldiers had taken photographs of them, but no casualties were reported.

In Qui Nhon, Martial Law was declared after clashes between Buddhists and Catholics, and a night curfew was imposed. Houses and shops were burned and US military personnel were confined to their quarters.

By August 25, Buddhist and student pressures became too powerful for Gen. Khanh and his supporters to resist. They decided to step down. As student demonstrators shouted outside the gates of the Presidential office, the Military Revolutionary Council voted to retract the Constitution of August 16, under which General Khanh was serving as President.

A proclamation read to thousands of demonstrators declared that the Council would meet once more to elect a Head of State and then disband. It had governed the country since the overthrow of President Ngo Dinh Diem on November 1, 1963.

The proclamation said the man named Head of State would have the responsibility of convening a "national congress in order to achieve a national structure consistent with the aspirations of the people". The new structure would have the purpose "of struggling against the communists, neutralists, colonialists and all other forms of dictatorship and of rebuilding the country in freedom and democracy".

Thousands of youths paraded the streets earlier in the day to continue political and religious demonstrations. As the students were demonstrating, a large plastic explosive went off in the Hotel Caravelle, gutting rooms on the entire fifth floor.

The day's meetings followed outbreaks of anti-Government violence in four major cities. Fire, destruction and deaths

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

brought the Buddhist-Roman Catholic conflicts and the opposition to General Khanh's emergency rule to a head.

At a secret meeting between General Khanh and three of the country's most influential Buddhists—Thich Tam Chau, Thich Tri Quang and Thich Thien Minh—on August 24 the Buddhist Secular Institute presented a firm ultimatum to General Khanh, asking that he withdraw his 'strong man' rule.

The combination of Buddhist, student and Viet-Cong agitation in Saigon turned the Capital into a city verging for a few hours on the brink of anarchy. Students again broke into the national radio station. They caused damage but failed to get on the air.

A communique on the replacement of President Khanh, broadcast by Saigon Radio said: "At a meeting this morning at Armed Forces High Command, the Military Revolutionary Council decided:

"(1) To repeal the August 16 charter;

"(2) To call an urgent general assembly of the Military Revolutionary Council to elect a new leader for the nation;

"(3) After the election of a national leader the Military Revolutionary Council will dissolve itself and each member will return to his military functions to lead the struggle against Communism, neutralism, colonialism and all forms of dictatorship;

"(4) To entrust the national leader with the summoning of a national convention to set up national institutions in keeping with the aspirations of the whole people in the struggle against Communism, neutralism, colonialism and all forms of dictatorship in order to rebuild the nation in freedom and democracy;

"(5) Pending these changes the present Government will direct the affairs of the nation."

Provisional Accord:

On August 26, the Generals reached a provisional accord to "lead the nation" soon after Government troops opened fire to quell thousands of demonstrators threatening to storm the military headquarters.

After arriving at this uneasy compromise, the Military Revolutionary Council, the country's supreme governing body since the overthrow of Mr. Diem, dissolved itself.

During the final hours of the Council's deliberations, a predominantly Roman Catholic crowd was pressing at the gates of the military headquarters where the meeting was taking place, demanding an end to the three-day-old crisis. At the same time street fighting between Buddhists and Roman Catholics broke out in several parts of central Saigon, taking at least six lives and causing many more injured.

For the first time since the start of the street violence, Government troops on August 27 opened fire on a mob. Six persons were seen being carried away in ambulances, at least four of them dead.

A joint communique from the Saigon Archbishopric and the Buddhist Secular Institute urged calm. A similar appeal from the three Generals was broadcast and distributed in leaflets dropped from helicopters over streets where angry crowds were forming.

The Military Revolutionary Council's final communique said:

"The Republic of Viet-Nam armed forces will return to their purely military mission of protecting the nation and fighting communism, neutralism, colonialism, and all forms of dictatorship and betrayal.

"The present Government will temporarily carry on the affairs of the nation and will convene a national convention within two months. The national convention is entrusted with the task of electing a provisional leader for the nation and establishing....national institutions which will oppose communism, neutralism and colonialism...."

Neither the communique nor the Generals' appeal stirred much hope for early stability in the Government.

Under the provisional accord the country was to have collective leadership under the triumvirate called the Committee for National Guidance.

The Committee was to comprise the former President, Gen. Minh, Gen. Khanh, and Gen. Tran Thien Khiem who was recently promoted to become the highest ranking General.

Acting Premier Appointed:

It was announced on August 29 that Major-General Khanh was ill and that the Vice-Premier, Dr. Nguyen Xuan Oanh, had been appointed by the triumvirate as acting Prime Minister.

Dr. Oanh, former economics lecturer at Harvard University, told a news conference that Gen. Khanh was at a resort under medical treatment following the extreme strain of the recent crisis.

He said there would be no re-shuffle and the Government was still that of Gen. Khanh.

The announcement was widely interpreted as confirming reports that Gen. Khanh had been virtually squeezed out of power by Gen. Duong Van Minh and Gen. Tran Thien Khiem, the two other members of the triumvirate.

Some reports indicated that Gen. Khanh had been included in the triumvirate and kept as Premier largely because USA had made commitments to him and might find it difficult to support a new leadership which excluded him.

Dr. Oanh described Gen. Khanh as "quite ill, perhaps mentally more than physically," but added that he did not mean he was mentally ill. It was expected that he would need "a long period of medical treatment."

Asked how the triumvirate would operate without Gen. Khanh's presence, he said he was sure the General was being consulted on all main decisions.

The Government established by Gen. Khanh last February was asked to carry on for two months and call a national convention to prepare for democratic institutions.

Maj.-Gen. N. Khanh Resumes As Premier:

Major-General Nguyen Khanh returned to Saigon on September 3 as Prime Minister and began attempting to form a new Government.

His first actions were to dissolve the military triumvirate created in the last week of August and to restore Gen. Duong Van Minh as Head of State.

These moves suggested General Khanh's desire to return to the type of Government he had headed before August 16, when he ousted General Minh and greatly expanded his own powers under a new Constitution. This change was followed by public protests.

It was believed that the resignation of Dr. Nguyen Ton Hown, First Deputy Prime Minister and one of General Khanh's chief political rivals, hastened his return. Dr. Nguyen Ton Hown is a leader of the nationalistic Dai Viet movement.

In Hue, meanwhile, General Duong Van Minh delivered a stern warning to Buddhist and student groups that they must support the central Government. "We must have unity to avert catastrophe", he said, "and we must unite before the country falls to the communists."

He also urged the Buddhists to end their distrust and harassment of the Can Lao, a predominantly Roman Catholic political party formed by supporters of the late President Ngo Dinh Diem. "Not all members of the Can Lao are criminals", he said. "Those who are should be tried for their acts. The others should be let alone."

Dr. Nguyen Xuan Oanh, who was acting Prime Minister during General Khanh's absence, promised audiences in Hue that a 15-member citizens' committee, representative of the diverse population, would soon be named.

Officers of the United States military assistance command displayed no optimism as they discussed military operations during August against the Viet-Cong insurgents. Although patrols by the Government forces were substantially intensified, actual contact with the Viet-Cong declined. In almost 63,000 separate actions in August, the Government Army encountered the communist guerrillas on only 360 occasions.

American officers were inclined to blame the Army's intelligence-gathering net-work.

(*The New York Times*)

[Prev. ref. 6024:RVN:D]

B. British Support To US Policy: The British Foreign Office issued a statement on September 1 re-affirming sympathy and support for the struggle of the people of South Viet-Nam to maintain their independence.

It also said that Britain intended to expand her programme of technical assistance to that country.

The statement came at the end of the discussions between the British Foreign Secretary, Mr. R. A. Butler, and Mr. Henry Cabot Lodge, special emissary of the US President who had been on a tour of NATO capitals. (An account of his earlier talks with NATO leaders appeared on page 6048).

The statement said that the Ministers had reviewed the threat to the Republic of Viet-Nam from Communist rebellion and subversion directed and inspired from the North, and the efforts of the Viet-Namese Government to defeat this menace, which had wide implications for the survival of freedom elsewhere in South-East Asia.

They discussed ways in which friendly Governments could assist the Republic of Viet-Nam. Mr. Butler described the assistance Britain was already giving, which included the services over the last three years of the British advisory mission in Saigon, the provision of training last year for over 300 South Viet-Namese police and civil guards, and other technical assistance projects.

Mr. Lodge's trip arose primarily out of the incidents in the Gulf of Tonkin in July. President Johnson was anxious that his allies should understand the policies that lay behind the retaliation against North Viet-Nam.

Most of the NATO countries, except France, gave reasonably full support in public, but there were private fears that the United States would extend the war.

The British Government has been more forthcoming than most. There was immediate support for the retaliation. There is a British advisory mission in South Viet-Nam and a certain amount of aid is provided under the Colombo Plan.

YEMEN

A. UN Mission To Be Withdrawn: The UN Secretary-Gene-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ral, U Thant, announced on September 2 his decision to terminate the UN Observer Mission in Yemen, but expressed the hope that the Governments of Saudi Arabia and UAR would make sincere efforts to settle their "needless and meaningless dispute" over Yemen.

U Thant in his report to the Security Council regretted that the Yemen Mission which was set up to observe the disengagement agreement in Yemen between UAR and Saudi Arabia, had been able to see only limited progress. But, he said the regret was tempered by the fact that the potential threat to international peace and security had been greatly diminished by the presence of the mission.

He said it was not possible to assess the likely effect of the withdrawal of the Mission at this time.

Earlier in his report, he said UAR military operations in Yemen had met with some success and additional tribes there had rallied to the Government of the Yemen Republic. There was indication that Yemeni Royalists had continued to receive military supplies from external sources. The report said the movement of increased traffic from Saudi Arabia to Royalist areas in Yemen had been observed, but no military supplies had been discovered.

The UAR authorities had shown UN Observers weapons and ammunition recovered from Yemeni Royalists from whose markings it would appear they were supplied by USA to Saudi Arabia in 1964. Saudi Arabian authorities, however, had emphatically denied that any such material had been given by them to the Royalists.

[Prev. ref. 6025:YEM:C]

ASIA OUTSIDE ASIA

SUMMARY: Financial Statement Of World Bank; British Exports To Middle East; USA Launches "Explorer XX".

A. Financial Statement Of World Bank For 1963-64: The International Bank for Reconstruction and Development (World Bank) reported a net income of £97,500,000 for the fiscal year ended June 30, 1964.

A United Nations hand-out on August 21 said that loan commissions earned during the year amounted to $33,200,000 and were credited to the Special Reserve, increasing it to $288,100,000. These figures compared to net earnings of $82,700,000 and loan commissions of $31,300,000 in the fiscal year 1963.

Effective July 1, 1964, the treatment of a portion of loan charges, amounting to one per cent a year of the disbursed and outstanding portion of loans held by the Bank, as commission, and its automatic allocation to the Special Reserve, was discontinued. With minor exceptions, all income from loans thereafter will be considered as regular income, and future allocations to the Special Reserve will be a matter for the Bank's Executive Directors to decide.

Net income for the fiscal year 1964 was credited to Net Income Account, in conformity with a resolution adopted by the Executive Directors in September, 1963, and noted with approval by the Board of Governors.

On July 30, 1964 the Executive Directors allocated $47.5 million from the year's net income to the Supplemental Reserve, increasing it to $605.6 million. This increased the total reserves, including the Special Reserve, to $893.7 million. As to the remaining $50 million of the year's net earnings, the Executive Directors recommended to the Board of Governors, for action at its annual meeting in Tokyo, that this sum be transferred to the Bank's affiliate, the International Development Association.

Effective July 1, 1964, the annual commitment charge on undisbursed portions of the Bank's loans, including existing loans, was reduced from ¾ of 1 per cent to ¾ of 1 per cent.

Gross income for the fiscal year 1964, exclusive of loan commissions, was $219.1 million, compared with $203.9 million in the preceding year. Expenses, which included $163.6 million for interest on Bank borrowing and other financial expenses, totalled $121.7 million, compared with $121.2 million last year.

During the year, the Bank made 37 loans totalling $809.9 million, compared with a total of $448.7 million last year. The loans were made to Algeria, Chile (two loans), Formosa, Colombia (two loans), Costa Rica, Denmark, Ecuador, El Salvador, Ethiopia, Finland, Iran, Japan (two loans), Liberia, Malaysia (two loans), Malta, Mauritius, Mexico, New Zealand (two loans), Nigeria, Norway, Pakistan (three loans), Peru (two loans), Portual (two loans), Spain, Thailand, Tunisia, Venezuela and Yugoslavia.

This brought the total number of loans, granted since the beginning of operations, to 386 in 73 countries and territories and raised the gross total of commitments to $7,931.3 million. By June 30, as a result of cancellations, exchange adjustments, repayments and sales of loans, the portion of loans signed still retained by the Bank had been reduced to $5,191.9 million.

During the year, the Bank sold or agreed to sell $173.3 million principal amounts of loans, compared with sales of $273.3 million last year. On June 30, the total of such sales was $1,778.6 million, of which all except $69 million had been made without the Bank's guarantee.

Total principal repayments amounted to $1,586.2 million on June 30, consisting of $772.7 million repaid to the Bank, and $613.5 million repaid to purchasers of borrowers' obligations sold by the Bank.

On June 30, the outstanding funded debt of the Bank was $2,491.8 million, reflecting a net decrease of $27.4 million in the past year. During the year, the funded debt was increased by $104.5 million through the private placement of a $100 million United States dollars bond issue and the delivery of $4.5 million of bonds which had been subject to delayed delivery arangements. The debt was decreased by $131.9 million as a result of the maturing of the equivalent of $107.8 million of bonds and of sinking fund and purchase fund transactions amounting to $24.1 million.

During the fiscal year, the following 17 countries became members of the Bank: Algeria, Burundi, Cameroun, Central African Republic, Chad, Congo (Brazzaville), Congo (Leopoldville), Dahomey, Gabon, Guinea, Kenya, Malagasy Republic, Mali, Mauretania, Ruanda, Trinidad and Tobago, and Uganda. Subscribed capital amounted to $21,186 million on June 30, 1964.

[Prev. ref. 5602:AOA:D]

C. UN Homage To Late John F. Kennedy: The United Nations issued a book on August 26 in memory of the late US President, Mr. John F. Kennedy.

The book, a 93-page volume, is entitled "Homage to a friend—a memorial tribute by the United Nations for President John F. Kennedy".

It contains speeches in praise of Mr. Kennedy made at the UN General Assembly's commemorative meeting on November 26, 1963, four days after he was shot to death in Dallas, Texas.

Interleaved among the speeches are quotations from Mr. Kennedy about United Nations and photographs taken at UN Headquarters in the days after his death and on the occasion of his visit to UN two months earlier.

The United States Committee for United Nations published the book, but the UN Office of Public Information provided the text, photographs and design. The US Committee contracted for the printing and binding with the help of a grant from an educational foundation called Intercharge.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5600:AOA:A]

D. USA Launches Weather-Watching Satellite: USA's new weather-watching satellite, *Nimbus I*, rocketed into orbit on August 28, sent back excellent pictures of cloud-cover over the Gulf of Mexico a few hours after it was launched.

Other pictures were expected later in the day from Nimbus' cameras, which are designed to operate in day-time or night-time. The first picture showed the Gulf of Mexico and parts of the states of Texas, Louisiana and Florida.

The 830-lb Nimbus, largest meteorological satellite ever sent aloft, did not go into the circular 575-mile-high orbit planned for it, but instead entered an egg-shaped path over the Earth's Poles ranging from 262 to 578 miles in height.

Nimbus was sent aloft to provide the first television coverage of the entire Earth in a 24-hour period by a weather satellite, as well as the first pictures of the night-darkened half of Earth.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Its highly successful Tiros predecessors covered about one-fifth of the Earth in the same period, because their cameras were not always facing Earth.

Nimbus also carried an "automatic picture transmission system" to televise local weather patterns to foreign tracking stations as it passes over them. The stations are in Bombay, India; Lannion, France, Berkshire, England; Offensbach am Main, West Germany; Melbourne, and Salisbury, Australia; Bandung, Indonesia; San Jose Dos Campos, Brazil; Berne, Switzerland; and Tuchumna, Argentina.

Nimbus' day-time cameras, an advanced system being flown for the first time, are capable of relaying to special stations 1,200 photos in a 24-hour period.

Nimbus I transmitted to Earth on August 29 a steady stream of pictures rated as the best ever from a US weather satellite.

In one four-picture sequence, the satellite mapped weather from Hudson Bay (Canada), the Great Lakes, along the US Atlantic coast, down to Florida, including the tropical storm "Cleo" even showing the coast of Venezuela.

[Prev. ref. 5624:AOA:G]

E. USA To Hold Sea-Air Exercises In Pacific: The United States plans to hold sea-air exercises in the Pacific in October to assess her ability to resume atmospheric nuclear testing, should the need arise.

It was officially stated in Washington on September 8 that the exercises will take place near Johnson Island and will not involve any explosions. The exercises are expected to be over early in November.

(*The Times of India*, Bombay)

[Prev. ref. 5487:AOA:A]

F. "Aluminaut" Submarine Launched In USA: The world's deepest diving submarine, *Aluminaut*, designed to reach depths of three miles, was launched on September 2 at Groton, Connecticut (USA).

Built for a private firm, Reynolds International Incorporated, the 50-foot-long aluminium vessel is to be used for research and exploration.

Mr. Nitze, Secretary of the Navy, at the launching ceremony said the Aluminaut would "open to man the underseas areas which had lain hidden in total darkness since the genesis of the planet".

He added: "The potential which this craft has for exploration, for ocean bottom construction, and for other tasks of which we cannot yet ever conceive is of tremendous importance for the nation and the entire 'free' world."

Noting that the United States Navy's investment in oceanography had increased from $23 million (about £8 million) in 1960 to $66 million (about £23 million) in 1965, he said the Navy was now adding eight new vessels designed for exploration and research of ocean depths, and six ships had been built for oceanographic institutions for use in research to support Navy programmes.

(*The Times*, London)

[Prev. ref. 5695:AOA:C]

G. US Satellite Fails: A US Space Agency spokesman said at Cape Kennedy on September 5 that *Ogo*, America's new space satellite, had been unsuccessful.

One of the main antennae which it was planned to unfold from the satellite as it flew through space failed to operate.

The satellite also failed to "acquire the Earth" in a space manoeuvre designed to line it up in a proper position to send information back to Earth.

Ogo, which was launched on September 4, was commanded into a "hold" position to conserve its power while the trouble was being analyzed and its cause determined. It was capable of performing 20 high altitude scientific experiments simultaneously.

An Atlas Agena-B rocket lifted the satellite. It was shaped like a giant insect whose wings were covered with thousands of solar cells.

(*The Times of India*, Bombay)

H. "Titan 3-A" Fails: A powerful new *Titan 3-A* rocket was fired on its first test flight at Cape Kennedy on September 1, but failed to put its third stage into orbit as a flying launch platform.

The third stage, or "transtage", after completing one orbit had been intended to launch a 3,750-lb satellite into a separate orbit.

However, Brigadier-General Joseph Bleymaier, in charge of the Titan project, said the rocket had met 95 per cent of its goals on its initial test flight.

The first and second stages ignited and burned for the prescribed time, he said, and the third stage had burned for nearly its full time of 419 seconds before radio contact was lost 13 minutes after the lift-off.

Almost two hours later the Air Force said the third stage had failed to achieve orbit.

The "transtage" was intended to go into an orbit 115 miles high and then make one 100-minute circle of the Earth before launching the payload satellite into a separate orbit.

(*The Statesman*, Calcutta)

[Prev. ref. 5937:AOA:I]

I. "Explorer XX" Launched: A new US satellite, *Explorer XX* shot into orbit on August 25 to map the top side of the radio-reflecting ionosphere which surrounds the Earth.

England and Canada, with seven special information-gathering stations around the world, took part in the project. The stations will receive information in the form of "ionograms"—charts of the make-up and density of the ionosphere.

A four-stage rocket aimed the 97-lb craft into a path 620 miles high over the Earth's Poles.

The National Aeronautics and Space Administration (NASA) announced that the satellite's scientific instruments were working well. The precise orbital path was not immediately known.

By mapping the entire upper side of the ionosphere world-wide, Explorer XX is expected to pin-point irregularities and "weak spots" that are believed to cause disruptions in long-distance communications.

The ionosphere, ionized or electrified layers of atomic particles surrounding the Earth, normally serves as a mirror to bounce radio signals between distant points on Earth. Irregularities, such as shifts and shredding, permit radio signals to zip through into outer space, causing communication blackouts, instead of bouncing back to Earth.

J. Middle East Oil Production For January-June, 1964: The following table prepared in August gives the figures of oil production in Middle East countries for the six-month period ended June, 1964: (The figures are in thousands of metric tons).

Country	January-July 1963	July-December 1963	January-June 1964
Kuwait	47,700	48,497	53,700
Iran	36,828	36,361	41,000
Saudi Arabia	40,015	41,030	40,750
Iraq	27,040	29,630	30,073
Libya	8,180	13,920	18,000
Algeria	11,770	12,110	13,000
Kuwait Neutral Zone	8,183	8,673	10,000
Qatar	4,473	4,622	4,438
Abu Dhabi	885	1,598	3,753
UAR	2,878	3,100	3,330
Bahrain	1,117	1,141	1,150
Turkey	338	390	380
Israel	73	77	85
Morocco	73	77	80
Total —Middle East	189,553	201,226	219,794
—world	637,757	665,707	689,209

Increases are shown for every country (except for a very slight decrease in Qatar). The proportion of oil from this group of countries has remained fairly static during the last six months, at 31.9 per cent and 32 per cent of the world total.

K. Venus Spinning Backwards: It was reported in Hamburg on August 27 that radar observations from two observatories using three different techniques had all shown that Venus was slowly spinning backwards.

Consequently, after several years of debate, astronomers were beginning to accept the proposition that Venus is really spinning against the traffic pattern of the entire solar system. Why it should do so is a mystery. It has not been possible to observe its spin visually, as its surface is obscured by clouds.

The new results were described by Dr. Gordon H. Pettengill, of Cornell University, based chiefly on observations by the world's largest dish-shaped antenna, 1,000 feet wide, in Puerto Rico.

The observations began in mid-February and will continue until October, Venus having made its closest approach to the Earth on June 19. Using the stars as a reference frame, the planet spins once every 247 days, with a possible error of five days.

Since the planet circles the Sun every 225 days, the combination of these motions makes the Venus day equal to roughly 118 days on Earth. The Venus spin axis appears to be tilted six degrees or less from being perpendicular to the plane of its orbit around the Sun. Hence seasonal changes are slight.

ASIAN RECORDER

October 14—20, 1964

Regd. No. D-727
Vol. X No. 42

AFGHANISTAN

A. Foreign Trade During 1963: Since the reforms in the exchange system introducing a uniform rate of 45 afghanis to the dollar were carried out in March, 1963, it has become possible to draw up figures for Afghanistan's foreign trade with her principal trading partners.

The trade deficit is growing steadily; in 1962-63 the value of imports amounted to twice that of exports. Imports totalled $115.9 million compared with $99 million in 1961-62 and $86.7 million in 1960-61. Exports amounted to $58.8 million compared with $53.3 million in 1961-62 and $49.8 million in 1960-61.

Afghanistan's most important customer is the Soviet Union which receives almost half of all Afghan exports, $23 million in 1963. Most of the remaining exports went to the United States and India, USA purchasing $9 million and India $8 million. Exports to Britain amounted to $7.6 million and to West Germany about $4.3 million. The main commodity exported to USA and Britain is karakul, but West Germany imported more varied articles, notably carpets, catgut and wool. The four main commodities upon which Afghanistan's export trade depends are karakul, dried fruit, wool and cotton.

The Soviet Union is also Afghanistan's principal supplier, accounting for almost two-thirds of Afghanistan's total imports, over $72 million in 1963. The United States comes next, with $10.9 million largely accounted for by supplies of wheat and motor cars and lorries. India and Japan hold third and fourth place with $8 million and $7 million respectively in 1963, supplying textiles and textile machinery, and bicycles. The Eastern bloc countries are also active in this field, especially Czechoslovakia, and West Germany is taking advantage of the demand for cars and machinery, chemicals and pharmaceuticals.

[Prev. ref. 5655:INI:D]

CEYLON

A. Mrs. S. Bandaranaike On Proposed Press Legislation: The Prime Minister, Mrs. Sirimavo Bandaranaike, in a broadcast over *Radio Ceylon* on August 30 defended the Government move to control the Press.

She said that Press Councils had been set up in various countries, including enlightened democracies such as the United Kingdom. "Even in England where the freedom of the Press has become firmly established only during the past 100 years the public tolerates publications only so long as 'they do not tend to endanger the State, outrage morality, or unjustifiably cause injury to individuals'.

"In Ceylon, however, owing to the unbridled freedom that has been allowed to the Press by the absence of any form of control, certain sections of the Press have not only tended to endanger the security of the State and outrage morality, but have even unjustifiably caused untold injury to many individuals.

"My Government does not object to fair and legitimate criticism by the Press, but we do not wish to be subjected to unfair attacks based on false or incorrect premises, I regret to say that this is what is happening almost every day."

She said that "all this unnecessary agitation" was over "a tentative draft of a Bill" which would be subject to amendment and which she was confident would ultimately be "acceptable to all."

She said the draft Bill provided for the establishment of a Press Council and a tribunal to be appointed by the Judicial Service Commission, an independent body. This, she said, would ensure that both would be free of any political influence.

She also announced that further legislation would be introduced to spread the ownership of existing monopolies. A national news agency would be set up for the reception of foreign news.

Press Commission's Report Criticized:

Earlier on August 17, leaders and members of all Opposition parties criticized the *interim* report of the Press Commission when the House of Representatives met to discuss the budget in committee.

Mr. J. R. Jayewardene, deputy leader of the United National Party, said a select committee of the House should be appointed to go into the report, because control of the Press was not a decision which should be taken arbitrarily.

He said the Government had from time to time taken steps to deny freedoms enjoyed by the people. During her recent visit to London the Prime Minister, Mrs. S. Bandaranaike had said that the next elections would not be postponed, but no such statement had yet been made to the House of Representatives or to the country at large.

He said his party would be happy if the monopoly of the Press was destroyed, if there was such a monopoly, but the Government intended to set up a State monopoly. The remedy was worse than the disease; the Government should try to correct the ills of the Press instead of taking it over.

Mr. S. J. V. Chelvanayagam said he endorsed what Mr. Jayewardene had said about the Government's intentions.

Mr. W. Dahanayake, who was "caretaker" Prime Minister after the assassination of Mr. S. W. R. D. Bandaranaike, said the Press Commissioners should be ashamed of their report; effigies of the three Commissioners should be burnt on Galle Face Green, a popular promenade in Colombo. The Government, he declared, would next try to control the minds and actions of the people.

Mr. K. M. P. Rajaratne, leader of the National Revival Front, asked how the Press Commission could submit its conclusions in an interim report when it had not yet finished its work. The Government should await the Commission's final report and allow it to be discussed in the House of Representatives before any action was taken because all Opposition parties, including the Trotskyites when they were in the Opposition, had opposed the Commission.

On August 24, Mr. W. Dahanayake, described the Press Commission's interim report as a "piece of trickery on the people."

Speaking during discussion of the budget in committee in the House of Representatives, he asked the Government why it wanted to consider the Press Bill even before the Commission's report was discussed in Parliament. Reasonable and recognized democratic procedure, he said, would be for the report to be presented in the House and to allow a full dress debate.

Mr. Philip Gunawardena, leader of the Mahajana Eksath Peramuna (People's United Front), declared on August 23 that he would not allow the Government to take over the Press and do whatever it wanted. Addressing a youth league conference of his party, Mr. Gunawardena, who was a Minister under the late Prime Minister, Mr. Solomon Bandaranaike, said that freedom of the Press was vital in a democratic country and attempts to destroy it were meant to destroy democracy itself.

CHINA

A. Mr. Mao Spells Out Lines Of Succession: Mr. Mao Tse-tung has decreed that the future rulers of China be drawn from the worker, poor peasant and lower middle-peasant classes.

The call for training successors to the leadership was published as an editorial in the Peking People's Daily. It was not, as are many of them, circulated internationally.

The editorial said the leadership requirements were handed down by Mr. Mao, but did not disclose when or on what occasion.

He made these stipulations for the China rulers of the future: "They must be genuine Marxist-Leninists." That is, they should push Mr. Mao's revolutionary line rather than Mr. Khruschev's "revisionist" line.

"They must be revolutionaries, who wholeheartedly serve the overwhelming majority of the people of China and the whole world."

Under this heading, Mr. Mao struck at "individualism, and national egoism".

"They must be proletarian political leaders, capable of rallying and working with the overwhelming majority."

In spelling this out, he said: "There may be some intractable elements, but they can only be a very small minority. When the majority is united, the few incorrigible diehards will be isolated.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"They must set an example in applying the party's democratic centralism, must master the methods of leadership and must cultivate a democratic style of work and be good at listening to the masses."

He lashed out at those who "welcome flattery and turn like a wounded tiger on those who raise criticism." He called them the greatest enemy in relations between party and population.

"They must be modest and prudent and guard against arrogance and impetuosity. They must be imbued with the spirit of self-criticism and have the courage to correct mistakes and shortcomings in their work."

He did not rule out the possibility that leaders might come from other classes, but he said the peasants and workers must "account for the great majority of the leadership of the revolutionary rank of the proletariat."

If the formula were to be applied to the present ruling group, many of them would be eliminated. Most are of bourgeois and rich-peasant origin and many are university graduates.

(*The Statesman*, Calcutta)

[Prev. ref. 6004:CHI:A]

B. Mr. N. Khruschev On Soviet Claims To Sinkiang: The Soviet Prime Minister, Mr. N. Khruschev, told a group of Japanese parliamentarians on September 13 that Chinese Sinkiang "is not China."

He said that USSR did not lack arguments for staking claims to frontier portions of Chinese territory, if necessary.

He said: "USSR could not fail to defend its frontiers. Any one who crossed them will get the counter-blow that is necessary.

"Mr. Mao Tse-tung says that USSR is too big a country and that Czarist Russia conquered too much Chinese territory.

"I do not want to defend Czarism. The Czars and the Chinese emperors were the same sort. But the Chinese emperors conquered Inner Mongolia, Manchuria, Tibet and Sinkiang. And Sinkiang is not China. Kazakhs and Uighurs live there.

"The majority of Kazakhs and Kirghizes live in Soviet Kazakhstan and Kirghizia, but populations of the Kazakh, Kirghiz and even Uzbek races live in Sinkiang.

"Likewise Mongolia, which exists as an independent State, has only half its population. The other half, of the Mongol race, lives in China.

"Mr. Mao Tse-tung wants to settle political questions not on a political basis but on an ethnographical basis. If they want to talk on that basis, we do not lack arguments. Kazakhstan itself must decide its own destiny. We support the desires of the peoples. China must do the same."

(*The Times of India*, Bombay)

[Prev. ref. 5905:CHI:B]

C. Chinese Trade With The West: Authoritative diplomatic sources in London reported on August 31 that China, veering steadily away from the Soviet Union, was now carrying out the bulk of her trade with the West amid signs of an even further shift towards Western Europe.

More than half of China's foreign trade was now conducted with the West and Peking currently was seeking delivery of entire industrial plants by the major West European Powers.

Peking's trade with Moscow, at one time the chief channel of supply, had been cut down drastically and the volume continued to recede.

During the last 12 months, China had stepped up her imports from Western nations by about one-third, while dealings with the Soviet Union had fallen at about the same rate.

Peking was understood to be making inquiries currently about the delivery of variety of industrial plants in Britain, France, Italy, West Germany and Japan.

An improvement in the internal economic position and of her exports were said to make possible for China to step up her purchases in the West.

Having developed differences with Russia, who was the main supplier of industrial equipment, Peking now was reorientating her economy toward Western machinery.

Peking's currency resources are limited and it still has only limited supplies of goods to offer.

At the present time, nevertheless, China is seeking chemical and fertilizer plants in Britain. It has bought transport planes from Britain and apparently wants more.

British shipbuilders indicate that Peking is interested in British ships and a British mission recently visited the country to orientate itelf about the prospects for orders.

France, since recognizing the Peking regime, also has been showing more interest in orders from Communist China.

The Chinese also are interested in oil refineries from France and Italy. Orders for industrial plant to the value of about £40 million were reported to have been placed by Peking in Western Europe so far.

A major British exhibition is scheduled to be opened in China in November, planned as the biggest foreign exhibition there in many years.

At the same time, China is keeping up wheat purchases from Canada and Australia, which began when Peking faced starvation because of consecutive bad harvests.

Peking was said to have ordered for the current year between five and six million tons of wheat, the bulk from Canada and Australia. But some orders also had been placed in Argentina and France. Wheat purchases were expected to continue.

The estimates were that China's overall trade with the West, including Japan, now runs to the tune of about £600 million both ways. A further increase is forecast for the immediate future.

The chief source of China's foreign currency is Hong Kong, through which the bulk of Peking's transaction is directed.

(*The Egyptian Gazette*, Cairo)

INDIA

SUMMARY: No-Confidence Motion Against Government; Food Crisis; CPI Charge Against Mr. Mao Tse-tung; West German Credit; New Solicitor-General.

A. No-Confidence Motion Against Government In Lok Sabha: A no-confidence motion against the Central Government was moved in the Lok Sabha on September 11.

The gravamen of the charges against the 17-year-old Congress *regime* was that there was "now a crisis in every field—social, political, economic and moral—for which the Government alone was responsible."

The debate lasted one week.

Initiating the debate on the motion, the mover, Mr. N. C. Chatterjee (Independent) said he was constrained to express his lack of confidence in the Central Council of Ministers because of its shortcomings. He presented a seven-point charge-sheet, which included "failure to protect our economic independence on account of the policy of increasing reliance on foreign private capital, supine dependence on imports of goods, increasing submission to private monopolists black-marketeers and profiteers, failure to hold the price-line, failure to provide security of life and property to a citizen even within 100 yards of the Prime Minister's residence and failure to maintain purity in elections."

On external policies, he charged the Government with failure to protect the interests of Indian nationals abroad and to maintain the territorial integrity of the country by opening up negotiations on closed issues and inadequate defence preparedness resulting in "disgraceful yet pliant surrender before bullying neighbours".

He also accused the Government of using the State of emergency for its own purposes and not to expel the Chinese aggressor.

He considered it strange that the Sadachar Samiti, which had been set up to deal with corruption, had been disowned by the Congress Party as well as the Prime Minister. They had also refused to hold an inquiry into the charges made by some "honest Congressmen" of Kerala against their Chief Minister, with the result that the Ministry had been ousted and President's rule promulgated in the State.

The Debate:

The leader of the "Rightist" Communist group, Mr. H. N. Mukherji, saw signs of a danger of the Five-Year Plan goals (which had been approved by the late Prime Minister, Mr. Nehru) being lowered as the present Cabinet included "go-slow and cautious people."

While refusing to support the no-confidence motion, Acharya J. B. Kripalani (Independent) recalled his first warning in 1950 regarding the threat to Tibet and said that the same fate would overtake the South-East Asian region. It was, therefore, necessary for countries like India, Japan and Australia to come to an understanding, not necessarily a military alliance.

He gave two reasons for not supporting the motion. First, the Government, technically speaking, had "inherited the bunglings of the previous 17-year-old regime"; secondly, the Communists were among the sponsors of the motion unlike the previous occasion when the CPI had remained aloof; that made a difference for him.

All the same, he said, the Government had lost all moral right to govern. He was critical of the Food Minister's "supercilious attitude" and his imputation of motives to the Opposition instead of owning up the failure on the food front.

He then caricatured the situation within the Congress Party. "In Orissa, when Dr. Mahtab accused his successors of corruption, they recalled that he had initiated it. In Bihar, 50 legislators made a representation to the Congress President." It was the same story in Gujerat and Rajasthan. The Chief Minister of Madhya Pradesh had volunteered to have an inquiry. The same was the case in Mysore. In Andhra, "one Reddy was fighting another Reddy." The situation in Kerala was "wonderful". Many of the high officials and ambassadors abroad belonged to Kerala, but within the State itself, the people could not manage their own affairs. Uttar Pradesh was in a class by itself.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

It had gone beyond every other State. Even in the Cabinet there, they had "dissidents, not ministerialists."

Mr. Frank Anthony (Independent), who also opposed the no-confidence motion, said the greatest danger now was lawlessness and indiscipline among politicians. He would welcome President's Rule in many States. He saw "neither sense nor logic" in the no-confidence motion. Was the Opposition prepared to take over if the present Government went out of office? In spite of all shortcomings, he asserted, the Congress had stood between the country and chaos.

The new Swatantra Party representative, Mr. N. Dandekar, while not supporting the motion, attacked the Government's economic and political policies. He attributed the present economic situation to "the failure of the Second Plan and the impending failure of the Third." This was because only financial and not physical targets were fixed and because of over-emphasis on industry at the cost of agriculture as well as the "extraordinary importance" attached to the public sector; it was an astonishing statement to make that India would import food-grains but not steel.

Giving his reasons for not supporting the motion, he said: "Nobody should be hanged for the sins of his father." The new regime had inherited a legacy from an overpowering personality and must, therefore, be given time to find its feet. He was glad to note that the new Government was approaching problems on a realistic basis.

Mr. G. L. Nanda's Speech:

Intervening in the debate on September 16, the Central Home Minister, Mr. G. L. Nanda, said that the main Opposition groups would have to learn to live with the situation that "the Congress will remain the sheet-anchor of democracy and the hall-mark of stability" in the country for a long time.

He accused the Opposition of having taken advantage of some temporary difficulties which were already being resolved. "We are prepared to be judged by exacting standards", he said, "but there has been exaggeration of minor defects beyond all proportion."

He refuted suggestions that the present Government was trying to dilute Mr. Nehru's policies. The Swatantra Party appeared to feel gratified that the Government was "shifting in its direction". One was an alarmist view and the other wishful thinking.

Dealing with corruption, he said they should neither minimize nor exaggerate the existence of that evil. The Sadachar Samiti had figured rather too prominently in the House. He disclosed that the credit should go to the Prime Minister, Mr. Shastri, who had initiated action when he was Home Minister by setting up the Vigilance Commission.

Mr. T. T. Krishnamachari's Speech:

Intervening in the debate on September 17, the Central Finance Minister, Mr. T. T. Krishnamachari, refuted suggestions that the Government intended either to slow down industrial progress or to stop advance action on future projects. "I do not see why the growth of our industries must be abruptly checked by a slowing down of investment outlays. The correct policy, on the contrary, is to remove the obstacles in the way of an even faster rate of growth in industry."

His policy statement broadly fell into two parts—one analysing the economic situation, including the most dominant issue of prices, and the other laying down the "postulates", or what he himself described as "the lineaments of the Fourth Plan."

He said that a careful analysis of the causes behind the present price increase was necessary before talking about runaway inflation or putting a stop to development expenditures and generally taking measures which would slow down the rate of growth of the economy. Shortage of supplies arising mainly from adverse weather conditions during the past few years had been a major factor aggravating the price situation. While he did not wish to minimize the gravity of the price problem, the rise in prices in India had not been anywhere near the sort of increase that had occurred in other countries. Last year's price increase was a pointer both to the necessity of raising production and the need for regulating the distributive system. The Government had to take on increasing responsibility not merely in the marketing of agricultural produce but also in regard to certain manufactured consumer articles. A short-term view, such as reversing the earlier decision to go ahead with defence and development expenditures, just because of current failure of supplies would be disastrous for the country's long-term progress. That was not to deny that certain pruning of expenditure was necessary with a vew to avoiding waste. Such pruning had already been undertaken. The lesson of the last three years was not that they should reverse the strategy of the Plan and slow down development; it was that they should continually strive to improve the returns from investment in every field so that the rate of growth of the economy was speeded up.

He said the Government could not rest content with anything less than a five per cent rate of increase in agriculture, and the development of agriculture could not proceed without adequate support from industry. The Plan must be treated as an organic whole, and there was no question of competition between progress in agriculture and development of industry, be it consumer, small or heavy industry.

They must endeavour, he added, to concentrate on: (1) Production of goods such as fertilizers, insecticides, agricultural implements including tractors, pumps, diesel engines, etc, required so urgently for giving a boost to India's agricultural programmes; (2) Early completion of heavy engineering and other engineering industries already taken in hand and such additional projects as are deemed necessary for balancing the programmes and providing a sound basis for future industrial development; (3) Stepping up production of both pig-iron and steel from the expansion schemes in hand as well as those already contemplated at the present units, besides Bokaro, and the establishment of additional capacity for non-ferrous metals, aluminium, copper and zinc; (4) Increased production of consumer goods such as textiles, sugar, drugs, kerosene, paper etc.; (5) Expansion of production of cement and other construction materials to meet the increasing demands; (6) Production of petro-chemical products like synthetic fibres to substitute imported cotton and wool, based on products obtained concurrently with kerosene in the refineries.

Taking into view the shortage of foreign exchange, he said, efforts had to be made in the following directions: (1) Complete the programmes in hand and secure as much output from each of them as possible; (2) Utilize idle capacity by augmenting supplies of required components and materials to existing units and giving preference to priority and essential industries, wherever the availabilities fall short of overall needs; (3) To give preference to expansion of existing units over the establishment of new units wherever conditions justify, as this would help to secure additional capacity with minimum investment; (4) In working out inter-se priority between schemes of the Industrial equal importance, to give preference to fast maturing schemes over those which are likely to have longer gestation periods.

Similarly, in the case of industries which offer export-possibilities or import substitution, they would get preference over others not similarly placed.

Mr. Lal Bahadur Shastri's Speech:

On September 18, the Prime Minister, Mr. Lal Bahadur Shastri replied to the debate on behalf of the Government.

Three dominant aspects of his speech were his championship of the common man, refusal to hug the beaten track while adhering to Mr. Nehru's broad and basic foreign and domestic policies, and his declaration that when needed he could be quite tough with the Communists.

He was repeatedly cheered when he struck a succession of blows on bureaucratic compartmentalization and too much officiousness by field officials and climaxed it by announcing that "all jeeps from Community Development blocks should be withdrawn." Unless the workers and officials of Community Development blocks went about on foot they would never be able to be of any real assistance to the kisans (peasants).

Parenthetically, he suggested that Ministers should also go and stay in villages instead of in dak bungalows and mix freely with the farmers.

He stressed the need for increasing food production. He was confident of tiding over the present food difficulties, although, he conceded, difficult days were ahead till the end of October, 1964. Producer prices for the rabi crops were expected to be announced soon, while fixation of wholesale and retail prices by the expert committee headed by Mr. L. K. Jha was likely to be completed by the end of September, 1964. The permanent Prices Commission would come into being by January, 1965. Since it was the main responsibility of the Government to feed the people at reasonable cost, no question of ideology was involved in the State undertaking distribution of foodgrains.

He indicated that while the Centre might undertake to supply the needs of cities, the States would have to look after the requirements of their regions. This new psychology had to be created as the States had been too much dependent on the Centre and were consequently not making their best efforts to help themselves.

Apart from foodgrains, the high prices of other articles of common use, such as sugar, cloth, vegetable oils, matches, salt, vegetables and even bicycles, had to be brought down, and they should be sold at fixed prices. A scheme had already been drawn up by the Commerce Ministry to fix by law prices of popular varieties of cloth like saris, longcloth, dhoties, shirting and drill. There would no longer be voluntary control on their prices. If the moneyed classes wanted finer varieties of cloth or other goods, they could be left to look after themselves. "Our concern is for the poorer and weaker sections of the people."

Dealing with the Swatantra spokesmen's contention that practically nothing had been achieved by the Government in the past 17 years, he quoted statistics to prove that per capita consumption of food, cloth, sugar, tea, vegetable oils, paper, cycles, sewing machines and electric fans, among other things, had gone up by an impressive extent.

Referring to corruption charges, he said he did not want the impression to go round the world that India was seething with corruption. This country gave the highest place to integrity. That was why men like Acharya Vinoba Bhave occupied a "respected position in the estimation of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Acharya Kripalani asked why, in that case, Acharya Vinoba Bhave should not be taken into the Cabinet.

Mr. Shastri retorted: "Neither Acharya Kripalani nor Acharya Vinoba Bhave will ever come to this side."

He dwelt on the scheme for a code of conduct for Ministers and said that it was important to have certain conventions to which all Ministers must conform. "Once the Prime Minister or a Chief Minister thinks there is a prima facie case against any of his colleagues, or there is something which is not correct, the Minister should immediately tender his resignation."

An Opposition member had questioned the ethics of including Mr. Sanjiva Reddy in the Central Cabinet after he had resigned as Chief Minister of Andhra following certain observations of the Supreme Court. Mr. Shastri pointed out that what the Supreme Court had said was that the allegations against the Chief Minister stood unrebutted. Mr. Reddy did not file an affidavit under advice from the Legal Department. There had been some differences of opinion in this regard between the High Court and the Supreme Court.

The Prime Minister then took Mr. Hiren Mukherji to task for his accusation that the present Government was deviating from Mr. Nehru's policies. He assured the House that the Government would continue to follow Mr. Nehru's policies in international and domestic affairs. He, however, pointed out that there was full freedom for free and independent thinking in democracy. If situations called for certain changes within the broad policy, they had to be made.

He referred to the fact that the CPI had been in doubt even when there was aggression by China. They had put India and China on the same level. Wisdom had now dawned on some Communists and they had agreed that China had committed aggression on India.

Mr. N. C. Chatterji's Reply:

In his reply to the debate, the mover of the motion, Mr. N. C. Chatterji, said that Government spokesmen had completely failed to answer the charges levelled by the Opposition. Government replies had not allayed the Opposition fear that too much store was being set by the Colombo proposals on the Sino-Indian border dispute and that no serious effort was afoot to push the aggressor out and vindicate the territorial sovereignty of India.

He described the present "food crisis" as man-made and attributed it not to scarcity but to "Government's bungling." He charged the Government with not being sufficiently alive to the distress of the lower income group on account of high prices and said that nothing was more fantastic than blaming the Opposition parties for the situation.

On September 18, the House rejected the motion by 307 votes to 50. Thirteen members, believed to be of the Swatantra Party, abstained.

[This was the second no-confidence motion against the Government since Independence. The first was brought against the Government led by Mr. Nehru on August 20, 1963 by the Communists and the remaining Opposition (see page 5401). Seventy-two members had voted for the admission of the motion, which was moved by Acharya J. B. Kripalani (Independent). It was rejected by the Lok Sabha by 346 votes to 61—Editor.]

[Prev. ref. 5401:INI:A, 5893:INI:A]

B. Food Crisis—Agitation Against Rise In Prices: Food shortages and the rise in prices of foodgrains all over the country led to a series of strikes in Uttar Pradesh, Delhi, Maharashtra and West Bengal in the second week of August, 1964.

The scarcity of food was said to have been created by "anti-social" elements who kept concealed hoards to continue artificial scarcity in order to make huge profits.

Prices of foodgrains, pulses, edible oils, gur and sugar have recorded an unprecedented rise during the past one year. A survey in New Delhi showed that some coarse grains now cost about 100 per cent more than during the corresponding period last year, and were costlier than wheat. Gram and some pulses were about 75 per cent dearer. Mustard and groundnut oil prices soared by 50 to 60 per cent.

On August 12, a State-wide hartal was organized by several Opposition parties in Maharashtra. Industrial and commercial activity in Bombay city was paralysed by the hartal, in which many workers participated to protest against the Government's food and price policies. In the docks also the strike was successful, with loading and unloading operations restricted to food ships. The city went without foodgrains, vegetables, fish, fruit, poultry and meat. Banks, insurance offices and commercial establishments were virtually closed. Central Government employees did not come within the purview of the "Maharashtra Bandh" directive issued by the Socialist-controlled Hind Mazdoor Sabha and the Hind Mazdoor Panchayat and supported by the All-India Trade Union Congress and the United Trade Union Congress.

Hartals were also organized in all the important towns of UP.

Over 680 Communists were arrested at various places in the country in connexion with a five-day agitation launched by the Communist Party of India to protest against rising prices. More than 100 of them were taken into custody on August 23 as a preventive measure in Coimbatore, Tiruchirapally and Gwalior. Most of the others were arrested after they had picketed wholesale grain stores, collectorates and district courts.

Warning To Government Employees:

The Central Government warned its employees against holding rallies and demonstrations to protest against the rise in prices and in support of their demand for more dearness allowance.

A Press Note said that such action would be considered as gross indiscipline and the Government would take action against those who participated in any strike.

It said that the Government had already appointed an independent body to go into the question of dearness allowance and that the employees should await its recommendations.

The Government reminded the employees that "joining hands with any particular political party or group" in the organization of demonstrations constituted a breach of the Government Servants' Conduct Rules and hoped that their recognized associations would exercise their influence and advise the employees against participating in demonstrations.

Official Assessment Of Failures In Agriculture:

An official assessment of failures in agriculture during the Third Plan showed that the industrial sector will be responsible for a short-fall of 7 million tons in the Plan target of 100 million tons. The rest of the short-fall may be attributed to other factors, including the weather.

The Planning Commission wrote to the Ministries concerned with industrial production that their co-operation would be essential to attain the Fourth Plan target in agriculture.

While planning an increase of 24 million tons in farm output during the Third Plan, it was estimated that the additional supply of fertilizers would account for 43 per cent of the increased production and irrigation for another 17 per cent.

The output of fertilizers in the last year of the Third Plan was, however, expected to be 400,000 tons short of the target of one million tons. This would mean a short-fall of four million tons in food output at the end of the Plan.

Against the stipulated potential of 29 million acres of irrigated land at the end of the Plan there would be only 19 million acres. This would account for a further short-fall of two million tons. The failure in irrigation, it was stated, was largely due to the non-availability of industrial materials such as cement and steel.

A further fall of one million tons in the food potential was attributed to the failure of industry to keep to the production schedule for insecticides and pesticides.

Other factors where industry is directly responsible for agricultural failure included non-availability of iron and steel and cement for farm implements and godowns.

Government experts pointed out that no amount of streamlining of the agricultural administrative machinery could make up for the non-availability of essential in-puts which industry alone could provide. In their view it would be pointless, for instance, to plan for a food target of 120 million tons in the Fourth Plan unless a minimum availability of two million tons of nitrogen was assured by the end of the Plan.

At the same time, they pointed out that a sudden jump in fertilizer output in the last year of the Plan would be of no avail. The increase should be phased over the whole Plan.

Likewise they demanded a minimum of 5.6 million tons of cement during the last year of the Plan for agricultural activities. Similar increases have been sought in the availability of iron and steel, insecticides and other industrial in-puts.

The experts pointed out that while during the First and Second Plans 60 per cent of the growth in agriculture was due to an increase in the cultivated area, all future increases would depend almost entirely on the in-puts provided by industry.

They were, therefore, highly critical of the claim that while industrial production increased by eight per cent a year during the first three years of the Plan, agriculture remained stagnant. Industry should also accept its share of the blame for the failures in agriculture.

Congress Working Committee's Resolution:

On August 19, the Congress Working Committee adopted a resolution expressing its "general satisfaction" with the way in which the Government was tackling the problem created by the food crisis.

The Committee urged the people to dissociate themselves from the agitational activities of the Opposition parties, which, it said, were not likely to benefit the community in any way, but might aggravate the very scarcities against which these agitations were organized.

Increased imports of grain and better prospects of the coming crop persuaded

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the Committee to feel that the country had "enough stocks to meet the current situation" and to call upon the people to face the problem with confidence.

The Committee spoke of the "imperative need" for announcing producers', wholesalers', and retailers' prices and for taking deterrent action against those who violated these prices. Action against those who kept stocks beyond notified limits was also advocated.

It noted that six States—Madras, Kerala, Mysore, Andhra, West Bengal and Rajasthan—had fixed "realistic" maximum prices at wholesaler's and said that other States should take similar steps.

The Committee emphasized that the long-term policy should aim at increasing production within the country, and said that offering a remunerative price to the producer was the first prerequisite for increased production.

The Government was advised to arm the proposed Foodgrains Trading Corporation with sufficient powers to enable it to obtain "a commanding position" in the grain trade; it should also be ensured that the Corporation was run on strictly commercial lines.

Foodgrains Trading Corporation:

The functions of the Foodgrains Trading Corporation, which will come into being on January 1, 1965, were spelt out by the Central Food and Agriculture Minister, Mr. C. Subramaniam, while addressing a meeting of the Congress Parliamentary Party in New Delhi on September 8.

The Corporation, he said, would be a modern business organization. It would give price support to the farmers. The prices it fixed would be remunerative and would act as an incentive to the farmers.

It would requisition, whenever necessary, the stocks of the wholesalers at the declared price.

Its other function would be to build up adequate stocks.

The Corporation would also have the monopoly in regard to the movement of foodgrains by Railways.

Mr. Subramaniam emphasized the need for taking urgent steps to increase production. This would be comparatively a long-range programme. The essentials of such a programme were being worked out and would be announced soon.

He explained at length the reasons for the present difficult situation and listed the steps that had been taken to control the prices and bring the available stocks into the market. He also indicated the long-range problem of distribution.

He pointed out that Bihar and UP had been very much affected by the present food shortage. Hitherto, they were getting wheat from the Punjab. A difficult situation was created in the two States after this supply was discontinued. Maharashtra and Gujarat were, however, getting wheat from the Punjab.

Even the surplus States had started complaining that they were deficit because of the present crisis. There was a tendency among some States to give an exaggerated picture of scarcity. Once scarcity was created, each State took unilateral action. Producers also held up stocks for their own benefit. Market arrivals had been much less this time as compared to the last two years. There was also greater demand for imported wheat even from surplus States because it was cheaper than the indigenous wheat. The situation could be remedied only by fixing maximum prices for producers and consumers.

Mr. G. A. Pais, a Mysore banker, will head the Corporation.

US Wheat Shipments:

The US Ambassador, Mr. Chester Bowles, said in Hyderabad on August 10 that US wheat shipments to India over the next few months would amount to about 15 to 20 per cent of the total wheat crop of USA.

This "emergency measure" was intended to help India tide over the difficult food situation and because USA felt that it had enormous stake in the development of Indian agriculture.

An official Press release issued in New Delhi said that three ships carrying 37,000 tons of Australian wheat to Britain and an American ship carrying 18,000 tons of PL 480 wheat to UAR were being diverted to Indian ports.

Meanwhile, a fleet of 120 ships—one of the largest ever engaged in a single food supply operation—which had been commissioned for the task, were given clearance for sailing in July and August. They were carrying an estimated 1,743,400 tons of wheat.

Debate In Lok Sabha:

A debate on the food situation began in the Lok Sabha on September 7.

It was generally felt by speakers that the present ills, whether regarding availability of food or high prices, could be cured by some streamlining here or a little adjustment there. A common talking point was that no part of the country should fatten itself on the misery of another. The zonal system should be abolished and food should be available everywhere at more or less the same price. The present imbalance in agriculture was due to an over-emphasis on heavy industry.

Replying to the debate on September 10, the Central Food and Agriculture Minister, Mr. C. Subramaniam, accused the Opposition parties in the Lok Sabha of creating the present difficult food and price situation in the country by generating an atmosphere of scarcity.

He alleged that the crisis of confidence sought to be created by the Opposition had provided a fertile ground for the trade to profit at the cost of the community and, in that sense, there was unwitting collusion between the Opposition and the traders.

He explained how the Government intended to fix prices at all levels and also norms of stock holding and then to enforce declaration of stocks.

Dealing with long-term measures, he said, the abolition of the rice zones could be considered in October-November, 1964 and of wheat zones in February-March, 1965. Self-sufficiency in food could be reached by the end of the Fourth Plan.

He added that an agricultural breakthrough was essential for the general economic progress of the country. A "cheap grain" policy would not lead to this break-through.

After he had explained the immediate and long-term measures to deal with the problem, the four-day debate ended with the adoption of a motion approving the steps taken by the Government to meet the situation. Both the Communist—Rightist and Leftist—groups acted in unison on this occasion and withdrew from the House when the voting stage was reached. The motion was carried by 201 votes to 34.

In Rajya Sabha:

Initiating a three-day food debate in the Rajya Sabha on September 16, Mr. C. Subramaniam announced that a comprehensive White Paper on the Government's plans for agricultural development would be placed before Parliament for discussion.

Indicating guide-lines of the Government's approach, he said food and agriculture were intrinsically connected and, therefore, without an integrated policy of production-distribution-price, "we may not be able to find proper solutions."

Mr. Bhupesh Gupta (Communist) then moved 29 amendments criticising the Government's handling of the food situation. Mr. M. S. Gurupadaswamy (Congress) moved an amendment approving the Goverment's policy.

Mr. Dahyabhai Patel (Swatantra) said that while his party did not believe in the agitational approach, its grievance against the Government was that it did not pay any heed to the warnings about neglect of agriculture.

Mr. Bhupesh Gupta said that State trading in grain, a proper distribution machinery and fixing of prices in advance for tillers alone could help tide over the crisis. He wanted the Government to implement its policy of attaining self-sufficiency in food with greater vigour.

Mr. A. B. Vajpayee (Jan Sangh) charged the Government with lack of foresight and said the Government knew very well about the short-fall in food production. Yet no efforts were made to create a buffer stock. If the wrong policies of the Government had created the present crisis, it was not for the Opposition to share its failure. The Government must be held responsible for the people's agitations.

Replying to the debate, Mr. Subramaniam said that the prospects of the coming kharif crop were good. The price crop in particular was expected to be a bumper one. But in anticipation of the difficult weeks ahead, arrangements had been made for a record import of 70,000 tons during October. The problem of congestion at the ports did not exist any longer and steps were being taken to ensure that it did not recur.

But he warned that the food difficulties would continue for "some years." Until India could overcome the difficulties, the country would have to rely on imports. Even with imported food, deficiencies would continue.

The House then adopted the motion approving the Government's policy.

C. Mr. Mao Tse-tung's Attempt To Justify Chinese Expansionism—CPI Charge: A resolution passed by the Central Executive Committee of the Communist Party of India (CPI) in New Delhi on September 16 described Mr. Mao Tse-tung's recent statement claiming large parts of Asia as Chinese territory as an attempt to justify "great" Chinese expansionism.

The Committee noted with "alarm and indignation" the report of the recent talks of Mr. Mao Tse-tung with a group of Japanese Socialist leaders and thought that Mr. Mao Tse-tung's lauding of Japanese militarism in Asia could have the most sinister meaning. "Abhorrent to any true Communist is also Mr. Mao Tse-tung's scandalous attempt to create discord among socialist countries and to rouse anti-Soviet sentiments in all the countries which are neighbours of the Soviet Union."

The CPI Central Executive drew the attention of all Indians to the dangerous views of Mr. Mao Tse-tung. It thought Mr. Mao Tse-tung's open call for the dismemberment of the Soviet Union was not only pernicious in its treacherous novelty, it amounted to direct and open

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

assistance to imperialism. "Just as Hitler sought to justify his criminal aggression by pleading for "living space" for the "growing" German population, "so Mr. Mao Tse-tung preaches unashamedly on behalf of Japanese reactionaries. The demand is made for the surrender of Soviet territory because its 22 million square kilometres are inhabited by only 200 million people, while Japan's 370,000 square kilometres have a population of 100 million."

The Committee pointed out that as far as Chinese leaders were concerned, their differences on ideological issues with the rest of the Communist parties had now become more and more divorced from all Marxist-Leninist principles and were now part of a screen for their expansionist policies and aggressive plans.

While releasing the resolution, the Chairman of the CPI, Mr. S. A. Dange, called Mr. Mao Tse-tung "a well-developed warmonger".

The resolution, he said, stated that the account of the interview showed that as far as the Chinese leaders were concerned, their ideological differences with other parties "have become divorced from Marxist-Leninist principles and are now for a great part a screen for their expansionist policies and aggressive plans".

The Chinese leaders were using their "perilous historical arguments" to justify their expansionism. These arguments had now reached "atrocious limits" in pressing their claims on Russia and in bolstering anti-Soviet chauvinism in Japan and other countries.

Leftist Criticism Of CPI Draft Programme:

In a *critique* of the official CPI's draft programme, the Leftist CPI leaders, Mr. M. Basavapunniah, Mr. P. Ramamurti and Mr. Harkishen Singh Surjeet accused the official Communist leadership of advocating "class collaboration", one of the most despicable crimes in Communist terminology.

The critique pointed out that while chastising the Congress, the draft programme "sings songs of praise" for the bourgeoisie and refuses to admit the domination of the "big bourgeoisie" and the landlords in the ruling party.

This was necessary for the "Dange group" to advocate a united front with the Congress, and this had led the group to conclude erroneously that the bulk of the reactionaries are outside the Congress, though as the ruling party, the Congress is responsible for all the "anti-people" policies of the Government.

The critique added: "If certain reactionaries are removed from the Congress there would be no difficulty for the Dange group to consider it as a progressive party".

The draft, according to the critique, advocated class collaboration throughout, while the "so-called" opposition to the bourgeoisie was only a "cloak" to cover the real motive. "Never in the past was class collaboration advocated in such a naked form in the name of the Communist Party".

The critique said that the draft ignored the "compromising role" of the bourgeoisie with imperialism before and during the transfer of power. Even thereafter the bourgeoisie continued to play that role.

It argued that the "path of capitalist development", adopted by the bourgeoisie, was not basically challenged by the Dange group. It only tried to underline certain mistakes. It under-estimated the seriousness of the penetration of foreign monopoly capital. "Thus the Dange group creates a basis for its ulterior objective of class collaboration with the bourgeoisie".

The "Leftist" leaders also challenged the draft's characterization of State power, which, in their opinion, was dominated by the big bourgeoisie. The draft significantly ignored the fact that the landlord class was sharing State power with the bourgeoisie.

In regard to foreign policy, they argued that the Dange group wanted the Communist Party to be "a tail of the Indian bourgeoisie by its support for the policy of the bourgeoisie in the main and failure to grasp the 'negative aspects'". Instead of trying to understand the "dual role" of the bourgeoisie, the draft characterized the Government's "pro-imperialist" stand in relation to certain issues as mere "weaknesses".

The draft's advocacy for the "path of non-capitalist development", the critique said, was a distortion of the Moscow statement on the issue. "Leftist" leaders were shocked that "despite the rise of monopoly capital in the country" the draft put forward the concept of National Democracy and agreed to share power with the bourgeoisie under joint leadership.

In a note introducing the critique, the "Leftist" leaders said that the purpose of their exercise was to show the "treacherously reformist and revisionist" character of the official CPI's draft programme, a character which could not be hidden behind "dubious arguments, deceptive formulation and evasive answers".

In a word, it was an "unashamed apologia for the bourgeoisie—landlord rule and the capitalist path of development foisted on the people by it".

It was a pity, they added, that the Dange group "did not dare criticize or comment on our programme" before denouncing it as "dogmatic, sectarian and adventurist".

[Prev. ref. 5952:INI:B]

D. Credit Agreement With West Germany: An Agreement for West German credit of DM380 million (Rs. 45.24 crores) for a variety of uses during the current financial year was signed in New Delhi on September 15.

The assistance consists of a direct Governmental credit of DM270 million (Rs. 32.14 crores), and guarantees for suppliers' credits to the extent of DM110 million (Rs. 13.10 crores).

Of the Governmental assistance, DM90 million (Rs. 10.71 crores) will be used for meeting refinancing liabilities of the Rourkela Steel Plant, DM55 million (Rs. 6.55 crores) for the purchase of goods and services in West Germany, DM40 million (Rs. 4.76 crores) for further financing of certain German-aided projects, DM60 million (Rs. 7.14 crores) for new development projects and DM25 million (Rs. 2.98 crores) for disbursement as foreign exchange loans by the Industrial Credit and Investment Corporation of India, Industrial Finance Corporation and the National Small Industries Corporation.

The amount of DM110 million will be given as suppliers' credit for the purchase of new ships for DM82 million (Rs. 9.76 crores) and DM23 million (Rs. 2.34 crores) for the purchase of goods and services.

Of the Governmental credit, DM90 million is repayable in 16 years at 5.5 per cent and the balance of DM180 million in 25 years, including a grace period of seven years, at 3 per cent interest. The terms of the suppliers' credit will be settled between buyers and sellers in the private and public sectors.

The West German Ambassador, Mr. G. F. Duckwitz, and Mr. P. Govindan Nair, Additional Secretary in the Central Ministry of Finance, signed the Agreement. Dr. Hans Henckel, Ministerial-Director of the West German Ministry of Economics, was present.

West Germany has so far offered credits totalling DM3,409.56 million (Rs. 405.90 crores) as assistance for India's development programme.

Of this, a sum of DM1,176.6 million (Rs. 140.06 crores) was made available during the Second Plan period and the balance of DM2,233 million (Rs. 265.83 crores) for the first four years of the Third Plan.

India has been importing from West Germany equipment for various industries such as automobile, chemicals, engineering, power and steel.

Among the important projects undertaken with West German assistance are the Rourkela Steel Plant, Rourkela Fertilizer Plant, Neyveli Briquetting and Carbonisation Plant, Neyveli Fertilizer Project, Durgapur Power Station (5th unit), expansion of the Mysore Iron and Steel Works and its conversion into Alloy and Special Steel Plant and the new Government Electric Factory, Mysore.

[Prev. ref. 4213:INI:A]

G. Technical And Industrial Collaboration With UAR—Letters Exchanged: In an exchange of Letters on September 21, India and UAR agreed in principle to collaborate to assist other developing countries in the fields of industries, transport and communications.

They also exchanged Letters providing for the pooling of resources to produce fertilizers and superfine cotton yarn in UAR and the supply of rock phosphates from that country, and the export of mining equipment, spinning machinery and steel structurals from India to UAR.

The Letters covered Trade Agreements envisaging a turn-over of Rs. 2.25 crores each way during the current year—an increase of Rs. 1 crore each way over the volume of trade between the two countries in 1963-64.

The Letters were exchanged by Dr. Moneim Abdul El-Kaissouny, Deputy Prime Minister of UAR, and Mr. Manubhai Shah, India's Minister of Commerce. Dr. Kaissouny explained the significance of the agreement at a news conference on September 21. Mr. Shah was also present.

Dr. Kaissouny said that the proposed co-operation between India and UAR to help developing countries was not in any way intended to minimize the importance of co-operation between the developing and the advanced countries. It was hoped that such co-operation would quicken their pace of development.

Mr. Manubhai Shah explained that no one should have any idea that India and the UAR were forming some kind of a bloc against advanced countries.

Dr. Kaissouny was confident that joint ventures by UAR and India to assist less

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

developed countries were bound to succeed.

The UAR, he said, had a relatively large public sector. There was a public sector in India also. But there was no reason why such co-operation should be confined to the public sector only.

"Our two countries", he added, "are developing countries. We want to show that we can help other developing countries. This is important from the moral, economic and political points of view".

Regarding trade between the two countries, he said that there had lately been a remarkable rise in imports and exports of non-traditional items, such as chemical products, drugs, yarn, sewing machines and electric fans from India, and fertilizers, superfine cotton yarn, writing paper, furnace oil and bitumen from UAR. He hoped the volume of trade would continue to rise and be more diversified.

(*The Statesman*, New Delhi)

[Prev. ref. 5041:INI:H]

H. No Demonetization Of Currency Notes—Mr. T. T. Krishnamachari's Statement: The Central Finance Minister, Mr. T. T. Krishnamachari told the Parliamentary Informal Consultative Committee in New Delhi on September 18 that the Government did not intend to demonetize currency notes at present.

A member of the Committee had suggested that higher denomination currency notes be demonetized in order to unearth unaccounted money and to check the rising prices.

Mr. Krishnamachari told the Committee that demonetization of higher denomination notes alone would not help because such currencies could have been converted into lower denominations.

He explained that a measure like demonetization involving lower denomination notes also was a formidable task and should be done as the last resort. He assured the Committee that the Government would use all means to bring out unaccounted money.

He said that out of the Rs. 2,500 crores of currency in circulation, notes of Rs. 100 and above constituted only 40 per cent. Ten-rupee notes formed 46 per cent. One-thousand-rupee notes in circulation were of the order of Rs. 50 crores, 5,000-rupee notes Rs. 15 crores, and 10,000-rupee notes Rs. 10 crores.

The total issue of high denomination notes increased from Rs. 71 crores at the end of March, 1956 to Rs. 95 crores at the end of March, 1963. This sharp fall was accompanied by a sharp increase of Rs. 96 crores in ten-rupee notes and Rs. 67 crores in 100-rupee notes.

In 1962-63, the Emergency generated fears of possible monetary reforms and a further shift in favour of 10-rupee notes, Mr. Krishnamachari added, did not seem unlikely.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5594:INI:I]

I. Government Decision To Safeguard Existing Rates Of Bonus—Assurance To Labour Organizations: The Government decision to safeguard the existing rates of bonus which might be higher than those payable under the new formula of the Bonus Commission (see page 6055) was officially announced in New Delhi on September 18.

In a statement to Parliament, the Central Labour Minister, Mr. D. Sanjivayya, said that various labour organizations had represented that the Government decisions on the Bonus Commission's recommendations would in some cases curtail the existing bonus benefits. This, however, was not the intention of the Government.

To give effect to the recommendations of the Commission as modified by the Government, a suitable provision would be included in the Bill to ensure that labour would get bonus benefits "on the existing basis or on the basis of the new formula, whichever is higher."

In the light of Government decisions on the Commission's recommendations it was proposed to undertake legislation to embody the principles by which tribunals or other judicial bodies should be guided if and when disputes relating to bonus came up before them. "The Government, however, expects that the parties would voluntarily give effect to the decisions, in settling the question of bonus till the proposed legislation is enacted."

Mr. Sanjivayya denied the charge levelled by Mr. S. M. Bannerji (Ind) that the Government had modified the recommendations of the Bonus Commission because of the dissenting note of Mr. N. Dandekar, a member of the Commission. "In modifying the Commission's report, the Government had taken into consideration the general economy of the country and the interests of the workers."

Normally the Government used to accept the recommendations of wage boards and commissions in toto but his predecessor (as Labour Minister), Mr. G. L. Nanda, had made it clear that the Government would modify such reports in future in case of dissenting notes by members of such boards or commissions.

Mr. Sanjivayya repudiated the suggestion of Mrs. Renu Chakravarti (Com) that the modifications in the recommendations of the commissions had been made "in favour of employers."

He said that retrospective effect was being given to the recommendations from 1962 in accordance with the wishes of the Commission. The recommendations would also apply to the public sector industries except those run departmentally.

K. New Solicitor-General Of India: It was announced in New Delhi on September 16 that Mr. S. V. Gupta, Additional Solicitor-General had been appointed Solicitor-General in place of the late Mr. H. N. Sanyal.

[Mr. H. N. Sanyal (62) was strangled to death in the bedroom of his residence on the night of September 8. Police inquiries revealed that the motive of the crime was burglary. Among the five persons arrested the next day, two were former employees of Mr. Sanyal's household.]

Mr. Niren De, a lawyer from Calcutta and part-time member of the Law Commission, has been appointed Additional Solicitor-General in Mr. Gupta's place.

(*The Times of India*, New Delhi)

[Prev. ref. 5131:INI:V]

INDONESIA

A. Trade Regulations Revised: The Government has revised its trade and foreign exchange regulations and re-imposed price controls.

A new basic transaction rate for both imports and exports has been set at 250 rupiahs per US dollar. The official rate remains at 45 rupiahs to the dollar.

Exporters and exporter|producers will receive as an incentive 20 per cent of the f.o.b. value of their exports in the form of a foreign-exchange allocation. This allocation may be used for imports by the earner, or traded on the local market for rupiah.

Exporter|producers will receive an additional five per cent, which may be used only for imports of equipment, spare parts, and raw materials for their own use.

Although the retensi—the five per cent of foreign exchange proceeds permitted exporters and exporter|producers since May, 1963—have now been abolished, the net effect of the new regulations on export incentives is to increase, by five per cent, the amount of foreign exchange allocated to exporters and exporter-producers.

Under the old system, in addition to the five per cent retensi, exporters were granted an automatic foreign exchange allocation amounting to 10 per cent of their export proceeds, and exporter producers were granted an allocation of 15 per cent.

The new system tends to raise the total rupiah an exporter receives above the former level. A selling rate of 1,350 rupiahs to the US dollar was initially established. An exporter selling his foreign exchange allocation would receive rupiah for the f.o.b. value of his exports at the rate of 520 rupiahs per US dollar (100 per cent of his export proceeds at the rate of 250 rupiahs plus 20 per cent at the rate of 1,350 rupiahs).

Imports have now been re-grouped into five, instead of three, categories:

(1) Goods essential to the country's economy;

(2) Raw materials, semi-manufactured products, and equipment needed for manufacture of goods yielding foreign exchange, or for domestic manufacture of goods to save foreign exchange;

(3) Raw materials, semi-manufactured goods, and equipment needed for the manufacture of goods for domestic consumption;

(4) Manufactured goods for domestic consumption, but not of a luxurious character;

(5) Manufactured luxury goods for domestic consumption.

Import duty rates have also been revised.

The new trade and exchange regulations do not apply to the oil companies.

A new hard-currency buying rate of 520 rupiahs per US dollar has been established for short-stay visa holders, tourists and diplomats. This compares with

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the former rate of 315 rupiahs to the dollar.

Further, it has been announced that price controls will be re-imposed. Controlled commodities will include the most essential consumer goods and imported materials for productive industries, and basic items produced by the Government.

[Prev. ref. 5849:IND:A]

B. Sabang To Be Free Port: A Presidential Decree has confirmed Sabang's status as a free port.

Situated on the northern part of Sumatra, Sabang will be the first port to be exempted from the usual port duties and customs.

The Decree declared Sabang outside the customs service jurisdiction as from June, 1964.

The exemption from duties and customs, however, applies only to import articles.

Articles exported from or through the port remain subject to the usual regulations.

IRAN

A. Regional Co-operation For Development—Working Group's Conference: A Conference of the *working groups of the Regional Co-operation for Development (RCD)* was opened in Tehran on August 29 by the Prime Minister of Iran, Mr. Hassan Ali Mansour.

In his address, he appealed to such other countries in the region "as share our ideals and are prepared to take steps similar to those that we envisage for the benefit of all concerned" to join the Regional Co-operation for Development.

He added: "Gone are the days....of shutting ourselves off from one another by economic walls. Now is the time to abandon such narrow, obsolete ideas and to work in a new spirit of regionalism."

The working groups would prepare plans for the implementation of decisions taken at the Heads of State Conference of Iran, Turkey and Pakistan in Istanbul in July (see page 5985).

The Iranian Press reported on September 1 that Iran had offered to set up an oil refinery having a capacity of two million tons per year in Pakistan as a joint venture.

This offer was made at the Regional Co-operation for Development working group meeting. Iran would supply crude oil for this refinery.

Iran had also expressed its willingness to supply 9,000 tons of oil per day to Turkey from its Kerman Shah refinery which would partly meet Turkish oil requirements.

Pakistan had shown keen interest in the research and exploitation of oil in the Persian Gulf area in collaboration with Iran.

Recommendations Approved:

• The planning chiefs of Iran, Turkey and Pakistan ended their talks on September 9 and approved with minor modifications all the recommendations of the nine working groups.

A joint communique said the planning committee had recommended the establishment of "joint purpose ventures" for the manufacture and the regional exchange of products, including farm and heavy machinery, fertilizers, chemicals, paper and lubricating oils.

The planning chiefs, whose recommendations and reports will go to the three-nation Ministerial Council in October for final decision, approved and recommended measures for the expansion and promotion of banking, trades, shipping, aviation, insurance, road and railways, petroleum, cultural co-operation, tele-communications and technical operation.

They recommended establishing two new committees, one on "joint ventures" and one on technical co-operation, and also that the nine working groups be reconstituted into permanent committees under a "regional planning council."

They agreed that Tehran should be the secretarial headquarters of the development organization for three years.

(*Dawn*, Karachi)

IRAQ

A. Increase In Oil Royalties: The Oil Minister, Dr. Abdul Aziz el Wattari, said in an interview in Baghdad on September 1 that oil companies had agreed to an increase in oil royalties on the basis of a final settlement of the principle of expanding royalties.

He added that if this principle were fully applied by gradual stages over a number of years "we will attain rates averaging between 56 to 57 per cent as against the existing rate of 50 per cent. In other words, all royalties amounting to 100 million dinars (same as sterling) would under the new arrangement be increased to 107 million."

Oil Ministers of Middle East member-States of OPEC were to meet in Beirut towards the end of September to review the outcome of contacts made with oil companies over outstanding issues, the Minister added.

At its last session in Geneva on July 6, OPEC called upon the Oil Ministers of the Middle East to get into direct contacts with the companies working in the area.

Dr. El Wattari said there was a plan for increased production in the southern and northern fields and Iraq's total oil output this year would amount to 60 million tons, against 55 million tons last year.

Yemen had approached Iraq for the supply of oil and oil products, a demand which Iraq is willing to meet. "We are awaiting further details from Yemen." He added that some months ago Iraq sent a shipment of oil and oil products as a gift to Yemen.

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5483:IRQ:A, 5602:IRQ:B]

B. Control Of Car Imports: The Government announced on August 31 that imports of all kinds of cars would be wholly monopolized by the General Establishment of Trade, a subsidiary of the Economic Establishment.

The Minister of Economy, Mr. Aziz el Hafez, in announcing the decision of the Government Control High Committee for Supply, said the reason for taking this decision was "the fraudulent prices charged by the present importing companies which distribute the cars."

He said the annual car imports to Iraq amounted to ID11,000,000 (par with sterling), ID2,000,0000 of which were for private saloon cars. "The Government considered it necessary to direct this sum for the service of the national economy."

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5277:IRQ:C]

C. Kurdish Amnesty Law Amended: The Government amended on September 1 the law providing for an amnesty for those who staged or participated in the insurrection in Northern Iraq, promulgated early in 1964.

The amended law, published in the official Gazette, covers all those accused of having committed crimes as a result of the movement during the period September, 1961 to February, 1964.

The amnesty also covers all those sentenced by civil, military, or special courts because of the Kurdish incidents in the North and acquits them of the sentences as well as legal consequences arising from them.

An explanatory Note said: "Some practical problems had stood in the way of implementing the amnesty law promulgated in February. Since the Government wishes to forget and forgive all crimes in the North, this law has been amended".

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5764:IRQ:A]

D. Euphrates Dam Project: It was stated on September 4 that two years after the signing of the relevant contract, the Soviet company Techno-Export had submitted its report to the Iraqi Government on the feasibility of constructing a dam on the upper reaches of the Euphrates.

Eighteen months of exhaustive studies had resulted in the forecast that the Euphrates Valley could be restored to fertility for which it was famous in the ancient world, and that the creation of the dam would avert the danger of flooding and generate enough electricity for the area. About 1,200,000 dunums (750,000 acres) of land would be irrigated under the project, trebling the present area of cultivable area.

The salination of the soil, which had been going on for centuries, presented a special problem for the engineers. Two methods of exploiting the waters of the Euphrates were suggested in the report. One was the building of a 180-foot-high rocky dam near the village of Haditha to store enough water for the irrigation of 4,800,000 dunums and the construction of a 250-megawatt power station, the total cost being estimated at ID54 million. The other was the building of two dams near the villages of Rawa and Haditha each with a capacity of four milliard cubic metres of water.

JAPAN

A. Joint IMF, World Bank, IDA And IFC Annual Meeting: About 1,800 delegates attended the annual general meeting of the International Monetary Fund (IMF), the World Bank, the International Development Association (IDA) and the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

International Finance Corporation (IFC) held in Tokyo from September 7 to 12.

It was the second of the general meetings to be held in an Asian city after the New Delhi meeting.

The meetings opened with a marked emphasis on the need to further orient the activities of these international organizations to meet the requirements of developing nations.

The International Monetary Fund and the World Bank are the financial twins that emerged from the Bretton Woods discussions in 1944 for planning a better economic and financial world. Membership of both bodies is open to all sovereign States and comprises 102 countries—the communist-bloc States being the only significant non-members.

The International Monetary Fund was set up to counter the financial difficulties in which many countries, especially in Europe, found themselves after the War, by supporting their currencies and financing "temporary" balance-of-payments deficits while their economies were being reshaped.

The International Bank for Reconstruction and Development, as the World Bank is officially called was created to supply credit and channel international private investment which might otherwise not be forthcoming, and later to supply administrative aid.

As with most banks, the functions and character of the World Bank have evolved with the growing number and changing circumstances of world needs. The Bank's main emphasis was intended to be on channelling private investments (under guarantee) direct to borrowers and only secondarily on offering loans direct from its own resources.

As the Bank's main interest switched from reconstructing war-shattered European economies to financing the underdeveloped countries, from about 1948 onwards, the supply of private capital ceased to be adequate. The Bank has increasingly made direct loans to member-Governments or commercial borrowers who have their own Government's backing.

Its paid-up capital amounts to about £740 million of which the United States has supplied about 30 per cent and the United Kingdom 12 per cent. This represents only 10 per cent of the theoretical capital, the rest of which is not called but can be used to back loans, which have been raised in all the main capital markets of the world. Nearly £1,500 million has in fact been raised, of which a little less than £900 million is outstanding. Loan repayments have brought in about £275 million. The Bank has raised about £635 million by re-selling loans to private investors.

The Bank's own earnings on commission have topped £300 million. It has lent about £2,800 million on nearly 350 different projects, mainly for developing electric power stations and building up transport systems throughout the world. India, Japan, and Australia are the largest single recipients.

The Bank's loan rates are commercial—up to 6 per cent—and the developing countries have found increasing difficulty in repaying loans and taking on new responsibilities. As a result over 25 per cent of the Bank's gross lendings are channelled through its two subsidiaries.

The International Development Association offers low-interest, long-term loans to developing countries, partly financed by the World Bank and partly by new funds subscribed by the 18 richest countries.

The International Finance Corporation operates on a smaller scale and deals mainly with loans to industry.

The International Monetary Fund's main aim is to help to provide international reserves to support the currencies of members in difficulties, either as a result of declining export prices and rising import bills for development in the case of the developing countries or as a result of the trade cycle in the developed countries.

The bulk of the Fund's fixed quotas, which stand at about £5,600 million have been subscribed by the wealthy countries, especially the United States, and are in the form of currencies or gold. Members can draw on these reserves either by purchasing currencies or by making "stand-by arrangements" in case of need.

More than 50 member-countries, including the United States and the United Kingdom, have drawn on the Fund at one time or another. In the past financial year about £220 million in currencies was purchased and stand-by arrangements worth about £700 million were made by 27 different countries.

Inaugural Addresses:

Inaugurating the meetings the Japanese Premier, Mr. Hayato Ikeda. said where poverty existed there was no general well-being and no one nation could prosper unless others also prospered.

The vital challenge, he said, was to "promote stable economic growth and reduce the disparity between the rich and the poor."

He called for the promotion of "exchange of capital and technology in a spirit of international co-operation between the already developed and the newly-developing countries."

Mr. George Woods, President of the World Bank and its affiliates underlined the need for these organizations to stimulate industrial development and strongly supported the recommendation for the Bank to lend $400 million to the International Finance Corporation for the latter to re-lend to private companies.

He referred to the credit extended by IDA to India for the import of capital equipment, raw materials and components essential to the full utilization of existing industrial plants. "For us this is a new and special type of industrial financing, but I believe there will be some other cases where it will be appropriate."

He dwelt on a number of problems which he said posed "major limitations" in spurring economic development in the developing countries.

The Managing Director of the IMF, Mr. Pierre-Paul Schweitzer, in his annual report strongly recommended an early increase in the quotas of Fund members while he also touched on the need to increase international liquidity, a move which was also urged by the Chairman of the IMF World Bank, Mr. Francisco Quino of El Salvador.

Mr. Schweitzer said that restrictive monetary policies in Europe, combined with more liberal monetary policies in the United States, as evidenced by the growing disparity in interest rates between the two areas, carry with them "dangers of their own".

This was so, he said, despite measures that have been taken in Europe—with some degree of success—to prevent undesirable movements of funds.

As well as recommending fiscal policies, he urged countries to make every effort to lower impediments to imports and capital exports.

He said an early increase in the quotas of all countries which belong to the Fund would increase "conditional liquidity"—liquidity which is available to countries on the understanding that they will follow constructive policies to eliminate their payments deficits.

Reviewing world economic conditions, he said that general prosperity in the industrial countries in the past year provided the major part of the explanation of the recent strong export position of the primary producing countries.

"It is of major concern to the whole world that favourable conditions should continue in the industrial countries", he said. "Fortunately, the immediate outlook in these countries is favourable".

In the United States, he said, the rise in output increased further in response to the tax cut introduced earlier this year and the official forecast was that the present expansion would continue well into 1965; with a further reduction in unemployment, now at its lowest level in five years.

"This continued expansion in USA, which proceeds under conditions of virtual price stability, cannot fail to have a stimulating impact on business conditions in the world at large."

At the same time, measures in which balance of payments considerations have played a prominent part have recently moderated economic expansion in both Britain and Japan, he said, and indications are that their rates of growth will be slower in 1964 than in 1963.

He said the Fund had substantially increased its work on the problems of developing countries. The marked revival of export prices in 1963 greatly improved the over-all balance of payments position of less-developed countries, which showed a surplus of $850 million in 1963, as against a deficit of $650 million in 1962.

"It is to be expected that imports in the developing countries will sooner or later catch up with the improvement in their export earnings, bringing their reserve accumulation to a halt. A rise in their imports is in itself desirable, as without it the development of real resources will be much slower".

He said major countries should give more weight to taxation policies in regulating domestic demand and rely less on monetary policies. A greater stress on fiscal policies would leave greater freedom for monetary policies to be adapted to changing international situations in the interests of the co-ordination of monetary policies.

Mr. T. T. Krishnamachari's Address:

Mr. T. T. Krishnamachari of India set the tone for the developing nations when he addressed the meeting of the Fund Governors.

In his brief speech, he said the IMF had another active year and its "clients" during the year included both the developed and the developing countries. He said this emphasized the point, "If such an emphasis is needed at all, that the Fund can be and is meant to be of assistance to all members, industrialized and the not so industrialized, in overcoming their balance of payments difficulties.

"The Fund's activities and policies have been adapted progressively to the emerging needs of the members and I have no doubt that the Fund has to be a focal agency and point of action in respect of whatever decisions we reach for securing adequate international liquidity and strengthening the world's payments system."

On the vital issue of increasing the Fund quotas, he said: "I am more than happy to support the idea that the executive directors should now proceed to formulate more precise recommendations on the subject of the Fund quotas.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"It is in the fitness of things that this question, which is of vital concern to all members of the Fund, big or small, should return once again to this wider forum of international monetary co-operation."

Referring to the question of international liquidity, he added: "Unquestionably the international financial system has in recent times shown great resilience. Facilities provided by the Fund and a growing readiness of the central banks of industrialized countries to assist one another, when difficult situations develop, constitute an altogether essential bulwark.

"Yet there remain deficiencies as well as some uncertainties. We have to act on the basic assumption that the demand for liquidity is likely to outstrip its supply.

"Industrialized countries need adequate liquidity to pursue policies designed to liberalize trade and augment capital flows and development aid. The developing nations will also need more liquidity in order to be able to pursue their development programmes, without being hampered in their onward movement by temporary balance of payments troubles."

He said: "All member-countries in the Fund are thus vitally interested in achieving an appropriate solution to the problem of liquidity. The developing countries have problems which go beyond the conventional liquidity concept and intricate questions of policy adjustments and appraisal are relevant in the context.

"Yet I think it would be a mistake to assume that the kind of problems that do not fall within the present frames of thought or institutional arrangements either do not exist or ought not to exist."

Other Speeches:

Mr. Douglas Dillon, the US Secretary of the Treasury, supported the plan to increase quotas.

He said such a step "seems to be the right move, as member-countries enter the next phase in the revolutionary development of the international monetary system".

He said this was a phase "in which the greater needs are likely to centre at least for a time on the enlargement and elaboration of credit facility for transferring reserves among countries rather than upon increases in the overall supply of reserves".

South Africa criticized IMF for failing to pay attention to the role of gold in the international reserve situation.

South Africa, the world's major producer of gold, has been pleading at every IMF meeting for the past years for a raise in the price of gold which stands now officially at $35 per ounce.

The United States and most other Fund members are opposed to a change in the par value of gold.

Issue Of Gold Subscription:

During the sessions, France—the biggest hoarder of gold—backed by other countries of Western Europe—was seen at loggerheads with the United States and Britain in the vital question of gold subscription.

On this issue, the developing nations backed USA and Britain.

France and her allies contended that in the event of future increase in the contributions to the Fund by member-countries to expand international liquidity, 25 per cent of the additional contribution should be in gold as is the present rule.

The purpose of the insistence by the countries of Western Europe on the gold preference, according to observers, was to cause a further dent in the gold reserves of USA and Britain which would in turn affect the status of the dollar and sterling and make borrowing difficult for USA and the UK.

Developing countries, while not objecting to the enlargement of international liquidity and increasing the quotas to the Fund as that would enhance borrowing, are strongly opposed to further contributions in gold.

Resolutions:

On September 10, the meeting adopted a series of resolutions affecting basic principles.

The first resolution was to augment international monetary funds, currently standing at $4,000 and $5,000 million. The increase was to become effective by next Autumn.

A further series of resolutions were designed to increase the powers of the World Bank and its affiliates in aiding the economic progress of developing countries.

Finally, the increasing influence of these countries in the financial and monetary institutions created 20 years ago at Bretton Woods was formally recognized by the admission of African representatives to the administrative councils of the International Monetary Fund and the World Bank which in future will have 20 instead of 11 members.

The resources of IMF increased by 50 per cent in 1959 as the result of a resolution passed the previous year at the annual assembly in New Delhi. The latest increase would be achieved through a total increase in the contributions paid by the 102 member-countries—which would provide about $4,000 million—and by a bigger increase in the contributions paid by West Germany, Japan and Canada whose economies had showed a marked development over the past few years.

The rates of the increases would be fixed between now and next January by the IMF Administrative Council which would in turn submit them to the 102 Governors.

Among the measures recommended to aid developing countries was the transfer of $50 million from World Bank profits to IDA.

The conference also recommended that the World Bank should henceforth concentrate its activities on farm development, technical aid and educational projects.

In a move unprecedented in the history of the IMF meeting, 19 Latin American countries and the Philippines and Iraq voted against a resolution recommending the creation of an international body of arbitration to settle on a voluntary basis any disputes between foreign investors and the recipient Governments.

So far, resolutions have always been passed by unanimous decisions.

The 21 countries opposed the proposal on the grounds that it would overrule the competence of national courts and would be against the spirit of common law.

Refusal Of Loans To Indonesia, Ceylon And UAR:

The annual meetings ended on September 12 with some remarkably outspoken remarks by Mr. George Woods about the refusal of the Bank to lend to Indonesia, Ceylon, or UAR.

Pressed to say what action the Bank intended to take about the expropriation of foreign assets without compensation in these countries, he pointedly mentioned that the Bank was not committed to any of the three at present. Moreover, the Bank would not even consider applications from them. He promised to look into the question of El Salvador.

On the Bank's future lending policies he said that in the financial year to next June the Bank would disburse between $500 million and $600 million. This would require the Bank to borrow between $300 million and $400 million on the capital markets of the world. Arrangements were being made in Western Europe and it was hoped to raise the money in New York in 1965.

With the meeting's full approval of quota increases behind him, Mr. Schweitzer promised that the executive directors would submit proposals about the size of the increase and the best way of putting it into operation with the minimum delay. It is hoped that this means before the end of the year.

As he said, such an increase is generally regarded as only the first step in the attempt to solve the world's liquidity problem. Beyond that, he said, the meeting had produced "a stimulating divergence of views" about future policy. He had two particular aspects of policy in mind. One was the need to renew the $6,000 million borrowing arrangement of the "Group of Ten" industrial nations; the other was the way in which the world's monetary system might best be improved.

The Ethiopian representative was elected Chairman for the next annual meetings, with the representatives of Brazil and Norway as Vice-Chairmen.

[Prev. ref. 5576:AOA:D]

B. **Trade Agreement With Iraq:** The Japanese Foreign Ministry announced on September 7 a new Japan-Iraq Trade Agreement, under which Iraq had agreed to lift import restrictions on Japanese goods.

The Ministry said that under the new Agreement Japanese exports to Iraq were expected to increase to $20 million a year. Last year Japan exported $7,470,000 worth of goods to Iraq.

Before the new Agreement took effect Japan had been allowed to export to Iraq only 14 items including textiles, construction materials, radio receiving sets, pottery, machinery, medical supplies and tyres. But now Japan can export any items.

The Ministry said the Agreement would be valid for one year and would continue to be effective unless the party notified termination of the Agreement to the other party three months before it was to expire.

Last year Japan imported from Iraq $40,970,000 worth of goods including $40,350,000 worth of oil.

LEBANON

A. **Air Agreement With India:** An Agreement between the Governments of India and Lebanon relating to air services was signed at Beirut on September 19.

Mr. I. S. Chopra, Indian Ambassador, signed on behalf of the Government of India, and Mr. Fouad Ammoun, Minister of Foreign Affairs, signed on behalf of the Government of Lebanon.

[Air-India at present operates three services per week through Beirut to London and New York in each direction, and Middle East Airlines, the Lebanese airline, operates two services per week to Bombay.]

(*The Times of India*, Bombay)

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

B. Restrictions On Foreign Businessmen: New regulations were issued early in September, 1964 governing the settlement of foreign workers and businessmen in the Lebanon.

Lebanese parentage, or marriage to a Lebanese subject, automatically carries permission to work or set up business in the country as does the fact of residence in Lebanon before 1954 coupled with a period of not less than nine consecutive months of work in a Lebanese organization.

Executives and representatives of foreign companies are allowed to carry on their work, but businessmen, artisans and industrialists who started their operations since January, 1960 or who now wish to establish themselves in the country must, after obtaining the prior approval of the Ministry of Labour and Social Affairs, invest a capital of not less than £L50,000 (£Leb.8.6=£) and undertake to employ a minimum of three Lebanese subjects.

If foreigners form a joint stock company, the capital invested by each must be not less than £L50,000 and three Lebanese must be employed for each of the founders.

Businessmen who started their activities before January, 1960 are exempt from these conditions.

(*Middle East Economic Digest*, London)

[Prev. ref. 5658:LEB:A]

MONGOLIA (Outer)

A. Hungarian Assistance: Chemokomplex, the exporter of Hungarian chemical factories and factory equipment, is building a biochemical combine in Mongolia.

A team of experts studied the local conditions in 1961 and again in 1965. Then the various bodies responsible for the project—the Phylazia State Institute for Serum Production, the Agroplan Design Bureau, and Chemokomplex—agreed on the blue-prints for the integrated biochemical works.

The original idea had been to extend the existing biochemical factory, but the plan was changed later to the effect that the old factory should be dismantled and a completely new combine erected.

The plant will be constructed some 20 miles from Ulan Bator. Hungarian architects have already worked out a part of the plans and a clay model of the combine is ready.

The project comprises 28 buildings, including process buildings and auxiliary shops. The plant will produce veterinary vaccines, diagnostic preparations, and antibiotics for use in Mongolian animal husbandry. In addition, facilities will be available in the laboratory for scientific research work and experimentation with pharmaceuticals.

Serums will be produced from animal blood; therefore stables are an important part of the plant. Since the blood of various animals is used for the production of different kinds of vaccines, several stables will be necessary.

On the site of the combine there will be separate stables for cattle, other large animals, and for small animals such as sheep. These stables are well-equipped and designed in such a manner that the drawing of the blood from the animals and its transportation to the slaughter-house will not interfere with the production process.

(*Far East Trade*, London)

NEPAL

A. Crown Prince Birendra Invested As Heir-Apparent: Crown Prince Birendra assumed his duties of State as the heir-apparent to the Nepalese throne at a special investiture at the ancient Hanuman Dhoka Palace in Khatmandu on September 16.

In the presence of King Mahendra, diplomats and members of the Council of Ministers, Queen Ratna conferred on the Crown Prince the Order of Grand Master—the highest order issued by the Nepalese Court. The medal was taken out by the Queen from the treasury where it had been kept since 1956 when the then Crown Prince ascended the throne.

In accordance with royal tradition, the Crown Prince was decorated with all the other orders of honour issued by the Nepalese Court.

Shortly after 1 p.m. Queen Ratna escorted the Crown Prince to the Throne Room of the Palace. The King had reached the Palace a few minutes earlier. They were received by the Chairman of the Council of Ministers, Dr. Tulsi Giri.

The royal priest, Mr. Khagendraraj Panay, who presided over the religious ceremonies, recited **Swasid**, the traditional verses in praise of the glory of the Nepalese crown.

After the Palace ceremony, the Crown Prince visited some temples around Hanuman Dhoka. He took the salute at a ceremonial march-past at the Tundikhel Army parade ground and sought the blessings of the Queen Mother.

Dr. Giri held a reception in the night in honour of the Crown Prince at Singh Durbar.

The Indian President, Dr. Radhakrishnan and the Prime Minister, Mr. Lal Bahadur Shastri had sent messages to King Mahendra wishing the Crown Prince a long life in the service of the nation.

The 19-year-old Prince, who returned to the capital in July on completion of his education at Eton, will share the duties of State with his father. He will be entitled to a personal annuity.

He is the first member of Nepal's ruling Shah dynasty, founded 240 years ago by Prithvinarain Shah of Gorkha, to be educated abroad.

Eldest of King Mahendra's three sons and three daughters born to his first Queen, the late Indra Rajya Lakshmi Devi, Prince Birendra lost his mother when he was five. He, however, grew up under the care of his mother's sister, Queen Ratna, whom the King married in 1952.

A favourite of the late King Tribhuvan, the Prince joined St Joseph's College, Darjeeling, and later went to Eton where he received his General Certificate of Education this Summer.

Before the durbar, the Prince performed the customary religious ceremonies conducted by ochre-robed priests headed by the chief royal priest. He made offerings to the family deities and sought the blessings of the dowager Queen Mother.

Under Nepal's Constitution, the Crown Prince will henceforth act for the King as Regent during the latter's absence from the Kingdom; will preside over the sittings of the Raj Sabha; and issue proclamations on the sovereign's behalf during the King's illness or absence.

(*The Statesman*, Calcutta)

PAKISTAN

A. Outline Of Third Five-Year Plan: The Rs. 5,200-crore Third Five-Year Plan, the first to be formulated within the frame-work of the 20-year Perspective Plan (1965-85), aims at a minimum increase of 30 per cent in national income over the five-year period from 1964-65 to 1960-70, according to an outline of the Plan released in Karachi on September 3. The outline had been released to obtain public comment.

The following is a summary of the Plan:

"The Second Five-Year Plan draws to its close with many of its targets within sight of overfulfilment. The 4.8 per cent average growth rate in GNP has enabled a 2 per cent growth rate in per capita incomes. This is a significant departure from the past when a 2.5 per cent growth rate in GNP barely compensated for population growth. The industrial sector is growing at a very fast rate, and its rising share in the GNP would contribute to high and stable growth rates. More heartening is the promise of buoyancy in exports and agricultural production. Exports have averaged a rate of growth of 6 per cent which is twice the Plan target. Agricultural production, in spite of a lean year in 1962-63, has averaged a growth rate of 3 per cent compared with 1 per cent in preceding years. And finally, inter-Provincial growth rates have been equated, apparently even reversed.

"The Third Five-Year Plan is formulated against this background and within the frame-work of a long-term strategy covering the period from 1965 to 1985. The Perspective Plan (1965-85) sets out the long-term objectives of the country. The most important of these are:

(a) Doubling of per capita income so that an average household of five may have a monthly income of Rs. 320 by 1985;

(b) Attaining full employment by creating 27 million additional jobs during the next 20 years;

(c) Completely eliminating the disparities in per capita incomes between East and West Pakistan;

(d) Achieving universal education up to the lower secondary level;

(e) Eliminating the dependence on foreign assistance and making the process of economic growth self-sustaining.

"The Third Plan marks the transition between the achievements of the Second Plan and the goals of the Perspective Plan. The 5.4 per cent average rate of growth of GNP during the Third Plan lies between the 4.8 per cent of the Second Plan and the 6.2 per cent of the Perspective Plan. Export earnings averaged a rate of growth of 6 per cent during the Second Plan. This has been raised to 7.5 per cent for the Third Plan which is significantly above the rate of growth of GNP. This along with import substitution will reduce external resources from 42 per cent of development expenditure in the Second Plan to 36 per cent in th Third. To step up the pace of development in East Pakistan, it is being allocated 53 per cent of the Government financed programme and 52 per cent of the total. The Government will also pursue appropriate policies to encourage the growth of the private sector in East Pakistan. These measures are directed towards reducing disparities in per capita income by about one-fifth. The allocation to the education sector is being almost trebled to achieve universal education by 1985 and to fulfil the current needs of skilled man-power. Unemployment has been increasing even during the Second Plan.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

It is proposed to increase employment opportunities by 4.5 million which will be more than the 4.2 million increase in the labour force. The stepped-up rural works programme is focussed to this end.

"To meet these and other objectives the Third Plan proposes a gross development expenditure of Rs. 52,000 million—Rs. 34,000 million in the public sector and Rs. 18,000 million in the private sector. The proportion of the public sector stays around the Second Plan implementation. The public sector, however, will have a much larger share in East Pakistan owing to the nature of investment required and the lack of private investment there.

TABLE 1

Public Sector Allocations in the Third Plan (Million Rs.)

	East Pakistan	West Pakistan	Total
Agriculture	2,230	2,110	4,340
Water and power	3,870	4,760	8,630
Industry	3,120	1,630	4,750
Fuels and minerals	480	420	900
Transport and Communications	3,050	2,820	5,870
Physical planning and housing	1,440	1,300	2,740
Education	1,475	1,265	2,740
Health	640	540	1,180
Social welfare	110	90	200
Man-power	85	65	150
Works programme	1,500	1,000	2,500
Total	18,000	16,000	34,000

TABLE 2

Private Sector Allocations in the Third Plan (Million Rs.)

	East Pakistan	West Pakistan	Total
Agriculture	1,050	450	2,000
Water and power	50	250	300
Industry	3,800	4,500	8,300
Fuels and minerals	300	450	750
Transport and Communication	1,700	1,400	3,100
Physical planning and housing	1,850	1,300	3,150
Education	200	100	300
Health	20	20	40
Man-power	10	10	20
Social welfare	20	20	40
Total	9,000	9,000	18,000

"Of the total Plan size of Rs. 52,000 million, East Pakistan will receive Rs. 27,000 million. Thus the share of East Pakistan in the total allocation will increase from an estimated 40 per cent in the Second Plan to about 52 per cent in the Third Plan. This will be a great step forward in reducing regional disparities. It will permit an acceleration of about 150 per cent in the development expenditure of East Pakistan during the course of the Third Plan.

"The Third Plan proposes to increase foodgrain production by about 25 per cent compared to an estimated increase of 14 per cent in population. , Thus the country will move nearer to self-sufficiency by the end of the Third Plan. The other targets in the agriculture sector are: increase in cotton production by 35 per cent, jute production by 21 per cent, tea by 27 per cent, sugarcane by 24 per cent, and tobacco by 33 per cent. The main physical targets in the industrial sector are: cotton textiles, 620 million lbs of yarn which will allow cloth consumption to increase by 16 per cent per head; white sugar 640,000 tons; cigarettes 30,000 million; cement 5 million tons; steel 1.2 million tons. In addition, substantial capacity will be installed for the production of petro-chemicals, machine tools and heavy engineering and electrical equipment. About 150,000 telephones will be provided and one post office would be available for a population of 10,000. Television facilities will be expanded with greater emphasis on education programmes. About 6 million additional children will be placed in the primary schools so that by the end of the Third Plan about 70 per cent of the children in the age-group 6—11 will be attending school. Considerable emphasis will be placed on technical education and teacher training. In the health sector, main emphasis will continue to be on preventive measures and about 60 per cent of the allocation will be devoted to such programmes as eradication of malaria, tuberculosis control and health education. The curative services will include provision for 17,000 additional hospital beds and 400 rural health centres. Family planning has been accorded high priority and an allocation of Rs. 150 million made for this programme.

"The Third Plan will rely on domestic effort to an even greater extent than the Second Plan. Nearly one-fourth of the additional income will be saved and re-invested.

"The main target of the Third Plan is to increase national income by 30 per cent. This target is currently being re-examined in the light of recent experience and there is a possibility of its being increased before the Plan is finalized.

"The most rapid development in our expanding economy has been in the industrial sector. In the very early period the rate of growth of industry appeared high because the country started from a position of possessing virtually no industry at all. But even in the Second Plan period it was in this sector that the highest growth rate has been maintained —high enough to bring about a structural change in the country's economy moving from a predominantly agricultural towards a semi-industrial type. The Third Plan will follow the policy of maintaining an optimum growth rate of industry in pursuit of the target of achieving a balanced and self-generating system of economic development.

"In the Third Plan Rs. 13,000 million or 28 per cent of the total investment has been earmarked for industrial development. This will be a little less than 2½ times larger than the estimated actual investment of about 5,800 million during the Second Plan. The target of Government financed investment is Rs. 4,750 million. This will be largely invested through the Industrial Development Corporations of the two Provinces. An investment of Rs. 8,300 million is expected in the private sector. Particular attention has been paid to the needs of East Pakistan. Of the Government financed investment of Rs. 4,750 million the allocation for East Pakistan is Rs. 3,000 million. This is more than three times the estimated investment during the Second Plan and is larger than the allocation for West Pakistan in the Third Plan.

"The major emphasis on policy in the industrial programme during the Third Plan will be a decisive shift from consumer goods industry to the establishment of basic capital and producer goods industry to reduce the country's dependence on foreign assistance for the import of capital goods. These industries include steel, heavy machinery, including agricultural and electrical machinery, transport equipment and heavy chemicals. Besides the traditional manufactures, such as jute and cotton textile, exports potential industries like fertilizers, pumps, petro-chemicals, paper and newsprint, cement, sugar, leather goods and fruit processing industries will be given priority. Relative priorities will, however, be so determined as to secure the maximum feasible increase in national income and additional employment opportunities outside agriculture.

"The proposed development programme of Rs. 1,650 million during the Third Plan period will include Rs. 900 million in the Government financed sector and the balance in the private sector. Of this about Rs. 200 million will be required for the ongoing projects of the Second Plan.

"The Third Plan period will be characterised by intensification of geological investigations for which a provision of Rs. 100 million is made as against the provision of Rs. 30 million in the Second Plan. Although geological investigations are a continuing process, every effort will be made to finally determine the extent of known mineral deposits at the earliest possible date.

"The programme for the development of transport and communications had been drawn up so as to provide adequate support to the growing industrial, commercial and administrative complex. It is anticipated that the traffic in the transport sector will increase by about 60 per cent and the bulk of this will have to be handled by Railways and Inland Water Transport even though the share of road transport is likely to increase.

"In the field of education the main objective is to provide a system which would facilitate transition into an era of science and technology, promote political, social and economic development and bring the country's cultural heritage into harmony with the contemporary world.

"Consolidation is the keynote of policy at the higher education level. College and University education is to be improved in quality rather than expanded, so that the end-product becomes referable to that of similar institutions in the developed countries.

"The basic objectives of the Third Plan for Social Welfare are:

(a) To consolidate and expand existing preventive, curative and rehabilitative social services;

(b) To initiate new programmes to meet untackled needs and problems of individuals, families and communities;

(c) To perform promotional functions in the national development process.

"In financial terms social welfare activity will be increased four-fold as compared with the Second Plan, to make up for deficiencies of the first two Plans. Nearly Rs. 290 million will be spent in the Third Plan period: East Pakistan Rs. 160 million; West Pakistan Rs. 130 million. Rs. 280 million will be expended in the public sector, Rs. 50 million in the works programme and Rs. 40 million in the private sector.

"The Third Plan has provided Rs. 2,500 million for the Works Programme out of which East Pakistan has been allocated Rs. 1,500 million and West Pakistan Rs. 1,000 million. Out of the total allocation of Rs. 2,500 million, roads are provided Rs. 860 million; agricultural and housing schemes Rs. 500 million each; minor irrigation and drainage Rs. 360 million; education and training Rs. 180 million and health and social welfare Rs. 50 million each."

ASIAN RECORDER

October 21—27, 1964

Regd. No. D-727
Vol. X No. 43

INDIA

SUMMARY: Mr. Y. B. Chavan's Visit To USSR; British Credit For Defence; Mr. J. P. Narayan's Goodwill Mission To Pakistan; Diplomatic Appointments.

A. Soviet And Western Military Aid Assured—Mr. Y. B. Chavan's Visit To USSR: The Defence Minister, Mr. Y. B. Chavan, arrived in Moscow on August 28 for talks with the Soviet Government on the possibility of increased military aid to India.

In a statement at the airport, Mr. Chavan said: "This is my first visit to this great country—the Soviet Union. I am very pleased to come here. I have brought with me greetings of the people of India for the people of the Soviet Union."

He said that during his visit he would be seeing some important institutions in the Soviet Union. "I will also have talks with the Soviet Defence Minister and I hope to meet other political leaders to discuss some of our problems with them."

Asked about the main objective of his visit, he said: "Basically, my visit is intended to expedite the completion of the plant to manufacture MIGs in India. Certainly, I will be interested to explore the possibility of getting some naval equipment too from the Soviet Union. But it will be merely exploratory talks." The Defence Minister, however, did not elaborate on the nature of the equipment that India wished to get from the Soviet Union.

"I am here in response to an invitation of the Soviet Defence Minister. I have come to emphasize the good relations existing between our people and Government and the people and Government of the Soviet Union because this was one of the basic planks of the policy of the late Prime Minister Nehru which we want to continue in all our eagerness."

He was accompanied by the Chief of Army Staff, Gen. J. N. Chaudhuri, the Cabinet Secretary, Mr. S. S. Khera, Rear-Admiral S. M. Nanda and Capt. B. K. Dang of the Navy.

Marshal R. Malinovsky's Assurance:

The Soviet Defence Minister, Marshal R. Malinovsky, declared on August 31 at a luncheon given by the Indian Ambassador, Mr. T. N. Kaul, at the Indian Embassy in honour of Mr. Chavan that the Soviet Union would give assistance to India as far as possible to enable her to preserve her non-alignment and independence.

He paid tribute to the policy of non-alignment followed by India and said: "We greet you for following this policy. We will be happy to assist you as far as possible.

"In accordance with our traditional policy of non-interference in the domestic affairs of others, our assistance will be without any political conditions".

The Soviet Union was not in competition with any one in the matter of giving assistance to India, he said, adding: "We will give you such terms of assistance to the maximum extent as we can. It is for you to accept. India needs peace and so also we, and thus we are together in the struggle for peace".

Earlier, Mr. Chavan discussed India's defence shopping list with Soviet officials at an hour-long meeting.

Indian officials said the talks were "friendly, cordial and useful." They added that one topic at the discussion was the possibility of India obtaining credits to buy military equipment in Russia.

Mr. Chavan met Mr. I. V. Arkhipov, Acting Chairman of the State Committee for Foreign Economic Relations, and other foreign aid experts.

On August 31, Mr. Chavan left Moscow on a tour of USSR. He returned to Moscow on September 8.

Meeting With Mr. N. Khruschev:

The Soviet Prime Minister, Mr. N. Khruschev, received Mr. Chavan in his Kremlin office on September 9.

Mr. Khruschev was believed to have welcomed the growing India-Soviet collaboration and co-operation, expressing particular pride in such symbols of friendship as Soviet aid for Bhilai.

He expressed the Soviet Union's active interest in the development of India's economy and to enable India to maintain and strengthen her independence.

He conveyed his greetings to the President, Dr. S. Radhakrishnan and the Prime Minister, Mr. Lal Bahadur Shastri, and said the Soviet people were eagerly looking forward to receiving Dr. Radhakrishnan. They were also hoping that Mr. Shastri would also be able to visit the Soviet Union soon.

Mr. Chavan thanked Mr. Khruschev and the Soviet Government for the understanding, friendship, and co-operation extended to India in various fields.

He re-affirmed India's determination to continue with her plans of economic development and policy of non-alignment, and at the same time to strengthen her defences in order to safeguard her integrity.

Mr. Khruschev expressed his appreciation of India's policies of peace, friendship and non-alignment enunciated by Jawaharlal Nehru, which were being continued devotedly by the present Government.

The discussions generally covered Mr. Chavan's mission to secure India's defence requirements, and a satisfactory agreement was believed to have been arrived at, with regard to the repayment of credits within the limited budget India could afford.

Soviet Arms Supply—Agreement Signed:

India and the Soviet Union signed on September 11 an Agreement for the supply of Soviet defence equipment to India.

The Agreement was signed by Mr. Sarin for India and by General Sidorovich for the Soviet Union.

It came in the wake of discussions between an Indian delegation led by Mr. H. C. Sarin and Soviet officials and subsequent talks between Mr. Chavan and Soviet leaders, including the Prime Minister, Mr. N. Khruschev.

One of the important subjects in the talks was the setting up of the MIG complex in India.

Returns Home:

Mr. Chavan returned to New Delhi on September 12.

He told newsmen at the airport that his visit to USSR had been fruitful and friendly and added: "I am quite satisfied with what I have done."

Asked whether India would get a few more MIGs from Russia and whether the MIG project in India would be executed speedily with Soviet assistance, he said: "Please await my statement in Parliament."

Members of the Indian delegation connected with the MIG project in India stayed behind in Moscow to work out some details.

Statement In Parliament:

On September 21, Mr. Chavan gave the Lok Sabha details of the assistance which USA, USSR and UK had agreed to give India to enable her to implement the five-year defence plan.

The following is the statement:

"This statement is a brief report for the information of Parliament on my visits to USA in May, 1964 and USSR during August-September, 1964.

"The object of my visit to USA was to secure material and financial assistance for the implementation of India's five-year defence plan covering the period April, 1964 to March, 1969 to which I had made a reference during the debate on the demands for grants of the Defence Ministry in March, 1964. There was also a long-standing invitation from Mr. Robert S. McNamara, US Defence Secretary, to visit USA to discuss problems of mutual interest.

"I also received later an invitation from Marshal Malinovsky, Defence Minister of USSR. I took this opportunity to discuss with the Soviet Government various matters connected with the implementation of our defence plan.

"The task of re-equipping and modernizing our armed forces is a stupendous one.

"In order to ensure systematic development of our defence potential in the light of the threat facing the country, earlier this year we prepared a five-year defence plan. Broadly, the plan envisages:

(a) The maintenance of a well-equipped army with a strength of 825,000 men;

(b) Maintenance of a 45-squadron Air Force including programmes of re-equipment and replacement of the older aircraft like Vampire, Toofani and Mystere by more modern aircraft and improvement of the air defence radar and communication facilities;

(c) A phased programme for replacement of over-age ships of the Navy;

(d) Improvement of road communications in the border areas;

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(e) Strengthening the defence production base to eventually meet the requirements of arms and ammunition of our armed forces; and

(f) Improving the organizational arrangements in the fields of provisioning and procurement, storage, training, etc., to ensure most economical utilization of funds allotted for defence.

"The above programmes of modernization of the defence forces and improvement of facilities for logistic support of the Armed Forces would call for additional outlays on defence. The increase, in terms of internal resources, will be of the order of about 10 to 12 per cent over the current level of defence expenditure. But the total requirement of foreign exchange for the defence plan has been assessed at about three times the normal allocations which can be made to defence from our own export earnings.

"The major constraint, therefore, which would affect the implementation of the defence plan is the availability of foreign exchange, in time, to meet the import requirements of the various constituents of the plan. As the economic development plans also require heavy investments of foreign exchange in order to ensure that the progress of India's economic development is not affected, it is necessary to secure assistance from friendly foreign countries for the implementation of the defence plan.

"I reached Washington on May 18, 1964, and had discussions with the US Secretary of Defence, Mr. Robert S. McNamara and other officials of the Administration. I also had discussions with Secretary of State, Mr. Dean Rusk, and Mr. Averell Harriman. I had also opportunities to meet important members of the US Senate and the House of Representatives.

"The discussions held with the US Government were very friendly and disclosed large areas of agreement in respect of our assessment of the Chinese threat and the measures required to meet it. There is considerable understanding in the US Administration of the special problems we are faced with and a desire to assist in building up the defence potential without adversely affecting our economic development plans.

"As a result of these discussions the US Government has agreed to provide to the Government of India the following assistance:

(i) Immediate credit of $10 million for the purchase of defence articles and services. The main items to be financed from this credit relate to replacement and modernization of plant and equipment in ordnance factories;

(ii) The military grant assistance will be continued by the US Government during their fiscal year 1965 (July, 1964 to June, 1965) at the same level as during the fiscal year 1964. This assistance includes such items as continued support for Indian mountain divisions, air defence communication equipment, transport aircraft support and road-building equipment for the Border Roads Organization. As this assistance would be in kind, it is not possible to assess its value financially.

(iii) In addition, further credit to the extent of $50 million during fiscal year 1965 would be available. Among other things, the Artillery Shell Plant to be set up at Ambajhari will be financed from this credit.

"Successful implementation of the Defence Plan would require continued assistance from USA at the current levels in respect of both grant assistance and credit assistance. The US authorities have agreed that periodical discussions should be held between our two countries to determine further US assistance in relation to India's defence effort.

"I also discussed the question of supply of high-performance fighter aircraft for the Indian Air Force, the need for which was established in Exercise Shiksha held last year. The US authorities, while discussing supply of such aircraft under the Military Assistance Programme, pointed out that as we had already plans for introducing in the IAF MIGs and the HF-24, the question of introducing another type of supersonic aircraft may have to be studied further. In the circumstances no final decision was taken. The US authorities offered to send a team of experts to determine whether they could be of assistance in further development of this aircraft and in its production. The team has since visited India and has submitted a report which is under examination.

"On the question of supply of naval vessels for replacing the over-age ships in our fleet, it was agreed that our requirements in this field should first be discussed with the British Government.

"Apart from the grant assistance and credit assistance which the US Government has agreed to provide during the fiscal year 1965 and which they are willing to consider for the subsequent years, I attach considerable importance to the fact that the need for strengthening the defence production base in India has been fully recognized by the US authorities and a substantial portion of the credits already offered will be utilized for modernization of the Indian ordnance factories and for setting up the Artillery Shell Plant at Ambajhari.

"During my stay I visited a number of defence installations and training establishments in USA.

"On hearing of the sudden passing away of Mr. Jawaharlal Nehru I cut short my visit in USA and returned to India on May 28, 1964. A meeting with President Johnson scheduled for May 28, 1964 could not take place.

"As Hon'ble Members are aware, we had concluded an Agreement in August, 1962 with the Soviet Union for establishing production of MIG-21 fighter aircraft. While we have proceeded with civil works and preparation of project reports, it was found that there were several important fields not covered by the original agreement in which without additional Soviet assistance it would not be possible to establish early production of the aircraft. It was also our intention to explore possibilities of securing assistance in respect of certain other equipment included in the Plan.

"I reached Moscow on August 28, 1964. I had discussions with Defence Minister Marshal Malinovsky and senior members of the State Committee for Foreign Economic Relations. I had also discussions with the Chairman, Mr. Khruschev.

"These discussions were most cordial. The Soviet Government fully appreciated our policy of non-alignment. They recognized our need for the strengthening of our defence potential and also our economic difficulties. It was explained that we attached considerable importance to the early establishment of the MIG complex of factories and production of MIG aircraft and associated equipment.

"Our requirement for supply of a certain number of MIG-21 aircraft to meet the needs of the Air Force until the production of the aircraft starts in the country and the requirement for light tanks was also discussed.

"As a result the following agreements have been concluded with the Soviet Government:

(i) As an extension of the Agreement concluded in August, 1962, the Soviet Government has now agreed to provide plant and machinery, jigs and tools, etc., of Soviet manufacture to facilitate the early establishment of the MIG complex of factories. They have also agreed that Soviet technical teams will be more closely associated in the preparation of detailed working projects and production schedules. Arrangements for the supply of major assemblies, sub-assemblies, and raw material from the Soviet Union for the production of initial batches of MIG-21 aircraft have also been finalised.

(ii) Agreement has been concluded for the purchase of a certain number of MIG-21 aircraft and associated equipment. The supplies under the August, 1962 Agreement and the present Agreement would enable us to re-equip three of our fighter squadrons with MIG-21 aircraft.

(iii) The Soviet Government has also agreed to the supply of a certain number of light tanks and associated equipment.

"The above purchases will be paid for in rupees which can be used by the Soviet Government for purchases of goods and articles in India according to existing arrangements.

"A contract has also been concluded with the Soviet export organization for the supply of 20 MI-4 helicopters.

"The Soviet authorities provided facilities to me and to the naval officers who accompanied me to see the performance of the naval craft including submarines which they are in a position to supply to India. The technical details made available during this visit are under study. It may take some time before a decision is reached in the matter as, apart from technical evaluation, the financial feasibility of making additional purchases would require review.

"I had planned to spend a few days in the UK at the invitation of the British Government on my return journey from USA. I could not do so. It convenient to the British Government, I hope to visit the UK some time in November-December, 1964.

"As I have mentioned earlier, I intended to discuss with the British Government particularly our requirement for destroyers. As Honourable Members are aware, the Indian Navy is at present equipped with British-built ships. Several of our destroyers are over-age and are due for replacement. We are intending that some of the ships required for such replacement should be built in this country itself and we have been exploring ways and means of securing the necessary financial assistance and foreign collaboration.

"I am happy to be able to say that the British Government has agreed to provide financial assistance towards the reconstruction of the Mazagon Docks in Bombay and the subsequent construction there of three Leander-class frigates. We have accepted this offer in principle and negotiations for a loan agreement, as also for a collaboration agreement with Vickers Limited, are progressing.

"I wish to conclude my statement by re-stating certain basic facts underlying our defence plan and the programme to secure foreign assistance.

"Our policy in meeting requirements of our defence is necessarily guided by our foreign policy of non-alignment which will continue to govern our actions in the field of defence procurement. In both the USA and the USSR, there was a complete recognition of this policy.

"Our defence plan identifies the requirements of the defence forces to enable them to discharge the task assigned to them. These carefully worked out requirements guide us in seeking assistance from friendly sources where it is available.

"Apart from USA and USSR, other countries such as Australia, Canada and Yugoslavia have come to our help in our time of need.

"I would like to emphasize that we

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

have not the slightest intention of playing military assistance from one country against military assistance from another. It was heartening for me to find that in both the great countries that I visited, there was full appreciation of our point of view and desire to assist."

Soviet Aid Can Be Used Against China: Mr. Chavan said in the Rajya Sabha on September 21 that Soviet military assistance to India could be used against China and there were "no strings or conditions" attached.

Mr. Abdul Ghani (Ind.) asked whether the MIGs and other military assistance to be supplied by Russia could be used against China.

Mr. Chavan said: "Of course, we can. Otherwise why are we taking it? We are not taking them for a joke. There is no condition, nor any strings attached."

Mr. A. B. Vajpayee asked whether the equipment which had been promised by USA for mountain divisions had been received in full and if not, whether this question was raised by Mr. Chavan during his talks in Washington.

Mr. Chavan said the supply of equipment for the mountain divisions was a continuous process and it was in the process of being received. This was also one of the points he discussed while at Washington.

Mr. Chavan told Mr. C. D. Pande that the MIGs proposed to be manufactured in India would be of the improved version of MIG-21. Even the new MIGs that were being supplied to India would be of the improved types.

He informed Mr. Kureel that "no conditions or strings are attached" to supply of military assistance.

Mr. Bhupesh Gupta (Com.) said that in the Defence Minister's statement, he had noted that USSR appreciated India's policy of non-alignment. He wanted to know whether this appreciation about India's policy was noticed in the United States.

Mr. Chavan said the conditions under which he had to leave America for India suddenly were very well-known. There was recognition and appreciation of the conditions of Indian policy even in the United States and there was understanding of it.

US Comment:

The US Secretary of State, Mr. Dean Rusk, at a news conference in Washington on September 14 said it was not coincidental that both USA and the Soviet Union were giving military assistance to India.

He added that India had felt that under the pressures directed against it by the Chinese attack of 1962 she needed to strengthen her armed forces. She had asked both USA and the Soviet Union for assistance and both countries were giving it.

[Prev. ref. 5414:CHI:A, 5884:INI:C]

B. Government To Go Ahead With MIG And HF-24 Aircraft Projects: The Central Minister for Defence Production, Mr. A. M. Thomas, gave a categorical assurance in the Lok Sabha on September 21 that the Government proposed to go ahead with the MIG project as well as the manufacture of HF-24 supersonic aircraft and there was no question of giving up either.

The assurance came in the wake of several supplementaries by Mr. Nath Pai and others. Mr. Nath Pai asked whether it was true that the Government was left with a choice either to have the MIG project or manufacture HF-24.

Mr. Thomas said that India had already completed the manufacture of the airframe for HF-24 to suit Mach-I performance. "Our idea is to develop the engine to have Mach-II performance. We intend to enter into suitable arrangements for the manufacture of Mach-II aircraft at Bangalore."

He told another questioner that the Agreement entered into between India and the Soviet Union in 1962 in regard to the MIG project stood. As a result of recent discussions there had been a supplementary agreement.

[Prev. ref. 5235:INI:M]

C. Collaboration With UAR On Supersonic Aircraft Production—Agreement Signed: India and UAR signed in Cairo on September 28 an Agreement for collaboration on producing supersonic (Mach-II) combat aircraft.

The Agreement was signed by Air-Marshal Mohammed Sidky Mahmoud, Commander of the UAR Air Force and Mr. H. C. Sarin, India's Secretary in the Ministry of Defence Production.

Mr. S. S. Khera, India's Cabinet Secretary said UAR had been developing the engine while India had been developing the airframe and the agreement aimed at "marrying the two parts into an advanced fighting machine".

He added: "The UAR and India have agreed that further steps will be taken expeditiously to examine the question of implementing their resolve to assist each other and develop this aircraft. In pursuance of this the UAR and India will exchange technical missions at an early date for further study and consultation."

The Agreement provides for the production of the UAR-developed engine in India.

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 4058:INI:K]

D. British Credit For Defence: The Commonwealth Relations Office announced in London on September 21 that Britain would give India a special "defence credit" of £4.7 million to cover "external cost" during the next four years.

The new credit is specially earmarked for building three Leander-class frigates.

The total foreign exchange cost of the project, which includes the reconstruction and expansion of the Mazagon Docks of Bombay harbour, has been estimated at about £13.6 million.

The project is expected to be completed in 10 years.

[Prev. ref. 5979:INI:B]

E. Increase In Cease-fire Violations By Pakistan In Jammu And Kashmir—Mr. Y. B. Chavan's Statement In Parliament: In a detailed statement to Parliament on September 28, the Defence Minister, Mr. Y. B. Chavan reported "an abnormal increase" in the number of cease-fire violations in Kashmir by Pakistan in an attempt "deliberately" to increase tension.

He said that the number of violations in September—163 so far—was higher than in any preceding month. Moreover, all the attacks were well-planned and prmeditated, and were concentrated on "remote villages and small pickets" which could be easily overwhelmed.

Consequently, he added, the casualties were high. During the Pakistani raids since September 1, as many as 37 Indians had lost their lives; four of them were civilians. Seventeen persons had been wounded and eight missing.

On the Pakistan side, the casualties "definitely known to us" were 72 killed and two wounded.

Another point made by him was that Pakistan was using defence personnel as well as armed civilians for border raids. This was done not only "without any attempt at concealment" but "with a degree of publicity".

The gangs of armed civilians, which had sometimes left behind medium machine-guns or rocket-launchers, were trying to create lawlessness and subversion in Kashmir and were a "major factor in mounting tension in the area".

The Pakistani attacks and incursions were concentrated on Akhnur, Mendhar, Naushera, Tithwal, Uri and Gurais sectors; Pakistan was also building bunkers and trenches on her side of the cease-fire line.

He said: "I would wish to assure the House that we are fully conscious of the seriousness of the situation and are doing all in our power not only to lessen tensions, but also to prevent encroachments on our side of the cease-fire line".

He added that all the violations had been brought to the notice of the Chief Military Observer of UN and over recent months India had accepted a number of suggestions by the Chief Military Observer calculated to lessen tensions.

One of the suggestions was to prohibit the entry of armed civilians within 500 yards of the cease-fire line. "To the best of our knowledge, the Government of Pakistan has not yet accepted this suggestion".

He said that negotiation with Pakistan for a Gentleman's Agreement to prevent the violation of the cease-fire had been interrupted because of the absence from Karachi of the Indian High Commissioner. It had now been suggested to Pakistan that its High Commissioner in New Delhi be authorized to conduct these negotiations.

The most serious violation by Pakistan of the cease-fire line in Jammu and Kashmir in recent years was reported to have taken place in the Uri sector on September 23. About 400 Pakistani troops were deployed.

In the pitched battle, involving some hand-to-hand fighting, that followed, there were many casualties. As the Indian defending party was repelling the Pakistani attack, it was subjected to heavy firing from the Pakistani side of the cease-fire line. The Pakistanis were pushed back in a few hours.

Gen. Nimmo, chief of the UN Observers' team in Jammu and Kashmir, had taken a serious view of this Pakistani provocation. He had sent a report to the UN Secretary-General, U Thant, giving full details of this major offensive action by Pakistan. In his opinion it could not be lightly dismissed as just one of those recurring border incidents.

There had been a series of violations of the cease-fire line by Pakistan during the last few weeks. A new area in which Pakistanis crossed the line last week was the Gurais sector in the north. This incident occurred about 50 miles east of Kargil. This area was comparatively quiet in recent years.

Pakistanis have used heavy weapons in all these incidents. It was stated that on one occasion light tanks were also seen not far from the cease-fire line. An anti-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tank gun mounted on a jeep was also noticed.

F. Skardu-Gilgit Road Being Built By Pakistan: Mr. Y. B. Chavan said in the Lok Sabha on September 21 that Pakistan was developing strategic communications in the Gilgit area near the cease-fire line including the road from Skardu to Gilgit.

In a written reply to a question by Mr. Bibhuti Mishra, he said that the Government, however, had no information regarding Sino-Pakistan collaboration in the matter. India had taken precautions.

He further informed the House that Pakistan was improving her defences in the Lathitilla-Dumabari area of Cachar district in Assam.

He replied in the negative when asked whether Pakistan had withdrawn from the positions forcibly occupied by her during the firing last year in that area. Negotiations for the demarcation of the boundary were going on.

G. Mr. J. P. Narayan's Goodwill Mission To Pakistan: The Sarvodaya leader, Mr. Jaya Prakash Narayan, arrived in Rawalpindi on September 5 at the head of a goodwill mission composed of Mr. S. Mulgaokar, Mr. B. Shiva Rao, Mr. J. J. Singh and Mr. K. S. Radhakrishnan, Secretary of the Sarva Seva Sangh.

Mr. Narayan told newsmen at Chaklala airport that he had brought with him a request and wish of the Prime Minister, Mr. Lal Bahadur Shastri, that F-M Ayub Khan, the Pakistan President, would respond to the invitation to visit India at his earliest convenience.

He said that his mission had the cooperation and sympathy of the Government of India although the latter was in no way committed to it.

He said he would consider his visit worthwhile even if India and Pakistan moved one step forward towards a solution of their 17-year-old differences. "We (he and his group) are doing in India whatever is possible to solve the Kashmir problem. We also want our position to be understood in Pakistan."

Asked whether he was hopeful about the outcome of his mission, Mr. Narayan replied in the affirmative.

Questioned on the nature of his proposed talks with Pakistani leaders, he said they would cover not only Indo-Pakistani disputes but the entire future relationship between the two countries.

Meetings With President Ayub Khan:

Mr. J. P. Narayan and members of his delegation met President Ayub Khan in Rawalpindi on September 6.

President Ayub Khan arranged an unscheduled luncheon meeting in the President's House so that he could carry on discussions with them informally.

The talks were held in a free, frank and informal fashion and covered a wide range, embracing not only Kashmir and other outstanding Indo-Pakistan problems, but the larger and more fundamental question of future relations between the two countries and collaboration between them in socio-economic and cultural spheres.

President Ayub Khan and the delegation leader, Mr. Jaya Prakash Narayan, had two meetings lasting more than two hours.

They met for 25 minutes at the beginning, while the Pakistan Law Minister, Mr. Khurshid Ahmad, discussed general scope of improving relations between India and Pakistan with other members of the mission. Later, President Ayub and Mr. Jaya Prakash Narayan joined them.

After his two meetings with President Ayub Khan, Mr. Narayan said in a statement in Rawalpindi on September 7 that "a real possibility exists for evolving a workable approach to the solution of the outstanding disputes" between India and Pakistan, including the Kashmir dispute.

He said: "I was very happy to meet President Ayub after three years and to find him as genial and warm as before. I was also very happy to see that he was in excellent health.

"There have been in recent months many indications both in India and Pakistan of a desire for a new relationship of co-operation and good-neighbourliness. We came here to explore the ways in which this desire could be consolidated and the cause of friendship advanced.

"We have found an encouraging and statesmanlike response from President Ayub and we believe that a real possibility exists for evolving a workable approach to the solution of the outstanding disputes between the two countries, including the one relating to Kashmir.

"The task will not be an easy one and the ground for a new relationship of trust and confidence will have to be prepared with care and patience. But the road ahead no longer seems dark and uncertain as it has seemed during many periods in the last 17 years. And with God's grace and the help of men of goodwill in both countries, the end of the road will not be far off.

"To say more at this point will not help. Many useful ideas have been thrown up during the talks I had with the President, which were constructive and unusually frank. I shall work on those ideas when I go back to India and I hope some of them will bear early fruit."

Meeting With Mr. Z. A. Bhutto:

Mr. J. P. Narayan discussed Indo-Pakistan relations with the Pakistan Foreign Minister, Mr. Z. A. Bhutto, in Karachi on September 8.

With this, Mr. Narayan's talks with Government leaders came to an end.

Mr. Narayan's talks with Mr. Bhutto were believed to have dealt in general terms with the entire range of Indo-Pakistani relations.

Mr. Bhutto said that he was satisfied with his talks with Mr. Narayan.

Talking to newsmen at a reception held in his honour at Hotel Metropole, he said he had assured Mr. Narayan of all the necessary co-operation, on behalf of Pakistan, in his mission to find out ways and means to resolve the Indo-Pakistan disputes. He told him that Pakistan appreciated his vigorous and genuine efforts in this regard, and was happy to receive him.

Returns Home:

Mr. J. P. Narayan returned to New Delhi on September 12.

He was received at the airport by Sheikh Abdullah, Maulana Masoodi, and the Pakistan High Commissioner in India.

He issued the following statement on his mission to Pakistan:

"We have returned from a week's visit to Pakistan during which we had the opportunity of frank and friendly discussions with the leaders of the Government and a wide spectrum of public opinion including representatives of the Opposition.

"We were satisfied that there is a general desire in Pakistan for a relationship with India based on community of interest and good-neighbourliness. It was made plain to us, however, that such relationship could only be predicated on an honourable solution of the Kashmir dispute. Naturally you will not expect us to go into any details about the talks with President Ayub Khan and Foreign Minister Bhutto.

"It is our impression, for whatever it may be worth, that the attitude of leaders of the Pakistan Government on the question of Kashmir is not rigid and that there is scope for meaningful negotiations.

"We are glad to learn that there will be early meetings between the Foreign and Home Ministers of India and Pakistan and we hope that the meeting at the summit will also take place soon. We don't want to raise expectations of an early end to the difficulties with Pakistan, but we are convinced that the time is ripe for a significant beginning in the process towards reaching practical, attainable solutions.

"We also took up with like-minded persons in Pakistan the question of forming an organization with the same broad objectives as the India-Pakistan Conciliation Group. There was a great deal of interest in the project and we are looking forward to an early formation of the organization in Pakistan and to a visit by them to India when we may be able to repay in a slight measure the debt of kindness and hospitality we owe to the Government and people of Pakistan."

Mr. Lal Bahadur Shastri's Statement In Lok Sabha:

Speaking in the debate on a no-confidence motion against the Government in the Lok Sabha on September 18 (see page 6088), the Prime Minister, Mr. Lal Bahadur Shastri, said he wanted to correct a prevailing impression regarding the plenipotentiary aspect of Mr. J. P. Narayan's mission to Pakistan.

He said: "He did not carry any letter from me to President Ayub Khan." "J.P." wanted that the two countries should come closer to each other. "I did not want to come in his way. I agree that we should live in peace."

Replying to a Communist member, he said when he (Mr. Narayan) talked about Aksaichin, "they are very happy, but not when he refers to Kashmir." The late Mr. Nehru and he (Mr. Shastri) had made public announcements regarding Kashmir on more than one occasion. The Government stand remained the same. "I would, in any case, like to meet President Ayub for an exchange of views."

[Prev. ref. 6055:INI:E]

I. Foreign Policy Debate In Parliament: The Government's stand with regard to various foreign policy issues was re-iterated on September 23 in the Rajya Sabha by the Minister for External Affairs, Sardar Swaran Singh, in his reply to a two-day debate on the international situation.

Mr. P. Ramamurthy (Leftist Communist) wanted India to take the initiative in solving the Sino-Indian border problem. Sardar Swaran Singh said that India had taken the initiative on several occasions. The last one was when Mr. Nehru showed his willingness to go to the negotiating table if China withdrew her posts from the demilitarized zone. This was a concession inasmuch as it meant a partial modification of the Colombo proposals which envisaged an equal number of posts. For anybody to charge that India's attitude was not conciliatory was, to say the least, not justified.

He added: "If Mr. Ramamurthy has the confidence of the Chinese Government let him say what initiative China has taken. The integrity of the country is dear to us. No matter what happens, we cannot compromise on this."

He alleged that Mr. Ramamurthy was trying "to create the the impression that we are adopting a posture which has led to a misunderstanding in the minds of Afro-Asian countries." He repudiated the suggestion and said it was a pity that Mr. Ramamurthy should entertain such a feeling created in his own mind."

At the conclusion of his remarks on this issue he said: "This does not mean that our efforts for a satisfactory settlement will not continue."

On Indo-Pakistani issues he said that India wanted amity between the two countries. One of the guiding principles of the Government's policy continued to be to try for an amicable settlement with Pakistan.

While repudiating suggestions in Pakistan or elsewhere that India meant to harm any country, he recalled that during his talks with the Pakistan Foreign Minister, Mr. Z. A. Bhutto, he had said India was prepared to enter into "a no-war pact" with Pakistan. This showed that there was no ground for anybody to suspect Indian intentions.

About the issue of people of Indian origin in Ceylon, he said India's stand was that the two countries should understand each other's difficulties and bring about a solution acceptable not only to both countries but also to the people concerned. "Let us create an atmosphere of understanding and cordiality so that the forthcoming meeting between the Prime Ministers of the two countries will succeed."

He referred to Mr. S. N. Mishra's apprehension that the Commonwealth seemed to be well on the way to becoming a bloc. He agreed that the Commonwealth should only be an informal association and said that any attempt to formalise the relations between the member-nations would not in the long run be in the interests of cohesion among them.

He explained that African countries wanted some sort of a secretariat for the Commonwealth. Discussions on the nature of such a secretariat were taking place. But he assured Mr. Mishra that a secretariat, if and when it was established, would not give the Commonwealth the character of a bloc.

In Lok Sabha:

The myth of Chinese willingness to quit the seven posts in the demilitarized zone of Ladakh, on the basis of which India had been urged to take the initiative for a direct dialogue with Peking on the border issue, was exploded by Sardar Swaran Singh, while winding up the foreign affairs debate in the Lok Sabha on September 28.

He said that his recent discussions with the Ceylon Premier, Mrs. S. Bandaranaike and her Parliamentary Secretary, Mr. Felix Bandaranaike, did not give him the impression that they had any evidence with them to indicate Chinese willingness to withdraw from those posts.

On Pakistan, he said that despite the complexity of the problems which had been made more complicated by the provocative border incidents and the unhelpful attitude of some Pakistani leaders, "we should try to explore the possibilities of reaching a settlement of our differences."

He said that the Government attached the highest importance to the work of the Cairo Conference in which half the number of member-nations of United Nations participated. India's aim was to reaffirm the policy of non-alignment, particularly in the light of the changing world situation.

The Non-aligned Conference would also concern itself with the codification of the policy of peaceful co-existence, disarmament, strengthening of the UN Organization, raise its voice against colonialism and imperialism and discuss ways of furthering economic development and co-operation among the participating countries.

Answering a question about the reported Portuguese complaint to the Security Council in regard to Goa, he said: "We shall take very serious notice of this". The complaint had not yet been lodged. They might circularise it among members of the Security Council, with mischievous intent. The Government of India would present its own version.

The meeting of the Laotian Princes in Paris had not been quite a success, but it was hoped that the Princes would resume their talks after the Cairo Conference which Prince Souvanna Phouma was attending. The Laotian problem could be solved only through a political approach.

He said that the position regarding North and South Viet-Nam was difficult. The Government of India hoped that outside interference in the form of troops and other things would be eliminated.

[Prev. ref. 6040:INI:A]

J. Bakshi Ghulam Mohammed Arrested In Jammu And Kashmir: A former Premier of Jammu and Kashmir, Bakshi Ghulam Mohammed, was arrested in Srinagar on September 22 along with six others under the Defence of India Rules and taken to Udhampur jail.

Among those arrested were four legislators besides the former Premier. They were Mr. Ghulam Nabi Wani Sogami, Mr. Ghulam Ahmed Soofi, Mr. Abdul Rehman Ghazi and Pir Mohammed Yaheeya Siddiqi.

A few hours later the Sadri-i-Riyasat, Mr. Karan Singh, prorogued both Houses of the Legislature. When the Sadr-i-Riyasat's order was read out in the Assembly, some members shouted "shame, shame."

The Premier, Mr. G. M. Sadiq, defended the arrests at a news conference, saying that Bakshi Ghulam Mohammed's activities were likely to prove a threat to the peace and security of the State. It would not be proper for him to disclose at this stage the various charges against the former Premier.

He said that Bakshi Ghulam Mohammed would be shifted to Tara Nivas, a guest house converted into a jail. The other arrested leaders would be lodged in the Central Jail in Srinagar.

Replying to a question, he denied that Bakshi Ghulam Mohammed's talks with Sheikh Abdullah and Maulvi Mohammed Farooq had anything to do with his arrest. He also denied that the arrests had been made to forestall the tabling of a no-confidence motion against his Ministry. He had no knowledge of any such motion.

He hoped that the prorogation of the Legislature would be for a short period. As soon as the situation became normal the Legislature would be summoned to meet.

The arrests followed reports that dissidents in the National Conference Legislature Party had decided to overthrow the Ministry. A spokesman for the dissidents had claimed that they enjoyed a majority in the party.

The arrests were condemned by the dissidents. They contended that the step had been taken to forestall the no-confidence motion against the Ministry, notice of which was given on September 22.

Reaction In New Delhi:

The Central Government was taken completely unawares by the news of the arrest of Bakshi Ghulam Mohammed and his six associates in Srinagar.

Unlike in 1953, when the first Premier of Jammu and Kashmir, Sheikh Abdullah, was arrested with the full knowledge and concurrence of the Centre, Bakshi's arrest was not known even to the Prime Minister, Mr. Lal Bahadur Shastri, till 9 a.m. on September 22.

It appeared that Mr. Shankar Prasad, Secretary for Kashmir Affairs, who was in Srinagar, was with Bakshi Ghulam Mohammed till 9 p.m. on September 21 trying to dissuade him from moving the proposed no-confidence motion against the State Government. The Bakshi, on the other hand, was credited with the intention of moving a similar motion even against the Sadr-i-Riyasat whose office is also now elective.

The matter came up in both Houses of Parliament through calling-attention notices.

Mr. Lal Bahadur Shastri told the Rajya Sabha that the Central Government had not been given prior information about the arrests. The State Government had apparently taken the decision about one or two o'clock the same morning and he (Mr. Shastri) received intimation about this development at 9 a.m.

Mr. A. B. Vajpayee (JS) drew attention to the news of the arrests and said that it had come as a surprise. Was Bakshi's arrest made at the instance of the Government of India?

Mr. Shastri replied in the negative and said he was not posted with the details yet. He read out a statement by the Premier of Jammu and Kashmir, Mr. G. M. Sadiq.

The statement read:

"Lately, the State authorities had been investigating cases of corruption and other criminal cases in which Bakshi Ghulam Mohammed's complicity was suspected. To forestall possible developments in this connexion, Bakshi Ghulam Mohammed had started acting in a manner which left no doubt that he and some of his associates were making various attempts to create conditions likely to affect adversely the public peace and internal security in the State. At a time like this when the greatest need of the hour is to harness all our efforts towards the fulfilment of our programme of economic development, his disruptive moves were likely to have great repercussions on the normal life of the country and the well-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

being of the people of the State. The State Government therefore decided to curb such prejudicial and anti-social activities of these elements in the larger interests of peace and public order. The Government has therefore detained Bakshi Ghulam Mohammed and six other persons under the Defence of India Rules. The State Government was compelled to take the action with reluctance in these circumstances."

(*The Times of India*, New Delhi)

[Prev. ref. 5716:INI:L]

K. Bank Rate Raised: The increase in the Bank Rate from 4½ per cent to 5 per cent with immediate effect and the modification of the existing mechanism of credit control were announced in the Lok Sabha on September 25 by the Central Finance Minister, Mr. T. T. Krishnamachari.

These steps were taken by the Reserve Bank of India to correct the imbalance between the rate of monetary expansion and real output growth to which, Mr. Krishnamachari said, private sector operations had contributed.

His "credit squeeze" measures were generally welcomed by MPs who, in the lobbies, said the announcement showed the Government's readiness to tackle a difficult situation.

Although it was recognized that monetary transactions were limited, the announcement had served a warning that manipulations would not be tolerated and this would have an important psychological effect on the economy.

The modification of the credit control mechanism was being done by changing the system of quotas through which the Reserve Bank regulates the borrowings of scheduled banks.

The Reserve Bank has decided to introduce a system under which the cost of commercial banks' borrowings from the Reserve Bank will be linked to the actual level of credit extended by the commercial banks in relation to their own resources.

Thus, Mr. Krishnamachari said, the emphasis will be on increased cost, rather than a direct restriction of the availability of credit from the Reserve Bank, to secure the needed restraint. In this way, genuine productive requirements of the economy would not be affected.

He added that the Reserve Bank was taking steps to introduce a "more orderly deposit rate structure under which the rates on longer term deposits will become relatively more attractive to the holders and thus assist deposit mobilization".

This was because the capacity of the banking system to meet the growing credit demands of an expanding economy depended essentially on the success with which it could increase deposits. The present narrow spread between the interest rates on short and longer term deposits was not conducive to the process of deposit mobilization.

He prefaced his announcement by expressing the Government's concern at the deterioration in the price situation, particularly food prices, which showed the strain the economy was going through.

He stressed the need to cut non-essential expenditure and appealed to the States to review their expenditure position in the light of the current serious supply and price position.

Deficit financing should be kept to the minimum, he said, particularly as additional doses of deficit-financing in the light of the tight position on the supply side would only aggravate an already serious situation.

The 5 per cent Bank Rate is the highest so far in India.

At the beginning of the First Five-Year Plan the rate was increased from 3 per cent to 3.5 per cent. At the beginning of the Second Plan it was increased by another ½ per cent. More or less in the middle of the Third Plan, in January, 1963, the rate was again raised by another ½ per cent.

Interest On Deposits Raised:

It was announced in Bombay on October 1 that scheduled banks had decided to step up the rates of interest on deposits with immediate effect. The average increase would be about ½ per cent for term deposits.

The executive committee administering the all-India inter-bank agreement on maximum rates of interest on deposits, decided to revise the rates as follows:

"Banks will offer no interest on deposits up to 14 days. The rate for deposits for 15 to 45 days has been fixed at 1.25 per cent and for 46 to 90 days at 2.50 per cent in accordance with the directive of the Reserve Bank of India.

"For term deposits the rates are: 91 days and over but less than six months —4 per cent; six months and over but less than one year—4.50 per cent; one year and over but less than two years—5 per cent; two years and over but less than three years—5.25 per cent; three years and over but less than five years—5.50 per cent; five years and over but less than seven years—6 per cent; seven years and over but less than nine years—6.25 per cent and nine years and over 6.50 per cent."

The State Bank of India announced the revised rates on September 30.

[Prev. ref. 5029:INI:F]

L. Statutory Price And Production Controls On Cloth Imposed: The Central Minister of Commerce, Mr. Manubhai Shah, announced in the Lok Sabha on September 28 that statutory price and production controls on popular varieties of cloth would come into force from October 15.

The controls will be introduced over the manufacture and sale of mill-made dhotis, saris, longcloth and shirting, covering about 45 per cent of the total annual mill production excluding sales for exports and defence requirements. The quantity involved is estimated at about 2,000 million yards.

According to a statement laid on the table of the House, the introduction of controls will result in a reduction of about 5 per cent to 8 per cent in the prices of most of the cloth of the controlled categories from those prevailing under the Voluntary Price Scheme.

In a few old varieties of controlled categories (whose prices continue at the pre-1961 level, and which constitute less than 5 per cent of the controlled cloth), the new prices may, however, rise by about 7 per cent to 8 per cent.

Even though controls came into force on October 15—it is expected that "substantial" quantities will become available early in November—Mr. Shah told newsmen later that prices would probably fall almost immediately in view of the announcement.

Under the statutory controls scheme, formulae have been drafted to work out the cost of particular varieties of cloth.

Ex-mill and retail prices, excise duty, the category and description of the cloth and the "tex-mark" of the mill will also be stamped on the cloth and all controlled categories will bear the words "controlled cloth" on them. All details will be printed in red.

An important feature of the scheme is that no mills will be allowed to produce controlled varieties of cloth—that is, dhotis, saris, longcloth and shirting—in the non-controlled sector. No mill will also be allowed to print these words (dhotis, saris, etc.) on any non-controlled varieties.

The statement said that mill-made cloth of the non-controlled categories will not be subject to price control. "But the Government trusts that the industry, the trade and the consumers will exercise the necessary restraints to see that these categories sell at reasonable prices and do not show any undue rise in the price of such cloth."

Mills were instructed to begin to produce and stamp prices from October 7 onwards and complete the switch-over by October 15.

To make sure that the control scheme is effectively implemented, a new wing has been created in the Textile Commissioner's organization under an Additional Textile Commissioner.

It was also proposed to set up a "Textile Control Advisory Committee", under the chairmanship of Mr. V. P. Naik, Chief Minister of Maharashtra, to advise the Government on all aspects of the work relating to the administration of the controls.

Mr. Shah said: "In calculating the retail price of cloth of the controlled categories, a margin of 18 per cent over the ex-mill price (excluding excise) will be allowed to the trade".

An official clarification given later said: "While most of the textile mills in the country will re-adjust thehir production of programme and bring up their production of the controlled cloth to the required quantum as per control orders, some mills in West Bengal and Northern India, which at present produce a larger percentage of dhotis and saris on account of their existing machinery and equipment, can continue to have this larger production of dhotis and saris."

(*The Statesman*, New Delhi)

[Prev. ref. 5596:INI:O]

M. Companies (Second Amendment) Bill Passed: The Lok Sabha passed in the third week of September a Bill to amend the Companies Act in accordance with the recommendations of the Vivian Bose Commission, which inquired into the working of the Dalmia-Jain companies and the Daphtary-Shastri Committee, which examined these recommendations.

The Companies (Second Amendment) Bill, introduced on September 21 by the Minister of State for Finance, Mr. B. R. Bhagat, on behalf of the Finance Minister, sought to strengthen the provisions of the parent Act relating to investigation of the affairs of companies.

It also sought to provide for more effective audit in dealing with cases of dishonesty and fraud in the corporate sector.

The following are some important provisions in the 62-clause amending measure:

"Clause 3 (sub-clause two): It is proposed to expand the definition of officer in Clause 5 of the parent Act to bring within its ambit any person in accordance with whose instructions the board or any of the directors of a company is accustomed to act. This is designed to counter the trend whereby dummy directors are appointed on boards of companies to implement policies of a dubious nature, while the masterminds, mainly instrumental in evolving these policies, remain in the background.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"Clause 4: This provides for delegation of powers by the Company Law Board to the officers of the Board with the approval of the Government.

"Clause 5: The purpose of the amendment is to provide for clear definitions of the main and subsidiary objects of a company in its memorandum of association.

"Clause 8: It seeks to make it an offence to make applications for shares or their allotment in the name of fictitious persons.

"Clause 11 (a): This clause seeks to impose a duty on the promoters and directors of a company to ensure that the share capital reflects cash or other valuable assets and is not supported by merely book adjustments.

"Clause 12: This seeks to make it clear that underwriting commission should not be paid except in respect of shares or debentures offered to the public.

"Clause 13: It contains restrictions designed to curb the abuse inherent in the system of blank transfer of shares.

"Clause 21: A sub-section of this clause makes it clear that the Registrar of Companies or any officer authorised in that behalf may inspect the books of account and other books and papers of the company without giving any previous notice to the company.

"It is made obligatory on the company and its officers to produce the necessary books of account etc. for inspection by the Registrar or any other officer and to give him all possible assistance.

"Clause 24: A new section is proposed to be introduced to enable the Government to issue necessary directions for conducting cost audit of companies engaged in manufacture or mining activities.

"Clause 29: This introduces a new Section—250A—on the basis of a recommendation made by the Daphtary-Shastri Committee in the light of the Vivian Bose Commission's report. One of the methods by which investigations into the affairs of the company were sought to be delayed was by raising technical objections to it on the ground that applications for relief against oppression and mismanagement were pending before a court or that the company concerned had gone into liquidation. The proposed Section 250A provides that investigations may be initiated notwithstanding the voluntary winding up of the company or the pendency of such application in court.

"Clause 36: Under the present provision regarding the retiring age of a director, the normal retiring age is 65, but he could continue beyond this age provided a special resolution is passed by the company. The amending clause seeks to raise the age of retirement to 75 but makes no provision for continuance beyond that age.

"Clause 40: This is based on the observations of the Vivian Bose Commission regarding the abuse arising out of payment of compensation to the sole selling agents for the unexpired period of their agreement. The Commission has suggested that in certain circumstances no compensation should be paid at all, while in others compensation should be paid only for the unexpired portion of the agreed term, not exceeding three years. This clause seeks to insert a new section to implement these recommendations.

"Clause 43: The restriction on remuneration of directors is sometimes sought to be evaded by the directors holding technical or other appointments in addition to their directorship. This clause seeks to provide for bringing such cases within the purview of Section 309 of the Companies Act. The clause also provides for payment of monthly salaries to part-time directors.

"Clause 46: The Vivian Bose Commission had suggested that inter-company loans should be on a par with inter-company investments and should be subject to the same restrictions as the latter. In particular, the Commission had recommended that the loans referred to in Section 370 should be subject to the restriction contained in Section 372. This clause seeks to amend Section 370 accordingly.

"Clause 51: This seeks to check certain malpractices in relation to take-over offers.

"Clause 53: This clause proposes to delete Sections 410 to 415 of the Companies Act in regard to the advisory commission. It provides, instead, for the constitution of an advisory committee to advise the Central Government and the Company Law Board on such matters arising out of the administration of the Act as might be referred to it. The committee would consist of not more than five persons.

"Clause 54 and 55: These clauses seek to provide that a company which has been brought under voluntary liquidation should not be dissolved until the official liquidator has scrutinised the books and papers of the company and made a report to the court that its affairs have not been conducted in a manner prejudicial to the interests of its members or the public interest."

The Bill also sought to simplify some of the procedural requirements which, according to its Statement of Objects and Reasons, "are at present burdensome to the companies without being of corresponding advantage to the Government."

The Bill was passed by the Rajya Sabha on September 28.

[Prev. ref. 5596:INI:N]

N. **Hindustan Antibiotics' Annual Report:** Releasing Hindustan Antibiotics' annual report at a news conference in New Delhi on September 26, the Managing Director, Dr. G. S. Kasbekar, said the company had responded promptly to the Finance Minister's call for larger returns from public sector projects by declaring a high dividend of 10 per cent from its profits for 1963-64.

The company, which had so far been paying a dividend of 6¼ per cent to the Central Government, decided at a meeting of its board of directors to raise it to 10 per cent.

As a result, the company will pay to the Central Exchequer Rs. 24,73,000 this year as against Rs. 15,45,000 paid last year. The Central Government holds shares for Rs. 247,00,000 in the company.

Dr. Kasbekar said that the company had steadily increased its profits by progressively reducing the cost of production and raising production and sales.

Dr. Kasbekar and the chairman of the company, Dr. D. P. Setna, who was also present at the news conference, reviewed in detail the progress of the Pimpri undertaking in the last 10 years of its working.

The net sales in 1963-64 amounted to Rs. 447,00,000 and the gross surplus before taxation was Rs. 144,00,000. The net surplus after taxation etc. was about Rs. 72,00,000. The ratio of net profit to net sales was about 32.3 per cent. The sale turnover of 1963-64 registered an increase of 12 per cent over the previous year.

The company's output of penicillin, they said, met more than 60 per cent of the domestic demand. The private sector companies added another eight to 10 per cent. The rest was being imported.

Dr. Kasbekar indicated that there were good possibilities of the company entering the export market for penicillin. He was expecting some orders from South-East Asian and Middle East countries. The company proposed to step up penicillin production from 52 million mega units in 1963-64 to 70 million mega units in 1964-65.

The most significant achievement of the company was, however, in the field of research and new products. A new antifungal antibiotic, discovered at the research laboratory of the company, had attracted foreign attention.

A new product, known as namycin, had proved very effective in the treatment of tinea infections including cases which did not normally respond to other antibiotics. Commercial manufacture of this product had been approved by the Government of India.

Simultaneously, various pharmaceutical firms of international repute had approached Hindustan Antibiotics for royalty rights for commercial exploitation of this new drug all over the world. Negotiations in this regard were in an advanced stage and were expected to conclude soon.

Work on other new antibiotics was also under way. A project for undertaking the manufacture of recently discovered neomycin was being finalised.

Dr. Kasbekar added that the company was also engaged in setting up and operating a pilot plant for the production of vitamin 'C' by a technique which had been developed by the National Chemical Laboratory, Poona.

PAKISTAN

A. **Miss Fatima Jinnah To Run For Presidency:** Miss Fatima Jinnah, 71-year-old sister of the late Mr. Jinnah, on September 17 agreed to run for the Presidency against President Ayub Khan.

A formal announcement regarding Miss Jinnah's acceptance of nomination was later made by Khwaja Nazimuddin, President of the Council of Muslim League.

Miss Jinnah told newsmen: "I am doing this for the country, I am not doing it for myself."

The Jamaat-i-Islami group is not associating itself with the decision to set up Miss Jinnah as it could not take any decision in the absence of its leaders who are in jail.

The statement read out to newsmen by Opposition leaders said: "The combined Opposition consisting of the Council of Muslim League, Awami League, National Awami Party and Nizami-e-Islam requested Miss Fatima Jinnah to accept nomination for Presidential elections. She has graciously accepted the nomination".

Miss Jinnah will lead the Opposition campaign for the election in November of the 80,000 "Basic Democrats" who will elect the President in March, 1965.

Miss Jinnah, who was closely associated with her brother, Mr. Mohammed Ali Jinnah, throughout his campaign for creation of Pakistan, had never been closely connected with any of Pakistan's political parties in the 17 years since its birth.

In an Independence Day message on August 14, Miss Jinnah had attacked the Government as one which had led to private gain and public intrigue.

B. **Record Cotton Export:** Karachi Cotton Association sources said on September 11 that a record quantity of 8,83,000 bales of cotton was exported by Pakistan during the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

season ended August 31. Exports during 1962-63 accounted for 7,92,000 bales.

The carry-over this season was only 58,000 bales, including 10,000 bales of desi cotton. The Association sources said that considering the consumption of the indigenous textile industry, this was not a big quantity.

China maintained its lead during the season and headed the list of countries buying Pakistan cotton with total purchases of 3,03,000 bales.

Hong Kong was second with total purchases of 2,19,000 bales, while Japan, which, till the previous season, was the most important cotton buyer of Pakistan cotton, purchased only 1,09,000 bales during this season.

The reason, the trade circles pointed out, was that USA supplied cotton to Japan in large quantities on deferred payment basis.

The UK ranked fourth with a total purchase of 79,000 bales, followed by Yugoslavia with purchases of 47,500 bales.

The Soviet Union and other Socialist countries did not make any purchases of Pakistan cotton during the season.

The USA purchased only 8,000 bales, which included 7,700 bales of desi cotton.

Three thousand bales were imported by different African countries.

Out of the total production of about 23,00,000 bales, over 14,00,000 bales were consumed by the indigenous textile industry.

C. Ban On Jamaat-i-Islami Party To Be Lifted: The Government announced in the Supreme Court in Karachi on August 29 that the Right-wing Jamaat-i-Islami Party, charged with fostering unrest among civil servants, would not be outlawed.

Counsel for the Government announced the decision during an appeal by the religious party's chief, Maulana Abdul Ala Maudoodi, against the judgment of the West Pakistan High Court in upholding action taken by the Provincial Government in banning the organization.

The Party, most organized in Pakistan's splintered opposition, had been banned by the Governments of East and West Pakistan under a Criminal Law Amendment Act in January for "subversion (see page 5650).

At the same time, 45 members of the party hierarchy had been jailed, and party offices throughout the country nailed up.

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 6001:PAK:C]

SAUDI ARABIA

A. Development Of Riyadh: A message on September 4 said that a complete face-lift for the city of Riyadh had been planned by the City Council. The cost of the operation would be included in the State Budget for the next year.

Twenty-six new streets are to be constructed, 22 existing streets paved and a further 20 streets installed with modern lighting. Ten fountains and nine clock towers will add elegance to the city and public lavatories and a giant incinerator for garbage disposal will improve its amenities. Plans for the future include the demolition of the old commercial quarter and food market and the building of a modern shopping centre.

A 60,000,000 riyals ($13,000,000) contract covering Riyadh's water filtration and purification project is expected to be signed with a Swedish company in the immediate future, operations being scheduled for completion within three years.

(*Middle East Economic Digest*, London)

SYRIA

A. State Budget For 1964: The Presidential Council, at the beginning of September, 1964, announced the Ordinary Budget for the financial year which began on January 1 and ends on December 31.

The last State Budget was approved in October, 1962 and covered the 18 months, July 1962-December 31, 1963, it having been decided to change the beginning of the fiscal year from July 1 to January 1 with effect from 1963.

The new budget is balanced at £S634 million, which shows a very slight increase of £S5.1 million if, for the sake of comparison, the previous 18-month total of £S943,372,000 is calculated on a 12-month basis. The 1961-62 Budget was balanced at £S943,425,000.

The biggest item of expenditure is defence which, with an allocation of £S295,333,000 accounts for 46 per cent of total spending. Internal security receives £S50,880,000, both allocations being proportionately unchanged from the 1962-63 budget. There are few deviations from the previous figures in the new Budget, the allocations generally following those of 1962-63.

Expenditure on education is estimated at £S86,528,000 (£S129,000 for the 18-month period 1962-63), and on health at £S19,841,000 (£S29,762,000 in 1962-63). Communications, Social Affairs and Municipal Affairs all show a decrease on the figure of three years ago; Communications receive £S14,463,000 against £S15,578,000 for the 12 months 1961-62 and £S21,694,000 in the 18-month period 1962-63; Social Affairs £S3,496,000 against £S4,556,000 in 1961-62 and £S5,244,500 in 1962-63; and Municipal Affairs £S3,661,000 against £S472,600 in 1961-62 and £S5,491,-500 in 1962-63. The subsidy for radio services has grown from £S2,817,000 in 1961-62 to £S8,688,000 in the 18 months 1962-63 and £S5,792,000 this year. The subsidy for television which was first introduced in the 1962-63 Budget remains proportionately the same at £S7,871,000 this year. Both radio and TV are State-owned.

On the revenue side, direct taxes are budgeted to yield £S113,550,000, indirect taxes £S246,470,000, registration fees £S85 million, State lands and property £S5,457,000, State enterprises £S1,750,000 (compared with £S4,500,000 in 1961-62 and £S6,900,000 in 1962-63), public services £S137,965,000, deferred payments £S4 million, and miscellaneous revenues, resulting mainly from rates and taxes imposed in the last Budget, £S634,000,000.

The Minister of Industry, Mr. Adel al-Saadi, announced an increase in the price of diesel oil throughout the country. Syrian consumption is about 700,000 tons a year, most of which is imported and, while world prices have risen in recent years by some 15 per cent, there has been no increase in the local price since 1960. The new price will be £S2.25 per 20 litres.

(*Middle East Economic Digest*, London)

[Prev. ref. 4860:SYR:B, 4903:SYR:A]

TURKEY

A. Foreign Trade: According to statistics available early in September, 1964, Turkey's foreign trade for the first six months of 1964 showed a deficit of $127,100,000 as against $144,000,000 for January-June, 1963.

Exports amounted to $168.4 million compared with $174.4 million in the same period of 1963, while imports totalled $295.5 million compared with $318.4 million in 1963. One reason for the decline was the fall in tobacco exports, from $51.7 million in 1963 to $41.3 million. Imports of machinery rose steeply from $78.9 million in the period January-June, 1963 to $111.8 million in 1964. Imports of wheat fell from $29.4 million to $2.2 million as Turkey herself had a good harvest in 1963.

The Minister of Commerce, Mr. Fenni Islimyeli, announced that since export freedom had led to an increasing number of commodities being exported at below market price, particularly in the south of Turkey, it had been decided to impose export price restrictions there and at other ports should the need arise. At present livestock is the main export involved; exports of livestock in the first six months of this year fell to $5 million from $6.9 million in the same period last year.

Turkey's import policy for the second half of 1964 will also be less liberal. The list of prohibited imports prepared by the Ministry of Industry, now being considered by the Cabinet, includes prefabricated buildings, metal construction materials and fittings, lighting and air-conditioning equipment, telephone exchanges, vehicle bodies, concrete mixers, graders pumps, tractors, agricultural tools, sewing machines and radios. Tariff and import restrictions protection is being provided for any local industry able to meet most of the demand.

(*Middle East Economic Digest*, London)

[Prev. ref. 5794:TUR:A]

VIET-NAM (RVN)

A. Another "Coup" Attempt: South Viet-Nam went through another military *coup* on the morning of September 13, the third since President Ngo Dinh Diem was killed in November, 1963.

The latest attempt at overthrow of the Government of Gen. Nguyen Khanh was made by Brigadier-General Lam Van Phat, who recently lost his post as Minister of the Interior. He headed a group of Catholic generals and other officers who formed themselves into a "Council for Liberation of the Nation opposed to Communism, dictatorship and neutralism." Brig-Gen. Lam said he would place Gen. Khanh under arrest.

The five points in the Council's programme "for the salvation of the nation" were:

(1) To establish and strengthen the power of the nation to destroy all plots by the (Communist) Viet-Cong disguised under nationalism.

(2) To weed out the Viet-Cong and its lackeys from nationalist elements.

(3) To unify the people and the army into one bloc without distinction of religion, and to co-operate and accept all capable people from all walks of life without discrimination.

(4) To establish a clear frontier between religion and politics: to keep reli-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

gion out of politics and politics out of religion.

(5) The Republic of Viet-Nam "is determined to stand among the free nations of the world, respect the United Nations Charter and all agreements already signed: to unite with all nations which respect the sovereignty of the Republic of Viet-Nam and support the struggle of the Viet-Namese people in its fight against Communism."

Attempt Fails:

However, within 24 hours the *coup* the Council collapsed and Gen. Khanh was back in power. According to reports, the *coup* failed because the Air Force General did not support it.

Air Force General, Air Commodore Nguyen Cao Ky said at a news conference on September 14 that there was no coup, but only a movement of troops. He and other Generals were reported to be making up a list of demands to be fulfilled by Gen. Khanh, the main one of which was said to be the purging of Communist and neutralist elements from the Government.

The failure of the coup was also due to lack of US support for Gen. Lam.

Gen. Khanh returned to Saigon following the collapse of the military coup, and promised to hand over power to any Government which had the confidence of the entire people.

While he was speaking at a news conference, about 1,000 banner-carrying students marched through the streets of Saigon shouting slogans against "counter-revolutionary" coups and neutralism.

Air Force helicopters and planes circled above the city keeping watch on the demonstrators.

At Can Saint Jacques, near Saigon, Gen. Khanh met the US Ambassador, Gen. Maxwell Taylor, who had just returned from Washington.

A reconstruction of events following the coup indicated that a number of Generals had previously reached basic agreement on certain demands to be put to the Government. Some Generals wanted to back up these demands with a show of force—a coup—but Air Commodore Ky and others opposed this.

However, certain commanders ordered troops into Saigon, forcing Air Commodore Ky to elect whether to back them or oppose them. Although the city was entirely in rebel hands, he decided to crush the coup, using force if necessary.

Throughout September 13, more and more Generals commanding troops threw their support behind Air Commodore Ky until by early morning on September 14 some of the coup forces themselves withdrew, leaving Generals Duc and Lam in a very weak position.

A Washington report stated the United States continued to support the duly constituted Government set up by Gen. Khanh, Gen. Minh and Gen. Khiem.

On the evening of September 16, the leader of the abortive coup, Brig-Gen. Lam surrendered to the Government, bringing an end to the crisis.

Several high-ranking officers linked with the coup were arrested.

There were also reports that the Commander-in-Chief of the Armed Forces, Lieut-General Tran Thien Khiem, had been relieved of his post and his powers taken over by the Prime Minister, Major-General Khanh.

Official sources declined to confirm or deny the sacking of General Khiem, whose role in the coup was not clear.

[Prev. ref. 5768:RVN:A]

YEMEN

A. Loans From China And Hungary: It was stated on September 11 that China had granted a loan of £10,000,000 to Yemen for the construction of a 200-mile highway from Sanaa to Saada in north Yemen, a weaving factory, a school and a hospital in Sanaa.

The loan will also be used to finance agricultural projects and for the repair of the Chinese-built Sanaa-Hodeida road, construction of which began in 1959 with a credit of 70,000,000 Swiss francs from China.

Hungary had agreed to grant a loan of $300,000 and a Trade Agreement valued at $1,000,000 had been negotiated between the two countries.

(*Middle East Economic Digest*, London)

[Prev. ref. 5924:YEM:A]

B. UAR-Saudi Arabia Accord On Ending War In Yemen: UAR and Saudi Arabia announced in a *communique* issued in Cairo on September 14 that they would try to stop hostilities in Yemen.

The announcement was made at the end of conversations in Alexandria between Emir Faisal, Regent and Prime Minister of Saudi Arabia, and President G. A. Nasser of UAR.

The **communique** said: "The Kingdom of Saudi Arabia and the United Arab Republic decided to co-operate completely in order to resolve the differences existing between the parties concerned in Yemen and affirm their desire to avoid armed conflicts in the Yemen.

"The two countries have agreed to make the contacts and to use their good offices with the two sides in Yemen in order to create an atmosphere permitting existing differences to be resolved by peaceful means."

King Hussein's Appeal:

An Alexandria message on September 10 said that King Hussein of Jordan had urged Saudi Arabia to recognize the Yemen Republic.

Sources close to the King said that King Hussein had made his appeal at a session of the Arab "Summit" Conference. The sources added that King Hussein stressed the necessity of such a settlement in order to strengthen the Arab front in the Palestine affair.

King Hussein, whose Government recognized the Yemen Republic regime in August, also offered his services as mediator between Saudi Arabia and Yemen.

[Prev. ref. 6025:YEM:D]

ASIA OUTSIDE ASIA

A. UN Economic And Social Council Meeting: Proposals for the establishment of a new UN development programme, measures related to the UN Development Decade, financing of economic development, expansion of development activities, intensified action in the housing and social defence fields, examination of world economic trends, and the economic and social consequences of disarmament were some of the subjects which the United Nations Economic and Social Council discussed at its 37th session, which opened in Geneva on July 13.

The Council had before it the reports of the recent UN Conference on Trade and Development, including proposals for the establishment of a continuing machinery to keep world trade problems under constant review and to promote expansion of international trade.

Other items on the agenda related to the World Food Programme, the development of nature resources, science and technology and illiteracy.

The proposals concerning the new UN Development Programme resulted from a Council resolution requesting the preparation of a study on steps to bring about closer co-ordination of technical co-operation and pre-investment activities of the United Nations family of organizations. Documents which the Council had before it on this matter included the report of an ad hoc Committee of 10 appointed to prepare such a study.

It also had before it two other reports by the Secretary-General outlining a plan providing for a merger, under the proposed Development Programme, of two existing operations aiding developing countries—the Expanded Programme of Technical Assistance (EPTA) and the UN Special Fund.

U Thant's Statement:

The Council heard a statement by the UN Secretary-General, U Thant and approved the annual reports of the four regional Commissions.

The following is a summary of U Thant's statement to the Council:

"During the past year, the world economy has continued to move forward and the recent growth has been shared by most areas of the world. However, the record of growth continues to be marred by the familiar weaknesses in all regions.

"A change is taking place which is of particular significance to the examination of the world economic situation. It is a change of political dimensions in the awareness of the need for more organized international co-operation in the economic and financial field.

"Significant initiatives have been taken in various quarters towards the adaptation of international policies and institutional arrangements. The most momentous development has been the UN Conference on Trade and Development.

"North-South tensions are fundamentally as serious as East-West ones. Before the Trade Conference, the parallel between North and South, on the one hand, and East and West, on the other, may have seemed a little far-fetched. Now the South can be identified as a large group of more than 75 votes, when it chooses to assert itself. In demonstrating such a possibility, the Conference may have signalled a turn in the history of international economic relations.

"The contribution that may be expected of the 75 to the solution of world problems will depend to a great degree on the validity of the faith in the unique value of United Nations as an instrument for reconciling differences of opinions.

"The recommendations of the Trade Conference show that no problem can be dealt with outside the context of a single world economy in which trade cannot be dissociated from a complex of inter-related activities involving the interests of all nations. Greater cohesion among less developed countries will definitely foster world-wide economic co-operation.

"The Council should make a review and reappraisal of the functions and machinery of the whole Organization, and

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

particularly of the Council, with the utmost frankness.

"It should be remembered that economic progress has no meaning if it is not closely related to social aspirations. Trade and investment must be seen in the broad context of the prevailing social structure.

"With respect to the international economy, there is a need to ensure that those who can contribute to its progress and growth should know how it is affected and shaped by the various actions taken constantly by Governments as well as by international bodies.

"There is an overriding need to ensure the continuing appraisal of performances in the world economy against the background of aspirations and objectives. There is a need at the international level for revew of both national and international programmes to lend greater clarity, urgency and cohesion to the widely diffused, and often unrelated, efforts being made today towards development.

"This session should initiate certain steps to permit the Economic and Social Council to perform this function more adequately than in the past.

"The targets which have been set up by the General Assembly and which have been given additional emphasis in the UN Trade Conference might become embarrassing or perfunctory if there were no machinery to get an accurate and comprehensive view of how far or how close we are to them year after year. The world economic situation is characterized by increased determination on the part of the developing countries to plead their case, greater willingness on the part of the industrialized ones to listen, and, as a result, by a better chance for a proper understanding of the problems involved and their inter-relations."

Resolutions:

The Council took the following actions in the first week of August:

(1) Referred to the General Assembly a draft convention on the elimination of all forms of racial discrimination.

(2) Requested the Assembly to take further action this year on the draft declaration and convention on the elimination of religious intolerance.

(3) Designated 1968 as the International Year for Human Rights.

(4) Requested the Economic Commission for Europe (ECE) to examine further the problem of re-insurance in relation to trade, taking into account a recommendation of the UN Conference on Trade and Development.

The Council's Co-ordination Committee adopted a resolution under which the Special Fund and the Expanded Programme of Technical Assistance would be combined in a programme to be known as the UN Development Programme.

The Council's Economic Committee adopted resolutions dealing with new sources of energy and with the desalination of water. One resolution would have the Council approve the establishment of a solar energy experimental centre in Niger.

The Council's Social Committee recommended that the Council approve a plan envisaging the creation of a centre for housing in the UN Secretariat.

Economic And Social Consequences Of Disarmament:

On August 12, the Council unanimously approved a resolution concerning the economic and social consequences of disarmament.

The resolution, tabled jointly by the delegations of Czechoslovakia, Colombia, USSR and USA, stressed the need for the early conclusion of a Treaty on general and complete disarmament and pointed out that all States must redouble their efforts to achieve this goal.

The Council stressed the importance of extensive research to find the most convenient ways and means of channelling all material and man-power resources, released as a result of disarmament, to peaceful production.

Session Ends:

The Council concluded its session on August 15.

At its closing meeting, it adopted a number of resolutions dealing with questions related to the UN Development Decade, and concerning a general review of the economic, social and human rights programmes and activities of the UN family of organizations.

Regarding the UN Development Decade, the Council heard statements emphasizing the need for a concerted information effort throughout the world.

The President, Sir Ronald Walker (Australia) in a closing address, said that reappraisal of the Council's activities, in connexion with the proposed continuing trade machinery, would be an issue for next year, and that the present need was for an overhaul of the Council's activities and procedures.

The Council had before it the report of its Co-ordination Committee concerning the agenda item dealing with a general review of economic, social and human rights programmes and activities of United Nations, the specialized agencies and the International Atomic Energy Agency (IAEA).

It adopted a proposal in that report recommending the inclusion in the Council's agenda for its 38th session of an item concerning a review and reappraisal of the functions and machinery of United Nations and of the Council in the economic and social fields.

It took note of the reports of the Administrative Committee on Co-ordination (ACC), the specialized agencies, and of IAEA.

It adopted a resolution on the evaluation of the impact of the UN technical co-operation programmes, requesting the Secretary-General to proceed, in consultation with the Special Fund, the Chairman of the Technical Assistance Board and executive heads of the specialized agencies, with arrangements for undertaking pilot evaluation projects in a limited number of countries.

This resolution, adopted by a vote of 17 in favour, none against, with one abstention, also requested the Secretary-General to report to the Council at its 39th session.

The Council adopted unanimously a resolution welcoming arrangements concerning meetings between the ACC, officers of the Council and the Chairman of the Council's Co-ordination Committee.

Measures provided for in other resolutions adopted by the Council under this item included: a call for a study of the extent to which the specialized agencies and the IAEA could be requested to use a uniform lay-out for the preparation and presentation of their respective budgets; endorsement of the proposal that a procedure should be established for screening the UN work programme in the economic, social and human rights fields in relation to its budgetary implications; and a request to the Secretary-General to submit to the Council's 38th session a progress report on the question.

The Council also had before it the report of the Co-ordination Committee dealing with the UN Development Decade and embodying four draft resolutions on the subject.

It adopted, by a vote of 15 in favour to none against, with 3 abstentions, a draft welcoming the pledges which had already been made by Governments and private sources towards the establishment of the proposed UN Training and Research Institute, and appealing for more. The draft also expressed the hope that the Secretary-General would be in a position to establish the Institute before the end of 1964.

The Council unanimously adopted another draft stressing the importance of establishing close working relationships between the various regional planning institutes of United Nations and the specialized agencies and national planning organizations for their mutual benefit and calling for certain actions by the Secretary-General and the ACC in relation to the matter.

The Council adopted a third draft accepting the view that the relationship between the proposed five-year world campaign in the fields of food, health and education and the Freedom-from-Hunger Campaign required clarification, and requesting the Secretary-General to pursue, as a matter of urgency, consultations with Governments, the specialized agencies and non-governmental organizations concerning the feasibility and possible plans for organizing and executing the proposed five-year world campaign. It also requested the Secretary-General to report to the Council on the question at its 39th session.

In the fourth draft on this agenda item, the Council called for intensified efforts against hunger under the Freedom-from-Hunger Campaign.

Other resolutions adopted by the Council dealt with science and technology, a UN disaster fund, planning and economic projections, population growth and economic and social development, and calendar of conferences for 1965.

In statements made on the UN Development Decade, Mr. Raul C. Migone (Argentina) referred to the importance of informing the public about the activities of United Nations in the economic and social fields.

He expressed the conviction that co-ordinated action could mobilize the information media to give real co-operation to United Nations. He announced his intention to raise that problem at the next session of the General Assembly.

In his closing address, the President, Sir Ronald Walker (Australia), said that the 37th session was notable as it was the first to benefit from the General Assembly's decision to provide more equitable geographical distribution by enlarging the Council.

The outstanding event since the previous session, he said, was the UN Conference on Trade and Development, which was convened in pursuance of a Council decision.

When the General Assembly finally approved the proposals for a continuing trade machinery, he said, the Council would have to consider the complex problem of co-ordination, which should not prove too difficult if approached constructively and realistically. The great significance of the Trade and Development Conference was that United Nations was taking up, with renewed vigour and deeper understanding, the task of promoting an agreement on trade policies among countries at various stages of development.

(United Nations)

[Prev. ref. 5490:AOA:C]

B. World Population—UN Demographic Yearbook: According to the UN Demographic *Yearbook* for 1963, the world's population is increasing by almost 63,000,000 a year —an increase larger than the combined population of France and Czechoslovakia.

By mid-1962 there were approximately 3,135,000,000 people on earth and this

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

figure was growing at an average rate of 21 per cent a year, the highest world population growth yet observed.

The fastest growing region in the world was Central America—including the Caribbean—where, since 1958, the population grew at an annual rate of 2.9 per cent. But the largest regional increase in absolute numbers was in East Asia, where there were 74,000,000 more people in 1962 than in 1958.

Covering almost 250 geographic areas, the Yearbook deals with international statistics on area, population, birth, death, marriage and divorce.

For the first time, the Yearbook also shows figures on the numbers of the various tribes in several newly independent African nations. the present issue features data, according to censuses held between 1955 and 1968, on literacy, language, religion, and the age|sex composition of urban and rural population, country of birth, country of citizenship, level of education, school attendance, fertility and other statistics.

At least 20 per cent of the inhabitants of the world now live in Mainland China.

Although the Statistical Office of United Nations does not have a current official estimate of the size of the population in Mainland China, semi-official estimates placed the number at 670 million to 680 million in 1958.

Mid-1962 estimates of nine other countries with very large populations are: India 449 million; USSR 221 million; United States 187 million; Indonesia 98 million; Pakistan 97 million; West Germany 55 million; and United Kingdom 53 million. Approximately two-thirds of the world's population live in these 10 largest countries.

Measured by area, the 10 largest countries in descending order of size are USSR, Canada, China, United States, Brazil, Australia, India, Argentina, Sudan and Algeria.

Tokyo is still the largest city in the world, followed by New York. The estimated population of Tokyo City proper in October, 1962 was 8,613,000. The most recent figure for New York City proper—comprising Manhattan, Brooklyn, Bronx, Queens and Richmond—is the April, 1960 census population of 7,781,984. New York's area is about 247 square kilometres greater than that of Tokyo.

The third largest city in the world is Shanghai, with an estimated 6,900,000 inhabitants. Other cities with an enumerated or estimated population of over 3 million are: Moscow (6,317,000), Bombay (4,422,165), Peking (4,010,000), Chicago (3,550,404), Cairo (3,418,400), Rio de Janeiro (3,223,408), Tientsin (3,220,000), Leningrad (3,180,000), London (3,179,980), Sao Paulo (3,164,804), Osaka (3,151,000) and Mexico City (3,050,723).

These figures refer only to population within the administrative boundaries of each city. If the population in surrounding urban areas were also taken into account there would be a change in rank order and the list of cities with over 3 million people would be much longer. Thus, for instance, the urban agglomeration figure for London (or "Greater London") is over 8 million inhabitants and for Paris over 7 million.

Only within the past few years have several newly independent African countries been able to undertake census counts of the many tribes of which their population are composed.

For the first time, therefore, it has been possible to show in the Demographic Yearbook figures on the numbers and sex composition of the various tribes of Ghana, Guinea, Kenya, Senegal, Sudan, Tanganyika, Togo, Uganda and Upper Volta. These data are included among figures on the ethnic composition of the population of 77 countries and territories.

Knowledge of tribal characteristics is essential to any study of economic and social development in Africa, it was pointed out in the technical notes accompanying the tables. Statistics on tribal affiliation furnish the primary information needed for the study of these characteristics. Therefore, these statistics have been presented in the Yearbook in as full detail as possible.

In the figures of Tanganyika, for example, 112 separate indigenous tribes are identified, along with 13 tribes originating outside of the country and a number of tribal groups identified not by name but only by their countries of origin.

In Ghana, 87 separate tribes are identified, plus substantial numbers of persons grouped together in eight categories composed of more than one tribe each.

Some of the countries distinguish between tribes indigenous within their borders and those which originated outside the country. From these distributions, it is possible to gain some impression of the movement of tribal peoples across political borders. Some further indication of the international distribution of some of the tribes can be gleaned from the appearance of the same or similar names in the figures for different countries. The Peul peoples, for example, constitute a major group in Guinea, and also appear in sizeable numbers in Senegal, Togo and Upper Volta.

It is not only in Africa, however, that large numbers of separately identifiable ethnic groups of the population appear.

The USSR, for example, identifies 109 separate ethnic nationalities within its borders, plus 17,000 persons in groups too small to be separately listed.

Canada shows statistics for 96 "ethnic or cultural" groups, which refer to the group from which each person is descended on the paternal side. Of the total population, 43.8 per cent belongs to the English, Irish, Scottish and Welsh groups, and 30.4 per cent is classified as belonging to the French group.

According to the figures on ethnic distribution, the population of South Africa is 68 per cent Bantu and 19 per cent "white". Almost 48 per cent of the population of British Guiana and over 36 per cent of the population of Trinidad and Tobago is composed of persons of Indian origin or descent.

Data on ethnic composition, as supplied by different Governments, may refer to many different concepts, such as "race", "component populations", "ethnic nationality", or "cultural group."

Aside from these types of data, however, there are other types which can also serve, alone or in combination, as indicators of ethnic affiliation. Among those shown in the Demographic Yearbook are statistics on country of birth, country of citizenship, religion and language.

Census statistics on language may refer to one or more of several different concepts: the mother tongue, most commonly defined as the language spoken by the individual in his childhood; the language usually spoken by each person at the time of the census; and each person's ability to speak one or more specified languages, these being as a rule the official language or languages of the country.

Because of this diversity of concept, many of the statistics are not comparable with each other and cannot provide information on the numbers of persons in the world who speak any one language. They indicate, however, the great variety of languages throughout the world and within national borders.

In combination with data on country of birth and country of nationality, both of which are included in the Demographic Yearbook, they can give some indication of the rate of assimilation of the foreign-born population into the culture of their new countries.

The most extensive language listing shown is that for USSR, where 107 separate mother tongues, or groups of mother tongues, are identified.

The Philippine census results show 84 different mother tongues. A separate tabulation of population by ability to speak specified languages indicates, however, that almost 45 per cent of the total population of the Philippines is able to speak Tagalog and almost 40 per cent can speak English.

The figures for Canada reveal that 68 per cent of Canadians are able to speak English but not French, 19 per cent can speak French but not English, 12 per cent can speak both English and French and one per cent cannot speak either language.

Among the 81 countries and territories for which census data on country of birth are presented in the Demographic Yearbook, Monaco and Israel are the two outstanding examples of a situation where native-born persons are outnumbered by those born elsewhere.

In Monaco, 69 per cent of the population was born outside the principality, mostly in France or Italy. In Israel, 62 per cent of the Jewish population is foreign-born, approximately half of them born in USSR, Poland, Algeria, Morocco, Tunisia or Iran.

Other places where more than half of the inhabitants are foreign-born include Aden and Hong Kong.

Among the large countries with considerable proportions of foreign-born persons are Australia (17 per cent), Canada (16 per cent), and New Zealand (15 per cent).

Seventy countries and territories have supplied data on the extent of illiteracy among their populations. Many countries where illiteracy is known to be widespread have not yet investigated the situation while many economically advanced countries no longer ask about illiteracy since it has been almost eliminated. Therefore, both the highest and the lowest illiteracy rates shown in the Yearbook are likely to be matched in countries that have not supplied information on this topic.

Out of 10 African countries for which data are shown for the majority of the population, eight have an adult illiteracy rate of 50 per cent or over; in five of the eight more than 75 per cent of the adults cannot read and write.

Among Asian countries, more than half the adult population is reported to be illiterate in 15 countries and seven of these have an illiteracy rate of 75 per cent or more.

In North America, two of the 16 areas covered report that somewhat more than half of their adults are illiterate, and the four countries in South America that have supplied figures report illiteracy rates ranging from 3.6 per cent to 39.4 per cent.

One country in Europe reports an illiteracy rate of 38 per cent.

Women are less literate than men in most countries. In some countries or territories the percentage of women who cannot read and write is three to four times higher than that of men. The same sex differentials appear in the school attendance figures.

The Demographic Yearbook presents school attendance data by single years between the ages of 5 and 24, thus providing a spectrum of the proportions of children and young persons receiving an education from the lowest grades through university or higher professional schools.

These figures reveal that the proportion of children at ages under 15 years actually attending school varies between 15 and 96 per cent. In 10 of the 43 countries reporting, fewer than 50 per cent of the children are in school.

Also shown are figures on the highest level of education completed by all segments of the population by age, including children at school and persons who have already completed their education. From these tables, it is possible to observe changes in the amount of education received by persons in the past and at later periods, in the same country.

The Ivory Coast has the highest birth-rate reported by any country in recent years, with 56 babies per 1,000 inhabitants born annually. The birth-rate is almost as high in Togo and Dahomey. On a regional basis the highest birth-rate is found in South-East Asia with an estimated 49 births annually per 1,000 population.

In northern, western and central Europe, the birth-rate is only 18 and in West Berlin it drops to 11.1. Among major countries, Hungary has the lowest birth-rate, at 12.9 per 1,000. The average for the world as a whole is 37.

In tropical and southern Africa and South-West Asia the estimated regional death-rate is 24 per 1,000 population, and in Ivory Coast it reaches 33.3. The lowest death-rate among major countries is found in Iceland where only 6.8 persons per 1,000 inhabitants die annually. The average for the world is 17.

Although death-rates continue to decline almost everywhere, they are levelling off in countries where they have been low for many years, such as in USSR, United States, Canada and Western European countries. Because of the control of infectious diseases, the main causes of mortality are now chronic diseases, accidents and violence, and among these, rates have remained stationary or in some instances have increased.

Despite the continuing downward trend in infant mortality rates throughout much of the world, the range between the lowest and the highest rate is still enormous. Thus, in Sweden, the rate is 15.0 infant deaths per 1,000 live-births, while the recorded or estimated rates are 180.4 in Haiti, 165 in Turkey and 139.3 in Burma.

Very high infant mortality rates are also found in the United Arab Republic (133.9 per 1,000 live-births), Indonesia (125), the "coloured" population of South Africa (119.6), Chile (116), the Turks and Caicos Islands (107.1) and Ecuador (104).

At the lower end of the scale, in addition to Sweden, are the Netherlands (15.8), Iceland (17), Norway (17.7), Finland (18.0), New Zealand (19.6), Gibraltar (19.6), Australia (20.0), Denmark (20.1) and Switzerland (21.2).

Female babies born in Sweden now can expect to live slightly over 75 years. Those born in the Netherlands, Switzerland and Norway can look forward to almost 75 years of life; those born in France can expect to live slightly over 74 years; and those born in Denmark, the United States, Czechoslovakia and New Zealand have an average number of years of life (expectation of life) between 73 and 74 years.

In addition, there are 19 other countries where life expectation for females is as high as 70 years or more, making a total of 28 countries in which the expectation of life for females is 70 years or over.

The highest expectancy for males born today is almost 72 years, and this applies to those born in Sweden. Male babies in the Netherlands and Norway can expect to live slightly over 71 years.

There are only three additional countries—Denmark, Israel (Jewish population) and Iceland—where the longest expected lifetime for male babies is 70 years or more, making a total of six, as contrasted to the 28 for females.

Statistics for 112 countries and territories show the degree of participation of the population in the production of economic goods and services. (The economically active population is generally understood to comprise all those persons who contribute to the supply of labour for the production of goods and services, including those unemployed but available for work.)

The highest rate of economic activity is shown for Rumania, where 59.7 per cent of the population is economically active. The USSR rate is 47.5 per cent and that of the United States is 39.9 per cent. The difference between these two countries is mostly the result of the fact that 41.5 per cent of women in USSR are economically active, while the rate is 24.6 per cent for the women in the United States. The rates for men are very similar in both countries, 54.8 in USSR and 53.8 in the United States.

The range of rates for both sexes within each continent is from 22.8 to 50.3 per cent in Africa, from 25.3 per cent to 47.1 per cent in North America, from 30.2 per cent to 53.5 per cent in South America, from 24.5 per cent to 52.7 per cent in Asia, from 40.1 per cent to 59.7 per cent in Europe, and from 22.9 per cent to 46.5 per cent in Oceania.

The **Yearbook** says there are 11,286,455 Hindus living in 21 countries and territories outside India. Of these the largest number—10,001,474—live in Pakistan.

Besides the 11,000,000-odd Hindus who have been counted as such, there are also 389,033 persons in these countries who are shown as Buddhists, Jains and other sects of Hindus.

The number of Hindus in some of these countries and territories are: Mauritius 332,857; Mozambique 4,751; Northern Rhodesia 5,490; Nyasaland 3,010; Seychelles 176; South Africa 311,165; Southern Rhodesia 3,310; Tanganyika 34,752; Uganda 51,033; Canada 11,611; Jamaica 131; Trinidad and Tobago 190,403; British Guiana 187,432; Fiji 137,232; Aden 4,786; Thailand 3,483; and New Zealand 1,597.

The **Yearbook** also lists 853 persons in these countries as Parsis, while another 15,723 in Iran are listed as Zorastrians.

Reference To Goa—Indian Protest:

Following Indian protests to United Nations, the Statistical Office of United Nations has shown Goa, Daman and Diu as part of the Indian Union.

The UN Demographic **Yearbook** lists these three territories under India and carried a footnote "census figures for India include Goa, Daman and Diu, known as Portuguese India prior to being nationally united with India in December, 1961."

This was the language used by the UN Special Committee on Portuguese Territories in 1962 and this was accepted by the General Assembly.

Despite this, the UN Demographic **Yearbook** for 1962, published in August, had listed these territories separately under Portuguese territories in Asia with a footnote referring to them as "Portuguese overseas provinces". India had then lodged a protest with the UN Secretary-General, and the Secretariat had then agreed to make the necessary changes and corrections.

C. French Trade With Middle East: The most notable feature of the figures for French trade with the Middle East for the first six months of 1964 was the remarkable rise in French imports of oil from Iran, Libya, Saudi Arabia, Kuwait, Qatar and Abu Dhabi.

There has been a small increase in imports from Algeria. The decrease in imports from Syria is entirely due to the unsettled trading conditions in that country, and as far as Sudan is concerned, France bought less cotton from that country, turning to Egypt instead. In fact, France has become Egypt's best Western customer for cotton recently.

The table below gives the figures in millions of New Francs:

Country	Exports to the Middle East January-June		Imports from the Middle East January-June	
	1964	1963	1964	1963
Algeria	1,269,844	1,511,303	1,588,417	1,378,732
Morocco	480,242	451,533	657,420	624,569
Tunisia	285,240	255,330	195,636	185,328
Israel	261,590	120,349	31,063	30,580
Lebanon	96,809	124,075	4,336	6,233
Iran	60,906	66,337	190,290	95,976
Turkey	54,144	90,741	43,502	41,492
Libya	43,331	28,461	115,893	68,853
UAR	34,755	58,333	52,913	40,937
Syria	27,297	36,769	18,113	58,537
Sudan	21,487	20,965	19,358	31,702
Saudi Arabia	16,302	15,868	112,690	88,525
Kuwait	14,559	19,493	423,033	316,459
Iraq	12,411	4,085	420,877	447,790
Jordan	6,341	8,781	57	1,424
Federation of South Arabia	6,594	4,284	353	384
Afghanistan	3,050	1,444	3,308	5,778
Bahrain	2,370	3,176	6,236	2,754
Qatar	1,803	1,575	63,830	53,111
Muscat and Oman	1,606	1,551	38	—
Abu Dhabi	672	1,673	49,000	16,469
Yemen	117	60	2,675	1,996
Total	2,702,770	2,826,186	3,999,038	3,498,029

ASIAN RECORDER

October 28—November 3, 1964

Regd. No. D-727
Vol. X No. 44

AFGHANISTAN

A. US And Soviet Assistance: A Kabul despatch on September 18 said that the high pitch of competitive generosity which marked American aid to Afghanistan a few years ago had declined, but Afghanistan continued to benefit from economic assistance from both USA and the Soviet Union.

The despatch said: "In the most wintry days of the 'cold war' USA was inclined to see Afghanistan as a threatened and wavering outpost whose independence could be shored up only by urgent and generous offers of economic assistance. In those days the Afghans could more or less fill in the figures on blank American cheques, the anxious signer believing that Russia was ready to step in at any hesitation.

"Now the American appraisal of possibilities is much calmer; it is being recognized that Afghanistan's independence is at least as dear to Afghanistan as it is to Washington, and Afghanistan's requests for economic assistance are closely weighed in the light of the American appreciation of the country's needs and resources.

"Russia, with the advantage of contiguity across the Oxus, has probably never felt the same sense of urgency as did the United States, but has continued a steady and large flow of economic assistance ever since it began in the mid-1950s.

"Communications were Afghanistan's greatest need, and both benefactors have contributed largely to the finishing of the chain of roads that on the map lies like a lariat around the Hindu Kush, the great mountain mass that occupies the centre of the country. The American-built road from Kabul to Torkham, at the end of the Khyber Pass, is now complete and the road south from Kabul to Kandahar and then across to the Pakistan border is well advanced.

"The Americans are now surveying a road to link Herat, in the west, with the Iranian border, and it is indicative of the new attitude they have adopted that before they agree to build the road they will want to see a properly organized and equipped road maintenance department set up by the Afghan Government.

"In roads the main Russian contribution has been the highway from Kabul north to the Oxus at Qizil Qala through the Salang tunnel, which cost an estimated £29 million. A longer but less dramatic road is being built by Russia between the Russian border and Herat, and then Herat and Kandahar and this will cost about £50 million.

"The biggest single project in Afghanistan is the American-conceived and financed development of the Helmand Valley, begun in the early 1950s and now beginning to show results. A quarter-of-a-million acres of desert have been irrigated and brought into production and the scheme is still expanding.

"Even this project would be dwarfed, however, by a Russian scheme for the utilization of the Oxus where it marks the frontier between Russia and Afghanistan, which would provide for the construction of eight or 10 hydro-electric stations generating some 16 million kw and irrigate a huge area of land, now barren, on the Afghan side of the river.

"The agreement to survey the project has been signed and a decision on the scheme itself will be taken in 1967. It would cost about £1,000 million and would take about 30 years to complete. Russia is bearing all the initial costs, and if it is decided to go ahead, the agreement would allow Afghanistan to pay her share in kind, with electricity generated from the scheme.

"Both countries have built airports for Afghanistan, USA having had the so far unrewarding task of building the Kandahar international airport, with runways sufficient for the largest jets, a big hotel, a hospital, and everything else that a modern airport needs except traffic. The Afghan Airways' little Dakotas land and take off once a day, otherwise the skies are empty over Kandahar.

"The hope is that when arrangements are made to provide aviation fuel there at competitive prices, airlines now stopping at Karachi will take the shorter route through Kandahar.

"West Germany has provided credits for several projects. Britain has been a late arrival but a good beginning has been made with credits for modernizing the sugar factory at Baghlan and doubling its capacity, and with the agreement, still to be signed, for building a cotton-seed oil plant in the south, about £800,000 would be involved in these projects.

"For a country with a population of perhaps eight or nine million the quantity of aid received in the past decade has been very large. Well used, it has already had its marked effect on the social and economic well-being of Afghanistan."

(*The Times*, London)

[Prev. ref. 6039:AFG:B]

B. Loi Jirga Approves New Constitution: The Great Assembly (*Loi Jirga*) approved on September 19 the new Constitution, having made only minor adjustments. It also approved the Government's resolution on the Pakhtoonistan issue.

The resolution on Pakhtoonistan referred to the Afghans' "religious, national, and historical duty" to support the rights of the Pathan people of Pakistan to self-determination, but concluded (in an unofficial translation) with the statement that Afghanistan was "waiting for the day when the issue of Pakhtoonistan will be settled on the basis of the true aspirations of the people and leaders of Pakhtoonistan."

The new Constitution for Afghanistan is a first step in the direction of establishing a democratic polity under a constitutional monarchy. The Government it provides for will stand between the elected legislature and the monarchy, responsible to both but part of neither. The King will continue to have ultimate political power, but once the Constitution comes into effect in 1965 it will undoubtedly become progressively more difficult for him to exert it. A ratchet is built into the political process the King has started, and no step away from oligarchy will be able to be retraced without dislocating the whole system.

The Government will be formed by a Prime Minister chosen by the King. He need not be a member of the legislature; nor is the Prime Minister required to choose his Ministers from among the legislators. If he does so the Minister will have to resign his seat. After a Government has been formed its members and policy will be presented by the Prime Minister to the Lower House, from which he must obtain a vote of confidence.

At the drafting stage long consideration was given to requiring the Prime Minister to be chosen from the legislators. The need to give Parliament a respected place in the new system was appreciated, and it was made plain that the fact that the road to ministerial power does not lie through elective office will work against that objective; but the drafters of the Constitution were not confident enough of the quantity of the Parliament that will emerge afer next year's elections, and therefore decided not to bind the King to form the Government from among its members.

The Government will be coterminous with the legislature, elected for four years, and the King has the power to dissolve Parliament. The Constitution stipulates, however, that new elections must be held within three months of dissolution.

While the powers of the monarchy are reserved in the Constitution, they become essentially emergency powers, and the explicit exclusion of all members of the Royal Family from membership in the Government or participation in political parties will effectively bar the members of the oligarchy that ruled the country for so long from returning to power.

Elections to the Lower House (House of the People) will be by universal, secret, and direct election. Of the Upper House (House of Elders) one-third will be nominated by the King "from among well-informed and experienced persons"; some of the others will be elected by the provincial councils, elected bodies of local self-government; and the remainder directly elected.

The Loi Jirga (Great Assembly), which for 10 days had considered the new Constitution, had to approve its own demise as an institution. For most of this century the Loi Jirga had been the dominant political institution in Afghanistan beneath the monarchy, and if Parliament is to grow into that role it is necessary for the Jirga to be diminished. Accordingly the Loi Jirga provided for in the Constitution will essentially be nothing more than both Houses of Parliament sitting together, with the addition of 29 chairmen of the provincial councils. The Loi Jirga will come into existence if there is uncertainty about the royal succession, on questions of impeachment, and in similar moments of crisis.

The Constitution will not come fully into effect for a year after its promulgation. The interim period—a new Parliament will be elected, and will be inaugurated on October 14, 1965—will give the Government time to draft Ordinances to be approved later by Parliament. The first elections will be held before the formation of parties, the Constitution explicitly stating that the law governing the formation and conduct of parties will not be issued as an Ordinance but submitted to the new Parliament.

BURMA

A. Cabinet Expansion: *Rangoon Radio* announced on September 18 an expansion and re-shuffle of the Cabinet. The Cabinet strength was raised from nine to 14.

The members of the Cabinet and their portfolios are:

Gen. Ne Win—Chairman of the Revolutionary Council and Defence;

Brigadier Tin Pe—Trade and Co-operatives;

Brigadier San Yu—Finance and Revenue;

Commodore Thaung Tin—Mines;

Brigadier Thaung Dan—Information and Culture;

Brigadier Sein Win—Public Works and Housing;

Colonel Thaung Kyi—Agriculture and Forests;

Colonel Maung Shwe—Industry;

Colonel Than Sein—Labour;

Colonel Kyaw Soe—Home Judicial, Immigration and Religious Affairs;

Colonel Hla Han—Education and Health;

Colonel Ba Ni—Transport and Communications;

Colonel Maung Lwin—National Solidarity and Social Welfare; and

U Thi Han—Foreign Affairs and National Planning.

The Cabinet now includes practically all the important heads of the Defence Services. The five new Ministers are Brigadier Thaung Dan, Commodore Thaung Tin, Brigadier Sein Wein, Colonel Thaung Kyi and Colonel Maung Shwa.

The official announcement said the new Ministers were appointed because the Revolutionary Council's all-out drive to socialism had brought increasing duties and responsibilities.

(*The Statesman*, Calcutta)

[Prev. ref. 5375:BUR:A]

B. Another Newspaper Nationalized: The Government has nationalized one more Burmese language daily, *Botataung*, published from Rangoon.

According to an official announcement, the paper will now be administered by the Ministry of Information.

This was the second language daily to be nationalized in the country—the first being Kyemon.

(*The Times of India*, Bombay)

[Prev. ref. 5807:BUR:A]

C. Agricultural Control Order: Thirty-four cereal and other crops were declared essential commodities under an order issued on September 19 by the Ministry of Trade Development.

The order prohibited private trade, purchase, distribution, storage and transportation of these crops and other products. Only the Agricultural Marketing Board, Agricultural and Rural Development Corporation, People's Stores Corporation and Industrial Development Corporation were authorized to deal in these commodities.

(*The Statesman*, Calcutta)

[Prev. ref. 5807:BUR:A]

CEYLON

A. Sardar Swaran Singh's Visit: India's Minister for External Affairs, Sardar Swaran Singh, paid a visit to Ceylon from September 11 to 13.

During the visit he held discussions with the Prime Minister, Mrs. Sirimavo Bandaranaike, and other Ceylon leaders.

The issue of citizenship of the Stateless persons of Indian origin as also the Colombo proposals on the Sino-Indian border dispute were among the subjects discussed by them.

A joint communique issued at the close of the talks said: "Sardar Swaran Singh, Minister of External Affairs of India, visited Ceylon from September 11 to 13, 1964, on the invitation of the Government of Ceylon. He was accompanied by Mr. C. S. Jha, Commonwealth Secretary and Mr. N. P. Alexander of the Ministry of External Affairs, India. On his arrival at the Ratmalana airport, he was received by the Honourable Felix Dias Bandaranaike, Minister of Agriculture, Food and Fisheries and Parliamentary Secretary to the Minister of Defence and External Affairs.

"In a brief interview with the Press on his arrival, Sardar Swaran Singh stated that, on his assuming duties as Minister of External Affairs, he had decided to visit Ceylon at the earliest possible opportunity in order to establish personal contact with the Prime Minister and members of the Government of Ceylon as well as with leading Ceylonese personalities as a means of promoting and strengthening the existing friendly relations between the two countries.

"The Minister of External Affairs, India, called on his Excellency the Governor-General, the Prime Minister and the Parliamentary Secretary to the Minister of Defence and External Affairs.

"On September 12, the Prime Minister and Minister of Defence and External Affairs of Ceylon and the Minister of External Affairs, India, met to discuss matters of mutual interest to the two Governments. Mr. C. S. Jha, His Excellency Mr. B. K. Kapur, High Commissioner for India in Ceylon, and Mr. N. P. Alexander, were associated with the Minister of External Affairs, India, in these discussions. The Honourable Felix Dias Bandaranaike, Mr. N. Q. Dias, Permanent Secretary to the Ministry of Defence and External Affairs, His Excellency Mr. H. S. Amerasinghe, High Commissioner for Ceylon in India, Mr. G. S. Peiris, Director-General of External Affairs, Mr. H. O. Wijegoonawardena, Counsellor, Foreign Relations, and Mr. R. B. Weerakoon, Secretary to the Prime Minister, were associated with the Prime Minister in the discussions.

"The Minister of External Affairs, India, described briefly India's efforts in the field of economic development and the results achieved under the Five-Year Plans over the last 13 years. He also touched upon some of the present day economic problems of the country, including the burden cast by the need, since November, 1962, to strengthen her defences for the purpose of safeguarding her sovereignty and territorial integrity, while continuing at the same time to pursue her objective of economic development.

"The Prime Minister of Ceylon gave a brief survey of the economic situation in Ceylon and of the measures that were being taken to meet that situation. She emphasized the attention and importance paid by the Government of Ceylon to the social services such as education and health and food subsidies which absorbed a very high proportion of the national income, but served to keep down the cost of living.

"The Minister of External Affairs, India, offered to share with Ceylon the facilities provided by Indian scientific, technological, educational and engineering institutions and the research establishments of the Government of India. He also expressed the wish for India to benefit from similar institutions in Ceylon. The Prime Minister welcomed this proposal.

"The Prime Minister and the Minister of External Affairs, India, agreed that there was a need for closer economic co-operation on a regional scale and that this question should be examined further at the official level.

"The international situation was reviewed with special reference to the principal areas of tension in the world today. The Prime Minister of Ceylon and the Minister of External Affairs, India, agreed that the principles of non-alignment and peaceful co-existence, on which the foreign policies of the two countries were founded, afforded the best hope for the relaxation of these tensions, for the avoidance of war and for the resolution of international conflicts. The Minister of External Affairs, India, re-affirmed India's determination to adhere to the policy of non-alignment.

"The forthcoming conference of non-aligned nations was discussed and views were exchanged on the various issues that were likely to arise. The two Governments found themselves in complete agreement on all the issues that were discussed.

"The question of disarmament which is one of the subjects on the provisional agenda for the conference of non-aligned nations was discussed. The Prime Minister stressed the desirability of extending to the Indian Ocean the concept of nuclear-free zones which has already been accepted insofar as certain land masses were concerned. The Minister of External Affairs re-affirmed India's support to the principle of creating nuclear-free zones and agreed with the idea propounded by the Prime Minister. He suggested a further study of the question.

"In regard to the Sino-Indian dispute, the correspondence between the Prime Minister of India and the Prime Minister of Ceylon was reviewed.

"The Minister of External Affairs, India, referred to the forthcoming talks between the Prime Minister of Ceylon and the Prime Minister of India on the problem of persons of Indian origin in Ceylon and expressed the hope that an equitable and honourable settlement acceptable to both parties would be found. The Prime Minister of Ceylon wholeheartedly endorsed this sentiment.

"The discussions took place in the spirit of complete cordiality and understanding which has always characterised the relations between the two countries."

B. Chinese Loan Offer: The Finance Minister, Dr. N. M. Perera, in a Press interview reported on September 24, said that China had agreed to give Ceylon an interest-free loan of Rs. 2 crores in addition to the loan already granted.

Dr. Perera, who visited China on his way home from Tokyo where he had gone to attend the annual meeting of the International Monetary Fund, said that China was prepared to give Ceylon other assistance like machinery and aid for agriculture.

He added that Japan had agreed to buy a number of Ceylonese products and sell to the country utility goods on credit.

A Trade Agreement between Ceylon and Japan would be entered into shortly.

was on that ground that the general warrants issued by the House of Commons were treated beyond the scrutiny of the courts in habeas corpus proceedings. Even when recognizing the validity of such warrants, judges had frequently observed that if they were satisfied with the returns that such general warrants were issued for frivolous or extravagant reasons, it would be open to them to examine their validity.

Their Lordships then referred to the decisions of the Privy Council on the question whether the conclusive character of the general warrant was a part of the privilege itself.

They said that even if they proceeded on the basis that the relevant right claimed by the House of Commons was based either on the ground that as part of the High Court of Parliament the House of Commons was a superior court of record or in course of time the right to claim a conclusive character for such a general warrant became an incidental and integral part of the privilege itself, the question which immediately arose was whether this right could be deemed to have been conferred on the House in the present proceedings in the latter part of Article 194(3).

Their Lordships expressed the view that an Assembly could not claim the status of the House of Commons as a superior court of record by any legal fiction introduced by Article 194(3).

The previous legislative history in this matter did not support the idea that the State legislatures were superior courts of record. The latter part of Article 194(3) did not confer on the State legislatures in India the status of a superior court of record. The status of a superior court of record accorded to the House of Commons was based on historical facts and these historical facts could not be introduced in India by any legal fiction.

The House cannot be regarded as a court of record and, therefore, the very basis on which the British courts agreed to treat a general warrant issued by the House of Commons was absent in the present case and the claim made by the House must be rejected.

Assuming, however, that the right claimed by the House could be treated as an integral part of the privileges of the House of Commons the question to consider would be whether such a right had been conferred on the House by the latter part of Article 194(3) and whether this part of the privilege was consistent with the material provisions of the Constitution.

It would appear illogical to contend, for instance, that even if the right claimed by the House might contravene the fundamental rights of the citizens, the aggrieved citizen could not successfully move the Supreme Court under Article 32.

If in a given case the allegation made by the citizen was that he had been deprived of his liberty not in accordance with the law but for capricious or mala fide reasons this Court would have to examine the validity of the contention and it would be no answer in such a case to say that the warrant issued against the citizen was a general warrant and a general warrant must stop all further judicial inquiry and scrutiny.

If the claim of the House was upheld it would mean that the House could issue a general warrant in the case of Article 211 against a judge and no judicial scrutiny could be held in respect of the validity of such a warrant.

It would indeed be strange that the judicature should be authorised to consider the validity of the legislative enactments but should be prevented from scrutinizing the validity of the action of the legislatures trespassing on the fundamental rights conferred on the citizens. The impact of the fundamental constitutional right conferred on Indian citizens by Article 194(3) was decisively against the contention raised by the House.

The Chief Justice then referred to Section 30 of the Advocates Act, 1961, which conferred on all advocates the statutory right to practise in all courts, including the Supreme Court, and to Section 14 of the Bar Councils Act recognizing a similar right and expressed the view that if a citizen had the right to move the High Court or the Supreme Court against the invasion of his fundamental right, the statutory right of the advocates to assist the citizen stepped in and helped the enforcement of the fundamental rights of the citizen. Just as the right of the Judicature to deal with matters brought before them under Article 226 or Article 32 could not be subjected to the powers and privileges of the House under Article 194(3) so the rights of the citizens to move the Judicature and the rights of the advocates to assist that process must remain uncontrolled by Article 194(3). That was one integrated scheme for enforcing the fundamental rights and for sustaining the rule of law in this country. Therefore, the particular right which the House claimed to be an integral part of its power or privilege was inconsistent with the material provisions of the Constitution and could not be deemed to have been included under the latter part of Article 194(3).

Dealing with the question of grant of interim bail, Their Lordships observed that if Article 226 conferred jurisdiction on the court to deal with the validity of the order of commitment, even though the commitment had been ordered by the House, how could it be said that the court had no jurisdiction to make an interim order in such proceedings?

Their Lordships observed that since no contempt was committed by the judges, or the advocate or the party respectively, it was open to the High Court of Allahabad and indeed it was its duty to entertain the petition filed before it by the two judges and by the advocate and it was within its jurisdiction to pass interim orders prohibiting the execution of the impugned orders passed by the House.

The Chief Justice observed that the power to punish for contempt, large as it was, must always be exercised cautiously, wisely and with circumspection both by the Judicature and the legislatures.

Mr. Justice Sarkar delivered a separate and in some respects dissenting opinion. His Lordship was of the view that the power to commit by a general warrant with the consequent deprevication of the court's jurisdiction to adjudicate on the legality of imprisonment was a matter of privilege of the House and not a right possessed by it as a superior court. Further, that privilege was possessed by the UP Assembly by reason of Article 194(3) of the Constitution.

His Lordship answered the first question by saying that it was competent for the Lucknow Bench to entertain and deal with the petition of Mr. Keshav Singh and to pass orders releasing him on bail. As far as the second question—the question whether there was a contempt of the Assembly—was concerned, it was for the Assembly to determine and if that determination did not state the facts, a court of law could not review the legality of it. But since none of the persons mentioned had any knowledge that the imprisonment was under a general warrant, no contempt was committed by the judges, the advocate or the petitioner.

With respect to the third question His Lordship expressed the view that the Assembly was competent to ask for explanations from the two judges and the advocate.

As regards the fourth question, the Full Bench had the power to pass the interim orders that it did and to entertain and deal with the petition of the two judges and the advocate.

The fifth question, His Lordship observed, was too general a question and was not capable of a single answer.

The Special Reference was heard by a specially constituted Constitutional Bench comprising the Chief Justice, Mr. Justice Sarkar, Mr. Justice Subba Rao, Mr. Justice Wanchoo, Mr. Justice Hidayatullah, Mr. Justice Shah and Mr. Justice Rajagopala Ayyangar.

Study Of Verdict's Implications—UP Vidhan Sabha Committee Set Up:

The Speaker of the UP Vidhan Sabha, Mr. Madan Mohan Verma, constituted on October 2 a 15-member committee to study the implications of the Supreme Court's pronouncement on the conflict between legislature and the judiciary and advise him on how he should proceed in the matter.

Mr. Nawal Kishore, Secretary of the Congress Legislature Party, was the convener of the committee which consists of Mr. B. B. Saran (C), Mr. Vir Sen (C), Mr. Kamla Singh (P-SP), Mr. Nekram Sharma (Ind), Mr. Chandrajit Yadav (C), Mr. B. D. Mayar (Ind), Mr. Ali Zaheer, Law Minister, Mr. M. P. Tripathi (JS), Mr. Krishnanand Rai (C), Mr. Rahat Maulai (Rep), Mr. Shiv Raj Singh (C), Mr. Jagmohan Singh Negi, Food Minister, Mr. Sripat Misra (C) and Mr. Bhanupratap Singh (S).

Criticism In Lok Sabha:

On October 2, the Lok Sabha voiced its concern over what the Law Minister, Mr. Asoke Sen, described as a "deep erosion" of the privileges of Parliament and the State legislatures as a result of the verdict by the Supreme Court on the UP dispute.

But the Prime Minister, Mr. Lal Bahadur Shastri urged the utmost restraint and caution in dealing with this "delicate" matter. He repeated his appeal at a meeting of the Congress Parliamentary Party later.

The Congress Party referred the issue to a "special meeting" of its Executive, but in the Lok Sabha the matter did not end with Mr. Shastri's appeal.

Members from both sides declared in no uncertain terms that the situation resulting from the Supreme Court verdict was unacceptable to them, and they were joined by the Speaker, Mr. Hukam Singh, in urging an early decision by the Government on the issue.

A major argument advanced in favour of an early decision was that uncertainty might encourage extreme action of the kind some members of the UP State Legislature were threatening.

For some time the Lok Sabha was in the grip of strong emotion. Feelings ran so high that a few members who attempted to speak in favour of the judiciary were shouted down.

It was left to the Speaker to restore calm and normalcy by formulating the issues involved and by outlining a course of action which was quickly accepted as reasonable by all sides.

He said that whether the Supreme Court's judgment was a verdict or a mere opinion, it was entitled to the highest respect, for otherwise it would be impossible to run a parliamentary democracy.

He also conceded, as the Supreme Court ruled, that in India sovereignty vested in the Constitution and not in Parliament. But he added, amidst cheers, that if the Constitution was supreme for Parliament, it was supreme also for the judiciary.

Quoting a speech by the chief draftsman of the Constitution, the late Dr. Ambedkar, he pointed out that it was clearly the intention of the Constituent Assembly to ensure that whenever Parliament exercised the privilege to imprison anybody, the courts should not interfere.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

There was prolonged applause when he added that if the present phraseology of the Constitution, as interpreted by the Supreme Court, did not give effect to the express wishes of the Constituent Assembly, it was for the Government to decide to amend the Constitution.

He ended with a quotation from Erskine May to the effect that the power to commit or imprison an individual was the keystone of parliamentary privilege, and "if this power is gone, the authority, dignity and integrity of Parliament is gone".

B. Indian Violation Of China-Sikkim Boundary—Chinese Allegation Denied: In a Note handed to the Indian Embassy in Peking on September 28, China protested against alleged intrusion by Indian troops "into Chinese territory" by crossing the China-Sikkim boundary.

The Chinese Government asked India to "stop its aggressive activities, dismantle all the military structures on the China-Sikkim boundary line and withdraw all its troops which are unlawfully entrenched on Chinese territory."

According to details given by the New China news agency, most of the alleged Indian border violations occurred in August, 1960 or before.

The false charges contained in the Note were broadcast by Peking Radio on October 5, evidently as part of an anti-Indian campaign on the eve of the opening of the non-aligned Summit at Cairo.

The Note had alleged that Indian troops intruded into Tibet across the Sikkim border on August 12 and 14 and also built 18 "aggressive military structures" in Tibetan territory across south-east of Nathu La.

The Chinese Note made no mention of the Indian Note of September 5, when the Government strongly protested against a Chinese intrusion into Sikkim.

Indian Denial:

Characterizing as "utterly false" the Chinese allegation that Indian troops had intruded into Tibet across the Sikkim border, an External Affairs Ministry spokesman in New Delhi on October 5 charged the Peking Government with keeping the border tension alive by fabricating baseless allegations against India from time to time.

The spokesman pointed out that the Sikkim-Tibet border was "well recognized and demarcated", and maintained that Indian troops had at no time crossed it.

The External Affairs Ministry spokesman pointed out how the Chinese charge concerning the military structures was a mere copy of an earlier charge which Peking had first levelled in January, 1963. India had repudiated the charge at that time after a proper scrutiny.

[Prev. ref. 6066:INI:A]

C. Sikkim-Tibet Border Well Guarded—Maharaja Of Sikkim's TV Interview: In a TV interview broadcast from New York on October 4, the Maharaja of Sikkim said that Sikkim's borders with Tibet were very well guarded.

He said the borders were guarded by the Indian Army as well as Sikkim Border Scouts. The frontiers were now sealed off and except for an occasional trickle of Tibetan refugees, there was no movement across.

The borders were being strictly patrolled to prevent infiltration. Any Chinese coming in would easily be recognizable and the Tibetans were carefully screened.

The 90-minute interview was largely concerned with acquainting Americans with Sikkim.

The Maharaja was also asked some questions about Sikkim's relations with India and Sikkim's future.

He explained that Sikkim, under a Treaty, had given the responsibility to the Government of India for Sikkim's external affairs, including trade, defence and communications.

Question: "Is it flexible so that negotiations will be held to seek greater degree of autonomy like Bhutan?"

The Maharaja: "A Treaty is a Treaty. Of course, it can be changed if both parties agree."

The questioner suggested that the three Himalayan kingdoms of Nepal, Sikkim and Bhutan could possibly join together and form a neutral barrier between India and Communist China like an "Asian Switzerland."

The Maharaja said: "Some people have actually talked about these things. But it is not being considered by the Government of Sikkim."

About the future of Sikkim, he said it would depend on time. Sikkim itself was so small that he did not think the Chinese would have any plans against Sikkim as such. "But we would fall within their greater plans, whatever they might be. From our side we are preparing for all eventualities from now on."

[Prev. ref. 5027:INI:A]

D. Pakistan Violations Of Kashmir Cease-Fire Line: Pakistan troops violated the cease-fire line six times in the Uri sector and four times in other sectors of the Kashmir Valley on October 1 and 2.

In one case the intruders made a futile attempt to cut telephone lines between Indian posts 10 miles north of Uri; they fired on Indian troops who returned the fire. The intruders suffered some casualties and fled to their territory.

In another incident Pakistan troops fired with two-inch mortars, rifles and grenades on one of the Indian posts near Uri in the early hours of October 2. Indian troops returned the fire. No damage or loss of life had been reported on the Indian side. Casualties on the Pakistan side could not be ascertained.

According to details received in Srinagar on October 3, one Pakistani soldier was killed and another wounded in an encounter with Indian troops 3½ miles north-east of Poonch on October 2.

Pakistani troops came along the cease-fire line and opened fire with medium and light machine-guns on an Indian post. Indian troops returned the fire, killing one intruder and injuring another. After a brief encounter, Pakistani troops withdrew to their post. No loss of life on the Indian side was reported.

In Chhamb sector, Pakistani troops continued unprovoked firing all along the cease-fire line. They used automatic weapons. No loss was reported on the Indian side.

Reports about these violations of the cease-fire line had been lodged with the United Nations Observers.

E. Food And Loan Agreements With USA: India and the United States signed in New Delhi on September 30 an Agreement for the supply of four million tons of wheat, 300,000 tons of rice and 75,000 tons of soya bean oil under the US Food-for-Peace Programme. The commodities are valued at Rs. 190 crores.

Two other Agreements were also signed. One Agreement provides for a loan to the Indian Government for development projects, the bulk of the rupees coming from the sale proceeds of the commodities supplied under PL 480.

The loan is repayable within 40 years and carries interest at 0.75 per cent.

Under a similar Agreement, a sum of Rs. 16.6 crores accruing under an earlier 1962 PL 480 Agreement will be given as a loan to the Indian Government.

These bring the total value of commodities, since the programme was extended to India in August, 1956, to Rs. 1,372.9 crores.

Under a earlier PL 480 Agreement concluded in May, 1960, wheat is being shipped to India at the rate of 20,000 tons a day. The USA will complete shipping the entire quantity stipulated in that Agreement before the end of this year. The latest Agreement ensures that wheat shipments will be maintained at this rate through June, 1965. Supplies of rice under the new Agreement will soon start arriving in India. Early shipments of soya bean oil are also expected.

During the fiscal year ending June, 1965, USA will make available to India as much as 6.7 million tons of wheat under the programme.

This massive flow is expected to help stabilize the price situation and discourage hoarding. Arrangements have been made for the quick unloading and effective distribution of commodities received under PL 480.

The Agreement concluded on September 30 was the ninth with India since August, 1956. They cover a total of 31 million tons of wheat, 1.7 million tons of rice, 800,000 tons of maize and other grains, 2.4 million bales of Indian cotton and considerable amounts of tobacco, soya bean oil, milk powder, cheese and canned fruit.

The Agreements were signed by Mr. P. Govindan Nair, Additional Secretary in the Ministry of Finance, and the US Minister, Mr. Joseph N. Greene, Jr.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5990:INI:E, 6055:INI:F]

F. Financial Agreement With Sweden: An Agreement on financial assistance between Sweden and India was signed in Stockholm on September 29 by Mr. Torsten Nilsson, Foreign Minister of Sweden, and the Indian Ambassador, Mr. Khub Chand.

The Agreement envisages grants of 12 million Swedish kroner (about Rs. 1.1 crores) and a development credit of 24 million kroner (about Rs. 2.2 crores).

Over 8 million kroner of the grants will be used for the supply of 8,000 tons of text-book paper for primary education in India. It is the third Swedish gift of paper to India.

Sweden will also supply forestry tools under a UN project to train logging instructors in India.

The 24-million-kroner credit will be repayable in 20 years, the first five years being a grace period; the rate of interest

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

will be 2 per cent. Half the amount will be utilized by India to import equipment for 15 dairy plants. Eight million kroner is to be used to buy electrical switchgear and control equipment. The remaining four million will be used for joint Indo-Swedish ventures.

(*The Statesman*, New Delhi)

[Prev. ref. 4800:AOA:E]

G. **Trade Relations With South Africa—Foreign Press Reports Denied:** A Government spokesman on October 2 characterized as "completely baseless" the reports which had recently appeared in some foreign newspapers that India was having trade relations with South Africa.

He said that India was the first country to break off trade relations with South Africa in 1946 as a protest against the racial policy of that country. The Indian mission in that country was closed down in 1954.

In pursuance of the resolution passed by the UN General Assembly on November 7, 1952, India had banned trade with South Africa.

The spokesman said that such reports emanated from interested sources. For instance, such an allegation had been made by Pakistan in the Security Council in May. It was refuted by the leader of the Indian delegation, Mr. M. C. Chagla.

(*The Times of India*, New Delhi)

[Prev. ref. 5402:INI:B]

H. **Direct Telegraph And Telephone Services With Nepal:** Direct wireless telegraph and radio telephone services between India and Nepal were made available from October 1.

There are now two classes of telegrams —ordinary and express.

The charges for ordinary telegrams are Rs. 2 for the first 10 words and 20 paise for every additional word. As for Press telegrams, the charges are Rs. 1.50 for the first 50 words and 15 paise for every additional five words.

The charges for express telegrams are double that of ordinary dues.

The charges for telephone calls originating from any station in Andhra Pradesh, Gujerat, Kerala, Madras, Maharashtra, Mysore and Orissa and adjacent Union Territories are Rs. 17 for the first three minutes. For calls originating from any station in the rest of the country the charges are Rs. 13 for the first three minutes. The charges for every additional minute are levied on proportionate basis.

There is no separate priority classification for telephone calls.

(*The Statesman*, New Delhi)

[Prev. ref. 5929:INI:F]

I. **Loan To Nepal:** India will give Nepal a loan of Rs. 1 crore in Indian currency to help establish a wide range of industries including jute, cement, paper and textiles under an Agreement signed in New Delhi on September 30 between the two Governments.

The loan is repayable in 15 years; the interest will be 3 per cent.

The Agreement was signed by Dr. Yadav Prasad Pant, Finance Secretary of the Nepalese Government, and Mr. S. Boothalingam, Finance Secretary of the Government of India.

(*The Statesman*, New Delhi)

[Prev. ref. 5945:NEP:A]

J. **Envoy To Nepal:** The appointment of Mr. Shriman Narayan, a member of the Planning Commission, as Indian Ambassador to Nepal was officially announced in New Delhi on September 30.

He would assume charge shortly.

(*The Statesman*, New Delhi)

[Prev. ref. 5874:NEP:B]

K. **Session Of WHO Regional Committee For South-East Asia:** The 17th session of the WHO Regional Committee for South-East Asia was held in New Delhi from September 22 to 28.

During its one-week session, the Committee endorsed WHO's 1966 programme and Budget for South-East Asia and approved the report on WHO's work in the region during the past year.

The session, which was inaugurated by the Vice-President of India, Dr. Zakir Hussain, was attended by representatives from Afghanistan, Burma, Ceylon, India, Indonesia, Mongolia, Nepal and Thailand. Dr. V. T. H. Gunaratne, Director of Health Services, Ceylon, was elected Chairman of the Committee, and Dr. D. Baidya, Director of Health Services, Nepal, as Vice-Chairman.

During the discussion of the Regional Director's annual report, the Committee endorsed the continued emphasis in WHO assistance to countries in South-East Asia on control and eradication of major communicable diseases such as malaria, tuberculosis, yaws and smallpox, and on the improvement of environmental sanitation.

In a resolution noting the relatively large number of cases of typhoid fever in the region, particularly among children, the Committee called for the introduction of systematic programmes of immunization of school-children, through the co-ordinated efforts of Ministries of Health and Education.

The Committee also adopted a resolution calling for the improvement of infectious disease hospitals.

The technical discussions held during the Regional Committee meeting were devoted to smallpox eradication. Dr. K. M. Lal, Deputy Director-General of Health Services, India, was elected chairman of the discussions.

It was pointed out that Asia still reports the largest number of smallpox cases and deaths. In 1960, the continent had reported about 67 per cent (39,000 cases) of the world's total and in 1963 61 per cent (75,000 cases). The increase of the number of cases in 1963 was foreseen according to the cyclical trend of the disease in some countries.

The technical discussions group stressed that eradication of smallpox from the region could only be achieved if nationwide eradication projects were pursued by all countries and if an adequate level of immunization was maintained on a long-term basis after the completion of mass eradication programmes.

It was noted that most countries in South-East Asia had started production of freeze-dried smallpox vaccine with the assistance of WHO and UNICEF. However, it would take a minimum of two years before they could meet their own requirements. It was recommended that in the meantime WHO should endeavour to obtain further donations of freeze-dried vaccine from countries with adequate production facilities. Millions of doses of freeze-dried smallpox vaccine have already been donated to South-East Asia by the Soviet Union, the Netherlands, Switzerland and Britain.

The 18th session of the Regional Committee will take place in Kabul (Afghanistan) in September, 1965.

L. **New Central Deputy Ministers:** A *communique* issued on October 1 from Rashtrapati Bhavan said that Mr. Rameshwar Sahu had been appointed Deputy Minister in the Ministry of Finance.

Mr. P. S. Naskar was appointed Deputy Minister in the Ministry of Health on September 30.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5968:INI:A]

M. **Review Of Exports—Board Of Trade Meeting:** Reviewing the export performance during July and August, 1964 at its meeting in Bombay on October 5, the Board of Trade exhorted the trading sector to step up exports to achieve an increase of at least Rs. 5 crores every month over the 1963 level.

The Board was concerned that its earlier apprehensions, that due to shortage of some commodities and the general trend of rising prices in recent months exports might stagnate, had been justified.

Exports in July rose only by Rs. 3 crores and in August remained almost stationary (at Rs. 67 crores) as compared with exports in the corresponding months of July and August, 1963.

Lack of adequate export surpluses in critical commodities such as vegetable oils and sugar as well as the general inflationary pressures on the economy had been hampering exports.

While expansion in the exports of some non-traditional items such as engineering goods, plastics, chemicals, etc., had been able to compensate for the shortfalls in some staple export commodities, it was essential that utmost vigilance be exercised and corrective action taken with reference to the impact of rising prices on the export sector.

While the general problem of prices needed to be more vigorously tackled by the Government—and this the Board considered most important—the Board stressed that all trade organizations, including export promotion councils, commodity boards, as well as individual trading houses, should do their best during the coming months to overcome these handicaps and step up exports so as to achieve an increase of at least Rs. 5 crores every month over the 1963 level.

With regard to long-term export problems, the Board observed that though appropriate institutional arrangements for promoting exports had been greatly strengthened during the last two years, what was required was a purposive and determined implementation of these policies in the different sectors of the economy to stimulate exports to the desired extent. To that end the procedures under these policies must be further streamlined.

The Board was happy to observe that the Ministry of Commerce had initiated action to hold a series of meetings with State Chief Ministers in order to enlist the full support of the State Governments in the task of export promotion.

The Board was informed that a successful meeting between the West Bengal Government, the Deputy Minister of Commerce and leading exporters had already taken place on October 4 and that meetings with the other States were being planned.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The Board re-iterated the need to ensure continuity and stability in export promotion schemes and policies. It felt that export promotion assistance schemes should be allowed to operate unchanged till the end of the Fourth Five-Year Plan to enable the industries to plan their export programmes on a long-term basis.

The Board observed that difficulties in the matter of release of foreign exchange for business visits abroad continued to be felt by the trade. It felt that early study should be undertaken to rationalize and liberalize the allocation of foreign exchange for such visits and allied purposes.

A committee was formed to formulate concrete proposals and procedures.

The Board noted that with the formulation of the Fourth Plan targets, steps should be taken to establish an export sector in each industry or group of industries.

It also felt it was necessary to enunciate a code of trading between manufacturers and exporters.

It gave detailed consideration to the problems relating to exports to Africa. It observed that exports to that continent did not show much improvement. It was recognized that exports to Africa presented some special problems arising from lack of adequate shipping facilities, land-locked character of the region and difficulties in internal distribution etc.

It recommended there should be intensification of export promotion measures in their application to trade with Africa, and that the problem of arranging specially assisted shipping services to all important ports in that continent should be immediately undertaken by shipping interests. The Government should give special assistance for this.

The Board also called upon all Export Promotion Councils and the All-India Exporters' Chamber to prepare a list of principal exporters dealing with Africa. It was also decided to open a few offices to market information and trade facilities in western, eastern, central and northern Africa.

(*The Times of India*, Bombay)

N. **Bhilai Steel Plant's Expansion Programme:** The General Manager of the Bhilai Steel Plant, Mr. Inderjit Singh, told newsmen in Raipur on October 1 that a Rs. 20-crore expansion programme was being worked out in three phases to meet the iron-ore requirements of the Plant's fourth, fifth and sixth blast furnaces as and when they came up.

The first phase, which was already in hand, he said, was the introduction of a third shift at Rajahara ore mines to feed blast furnace number four which would be commissioned by the middle of November. The second phase would raise Rajahara mines capacity to 3.5 million tonnes and would include extension of work to Jharanambli mines. This phase would cost nearly Rs. 2 crores and would be completed by the end of 1965. The third phase, to be completed by 1968, included development of Dalli mines to produce 6 million tonnes of ore.

He said that the fourth blast furnace, to be commissioned in November, would have an annual capacity of 6 million tonnes of iron-ore.

Other important units to be commissioned by November were the seventh open-hearth furnace and the sixth group of soaking pits, and a slag granulation plant.

To maintain the schedule of the programme, arrangements had been made to receive some equipment from USSR by air.

(*The Statesman*, Calcutta)

[Prev. ref. 5645:INI:G]

O. **IFC Annual Report:** According to the annual report of the Industrial Finance Corporation (IFC), released in New Delhi on September 30, since its inception 16 years ago the Corporation has given assistance amounting to Rs. 196.78 crores, including Rs. 16.89 crores in foreign currency, to 334 industrial undertakings. The amount of aid sanctioned last year was Rs. 38.27 crores, the number of beneficiaries being 90.

The State-wise distribution of the loans shows that Maharashtra, with Rs. 34 crores, has benefited most from IFC's activities. Madras, with Rs. 28.82 crores, came second and West Bengal, with Rs. 19.79 crores, a rather distant third. Andhra got Rs. 15.11 crores, UP Rs. 13.80 crores and Punjab Rs. 10.90 crores.

Mr. A. Bakshi, Chairman of IFC, said at a news conference that while applications for loans were generally treated on merit, efforts were made to help the growth of industries in the more under-developed States, such as Rajasthan and Madhya Pradesh.

Replying to a question whether the increase in the Bank Rate to 5 per cent would cause an increase in the Corporation's lending rate (7.5 per cent), he said no increase was contemplated. If, however, there was a general rise in long-term interest rates the Corporation might have to review the position.

In recent years the Corporation had provided not merely loans in foreign currency, but also increased its underwriter activities, and undertaken direct subscriptioh to capital issues and deferred payment guarantees.

The financial results of IFC's activities in 1963-64 were satisfactory. After setting apart Rs. 1.01 crores for taxation it made a net profit of Rs. 1.25 crores. Reserves amounted to Rs. 4.09 crores against the paid-up capital of Rs. 7 crores.

Mr. Bakshi said that some relaxation had been made in IFC's terms and conditions. In future the Corporation's right to appoint directors on boards of assisted concerns would be exercised more selectively.

The Corporation needed a great deal more foreign credit than it had been assured so far. Negotiations for such credit were under way with the Kreditanstalt and AID. Lately, information had come that an additional credit of DM15 million had been allotted. More foreign assistance, particularly in convertible currency, was necessary.

(*The Statesman*, New Delhi)

[Prev. ref. 5473:INI:I]

P. **Merger Of HAL And Aeronautics India Ltd:** With the merger of the Hindustan Aircraft Ltd. (HAL) and the Aeronautics India Ltd. on October 1, all establishments connected with India's State-owned aircraft industry came under a single management.

The merged undertaking was re-named Hindustan Aeronautics (India) Ltd.

The Government had earlier proceeded on the basis of a separate management for each manufacturing centre. The HAL, which was founded in 1940 and is the oldest aircraft manufacturing unit in the country, was responsible for the complex of factories located at Bangalore.

A second aircraft manufacturing project was started by the Defence Ministry in 1960 at Kanpur. Yet another public limited concern, the Aeronautics (India) Ltd., was founded by the Government in 1963 to supervise the three factories being set up for the manufacture of MIG-21 aircraft.

Earlier this year the Government reversed its earlier decision on a separate management for each establishment and started a process of amalgamation.

The Kanpur manufacturing depot, which has on hand the building of Avro-738 transport planes, was taken over by the Aeronautics (India) Ltd. on June 16, 1964. The process of amalgamation was completed with the merger of the HAL and AIL on October 1.

The new public undertaking, the Hindustan Aeronautics (India) Ltd., has Mr. S. S. Khera as Chairman of the Board of Directors and Air Vice-Marshal Ranjan Dutt as Managing Director.

[Prev. ref. 5422:INI:V, 5500:INI:O]

Q. **Progress Of Shipping Corporation Of India Ltd:** At the annual meeting of the Shipping Corporation of India in Bombay on September 28, the Chairman, Mr. R. L. Gupta gave details of the record of the Corporation for the past year.

The number of ships owned by the Corporation, a Government undertaking, he said, had risen from 15 in 1960 to 29 aggregating 237,000 GRT or 334 DWT. Orders had been placed for an additional 20 ships totalling 200,000 GRT—12 cargo vessels with Hindustan Shipyard, four in Poland, three coal-carriers in Yugoslavia and one super-tanker in Japan.

The volume of cargoes carried by the Corporation rose from 382,000 tons in 1950-60 to 1,327,000 tons in 1963-64, resulting in an increase in net profit from Rs. 1.07 crores in 1961-62 to Rs. 1.40 crores in 1963-64.

The Corporation had established itself and had also strengthened its services to the Black Sea, the UK and the Continent. It would participate in the services to UAR in 1965.

(*The Times of India*, Bombay)

[Prev. ref. 5257:INI:O]

R. **Fertilizer Corporation Annual Report:** According to its annual report, released in New Delhi on September 30, the Fertilizer Corporation of India reported an increase of Rs. 2.25 crores in its net profit for 1963-64.

The increase was mainly attributed to the retrospective revision of the retention prices of fertilizers and the record production by the Nangal unit.

The gross profit for the year was Rs. 9.28 crores and the net profit Rs. 3.85 crores.

The Corporation's internal resources arising from the revenue surpluses of its production units and the allocation for depreciation reserve during the year amounted to Rs. 8.74 crores. The total of such internal resources since the inception of the Corporation's oldest unit at Sindri had been Rs. 47.97 crores. This was about 120 per cent of the paid-up capital of the Corporation's production units.

The annual report claimed that the overall production of fertilizers at Sindri and Nangal was 7,46,596 tonnes against 6,88,791 tonnes during the previous year. The Nangal unit accounted for almost the entire increase in production.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The progress of the implementation of the projects under construction was said to be satisfactory. The trial run of the ammonia plant at Trombay was expected to start in November and that of the nitrophosphate plant in February, 1965.

The report added that the Central Government had asked the Corporation to take up the planning and implementation of one more fertilizer project at Durgapur in West Bengal.

[Prev. ref. 5413:INI:F]

S. Progress Of CSIR—A. R. Mudaliar Committee's Report: The need to orient research programmes in the national laboratories, with 80 per cent of the effort directed towards applied research, has been stressed by Dr. A. Ramaswami Mudaliar's Committee which had been appointed by the Government to review the work and progress of the Council of Scientific and Industrial Research (CSIR).

The Committee, whose report was released in New Delhi on September 30, said that the main responsibility for pure fundamental work should rest with universities with which close links must be forged by CSIR.

Steps should be taken for effective utilization of the results of research. The setting up of the Central Design and Engineering Unit with a view to bridging the gap between the laboratory and pilot plant researches and the stage where they are scaled up to industrial size units was welcomed by the Committee. It said that user participation in research should be encouraged in various forms and links with industry should be forged in more than one way.

Expert panels comprising scientists from industry and universities must be closely associated with the programme and control of research in the research divisions in the laboratories.

Industry should also be given incentive by way of financial support to start research and development organizations or to undertake research on approved projects with partial or full support from CSIR.

The Committee recommended that machinery should be set up and strengthened by CSIR for its collaboration with the Planning Commission, Ministry of Industry, the Director-General of Technical Development and other agencies responsible for the collection of essential information and action in respect of the nation's economy, with the object of ensuring that national plans and problems become the basis for the programmes of its research establishments.

Machinery should also be set up for inter-communication and exchange with other research organizations and technical agencies of the Government, particularly those associated with agriculture, medicine, defence, railways, posts and telegraphs, and atomic energy.

If India was to make headway as a developing country, its research effort in terms of quantity, quality and effectiveness would have to be increased manifold and limited only by the availability of trained personnel and resources.

It recommended that CSIR's part in the Fourth Plan should be implemented to the full and extended where fresh needs arose.

The strength of the governing body of CSIR should be limited to 20 or 25 and consideration should be given to introducing some fresh members at the time of its re-constitution. It also recommended that the board should set up a limited number of specialist committees to advise on those aspects which require more detailed consideration than the board would have time to give.

Industry-oriented laboratories should be located in an area containing a concentration of the industry but should avoid crowded parts of cities. An important consideration should be the availability of sufficient area for its growth and accommodation of field stations of other laboratories and auxiliary institutes. On the other hand, out-of-the-way places without social amenities and supporting engineering services should also be avoided. Proximity to a university should play a part in the siting of a discipline-oriented or a regional laboratory. Where more than one institute or field station are to be located in the same city they should as far as possible be in the same campus and share common services as far as possible.

The balance between fundamental and applied work in the National Chemical Laboratory, Poona, which at present was about 50:50 should be altered nearer to 20:80 and the fundamental work should become mainly related to the applied projects or for the development of expertise in general chemical knowledge and techniques. The laboratory should concentrate its research effort on selected projects in fields such as organic intermediates, high polymers, fermentation chemicals, inorganic chemicals, dyestuffs and textile auxiliaries, catalysts and chemical engineering and pilot plant techniques. The number of Ph.D. students and fellowships should be progressively reduced until it is not more than one-tenth of the permanent scientific staff.

In the National Physical Laboratory, New Delhi, the primary emphasis should be on applied work, including standards and testing. Of particular importance should be the fields of radio components, radio propagation, electronics, ceramics, acoustics, optics, time measurement and applied mechanics, and in each of these fields objective basic work should form a substantial part. It was important that the laboratory should build up an esprit de corps, only possible in a well-led single unit and it should not be divided into two wings with a separation of fundamental work from applied work.

Research at the National Metallurgical Laboratory, Jamshedpur, in the field of non-ferrous metallurgy should be increased in collaboration with the industry. Design facilities to enable the laboratory to act as consultants help to partly fill a gap in the application of research results and these should be extended.

It was recommended that the objective basic research at the Central Fuel Research Institute, Jealgora, should be increased. The whole of such fundamental work should continue at Jealgora and not be separated. Coal survey stations should be organizationally separated from the Institute.

The four industries related to the four divisions of the Central Glass and Ceramic Research Institute, Calcutta should be brought into even more active participation in the work and share in the finances. Advisory panels from industry should be set up for these four divisions.

The shifting of the Indian Institute for Biochemistry and Experimental Medicine, Calcutta, from its present congested location at Jadavpur may be carried out in due course.

The Central Electrochemical Research Institute, Karaikudi, should be transferred from its present isolated location to Madras as soon as possible.

Besides the Chairman, Dr. A. Ramaswami Mudaliar, the Committee consisted of Mr. K. T. Chandy, Dr. S. Dhawan, Sir Charles F. Goodeve, Sir Patrick Linstead, Prof. P. C. Mahalanobis and Dr. S. A. Sen Gupta. This was the third reviewing committee for CSIR.

Dr. A. Ramaswami Mudaliar's Statement: Explaining the recommendations of the Committee to newsmen in New Delhi on September 30, Dr. A. Ramaswami Mudaliar called for a periodic review at the highest level of the national policy on scientific research.

Such a review, he added, should be based on the facts and data to be furnished by the Council of Scientific and Industrial Research on the working of the various research laboratories in the country.

A clear enunciation of the national policy once in five years, in his view, would facilitate the work of the different Ministries in respect of research programmes carried out by institutions under their aegis.

He deplored the tendency in certain circles to consider fundamental research as superior to applied research and stressed the need to bring about a "healthy combination" of the two.

He, however, wanted greater stress to be placed on applied research in all the national laboratories, leaving fundamental research to universities.

He hoped that the Government would release adequate foreign exchange to universities for the import of equipment required for fundamental research.

In this context, he referred to the unwillingness of Indian scientists abroad to return to this country and said that they did not want to return because of the lack of facilities for research in India. He, therefore, emphasized the need to provide all the basic facilities like modern equipment even if that meant more foreign exchange expenditure.

T. President's Rule In Kerala—Parliament Passes Bill: The Rajya Sabha approved on September 30 the proclamation of President's Rule in Kerala and passed a Bill conferring on the President the power of the Legislature of Kerala to make laws.

The Lok Sabha passed the Bill on September 24.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 6079:INI:M]

U. New Gold Deposits In Mysore: The Mysore Industries Minister, Mr. K. Mallappa, said in Bangalore on October 1 that new veins of gold-bearing ore had been discovered at Hatti gold mines in Raichur district in which the Mysore Government had 90 per cent capital interest.

This discovery had led to the launching of an expansion programme costing about Rs. 2 crores which would increase the crushing capacity at the mines from 400 tons per day at present to 1,000 tons by 1967.

Mr. Mallappa, who presided over a meeting of the Board of Hatti Gold Mines, told newsmen that the undertaking was expected to improve upon Rs. 5,00,000 profit it registered in 1962-63. Accounts were being finalised.

The gold mines were promising since the depth of only 1,400 feet had been explored so far. Further exploration was in progress. He contrasted this with Kolar gold mining undertaking where depths up to 10,000 feet had been explored. "As we go down deeper at Hatti, we may find richer gold ore."

The Central Government had abandoned its earlier proposal to take over Hatti mines. This was because the Centre's experience with Kolar mines, which it took over a few years ago (see page 4960), might not have been satisfactory.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

At present, about 2,500 ounces of gold produced at Hatti were being sold every month for jari and other special purposes at prices fixed from month to month.

Mr. Mallappa said that the Mysore Government had given up further exploration for gold at Kappadagudda in Dharwal district where gold-bearing ores were traced two years earlier. Initial attempts had proved the existence of gold in the area and to continue exploration would require heavy investment which the Central Government alone could provide. The State Government, would rather use its resources in the exploration of iron, manganese, bauxite, clay and limestone which were of immediate and great importance.

[Prev. ref. 4588:INI:F]

V. **Increase In MPs' Salaries—Bill Passed:** Parliament set its seal of approval on September 25 on the legislation to increase the salaries and allowances of its members after a last ditch battle against it by the Communist group in the Lok Sabha.

The House divided half-a-dozen times before passing the Bill, as amended by the Rajya Sabha, to give effect to the Bill from June 1, 1964. The option clause, under which those who do not want to draw the higher emolument can declare their decision to that effect to the presiding officer, was deleted. All MPs will now receive Rs. 500 per month as salary, instead of Rs. 400, and Rs. 31 as daily allowance during the session as against Rs. 21.

The new rate will have retrospective effect from June, 1964.

The House gave priority to the Bill and adjourned discussion on Mr. Prakash Vir Shastri's non-official Bill seeking abrogation of Article 370 which confers a special status on Jammu and Kashmir.

(*The Times of India*, New Delhi)

W. **Separation Of Judiciary And Executive In Punjab:** The Separation of Judicial and Executive Functions Act came into force on October 2, the birth anniversary of Mahatma Gandhi.

The Chief Justice of India, Mr. P. B. Gajendragadkar, formally inaugurated the enforcement of the Act at a function in Chandigarh.

(*The Times of India*, New Delhi)

[Prev. ref. 4721:INI:L, 4795:INI:R]

X. **Land Holdings Of Agricultural Families:** According to statistics on households compiled by the Census Commissioner of India, and released in New Delhi on October 1, only 1.3 per cent of agricultural families hold 14 per cent of India's total cultivated land—nearly 324 million acres.

On the other hand, 57 per cent of families plough less than 16 per cent of the land.

The statistics showed that 11 per cent of families had 37 per cent of the land, whereas 30 per cent of families cultivated 32.7 per cent of the total cultivated area.

The Planning Commission had been apprised of the situation.

The average size of holdings for India as a whole worked out to 7.39 acres. The average size in the pure tenancy holdings was the lowest and varies between two and three acres in Kerala, Madras, Assam, West Bengal, Orissa, Bihar and Uttar Pradesh.

In Punjab, Rajasthan, Gujerat and Maharashtra, however, the size of a pure tenancy holding varied between seven and 10 acres.

Of the pure tenant families, 76 per cent had holdings of less than five acres.

The average size of mixed tenancy holdings was relatively high in all States, except Uttar Pradesh. Of all mixed tenancy households, 48 per cent had holdings of less than five acres.

Generally speaking, in Punjab, Rajasthan, Madhya Pradesh, Gujerat, Maharashtra and Mysore, which fall more or less in the north-western and south-western regions, the average size of holdings was three to four times the size in the eastern region and five to seven times of that in Kerala.

Further, the average size of holdings was generally higher in urban areas as compared to the rural areas.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 4072:INI:M]

Y. **Nehru Agricultural University In Madhya Pradesh Opened:** The Nehru Agricultural University was opened at Adhartal, five miles from Jabalpur in Madhya Pradesh, on October 2.

In doing so, the Central Minister for Information and Broadcasting, Mrs. Indira Gandhi, appealed to cultivators to step up agricultural production.

She said that simultaneous development of agriculture and industry was vital for the prosperity.

The rapid growth of population was posing a tough problem. It should be tackled effectively.

She welcomed US assistance for the University. The institution had been set up in collaboration with Illinois University which had supplied equipment and books and provided training facilities.

Six agricultural colleges, two veterinary colleges and the Madhya Pradesh Agricultural Research Institute would be affiliated to it. The University, which would have on its rolls 2,500 students, promises to open a new chapter in agricultural education in the State. It would have a staff of about 500 teachers and instructors.

(*The Times of India*, Bombay)

[Prev. ref. 5532:INI:I]

IRAQ

A. **Details Of "Interim" Constitution:** The August-September issue of *New Iraq* carried the text of the *Interim* Constitution proclaimed by President A. S. Arif on May 2, 1964.

The following is the text:

I—The State:

Article 1: The Republic of Iraq is a democratic socialist State deriving the roots of its democracy and socialism from the Arab heritage and the spirit of Islam; the Iraqi people are a part of the Arab nation and their aim is comprehensive Arab unity. The Government is committed to work for the realization of this unity as soon as possible, starting with unity with UAR.

Article 2: The Republic of Iraq is a fully sovereign State, and no part of its territory shall be given up.

Article 3: Islam is the religion of the State and is the main basis of its Constitution. Arabic is the official language of the State.

II—Basic Constituents Of Society:

Article 4: Social solidarity is the basis of Iraqi society.

Article 5: The family is the basis of society. It rests on religion, morals, and patriotism.

Article 6: The State shall guarantee equal opportunities for all Iraqis.

Article 7: The economic system of the State aims at the realization of economic development and social justice which rejects all forms of exploitation.

Article 8: The State directs the national economy in accordance with a comprehensive plan to be drawn up by law within the frame-work of which both the public and private sectors shall co-operate to ensure a continued economic development for the sake of increasing production and raising the standard of living.

Article 9: The natural resources and all their revenues and potential are the property of the State. The State shall ensure the proper exploitation of these resources.

Article 10: Capital shall be in the service of the national economy. The employment of capital shall not conflict with the people's well-being.

Article 11: Public property is inviolable. Its protection is the duty of every citizen since it is the source of the welfare of the people and the strength of the homeland.

Article 12: Private ownership is inviolable. The law organizes its social function. Property may not be expropriated except for the public purposes and in consideration of a just compensation in accordance with the law. The right of inheritance is guaranteed in accordance with Islamic law.

Article 13: The law shall determine the minimum of agricultural ownership in such a manner as to prevent the establishment of a feudal system.

Article 14: The State shall encourage the co-operative system and foster all forms of co-operative establishments.

Article 15: The State shall, according to the law, guarantee the support of the family and the protection of motherhood and childhood.

Article 16: The State shall guarantee social insurance services. Iraqis are entitled to assistance in old age, sickness, incapacity, or unemployment.

Article 17: Employment in the Republic of Iraq is the right, duty, and honour of every able citizen. Public posts are a trust to those who occupy them. Public servants shall, in carrying out their duties, aim at serving the people.

III—Public Rights And Obligations:

Article 18: Iraqi citizenship shall be defined by law.

Article 19: All Iraqis are equal before the law. They are equal in their public rights and obligations without distinction of race, origin, language, religion, or creed. All Iraqis, including both Arabs and Kurds, shall co-operate in safeguarding the homeland. This Constitution shall guarantee their national rights within the frame-work of Iraqi unity.

Article 20: There can be no crime or punishment except as defined by law. Penalties may only be inflicted in respect to felonies committed subsequently to the date of the law prescribing them.

Article 21: Penalty is personal.

Article 22: No person may be arrested, detained, imprisoned, or searched except in accordance with the law.

Article 23: The accused is innocent until he is proved guilty in a legal trial in which all the means for the exercise of the right of defence in person or by attorney shall be guaranteed. It is prohibited to harm the accused physically or psychologically.

INDIA

SUMMARY: Supreme Court Verdict On Conflict Between UP Vidhan Sabha And Allahabad High Court; Sino-Indian Correspondence On China-Sikkim Boundary; Agreements With USA; Review Of Exports.

A. Conflict Between UP Vidhan Sabha And Allahabad High Court—Supreme Court's Hearing And Verdict: A Special Bench of seven judges of the Supreme Court on July 27 began hearing of the President's Reference to the Supreme Court on the constitutional issues involved in the conflict between the UP Vidhan Sabha and the Allahabad High Court.

About 60 counsel represented the two sides.

On March 14, the Speaker of the Vidhan Sabha had directed that a Socialist worker, Mr. Keshav Singh, be committed to prison for contempt of the House and a breach of its privileges. Mr. B. Solomon, an advocate, filed a petition on behalf of Mr. Keshav Singh before the High Court bench at Lucknow challenging the validity of the Speaker's order and praying for his client's release. The High Court granted interim bail and issued notice to the respondents.

The Vidhan Sabha passed a resolution on March 21 stating that the judges had committed contempt of the House by granting bail and entertaining the petition and they should be produced before the House. The judges questioned the order by a petition in the High Court. Thereupon a Full Bench of 28 judges passed an interim order restraining the Speaker from issuing the warrants of arrest.

These incidents gave rise to a serious conflict between the judges and the legislature regarding the scope of their jurisdiction in matters relating to the privileges of the House.

Five principal questions were addressed to the Supreme Court for its opinion and advice:

(1) Whether the Judges of the High Court were competent to entertain Mr. Keshav Singh's petition and release him on bail;

(2) Whether the Judges, Mr. Keshav Singh and his lawyer, Mr. B. Solomon, were guilty of contempt of the Legislature;

(3) Whether the Legislature was competent to direct the production of the judges and the lawyer before the House;

(4) Whether the Full Bench of the Allahabad High Court had jurisdiction to stay the subsequent action by the Assembly against the two judges and the lawyers; and

(5) Whether a judge who deals with a petition involving privilege can be proceeded against by the Legislature.

At the outset the Chief Justice, Mr. P. B. Gajendragadkar, asked the Attorney-General about the procedure to be followed in the hearing of the reference. By consent of all parties the order of arguments was settled.

An objection raised on behalf of the Advocate-General of Bihar that the Reference was incompetent was heard and disposed of.

The Attorney-General, Mr. C. K. Daphtary said that in his opinion the judges could not be guilty of contempt by exercising jurisdiction under Article 226 of the Constitution. He maintained that the court had power to grant bail since Mr. Keshav Singh's petition was in the nature of a prayer for habeas corpus.

Mr. Daphtary submitted that the Full Bench also committed no contempt of the House as the proceedings against the two judges were prima facie a threatened violence of the constitutional provisions. He said that having regard to the separation of powers and the paramountcy of judicial power the judges had the right to go into the question of alleged violation of fundamental rights.

The Chief Justice remarked that the problem raised really was how to reconcile Article 226 of the Constitution with Article 194 (3).

Verdict:

On September 30, the Supreme Court held that the Lucknow Bench of the Allahabad High Court was competent to entertain and deal with the petition of Mr. Keshav Singh who had been sentenced to imprisonment by the UP Vidhan Sabha for contempt.

The Court also held that neither Mr. Keshav Singh nor his advocate, Mr. B. Solomon, had committed any contempt of the UP Vidhan Sabha.

It was of the opinion that the two Judges who dealt with the petition of Mr. Keshav Singh were not guilty of contempt of the House.

The Chief Justice, Mr. P. B. Gajendragadkar, read the majority opinion of the Court. Mr. Justice A. K. Sarkar gave a separate opinion.

The five questions referred to the Supreme Court by the President were answered as follows:

(1) It was competent for the Lucknow Bench of the High Court of Allahabad consisting of Mr. Justice N. U. Beg and Mr. Justice G. D. Sehgal to entertain and deal with the petition of Mr. Keshav Singh challenging the legality of the sentence of imprisonment imposed on him by the UP Legislative Assembly for contempt and infringement of its privileges and to pass orders releasing Mr. Keshav Singh on bail pending the disposal of the petition.

(2) Mr. Keshav Singh, by causing the petition to be presented on his behalf to the High Court of UP, Mr. B. Solomon, advocate, by presenting Mr. Keshav Singh's petition, and the two judges by entertaining and dealing with the petition and ordering the release of Mr. Keshav Singh on bail did not commit contempt of the UP Legislative Assembly.

(3) It was not competent for the UP Legislative Assembly to direct the production of the two judges and Mr. B. Solomon before it in custody or to call for their explanation for contempt.

(4) It was competent for the Full Bench of the UP High Court to entertain and deal with the petition of the two judges and Mr. Solomon and to pass interim orders restraining the Speaker of the UP Legislative Assembly and other respondents from implementing the direction of the Assembly.

(5) A judge of the High Court who entertained or dealt with a petition challenging any order or decision of a legislature imposing any penalty on the petitioner, or issued any process against the petitioner for its contempt or for infringement of its privileges and immunities, or who passed any order on such petition did not commit contempt of the legislature and the Legislative Assembly was not competent to take proceedings against such a charge in the exercise and enforcement of its powers, privileges and immunities.

Their Lordships prefaced the answer to the fifth question with the observation that the answer was confined to cases in relation to contempt alleged to have been committed by a citizen who is not a member of the House outside the four walls of the legislative chamber.

[The facts which gave rise to the conflict and the consequent reference by the President to the Supreme Court were that on March 14, 1964, the Speaker of the UP Assembly administered a reprimand to Mr. Keshav Singh, a resident of Gorakhpur, for having committed contempt of the House and for having committed a breach of the privileges of Mr. Narsingh Narain Pandey, a member of the House. Later, on the same day (March 14, 1964), the Speaker directed that Mr. Keshav Singh be committed to prison for committing another contempt of the House by his conduct in the House when summoned to receive the reprimand and for writing a disrespectful letter to the Speaker of the House earlier. On March 19, 1964, Mr. B. Solomon, an advocate, presented a petition to the High Court on behalf of Mr. Keshav Singh under Section 491 of the Criminal Procedure Code and Article 226 of the Constitution. The petition was heard by Mr. Justice N. U. Beg and Mr. Justice G. D. Sehgal who admitted the petition. They issued a notice to the respondents, the Speaker of the House, the UP Chief Minister and the Superintendent of the District Jail, Lucknow, and directed that Mr. Keshav Singh be released on bail. On March 21, the House passed a resolution saying that the two judges and the advocate had committed contempt of the House. It ordered that they be brought before the House and that Mr. Keshav Singh should be taken into custody and kept in the District Jail, Lucknow. The two judges heard about this resolution on the radio and also read about it in the Press. They filed separate petitions before the Allahabad High Court under Article 226 of the Constitution. A Full Bench of the Allahabad High Court, consisting of 28 Judges, admitted the petitions and ordered the issue of notice against the respondents restraining the Speaker from issuing warrants. Mr. Solomon, advocate of Mr. Keshav Singh, presented a similar petition which was also admitted. On March 25, the House passed a clarificatory resolution as a result of which the warrants issued for the arrest of the two judges and Mr. Solomon were withdrawn. They were, however, placed under an obligation to appeal before the House and offer their explanation why the House should not proceed against them. On March 26, the President decided to exercise his power to make a reference to the Supreme Court under Article 143 (1) of the Constitution. The Supreme Court was asked to give its opinion on the legislature-judiciary conflict in UP.]

At the hearing, a preliminary objection was raised by Mr. Verma on behalf of the Advocate-General of Bihar who contended that the reference was invalid under Article 143 (1) because the questions referred to the Court could not be said to be concerned with any of the powers, duties or functions conferred on the President by the relevant Articles of the Constitution.

The Supreme Court expressed the view that the reference was competent.

Further, Their Lordships were of the opinion that the questions formulated for their advisory opinion were questions of great constitutional importance and significance and it was their duty to report to the President embodying their answers to the questions formulated by him.

After setting out the various contentions raised by Mr. H. M. Seervai, Advocate-General of Maharashtra, who appeared for the UP Vidhan Sabha, and Mr. M. C. Setalvad, former Attorney-General, who appeared for the judges of the Allahabad High Court, the Chief Justice, Mr. P. B. Gajendragadkar, observed that the dispute really centred round the jurisdiction of the High Court to entertain a habeas corpus petition even in cases where a general warrant had been issued by the

House directing the detention of the party for contempt.

The problem had to be decided in the light of the provisions contained in Article 194(3) of the Constitution and in that sense the interpretation of that Article was really the crux of the matter.

His Lordship said that clause (1) of Article 194 conferred freedom of speech on the legislators within the legislative chamber and clause (2) made it plain that the freedom was literally absolute and unfettered. The first part of clause (3) empowered legislatures of States to make laws prescribing their powers, privileges and immunities; the latter part provides that until such laws are made the legislatures in question shall enjoy the same powers, privileges and immunities which the House of Commons enjoyed at the commencement of the Constitution.

It was well known that out of a large number of privileges and powers which the House of Commons claimed during the days of its bitter struggle for recognition, some were given up in course of time and some virtually faded out by desuetude. So in every case where a power was claimed it was necessary to enquire whether it was an existing power at the relevant time. The power must not only be claimed by the House of Commons but must also be recognized by the English Courts.

All the clauses of Article 194 were not in terms made subject to the provisions relating to fundamental rights. In fact clause 2 was couched in such wide terms that in exercising the rights conferred on them by clause 1 if the legislators by their speeches contravened any of the fundamental rights they would not be liable for any action in any court. Nevertheless if for other valid considerations it appeared that the contents of clause 3 might not exclude the applicability of certain relevant provisions of the Constitution, it would not be reasonable to suggest that those provisions must be ignored just because the clause did not open with the words "subject to the other provisions of the Constitution." Whenever there was a conflict between these provisions and the provisions pertaining to fundamental rights an attempt would have to be made to resolve the conflict by the adoption of the harmonious rule of construction.

Further, the fact that the first part of clause 3 referred to future laws which would be subject to fundamental rights might assume significance in interpreting the latter part of clause 3.

Their Lordships then dealt with the question raised by Mr. Seervai that the Assembly should not be taken to have conceded to the Court the jurisdiction to construe Article 194(3) so as to bind it. Their Lordships expressed the view that in dealing with this question it was necessary to bear in mind the fundamental feature of a Federal Constitution.

The supremacy of the Constitution was fundamental to the existence of a Federal State. Legislators, Ministers and Judges all took an oath of allegiance to the Constitution for it was by the relevant provisions of the Constitution that they derive their authority and jurisdiction.

Further, there was no doubt that the Constitution had entrusted to the judicature in this country the task of construing the provisions of the Constitution and of safeguarding the fundamental rights of the citizens. Therefore, there was no difficulty in holding that the decision about the construction of Article 194(3) must ultimately rest with the judicature of this country.

This conclusion would not, however, impair the validity of Mr. Seervai's contention that the advisory opinion rendered by Their Lordships in the present reference proceedings was not a judication properly so called and would bind no parties as such.

His Lordship said that in coming to this conclusion Their Lordships were not unmindful of the grandeur and majesty of the task which had been assigned to the legislatures under the Constitution. The High Court had also to play an equally significant role in the development of the rule of law.

The status, dignity and importance of these two respective institutions—the Legislature and the Judicature—were derived primarily from the status, dignity and importance of the respective causes that were assigned to their charge by the Constitution. They must function not in a spirit of hostility but rationally, harmoniously and in a spirit of understanding within their respective spheres, for that alone would help the peaceful development, the growth and stabilization of the democratic way of life in this country.

But when, as in the present case, a controversy arose the problem must be dealt with objectively and impersonally.

Referring to Mr. Seervai's argument that under the latter part of Article 194 (3) all the powers which vested in the House of Commons at the relevant time vested in the House, Their Lordships said that this broad claim could not be accepted in its entirety because there were some powers which could not obviously be claimed by the House, for instance, the privilege of freedom of access to the Sovereign, the privilege to pass Acts of Attainder and impeachments and the privilege in regard to its own Constitution.

Their Lordships then referred to the previous decision of the Supreme Court in the case of Mr. M. S. M. Sharma in which the Editor of Searchlight of Patna had been called upon by the Secretary of the Bihar Legislative Assembly to show cause why appropriate action should not be taken against him for the breach of the privileges of the Speaker and the Assembly by publishing in entirety a speech delivered in the Assembly by a member, portions of which had been directed to be expunged by the Speaker.

The majority decision of the Supreme Court was that the privilege in question was subsisting at the relevant time and must be deemed to be included under the latter part of Article 194 (3). It also held that Article 19 (1) (a) did not apply because under the rule of harmonious construction the particular provision in Article 194 (3) would prevail over the general provision contained in Article 19 (1) (a).

It further held that though Article 21 applied but, it had not been contravened, it would thus be seen that in the case of Mr. Sharma the contentions urged by the petitioner did not raise a general issue as to the relevance and applicability of all the fundamental rights guaranteed by Part III at all.

Therefore, the majority decision did not lay down that wherever there was a conflict between the provisions of latter part of Article 194 (3) in any of the provisions of the fundamental rights guaranteed by Part III, the latter must always yield to the former. The majority decision in Mr. Sharma's case also accepted the contention of the petitioner that if a law were passed by the Legislature of a State prescribing its powers, privileges and immunities, it would be subject to Article 13 and that was the view with which Their Lordships were in agreement.

His Lordship said that answer to the question whether it was the intention of the Constitution to perpetuate the dualism which rudely disturbed public life in England in the 17th, 18th and 19th centuries, would depend upon a harmonious construction of the relevant provisions of the Constitution itself. The power conferred on the High Court under Article 226 (1) could in a proper case be exercised even against the legislature. If an application was made to the High Court for the issue of a writ of habeas corpus it would not be competent for the House to raise a preliminary objection that the High Court had no jurisdiction to entertain the application because the detention is by an order of the House. Under Article 32 the right to move the Supreme Court for the enforcement of fundamental rights itself was a guaranteed fundamental right. What was said about Article 226 (1) was still more true about Article 32 (1).

It was relevant to emphasize that the conflict which had arisen between the High Court and the House was strictly speaking not a conflict between the High Court and the House as such but between the House and the citizens of this country. No doubt by virtue of the resolution passed by the House requiring the Judges to appear before the Bar of the House to explain their conduct, the controversy had developed into one between the High Court and the House, but it was because the High Court in the discharge of its duties as such Court intervened to inquire into the allegations made by a citizen that the Judges had been compelled to enter the arena. It was the interim order which had led to the present controversy. Basically and fundamentally the controversy was between a citizen of Uttar Pradesh and the UP Legislative Assembly, that was why the provisions of Article 226 and Article 32 assumed significance.

Further, Article 208(1) made it clear that if the House was to make any rules as prescribed by it those rules would be subject to the fundamental rights guaranteed by Part III. Similarly Article 212(1) made it possible for a citizen to question in a court of law the validity of any proceedings inside the legislative chamber if his case was that the proceedings suffer not from mere irregularity of procedure but from an illegality.

Article 211 barred the discussion in the Legislature of a State with respect to the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties, and the absolute prohibition prescribed by Article 211 should not be read as merely directory and should not be allowed to be reduced to a meaningless declaration by permitting the House to take action against a Judge in respect of his conduct in the discharge of his duties.

Their Lordships then considered the position with regard to privileges and immunities which vested in both the Houses of Parliament in England. Their Lordships based themselves on the relevant statements made in May's Parliamentary Practice and observed that the result of the process of give and take had been that the House of Commons had not for a hundred years refused to submit its privileges to the decisions of the Courts and so it might be said to have given practical recognition to the jurisdiction of the Courts over the existence and extent of its privileges. On the other hand the Courts had always, at any rate in the last resort, refused to interfere in the application by the House of any of its recognized privileges.

While considering whether the privilege to determine if the contempt of the House had been committed and to punish for such contempt and to claim that a general order or warrant sentencing a person for its contempt was not examinable in a court of law was part of the privilege vesting in the House of Commons or whether it was the result of an agreement evolved between the courts and the House by convention or by doctrine of comity or as a matter of legal presumption, their Lordships referred to the judicial decisions in England beginning with the Earl of Shaftesbury case in 1677. After examining the relevant decisions, they observed that the right claimed by the House of Commons not to have its general warrants examined in habeas corpus proceedings had been based more on the consideration that the House of Commons was in the position of a superior court of record and had the right like other superior courts of record to issue a general warrant for commitment of persons found guilty of contempt.

Like the general warrant issued by superior courts of record in respect of such contempt the general warrants issued by the House of Commons in similar situations should be similarly treated. It

Article 24: Everyone accused of a felony shall have a defence counsel approved by him.

Article 25: No Iraqi may be banned from residing in any locality or obliged to reside in any particular locality except in cases prescribed by law.

Article 26: Extradition of political refugees is prohibited.

Article 27: Homes are inviolable. They may not be entered except in the cases and manner prescribed by the law.

Article 28: Freedom of religion is guaranteed. The State shall protect the freedom of performing the rites of religions provided this does not violate public order or morals.

Article 29: Freedom of thought and scientific research is guaranteed. Every person is entitled to the free expression by speech, writing, photography, and the like, within the limits of the law.

Article 30: Freedom of the Press, printing and publication is guaranteed within the limits of the law.

Article 31: Freedom of the formation of societies and trade unions through legitimate processes, and on a patriotic basis is guaranteed.

Article 32: Iraqis are entitled to orderly assembly, provided they are unarmed, without previous notice. Public meetings, processions, and gatherings are permitted within the limits of the law.

Article 33: Education is the right of all Iraqis. It shall be guaranteed by the State through the establishment of different kinds of schools, universities, and institutes of learning and culture as well as by their expansion. The State shall pay particular attention to the physical, intellectual, and moral development of youth.

Article 34: The State shall supervise public education and the law regulates its various activities. Education at State schools and universities shall be free in all its stages.

Article 35: The State shall guarantee fair treatment for all Iraqis according to the work they do, by means of determining working hours, assessing wages, social and health insurance, and insurance against unemployment, and by organizing the right to rest and vacation.

Article 36: Health care is the right of all Iraqis. It shall be guaranteed by the State through the establishment of all kinds of hospitals and health institutions and by their expansion.

Article 37: Defence of the homeland is a sacred duty and the fulfilment of military conscription as compulsory service is an honour for all Iraqis in accordance with the law.

Article 38: Payment of taxes and public revenues is a duty and an honour. No tax or duty shall be imposed and no person shall be exempted therefrom except in the law.

Article 39: Voting is a right of all Iraqis in accordance with the law, and participation in public life is a national duty for them.

IV—System Of Government:

Chapter 1—Head Of State:

Article 40: The President of the Republic is the Head of the State. He exercises his powers in the manner prescribed by this Constitution.

Article 41: The President of the Republic shall be an Iraqi of Iraqi parents from a family domiciled in Iraq since at least 1900 AD, and which at that time held Ottoman nationality. He shall be a Moslem who observes religious rites, must not be less than 40 years old, must be enjoying his civil and political rights, and must not be married to a foreigner. An Arab woman of Arab parents and grandparents will be considered an Iraqi for this purpose.

Article 42: Before he assumes the duties of his post, the President of the Republic shall take the following oath before a joint session of the National Council of the Revolutionary Command and the Cabinet: "I swear by Almighty God to be faithful to my religion, homeland, and nation, to preserve the Republican regime, respect the Constitution and law, to fully guard over the people's interests, and to safeguard the homeland's independence and the integrity of its territory."

Article 43: The President of the Republic shall appoint the Premier, and Deputy Premiers, and the Ministers and shall accept their resignations and relieve them of their posts.

Article 44: The President of the Republic shall sanction laws and regulations as well as the decisions of the Cabinet.

Article 45: The President of the Republic shall approve and ratify international treaties and agreements.

Article 46: (a) The President of the Republic shall appoint army officers and shall pension them off in accordance with the law; (b) the President of the Republic shall appoint civil servants, judges, governors and diplomatic envoys in accordance with the law; (c) the President of the Republic shall accept accredited diplomatic representatives of foreign countries and representatives of international organizations in the Republic of Iraq.

Article 47: The President of the Republic is the Commander-in-Chief of the armed forces.

Article 48: The President of the Republic shall have the right to declare Martial Law and a State of Emergency following the approval of the National Council of the Revolutionary Command.

Article 49: The President of the Republic shall declare war and accept truce and peace following approval of the National Council of the Revolutionary Command, the Cabinet, and the National Defence Council.

Article 50: The President of the Republic shall set up a National Defence Council and shall be defined by law.

Article 51: In the event or the possibility of a national danger that would jeopardize the country's safety and security, the President of the Republic shall have the right to issue decisions which will have the force of law with a view to protecting the Republic's entity, safety, and security following approval of the National Council of the Revolutionary Command.

Article 52: No death sentence shall be executed except after it has been sanctioned by the President of the Republic. The President of the Republic shall have the right to commute any sentence or repeal it by special pardon. General amnesty shall be exercised only by law.

Article 53: In the event of his absence from Iraq or of his inability for one reason or another to discharge his duties, the President of the Republic shall form a Republican Council to act for him. The Council shall consist of three members of the National Council of the Revolutionary Command. The President of the Republic shall invest in this Council whatever powers he deems necessary by means of a Republican decree.

Article 54: In the event of the President of the Republic resigning his office, he shall address his letter of resignation to the National Council of the Revolutionary Command. In this event the National Council of the Revolutionary Command, the Cabinet, and the National Defence Council shall hold a joint meeting under the charmanship of the Premier to decide whether to accept or refuse the resignation with a majority of two-thirds of the total number of members.

Article 55: If the office of President becomes vacant for any reason, the National Council of the Revolutionary Command, the Cabinet, and the National Defence Council shall hold a joint session under the Premier's chairmanship to elect a President of the Republic with a majority of two-thirds of the total number of members, within a period of not longer than one week from the date of the posts' vacancy. The new President shall be elected from among the members of the National Council of the Revolutionary Command.

Article 56: During the period of vacancy of the office of President of the Republic, the Premier shall continue to exercise his powers and he shall not be entitled to exercise the prerogatives of the President.

Article 57: The law prescribes the salary of the President. Any amendment to the salary of the President may not apply to the term during which the amendment was made.

Article 58: The President of the Republic may not, during the term of his office, exercise a profession or undertake commercial, financial, or industrial, activities. Nor may he acquire or lease any property belonging to the State, lease or sell to, or exchange wth the State any part of his property whatsoever.

Article 59: The President of the Republic shall, jointly with the Cabinet, lay down the general policy of the State in all the military, political, economic, and social aspects and shall supervise its implementation.

Article 60: The President of the Republic shall not incur responsibility because of the duties of his office except in the case of the violation of the Constitution or high treason. With regard to general felonies, his responsibility is subject to ordinary laws. He cannot be accused as a result of such felonies or accused of violation of the Constitution or high treason except by the National Council of the Revolutionary Command, by a decision of a majority of two-thirds of its total members. He cannot be tried except by a special court and in the manner prescribed by law.

Chapter 2—Legislature:

Article 61: The National Assembly is the body which shall exercise the legislative powers.

Article 62: The National Assembly shall consist of members who shall be elected in a general secret ballot. The number of elected members, the method and rules of election, and the call for election shall be defined and prescribed by a law to be issued within not less than six months before the end of the transitional period.

Article 63: The Cabinet shall exercise the legislative powers during the transitional period, while observing the provisions of the law of the National Council of the Revolutionary Command. The President of the Republic shall approve the laws and promulgate them.

Chapter 3: The Executive:

(a) The President of the Republic:

Article 64: The executive power shall be vested in the President and he shall exercise it in the manner prescribed by the Constitution.

(b) The Cabinet:

Article 65: The Cabinet is the higher executive and administrative body of the State.

Article 66: The Cabinet shall consists of the Premier, Deputy Premier, and Ministers. The Premier shall conduct Government affairs and shall preside over Cabinet meetings.

Article 67: The Cabinet shall undertake implementation of the general policy of the State in accordance with laws, regulations, and republican decrees, and shall exercise the necessary powers for this purpose.

Article 68: The Cabinet shall organize and co-ordinate the economic, cultural, social, and health establishments which lead to raising of the standard of living

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and prosperity of the people. The Cabinet shall adopt a sound foreign policy.

Article 69: The Cabinet shall exercise the following powers:

(1) Guidance, co-ordination, and review of the work of the Ministries, public services and organizations.

(2) Issuance of administrative and executive decisions in accordance with law and regulations and the supervision of their implementation.

(3) Preparation of draft laws and regulations.

(4) Appointment of officials, their dismissal, and their retirement according to law.

(5) Preparation of the State General Budget and its supplement.

(6) Preparation of the general plan of the State to develop the national economy and take the necessary measures to implement it according to law.

(7) Supervision, organization, and administration of currency and credit regulations and State insurance activities.

(8) Contracting and granting loans within the limits of the general policy of the State.

(9) Supervision of all semi-official department, Government companies, and institutions of public interest.

(10) Supervision and pursuance of implementation of laws, regulations, decisions and Republican decrees, safeguarding of State security, and protection of the rights of citizens and the State interest.

(11) Supervision of the duties of Ministries, departments, and public and local administrations, and cancellation and amendment of its decisions which are incompatible with the law.

Article 70: An authority will be established for general financial control and supervision. Its formation and its supervision and control activities shall be defined by law.

Article 71: Deliberations of the Cabinet shall be secret. Its decisions shall be issued by a majority vote at the presence of the majority number of Ministers and the approval of the majority present. When there is an equal number of votes, the Premier's vote shall decide the majority, and its decision shall be binding on both sides.

Article 72: The Premier, the Deputy Premier and the Ministers shall be Iraqi of Iraqi parents from a family who has lived in Iraq since at least 1900 AD and has Ottoman citizenship. He should be 30 years old and over, and enjoying all his civil and political rights and not married to a foreign wife. An Arab wife of Arab parents and grandparents is considered Iraqi for this purpose.

Article 73: Before exercising their duties, the Cabinet Ministers shall take the following oath: "I swear by the Almighty God that I shall be loyal to my religion, homeland and nation, and shall protect the Republican regime, respect the Constitution and the law, take full care of the interests of the public, preserve the independence of the homeland and the safety of its territory."

Article 74: When exercising their powers, the Premier, his Deputies, and the Ministers may not practise another profession or undertake commercial, financial, industrial or other economic activity or buy or hire anything of the State property, rent to the State or sell to it any of his property or exchange property with it.

Article 75: The President of the Republic and the Cabinet, after the approval of the President, may refer a Minister to trial for a crime committed when discharging his duties according to law.

Article 76: Resignation or dismissal of the Premier means the resignation and dismissal of all the Cabinet.

(c) The Armed Forces:

Article 77: The armed forces in the Republic of Iraq belong to the people and constitute its means of defending the the homeland and the security and integrity of its territory as well as of preserving the country's national unity.

Article 78: The State alone shall form the armed forces which include the army, the police, the security force and the gendarmerie.

Article 79: No organization or group may set up military or paramilitary formations.

Article 80: General mobilization—alert—shall be organized in accordance with the law.

Article 81: The law shall define the conditions of service and promotion for officers of the armed forces.

Article 82: No member of the armed forces may belong to a party or a political faction. The propagation of political and party ideas among the armed forces by any means is absolutely prohibited.

(d) Local Administration:

Article 83: The Republic of Iraq shall be divided into administrative units to be organized and administered according to the law.

Article 84: The authorities representing the administrative units shall be concerned with the units they represent and shall participate in the implementation of the State's general plan. These authorities establish and administer public utilities and economic, social, health and education projects in the manner defined by the law.

Chapter 4—Judiciary:

Article 85: Magistrates and judges are independent. In the performance of their duties they shall be subject to no other authority save the law. No authority may interfere in the independence of the judges or in the affairs of justice. The judiciary shall be organized by a law.

Article 86: The law shall classify the courts and define their jurisdictions.

Article 87: Sessions of the courts shall be conducted in public unless a court shall decide, in the interests of public order or morality, to sit in camera.

Article 88: Verdicts shall be pronounced and executed in the name of the people.

Article 89: Magistrates and judges are not subject to dismissal except in the manner prescribed by the law.

Article 90: The law shall define the terms governing the appointment of judges, and magistrates, their transfer and discipline.

Article 91: The law shall organize the duties of the public prosecutor and his deputies and define his prerogatives.

Article 92: Appointment of the chief public prosecutor and his deputies and discipline and dismissal shall be in accordance with the law.

Article 93: A State Council shall be concerned with administrative law, and the drafting, scrutiny, and interpretation of laws and regulations.

Chapter 5—General Rules:

Article 94: Baghdad is the capital of the Republic of Iraq.

Article 95: The law shall determine the national flag and regulations related thereto. The law shall also determine the emblem of the State and the regulations relative thereto.

Article 96: The law shall be effective only post-operatively and shall have no retro-active effect; nevertheless, provisions to the contrary may be stipulated in a law in non-criminal cases.

Transitional Provisions:

Article 97: Decisions, proclamations, orders and decrees issued by the President of the Republic, or the Chairman of the National Council of the Revolutionary Command, or the Commander-in-Chief of the armed forces beginning November 18, 1963 shall have the power of law and shall annul all provisions to the contrary in the laws in effect prior to their issuance, and shall be annulled or amended only in the manner prescribed in this Interim Constitution.

Article 98: The legislation in effect before the promulgation of this Interim Constitution shall remain valid and cannot be annulled or amended except in the manner prescribed in this Interim Constitution.

Article 99: As soon as this Interim Constitution comes into effect, the President of the Republic shall take before a joint meeting of the National Council of the Revolutionary Command and the Cabinet the oath stated in Article 42.

Article 100: The incumbent President of the Republic shall continue to perform the functions of his post until a President is elected in accordance with the provisions of the permanent Constitution.

Article 101: The interim period shall not exceed three years from the date of this Interim Constitution coming into force.

Article 102: The Interim Constitution of July 27, 1958 is abrogated.

Article 103: The Interim Constitution shall remain in effect until the permanent Constitution to be drafted by the National Assembly comes into effect or until the unified State is established.

Article 104: This Interim Constitution shall come into effect from the date it is published in the Official Gazette.

Article 105: The Ministers of State shall implement this Constitution.

ASIA OUTSIDE ASIA

A. Intense Radiation From Mars: A Hamburg report on August 28 said that radio emissions had been detected from the direction of Mars indicating that that planet may be girdled by an extremely intense radiation belt.

Such a belt would show that Mars has a magnetic field like that of the Earth, re-inforcing the hypothesis that the field is generated by the spin of the planet. It would also complicate plans for the exploration of Mars, particularly by manned space-craft.

These findings were presented at the General Assembly of the International Astronomical Union, which was meeting in Hamburg. The Mars observation was made by the giant dish-shaped antenna, 250 feet in diameter, at Jordell Bank (England) and the results reported by Dr. Rodney D. Davies.

The planet was scanned by a radio wave-length of roughly 21 centimetres and the results indicated an unbelievably high surface temperature—about 1,500 degrees F. From infra-red observations and radio scanning at a three-centimetre wave-length, it was known that the true overall temperature is about 30 degrees below zero. Dr. Davies believes the most likely explanation is that additional radio waves on 21 centimetres are coming from an intense radiation belt.

ASIAN RECORDER

November 4—10, 1964

Regd. No. D-727
Vol. X No. 45

CEYLON

A. Move To Establish Press Council: A Government Bill seeking to establish a Press Council and Tribunal was tabled in Parliament on September 25. There had been 13 earlier drafts.

The Bill, introduced by the Minister of Justice, Mr. G. C. T. A. de Silva, provides for the appointment of a five-member Press Council by the Governor-General.

The Director of Cultural Affairs will be an ex-officio member and two of the members will be selected from lists of names suggested by working journalists' associations and trade unions of other non-journalist employees of newspapers.

The Bill makes provision for the appointment of a Press Commissioner who will investigate on his own, or at request, whether newspapers have published anything profane, false, defamatory, indecent, or obscene. He will also have the power to investigate whether any advertisement is calculated to further any immoral objective. He can compel any person to attend for investigations.

The members of the Tribunal are to be appointed by the Judicial Services Commission, which consists of three Supreme Court judges with the Chief Justice as Chairman.

There is provision for the Press Commissioner to direct newspapers to publish corrections of any news item which the Commissioner, after inquiry, is satisfied was incorrect or distorted.

The offences specified in the Bill are:

(1) Any profane matter, intended to insult the founder of any religion, any deity, saint or person, whether alive or dead, venerated by followers of any religion or any religious belief;

(2) Any statement or matter concerning any person which will amount to defamation of such person within the meaning of Section 479 of the Penal Code;

(3) Any statement or matter which is false or which suggests a falsehood in relation to any person and the printing or publication of which statement or matter is likely to cause injury, harm or damage to such person; and

(4) Any advertisement which is calculated to further any immoral objective or any indecent or obscene statement or matter.

It shall, however, not be an offence to print or publish in any newspaper any fair comment on or any fair criticism of any religion or religious belief.

CHINA

A. Illicit Opium Traffic—Soviet Charge: The assertion was made by *Pravda* on September 13 that China was getting about $500 million a year from the illicit opium traffic and was using it for anti-Soviet propaganda or for subsidizing the "puppets of the Peking *regime*".

An article by the newspaper's Tokyo correspondent, who visited China in 1958, said China was producing opium on a large scale.

The correspondent said that according to Mr. Tsusai Sugavara, chairman of the National Japanese Committee for the struggle against addiction to drugs, most of the drugs produced by China—opium morphine, and heroin—were shipped to South-East Asia and large consignments also reached the United States.

The decision to expand the opium trade had been taken at a secret conference in Peking in December, 1952.

The correspondent quoted a Hong Kong weekly publication, **Hsinwen Tiendi**, as saying that the production of opium in China increased in the first few years of the "Great Leap Forward" to 8,000 tons compared with 2,000 tons in 1952.

The correspondent said that the area under opium poppies was also steadily expanded. Corrective labour camps were turned over to producing narcotic raw materials. The entire opium policy was organized from Peking by a "board for the procurement and sale of special merchandise of local production".

The article said: "To take over the methods of the imperialists, to go into partnership with the owners of opium dens, is abominable and monstrous, yet logical for those who disregard the vital interests of their own people in pursuit of their hegemonistic nationalistic schemes."

(*The Times*, London)

[Prev. ref. 5989:CHI:C]

B. Prince Norodom Sihanouk's Visit: The Cambodian Head of State, Prince Norodom Sihanouk, arrived in Peking on September 28 as head of a delegation to the Chinese National Day celebrations.

During the visit, which lasted until October 6, Prince Norodom went through a crowded programme of talks with Chinese leaders, State receptions and sight-seeing.

Speaking at a banquet given in honour of the delegation on September 27, the Chinese President, Mr. Liu Shao-chi, declared that China would go to the aid of Cambodia if she were attacked by any foreign country.

Similar assurances were given to Prince Norodom by the Chairman of the Communist Party, Mr. Mao Tse-tung, and other leaders.

A joint *communique* issued after the talks by Prince Norodom and Mr. Liu Shao-chi was described by the Peking *People's Daily* as "marking a new chapter in the crystallization of militant friendship between China and Cambodia in their struggle against imperialism."

The delegation was seen off on October 6 by Mr. Liu Shao-chi, the Prime Minister, Mr. Chou En-lai, and other leaders.

In a farewell speech Prince Norodom Sihanouk described China as Cambodia's "No. I friend."

He said: "Six million Cambodians are infinitely grateful to the Chinese People's Republic for her resolute support...and for new and most important unconditional economic and military aid which she is giving us without the least compensation."

(*The Times of India*, New Delhi)

FORMOSA

A. KMT Agreement With Peking on Question Of Boundaries: The Kuomintang Administration is apparently at one with the Peking *regime* on the question of China's boundaries.

This was affirmed in the latest China Year-Book, an official publication brought out in Taipeh, which carries a map purporting to show China's boundaries.

The map in the 1963-64 edition of the Year-Book follows the Peking regime's claim line over large areas of Ladakh, showing the entire Aksaichin area as Chinese.

Hunza, in Pakistan-occupied Kashmir, is placed on the Chinese side of the border in the so-called Sinkiang Province, but the boundary, passing between Hunza and Gilgit, is shown as undefined.

While almost all of China's boundary with the Indian State is shown as final, Kashmir's border with the rest of India as well as its boundary with Pakistan are shown as undefined.

The entire N-EFA area is made out as Chinese and in the east the boundary over the Naga Hills is shown as undefined.

Burma's Kachin triangle too is included in China and the Sino-Burmese boundary, which is shown as undefined, passes just north of Myitkyina. The implication seems to be that Formosa does not recognize the Boundary Agreement between Rangoon and Peking, ratified in early 1961.

The boundary between the Soviet Union and the so-called Sinkiang part of China is shown as undefined in the Pamir region, and the Mongolian Republic is included as a province of China.

In the section on the Peking regime's war against India in 1962, the Year-Book recalls the three-point October 24 proposals made by the Peking Government and India's suggestion for restoration first to the September 8 position, and adds: "The Indians launched a counter-offensive as soon as they had obtained military aid from Britain and the United States. The Communists then attacked again. In a week they occupied the vast area between the MacMahon Line and the traditional border and knocked out the 43 military posts set up by the Indian side since 1960."

IRAQ

A. Cultural Co-operation Plan With USSR: A Cultural Co-operation Plan between Iraq and USSR was signed in Baghdad on September 16.

Under the Plan, USSR will grant 25 fellowships for specialization at higher institutes, send to Iraq three lecturers in atomic physics, atomic chemistry, and economics, a team of artistes comprising 25 members, hold a film week in Baghdad and a photography exhibition on Soviet Cinema art.

The Soviet Union will present to Iraq indices and copies of research works of Soviet orientalists in the field of Islamic and Arab studies. It will also present indices of Arabic manuscripts preserved in Moscow, Leningrad, Tashkent and other cities in the Soviet Union, and copies of Arab and oriental manuscripts photographed on microfilm.

The Republic of Iraq will, on its part, grant USSR five fellowships and exchange TV and radio programmes, scientific and literary magazines in Arabic and English languages or one of the oriental languages.

(*Iraqi Embassy*, New Delhi)

[Prev. ref. 6043:IRQ:A]

ISRAEL

A. Non-Jewish Population: According to an official publication which was summarised in *The Israeli Digest* on September 25, Israel's non-Jewish population totals 247,000, which constitutes 11 per cent of the entire population and a 60 per cent increase since 1948, at the time of the 1961 national census.

Half of this number are children under the age of 14, who were born after the establishment of the State, and almost three-quarters are below thirty.

These facts were given in Publication No. 17 of the 1961 Population and Housing Census, which presents a wealth of data on Israel's Moslem, Christian and Druze population. It contains, for instance, basic statistical tables on the composition of the non-Jewish population by sex, age and personal status, marriage and fertility, languages spoken, education, labour force and housing conditions.

Also included are maps of urban and rural distribution, diagrams and a list of Arab, Druze and Bedouin villages. The publication has been issued for the first time in three languages—Hebrew, English and Arabic.

The data show that three-quarters of the non-Jewish population are concentrated in rural areas, but there is a slight tendency to move over to town life.

One-fifth of the married women entered wedlock under the age of 16, and one-tenth of the married men under the age of 18. The average number of children born by an Arab or Druze woman by the age of 45 is seven, the number being higher in rural areas and among women who have never gone to school.

Three-quarters of the non-Jewish families live in homes owned by themselves, with an average of 3.6 persons per room, the average size of a family being 5.3. More than two-thirds of the males above the age of 14 (not including the Bedouin) are literate, as compared with 30 per cent literacy among the women.

Three-quarters of the men and 12 per cent of the women over 14 belong to the civilian labour force. One-third work in agriculture, one-third in industry and building, and one-third in public services. About half work outside their places of residence.

(*The Israeli Digest*, Jerusalem)

[Prev. ref. 5379:ISR:A]

B. Immigration Statistics: The head of the Jewish Agency's Immigration Department, Mr. S. Z. Shragai, said at a news conference in Jerusalem at the beginning of the Jewish New Year that 250,000 Jews from almost 70 countries had settled in Israel in the past four years since the last Zionist Congress in 1960.

During the four-year period between the 26th Zionist Congress, which is to meet in Jerusalem in December, 1964, and the 27th, he expected that another 250,000 could be brought in. He believed that immigration could be increased over and above this figure by at least 50,000 during the next four years, provided Israel could raise all the financial resources required.

"It is not a problem of employment, but of housing," he explained. "I am thinking of the 50,000 Jews who wanted to immigrate and could have immigrated, but did not come because of the shortage of funds for housing. I am not sure whether we are not missing the right moment to bring these Jews over, for no one knows what the morrow will bring."

Analyzing the composition of the immigration, he said it should not be forgotten that not all Jews in the United States or England were rich. In prosperous countries, too, there were Jews living a life of privation, just as there were well-off Jews in the so-called countries of hardship.

Today's immigration was not classified according to countries of origin but according to the qualifications and talents of the newcomers; this was also the criterion underlying the plans for the absorption of the immigrants.

Immigration in the past two or three years included a substantial number of professional men in science, industry, building, hydrology, education and so forth.

The crucial question today, which would be even more so in a couple of years, was whence the new immigrants would come in the future, if Jews in USA, England and other countries did not wish to come. It should not be forgotten that in the past few years the Immigration Department, with the help of the World Zionist Organization, the State of Israel and the Jewish people in the Diaspora, had succeeded in bringing over practically all the Jews from certain communities.

Jewish organizations and the Zionist political parties should recruit a Peace Force from among their members, especially the youth, for immigration to Israel in order to promote her industrial and scientific development.

The recruitment of people who would come to Israel for three or four years to help the State in its development and strengthen its economy was also necessary.

Mr. Shragai added: "Of course, Israel and the World Zionist Organization must provide appropriate economic and social methods of absorption for such immigrants." In the last two years Israel and the Zionist Executive had done important work in this field, and an appreciable number of American Jews with professional skills had settled in Israel through arrangements made for them in advance.

(*The Israeli Digest*, Jerusalem)

[Prev. ref. 5792:ISR:A, 6017:ISR:A]

JAPAN

A. Trade Relations With USSR: According to Tokyo reports, repercussions from Japan's granting eight-year deferred payment terms on the export to Russia of a urea plant have evidently convinced the Government that it has struck the right balance.

Speaking to businessmen in Tokyo on September 17, the Minister of International Trade and Industry, Mr. Yoshio Sakurauchi, remarked that eight years seemed enough to obtain a "considerable portion" of the $350 million shopping list for plant purchases which Mr. A. Mikoyan had indicated to businessmen during his Spring visit.

The Government, he said, would now continue to promote trade with Russia "on the same level as West European nations"—a remark that persuaded observers that if Japan obviously cannot win the race for communist orders, she is evidently striving to be among the medallists.

Trade with China, for which prospects had been enhanced, Mr. Sakurauchi thought, by the Peking-Moscow rivalry, would, however, be left in the hands of private bankers and traders. Knowing the dependence of private financing on the Central Bank, the nuance of difference is much finer than would be the case in Western countries.

He also forecast that Japan's foreign trade would be much higher this year than all earlier predictions. Conservative estimates, were for exports totalling $6,500 million and imports of about $6,300 million. With this balance, he added, "there is no need for anxiety."

(*The Japan Times*, Tokyo)

[Prev. ref. 5910:JAP:A]

B. Technical And Licensing Agreements Approved: The Government's Foreign Investment Council has approved 33 patent licensing and technical aid agreements with foreign firms, five stock acquisitions involving participation in management, and 32 loans totalling $56,238,000.

The largest loan was for Mitsubishi Heavy Industries, which are borrowing $7 million from the Morgan Guaranty Trust, of the United States, for 35 months at an annual interest of 5.5 per cent.

The Japanese company also obtained a $3 million three-year 5.5 per cent loan from the Midland International Bank.

Hitachi secured a $5 million three-year 5.5 per cent loan from the Toronto Dominion Bank.

Among the patent licensing agreements approved was one between the Polytechnical Corporation of Czechoslovakia, and the Enshu Manufacturing Co., Tokyo, textile machinery makers, on a water jet textile loom. This was the first licence obtained by a Japanese firm from Czechoslovakia.

(*The Statesman*, Calcutta)

C. Mono-rail Service: The Tokyo mono-rail, which, at eight miles, claims to be the longest in commercial use in the world, on September 17 began a regular six-minute service between Haneda airport and Tokyo.

Built by Hitachi Ltd. under licence from the Alweg Corporation of West Germany, the system is of the straddle type, and its trains, running on thousands of prestressed concrete beams resting on piles, boast a speed of 65 m.p.h. in linking the two terminals in 15 minutes.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The double track runs briefly through two tunnels on leaving the airport to rise steeply and streak across the rim of Tokyo Bay—slightly unnerving this, as from the train there is no visible support—before vying with the new, equally stilted motor-way into the city where, short of centre, the mono-rail pulls into a junction with the conventional railway. The trip costs five shillings, and is a novel experience, if less smooth than the sponsors have led one to expect. Baggage costs nearly four shillings a piece in handling costs.

Local economists reckon this private venture will need to run at near capacity (100,000) daily to pay the interest on almost £20 million it cost to build. Mono-rail construction, according to the company, is a quarter of the cost of building an underground railway. Because of difficulties in building over the sea and reclaimed land, the Tokyo system cost twice the normal which, claims the company, is still about half that of an underground.

(*The Times*, London)

D. Trade With Middle East: Statistical information released in London on September 18 presents a picture of Japanese trade with the Middle East much more varied than that of West German trade.

Iran has been trying to redress the imbalance of her trade with Japan for some years. The trade figures with Afghanistan, Lebanon, Libya and Jordan and Syria reveal a trading position which will be difficult to redress, although Japan might in future import oil from Libya.

The following table gives Japanese trade figures with the Middle East for the years 1961-63 (the amounts are in pounds sterling):

	1963	1962	1961	1963	1962	1961
		Exports			Imports	
Iran	13,000	9,117	15,123	49,545	31,938	15,946
Saudi Arabia	9,642	8,114	7,006	64,395	59,271	46,429
Kuwait	9,232	9,377	9,412	90,778	94,480	96,062
UAR	8,702	5,918	7,972	6,059	3,832	6,313
Sudan	5,950	5,463	5,459	5,160	3,268	2,604
Lebanon	5,293	3,558	2,429	169	192	221
Ethiopia	5,087	5,101	5,012	1,976	1,558	1,365
Turkey	4,894	5,641	7,060	1,285	911	954
Syria	3,580	3,114	1,594	348	288	518
Israel	3,396	2,182	742	2,196	1,868	1,427
Afghanistan	3,290	2,340	2,618	226	2	3
Iraq	2,687	5,225	6,505	14,750	12,180	18,912
Libya	2,658	1,715	1,081	3	5	5
Jordan	2,031	2,216	1,624	15	84	93
Total including names not listed	95,328	81,779	85,400	288,098	220,977	202,686
World Total	1,524,815	1,769,817	1,962,762	2,091,756	2,029,149	2,425,081

(*Middle East Economic Digest*, London)

[Prev. ref. 4164:JAP:A]

E. Exchange Of Newsmen With China: Nine Japanese journalists have gone to Peking on a one-year assignment under a non-governmental agreement by which resident correspondents are being exchanged for the first time with the Peking regime.

Seven Chinese correspondents will function in Tokyo.

A tentative unofficial agreement was reached on the subject last Spring in Peking between Mr. Kenzo Matsumura, a veteran Liberal Democrat and the Chinese Premier, Mr. Chou En-lai.

The Japanese Government maintained that it wanted no official part in the business, but gave every encouragement to Japanese newspaper proprietors, who quickly settled all the details.

The Japanese correspondents will be subject to restrictions on movement, but the Chinese will only have to give notification on departure for trips around Japan.

The Japanese in Peking will be by far the biggest national contingent, except, perhaps, for the Russians.

(*The Times*, London)

[Prev. ref. 6031:JAP:A]

F. Author And Publisher Fined: The Tokyo District Court ordered on September 28 Mr. Yukio Mishima, the best known of Japan's post-War authors, together with his publishers, the Shinchosa Company, to pay £800 for violating, in his novel *Utage no Ato* (*After the Banquet*), the right to privacy of Mr. Hachiro Arita (80), a former Foreign Minister.

Mr. Arita was in 1959 the unsuccessful Socialist candidate for election as Governor of Tokyo. Mr. Mishima admittedly used Mr. Arita's experiences, with details of his wife's financial sacrifices in the campaign and their subsequent divorce, as the frame-work, under fictitious names, in his novel. It is considered generally as a serious study in the self-destruction of a once successful yet ambitious politician.

Mr. Mishima claimed in court that he had made his intentions known to Mr. Arita, who went so far as to lend him one of his own books as material. The proceedings centred not on the truth of Mr. Mishima's creation, but on the issue of privacy, which he was alleged to have damaged by intrusion.

Counsel for Mr. Arita contended that the novel intruded painfully on his retirement insofar as it appeared when he was no longer a public figure. Mr. Mishima and his publishers claimed that any potential right to privacy had been abandoned long before the book appeared through published details in the Aritas' private life in magazine articles by the former Mrs. Arita.

This was the first such action brought in Japan; hitherto the characters of living persons and events involving them have been considered fair game for writers and film producers. It has been something of a cause celebre among intellectuals for the past three years.

Mr. Mishima, announcing his intention to appeal, said after the verdict: "This is how literary art is considered in Japan." He felt, in effect, that the verdict denied readers the freedom to interpret the meaning of a novel, and added: "The social significance of literary activities has been ignored."

(*The Times*, London)

G. "Golden Age" For Japanese Economy—Fuji Bank's Forecast: Fuji Bank, one of the country's major commercial banks, in a report on September 19 predicted a "golden age" for Japan's economy in the 1970's.

It said that by 1970 adjustment problems arising from the liberalization of imports would be a thing of the past. National income in 1975 would be 2.2 times that in 1965. Income standards would then surpass West Germany's and be the world's fourth highest, after the United States, Sweden, and Switzerland. (Currently Japan's standards are estimated, somewhat optimistically, to be level with Italy's.)

Consumer commodity prices would rise an average 4 per cent annually until 1970, and level off at 3 per cent between 1971 and 1975. However, man-power would become increasingly scarce, and to counter this the Bank foresaw many mergers and the development of "multiphased enterprises."

The report was entitled "The Japanese Economy between 1965 and 1975".

Another major bank, the Nippon Kangyo Bank, revised its predictions for the current year notably to re-estimate the current growth rate at 13.5 per cent (10.5 per cent, correcting for price rise)—exceeding by nearly two per cent the current official estimate in actual terms.

(*The Times*, London)

[Prev. ref. 5647:JAP:A]

KOREA (South)

A. Emergency Loan From Japan: The Japanese Government decided on September 22 to make an emergency loan of $20 million to South Korea to be used mainly for buying industrial raw materials and Japanese-made machine parts.

Observers saw in the Japanese decision a move to take the steam out of a new outburst of acrimony between the two neighbours, concerning, inevitably, renewed Korean allegations of "mass violations of the so-called Rhee Line by Japanese fishermen", and Japanese protests over the seizure of boats. Recently, according to the Koreans, violations of this unilaterally imposed 60-mile limit had been running above 1,500 a month.

A new irritant was the Japanese attempt to reject Seoul's demand for payment of local corporation tax by Japanese firms who have secured official contracts in South Korea since 1962-63. The Japanese have now acquiesced in the legality of the tax—the sum outstanding was only 70 million yen—and is seeking in return approval for opening branch offices in Korea for Japanese trading firms.

Officials explained in Tokyo that the emergency loan was not to be regarded as setting a precedent, and they clearly separated it from the $500 million Co-operation Agreement negotiated in 1962. That Agreement remains provisional, and therefore unimplemented, pending the resumption of "normal" diplomatic relations. Normalization talks are still suspended.

The main difference is that terms for the emergency loan are stiffer. Whereas some $200 million of the 1962 total of grants and loans were to be repayable over 20 years at 3½ per cent (from the near extinct Overseas Economic Co-operation Fund), the new loan is extended by the official Export-Import Bank for five years at 5¾ per cent.

B. Press Control Law Postponed: President Park Chung Hee announced

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

on September 9 the indefinite postponement of enforcement of the Press Control Law.

The Law had been the subject of bitter controversy between the Government and Press since its passage a month earlier.

(*The New York Times*)

[Prev. ref. 5997:KRS:A]

C. Landslides And Floods: About 250 persons were dead on September 13 in landslides and floods caused by South Korea's worst rainstorms for many years.

In Seoul the casualties were 70 known deaths and eight others feared dead. Many of the victims were crushed by landslides and collapsing stone walls, and others were drowned.

In the neighbouring province of Kyunggi there were 62 known dead and 82 feared dead.

From Kangwon Province, east of Seoul, radio reports said that 26 persons in the Province had been killed, with two others feared dead.

More than 1,000 houses were washed away or destroyed, and 5,600 flooded in Seoul and the two Provinces. Railway lines connecting Seoul with eastern parts of South Korea were washed away or blocked by landslides in many places.

President Park Chung Hee ordered troops stationed in the Capital to take part in rescue work.

(*The New York Times*)

[Prev. ref. 4726:KRS:A]

LAOS

A. Paris Meeting Of Faction Leaders: Leaders of the Rightist, Neutralist and the Pathet Lao factions met in Paris in the third week of September. [For background see page 5996]. The venue itself was decided after prolonged negotiations.

Before the leaders of the three groups met round the conference table, the neutralist Prime Minister, Prince Souvanna Phouma, had separate talks with the other faction leaders. The talks, however, failed to bring about national unity.

A joint *communique* issued on September 21 at the close of the talks said that leaders of the three factions had agreed on a three-point agenda for tripartite talks to settle their differences and protect Laotian neutrality.

The three points were: a cease-fire; the reconvening of the 14-nation conference of Laos; a Laotian Government of National Union.

The Pathet Lao turned down the conditions proposed by the Neutralist and Right-wing factions for reconvening the 14-nation conference.

Without stating what these conditions were, the communique said that the representatives of the three leaders would meet shortly to thrash out the question.

The communique was signed by Prince Souvanna Phouma, Neutralist Prime Minister, Prince Souphanouvong, leader of the Pathet Lao, and Prince Boun Oum, chief of the Right section.

Earlier, Prince Souvanna Phouma in an opening address appealed to all factions "to bury their differences" so that Laos might no longer be subject to international bargaining."

He urged them to join forces to pull down barriers standing in the way of reconciliation and a new 14-nation conference to guarantee Laotian sovereignty, independence and neutrality.

He returned to Vientiane on September 23. To assembled diplomats at the airport he said the Paris talks were not at all constructive.

He said that at the talks they had agreed to discuss a cease-fire convocation at a Geneva conference but the "stumbling block" was certain conditions put forward by himself. "The question is whether there should be a Government delegation or a party delegation for Geneva. My point of view is a Government delegation, but the obstacle is that the Pathet Lao does not recognize the present Government. I think the Pathet Lao is wrong."

The Pathet Lao had refused to recognize the changes in the Government since the April 19 Rightist coup.

Prince Souvanna Phouma justified his argument by explaining that the Government still carried out the policy of neutrality as under the Zurich Agreements.

He noted that though the Government was formed under the tripartite Plain of Jars agreements of 1962, after its formation it must come under the Laotian Constitution.

The King had ratified the recent Government changes.

(*The Times*, London and *The Times of India*, Bombay)

[Prev. ref. 6045:LAO:A]

LEBANON

A. Development Of Merchant Fleet: It was stated on September 18 that the loss of traditional Arab outlets for Lebanese produce and the consequent need to open up new markets had led to an urgent demand by the Fruit Office for better shipping facilities.

A Bill authorizing the Government to participate to the tune of £L6,000,000 in the capital of the Lebanese Shipping Company had been presented to the Council of Ministers. (£L8.6=£ sterling.)

The State's investment will take the form of a 10-year loan to be disbursed in several instalments according to the Company's needs, the first repayment falling due at the end of the seventh year. The Government will also guarantee the Company with the Bank of Lebanon. In return, the State will be granted priority in the use of the Company's ships and a regular service between Lebanon and the coast of West Africa will be inaugurated for the export of fruit. The number of annual trips on this route must not be less than four and the ships operating on it must have refrigerated holds.

The Government is to contribute £L300,000 to the establishment of a naval training school which, although run under the aegis of the Ministry of Defence, will also train personnel for the merchant navy.

In addition to the improvement projects already mounted for Tyre, Sidon, and Tripoli, the port of Jbeil is to be developed to handle increased tonnage while at the same time preserving its historic attraction for tourists. Matters requiring urgent attention to enable greater use to be made of the port are the lighting of the harbour and the building of storage and administration buildings. In the interests of tourism, parks are to be laid out and fishing facilities improved.

With, therefore, some prospect of enhanced shipping resources to support its claims, an official trade mission is shortly to visit Africa to promote the sale of Lebanese fruit. Local branches of the Fruit Office may be opened in some of the countries visited, particularly where the trade is in the hands of Lebanese expatriates. The recent visit of a Canadian trade mission to Lebanon resulted in the first purchases of Lebanese citrus fruits which have been popular with Canadian consumers. With the introduction of a fleet of refrigerated ships into the Lebanese merchant fleet, the expansion of the Canadian trade will also be possible.

(*Middle East Economic Digest*, London)

MALAYSIA

A. Complaint Of Indonesian Aggression—Security Council Meeting: The UN Security Council discussed at its meetings held on September 9, 11, 14, 15 and 17 a complaint by Malaysia that Indonesia had committed aggression on her territory.

It failed to adopt a resolution and the question remained on the agenda of the Council. However, Malaysia considered that it had scored a moral victory in the Security Council on September 17 when nine of its 11 members voted for a Norwegian resolution deploring the landing of Indonesian parachute troops in Johore on September 2 and calling on the parties concerned to "respect the territorial integrity and political independence of each other."

However, the resolution was not adopted because Russia vetoed it. The other negative vote came from Czechoslovakia.

Speaking immediately after the division, Mr. Adlai Stevenson (United States) said the latest Soviet action was inconsistent with the principles enunciated by Mr. Khruschev in December, 1963 when he declared that the use of force against a neighbouring country was in no circumstances justifiable.

Sir Patrick Dean (United Kingdom) said he had viewed with sorrow and foreboding the Russian veto of a "moderate and pacific resolution to which no member-State of United Nations could properly object."

This action appeared to amount to a denial of protection to a member-State, to which all member-States were entitled. Also, it prevented the ending of an undeclared war which had grave implications for the peace of South-East Asia. The Soviet vote amounted to ignoring the facts of the case.

Sir Patrick said that in spite of this the Security Council had clearly indicated its view, and had not done with the matter. It must continue to watch events and be ready to intervene again if circumstances were justified.

Earlier in the proceedings, first France and then Morocco and the Ivory Coast said that they would support the Norwegian initiative. At one point Morocco asked for, and obtained, a recess of the Council for half-an-hour, during which it tried to bring about some changes in the draft resolution, but without success.

The two African members admitted that they were in some difficulty in this dispute between two Asian countries, the continuance of which could damage Afro-Asian solidarity. They therefore emphasized the need to re-affirm the territorial integrity of the parties concerned and to call for the creation of an atmosphere conducive to a resumption of peaceful negotiations.

Dr. Sudjarwo (Indonesia) had made it clear that the resolution was unacceptable to his country. He termed the deploring of the incident of September 2 one-sided.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

while the insistence on respect for territorial integrity was in his view not realistic.

For Russia, Mr. Platon D. Morozov said that his vote had been based on the fact that Indonesia had rejected the motion. He re-iterated that in the Soviet view Indonesia was struggling against neo-colonialism.

After the division, Dato Ismail (Malaysia) expressed his country's relief at the near unanimity of the Council's verdict. Malaysia welcomed the Council's call to renew talks, but she welcomed even more its insistence on the prior establishment of an atmosphere conducive to such talks.

The upshot of the deliberation of the Security Council, he claimed, was a clear decision in favour of Malaysia, and a warning to Indonesia against continuing her aggression against her neighbour.

[Prev. ref. 6045:MAL:A]

MALDIVES

A. Complaint Against British Officers Rejected: There was a categorical denial in London on September 15 from the Commonwealth Relations Office of the accusation, reported on September 14 from Colombo, that British officers were "intimidating Maldivian workers" engaged in construction work on the staging post on Gan Island.

According to the reports, the Maldivian Government had asked the British Government to ensure that the alleged intimidation should cease, and alleged that British officers were intimidating the workers to create dissension between them and the Maldivian Government.

A London despatch said this was not the first time that "somewhat wild complaints against British actions in the Maldives have come from those remote atolls via Colombo."

"The explanation lies, largely at least, in understandable but chronic suspiciousness on the part of the leaders of an under-developed territory, who have throughout felt themselves much at a disadvantage in negotiating with the British Government. Their suspicions have been all too easily aroused, at least since March, 1959, when the inhabitants of the Addu Atoll at the southern end of the Maldives broke with the Maldivian Government at Male, the capital, and set up a Suvadive Republic of their own.

"Gan Island, the RAF staging post, which has once more come into prominence now that re-inforcements have been sent by air to Singapore, is a tiny strip of coral island in the Addu group, and the British Government were suspected at the time of the Suvadive Republic to have encouraged the formation of the Republic in order to get easier terms for themselves. Something of this suspicion has remained although the British Government agreed last September in effect to back the Maldivian Government in their dispute with the inhabitants of the Addu group.

"Since then, the leader of the Addu revolt, Mr. Afif has been removed at his own request to the Seychelles, and the Maldivian Government has accepted as its representative in the Addu group a brother-in-law of Mr. Afif. Meanwhile, negotiations for a new agreement between the British and Maldivian Governments have continued and appeared during the Summer to be making satisfactory progress.

"Mr. Sandys, the Commonwealth Secretary, said on June 23 that the British Government were willing to revise the existing Agreement of February 14, 1960, to enable the Maldive Islands to become a fully independent sovereign State, on the understanding that the rights and facilities enjoyed at present by the British Government in Addu Atoll would be confirmed and that no military rights and facilities would be accorded to any other country."

(*The Times*, London)

NEPAL

A. American And British Arms Aid—Dr. Tulsi Giri's News Conference: The Chairman of Nepal's Ministerial Council, Dr. Tulsi Giri, said at a news conference in Khatmandu on September 28 that American and British arms aid would start coming into Nepal from October, 1964, indicating that they were already on the way.

A statement describing the achievements in home and panchayat administration was distributed at the news conference, but Dr. Giri spoke mainly on new land reform measures incorporated in a comprehensive amending Bill expected to be passed by the National Panchayat shortly.

The Bill aims at putting a ceiling on the total land holding per family. It was stated that the new measure would be implemented by a separate Land Reforms Ministry.

Replying to questions on the Cairo Non-aligned Conference, he said that he agreed with the Indian Foreign Minister's view that no bilateral dispute should be raised at the Conference.

Asked about Nepal's reaction to the Indian Premier, Mr. Lal Bahadur Shastri's statement that the general question whether the use of force to change territorial boundaries was justified could be raised, he said that Nepal could comment on it only after seeing the actual wording of any resolution on this issue.

(*The Statesman*, New Delhi)

[Prev. ref. 5177:NEP:A]

B. "Mount Everest" In Nepalese Territory—Mr. K. Bisht's Claim: The Foreign Minister, Mr. Kirtinidhi Bisht, told the National Panchayat during question hour on September 24 that "*Mount Everest*, the world's highest peak, is within Nepal territory, according to the latest Sino-Nepal Agreement".

Mr. Bisht's statement was in reply to misgivings voiced in a section of the Soviet and Indian Press about Chinese claims to Everest in maps attached to their school textbooks.

While Nepal's Government-owned **Rashtriya Samvad Samiti** (news agency) had nothing more to report on this subject, it appeared that the Sino-Nepalese Boundary Agreement of 1961 shows Everest in Nepal territory.

Mountaineering expeditions trying to scale the peak from the south have to obtain the Nepal Government's permission.

(*The Times of India*, New Delhi)

[Prev. ref. 3398:CHI:A]

C. International Tele-communication System Inaugurated: The inauguration on October 1 of Nepal's new international tele-communication system marked the end of the arrangement for use of the Indian Embassy telegraph office for wireless communication with India and foreign countries.

Nepal was first connected with the telegraph system with India some time in the last century by the British when they set up a post office in the British Embassy in Khatmandu. With the establishment of the Indian Embassy in Nepal the post office was also taken over by the Embassy. Wireless and telephone links between Khatmandu and Patna were set up in January, 1950. To cope with the increased volume of traffic another wireless link was set up with Patna. This was followed by two more wireless links between Khatmandu and New Delhi.

The Government has now set up a telegraph office in the Capital.

The inauguration of the new tele-communication system followed an Agreement between India and Nepal on June 25, 1963 under which India agreed to help Nepal set up her own international tele-communication system.

During the last 14 years the Indian Embassy telegraph office was the only link between Khatmandu and the outside world. The facilities available there were offered to all—the public and the Government agencies and foreign legations.

In 1956, when Nepal joined the Universal Postal Union, the Government decided to establish its own postal and tele-communication links with the outside world.

(*The Times of India*, New Delhi)

[Prev. ref. 5929:INI:F]

D. Land Reform Measures: According to a Khatmandu despatch on October 1, agricultural lands held by a family in excess of 25 bighas in Nepal will be taken over by the State and redistributed among landless tenants under a new land reform measure before the National Panchayat.

The landless tenants constitute about 35 per cent of those engaged in agriculture.

Dr. Tulsi Giri, Chairman of the Council of Ministers, said that tenants who acquire ownership rights over the land would have to pay 25 per cent of their produce to the State.

He said the entire programme would be implemented within five years.

For determining sizes of holdings, a family would be treated as consisting of husband and wife and dependent children. In the case of those who have more than one wife—bigamy and polygamy had been common in Nepali society until three years ago—each additional wife could hold 25 bighas besides the husband's holding. The first wife would not be entitled to this privilege.

The proposed ceiling will apply only to the terai (plains). Varying ceilings will be fixed for Khatmandu Valley and other hill areas.

(*The Statesman*, Calcutta)

[Prev. ref. 5428:NEP:C]

E. Dr. K. I. Singh's Appeal Dismissed By Supreme Court: A Division Bench of the Supreme Court of Nepal dismissed on October 4 a *habeas corpus* petition filed on behalf of Dr. K. I. Singh, a former Premier.

The Court held that the writ of habeas corpus did not lie after his conviction.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Dr. Singh was convicted and sentenced to two years' imprisonment and fined Rs. 2,000 by a special three-man tribunal headed by a Khatmandu magistrate on charges of sedition on August 5.

The petition was filed in the Supreme Court on August 4.

The Division Bench consisted of Mr. Justice Ratna Bahadur Bista and Mr. Justice Dhanendra Bahadur Singh.

On the question of jurisdiction of the special tribunal to try Dr. Singh, which the petition had challenged, the Court ruled that this was outside the scope of habeas corpus writ and could be brought only under a writ of certiorari. On superficial scrutiny, the Court held that the tribunal was properly constituted.

Referring to the allegation of irregularity in the detention of Dr. Singh prior to trial by the tribunal, the Court observed that since the matter had been regularized when Dr. Singh was brought before the tribunal, even if there had been any initial irregularity the Court could not take cognizance of it.

Dr. Singh was not produced in the Court.

PAKISTAN

SUMMARY: President Sukarno's Visit; Sinkiang-Gilgit Road Link; Heavy Industry Board Set Up; Economic Review; Balance Of Payments Position.

A. *President Sukarno's Visit:* President Sukarno of Indonesia arrived in Karachi on September 19 on his way to Rawalpindi for talks with President Ayub Khan.

During his brief halt at Karachi airport, he told newsmen that there could be no peace in the world and no prosperity for mankind so long as imperialism and colonialism and domination of man by man and nation by nation were allowed to exist.

In Rawalpindi, where he arrived later in the day, he was welcomed by President Ayub Khan.

President Sukarno's talks with President Ayub Khan lasted 70 minutes. They surveyed several world problems, including the issue of Kashmir.

The Communique:

The following *communique* was issued in Rawalpindi on September 19 after the talks between President Ayub Khan and President Sukarno:

"At the invitation of the President of Pakistan, His Excellency Field-Marshal Mohammad Ayub Khan the President of the Republic of Indonesia, His Excellency, Dr. Sukarno, paid a visit to Pakistan on September 19 and 20, 1964.

"The President of Indonesia and the President of Pakistan availed of this opportunity to exchange views on Pakistan-Indonesian relations, problems of Asia in particular and the world situation in general.

"The two Presidents noted with satisfaction the growth of close, fraternal relations between the two countries. They affirmed their belief that further strengthening of these ties will promote the cause of stability and peace in the region.

"The two Presidents regretted the fact that the dispute between India and Pakistan over Kashmir had not been resolved and continued to pose a threat to peace in this region. They called for an early solution of this dispute in accordance with the wishes of the people of the State as envisaged in the resolutions of the Security Council which both India and Pakistan had accepted.

"The two Presidents discussed various aspects of the dispute between Indonesia and Malaysia. The President of Pakistan expressed deep concern over the deterioration in Indonesia-Malaysia relations and expressed the hope that a way may be found that would lead to an early settlement of this dispute through peaceful means, preferably through the Afro-Asian Conciliation Commission.

"The two Presidents expressed concern at the recent developments in Indo-China. They were of the view that early efforts should be made to resolve it by negotiations in the interest of peace and tranquillity of the region.

"The two Presidents deplored the continuance of disputes and dissensions among Asian countries which cause instability, frustrate their economic development and open the door to foreign intervention. They expressed the hope that these countries would recognize the need for composing their differences in their own interest.

"The two Presidents reviewed some of the issues which might come up before the Afro-Asian Conference and agreed that continued collaboration between Pakistan and Indonesia would not only contribute to the success of the Conference but would also promote the cause of Asian solidarity and world peace.

"The two Presidents felt that there should be wider collaboration between the two countries in the economic and cultural fields.

"They agreed that in view of their common interests they should pursue vigorously the task of establishing close co-operation in such spheres along the pattern set by the Regional Co-operation for Development between Pakistan, Iran and Turkey in which the President of Indonesia expressed keen interest."

Dr. Sukarno left Karachi on September 20.

(*Dawn*, Karachi)

[Prev. ref. 5359:PAK:B, 6008:PAK:B]

B. Sinkiang-Gilgit Road Link: Pakistan's plans for an all-weather road link between the *interim* Capital of Rawalpindi and China *via* the old caravan route between China's Sinkiang Province and Gilgit, in Karakoram, were disclosed in Karachi on September 30 by the Works Minister, Rana Abdul Hamid.

In an interview to the Associated Press of Pakistan, he said the Chinese had already completed their portion of the road up to the last Chinese border post.

On the Pakistan side, he said, a new all-weather road between Rawalpindi and Gilgit would be in use by next Summer. A rough road suitable for jeeps from Gilgit to Baltit, in Baltistan, was being surveyed for rebuilding.

It was hoped that the 100-mile pony track, once used by caravans crossing to and from China, which runs from Baltit to the border, would also be converted into a road by next Summer.

He said that besides providing a link with China, the new road planned between Rawalpindi and the isolated mountain area of Gilgit would provide supplies to the Karakoram State.

For most of the year, food had to be flown in over one of the world's most tortuous air routes, and 130 American and European planes had to be brought in earlier this year for an emergency airlift of food and other supplies.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5788:INI:C]

C. Heavy Industry Board Set Up: It was stated on October 1 that a Heavy Industry Board had been constituted by President Ayub Khan to manage the heavy complex industries and mechanical, chemical and industrial sectors to be set up by the West Pakistan Industrial Development Corporation (WPIDC).

The Board, headed by the Chairman of the WPIDC, Lt-Gen. Iftikhar Ahmad, includes one representative each of the West Pakistan WAPDA, the Pakistan Western Railway and the WPIDC.

Disclosing this to a team of newsmen, Lt.-Gen. Iftikhar Ahmad said that the Board had been set up to ensure a foolproof check against duplication of efforts and haphazard establishment of heavy industries in the Province.

He said that since emphasis in the Third Five-Year Plan would be on the setting up of capital goods industries for which the private sector was already negotiating, the WPIDC had been charged by the Government with the task of establishing machine tool industry, heavy mechanical industry and heavy electrical industry.

The Board, he said, was formed at a high-level meeting, presided over by President Ayub Khan, for proper co-ordination among the three organizations concerned. With these industries, the Board would look after the requirements of the WAPDA, the Railways and other mechanical and electrical complex industries and co-ordinate their efforts for further expansion. It would not in any way damage the interests of identical units in the private sector.

Explaining the heavy industry programme of the Corporation, he said that the organization would arrange for feasibility reports, conclude agreements with consultants and prepare and submit schemes pertaining to those industries to the National Economic Council for approval. The Board would also work out the requirements of the public and private sectors in each industry and then formulate suitable plans. He emphasized that the new arrangement was in the best interests of the industrialists, because it would ensure the operation of private and public sectors as complementary organs rather than competitors or rivals.

He said the machine tool scheme of the West Pakistan Industrial Development Corporation was already in progress and land for it had been acquired near Karachi. The requirement of machinery for the factory were being finally scrutinised and orders for supply would be placed within the next three months.

In the field of mechanical heavy industry, negotiations were going on with firms in West Germany and Japan.

He said the German, British and Japanese firms were due to give feasibility reports by the middle of November about the heavy electrical complex.

D. Review Of Economic Activity In 1963-64—Federation Of Chambers Of Commerce And Industry's Annual Report: Mr. Gul Mohammed, President of the Pakistan Federation of Chambers of Commerce and Industry, said on September 30 that the economy had made definite progress during 1963-64 and the year had generally wit-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

nessed buoyant conditions and a high level of economic activity.

Presenting the annual report at the fourth annual general meeting of the Federation in Karachi he, however, warned that the tasks of economic development lying ahead were still arduous and greater efforts and struggle would be needed for the economy to reach the taking-off stage.

He emphasized that the general trend of expansion and progress in the economy was a result of some years of political stability in the country.

He noted that the gross national product had risen by more than six per cent, agricultural production went up by six per cent in 1963-64 and the industrial production by 17 per cent over the average level of 1962-63.

Regarding the progress in import trade, he said that as a result of greater diversification in foreign trade the exports estimated at Rs. 222.50 crores registered an increase over the preceding year. Due to the Bonus Scheme the contributions of manufactured goods to this performance had been encouraging. The import trade underwent further liberalization which was fully utilized for large industrial production.

Speaking about the role of private enterprise, he said that private enterprise had played a decisive role in achieving these targets and it was certain that the targets in the Second Five-Year Plan in the private sector would be surpassed by June, 1965. In certain spheres they had already been surpassed.

He, however, pointed out that the economy had not been without stresses and strains during the year under review.

He complained that the new industrial investment had suffered some set-back as a result of a rigorous tax policy. It was only towards the end of the year that the policy was amended and "made less restrictive from the point of view of capital formation and investment and re-investment". This had raised the hope that in 1964-65 there may be a high level of new industrial investment in the private sector, "although the tax policy leaves much to be desired".

He said that the tax policy in 1963-64 had also created depressing conditions in the stock exchange which had, however, now recovered from those effects with the announcement of the Central Budget for the year 1964-65.

The situation regarding local taxation continued to be a source of worry and anxiety to trade and industry.

He described the credit situation as more or less satisfactory, but added that the "middle and small business sections continued to face a paucity of credit facilities". He noted that the State Bank in its annual report had emphasized that it was the Government and not the private sector which exercised influence on money supply.

Referring to the labour situation, he regretted that the labour situation was a source of worry to industry, particularly in the East Wing of the country, "where illegal strikes in the cotton textile, jute as well as in the match manufacturing industries caused considerable fall in production and loss of foreign exchange and revenue".

Speaking about the public sector, he said that the pace of progress in the public sector remained "as usual rather slow".

The private enterprise in East Pakistan continued to face difficulties in regard to the transport and communication facilities.

While admitting that foreign aids and loans had greatly contributed to a high level of commercial and industrial activity, he pointed out that the country was still heavily dependent on foreign assistance and was also far from achieving self-sufficiency in food.

Regarding the agricultural sector, he said that agricultural production as a whole went up in 1963-64, but this was mainly due to favourable weather conditions. The main contribution to the rise was that of rice whose output rose by 18.6 per cent compared to 1962-63.

He warned that in the current year it was feared that there might be a substantial fall in agricultural production due to floods, particularly in commercial crops such as raw jute and cotton.

He emphasized that there is no doubt that on a long-term basis agricultural production was lagging behind industrial development.

(*Dawn*, Karachi)

[Prev. ref. 6073:PAK:B]

E. Balance Of Payments Position: Information released in Karachi on September 27 said that Pakistan's balance of payments for the quarter ended March, 1964 showed a current account deficit of Rs. 14.29 crores.

Compared to the previous quarter, receipts at Rs. 104.23 crores increased by Rs. 7.49 crores and payments at Rs. 118.56 crores decreased by Rs. 9.43 crores. The relative improvement of Rs. 16.91 crores was, therefore, attributable both to increase in receipts and decrease in payments.

Export receipts at Rs. 68.75 crores showed an increase of Rs. 17.34 crores and Rs. 4.30 crores compared to the previous quarter and the corresponding quarter of 1963.

Imports (excluding aid-financed) at Rs. 76.84 crores showed an increase of Rs. 1.08 crores from Rs. 74.96 crores in the preceding quarter. Aid-financed imports at Rs. 19.10 crores during the quarter were lower by Rs. 11.83 crores than the previous quarter.

Invisible Account (excluding official donations) continued to be in deficit. The deficit in this quarter had narrowed to Rs. 6.20 crores from Rs. 7.65 crores in the preceding quarter.

Official donations representing utilization of foreign aids and credits at Rs. 20.65 crores were lower by Rs. 11.28 crores than the previous quarter.

On the Capital Account "Direct Foreign Investment" (cash only) amounted to Rs. 0.42 crore as compared to Rs. 0.08 crore in the previous quarter and Rs. 0.05 crore in the corresponding quarter of 1963.

"Loans and Long-Term Obligations" at Rs. 32.80 crores were higher than the previous quarter (Rs. 27.90 crores). "Contractual Repayments" at Rs. 2.94 crores during the quarter compared with Rs. 1.06 crores in the preceding quarter and Rs. 2.20 crores in the corresponding quarter of last year.

During the quarter, Pakistan recorded surpluses of Rs. 11.53 crores with other sterling area countries (Middle East, Far East and elsewhere), Rs. 1.01 crores with Latin America and Rs. 15.18 crores with other countries.

There were deficits of Rs. 16.82 crores with USA, Rs. 8.39 crores with UK, Rs. 9.46 crores with Western Europe and Rs. 7.34 crores with Japan.

In aggregate, the surplus with sterling area was Rs. 2.60 crores and deficit with non-sterling area of the order of Rs. 16.89 crores.

(*Dawn*, Karachi)

[Prev. ref. 6073:PAK:B]

F. Export Quota For Tea: The following Press Note on export quota for tea was issued in Rawalpindi on September 18:

"When the tea policy for the year 1964-65 was announced by the Government in June last, no export quota was fixed because an accurate estimate of the crop could not be made before August and it was decided that the position would be reviewed by the end of August, and, if a clear surplus was available after meeting all internal requirements, an export quota would be announced in September.

"This review has now been made. Production of tea in the current year up to the end of August was five million lbs more than in the corresponding period last year and two million lbs more than in 1961 when the total output amounted to 59 million lbs, the highest production since Independence.

"Due to favourable weather conditions in the tea growing areas, it is expected that there will be a new record crop of 61 million lbs or more during the current season, which will leave an ample surplus for export after meeting all domestic requirements.

"However, to enable the existing carry-over stocks of the tea in the country to be increased further, the Government has decided to fix a conservative export quota of four million lbs only for the current season. This tea will be exported through separate export auctions to be held at Chittagong except one million lbs which the producers will be allowed to export on consignment basis."

(*Dawn*, Karachi)

[Prev. ref. 5947:PAK:C]

G. Supreme Court Sets Aside Notification On Jamaat-i-Islami: The Supreme Court, by a majority judgment on September 25, held the notification declaring the Jamaat-i-Islami an unlawful organization as "illegal and void".

The Court ordered the cancellation and withdrawal of the notification banning the Jamaat-i-Islami. The Court allowed the appeal of Syed Abdul A. Maudoodi against the judgment of the West Pakistan High Court and dismissed the appeal of the East Pakistan Government against the judgment of the East Pakistan High Court.

The Governor of West Pakistan on September 28 withdrew the notification issued on January 6 declaring the Jamaat-i-Islami an unlawful association.

A Gazette (Extraordinary) said: "The Governor of West Pakistan is pleased to cancel and withdraw with immediate effect Home Department Notification No. S. O. SPL-2(2)/64 dated January 6, 1964, issued under the provisions of Section 16(1) and 17-A(1) of the Criminal Law Amendment Act, 1908 declaring: (1) the Jamaat-i-Islami as an unlawful association; (2) notifying certain places as being used for the purposes of the said Jamaat-i-Islami."

(*Dawn*, Karachi)

[Prev. ref. 6001:PAK:C]

H. Student Unrest In East Pakistan: The police fired tear-gas shells in Dacca on September 17 to disperse students when they brought out a procession in observance of "Education Day".

Earlier, the students had assembled at Dacca University campus to hold a meeting in support of their 22-point demand.

The procession was taken out after the meeting. When it reached Dacca Medical College Hospital gate at about noon, steel-helmeted police obstructed them and asked the processionists to disperse.

The police then fired tear-gas shells on the processionists and dispersed them. The students took shelter in the nearby Hospital and the Arts building of the University.

CC-0.In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

In observance of Education Day the students boycotted their classes. They wore black badges and hoisted black flags on all educational institutions in remembrance of September 17, 1962, when two students lost their lives in police firing during demonstrations against the Education Reforms Commission Report.

After the incident the police rounded up some students as well as members of the public. Steel-helmeted police were also deputed to some strategic points, including the University campus and educational institutions.

In the evening, however, the situation improved and no untoward incident took place anywhere in the town.

Education Day was also observed in Jessore. All educational institutions and colleges remained closed and a procession was taken out by students who paraded through the main roads of the city.

A **hartal** was observed in Khulna as part of the Province-wide Education Day to press their 22-point programme. Students boycotted their classes and brought out a peaceful procession which paraded through the main streets of the town shouting slogans in favour of their programme.

Later in the evening a public meeting was held at the local municipal park jointly by the students and leaders of the local Opposition group.

In Chittagong also students of some educational institutions went on strike in observance of Education Day. They wore black badges and came out in processions. They also held a meeting at Jinnah Park under the presidentship of Mr. Abdul Mannan, President of the East Pakistan Students' League.

The meeting passed a resolution demanding release of students under detention. In another resolution, full support was extended to the 22-point "charter of demand" of the students.

Student demonstrations were also held in Kushtia, Rangpur, Faridpur and other towns.

Another Clash In Dacca:

At least 46 students were injured as a result of exchange of lathi-charge and brickbatting between the police and the striking students in Dacca on September 19.

On the third consecutive day the students clashed with the police. The injured students were later removed to the Dacca Medical College Hospital.

A group of students reportedly cut the railway signal lines and attempted to remove railway sleepers. A goods train was brickbatted, damaged partially and held up for a long time, with the result that train services between Dacca and rest of the Province remained disrupted.

A large crowd of people also joined the students in brickbatting and shouting slogans.

The police fired many tear-gas shells, trained hoses of coloured water on them from a riot-van and resorted to lathi-charge on the mixed crowd in an effort to disperse them. The crowd also attacked the police many times with stones.

The exchange of brickbatting and tear-gas shells continued for a considerable time in front of the Dacca University, Medical College, and at Nazimuddin Road.

The situation, however, became normal in the evening following the withdrawal of police from the important points in and around the University campus.

The train service between Dacca and rest of the Province was resumed in the afternoon after more than five hours' interruption. The goods train which was stopped at a point near the University by the students was taken to Dacca station under police guard.

(*Dawn*, Karachi)

[Prev. ref. 6074:PAK:C]

I. **Karachi Students' "Demands Day" Demonstrations:** Karachi students on September 17 observed "Demands Day" by holding meetings at various colleges and urged the Government to fulfil their long-standing demands.

Speakers at these meetings paid homage to the student martyrs who had died in East Pakistan two years ago in the nation-wide struggle for the repeal of the three-year degree course.

In various resolutions passed at the meetings they reminded the authorities that City students had remained peaceful in the past and expressed the hope that the Government would take a realistic approach and accept their genuine demands.

The main gatherings were held at the Islamia College and the Government College, Nazimabad.

In a resolution passed at the Islamia College the students urged the Government to release the arrested students and withdraw expulsion, rustication and arrest orders in East Pakistan. They also demanded repeal of the University Ordinance and restoration of "autonomy" of educational institutions.

At the other meeting held at Government College, Nazimabad, they asked the authorities to solve the problem of Karachi students by opening a new medical college, allowing M.A. and M.Sc. classes in colleges and establishing an Engineering University. They pledged to continue the struggle till their demands had been met.

An appeal for the acceptance of East Pakistan students' demands was made in a joint statement issued by five city student representatives.

Section 144 Enforced In Karachi District —Opposition's Criticism:

The District Magistrate of Karachi on September 27 imposed Section 144 of the Criminal Procedure Code in the District of Karachi for two months.

An official handout said: "The District Magistrate of Karachi, Mr. Amjad Ahad Sheikh, has imposed Section 144 Cr P.C., with immediate effect in the Karachi District for a period of two months, thereby prohibiting the holding of any meeting, the assembly of five or more persons for any purpose, or taking out of any procession in any public place, or the forming, joining or being a member of any procession or demonstration or carrying of fire-arms within the limits of the District of Karachi, except with the written permission of the District Magistrate of Karachi.

"This action has been taken because of student unrest. A situation has arisen within the District of Karachi which is likely to endanger human life and disturb public peace and tranquillity.

"This order shall remain in force for a period of two months unless rescinded or modified earlier, and shall not apply to bona fide religious functions, weddings and funeral processions. The order shall also not apply to police, military personnel and civilian officers detailed on duty."

A meeting of the workers of the combined Opposition parties in a resolution on September 27 expressed "surprise and shock" over the imposition of Section 144 in the City.

The meeting, which was presided over by Mr. Z. H. Lari, appealed to the people of Karachi to observe peacefully the Protest Day on September 29.

The meeting felt that the party in power was using all possible means and methods to discourage political activity of the people and not to let them utilise the constitutional method of change in the Government through the election campaign.

The resolution impressed that there was no such law and order situation prevailing in the City.

(*Dawn*, Karachi and *The Times of India*, Bombay)

[Prev. ref. 4879:PAK:E]

SYRIA

A. **Ex-President Adib Shishakli Shot Dead In Brazil:** A former President of Syria, Mr. Adib Shishakli, was shot dead in a street in Ceres Goiaias State in Brazil on September 28 by a dark-haired youth who had lunched with him earlier in the day.

The Brazilian news agency Meridional reported that a State-wide manhunt had been launched for the killer, who had been described by the police as a stranger to the district. It was believed that the killing was for political motives.

Mr. Shishakli had been living in Brazil for several years. He seized power in Syria in 1951, but was ousted by a coup d'etat in February, 1954. He went into exile and a year later, in 1955, was sentenced in his absence to 20 years' rigorous imprisonment on a charge of torturing a Syrian Army sergeant to death.

In February, 1957 and again a year later he was tried—in his absence—with others by a military court in Damascus on a charge of plotting to overthrow the Syrian regime and both times was sentenced to life imprisonment.

Sudanese security police detained ex-President Shishakli on his arrival at Khartoum airport in November, 1960, shortly after President Nasser of the United Arab Republic flew in on a 10-day visit. They held the former Syrian leader overnight until he took off for Rome.

He was reported then to be on his way to Brazil.

(*Dawn*, Karachi)

THAILAND

A. **Foreign Assistance:** Foreign aid is playing a major part in Thailand's economic development.

Earlier loans were not inter-Government arrangements, but credits obtained by the Thai Government in the private international capital market. Recent loans have been entirely Government-to-Government or from international agencies.

Proceeds of the earlier loans were not restricted to specific projects and could be used for general revenue purposes. Recent loans and grants have financed specific projects and have not been available for general Government use.

The "great depression" put an end to the flow of private investment into Government bonds to help finance public utilities and transport systems. It also stopped private companies' investments in public utility systems in most less-developed countries, although this type of investment was never very important in Thailand, the Deputy Minister of National

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Development, Mr. Nai Burchana Atthakor, said a few years ago. (It must be borne in mind that, while loans from the World Bank are not classified as private investment, private enterprise does subscribe to Bank loans.) Thailand has, therefore, since World War II, received all capital imports for power, transport, and other economic infrastructure investments through loans and grants from other Governments and from international agencies.

It also means that most of the assistance has been in the form of specific projects, and that the lenders have had to be convinced of the soundness of each project before the assistance has actually been made available.

The fact that the World Bank, for example, cites the limited number of adequate project proposals as the major factor limiting its lending rate, indicates that potential borrowers have not been making the kind of thorough analysis needed to ensure that the proposals were really sound. As a result, the application of economic criteria by the lenders on a project-by-project basis took the place of economic planning, which began in Thailand only very recently.

Limitation of foreign assistance to specific projects, therefore, benefits Thailand by ensuring that her investments are sound.

The list of sources and amounts of aid adds up to an impressive total. Yet in some ways, this assistance is less important than at first appears since it goes into specific projects. All the same, it has been a valuable factor in the recent development of the country. This apparent contradiction has been explained by the Minister as follows:

"The list of capital projects completed and under construction which have been financed with foreign assistance includes: major improvements in power, irrigation, and transport facilities—the Chainat Dam, the Yanhee project, the Mae Moh lignite mine and power plant, the railway rehabilitation and improvement programme, the Makasan repair shop, power installations in Bangkok, the Friendship and East-West Highways, 1,000 bridges in the bridge replacement programme, the water tanks in the north-east, Bangkok port facilities, the tele-communications system, aeronautical installations, and airport improvement.

"These projects have provided important elements in the nation's economic infrastructure, contributing to increased production, for example, by putting water on the land, and providing the means to transport the resulting increased production to market.

"In addition, we have had numerous technical assistance projects covering almost every aspect of the economy—projects in agricultural experimentation; livestock disease control; malaria eradication; village sanitation; vocational, general, and university-level education; irrigation, groundwater and mineral exploration; economic planning; Government fiscal management; and industrial surveys. Last, and certainly not least, the studies of the development of the Mekong, a project that may well be the most international development endeavour yet launched anywhere in the world, considering the large number of nations that are contributing experts and material for the study of this great river basin.

"This long list of projects of every conceivable type implies that foreign assistance has been a critical element in our recent development. Yet the fact is that in 1959—to take a year when we received considerable assistance—it amounted to only one-fourth of one per cent of our gross national product. The physical investment financed by this aid amounted to roughly 15 per cent of total investment expenditures in the economy, as estimated by the Office of National Income."

TURKEY

A. Pardon For Four Members Of Menderes Regime: President Cemal Gursel pardoned on September 22 four prominent members of the deposed Menderes *regime* who had been in prison since the *coup d'etat* of May, 1960.

President Gursel used the powers he holds under the Constitution to pardon the men on grounds of ill-health.

The four were: Mr. Refik Koraltan, former Chairman of the Grand National Assembly; General Rustu Erdelhun, Chief of Staff at the time of the Menderes Government; Mr. Nedim Okmen, a former Minister of Agriculture; and Mr. Selim Yatagan, a former deputy. All were sentenced in September, 1961 to life imprisonment, except Mr. Okmen, who was sentenced to 20 years.

Another 63 leaders of the deposed regime are still in prison at Kayseri, central Turkey, including Mr. Celal Bayar, the former President of the Republic, who is over 80 years of age.

The possibility of release of all the remaining political prisoners of the former regime was officially indicated in August It was expected that the release would take the form of an administrative act, thus obviating the need for an Amnesty Bill which the Army would probably reject.

(*The Times*, London)

[Prev. ref. 5313:TUR:A]

VIET-NAM (DR)

A. Another Clash In Gulf Of Tonkin: Another clash between American and North Viet-Nam ships in the Gulf of Tonkin was announced on September 18 by the US Secretary of Defence, Mr. Robert McNamara.

He said that the incident took place at night, and according to preliminary reports there had been no damage or loss among American ships and crews.

Unofficial news of the incident was available some time before the official announcement, which was apparently delayed because of distorted signals from the naval commander. It was said that the American ship, or ships, had clashed with North Viet-Nam motor torpedo boats during bad weather in the general area where US destroyers were attacked in August.

The Defence Department said that all reports were being investigated and that nothing more would be said until the investigation was completed. However, it was afterwards made known at the Department that the American ships opened fire on unidentified craft assumed to be North Viet-Nam torpedo boats. The fire was radar-directed because of fog and poor visibility. It was not disclosed whether the American vessels had been under actual attack.

Earlier clashes in the Gulf took place on August 2 and 4 (see page 6032). In retaliation President Johnson ordered naval air strikes against four torpedo-boat bases and an oil storage depot.

President Johnson won Congressional support for his determination to repel further attacks, and he is now in a position to retaliate immediately should he so decide. Substantial Army, Navy and Air Force re-inforcements were also sent to South-East Asia, where they presumably remain.

A statement by the North Viet-Nam Foreign Ministry said that at 22 hours on September 18, as two US destroyers sailed to a point near Nghe An, heavy explosions were heard and flashes of light and aircraft circling over the spot were seen from the shore".

The statement, the text of which was broadcast by the New China news agency, did not mention North Viet-Namese units involved.

The Foreign Ministry also denied earlier American reports that its patrol boats had again attacked US warships in the Tonkin Gulf. It claimed USA was seeking a new pretext to attack North Viet-Nam and appealed to all world Governments to check what it called a US "plot".

On September 19, North Viet-Nam demanded an immediate meeting of the International Truce Supervisory Commission (ITSC) and charged that American reports of an attack on US warships in the Gulf of Tonkin were false.

Col. Ha Van Lau, head of the Army high command's liaison mission, made the demand in an urgent message to the Chairman of ITSC.

He accused USA of acts of provocation and demanded that the Commission take measures to check "the extremely dangerous new US military adventures".

According to **The New York Times**, "the two destroyers were said to have been somewhat closer to land than the 42 miles they recorded at the time of the presumed attack."

The newspaper said: "Inconclusive reports of the daylight search of the area reached the Defence Department during the night and were said to have been reviewed by the Joint Chiefs of Staff yesterday morning."

There were, however, no further clashes in the Gulf.

(*The New York Times* and *The Times*, London)

[Prev. ref. 6032:VND:A]

B. Demand For Withdrawal Of US Seventh Fleet: North Viet-Nam demanded on September 25 the immediate withdrawal of the US Seventh Fleet from the Gulf of Tonkin.

The demand was made in a memorandum issued by the Foreign Ministry in Hanoi.

It said: "The US Government absolutely has no right to send its fleet to patrol in the Tonkin Gulf close to the Democratic Republic of Viet-Nam.

"This is an extremely crude violation of the 1954 Geneva Agreements on Indo-China and poses a grave menace to peace in South-East Asia."

It repeated the claim that eight US aircraft had been shot down during the raid on North Viet-Namese naval bases on August 5.

USA had admitted the loss of two planes.

It also repeated Hanoi's claim that the second North Viet-Namese PT boat attacks on US destroyers on August 4 as reported by Washington never took place and the news was "an impudent fabrication."

It charged that North Viet-Namese territory had been subject to air and sea bombings since July 30.

The statement said that the presence of American ships off North Viet-Nam was an abuse of the right of navigation on the high seas, in an attempt to intimidate North Viet-Nam.

The statement, challenging President Johnson's chronology of the movements of American warships in the Gulf of Tonkin, said that on July 31 and August 1 the US destroyer **Maddox** repeatedly intruded into Viet-Namese waters, and threatened and harassed fishing boats in the area."

On August 2 while sailing between Hon

CC-0. Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Me island and Lach Truong, about eight miles off the coast, "the Maddox encountered and fired on Viet-Namese patrol boats which were thus compelled to take a defensive action to drive the intruder from Viet-Namese waters."

Marshal Chen Yi's Warning:

On September 26, the Chinese Foreign Minister, Marshal Chen Yi, warned USA that it was "frivolously playing with fire" in the Gulf of Tonkin and declared that unless it ceased doing so it would "pay dearly for its dangerous attempt."

The Chinese warning was contained in a reply from the Marshal to a message received from the Foreign Minister of North Viet-Nam.

In his letter Marshal Chen Yi re-iterated the now familiar Chinese-North Viet-Namese line that actually there had been no incidents in the Gulf of Tonkin and that the United States was merely concocting stories as a pretext to attack North Viet-Nam.

Marshal Chen Yi's letter was timed to coincide with the statement of North Viet-Nam Foreign Ministry that the United States aircraft were continually intruding into the air-space of North Viet-Nam.

Meanwhile, Washington reports said that American planes were authorised to pursue attacking Chinese or North Viet-Namese planes into their borders and that the US warships had similar authority over their attackers beyond the 12-mile territorial limit claimed by the Communists.

[*Prev. ref. 6019:VND:A*]

C. **State Of Economy—Mr. Pham Van Dong's Report To National Assembly:** The Prime Minister, Mr. Pham Van Dong, has submitted to the National Assembly a report on the state of economy of the country.

According to the report, changes in the agricultural sector had shown "further consolidation of socialist economy." At present, there were 15,000 agricultural co-operatives engaged in the movement for "higher crop yield, more subsidiary crops, better animal husbandry and increase in industrial crops."

On the basis of the successful transformation of the relations of production and the development of productive forces, he said, the peasants' life had been clearly improved. The peasants' housing and dieting had been better than in the past. They had not been haunted by the horror of famine and misery like in the past. Almost all villages had their own schools, infant classes and maternity homes. Numerous villages had libraries and club houses.

Dealing with the building of industries over the past years, the Premier in his report quoted President Ho Chi-Minh as reporting at the special political conference in March that North Viet-Nam had now 1,000 factories including 250 big factories, as against 40 in 1964. Thus in the past ten years a factory had sprung up every three days.

He said: "A number of industrial centres such as Hanoi, Haiphong, Nam Dink, Hong-Quang, Thai-Nguyen, Viet-Tri, etc. ..., have taken shape and are playing a leading role in different regions of the country."...

"Along with the coming into existence and the development of industrial centres, the working class has grown up. The contingent of the workers has now increased to nearly half-a-million. Their ideological, political and professional standards have been raised with every passing day.

"The army of scientific and technical workers now totals 70,000—20,000 graduated from higher education establishments and 50,000 from intermediate professional schools' as against 100 when peace was restored in 1964."

Reviewing the implementation of the State plan for the first half of this year, he said an all-round increase had been registered in the recent Winter-Spring production. In industry, almost all major plants and those processing basic products had fulfilled their plans. Efforts had been focussed on the building of key projects, a number of which had been put into commission, contributing new production bases to the national economy.

To fulfil the 1964 State Plan in the second half of this year, he said, it was necessary to step up the emulation movement for "higher yield, more subsidiary crops, good animal husbandry and increase in industrial crops" in agriculture and the emulation movement for "higher labour productivity, better quality and economisation" in industry, and the movements in other branches with the spirit of "redoubling one's efforts" for the building of socialism.

Dealing with socialist industrialization, he said: "Socialist industrialization reflects the aspirations of the people who, under the leadership of the Workers' Party, are relying on the people's democratic State to carry out the historic task of proletarian dictatorship, and are determined to achieve a socialist revolution. It reflects the spirit of mainly relying on the people's own efforts to build an independent economy. It constitutes the immediate and long-term target of struggle and a source of enthusiasm for all strata of the people, because it will make our country prosperous and our people stronger. Socialist industrialization will strengthen North Viet-Nam in every field and make it a basis for the struggle for the peaceful reunification of Viet-Nam, on the path of building a peaceful, unified, independent, democratic, strong and prosperous Viet-Nam."

(*Consulate-General of the Democratic Republic of Viet-Nam*, New Delhi)

[Prev. ref. 5823:VND:B; 6002:VND:A]

ASIA OUTSIDE ASIA

A. **Geneva Disarmament Conference Resumed:** The 17-nation Disarmament Conference was resumed in Geneva on June 9 after a six-week recess.

The Brazilian delegate, who was in the chair, called on the Conference to agree to an immediate ban on underground nuclear tests powerful enough to be detected without an international control system. (The Moscow Partial Test Ban Treaty signed in 1963 did not ban underground nuclear tests as no agreement could be reached on methods of verification).

The US delegate, Mr. William Foster, said he had received special instructions from President Lyndon Johnson to make every effort for an early agreement to end the arms race.

He said USA did not seek inspection for inspection's sake but wanted it only to be certain that commitments were fulfilled. "We fully recognize that many nations have facilities which cannot be opened to inspection at this time. Certainly my Government has sensitive facilities of this kind, but this does not mean we cannot find a way to reconcile this need with the need for verification. Indeed, that should be one of our primary tasks."

In a message to the representatives of the 17 nations taking part in the Conference, President Lyndon Johnson said that the first steps down the road to disarmament had already been taken and added: "We must redouble our efforts until the journey is completed."

Tribute To Mr. Nehru:

Before the formal proceedings of the Conference began, delegates paid tribute to the late Indian Prime Minister, Mr. Nehru.

The US delegate, Mr. Foster, said that with the passing away of Mr. Nehru the world would miss a source of inspiration in the disarmament field. Mankind, he added, had suffered a great loss. The ideal of Mr. Nehru remained their goal.

The British and Soviet delegates joined in the tribute.

Agreement On Agenda:

On June 18, the Conference adopted an agenda for the next five weeks dealing with "collateral" disarmament measures designed to promote an international *detente*.

The items on the agenda were those upon which East-West views have a number of points in common: (1) reduced military budgets; (2) a halt to the production of fissionable materials for military use; and (3) the non-dissemination of nuclear weapons. Two other topics, to be chosen respectively by USA and USSR, would be added later.

A **communique** announcing the agreement on the agenda said that after the planned five-week period, the two co-Chairmen of the Conference could make new proposals to the Conference for a working schedule, concerning both complete and general disarmament and collateral measures.

Reduction In Military Budgets—Soviet Proposal:

The Soviet delegate, Mr. V. Zorin, said on June 25 that the Soviet Union considered the reduction of national military budgets "one of the most important problems."

He re-iterated his country's proposals of January 28 to cut overall military expenses by 10 to 15 per cent. Smaller States with lower military budgets need not come under such a heavy reduction.

On the other hand, the Soviet Union wanted part of the money saved by reducing military budgets to flow into the developing countries.

In case some big nations should find it difficult to reduce their military expense to such an extent now, the Soviet Union would be satisfied with a restricted "first step" in that direction.

He suggested as a first move a declaration by all the 17 nations at the Conference stating their general consent to cut military spendings, combined with an appeal to all other nations to follow suit. That would be his country's minimum demand.

The Rumanian delegate, Mr. Dumuresco, renewed his call for the conclusion of a non-aggression pact between "the NATO and Warsaw Pact groups as an interim measure with a view to suppressing all military blocs."

He also supported the Soviet suggestion for a reduction of military budgets.

The United States delegate suggested measures to verify and inspect a cut-off in nuclear explosives output and found immediate support from Britain and Canada. (The USA, the Soviet Union and Britain have already accepted in principle the idea of a cut-off in the production of fissionable material for military purposes).

Nuclear Vehicles' Freeze—US Proposal:

The US delegate, Mr. Clare Timberlake, said on July 9 that his proposal to freeze the production of strategic nuclear vehicles "offers genuine opportunity to halt the arms race, and the best possible foundation for further progress towards disarmament".

He said: "It would enable us to begin the actual reduction of armaments from their present levels, rather than from ever higher levels."

He explained that a freeze would also maintain the existing rough balance of power by holding quantities of missiles held by the East and West at constant levels and prevent the development and deployment of new types of such vehicles.

As proposal by USA, the freeze would cover surface-to-surface missiles of a range over 1,000 kilometres with their associated launching facilities; strategic bombers having an empty weight of 25,000 kg or greater, with associated air-to-surface missiles having a range of 100 km or greater; sea-based surface-to-surface missiles having a range of 100 km or greater (including the Polaris), together with their associated launchers; and strategic anti-missile systems.

Under the freeze, production of all such types of armaments would be halted, except as specifically agreed to provide for loss by accident, training firings and for outer space programmes.

Mr. Timberlake said the verification provisions for the freeze would be less "onerous" than for a production freeze on the entire range of armaments under general and complete disarmament. He said a verification system "can be made effective without being burdensome, and efficient without being intrusive." Details of the verification system would be spelled out at subsequent meetings.

The freeze proposal was one of five points contained in President L. B. Johnson's January 21 message to the Conference. They were:

(1) An agreement prohibiting the threat or use of force in territorial disputes;

(2) Verified freeze on the numbers and characteristics of strategic nuclear offensive and defensive vehicles;

(3) A verified agreement to stop production of fissionable materials for weapons;

(4) Establishment of observation posts to reduce the danger of war by accident, miscalculation or surprise attack; and

(5) Measures designed to prevent the dissemination of nuclear weapons to nations not in possession of them.

Nuclear Arms Cut-Off—Soviet Rejection Of US Plan:

Hopes of an early East-West agreement on cutting off the production of nuclear explosives for military use received a setback on August 13 when the Soviet delegate, Mr. S. Tsarapkin, said that the inspection provisions envisaged by USA were not acceptable to the Soviet Union outside the context of general and complete disarmament.

The verification proposed in the US working paper on a cut-off would, he said, lay open a country's most intimate defence secrets, such as type and volume of fissile material production and stockpiles—information from which its weapons output could easily be deduced.

Inspectors themselves would be equally objectionable if a cut-off were projected as a collateral measure to precede the first stage of a disarmament plan. Furthermore, once a State had acquired information under such a cut-off agreement, it could withdraw from the treaty to apply the knowledge in a manner having nothing to do with the maintenance of peace.

In advocating a cut-off accord, Mr. C. H. Timberlake (United States) had emphasized that the inspection system proposed was designed solely to provide a high degree of assurance that no significant increase in nuclear stockpiles could result from violations of the agreement. The nuclear Powers were approaching—if they had not already attained—a degree of balance and mutuality of interest which made such an agreement a logical move if action were to be taken to halt the nuclear arms race.

Russian Offer To Outlaw Nuclear Arms:

Mr. S. Tsarapkin (USSR) told the Conference on September 3 that his country was ready to sign a convention outlawing nuclear weapons immediately, if the other nuclear Powers would do the same.

He criticized the Western Powers' position on a convention banning nuclear weapons and said that agreements such as the one in 1925 banning chemical and bacteriological warfare had been respected. Consequently, he said, Western reticence on the nuclear ban was unfounded.

He re-iterated that the creation of the NATO multilateral force was the chief obstacle to an agreement on non-dissemination of nuclear weapons. "The Western Powers must stop their double game which consists of making a show of supporting an agreement on non-dissemination while supporting the creation of a multilateral force within the frame-work of NATO."

The delegates were discussing a draft convention banning nuclear weapons.

The US delegate, Mr. William Foster, warned the Conference that a general declaration of renunciation of the utilization of nuclear weapons would "move us no closer to disarmament."

He said USA rejected the proposal for such a declaration, put forward by several non-aligned countries attending the Conference, and said that the US Government would refuse to attend a special conference to outlaw nuclear weapons.

He praised India for her decision to renounce making any attempt to acquire nuclear capabilities for military purposes. The Indian decision "should be acclaimed by all of us". It was "an immense contribution to the efforts to prevent the spread of nuclear weapons to nations which do not have them."

President L. B. Johnson's Appeal:

On September 16, President Lyndon Johnson of USA urged the Conference to take additional steps for a lasting peace.

In a message marking a recess in the disarmament talks, he said war in the nuclear age was "senseless" and added: "I pledge the best efforts of which my country is capable to prevent such a war."

He expressed satisfaction with the steps taken since the current Disarmament Conference opened in 1962 and said the world was somewhat safer because of the partial nuclear test ban Agreement.

But he called on the Conference to reach agreement on other proposals including steps to prevent the spread of nuclear weapons, to lessen the danger of war by accident or surprise attack and to freeze the numbers and characteristics of strategic delivery systems.

Conference Adjourns:

The Conference adjourned for a five-month recess on September 17 after unanimously adopting a draft report on the session.

The report, to be submitted to the UN Disarmament Commission and the General Assembly, said that generally the questions before the Conference were discussed in "a thorough and concrete manner."

The report noted that the Conference had not reached any specific agreement on questions of general and complete disarmament or on measures aimed at the lessening of international tensions.

It expressed the hope that the useful discussions and exchange of views during the session would facilitate agreement in the future.

[Prev. ref. 5925:AOA:A]

B. USSR Launches "Cosmos" Satellites: Another artificial satellite, *Cosmos XXXXV*, was launched by the Soviet Union on September 13.

The sputnik carried scientific apparatus for continuing the programme of space research announced by Tass on March 16, 1962.

The orbital elements were: initial period of revolution—89.69 minutes; maximal distance from the surface of the Earth (apogee)—327 kilometres; minimal distance from the surface of the Earth (perigee) —206 kilometres; inclination of the orbit to the equatorial plane—64 degrees 54 minutes.

Besides scientific instruments, the sputnik carried a radio system for precise measurement of the orbital elements, a radio-telemetric system for transmitting to Earth data on the functioning of the instruments and scientific apparatus.

The apparatus on board the sputnik was functioning normally and the co-ordinating computing centre in the Soviet Union was processing the incoming information.

The Soviet Union launched on September 24 *Cosmos XXXXVI*.

One more satellite in the series initiated in 1962—*Cosmos XXXXVII* —was launched on October 6.

(*Tass*)

[Prev. ref. 6050:AOA:F]

C. Yugoslavia Joins COMECON: On September 17, Yugoslavia joined COMECON, the giant Soviet-led Eastern bloc trading group, in a move to cement relations between Belgrade and Moscow on a cordial level of mutual assistance.

The Agreement on Yugoslavia's participation in the work of some COMECON organs was concluded in Moscow.

It was noted in the course of the talks on the conclusion of the Agreement that the experience of bilateral economic co-operation between COMECON member-States and Yugoslavia showed the need of a further development and strengthening of economic ties between these countries on a multilateral basis on questions of mutual interest.

The Agreement envisages that Yugoslavia will co-operate within the frame-work of COMECON on the basis of equality and mutual advantage with the socialist countries in the field of foreign trade, currency and financial relations, ferrous and non-ferrous metallurgy, engineering, chemical industry and the co-ordination of scientific-technical research. The representatives of Yugoslavia will take part in the work of the permanent commissions and

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

other COMECON organs which will study these questions.

Besides active co-operation on concrete questions in these fields, the representatives of Yugoslavia can attend the meetings of the other permanent commissions of the COMECON and the Council's organs to acquaint themselves with the questions of economic and scientific-technical co-operation studied at these meetings.

The COMECON organs and Yugoslavia will regularly exchange information and documents on questions of economy, science and technology.

The Agreement will be temporarily in force from September 17, 1964, pending its approval by the session of the Council of Mutual Economic Assistance and the Government of Yugoslavia.

(*Tass*)

[Prev. ref. 5626:AOA:R]

D. FAO Commodity Review For 1964: The UN Food and Agriculture Organization (FAO) in its commodity review for 1964, released on September 13, reported record production of several commodities in 1963-64. It said that Russia had become the world's largest importer of wheat.

It said output, despite increases, had remained insufficient "to offset the growth in world population".

The review listed a record world production of rice, meat, fats and oils, eggs, cocoa, tobacco, cotton, wool and hard fibres. But it said the rice harvest increased by only 3 per cent.

A record fish catch of 50 million tons was reported.

The review, however, added that the world production of wheat was 6 per cent lower than in 1962-63. Dairy and meat production also decreased.

"Milk production failed to advance for the first time in the post-War period, with consequent adverse effects on butter production, "and the increase in output of fats and oils was slight".

The review noted that the output of man-made fibres increased faster than natural fibre production and that the natural rubber output fell while synthetic rubber production went up.

Prices of most agricultural commodities increased during the year.

The review carried the following comments on the outlook for various commodities:

Wheat: Coarse grain production in 1964-65 was not expected to reach the 1963-64 level.

Rice: Assuming growing conditions in Asia were better, "larger crops can be expected". A good harvest was in prospect in USA. The world demand for rice was expected to remain substantial.

Sugar: Evidence pointed to a substantial increase in world sugar production in 1964-65, given average weather conditions. Cane crop increases were expected, especially in Latin America.

Tea: The "present close balance of supply and consumption can be disturbed by a reversal of the decline in Indonesian production or by the re-entry of China into the world market as a substantial producer". The effect would be to depress world prices.

Cotton: It was probable that world stocks would remain at a high level in the coming year.

Jute and other fibres: Production forecasts were favourable.

(*The Hindustan Times*, New Delhi and *UN Newsletter*)

[Prev. ref. 5973:AOA:B]

E. World Youth Forum: The World Youth Forum opened in Moscow on September 16.

As the Forum opened, slogans in honour of the solidarity of the youth of the world resounded through the conference hall, slogans such as: "Long live unity"; "We are with you, fighting Africa!"; "We are with you, people of Asia and Latin America, fighting against the dictatorship of the imperialists!"

The Forum received thousands of greetings, including greetings from the UN Secretary-General, U Thant.

The Soviet Prime Minister, Mr. N. Khruschev, was insulted by the Chinese delegates on the opening day. They sat solidly in their seats as more than 6,000 delegates and guests rose to give the Soviet leader a five-minute standing ovation.

Earlier, the Moscow paper Pravda warned delegates from more than 100 countries to beware of Chinese attempts to wreck the week-long Forum, called to discuss the "role of youth in combating imperialism and colonialism."

Chinese Attack On Russia And India:

During the session on September 20, delegates exchanged jeers and boos when a Chinese speaker accused Mr. Khruschev of making a "repulsive" attack on Peking.

The Forum broke into uproar when the Chinese demanded the rostrum. There was pandemonium for some time as rival speakers tried to make themselves heard against a hubbub of shouts, catcalls and whistles.

The Chinese delegate, Mr. Liang Keng, protested that a Kremlin reception for 1,000 Forum delegates had been used to attack China. The Chinese apparently objected to Mr. Khruschev's criticism of Communist "visionaries"—a reference generally taken to apply to China.

Mr. Liang without mentioning Mr. Khruschev by name said that "anti-Chinese remarks" had been made and it was "repulsive that even a reception was used to attack China."

He raced for the rostrum immediately after the Indian delegation leader, Mr. Buran Singh Azad, condemned China for its 1962 border aggression.

He also attacked the Indian delegation, saying the Forum should spend its time in serious discussion on anti-imperialist solidarity. It was regrettable that the Sino-Indian border dispute had been raised. China had been slandered, China had been a victim of aggression, attacked by India "with the connivance of the American imperialists." The Chinese Government always adhered to the principle that border disputes should be settled through negotiations, he said.

He then launched a bitter attack on the Russians. He said the 40-strong Chinese delegation had shown great patience in listening to "distortions and attacks by the Soviet delegation and others." Some delegations had been prevented "inadmissibly" from making their views known. Soviet newspapers containing anti-Chinese material had been distributed among the delegates and some delegations had indulged in "deliberate and preconceived anti-China activity."

Declaration:

The Forum ended on September 24 with the adoption of a Declaration.

The Forum listened to the reports of all the five commissions and adopted them with an overwhelming majority. The discussion of the reports and numerous resolutions—some 100—was very animated.

After the Declaration was adopted, a representative of China, which had not taken part in the vote, took the floor. He spoke of his draft declaration. This was the last attempt by the Chinese delegation to frustrate the spirit of unity and cohesion which had been established.

In the Declaration, the participants in the Forum solemnly pledged to fight on a still broader scale against all forms of national and racial oppression, against the forces of imperialism and war, for the assertion of relations of complete equality and brotherhood among nations. "We resolutely support the principles of peaceful co-existence which create for the oppressed peoples new favourable conditions in their struggle for national liberation". It pointed out that peaceful co-existence also stimulated the working class movement and the democratic forces in the capitalist countries in their struggle for progress.

The participants in the Forum appealed to the world youth to spare no efforts in the struggle to bridle the atom-maniacs and militarists, for new international agreements directed towards the relaxation of tension and prevention of the war threat.

The Declaration emphasized the outstanding contribution of the youth of the socialist countries to the struggle against imperialism, for peace, democracy and the happiness of the peoples. "We firmly believe in the might of the united forces of the peoples of the socialist and young independent States, the peoples fighting for their liberation, the working class and democratic movements of the capitalist countries, the working people and all the progressive forces of the world".

Expressing the will of youth and students of all countries, the Declaration demanded immediate independence for all the colonies and dependent countries.

The Forum solemnly proclaimed its complete solidarity with and boundless support to "the courageous fighters of South Viet-Nam, North Kalimantan, the Arabian Peninsula, the south of Yemen, Congo, Angola, Mozambique, Cameroun, and the so-called Portuguese Guinea—all those whom the armed aggression of imperialism and its bloody crimes compelled to take up arms and launch a decisive battle for freedom and independence."

The delegates of the Forum supported the five points put forward by Dr. Fidel Castro as a basis which guaranteed peace in the Caribbean zone.

They condemned the setting up of the "puppet State of Malaysia," an instrument of "British and American imperialism".

The Declaration expressed support for the just demand of the Chinese People's Republic to be granted lawful rights in United Nations and also for its struggle to return Formosa.

It demanded the earliest possible satisfaction of the "just demands of the Palestine people suffering great privations and the return of the Palestinian refugees to their country."

"We," the Declaration added, "are appealing to you, the young men and women of the whole world—regardless of your nationality, race or continent—strengthen the militant unity of the democratic youth and student movement!"

ASIAN RECORDER

November 11—17, 1964

Regd. No. D-727
Vol. X No. 46

CEYLON

A. UNP Annual Session: The annual session of the United National Party (UNP) was held in Galle on October 3.

In his presidential address, the Leader of the Opposition, Mr. Dudley Senanayake, bitterly assailed the policies of the Government.

He described the proposed Press Bill as a "monstrosity" and said that the Bill was "an endeavour to shield the wrong-doers guilty of bribery, corruption and nepotism, and to prevent knowledge of these shameful acts seeping through to the people".

He asked: "Why this tremendous haste in ramming down the throats of the people this monstrous bit of legislation? This haste seems to have coincided significantly with such exposures as the Giridara Mill affair and the Prime Minister's daughter's departure for Oxford."

[The Giridara Mill affair relates to a motion before Parliament by a number of Opposition members that a select committee of the House of Representatives should investigate whether Dr. N. M. Perera, the Finance Minister, has any financial interest in a rubber-rice mill at Giridara, an outstation town. Both rubber and rice are purchased by the Government, and the allegation which the Opposition wants investigated is whether Dr. Perera through direct or indirect ownership of the mill enjoys the benefit of a contract with the Government, in which case he would be disqualified from being a Minister. Dr. Perera had challenged the Opposition leaders to take up the matter in the law courts, but the Opposition insists that Parliament is the proper forum to discuss the matter.]

CHINA

A. National Day Celebrations: The 15th anniversary of the People's Republic of China was celebrated throughout the country on October 1.

Themes of economic self-reliance, uncompromising opposition to USA and the "struggle against modern revisionist ideology of the Soviet Union" predominated at festive ceremonies.

The New China news agency said that more than 700,000 people took part in the anniversary demonstration in Peking, which was staged on a more impressive scale than in previous years. Mr. Mao Tse-tung, the Chinese Communist Party Chairman, reviewed the parade in Tien An Men Square. He mounted the rostrum to join other Peking leaders and distinguished guests among the 3,000 foreign visitors to the ceremonies as thousands sang: "The East is Red."

In the main speech Mr. Peng Chen, Mayor of Peking and member of the Politburo, called for a united front against the United States. He asserted: "United States imperialists must get out of Taiwan; out of South Viet-Nam, South Korea, Japan, the Philippines, Thailand, the Congo (Leopoldville), and west Berlin; out of Asia, Africa, Europe and Latin America, and out of all places they have invaded."

Among foreign guests were President Modibo Keita of Mali, President Alphonse Massemba-Debat of Congo (Brazzaville), and Prince Norodom Sihanouk, Head of State of Cambodia.

Mr. Peng and other speakers were more discreet in their attacks on the Soviet Union, possibly out of deference to the presence of a Soviet delegation and East European communist delegates.

The Soviet Union sent a message of greetings to Chinese leaders on the occasion. In their message Soviet leaders expressed the conviction "that no force can break the ties of fraternal friendship" between both countries.

The Soviet delegation to the celebrations was headed by Mr. V. V. Grishin who is both a party and Government official. Mr. Grishin heads the All-Union Central Council of Trade Unions and is a candidate member of the Presidium of the Soviet Communist Party's Central Committee.

An earlier statement by Tass said that the decision to send a delegation had been taken "in accordance with the principles of proletarian internationalism and interests of consolidating unity between our peoples."

It added: "Our party, the Soviet Government, and all Soviet people have the sentiment of sincere fraternal friendship for the great Chinese people and highly appreciate their struggle for victory and development of the Chinese revolution."

In any case, the form in which the invitation was put made it difficult to refuse.

According to Tass, the Chinese had invited the Soviet Union to send "a party-government delegation, a Government delegation, or a public delegation, or not send a delegation at all". As Chairman of the Central Council of the Soviet Trade Unions, Mr. Grishin is a "public" figure, but he is also a candidate member of the presidium of the Party's Central Committee and in a sufficiently senior position to use this occasion verbally to press his party's views on his hosts.

[Prev. ref. 5513:CHI:C]

B. Efforts To Explode Nuclear Bomb: The US Secretary of State, Mr. Dean Rusk, in a statement in Washington on September 29, said that USA expected China to conduct atmospheric nuclear tests in the near future.

He said that if such an explosion took place, USA would know about it and would make the information public.

He recalled that since the 1950s the Chinese had been approaching the point at which they could detonate a first nuclear device. He said that China had not only failed to sign the Moscow nuclear test ban Treaty but had strongly opposed it, and he pointed out that the detonation of a nuclear device did not mean possession of a stockpile of weapons or a modern delivery system.

"The United States", he said, "has fully anticipated the possibility of Peking's entry into the nuclear weapons field and has taken it into full account in determining our military posture and our own nuclear weapons programme. We would deplore atmospheric testing in the face of serious efforts made by almost all other nations to protect the atmosphere from further contamination and to begin to put limitations upon a spiralling arms race."

Speculation about the imminence of China's explosion of a nuclear device had been going on for several years. When asked themselves—usually on the occasions when Marshal Chen Yi, the Foreign Minister, received a visiting journalist—the Chinese admitted that they were at work on a nuclear weapons programme. In October 1963, Marshal Chen Yi told Japanese correspondents that China expected to explode a device within "several years" but that it would be many years after that before production of weapons could begin (see page 5521).

[The determination of the Chinese to have a deterrent of their own certainly dates from the Korean War, but concentration on their own efforts to achieve it must date from early 1958, when their hopes of getting any aid at all from the Russians were finally disappointed. At that time—making a virtue out of necessity—their military strategy emphasized ideology and man-power rather than weapons. In the following three years the collapse of the "Great Leap Forward" led to sharp reductions in Chinese industry and it seems unlikely that the Chinese could have made much exception for their nuclear programme alone. In later exchanges with the Russians at the end of 1962 and in June, 1963, the Chinese angrily denounced the nuclear test ban Treaty and urged the Russians "not to infringe on China's sovereign rights and act for China in assuming an obligation to refrain from manufacturing nuclear weapons".]

The latest statement on Chinese capacity, also from Marshal Chen Yi, came in August, 1964, when he said that Chinese industry had reached a point where it was capable of "releasing a nuclear fission"—a statement that could be variously interpreted.

However, while achievements of Chinese scientists were extolled expansively during the National Day celebrations, there was no hint in speeches or Press articles that Peking was about to detonate its first nuclear device.

Mr. Lal Bahadur Shastri's Appeal At Cairo Conference:

Addressing the Conference of non-aligned Powers in Cairo on October 7, India's Prime Minister, Mr. Lal Bahadur Shastri, said the non-aligned Powers must bring their full moral force to bear for those countries which still refused to subscribe to the partial nuclear test ban Treaty. The Conference should consider recent "disturbing indications"

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

that China was about to explode a nuclear device.

He proposed that a mission should be sent to China not because India and China had their differences at present; "these differences must sooner or later be resolved". The threat to humanity from one more country having nuclear weapons was a far more serious matter.

India stood committed to use atomic energy only for peaceful purposes, even though in a purely technical and scientific sense she was capable of developing nuclear weapons. "Despite all our differences may I venture to take this opportunity to appeal through this Conference to China to accept a similar discipline."

He introduced nuclear disarmament as one of five points in a programme for peace. The other four were: the peaceful settlement of border disputes; freedom from foreign domination and racial discrimination; the acceleration of economic development through international co-operation; and full support for United Nations.

Mr. N. Khruschev's View:

The Tokyo newspaper, *Asahi Shimbun*, reported on October 5 that Mr. N. Khruschev had stated it was possible that China might explode a nuclear device at any time.

But, according to the newspaper, Mr. Khruschev said the testing of China's first nuclear device "will not be a threat since it will take several years before the Chinese can develop an effective system capable of delivery".

Asahi was quoting Japanese Foreign Ministry sources. (Mr. Khruschev made the statement to the former Japanese Foreign Minister, Mr. Aiichiro Fujiyama, when he visited the Kremlin on October 3.)

Concern In Eastern Europe:

Press reports also spoke of considerable concern in East European countries at the prospect of a nuclear explosion by China.

They fear, as evinced in an article in **Rud Pravo** of Prague, that the Chinese would exploit the test particularly among developing countries as making them the one non-white Power capable of producing nuclear weapons.

Newspapers in other East European capitals, notably in Warsaw were concerned lest the increase in the number of nuclear Powers should lead to tests by Powers not yet in possession of an atomic bomb but having considerable technical nuclear knowledge.

A Chinese test, observed one Warsaw newspaper, would make for greater danger in West Asia and maybe further east in Asia.

A further reaction was that a Chinese test would so irritate opinion in USA that it might swing the Presidential election in favour of Senator Goldwater. The Senator's election would in Communist opinion materially increase international tension.

[Prev. ref. 5488:AOA:A]

C. Purchase Of Cargo Ships From France: *The New China* news agency reported on September 29 the conclusion of an Agreement between China and France under which China would order ocean-going cargo ships from France.

The deal had arisen out of negotiations between the China National Machinery Import and Export Corporation and Ateliers et Chantiers de Dunkerque et Bordeaux (France-Gironde) and Societe des Forges et Chantiers de la Mediterranee.

It said the Agreement was signed by Mr. Chen Yang, deputy manager of the Chinese Corporation, and Mr. Jean Forgeot, president of the French Shipbuilders' Export Association.

(*The Times*, London)

[Prev. ref. 5844:CHI:B]

D. Trade And Finance Agreements With Algeria: Mr. Bashir Boumaza, Algerian Minister for National Economy, said on September 25 on his return from a Far-East tour that he had signed three important Trade and Finance Agreements with China.

One Agreement set out ways of using a 250-million-dinar interest-free loan (about £18 million) granted by China in October, 1963, which will entail a Chinese mission coming to Algeria to survey possible projects.

The other two cover technical co-operation and trade exchanges set at 50 million dinars (about £3,600,000) a year.

(*The Statesman*, Calcutta)

INDIA

SUMMARY: Dr. S. Radhakrishnan's Visits To USSR And Ireland; Chinese Statement On Colombo Proposals; Foreign Participation In Industrial Ventures; Floods.

A. Dr. S. Radhakrishnan's Visit To Soviet Union: The President, Dr. S. Radhakrishnan, arrived in Moscow on September 11.

As Dr. Radhakrishnan alighted from his plane, the Soviet President, Mr. Mikoyan and the Premier, Mr. Khruschev received him, the latter with a warm hug. A 21-gun salute was fired and there was a guard of honour.

A mixed crowd of Indians and Russians welcomed Dr. Radhakrishnan with slogans affirming Indo-Soviet friendship. Soon after, he drove to the city through a 15-mile route. Unfortunately airport formalities prevented the visiting Indian correspondents from joining the procession but traffic jams on the way, and welcome mottos and crowds at several points, spoke of the Muscovites' enthusiasm.

Dr. Radhakrishnan was accompanied by the Minister of State for External Affairs, Mrs. Lakshmi Menon.

State Dinner:

The Presidium of the Supreme Soviet and the USSR Government gave a dinner that night (September 11) for Dr. Radhakrishnan at the Kremlin Palace.

Welcoming Dr. Radhakrishnan, President Mikoyan said: "The Soviet people receive you with great warmth and receive you as an old friend of ours.

"The Soviet people have feelings of respect towards the great Indian people. We respect the people of India for their past unique history and regard with sympathy and understanding the desire of the Indian people and Government to strengthen their economy.

"Both the Soviet Union and India stand for peace and friendship of all nations and for liberation of all peoples from colonial oppression."

Replying, Dr. Radhakrishnan said: "I am delighted to be here again and every time I come here I notice significant changes taking place in the Soviet land.

"Chairman Khruschev is a friend of all men and he has done his best to consolidate peace in this world.

"The test ban Treaty, the proposal for renouncing force in the settlement of international disputes and his proposal for a world police force—all these are indications of his desire for peace.

"Peace is attainable and war is not inevitable. If all men realize these goals, they will be nearer his (Mr. Khruschev's) ideal.

"Like all liberated nations, we are for developing a socialist pattern of society inside and opposing imperialism outside.

"Anti-capitalism within, anti-imperialism without, are the governing principles of the liberated nations. We stand for peace and peaceful co-operation of all nations of the world."

He added: "Not only peaceful co-existence but extending fruitful co-operation to all nations of the world—this is our goal."

Speaking of growing Indo-Soviet friendship, he said the Indian Institute of Technology at Bombay, the Bhilai Steel Plant and the Neyveli projects were all fruits of this friendship.

He referred to the visits of the late Jawaharlal Nehru to the Soviet Union and said: "Mr. Nehru was a great star illumining with his brilliance the Indian sky in the world firmament. His ideals were peace, non-alignment and socialist pattern of society in India. These are the great ideals that Mr. Nehru has left behind. We are trying our best to achieve these ideals.

"It is my earnest hope that the cordial friendship between our two great nations will become stronger and will be a major contribution to peace in the world."

Luncheon In Honour Of President Mikoyan And Mr. N. Khruschev:

Dr. S. Radhakrishnan gave a luncheon in honour of President Mikoyan and Mr. N. S. Khruschev on September 12.

Speaking at the luncheon, Dr. Radhakrishnan said that so much bound India and the Soviet Union both nationally and internationally that he was sure the two countries would co-operate to work for peace and for the happiness of humanity.

He thanked the Soviet leaders for their assistance to India in building up her economy and said: "We have received considerable assistance in our industrial and cultural development from you. This is shown by the continued effective assistance which you have extended to us industrially, scientifically and culturally. We are grateful to you for this help and your assurances about its further continuance."

Referring to the problems of peace, he said: "The problem facing us in this nuclear age is one of survival through happiness and friendliness. The only alternative is annihilation through nuclear destruction. Even at considerable discomfort, to ourselves, we must try to build up a world which will be a home for happy living of the entire humanity. Our two countries are committed to this. Both of us are interested in preserving peace and seeing a world where people will be happy. This can be achieved as there are all possibilities and resources for it so long as we take a human approach to problems facing human beings."

President Mikoyan acknowledged the Soviet Government's pleasure at learning once again that the Government of India would continue to follow the line laid down by Jawaharlal Nehru, namely, non-alignment and international socialist development everywhere.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

He made special mention of the efforts towards disarmament as one sphere where India and the Soviet Union should co-operate.

Talks With Mr. N. Khruschev:

Mr. N. Khruschev displayed special interest in India's border dispute with China in talks with Dr. Radhakrishnan on September 12.

Informed sources said that the Soviet leader, faced with the Sino-Soviet border dispute which had recently come into the open, was eager to learn of India's experience.

An Indian spokesman said the talks were "very friendly, useful and frank."

Soon after the talks, Dr. Radhakrishnan visited the Lenin Mausoleum and laid a wreath there.

In Leningrad:

The city of Leningrad gave Dr. Radhakrishnan a warm welcome on his arrival on September 13 by special train from Moscow.

Welcoming the President, Mayor Isayev said: "Together with all Soviet people, the people of Leningrad have heard with great satisfaction of your visit to the Soviet Union. Today we have the opportunity of greeting you in the city of great Lenin.

"Your visit brings joy to the Soviet people because it means further strengthening and development of friendly ties between our nations and peoples. Friendship between our peoples is ages old but it is true only in recent times it developed fully because it is based on common struggle of our people for peace."

Dr. Radhakrishnan, in reply, said that this was his second visit to Leningrad. "As you said, our ties are age-old but they are becoming firmer today on account of our common interests in the struggle for peace." He said that the Soviet orientalists had contributed a great deal to the understanding of Indian classics. Petersburg Sanskrit dictionary was well-known throughout the world.

Paying a tribute to the bravery of the citizens of Leningrad during the last War, he said: "We are conscious of the great deeds of valour which your people put forth at a time when this city was blockaded. Your exploits remind us of the battle of Thermopilae and things like that."

Dr. Radhakrishnan then drove through Nevsky project and was cheered by Leningraders lining both sides of it. Later in the day he visited Peskorevski cemetery and placed a wreath there to the memory of the people who died in defence of Leningrad during the 900-day blockade of the city by the Nazi forces during the Second World War.

Among other places he visited were Yerevan, the Armenian capital, Simferopol and Yalta.

Later, he returned to Moscow.

Honorary Degree Conferred By Moscow University:

On September 17, Moscow University honoured Dr. Radhakrishnan by conferring on him the degree of Doctor of Philosophy.

The convocation was held in a glittering hall of the University building.

Dr. Radhakrishnan who closed his brief address with the slogan "Russi Hindi bhai bhai," to the tumultuous applause of students, described the University as a centre which clung to the past and those of learning in the city known for its progress and the Capital of the world's mighty Power.

Visit To Lumumba Friendship University:

After a final round of talks in the Kremlin on September 18, Dr. Radhakrishnan paid a visit to Patrice Lumumba Friendship University, established in memory of the murdered first Prime Minister of Congo (Leopoldville).

In this University, there are over 3,000 students from 83 countries, including 100 from India.

In his address to the students, Dr. Radhakrishnan said that nationality should be a bond and not a barrier between nations and the aim of education was to obliterate hatred and enmity.

He paid a tribute to Mr. Khruschev for establishing the University in the name of friendship and in many other ways helping nations which are on their way to progress. Mr. Khruschev did not want any country to change its social or political structure as a condition for aid. His ideals were development within the country and peace outside.

The Vice-Rector of the University, Dr. Erzhin, pinned a medal on Dr. Radhakrishnan who, in turn, presented to the University a set of books on Indian literature and philosophy.

Friendship Rally:

Dr. Radhakrishnan told a friendship rally in Moscow on September 18 that if man wanted to survive, there was no alternative to co-operation and peaceful co-existence.

He stressed the great contribution made by Mr. Khruschev to the implementation of this policy. He also expressed his confidence that Mr. Khruschev would continue to do his utmost for a peaceful solution of all problems.

He added: "We have arrived at the conclusion that disputes must be settled behind the conference table...."

The meeting was also attended by Mr. Khruschev, President Anastas Mikoyan and other Soviet leaders.

They were warmly acclaimed by those present at the meeting—representatives of the workers and social organizations of Moscow.

The meeting was opened by Mr. Vladimir Promyslov, the Mayor of Moscow. It was also addressed by Mr. Mikoyan, who said the friendship which the Soviet Union had developed with India as well as with the other countries of Asia and Africa had many sources. "The identity of interests in a number of cardinal international questions is one of such sources."

Address On TV:

In a television appearance on September 18, Dr. Radhakrishnan made a plea for ensuring peace in the world and said: "India and the Soviet Union are united in the pursuit of peace."

He condemned perverse chauvinistic nationalism which made one look upon one's neighbours as aliens and said that such an outlook had no justification. He praised Lenin for giving purpose to the Soviet Union after the 1917 revolution when foreign interventionists had failed in their bid to strangle the Soviet revolution.

He said: "Dear friends, I am delighted to be here again, thanks to the kind invitation of the Soviet authorities, President Mikoyan and Chairman Khruschev. Members of my party and myself have had a very warm reception wherever we went in this country. We had very frequent talks with Soviet leaders, especially President Mikoyan and Chairman Khruschev. And we ourselves have profited from these discussions. The discussions were sincere, friendly and frank.

"Change is the characteristic of all living societies and your society has had many changes in its long history, especially in the last 40 odd years. In retrospect it looks as if there was an inevitability about it. At that time here the Government was absolutist, church corrupt, widespread misery, defeat and devastation in the First World War—all these things brought about disruptive changes in your society.

"At such a time Lenin appeared on the scene and gave purpose to your life. But your affairs were not smooth even then. You had a civil war, an intervention by foreign nations which tried to strangle the new State at its very birth and then came the attack in 1941. There is not a family which did not lose a husband, a father or a son. Naturally your people were anxious for peace and wished to avoid war.

"Your anxiety for peace and your proposal for disarmament have had the backing of your great leaders. In a series of articles 'Can Europe Disarm?' Engels wrote (it was written some 70 years ago) 'that all Europe has been arming on an unprecedented scale. Each Great Power endeavours to outstrip the other in military might and preparedness for war. Germany, France and Russia did most to surpass one another. Is it not stupid to talk of disarmament under such circumstances,' he asks. 'I maintain disarmament, and thereby a guarantee for peace, is possible.' That is what Engels said 70 years ago.

"Lenin, as far back as 1918, pointed out that a world war, in which mighty achievements of technology are used with such great energy (resulting in) mass extermination of human life, apart from being a major crime can also lead to the undermining of the very foundations of human life. All this was said at a time when nuclear weapons were not a part of military technology.

"There were occasions when we praised war and said that participation in war was an ennobling experience. Today scientists tell us that any thermo-nuclear war would destroy all human civilization.

"If by chance any people are left behind they will be subject to such dreadful diseases that they would rather be dead than alive.

"In these circumstances war is sheer madness. Many sensible leaders of the world recognize this fact and are trying their very best to prevent war. Suspicions here of Western nations caused by their intervention in early years of revolution gradually ceased by greater knowledge and experience of these nations."

He referred to the signing of the Treaty for partial ban of nuclear weapon tests and said: "The last day of last year Mr. Khruschev proposed that we should renounce war and not resort to arms in the settlement of border disputes. He has recently proposed a new universal peace force.

"The two greatest obstacles to peace in this world happen to be colonialism and racialism. And Mr. Khruschev in the United Nations Assembly proposed that all colonialism should be abolished as soon as possible. The United Nations has condemned every attempt at racial discrimination. If we want to have a world without arms, a world of peace, a fellowship of nations, it can only be on the basis of three fundamental principles of political freedom for all, economic opportunity for all and creative freedom for all. The nations are here to help one another."

The Joint Communique:

The following is the text of a joint *communique* issued in Moscow on September 19 at the end of Dr. Radhakrishnan's visit to USSR:

"At the invitation of the Presidium of the USSR Supreme Soviet, the President of the Republic of India, Dr. Sarvepalli Radhakrishnan, visited the Soviet Union from September 11 to 19, 1964.

"The President of India was accompanied by the Minister of State in the Ministry of External Affairs, Mrs. Lakshmi Menon, the Secretary to the President,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Mr. S. Dutt and the Director of the Historical Division in the Ministry of External Affairs, Dr. Gopal.

"During their stay in the Soviet Union, the President of India and his party visited, apart from Moscow, the Capital of the USSR, the cities of Leningrad, Yerevan and Yalta and saw a number of scientific and cultural establishments. They studied various aspects of the life of the great Soviet people and their work and achievements in the fields of economy, science, culture, health and the arts.

"In Moscow and other cities of the Soviet Union the President of India and his Party met and talked with workers, scientists and other intellectuals. Everywhere they went, they received a most cordial welcome and hospitality and expressions of the sincere friendship and warmth of the Soviet people towards the great Indian people.

"The President of India attended a mass rally of Soviet-Indian friendship in the Kremlin and the rally, which was addressed by the Chairman of the Presidium of the USSR Supreme Soviet, Mr. A. I. Mikoyan, and the President of India was a striking demonstration of Soviet-Indian friendship.

"During his stay in the Soviet Union, the President of India had full and friendly talks with the Chairman of the USSR Council of Ministers, Mr. N. S. Khruschev. There were also talks with Mr. Mikoyan.

"During the talks which took place in an atmosphere of mutual friendship and cordiality, there was an exchange of views on various important international issues and on matters pertaining to further development of Soviet-Indian relations and mutually advantageous co-operation.

"The two sides affirmed with satisfaction that in spite of local conflicts in various parts of the world, there had been a general relaxation of tension in international relations because of the influence of the forces of peace and democracy. They welcomed in this context the Moscow Treaty banning the testing of nuclear weapons in the atmosphere, in outer space and under water, the achievement of agreement between the Government of USSR and the United States not to place in orbit objects carrying nuclear weapons and the agreed decision to reduce the production of fissionable materials for military purposes.

"The two sides felt that the implementation of these measures would facilitate the further improvement of relations between States on the basis of the principles of peaceful co-existence. They agreed that there exists now a real possibility for the solution of international disputes by peaceful means through negotiation.

"The talks affirmed that the Soviet Union and India held a similar position on the many basic problems facing the world. The development of Soviet-Indian relations on the basis of the principles of equality and mutual benefit and respect for territorial sovereignty, is a striking example of the successful implementation of the policy of peaceful co-existence of States with different political and social systems.

"Aware of the pressing need for an active effort for the radical improvement of the international situation and the consolidation of peace, the two sides expressed their firm resolve to spare no effort in the quest for ways to achieve a prompt solution of international issues, eliminate the peril of thermo-nuclear war and ensure a stable peace.

"In this connexion the President of India expressed the high appreciation by the Government and the people of India of the assiduous efforts of the Soviet Government and Mr. N. S. Khruschev, in the struggle for the maintenance and consolidation of peace and in particular of the outstanding role of the Soviet Union in the conclusion of the Moscow Treaty partially banning the testing of nuclear weapons.

"The two sides re-affirmed their conviction that territorial disputes between States should be solved by peaceful methods. The Indian side welcomed the proposal of Mr. Khruschev of December 31, 1963, for the conclusion of an international agreement that States should refrain from the use of force in the solution of their territorial and border disputes and should pay due regard to historically formed boundaries.

"The two sides re-affirmed their unshakeable conviction that the policy of peaceful co-existence of States with different political and social systems is today the sole alternative to a devastating thermo-nuclear war. Both sides welcomed the growing recognition in the world of the policy of non-alignment with military blocs pursued by most of the developing nations in Asia and Africa. They also welcomed the conference of non-aligned countries which is to be held shortly in the expectation that it would help in promoting peaceful and friendly co-operation among nations and in facilitating the settlement of international problems.

"The two sides gave their support to the forthcoming Afro-Asian Conference and hoped that it would lead to strengthening the unity and solidarity of the African and Asian countries in the struggle for peace and for the liquidation of colonialism.

"The two sides expressed concern over the fact that such fundamental questions as the problem of general and complete disarmament, a peaceful settlement of the German problem and the problem of the final elimination of the remnants of the colonial system, still remain unresolved. The solution of these problems requires the persistent efforts of all peace-loving States and peoples.

"An identity of views was re-affirmed by the two sides on the need to implement general and complete disarmament under strict and effective international control. The two sides declared, in particular, that as members of the 18-nation committee for disarmament, the Governments of India and the Soviet Union will spare no effort to promote in the discussions at Geneva the elaboration of concrete measures which would enable a start to be made on the implementation of disarmament and the release of funds for peaceful construction, including economic aid to the developing nations.

"The two sides attach importance to partial agreements which would facilitate and draw nearer the achievement of the paramount goal of general and complete disarmament. There would be, in the first instance, such measures as the withdrawal or at least a considerable reduction of foreign troops on territories of other countries, the dismantling of foreign military bases, the promotion of denuclearized zones in various parts of the world and the achievement of agreements banning underground nuclear tests and on the non-proliferation of nuclear weapons.

"Sincerely striving towards a peaceful settlement of all acute international issues and towards the betterment on that basis of relations between States, the Soviet Union and India believe that in the interests of a stable peace there is a particular need for growing efforts aimed at eliminating the vestiges of the Second World War by the attainment of a peaceful settlement of the German problem. The Soviet side believed that the signing of a German Peace Treaty and the transformation on that basis of West Berlin into a demilitarized free city could, under present conditions, be a turning point in the improvement of the entire international situation. The Indian side re-iterated the statement of the late Prime Minister Jawaharlal Nehru in the joint communique issued at Moscow on September 11, 1961 that while at present the fact of the existence of two German States could not be ignored and any attempt to change the frontiers would have dangerous consequences, there was an imperative need for finding a peaceful solution of the German problem by negotiation among all parties concerned.

"The two sides agreed that United Nations has an important role to play in promoting international co-operation. They re-affirmed the determination of their two countries to continue their efforts for the further strengthening of United Nations with the fuller participation in all its organs of all the countries, particularly of Asia and Africa.

"The two sides re-affirmed their loyalty to the decisions of the United Nations and other international organizations which envisage the need to eliminate the vestiges of colonialism and imperialism and to grant independence to all countries and peoples under foreign domination with a view to achieving their liberation from all forms of colonialism and imperialism. They expressed their full support for the just struggles for freedom in all parts of the world, particularly in Asia and Africa, and they demand freedom and independence without delay from the peoples of all countries under foreign domination.

"The two sides condemned the policy of racial discrimination which is being pursued by the Government of the Republic of South Africa and regard the policy of apartheid as a crime against humanity. This policy is in complete contradiction of the United Nations Charter and the Declaration of Human Rights. The two sides call upon the States that have not yet implemented the United Nations decision with regard to the Republic of South Africa to cease their co-operation with the Government of South Africa in order to compel it to grant legitimate rights to the whole population of that country.

"The two sides gave particular consideration to recent developments in South-East Asia. They expressed concern at the aggravation of the situation in this area and hoped that the problems of South-East Asia would be resolved peacefully in the interest of the peoples of these areas.

"The two sides agreed that there should be no interference by foreign Powers in the internal affairs of Congo.

"The Soviet side declared its full support of the struggle of the Cuban people for strengthening the independence and sovereignty of their Motherland.

"The Soviet side expressed its high appreciation of the desire of the Indian people for peace and of their policy of peaceful co-existence and non-alignment to which the outstanding statesman of our times, the late Prime Minister of India, Jawaharlal Nehru, dedicated so much effort and energy. The Soviet side noted with gratification that India was the first country, after the three initial signatories, to sign the Moscow Treaty partially banning the testing of nuclear weapons. The Soviet side welcomed the fact that the new Government of India continued to pursue the policy of Jawaharlal Nehru, which is the policy of non-alignment and friendship with the Soviet Union and other peace-loving countries.

"Both sides were happy to note the steady development of friendly relations and the many ties between India and the Soviet Union in economic, cultural, scientific and technical matters, which have greatly benefited the peoples of the two countries and the cause of the consolidation of peace. Economic and technical co-operation between India and the Soviet Union, which will complete a decade in 1965 is a matter of particular satisfaction to both sides.

"The President of India emphasized the great significance of the comprehensive co-operation of the Soviet Union in the development of the national economy and the building of a new India. The Soviet side declared its intention to continue and develop Soviet-Indian co-operation and confirmed its readiness to assist in the construction of the Bokaro metallurgical plant.

"The two sides re-affirmed that meetings and personal contacts between statesmen

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and public figures are of great importance for the development of friendly relations between India and the Soviet Union. The present visit of the President of India had proved very important in this connexion. The Soviet side states that it looked forward greatly to the visit of the Prime Minister of India, Mr. Lal Bahadur Shastri.

"The President of India expressed his high appreciation of the friendly reception accorded to him and his party in the Soviet Union and stated that he, the Government and the people of India, would welcome a visit to their country by Mr. Mikoyan and Mr. Khruschev. Mr. Mikoyan and Mr. Khruschev accepted the invitation and promised to visit India at a convenient date."

Russia Waives Visa Fees:

It was announced in Moscow on September 17 that India and the Soviet Union had decided to abolish visa fees from October 1.

This had been done as a sign of growing friendship between the two countries which was further strengthened as a result of Dr. S. Radhakrishnan's visit to the Soviet Union.

Visas will have to be taken by intending visitors, but they will have to pay no fees.

In Ireland:

Dr. Radhakrishnan arrived in Dublin on September 21 on a State visit to Ireland.

State dignitaries, members of diplomatic corps and a large number of people were at the airport to welcome Dr. Radhakrishnan. President De Valera could not be present at the airport as he had been medically advised not to make the journey to the airport owing to a recent operation.

On his six-mile drive from the airport, Dr. Radhakrishnan was cheered by a large number of people gathered especially in the centre of the town.

Later at an informal meeting at the presidential palace, President De Valera recounted to Dr. Radhakrishnan his association with India and said in 1917 the leaders of the Indian "Ghadar Revolutionary Movement" had presented him with a ceremonial sword and a flag in California. He had handed the flag to an Indian organization in Birmingham but kept the sword.

Later the two Presidents had a private lunch after which Dr. Radhakrishnan visited the city's historic museums and library, famous for its collection of oriental literature, including Sanskrit literature.

[Ireland, like India, is non-aligned and has an identity of views on most world problems. Some misunderstanding arose in 1960 over the Irish attitude to the Kashmir issue, but Irish spokesmen say that they have no intention of taking sides and their only desire is to see India and Pakistan settle their problems peacefully.]

Talks With Mr. Sean Lemass:

Dr. Radhakrishnan had an hour's discussion on September 22 with the Irish Prime Minister, Mr. Sean Lemass.

The talks were of a general nature, but in the course of it the Kashmir question was explained.

Dr. Radhakrishnan then drove to Ireland's national memorial at Arbour Hill where the 14 Irish leaders executed by the British in 1966 are buried. It commemorates a famous episode in the Irish independence struggle. Led by Padraig Pearse and James Connolly, a citizen army in that year occupied the main buildings in Dublin and fought bitterly till they were defeated by British troops. They proclaimed the first Irish Republic, but it lasted only five days when the leaders were summarily executed and buried in a mass grave.

Dr. Radhakrishnan, who was accompanied by Mr. Lemass, laid a wreath on the grave after a moving ceremonial drill by Irish troops. Only two other Heads of State had paid homage there—President Kennedy and President Ayub Khan.

Address To UN Association:

Dr. Radhakrishnan addressed the United Nations Association in Dublin on September 23.

In it, Dr. Radhakrishnan referred to the introductory remarks spoken in three languages—Sanskrit, Irish and English—by the Chairman of the meeting, the Chief Justice of Ireland, Mr. Cearbhall O'Dalaigh, and said that this gesture showed the universality of man.

He described United Nations as the symbol of the "aspiration of people telling us to stand together and understand each other".

Stating that the "duty of everyone is to work for peace", he added: "The greatest obstacle for peace is found in human nature itself. We have to change this attitude, discard prejudice, national bias and faith in force."

Mr. Sean Lemass' Statement On Kashmir Issue:

The Irish Prime Minister, Mr. Sean Lemass, told Indian correspondents in Dublin on September 23 that his impression after talks with Dr. Radhakrishnan was that prospects now existed of India and Pakistan getting together to solve the Kashmir question peacefully.

Dr. Radhakrishnan, he said, had explained the problem fully and his appreciation of it was now much better.

He removed what he called "misunderstandings" about the Irish attitude about Kashmir.

He said that Ireland did not recognize the right of a minority to vote itself out of the nation it belonged to.

Ireland was not committed to any particular solution of the Kashmir problem and there had not been any mention of self-determination as being the Irish attitude in the communique issued after Pakistan President Ayub Khan's visit to Ireland in July, 1964. Ireland only wished, as all other friends of India, to see the matter settled peacefully between the two countries so that energies could be diverted to the great tasks of economic development.

Ireland, he said, was a reluctant member of the Security Council in 1960, when it voted for a compromise resolution.

He explained Ireland's stand on the Kashmir issue on which the Irish representative sponsored a resolution in the Security Council in 1962.

[The Irish sponsorship of the resolution then had caused disappointment in India. In July, 1964, President Ayub Khan had visited Dublin to "thank" the Irish Government for the interest it had taken on Kashmir and the joint communique issued at the conclusion of the Pakistan President's visit strengthened the impression that Ireland supported the right of self-determination by the Kashmiris as a solution to the dispute.]

The Irish Government, Mr. Lemass said, did not think the proposal for an independent Kashmir made any sense. An independent Kashmir would not be a viable State. Apart from anything else, Ireland was also firmly opposed to giving any national minority the right to opt out of the nation.

In many ways, he said, he had sympathized with the Indian view-point on the issue. "I certainly understood a great deal better the issues involved in the dispute after my talks with the President."

He confessed that he had not appreciated that Kashmir was not a purely territorial discord between the two countries but had deeper ramifications also.

The Joint Communique:

The accent on direct Indo-Pakistan negotiations to settle the Kashmir issue was contained in a joint *communique* issued on September 24 at the end of Dr. Radhakrishnan's visit.

The following is the text of the communique:

"At the invitation of the President of Ireland, the President of the Republic of India, Dr. S. Radhakrishnan, accompanied by Mrs. Lakshmi N. Menon, Minister of State for External Affairs and officials of the Government of India paid a State visit to Ireland from September 21 to 25, 1964. Dr. Radhakrishnan was the guest of the President and Mrs. De Valera during his stay in Dublin.

"The President of Ireland warmly welcomed President Radhakrishnan not only as head of the great Indian people but as a great philosopher and scholar and as one of the closest associates of Mahatma Gandhi and Jawaharlal Nehru in India's great struggle for freedom.

"He expressed the sympathy of the Irish people with the people of India in their sorrow at the passing away of Mr. Nehru.

"The President of India expressed his great pleasure at meeting President De Valera whose services in the cause of freedom have become legendary throughout the world and who is a cherished figure in India.

"During his stay in Ireland the President of India had discussions on international problems with the Prime Minister, Mr. Sean Lemass, and the Minister for External Affairs, Mr. Frank Aiken, of Ireland. They welcomed the Agreement partially banning the testing of nuclear weapons signed by both India and Ireland and considered it to be the first step towards bringing about international control of nuclear weapons.

"They expressed support for the role of United Nations in the maintenance of world peace and recalled with satisfaction the close co-operation between Indian and Irish contingents in the UN Operations in Congo under extremely difficult and trying circumstances.

"The President of India expressed his appreciation to the Government and people of Ireland for the spontaneous expression of sympathy and support to India at the time of the aggression by China against India in 1962.

"In the course of their broad review of the international situation, the leaders touched upon the problem of Indo-Pakistan relations. They welcomed the prospect of direct talks and negotiations at various levels between the representatives of India and Pakistan which are aimed at seeking solution of their problems and promoting friendly and neighbourly relations.

"The Prime Minister of Ireland expressed the hope that Indo-Pakistan differences including those on Kashmir would be solved through direct negotiations between India and Pakistan.

"Adverting to the recent appointment of Ambassador Warnock as Ireland's first Ambassador to India, it was agreed that the closest possible relations would be maintained and developed between the two countries. In particular it was agreed that trade and cultural relations should be pursued with all possible vigour.

"It was emphasized that the two coun-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tries had a vital interest in co-operating in their common objective of keeping peace in the world and in developing the resources of mankind for the welfare of all peoples. This co-operation springs naturally from the common memories of both countries and their dedication to democracy and the rights of man.

"The President of India expressed his appreciation of the warm and cordial reception accorded to him and his party. He extended invitations to the President and Mrs. De Valera, the Prime Minister and Mrs. Lemass, and the Minister for External Affairs and Mrs. Aiken, to visit India. The invitations were accepted and the President, the Prime Minister and the Minister of External Affairs of Ireland agreed to visit India at a time suitable to both Governments."

Returns Home:

Dr. Radhakrishnan returned to New Delhi on September 27.

Talking to newsmen at the airport, he said he was well received in both Ireland and the Soviet Union. "Though they belong to different systems they are making good and great progress. They are passionately patriotic and anxious to build new homes, new schools, new dispensaries and we should also do that, forgetting little things."

(*Tass, The Times of India* and *The Indian Express*, Bombay and *The Hindustan Times*, New Delhi)

B. Colombo Proposals On Border Dispute—Chinese Statement: In a statement on October 9, China declared that she was ready "to start negotiations at any time and at any place with the Colombo proposals as a basis," if India "really wishes to hold them."

At the same time, the Chinese Government categorically stated that it would not agree to withdraw its seven posts from the demilitarized zone in Ladakh as a pre-condition for negotiations. It claimed that the area in which the posts were located had always been Chinese territory.

The statement began with a reference to statements in Cairo by the Prime Minister, Mr. Lal Bahadur Shastri, and the External Affairs Minister, Sardar Swaran Singh, on the Sino-Indian border problem and it expressed regret that "the Indian leaders should have taken advantage of the Conference of non-aligned countries to make anti-Chinese clamours."

The Chinese Government dismissed the Indian demand for the acceptance of the Colombo proposals in toto in these terms: "In continuously calling for the acceptance of the Colombo proposals in toto, China's withdrawal from the seven civilian posts, etc. the Indian Government aims solely at opposing China, so as to divert the attention of the people at home, seek US and Soviet military aid, and pursue its policy of double alignment under the cover of non-alignment."

This offer to hold negotiations without changing its stand on the Colombo proposals was marked by a hardened attitude towards the Colombo Powers. The Chinese Government demanded that any substantive discussion among the Colombo countries about the Sino-Indian boundary question must be held with China present. It said: "Any mediation or any proposal made without the agreement and not in the presence of China will be unacceptable to the Chinese Government."

China re-iterated its stand that any proposal put forward by mediators could only be a recommendation and not an award, and added: "At present, exploiting the opportunity of his participation in the conference of non-aligned countries in Cairo, the Indian Prime Minister is making distortions and slanders about China over the Sino-Indian boundary question and is doing his utmost to make use of the Colombo Conference nations to bring pressure to bear upon China. Moreover, the Indian Prime Minister is in Cairo while the Chinese Premier is not. The Chinese Government holds that in these circumstances to motivate consultations among the Colombo Conference nations behind China's back is unfair and therefore the Chinese Government cannot agree."

The statement said that the Indian Government knew well that "China will never submit to any international pressure".

Denying that it wanted to benefit from aggression, the Chinese Government made the allegation that it was India which was "still illegally occupying more than 90,000 square kilometres of Chinese territory south of the so-called MacMahon Line, whereas China has never occupied a single inch of India's territory."

After asserting that China would not withdraw from any of the seven posts in Ladakh, the Chinese Government said that on the contrary China had every right to ask India to withdraw from this territory of more than 90,000 square kilometres. With a show of generosity it added that in order to seek a peaceful settlement through negotiations, it "has up to now not raised" such a demand as a precondition for negotiations. Observers wondered if the qualifying words "up to now" were meant to convey a dark hint.

Indian Comment:

The official comment in New Delhi on the Chinese statement was that it was no more than a re-iteration of China's oft-repeated stand.

A spokesman of the Ministry of External Affairs said: "China's constant re-iteration of the demand to negotiate without preconditions on the basis of the Colombo proposals only means that China wants to negotiate cease-fire arrangements according to the terms dictated by her. This will be a direct negation of the Colombo proposals."

The text of the spokesman's comment was:

"The acceptance of the Colombo proposals by both sides provide for agreed cease-fire arrangements between India and China to resolve the state of undeclared war between the two countries since China's massive aggression of October-November, 1962. The so-called Chinese declaration of unilateral cease-fire and withdrawal and the various conditions stipulated therein do not constitute an agreed cease-fire arrangement between India and China.

"India had declined to accept the Chinese conditions of cease-fire as this was a unilateral attempt by China to dictate to India on the basis of a military action taken by China.

"If the atmosphere of conflict and the undeclared war which now exists is to be terminated with a view to creating the necessary conditions in which the boundary differences can be resolved by direct peaceful talks and discussions, acceptance of the Colombo proposals is the first step. India has taken this step in accordance with her policy of settling disputes by peaceful means.

"If China similarly accepts the Colombo proposals as the agreed basis of cease-fire arrangements officials can meet and take steps to implement these agreed arrangements. Thereafter, as the Colombo proposals recommend, the main differences on the boundary between the two countries could be discussed bilaterally.

"It is obvious that China does not want to promote these processes of peaceful settlement. Its constant re-iteration of the demand to negotiate without preconditions on the basis of the Colombo proposals only means that China wants to negotiate cease-fire arrangements according to the terms dictated by her. This will be a direct negation of the Colombo proposals.

"If, on the other hand, China wants negotiations to settle the main question, that is, the differences on the border, without accepting the Colombo proposals, it can only mean that China wants to dictate terms for the settlement of the boundary differences on the basis of its declaration of unilateral cease-fire and withdrawal wthout any attempt to correct the crisis of confidence created by China's massive attack in 1962. India cannot submit to such dictates supported by threats or the actual use of force."

Chinese Intrusions In Ladakh And N-EFA—Indian Protest:

In a second Note, also handed to the Chinese Embassy on October 7, the Indian Government protested against the intrusion by Chinese military personnel into the demilitarized zone in Ladakh and against several other land intrusions and air-space violations in N-EFA and Ladakh in April, May and June this year.

India had sent its first protest Note against these violations on July 20, but the Chinese Government rejected the Note by characterizing the charges as "lies." Curiously, the Chinese Note of September 1 also sought to justify the presence of Chinese troops in these areas by claiming them to be within the Chinese "line of actual control of 1959."

The Indian Note of October 7 characterized the Chinese argument as "expansionist logic," and said "this fictitious line of actual control is actually the line of aggression reached by the Chinese forces in their massive invasion of India during October-November, 1962."

No Scientific And Cultural Collaboration With China:

India told the Chinese Government in another Note handed to the Chinese Embassy in New Delhi on October 7 that there could be no scientific and cultural collaboration between the two countries so long as the Chinese Government advocated the use of nuclear science for war-like purposes.

The Note related to Peking's invitation to the Government of India (on April 20) to send Indian scientists to a Peking symposium on science. India had earlier (on May 4) turned down the invitation by saying that no delegation could be sent in view of the 1962 Chinese aggression and China's forcible occupation of 14,500 square miles of Indian territory.

But the Chinese Government made an issue of the Indian rejection in a Note on July 8 and accused India of obstructing the advancement of friendly relations by scientific and cultural exchanges between the "one thousand million people of China and India."

India's strong resentment at Peking's undignified accusation was reflected in the Note handed to the Chinese Embassy on October 7. "It is clear," the Note said, "that the Chinese Government are trying feverishly to harness the forces of science, not for the peaceful purpose of improving the living standards of the 650 million people of China, but for serving the chauvinistic, expansionist, Big-Power dreams of the Chinese Government."

C. Foreign Participation In Industrial Ventures: According to an official survey, released in New Delhi on October 12, Britain continued to be the chief participant in joint industrial ventures in India, with the United States as a close second. West Germany and Japan take the third and fourth places.

The three Western countries, Britain, America and West Germany, among themselves, account for about 65 per cent of collaboration agreements, relating to both technical collaboration and equity participation.

Among the communist countries, East Germany and Czechoslovakia have a fair number of collaboration agreements with Indian entrepreneurs, though they do not come anywhere near the Western nations.

During the four-year period 1960-63, for which the survey relates, the number of approved collaboration agreements was 1,473. Of these, 296 cases related to participation in equity capital of new companies without technical collaboration.

The total number of collaboration agreements with Britain during the four-year period was 431, with USA 306, East Germany 234, Japan 126, Switzerland 78, France 56, Italy 41, East Germany 28 and Czechoslovakia 18.

There was a slight decline in the number of collaboration agreements which India entered into with other countries in 1963, as compared to the preceding years. The number of agreements approved in 1960 was 381. In 1961 the number rose to 402. In 1962 it dropped to 389, and in 1963 it further went down to 301.

Foreign investment in Indian industries, however, rose from Rs. 456.1 crores in 1955 to Rs. 690.5 crores in 1960, according to a Reserve Bank survey.

The Finance Ministry has compiled statistics of foreign equity investment in existing and new companies during the period 1961 to the middle of 1964. According to these statistics the total equity investment comes to Rs. 110.98 crores.

Though manufacturing industries account for the heaviest investment, the biggest single item of investment is oil. The next highest single investment is in plantations. The services—covering the broad range of activity from trading to financing—account for a fair measure of investment. Foreign investment in mining is comparatively modest.

During the six years covered by the Reserve Bank survey, foreign investments steadily rose under almost all heads. In oil they rose from Rs. 104 crores to Rs. 152.4 crores, in manufacturing industries from Rs. 131.8 crores to Rs. 289.4 crores, in services from Rs. 123.5 crores to Rs. 135.5 crores and in plantations from Rs. 87.2 crores to Rs. 99.5 crores.

Similarly equity participation rose from Rs. 32.75 crores in 1961 to Rs. 34.46 crores in 1963. It stood at Rs. 14.21 crores during the first six months of 1964.

The steady growth in foreign participation in Indian industries was attributed to special concessions and incentives, including income-tax rebate given to foreign companies and personnel.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5702:INI:K]

D. Pakistani Firm Takes Over Indian Factories: The Indian-owned Dalmia and Dandot cement factories in West Pakistan were taken over on September 30 by a Pakistani firm.

The deal for the take-over was finalized on October 1, while the possession of the plants was given to the new management by "the Indian owners" on September 30.

A spokesman of the new management, Pakistan Progressive Cement Industries Ltd., said that an ambitious plan to modernize the two factories, set up 27 years ago, had already been drawn up.

(*The Indian Express*, Bombay)

[Prev. ref. 4761:INI:E]

E. Excise Duty On Petroleum Products Raised: The rates of additional duties of excise and customs on major petroleum products were increased from October 6.

As in the past, the increase will be borne wholly by the oil companies and will not result in any rise in the wholesale or retail prices of these petroleum products.

The increase in rates is to facilitate appropriation of a further sum of nearly Rs. 5 crores which had accumulated with the oil companies since April, 1962 in favour of the Government.

The effective rates were notified in a Government of India Gazette Extraordinary.

The existing rates of additional duties were fixed in April, 1962 in the light of the price structure recommended by the Oil Pricing Committee and had been in force from October 1, 1961.

Additional duties on major petroleum products are levied under the Mineral Oils (Additional Duties of Excise and Customs) Act, 1958.

(*The Times of India*, New Delhi)

[Prev. ref. 4251:INI:I]

F. Andhra Pradesh "Leftist" Communists Adopt Party's Draft Programme: The Executive Committee of the "Leftist" Communists of Andhra Pradesh, at a Convention in Vijayawada on October 9, adopted the party's draft programme with an amendment on foreign policy.

The amendment was carried by 184 to 143 votes. Thirty delegates abstained.

A draft programme adopted by the Convention characterized the Government of India's foreign policy as "leaning more and more towards the camp of imperialism."

The Committee, which began a five-day session on October 7, discussed the party's constitution earlier in the day. Three major amendments recommended by the central sub-committee were adopted.

The first sought to substitute a two-tier party set-up—a committee and a secretariat—for the present council, executive and secretariat.

According to a second amendment, there will be no chairman but only a general secretary assisted by additional secretaries at State and Central levels.

The third provides for the formation of the basic units of the party, each consisting of not more than 11 members.

A party spokesman explained that this was the set-up of party organization before the Amritsar congress. The amended constitution would be placed before the Calcutta party congress.

[The Leftist faction of the Communists in Andhra Pradesh claims a membership of 28,312.]

The Convention ended on October 11 after electing a new provincial committee with Mr. Sundarayya as secretary and Mr. Moturi Hanumantha Rao as assistant secretary.

It also elected a 20-member secretariat which included among others Mr. T. Nagi Reddy, Mr. Nanduri Prasad Rao and Mr. D. Venkateswara Rao.

The political and organizational report which was inconclusively discussed was referred to the new committee which has been authorized to incorporate amendments and finalize it.

The Convention adopted resolutions on the food situation, wastelands, agricultural labour wages and release of detenus and on firings at Guntakal and Markapuram.

Defections From Official CPI:

According to an assessment made by the official CPI headquarters in New Delhi, the recent split in the CPI, as reflected among members of State Legislatures, shows that over two-thirds of them continue to owe their allegiance to the official party.

Roughly a third of the members of the Party's National Council had walked out to form the rival CPI-Marxist Leninist Party.

The assessment indicated that of a total of 170 Communist legislators only 49 had gone over to the rival party, while nine had taken a neutral or centrist position.

The largest number of defections from the official CPI had taken place in Andhra, where 23 members had been lost to it. In West Bengal it had now 12 members, against 13 belonging to the rival party and six centrists.

The Communist legislators in Bihar (12), Uttar Pradesh (14), Orissa (4) and Madhya Pradesh (2) had stood solidly behind the official CPI.

G. Floods In Andhra Pradesh: Floods in various parts of Andhra Pradesh took a toll of 200 lives in Macherla, in Guntur district, as the roaring waters from a breached irrigation tank rushed into the town on the night of September 29.

Thousands were reported to have lost their homes and 30,000 persons marooned in Macherla. The town itself was cut off from the rest of the State.

Eleven spans of the new bridge near the Nagarjunasagar Dam, called Vijayapuri, had given way (the bridge, opened for traffic in 1958, has 32 spans). The Dam itself was not damaged. Due to the havoc caused by the floods in the Kushira, Budameru, Nagaleru and Tammeleru rivers, the entire Krishna-Lanka area in the Vijayawada region was submerged. Vijayawada, the second largest city in the State, was cut off from the rest of the country. Train services between Vijayawada and Hyderabad were suspended on account of breaches in the railway track. Road communications between Vijayawada and Waltair as well as between Vijayawada and Visakhapatnam were also paralysed. Wanaparthy town, about 90 miles from Hyderabad, was flooded because of breaches in about 12 irrigation tanks near the town following heavy rains for the past 36 hours.

On October 1, the State Government airlifted medical personnel, medical supplies and rice to Macherla. Two IAF Dakotas with medical personnel, foodgrains and other supplies took off for Nagarjunasagar airstrip.

The Chief Minister, Mr. K. Brahmananda Reddi, told newsmen in Hyderabad on October 1 that he feared the damage to crops and property might run into crores of rupees. Lakhs of acres of paddy fields in the rice-rich districts of West Godavari, Krishna and Guntur had been submerged and standing crops severely damaged.

H. **"Jeewanu" Theory Confirmed By British Scientist:** The "Jeewanu" Theory, propounded by an Allahabad University professor in May, 1963, has once again been confirmed by an eminent British scientist, Dr. Michael H. Briggs.

In an interview in Allahabad on October 9, Dr. Krishan Bahadur, Assistant Professor of Chemistry in Allahabad University, said that in the recent international congress on photo-biology held at Oxford, Dr. Briggs had presented another scientific paper confirming his and his colleagues' work on "Jeewanu"—the photo-synthetically prepared particles with properties of living systems—and reported the presence of about a dozen natural amino-acids in "Jeewanu" in the form of peptides and protein-like materials.

The presence of purines as adenine and guanine, sugars as glucose, fructose, ribose and desoyribose, materials with esterase and phosphatase activities, urea and organic acids were also found in "Jeewanu."

Dr. Bahadur said that the British scientist had stated in his paper that "Jeewanu" had considerable internal architectures—vanuoles, spherical solid inclusions and apparent wall structures. Some "Jeewanu" fluoresceine in ultra-violet and these micro-structures were stainable with biological dyes such as acidic carmine, azure carmine, azure II, eosine, haematoxylin-eosine, janus green B, methylene blue, neutral red, ninhydrin, saphranin and toluidine blue.

According to Dr. Bahadur and his fellow researchers, materials necessary for the formation of the protocells in pre-biological era were synthesized in the primary oceans containing organic substances and inorganic catalysts when sunlight fell on them and the strong sources of energy such as electric discharge and high temperature heat were unnecessary.

A few months earlier, Dr. Briggs had confirmed the work on "Jeewanu" in the British Inter-planetary Society. He had then suggested that it was entirely probable that such micro-structures were the immediate precursors of cellular life.

I. **Ruins Of Koliya Capital Discovered:** According to a despatch from Gorakhpur on October 10, an exploration party of Gorakhpur University's Department of Ancient History, Archaeology and Culture claims to have discovered Ramagram, flourishing capital of the Koliyas in the sixth century BC at Maniyarabhar, three miles west of Nichlaul in the Maharajganj tehsil of Gorakhpur district.

According to the party, a stupa was erected there by the Koliyas on the relics of the Buddha. It was the only stupa which had not been touched by Ashoka. The other seven stupas were opened by him with a view to erecting new stupas over them.

The description of Ramagram given by the Chinese travellers, Fa Hien and Hiuen Tsang, tallies with its geographical position, according to the party. Pali literature, Chinese accounts, local tradition, and archaeology prove that the site is the ancient town of Ramagram.

The discovery will be brought to the notice of the next session of the Indian History Congress at Ranchi by Mr. Shivaji Singh, who is in charge of the exploration work.

(*The Statesman*, New Delhi)

INDONESIA

A. **Dr. A. Sukarno's Visit To USSR:** The President, Dr. A Sukarno, arrived in Moscow on September 29 on a brief visit.

He was met at the airport by, among others, President A. Mikoyan and the Premier, Mr. N. Khruschev.

Moscow reports suggested that Dr. Sukarno's discussions with Soviet leaders centred on military and economic aid. This view was supported by the presence in Moscow of the Defence Minister, Gen. A. H. Nasution, the Minister for National Development, Mr. Suharto, and Mr. Yusuf Muda of the Central Bank.

On October 2 a Joint Statement was issued in Moscow on the talks between Mr. Khruschev and Dr. Sukarno. According to the Statement, Indonesia would buy more arms from the Soviet Union.

The Statement said the Soviet Union and Indonesia "hold very closely a similar position on the fundamental problems of our time."

The two leaders gave special attention to the worsening of the situation in South-East Asia as a result of "interference" by imperialist Powers.

"The Soviet side re-affirmed that it backs the liberation struggle of the peoples of North Kalimantan (North Borneo). In common with the Indonesian and other peoples, the Soviet peoples are coming out against neo-colonialist plans for Malaysia and against other neo-colonialist plans on the territory of Asia and Africa."

Meanwhile, the Indonesian Air Force was strengthened on September 29 with six Soviet-made Antonov-12 transport aircraft.

Mr. V. N. Kuznetsov, the Soviet Charge d'Affaires in Djakarta, handed over the aircraft to the Indonesian Air Force Chief-of-Staff, Vice-Marshal Omar Dani, at the Husain air base near Bandung.

Marshal Omar Dani said that Indonesian Air Force had also bought MIG-21 fighters, IL-28 and TU-16 bombers and guided missiles from Russia.

Djakarta Radio said the Antonov-12 could carry 100 parachute troops and 15 tons of cargo and was equipped with a 20-millimetre cannon.

(*The Times*, London)

[Prev. ref. 5992: IND:A]

JAPAN

A. **Soviet Offer On Islands Issue:** The Soviet Union has offered to return to Japan the islands of Habomai and Shikotan as soon as USA returns Okinawa to Japan.

The offer, according to Press reports, was conveyed to a Diet delegation by the Soviet Premier, Mr. N. Khruschev, in the last week of September.

The Japanese Foreign Minister, Mr. Etsusaburo Shiina, told the House of Representatives Foreign Affairs Committee that Mr. Khruschev's statement had injected a new element into the Russo-Japanese dispute over Habomai and Shikotan and that it conflicted with the Japan-USSR Joint Declaration in 1956. The Declaration stipulated that the two islands would be returned to Japan after the conclusion of a Peace Treaty between the two countries.

In January, 1961 the Soviet Government delivered to Japan a memorandum which, in effect, said that the two islands would not be returned unless "all foreign troops" (American forces) were withdrawn and a Peace Treaty concluded. This had not been either confirmed or denied.

The major Opposition party, the Socialist Party, has agreed with the Government position, rejecting Mr. Khruschev's offer as running counter to the agreed terms for the return of the islands.

Observers in Tokyo expressed surprise at the party's reluctance to involve USA in the issue in spite of its known position on Okinawa. They pointed out that the Joint Declaration of 1956, which terminated the state of war between the two countries and which made the initial reference to the two islands, took the place of a Peace Treaty because the two parties had failed to agree on the disposition of the islands in question. That is to say, a settlement of the islands issue had to precede the signing of a Peace Treaty.

Later developments suggested that no territorial settlement would be possible so long as the Peace Treaty remained unsigned. Now the return of Okinawa seems to have replaced the Peace Treaty as a condition for the return of the islands to Japan.

According to observers, such a Soviet approach has long been anticipated. Okinawa is the biggest US base in the Far East against the Soviet Union and China.

In fact, Okinawa, where 45,000 American troops, possibly equipped with nuclear potential, are stationed, has always been the Achilles' heel in Japan-US relations.

Recently, Japanese national sentiment was aroused when US soldiers showed disrespect to the Japanese national flag even though prompt American apologies were accepted by the Japanese Government and the matter was officially closed without serious development.

The incident was, indeed, symbolic of the position of Okinawa where progressive transfer of civil administration to the local population from military control has long been an outstanding political issue between USA and Japan.

A sense of frustration at the denial of what is considered the rightful position persists in Okinawa's political and social life. It is believed to be largely because of such a political atmosphere that the major policy of the new US High Commissioner, Lt-Gen. Albert Watson II, appears to be directed towards appeasing the local population even though the basic US policy of holding the fortress "as long as the international tension continues" does not seem to be ready for revision.

The prompt offer of apologies for what could have developed into an explosive anti-American campaign not only in Okinawa but in Japan proper, observers said, should be construed as a tangible example of the American policy of appeasement.

The Soviet offer came while the flag incident had not been completely forgotten.

B. **Royal Wedding:** Prince Yoshi, second son of Emperor Hirohito and third in the line of succession to the throne, was married on September 29 to Miss Hanako Tsugaru, the daughter of a former Count, at a Shinto ceremony in the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tiny Kashiko Dokoro shrine within the palace grounds.

The ceremony was televised for the nation and for the bridegroom's parents, for by tradition the Emperor does not attend functions at which he is not the principal figure. It was a brief but impressive glimpse of ancient imperial Japan, and, now that all the eligible children are married, the last for a generation. The couple have been given the family name of Hitachi by the Emperor.

The Prince, kneeling slightly ahead of his bride, wore the black sokutai robe and the stiffened suiei no kammuri headdress; the bride had a flowing lacquered wig in osuberakashi style, and the multi-coloured, many-folded kimono juuni ritoe after court dress in the Heian period. The Prince alone prayed for the protection of the gods for his future family. They became man and wife in drinking sake from a ceremonial cup proffered by a priest.

Attending the ceremony were 140 guests, led by the bridegroom's elder brother, Crown Prince Akihito, and including the Prime Minister, Mr. Hayato Ikeda, who briefly left the clinic where he was being treated for a throat ailment. In the afternoon the couple, in formal western dress, called on the Emperor to give official notification of the marriage, and afterwards drove through the city cheered by crowds.

Miss Tsugaru, who is 24, and the 28-year-old Prince were first introduced by the Imperial Household Agency in February. Although both graduated from the Gakushuin University—she in English literature and he in zoology—they had not met before. After the Emperor's approval had been given, the prospective bride was schooled in history, brush calligraphy, poetry, and other courtly subjects fitting for a princess.

B. Assistance To Asian Highway Project: Japan has decided to co-operate in the construction of the Asian Highway envisioned by the Economic Commission for Asia and the Far East (ECAFE).

As a first step in this direction, an Asian Highway Committee has been established within the Construction Ministry.

As envisaged by ECAFE, the Asian Highway will run from the Turkish border in the west to Saigon on one route and Singapore and Indonesia on the second.

Japan's decision to co-operate in the project was in response to requests from ECAFE.

[Prev. ref. 5494:AOA:I]

MALAYSIA

A. Aid Co-ordinating Machinery Proposed: Britain, Australia, New Zealand and Canada have agreed to set up co-ordinating machinery to study further steps to grant financial and military aid to Malaysia.

The proposal to appoint the co-ordinating machinery was stated in Singapore on September 21 by the Finance Minister, Mr. Tan Siew Sin, on his return from the joint conference of the World Bank and the International Monetary Fund in Tokyo.

Mr. Tan said agreement to set up this machinery had been reached in Tokyo during talks with the Finance Ministers of the four Commonwealth countries, but the terms and arrangements had not been completed and further discussions would take place in Kuala Lumpur later.

While in Tokyo he also had talks with Mr. Douglas Dillon, United States Secretary of Treasury, who "agreed to carry our request for increased assistance to his Government and President".

The Prime Minister, Tengku Abdul Rehman, said on September 21 that he would welcome any Afro-Asian action to help achieve peace between Malaysia and Indonesia.

Replying to journalists' questions, he said at the airport: "I welcome any Afro-Asian action to achieve peace, but it is no use President Sukarno dragging me to talks every time he feels he wants a holiday."

The Defence Ministry in Kuala Lumpur said that several more Indonesian parachute troops—understood in other quarters to number three—had been captured in the Labis area of south-central Malaya.

A British military official in Singapore denied a claim by Antara news agency in Djakarta that Indonesian troops had in eight months killed 64 Gurkhas, shot down three British helicopters and seized a quantity of arms in Borneo. The official said that 17 Gurkhas had been killed and 42 wounded in Borneo since the Brunei revolt broke out in December, 1962.

In Djakarta, the Indonesian Deputy Minister for Air Force, Air Vice-Marshal Srimulijono Herlambang, challenged Britain to try and attack Indonesian military bases if she dared.

Australian Support:

The Australian Minister for External Affairs, Mr. Hasluck, said in the House of Representatives in Canberra on September 30 that Australia wanted to make it clear to President Sukarno of Indonesia that unprovoked aggression on the territory of Malaya must be countered, and would be countered.

He associated Mr. Calwell, Leader of the Opposition, with this view, and Mr. Calwell, across the table, did not demur.

Mr. Hasluck had refused to answer specifically a question from Mr. Calwell, who wanted to know whether the Australian Government had refused to support the suggestion of a British air strike against an Indonesian naval base earlier in the month.

Mr. Calwell had also asked how complete or incomplete was the co-ordination of policy between Britain, Australia and New Zealand when they considered the defence of Malaysia. Was Australian policy designed to avoid commitment of Australian forces for as long as possible "because of the defencelessness of Australia"?

Mr. Hasluck said that the commitment of Australian forces to the defence of Malaysia was clear and precise in the terms explained by the Prime Minister. Sir Robert Menzies, Premier of Australia had therefore been in continuous consultation with the British Government. It would not, however, be in the interest of Australia or any of her allies "if I were to make a breach of confidence and expose any of the course of that consultation, but it has been close, constant and effective and has served Australia's interests".

On October 6, the Australian Department of External Affairs said that Indonesia had refused military flights over her territory by Australian and New Zealand aircraft.

The Department said the refusal came about two weeks earlier and satisfactory alternative routes were made available for Australian aircraft.

The Indonesian Embassy in Canberra, however, denied any ban on flights.

[Prev. ref. 6072:MAL:B]

B. Use Of English: The Chief Minister of Sabah, Mr. Donald Stephens, said in the Legislative Assembly in Jesselton on September 21 that English could be used in the Assembly for 10 years from Malaysia Day and thereafter until the State Legislature provided otherwise.

A member had asked Mr. Stephens when the national language, Malay, would be used in the Assembly.

[It was officially announced in May that Malay would become the official language on the Malay peninsula in 1967. Singapore and other Malaysian territories do not have to decide until 1973.]

(*The Times*, London)

NEPAL

A. Irrigation Project On Sunkosi River—Survey Agreement With UN: The UN Special Fund and the Nepal Government entered into an Agreement in Khatmandu on October 12 providing for a preliminary survey of the Sunkosi River in eastern Nepal Terai to ascertain the technical feasibility of launching a power and irrigation project.

The Special Fund will, according to the Agreement, provide $120,000 of the $165,000 required for the survey. Nepal will give $18,000 in cash and equipment of $27,000 in kind.

The survey will be completed within a year by Special Fund technicians.

The Sunkosi project envisages the construction of a 40-mile-long canal and generation of power that could be utilized in neighbouring north Bihar.

The Agreement was signed by Mr. John Kesselstatt, Resident Representative of the Technical Assistance Board and Director of the Special Fund Programme and Mr. Bekh Bahadur Thapa, Secretary to the Nepal Government.

[Prev. ref. 5486:AOA:A]

C. Indian Gift Of X-ray Plant: A Rs. 30,000 x-ray plant was presented on October 5 to the ex-servicemen's hospital at Pokhara in central Nepal by Maj-Gen. Budh Singh, chief of the Indian military liaison group in Nepal.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The plant, a gift from the Chief of the Indian Army Staff, Gen. J. N. Chaudhuri, and all ranks of the Indian Army, was received on behalf of the hospital by Mr. Giri Prasad Budhathoki, Nepal's Assistant Minister for Health.

The 50-bed hospital was set up with Indian assistance by the Ex-Servicemen Board for the benefit of retired Gurkha soldiers and their families who have settled down in the area.

Speaking on the occasion, Mr. Budhathoki thanked the Indian Government for the gift which was promised for the hospital during Gen. Chaudhuri's visit to Nepal in 1963.

(*The Hindustan Times*, New Delhi)

PAKISTAN

A. Ban On Export Trade With South Africa: On October 7, Pakistan banned all export trade with South Africa.

The decision was taken by the Central Cabinet, presided over by President Ayub Khan.

The official announcement said the decision to ban exports to South Africa had been taken in pursuance of the UN resolution passed by the General Assembly in 1962 calling upon the member-States to break off diplomatic relations with the South African Republic, close their ports to all vessels flying South African flags, prohibit entry of their ships into South African ports, refrain from exporting goods including arms and ammunition to South Africa, boycott all South African goods and refuse landing and passage facilities to South African aircraft.

(*Dawn*, Karachi)

[Prev. ref. 5574:AOA:A, 5671:AOA:A]

SYRIA

A. New Cabinet: Lt-Gen. Amin Al-Hafez has formed a 22-man coalition Cabinet to replace the five-month-old Government of Mr. Salah Eddin Bitar, which resigned on October 3.

The new Cabinet is the fifth since the Baath Socialist Party came to power after the March 8, 1963 revolution.

It includes eight Ministers of the outgoing Government and 12 "political unknowns" who hold ministerial posts for the first time. It also comprises Baathist and independent unionists.

The decree accepting the resignation of the former Cabinet gave no reason for the change.

Under another decree, Maj-Gen. Salahal-Jadid, Army Chief of Staff, and Dr. Youssef Zeayen, Ambassador-designate to London and former Agrarian Reform Minister, have been appointed to the Presidency Council. They succeed Mr. Bitar and Mr. Mansour Al-Atrash, who have resigned.

Reports said the reason behind the surprise Government crisis appeared to be the discord between military leaders and the Baath Party over the attitude of the Syrian delegation in their talks with President Nasser of UAR.

President Nasser had made it clear that he regarded such a Syrian move as prerequisite for a normalization of Cairo-Damascus relations.

(*The Times of India*, Bombay)

[Prev. ref. 5571:SYR:A]

TURKEY

A. Plan For Euphrates Dam—Ankara Discussions On Foreign Aid: Representatives of seven countries, the International Bank and the European Investment Bank met in Ankara on September 28 for talks to consider the international financing of the Keban Dam on the Euphrates.

The proposed Dam will be situated at Keban, 30 miles north-west of the town of Elazig, in east Turkey, at the point of confluence of the eastern and western branches of the River Euphrates.

It will be 670 feet high from the rock foundation, will create a lake about 70 miles long and its estimated cost will be at least £125 million. Its purpose is twofold—to meet the increasing power needs in north and north-west Turkey, and to lay the power basis for the creation of heavy industry in east Turkey.

It is hoped that the project, which figures in the Turkish Five-Year Plan, will be one of the most important elements in rectifying the economic unbalance between the advanced western regions and the still under-developed east and south-east.

The Ankara talks were preliminary as none of the countries taking part in the "Keban Consortium" had yet committed itself to financial assistance. The representatives were from the United States, Britain, West Germany, France, Austria, Switzerland and Italy. Britain had three observers but did not send a full delegation as the British Government did not intend to take part in the financing of the project at present.

Technical feasibility studies had been carried out by an American firm and were understood to be positive, but there was believed to be reserve on the part of America and some other countries of the Consortium on whether the Dam should be given so high a priority in the Turkish Five-Year Plan. They were also said to feel that the question of the riparian rights of other countries, such as Syria and Iraq, should be settled before so large a scheme was embarked on.

A Turkish planning official said that if sufficient foreign aid was not forthcoming Turkey would try to finance the project from her own resources. Technical discussions took place this Summer in Ankara between Turkish, Syrian and Iraq delegations; Syria was particularly concerned because she cannot get on with her own construction of a dam at Tabqa, which West Germany is helping to finance, until details of the Keban project are fully known.

The Turks were understood to have assured both Syria and Iraq that the construction of the Keban Dam would not adversely affect the flow of the Euphrates in either country. Further meetings would be held between Turkey, Iraq and Syria to apportion the Euphrates waters.

(*The Times*, London)

[Prev. ref. 5683:TUR:A]

VIET-NAM (RVN)

A. Opening Of National Council: The National Council which is supposed to lead the country back to civilian rule was formally opened in Saigon on September 26 by the Chief of State, Gen. Duong Van Minh.

The 17-member Council, composed of civilians only, is charged with drawing up a provisional Constitution and naming a National Convention which will draft a permanent national charter and act as a legislative body during the interim period.

The Council represents religious and political groups but has no one directly representing peasants or labour.

Gen. Minh told the group: "The provisional leadership committee as well as the entire people place all their hopes in the High National Council.

"...The political situation in Viet-Nam has been in a constant state of turmoil and recent events bear witness that if we let this situation drag on, our beloved homeland will be annihilated."

Later, the Council elected Mr. Phan Khac Suu as Chairman of the Council. Other officials elected were: Dr. Nguyen Xuan Chu, Vice-Chairman; Mr. Tran Van Van, Secretary-General; and Mr. Nguyen Van Luc, Deputy Secretary-General.

End Of Armed Revolt In Central Highlands:

On September 28, the Prime Minister, Major-General Nguyen Khanh, attended a flag-raising ceremony marking what may be the end of an armed uprising by tribesmen in the central highlands.

The South Viet-Nam flag flew again over Bom Sar Pa jungle training camp, where mercenary troops of the Rhade tribe eight days earlier had killed their Viet-Namese instructors and revolted. A Government spokesman said that "the rebellion is considered finished."

The revolt was the outcome of traditional resentment of Viet-Namese authority by the mountain tribes—of which the Rhades are the most advanced.

The Government spokesman said that some of the demands of the tribesmen had already been agreed to, but complete autonomy over an area comprising three or four provinces could not be granted.

In Saigon the same day (September 28), nearly 200 students, mainly Roman Catholics, declared that they would demand that the Government purge political elements among teachers and students. Three people were killed and 16 wounded in clashes between demonstrators and security forces near the city of Qui Nhon on September 26.

Major-Gen. Khanh said in Saigon on September 29 it was likely that he would hand over the Premiership to a civilian before 28.

[Prev. ref. 6083:RVN:A]

ASIA OUTSIDE ASIA

A. WHO Drive Against Small-pox In South-East Asia: The World Health Organization's (WHO) Regional Office in New Delhi in a Press release late in September gave details of a drive to eradicate small-pox in South-East Asia.

The release said that "the main reservoirs of small-pox in the world today are found in Asia. Effective means of protecting people against small-pox have been known since the end of the 18th century and yet this painful, disfiguring and often fatal disease still takes a toll of thousands of deaths."

In 1963 there were about 93,000 cases and 24,500 deaths reported throughout the world. Of these, 75,500 cases and 23,000 deaths were in Asia. India reported the majority—60,900 cases and 19,500 deaths.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Nevertheless, progress had been made. During the last 10 years the reported number of cases in the world had dropped from about 500,000 to less than 100,000, and since in 1958 the World Health Assembly resolved that a concentrated effort should be made to achieve global eradication of small-pox, countries such as Argentina, Bolivia, Cambodia, Ceylon and Thailand had succeeded in controlling the disease.

Australia, Canada, the whole of Europe, New Zealand, the United States of America and some countries in South America became free from the disease in the first half of the present century, and in many other countries it was extremely rare. This did not mean, however, that these countries were altogether free from danger. Recent outbreaks in Europe, totalling 124 cases and 11 deaths between January 1, 1963 and April 24, 1964, had shown that no country was safe until worldwide eradication had been achieved.

Progress in small-pox eradication in other South-East Asian countries has recently been reported to WHO as follows:

Afghanistan: The WHO-assisted small-pox control pilot project started at the end of 1962 in Kabul has been successfully completed, and the Government has started a nation-wide eradication drive. A WHO medical officer has been assigned to the project, and freeze-dried vaccine is provided by the Organization.

Burma: A national long-term eradication programme was launched early this year. Freeze-dried vaccine is being supplied by the Soviet Union and WHO, and WHO and UNICEF are assisting the Government in starting the production of freeze-dried vaccine.

Ceylon: Small-pox has been eradicated, and immunization is being maintained by the general health services.

Indonesia: Emergency vaccination programmes are undertaken to control outbreaks of small-pox. A WHO consultant has recommended additional equipment for an expanded production of freeze-dried vaccine in the country.

Mongolia: Small-pox is not endemic.

Nepal: A small-pox control pilot project has been started, and vaccination activities in the Valley of Khatmandu were intensified with health education to overcome prejudices against vaccination. A WHO small-pox control officer is assigned to the project, and freeze-dried vaccine has been supplied by the Organization.

Thailand: The country-wide vaccination campaign is being maintained. No cases of small-pox were reported in 1963. The production of freeze-dried vaccine with WHO and UNICEF assistance continues.

(*WHO*, New Delhi)

[Prev. ref. 5095:AOA:E]

B. **World Tourism During 1963:** Sir William Hildred, Director-General of the International Air Transport Association (IATA), told the annual Conference of the Association in Bogota (Colombia) on September 14 that 1963 had been a dynamic year for world tourism.

He said: "International tourism poured an impressive $8,255 million into the stream of world trade in 1963—9.5 per cent more than the $7,516 million spent in 1962."

He said 1964 was expected to be even more prosperous from the tourist industry, and expenditure should reach $9,000 million.

The report said that in 1963 the total traffic on regular services of member-companies increased by 12.2 per cent compared with the previous year to reach a total of 16,900 million kilometres flown. The member-companies carried 135 million passengers; that was 13 million (or 11.6 per cent) more than in 1962.

This passenger traffic represented 147,000 million passenger kilometres, an increase of 13.1 per cent.

The amount of cargo carried was also higher, at 2,280 ton kilometres. Air mail carried amounted to 860 million ton kilometres, an increase of 7.5 per cent.

The proportion of seats filled on each flight was 53.6 per cent—0.2 per cent more than in 1962.

International flights continued to increase at a much greater rate than domestic flights. The increase on the North Atlantic routes was 9.6 per cent for scheduled flights and 31 per cent for charter flights.

On the financial side, operations revenue for 1962 (the last year for which complete figures were available) was $6,750 million and expenditure $6,473 million, showing a profit of $17 million as opposed to a loss of $118 million in 1961, a particularly bad year.

These figures concerned the exploitation of the lines only and did not represent net figures. The net figures showed losses of $27 million, to which should be added various subsidies amounting to $168 million, representing a total net deficit of $195 million.

Preliminary figures available for 1963 showed an improvement in the situation with an estimated operating profit of $165 million for the airlines.

As far as aircraft were concerned, the report showed that international airlines continued to increase the numbers of their jet aircraft while reducing the number of planes with other types of engines. This had the effect of slightly lowering the total number of aircraft in use.

At the end of 1963, the overall number of aircraft operated by IATA members was 3,075, of which 789 were jets, 614 turbo-prop aircraft, 1,643 piston-engined aircraft and 29 helicopters, an overall reduction of 3 per cent.

In closing, the report noted that the age of the supersonic aircraft was not far off (the Anglo-French Concord and an equivalent American aircraft being in the construction stage).

The report suggested that the airlines should study the question of operating these aircraft both from a technical and an economic point of view since the aircraft could be expected to go into service towards 1971, or 1972.

(*The Statesman*, Calcutta)

[Prev. ref. 3281:AOA:A]

C. **Commission's Report On Kennedy's Assassination:** The Warren Commission's report on the assassination of President J. F. Kennedy was released on September 28. It found that Lee Harvey Oswald, acting alone and not as "part of any conspiracy, domestic or foreign", assassinated President Kennedy on November 22, 1963.

Looking into Oswald's motives, the Commission could make no definite determination, but noted various factors, such as his resentment of all authority, his urge to find a place in history, his capacity for violence, and his expressed antagonism to the United States.

The Commission, headed by Mr. Earl Warren, Chief Justice of the United States, also found that Oswald had murdered the Dallas policeman, J. D. Tippit, when the latter approached him 45 minutes after the shooting of Mr. Kennedy.

In a further "reasoned judgment", the Commission found that Jack Ruby "acted independently" when he shot and killed Oswald, whom he did not know, in the Dallas police station two days after the President's death.

The Commission made its report to President Lyndon Johnson on September 25, and the White House released the voluminous study in the early hours of September 28.

The report was sharply critical of laxness on the part of the Federal Bureau of Investigation, the Secret Service and the Dallas police, and called for improvements in measures to protect American Presidents.

The Commission's investigation was as thorough, painstaking and objective as any in history. More than 25,000 persons were interviewed, and nearly 4,000 special reports covering tens of thousands of pages were studied.

In the end, the Commission found that Oswald had not known either Ruby or Tippit and that those two had not known each other.

The following are the 12 conclusions listed by the Commission in its report:

(1) The shots which killed President Kennedy and wounded Texas Governor John B. Connally were fired from the sixth floor window at the south-east corner of the Texas School Book Depository Building.

(2) The weight of the evidence indicated that there were three shots fired. One of the three missed, but the Commission was not sure which one this was.

(3) There was "very persuasive evidence" from the experts to indicate that the same bullet which pierced the President's neck also caused Governor Connally's wounds. This was the first of two bullets to strike the President.

(4) The shots which killed President Kennedy and wounded Governor Connally were fired by Lee Harvey Oswald.

(5) Oswald killed Dallas police patrolman J. D. Tippit approximately 45 minutes after the assassination.

(6) Within 80 minutes after the assassination and 35 minutes of the Tippit killing, Oswald resisted arrest at a Dallas theatre by attempting to shoot another Dallas police officer.

(7) Oswald was not subjected to physical coercion by police, although force was required to effect his arrest. He was subjected to "harassment" by the "uninhibited access" which newsmen were permitted to the area through which he had to pass when being moved from his cell to other portions of the building. The numerous statements, "sometimes erroneous," by police after his arrest would have presented "serious obstacles" to the obtaining of a fair trial for Oswald.

(8) Jack Ruby killed Lee Harvey Oswald. There was no evidence that he was assisted by any law enforcement officer. Dallas police were at fault in trying to transfer Oswald to the county jail "in full public view."

(9) The Commission found no evidence that either Lee Harvey Oswald or Jack Ruby was part of any conspiracy, domestic or foreign, to assassinate President Kennedy. Furthermore, the Commission "found no evidence to show that Oswald was employed, persuaded, or encouraged by any foreign Government."

(10) In its entire investigation the Commission found no evidence of conspiracy, subversion, or disloyalty to the US Government by any Federal, state or local official.

(11) Oswald acted alone. As for his motives, the report offered definite determination, but noted various factors, such as his resentment of all authority, his urge to find a place in history, his capacity for violence, and his expressed antagonism to the United States.

(12) Improvements were needed in measures to protect the President.

The Commission was appointed in November 29, 1963 by President L. B. Johnson to seek out and report the facts "on the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

assassination of President Kennedy and the slaying of Lee Oswald and report them "to the American people, and to the world."

When the Commission made its report to President Johnson, he noted that the panel had been guided by a "determination to find and to tell the whole truth of these terrible events." "This is our obligation, to the good name of the United States of America and to all men everywhere who respect our nation—and above all to the memory of President Kennedy."

In a summary section of the massive report, the Commission said its conclusions were based on all the available evidence with no limitations placed on the inquiry.

Seven distinguished Americans constituted the Commission, which was headed by Chief Justice Earl Warren.

The other members of the Commission were: four members of Congress from both major political parties—Senators Richard Russel and John Sherman Cooper, and Representatives Geral Ford and Hale Boggs—and Mr. Allen W. Dulles, former Director of Central Intelligence Agency, and Mr. John J. McCloy, financier, Government official and diplomat, who was US Ambassador in West Germany.

D. 13th Pugwash Conference: The President of the Czechoslovak Academy of Sciences, Academician F. Sorm, opened on September 13 the 13th Pugwash Conference in Karlovy Vary.

The Conference ended on September 19.

The scientists and scholars taking part in the Conference proposed a Non-aggression Pact between NATO and the Warsaw Pact countries as well as a "nuclear freeze" in Europe.

The proposals, described as "desirable to avoid nuclear proliferation," were published by a committee of the Pugwash Conference:

The proposals included:

Germany: Nations concerned with the German problem "should promptly recognize and guarantee the existing frontiers of Germany."

NATO: The idea of a multilateral force should be abandoned, a nuclear freeze in Europe "deserves urgent consideration" and a non-aggression treaty between NATO and Warsaw Pact countries "would be most valuable."

The programme was based on discussions among the 86 countries and scholars from 19 countries attending the Conference.

[Prev. ref. 5665:INI:B]

E. UN Committee On Trade Set Up: The UN Secretary-General, U Thant, announced on September 22 the names of 12 members of a Special Committee set up by the recent UN Conference on Trade and Development (see page 5954.)

The Committee will try to set up conciliation machinery for problems arising from the Conference.

The aim of new arrangements will be to promote international trade and, in particular, the rate of economic growth in developing countries.

The Committee members are: Mr. D. S. Joshi (India); Syed Amjad Ali (Pakistan); Mr. Gabriel d'Arboussier (Senegal); Mr. A. P. Fleming (Australia); Mr. Placido Garcia Reynoso (Mexico); Mr. Richard N. Gardner (USA); Mr. J. Lacarte Muro (Uruguay); Mr. Manfred Iachs (Poland); Mr. V. V. Mordvinov (USSR); Sir Keith Unwin (U.K.), and Mr. Maurice Viaud (France).

Terms Of Reference:

A UN Press release on October 9 noted the terms of reference of the Special Committee.

They are:

"(a) The task of the Committee shall be to prepare proposals for procedures within the continuing machinery designed to establish a process of conciliation to take place before voting and to provide an adequate basis for the adoption of recommendations with regard to proposals of a specific nature for action substantially affecting the economic or financial interests of particular countries;

"(b) Such conciliation may be carried out through a system of conciliation committees, the good offices of the Secretary-General of the Conference, or any other means within the frame-work of United Nations;

"(c) In devising the procedures referred to above, the Committee shall take into consideration that the interested States may wish to place on record and to publicize their views. It shall also take into account the desirability of issuing reports at appropriate times which would state the areas of agreement and disagreement and the explanation of positions as regards, in particular, the implementation of proposed recommendations;

"(d) The Committee should also consider the desirability of applying appropriate procedures to proposals involving changes in the fundamental provisions of this resolution; and

"(e) Any Government participating in this Conference may submit to the Special Committee such proposals and recommendations as it considers relevant to subsection (a) above provided they do not imply any amendment to the Charter of United Nations or any departure from the principle that each country has one vote. The Special Committee shall include a study of such proposals and recommendations in its report to the General Assembly."

In accordance with the recommendations of the UN Conference on Trade and Development, the members of the Committee are representatives of the main interests and trends of opinion involved in the matter, and have been selected by U Thant on an equitable geographical basis, after consultation with their respective Governments.

The Committee began its work at UN Headquarters from September 28 to October 23.

The over-all purpose of the new institutional arrangements is to promote international trade, especially with a view to accelerating the economic growth of developing countries. Another goal is the co-ordination of the activities of other institutions within the UN systems in the field of international trade and related problems of economic development.

F. Richest Nations In The World: The two richest nations in the world in 1962 in proportion to their population were Kuwait and Qatar, in the Middle Eastern oil belt, according to an article on September 2 in The *Financial Times*. The two countries also held the leading positions in 1953.

The paper assessed the relative economic standing of the 15 nations mentioned in the article by calculating the gross national product per head in dollars for each country.

It admitted this was crude as so many important factors were omitted, but it said it provided a rough guide.

The third and fourth in the table were USA and Canada, occupying the same position as they did in 1953, but Sweden rose from eighth place to fifth while Switzerland dropped from fifth to sixth.

Australia rose one place, from ninth to eighth. New Zealand dropped from sixth to ninth.

West Germany at the bottom of the table in 1953, occupied 11th place in 1962 while Britain dropped from 10th place to 13th.

The Soviet Union was placed just outside the first 15 with Venezuela following, then Czechoslovakia, East Germany, Poland, Hungary, Rumania and Bulgaria.

SPORT

A. Asian Table Tennis Championship: Japanese table tennis players won all the 11 titles at the seventh Asian Table Tennis Championship which ended in Seoul on October 4.

Ninety-eight players from Formosa, India, South Korea, Japan, the Philippines, Singapore, Thailand and South Viet-Nam participated in the seven-day tournament.

The South Koreans put up the best display against the Japanese, reaching the final in the four team events and in the boys and girls individual events.

Formosa's participation in the Championship caused some complications, but the Table Tennis Federation of Asia decided at a Congress held during the Championship that further complications would be averted by supporting Formosa's application for membership to the International Table Tennis Federation.

Mr. T. D. Ranga Ramanujam, the newly elected President of the TTFA said he was satisfied with the running of this year's Championships.

The following are the results:

Men's singles: Kohji Kimura beat Ken Konaka 21-18, 13-21, 21-15, 21-18.

Men's doubles: Kohji Kimura and Ken Konaka beat Hiroshi Takahashi and Hiroaki Hashi 23-21, 21-11, 21-15.

Women's singles: Miss Masako Seki beat Miss Sunao Isomura 21-11, 21-18, 22-20.

Women's doubles: Miss Masako Seki and Miss Naoko Fukazu beat Miss Mosako Ohta, and Miss Sunao Isomura 21-9, 21-16, 20-22, 16-21, 21-7.

ASIAN RECORDER

November 18—24, 1964

Regd. No. D-727
Vol. X No. 47

CAMBODIA

A. Diplomatic Ties With Portugal And South Africa Severed: The Head of State, Prince Norodom Sihanouk, announced in Pnom Penh on October 13 that Cambodia had decided to break off diplomatic relations with Portugal and South Africa.

He said the decision was made as a gesture of solidarity with the African countries of the Cairo Non-aligned Conference whose final resolution he termed as "a precious contribution to the cause of justice and liberation of peoples".

He was in Peking during the Cairo Conference and returned to Pnom Penh after talks in Peking both with Chinese leaders and the North Viet-Nam Premier, Mr. Pham Van Dong.

He said China and "some of the divided countries" should be admitted to United Nations. China's admission was a logical step and "it would be dangerous to deny this much longer". Admission to UN of divided States (meaning Korea and Viet-Nam) would be not to sanction their division but to give equal chances to both northern and southern parts of these countries being heard.

He was happy with the talks he had with the North Viet-Nam leader, who he said had assured him that "Viet-Nam of tomorrow would never again touch Cambodia." The Prince added that "if China is given better treatment she will prove more conciliatory".

(*The Hindu*, Madras)

CEYLON

A. Final Report Of Press Commission: The Press Commission, in its final report made public on October 13, said that it regarded the setting up of an independent Press Council as a pre-requisite for a take-over of the Lake House group of newspapers, the largest in the country. [For background see pages 6015 and 6087].

It said that the Press Council should "be completely immune from any political or other pressure". It added: "The scheme we devised for the break-up of the monopoly was necessarily dependent on the existence of a Press Council", as recommended in the Commission's interim report in June.

"In the absence of such a Press Council we certainly would not have envisaged the formation of a public corporation to take over the Lake House Press", the Commission said. "The monopolistic ownership of the Lake House group of newspapers must, however, be terminated in any event."

If a Press Council were not set up—"we would definitely refrain from recommending the take-over of the Lake House group of newspapers, but instead would recommend that ownership be diffused in the hands of a public company as set out in the interim report".

It said it was the duty of a Press Council to see that all political parties were treated equally without fear or favour by newspapers. "From evidence placed before us we are satisfied that existing newspapers did not hesitate to fabricate, suppress, slant or distort news and views whenever it suited them. They have been further guilty of anti-Buddhist and anti-national activities which have been far more serious than the earlier mentioned lapses on their part."

It alleged that English language newspapers in Ceylon were less patriotic than their counterparts in India in their attitude to the problem of the people of Indian origin in Ceylon. The Indian Press had consistently advocated the cause of the Indians resident in Ceylon. "It would appear that the Ceylon High Commission in New Delhi finds it difficult to get Ceylon's point of view published in the leading Indian newspapers. They are too patriotic to give publicity to views which are not in consonance with those of their own Government.

"However, the English language newspapers of Ceylon do not evince the same interest in matters affecting this country in regard to the vexed question of citizenship.

"Senior officials of the External Affairs Ministry gave evidence before the Commission. It is, therefore, significant that the Commission has taken the trouble to give what is the Government's stand on the Indo-Ceylon issue."

The Commission observed that the Press in Ceylon "almost as a whole" had not conformed to the general principles of journalism followed in democratic countries.

It said: "The Indo-Ceylon citizenship question is one of utmost importance to this country. It affects 800,000 to 1,000,000 Indians who are descendants of Indian immigrants, most of whom were brought to the Island by the British planters to open up vast areas and grow tea and rubber.

"Nearly 150,000 of this class have obtained citizenship rights but as many as 800,000 more are aliens.

"According to the Ceylon point of view they are Indian citizens although the Indian Government attempts to make out that they are Stateless persons and the responsibility in respect of them lies on Ceylon."

The Commission went on to say that "this Island is comparatively a small one and it is one of the most densely populated areas in the world. That being so the question of granting citizenship to 800,000 or more Indians is going to affect not only the present-day nationals of this country but also the future generations of such nationals.

"Recently, the Indian Government, it would appear, agreed to take over considerable numbers of Indian citizens who had migrated to Burma and African countries which have obtained independence during the past few years."

The report said the people of this country were of the view that India should adopt the same liberal policy in regard to her people resident in Ceylon.

Bill Introduced:

The take-over by a State-owned corporation of the leading newspaper group in Ceylon (Associated Newspapers of Ceylon Limited), publishing five dailies and some other journals, is envisaged in a Bill presented in the House of Representatives on October 15.

The Bill also provides for the vesting in the corporation of the shares held by the company in the only news agency in Ceylon, Press Trust of Ceylon (PTC), which distributes Reuter and PTI news in the Island. The company holds a majority of shares in PTC.

The Bill will come up for its second reading in the House some time in November after the return of the Prime Minister, Mrs S. Bandaranaike, from abroad.

The Bill was presented in the House by the Parliamentary Secretary to the Minister of Justice, Mr. Daya Pasqual, amidst applause from the Government benches.

The Rs. 10-million corporation, which will be known as Newspaper Corporation of Ceylon, will have a five-member board of directors to be appointed by the Minister of Justice, including representatives of working journalists and workers.

The Bill, consisting of 78 clauses, provides for the payment of compensation in respect of property vested in the Corporation which will be determined by a compensation tribunal. The mode and manner of payment of compensation is to be determined by the Minister in consultation with the Minister of Finance.

The journals that will be taken over by the Corporation are: **Ceylon Daily News**, **Ceylon Observer** (daily and Sunday editions), **Ceylon News** (a weekly digest of news), **Dinamina** (Sinhalese daily), **Ferguson's Ceylon Directory**, **Janata** (Sinhalese daily), **Lanka Jana Potha** (Sinhalese version of the Directory), **Mihira** (children's paper), **Nava Yugaya** (monthly magazine), **Sarasaviya** (weekly), **Silumia** (Sunday edition of **Dinamina**) and **Thinakaran** (Tamil daily).

The Bill was brought forward following the failure of the Government to get the Press Council Bill passed expeditiously by Parliament.

A draft of the Bill was sent to Mrs. Bandaranaike, in Cairo for her approval. The Cabinet approved the Bill on October 14.

CPU Criticism:

In London, the Commonwealth Press Union (CPU) said that it was making "every effort" to dissuade the Ceylonese Government from nationalizing the largest newspaper group in the country.

Brig. Lionel Cross, CPU Secretary, told newsmen: "We feel very strongly about it. The CPU Chairman, Mr. Gavin Astor, is seeking an interview with Mrs. Sirimavo Bandaranaike, Ceylonese Prime Minister, who is now in London."

Brig. Lionel Cross, CPU Secretary, told Government "had been trying to impose repressive Press laws" for the last three years. The CPU had been fighting for the freedom of the Press in Ceylon and apparently the protests by newspapers had to a certain extent influenced the Government. "We are asking our member-newspapers all over the Commonwealth to comment in their editorials about the Ceylonese Government's sanctions".

CHINA

A. Atomic Bomb Exploded: China exploded on October 16 her first atomic bomb, thus becoming the world's fifth nuclear Power, the others being USA, USSR, UK and France.

A statement on the explosion did not disclose details of the size or type of the bomb, but said the atomic bomb was still a "paper tiger."

The following is the text of the official statement on the explosion quoted by the New China news agency:

"China exploded an atom bomb at 1500 hours on October 16, 1964, and thereby conducted successfully its first nuclear test. This is a major achievement of the Chinese people in their struggle to increase their national defence capability and oppose the United States imperialist policy of nuclear blackmail and nuclear threats.

"To defend oneself is the inalienable right of every sovereign State, and to safeguard world peace is the common task of all peace-loving countries. China cannot remain idle and do nothing in the face of the ever-increasing nuclear threat posed by the United States. China is forced to conduct nuclear tests and develop nuclear weapons.

"The Chinese Government has consistently advocated the complete prohibition and thorough destruction of nuclear weapons. Should this have been realized, China need not develop the nuclear weapon. But this position of ours has met with stubborn resistance from the United States imperialists.

"The Chinese Government pointed out long ago that the Treaty on the partial halting of nuclear tests, signed by the United States, Britain, and the Soviet Union in Moscow in July, 1963, was a big fraud to fool the people of the world, that it tried to consolidate the nuclear monopoly held by the three nuclear Powers and tie up the hands and feet of all peace-loving countries, and that it not only did not decrease but had increased the nuclear threat of United States imperialism against the people of China and of the whole world.

"The United States Government declared undisguisedly even then that the conclusion of such a Treaty did not at all mean that the United States would not conduct underground tests, or would not use, manufacture, stockpile, export or proliferate nuclear weapons. The facts of the past year and more fully prove this point.

"During the past year and more the United States has not stopped manufacturing various nuclear weapons on the basis of the nuclear tests which it had already conducted. Furthermore, seeking for ever greater perfection, the United States has, during this same period, conducted several dozen underground nuclear tests, thereby more perfecting the nuclear weapons it manufactures.

"In stationing nuclear submarines in Japan the United States is posing a direct threat to the Japanese people, the Chinese people, and the peoples of all other Asian countries. The United States is now putting nuclear weapons into the hands of the West German revanchists through the so-called multilateral nuclear force and thereby threatening the security of the German Democratic Republic (East Germany) and the other East European socialist countries.

"United States submarines carrying Polaris missiles with nuclear warheads are prowling the Formosa Straits, the Tonkin Gulf, the Mediterranean Sea, the Pacific Ocean, the Indian Ocean, and the Atlantic Ocean, threatening everywhere peace-loving countries and all peoples who are fighting against imperialism, colonialism and neo-colonialism.

"Under such circumstances how can it be considered that the United States nuclear blackmail and nuclear threat against the people of the world no longer exist just because of the false impression created by the temporary halting of atmospheric tests by the United States?

"The atom bomb is a paper tiger. This famous saying by Chairman Mao Tse-tung is known to all. This was our view in the past and this is still our view at present. China is developing nuclear weapons not because we believe in the omnipotence of nuclear weapons and that China plans to use nuclear weapons. The truth is exactly to the contrary.

"In developing nuclear weapons China's aim is to break the nuclear monopoly of the nuclear Powers and to eliminate nuclear weapons. The Chinese Government is loyal to Marxism-Leninism and proletarian internationalism. We believe in the people. It is the people who decide the outcome of a war and not any weapon.

"The destiny of China is decided by the Chinese people, and the destiny of the world by the peoples of the world and not by the nuclear weapon. The development of nuclear weapons by China is for defence and for protecting the Chinese people from the danger of the United States launching a nuclear war.

"The Chinese Government hereby solemnly declares that China will never at any time and under any circumstances be the first to use nuclear weapons.

"The Chinese people firmly support the struggles for liberation waged by all oppressed nations and people of the world. We are convinced that by relying on their own struggles and also through mutual aid the peoples of the world will certainly win victory.

"The mastering of the nuclear weapons by China is a great encouragement to the revolutionary peoples of the world in their struggles and a great contribution to the cause of defending world peace. On the question of nuclear weapons, China will neither commit the error of adventurism nor the error of capitulationism. The Chinese people can be trusted.

"The Chinese Government fully understands the good wishes of peace-loving countries and people for the halting of all nuclear tests. But more and more countries are coming to realize that the more the United States imperialists and their partners hold on to their nuclear monopoly the more is there danger of a nuclear war breaking out. They have it and you do not, and so they are very haughty.

"But once those who oppose them also have it, they would no longer be so haughty, their policy of nuclear blackmail and nuclear threat would no longer be so effective, and the possibility for a complete prohibition and thorough destruction of nuclear weapons would increase.

"We sincerely hope that a nuclear war would never occur. We are convinced that so long as all peace-loving countries and people of the world make common efforts and persist in the struggle, a nuclear war can be prevented.

"The Chinese Government hereby formally proposes to the Governments of the world that a 'summit' conference of all the countries of the world be convened to discuss the question of the complete prohibition and thorough destruction of nuclear weapons, and that, as a first step, the summit conference should reach an agreement to the effect that the nuclear Powers and those countries which will soon become nuclear Powers, undertake not to use nuclear weapons, neither to use them against non-nuclear countries and nuclear-free zones nor against each other.

"If those countries in possession of huge quantities of nuclear weapons are not even willing to undertake not to use them, how can those countries not yet in possession of them be expected to believe in their sincerity for peace and not to adopt possible and necessary defensive measures?

"The Chinese Government will, as always, exert every effort to promote the realization of the noble aim of the complete prohibition and thorough destruction of nuclear weapons through international consultations. Before the advent of such a day, the Chinese Government and people will firmly and unswervingly march along their own road of strengthening their national defences, defending their Motherland and safeguarding world peace.

"We are convinced that nuclear weapons, which are after all created by man, certainly will be eliminated by man."

Western View:

According to experts in the West, China's first nuclear device would be technically primitive.

It was no doubt detonated, as were the first devices tested by the United States, Britain and France, at the top of a mast. It is not therefore certain that a version engineered for delivery from a bomber or rocket missile has yet been produced.

According, however, to a recent article in **The China Quarterly** by Mrs. Alice Langley Hsieh, the chief American expert on Chinese defence matters, Russia had before 1959 "shipped numerous rockets to China" and there were other reports that Moscow "had supplied Peking with short-range missiles" and "that the Chinese are testing missiles over ranges of five to seven hundred miles".

Expert opinion in the West was that it would take six months to proceed from a tower test to aircraft delivery, and probably somewhat longer for rocket delivery. Irrespective of means of delivery, it can be assumed that, as in the early stages of French development, supplies of plutonium for the production of atomic devices would be available at first only on a one-at-a-time basis.

Expansion of plutonium production would be a longer job, involving the construction of more nuclear reactors and plant for separating plutonium on a larger scale than a single test implies.

To design and build a plant for separating uranium 235—the fissile isotope of uranium—from natural uranium would be a bigger undertaking again. To develop fusion weapons could hardly, at the best, take less than the five years taken by Britain—and probably more, because of the smaller base from which China begins.

More advanced means of delivery—whether intercontinental missiles, nuclear armed submarines, or a heavily automated low-flying aircraft—would be more remote again, and equality with USA or Russia unattainable for practical purposes.

According to an earlier **New York Times** report, China has established two plants —one at Paotow in Inner Mongolia and the other at Lanchow in Kansu province —for production of fissionable material.

The report was based on an analysis of the results of several "detection" flights carried out over the Chinese mainland by the Formosan pilots using U-2 planes.

The report said the reactor at Paotow was capable of producing plutonium in sufficient quantities to explode "two low-yield atomic devices" a year. The plant at Lanchow is designed to produce another fissionable material, U-235, for atomic bombs.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

From the Western military point of view, The New York Times said, the mere explosion of a nuclear bomb by China was unlikely to add immediately to its military strength. It would take China many years to develop the planes capable of carrying nuclear bombs or missiles.

[The Russians have withdrawn all their technicians from China following the open ideological breach between the two Communist countries.]

In any case, China's explosion of a nuclear device could undermine the favourable atmosphere generated by the Moscow test ban Treaty which had been signed by some 100 countries, in addition to the chief signatories—the Soviet Union, and USA. Only France and China among the major Powers have not signed the Treaty.

Re-assessment Of Chinese Military Capabilities:

The *US News and World Report* said on October 13 that a searching intelligence re-assessment of China's military might led US officials to conclude the following:

(1) China's ground army is good enough to defend China successfully against any military force in the world, except the combined air, land and sea forces of either USA or Russia.

(2) For fighting beyond its borders, the Chinese army is not a first class military force capable of fighting a first class enemy. Inadequate transport and industrial facilities restrict the areas in which the Chinese could move an army and send it supplies.

The scrutiny was prompted by the news that the Chinese were ready to touch off their first atomic explosion.

It found the Chinese atomic capability would make very little difference in the military situation and "as is known it is essentially a political weapon to impress the neighbours. An initial blast will use up China's atomic fuel supply and it will be years—decades, more likely—before Peking bears any resemblance to a nuclear Power."

On the question whether China, in modern combat terms, was really a 'paper tiger' as its Communist leaders like to call USA, the report said: "The Chinese have a ground army of 2.5 million men—well-officered, well-trained and highly disciplined.

"Their air force consists of 2,000 to 2,500 planes—mostly old-type MIG fighters, but able to do vast damage.

"The military high command is rated as highly accomplished.

"Chinese handicaps are: a deteriorating industrial base; inadequate food production; inability to modernize the army in the way USA and Russia have done since World War II; an out-of-date air force, with no first class replacements in sight; and a weak navy that is no match for the US Seventh Fleet in the Pacific."

The US Secretary of State, Mr. Dean Rusk, had earlier announced on September 29 that China might detonate her first nuclear device in the near future and said USA had taken the possibility into full account in determining her military posture and the nuclear weapons programme (see page 6135).

World Reaction:

Leaders and the Press in several countries voiced concern at the Chinese atomic explosion.

India's reaction to the nuclear explosion by China was summed up by the Prime Minister, Mr. Lal Bahadur Shastri, when he described the Chinese action as a "menace to mankind" and "danger to the maintenance of peace".

He hoped that the voice of peace-loving people in all countries would be raised against the Chinese nuclear explosion and the world conscience would be awakened to "fight this aggression on peace and security."

"China", he said, "has been trying to build up a mighty war machine. The atom bomb is the latest type of weapon which cuts across the general desire of humanity to live in peace".

In Washington, President Johnson confirmed that China had exploded a "low-yield" nuclear test and declared: "Its military significance should not be overestimated."

In a broadcast, he asserted US readiness to respond to any call from the non-Communist countries of Asia for help against threats of aggression—thus offering them reassurance in the face of China's emergence as a nuclear Power.

At the same time, he declared that "the Chinese Communist nuclear weapons programme is a tragedy for the Chinese people because it diverts scarce resources needed in other fields of activity and it must increase their sense of insecurity."

He said the explosion gave "no reason to fear that it could lead to immediate danger of war." Even if China developed an "effective" nuclear weapons system, the strength of the "free world" would continue to be "enormously greater."

He added that he welcomed the assurances given by the Soviet Government that it would continue seeking "more solid peace."

In London, Britain's new Labour Government declared that China's test would not affect the military situation in Asia.

A special Government statement said: "No foreseeable development of nuclear capacity by the Chinese could significantly affect the balance of military power."

The statement, personally approved by Mr. Harold Wilson within 24 hours of his becoming Prime Minister, said the British Government's attitude to the Nuclear Test Ban Treaty remained unchanged, as also its determination to meet their defence commitments in South-East Asia. "Her Majesty's Government is, nevertheless, deeply disappointed that the Chinese should have decided to do so in face of world opinion and the hopes raised in the Test Ban Treaty."

The news of the Chinese explosion was received in United Nations with regret and concern.

Coming as it did over a hectic 24-hour period—deposing of Mr. Nikita Khruschev in Moscow and the defeat of the Conservatives in Britain—diplomats were generally far too numbed to make comment.

The general view, however, was one of regret that China should have exploded the atom bomb in defiance of the Moscow test ban Treaty which had been overwhelmingly accepted by the nations of the world. There was also regret at the Chinese defiance of an appeal by the Cairo Non-aligned Conference and the UN resolutions.

Several non-aligned countries felt that the Chinese explosion should act as a spur to bring China into UN and to accelerate disarmament negotiations and agreement.

The Secretary of the Asian Solidarity Conference said in Cairo that he was "shocked" when he heard that China had exploded a nuclear bomb. "At last they have done it", he added.

UAR officials privately said they were disappointed that China should have exploded an atom bomb within days of the appeal by the Cairo Non-aligned Conference that non-nuclear Powers should desist from testing nuclear weapons.

A chorus of dismayed protest went up in Japan.

The official Government reaction as expressed in a statement issued by the Chief Cabinet Secretary, Mr. Zenko Suzuki, was that the Chinese test coming at a time when international tension was easing was "in complete disregard of the earnest wishes of all mankind and most regrettable."

The statement registered a strong protest in the name of the Japanese people and expressed fears of radio-active ashes from the test falling over Japan. In fact the Central Meteorological Agency warned that radio-active dust might reach Japan within two days.

Excepting the pro-Peking Japan Communist Party, everyone else from Government to Gensuikyo (Council Against Atomic and Hydrogen Bombs) which is dominated by a pro-Peking rump expressed shock and regret. With their loyalties under strain, a good many on the Left, including Gensuikyo, professed sympathy with the circumstances that "forced" China to act, but clearly a good many illusions had been shattered.

A typical disillusioned remark was that China had "betrayed its conscience". Socialists and allied trade unions were even planning to stage protest rallies.

In Khatmandu, the Chairman of the Council of Ministers, Dr. Tulsi Giri, told newsmen that he did not expect any shift immediately in the balance of power in South or South-East Asia as a direct outcome of the atomic blast by China.

He said: "Everybody knows Nepal's stand on world peace and naturally we do not appreciate this test by the Chinese as it will not contribute to world peace."

He said that all Powers, including China, should sign the partial nuclear test ban Treaty.

The leading Yugoslav papers *Borba* and *Politika* sharply criticised the first atomic explosion in China.

The papers said that the Chinese nuclear test was harmful for the policy of peaceful co-existence and disarmament, and was directly against the Moscow test ban Treaty and the Cairo Declaration of non-aligned countries.

(*The Times*, London, *The New York Times*, *The Times of India*, Bombay and *The Statesman*, Calcutta)

B. Trade Prospects With West: China's ideological dispute with Moscow is expected to divert an estimated $150 million in a two-way trade to non-Communist countries this year.

Drawn by economic necessity out of their ideological cocoon, Chinese officials are experimenting with trade practices and appearing in places previously shunned as capitalistic.

Commercial counsellors have joined the Chinese Embassies in London and Paris. Peking is sending more trade and technical delegations to such countries as Britain, Japan, France, the Netherlands and Switzerland.

Trade experts are looking for new markets in Africa, West Asia, Southern Asia, and Latin America to absorb the cheap wearing apparel and textiles that once were exported to Eastern Europe.

As Chinese trading habits change, businessmen of the non-Communist countries have been trooping in increasing numbers to Peking. Visa restrictions have been

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

eased and tourist facilities improved to encourage the influx.

Britain was planning to display in Peking in November a large industrial exhibition. France and Japan will stage trade fairs again in 1965.

Amidst all these flirtations with the non-Communist countries, the most notable absentee is the United States, which has imposed a complete embargo on trade with China. For the USA, the economic loss in potential trade is insignificant. Although many Western businessmen continue to pursue what most economists regard as the myth of the vast China market, the foreseeable possibilities of trade with China remain unlimited. Peking lacks the foreign exchange or saleable goods to become a top world trading nation.

China does not publish extensive statistics, but the volume of trade in 1963 was reliably estimated at $2.7 billion. The relative magnitude of this volume, for a country with a population of 700 million, can be gauged by comparing it to the annual volume of $1 billion for prosperous Formosa, which has a population of about 10 million.

The volume of Peking's foreign trade is expected to increase by about 2 per cent in 1964, but the significant change for businessmen lies more in the shift in the pattern of trade. The $1.5 billion is likely to grow by about 10 per cent at the expense of the East European Communist countries.

Japanese businessmen have made the most impressive strides in trade with China. Japan, which did about $135 million in a two-way trade in 1963, increased the volume to $160 million in the first seven months of 1964 and was expected to reach the $250 million mark by the end of the year. The level will probably be $300 million in 1965.

Peking has found it convenient to deal with Japan because it can obtain sophisticated industrial products at freight rates less than those obtained in dealings with distant Western countries. However, after its disillusioning experience with the Soviet Union, Peking is making a point of diversifying its trade pattern and this will be a limiting factor for Japanese business.

The expansion of trade with Japan illustrates that China tends to do business where the most favourable economic terms are available rather than on a political basis. Japan has arranged a number of official and cultural exchanges with the Peking Government but withheld diplomatic recognition.

Chinese officials have told visiting delegations from West Germany, the Netherlands, Belgium and Japan that business prospects would be substantially improved if their Governments extended diplomatic recognition. However, businessmen of France, which recognized the Peking Government last January, have not reported any significant increase in their volume of trade.

FORMOSA

A. Gen. Chiang Kai-shek Condemns Chinese Border Claims: The President, Generalissimo Chiang Kai-shek, on October 10 condemned Mr. Mao Tse-tung for claims outside the present borders of China.

He said Mr. Mao's "outpourings on 'border' issues are particularly preposterous."

He made the statement in a message on the 63rd anniversary of the 1911 Revolution which led to the fall of the Manchu dynasty and establishment of the Republic of China.

It recalled President Chiang's World War II assertion that his Government would seek no territory outside its own borders.

Although he said nothing to suggest a reconciliation with the Soviet Union, he might have intended to convey to Moscow that it would be better to have him and his Chinese Nationalists rule on the mainland and than the Chinese Communists.

He said: "The fact that the Communist regime is doomed illuminates our nation with a light brighter than ever.

"The Republic of China is a part of the free world and its fate is inseparable particularly from that of its Asian neighbours."

He repeated his long-standing contention that "the present problem of Asia centres on China and the Communist regime on the Chinese mainland is the source of all the troubles throughout Asia."

"Recently," he added, "the Chinese Communists have intensified their 'fight the United States and support Viet-Nam' campaign and are playing an increasingly active role in the Communist armed insurrections in South Viet-Nam and Laos.

"Their purpose is to Bolshevize and enslave all countries in Asia and to use these as tools for subjugating all mankind.

"This is a crucial moment for us Asians. We should close ranks and help one another in order to check the further spread of Communism. ... I would like to warn the free nations and people in Asia that nothing threatens us more than the Communists and our first concern is unity among ourselves."

(*The Hindustan Times*, New Delhi)

INDIA

SUMMARY: Mr. Lal Bahadur Shastri's Talks With President Ayub Khan; Progress In Defence Preparedness; IAC Agreement With Air Ceylon.

A. Mr. Lal Bahadur Shastri's Talks With President Ayub Khan: A big welcome was given to the Prime Minister, Mr. Lal Bahadur Shastri, when he arrived in Karachi on October 12 from Cairo for talks with President Ayub Khan.

President Ayub Khan greeted Mr. Shastri with a warm hand-shake as the latter stepped out of the plane.

The entire diplomatic corps, headed by the Iraqi Ambassador, Mr. Gilani, the doyen of the diplomatic corps, including heads of about 50 foreign missions, were present to greet Mr. Shastri. The Chinese Ambassador was also present.

The Pakistan Foreign Minister, Mr. Z. A. Bhutto and leading Karachi citizens, headed by Mr. Habibullah, Vice-Chairman of the Karachi Corporation, and several members of the National and Provincial Assemblies were among those present.

Large crowds, including school-children, collected on the 10-mile route from the airport to the President's House and cheered Mr. Shastri as he drove with President Ayub Khan.

Communique:

A joint *communique* issued at the end of the talks said Mr. Shastri and President Ayub Khan had a general discussion on relations between the two countries.

It said: "The President of Pakistan and the Prime Minister of India met informally today (October 12) during the latter's stop-over at Karachi en route to New Delhi from Cairo.

"The two leaders have had general discussion on relations between the two countries. They were both firmly of the view that these relations needed to be improved and conducted to their mutual advantage as good neighbours.

"They agreed that to that end it was necessary to promote better understanding between the two countries and to settle outstanding problems and disputes on an honourable and equitable basis. They, however, agreed that discussions between the two Governments at appropriate levels should be held at the earliest possible moment so as to give effect to their common desire for friendly co-operation between the two countries.

"The opportunity to have this personal exchange of views was welcomed by the President and the Prime Minister, who will remain in touch to determine how these objectives could be best realized."

Returns Home:

On his return home on October 12, Mr. Shastri said that his 90-minute meeting with President Ayub Khan was a "good beginning" towards improving Indo-Pakistan relations and resolving mutual disputes.

To expect much more from a meeting of this nature, he said, would be unrealistic. But he was happy over the outcome, for it showed that both sides were prepared to approach the problems in a spirit of conciliation.

He said that President Ayub had been "pleasant and cordial" throughout the talks, and that he had a practical approach, not merely to Indo-Pakistan problems, but also to "national and international problems in general".

A concrete result of the Karachi discussions, he said, was that the meeting of the Home Ministers of India and Pakistan would now take place earlier than expected.

President Ayub Khan, he added, had agreed that the election campaign in Pakistan should not come in the way of the Home Ministers' meeting, which was now likely to be held either in the last week of October or the first week of November.

Mr. Shastri also indicated that as a result of his talks with President Ayub "something may be done" to reduce tension along the cease-fire line in Kashmir. But he would rather not speak on this subject in detail until the Home Ministers' meeting.

Issues not normally dealt with by the Home Ministers, he said, could possibly be considered at the Home Ministers' meeting by associating officials of other Ministries with it.

He indicated that a programme of further exchange of views between India and Pakistan would be evolved after the Home Ministers' conference. No discussion had taken place at Karachi about a second meeting between him and President Ayub, he said, but such a meeting need not be ruled out.

Asked if he had invited President Ayub Khan to Delhi, he replied that he had done so informally, especially because President Ayub had not seen Delhi for many years. But the Pakistan President had explained that because of the elections in his country it would not be possible for him to leave Pakistan for some months.

B. Mr. Lal Bahadur Shastri's Broadcast On National Solidarity Day: On the eve of National Solidarity Day on October 20, the Prime Minister, Mr. Lal Bahadur Shastri, in a broadcast to the nation underlined the challenges India faced internally and externally and urged the people to face them with determination and a sense of national unity.

Externally, he said, India was confronted with China's attempt to build a war machine to create a fear psychosis in Asia and become "a nuclear menace".

Even otherwise, he added, in recent days "we have seen events of greater significance happening in other parts of the world."

While India should be ready to deal with any eventuality, "we must not allow our faith in peace and peaceful methods to dim," because peace was of fundamental importance to a country like India which was trying to build itself up economically.

Turning to internal problems, he discussed the food situation, laying emphasis on both increased production and the need for radical changes in the distribution system.

It was essential, he pointed out, that officials in the districts and at other levels and the farmers worked hand in hand to produce better results. He hoped that farmers would come forward to sell their grain to the Government at the fixed prices.

He expressed his extreme dissatisfaction over the role of grain dealers. They did not seem to have fully realized the gravity of the situation. This had made it imperative for the Government to make some radical changes in the present system of distribution.

Proposals for such changes would be discussed with the Chief Ministers when they met in New Delhi in the last week of October.

But it had become essential to ensure "by all possible means" that every man got the necessary quantum of food at a reasonable price.

He emphasized the need for rational and scientific planning for economic development and said that industry and agriculture were equally important.

In a brief reference to irrigation, he laid greater emphasis on minor and medium projects than major ones and expressed himself in favour of legislation to ensure the deepening of old tanks and the digging of new ones.

In this context, he suggested the bifurcation of the Irrigation Department, one wing being entrusted with rural drainage and minor irrigation works.

C. Progress In Defence Preparedness: According to a review of the country's defence preparedness since October 20, 1962, when the Chinese attack was launched, India has reached a significant stage with its five-year defence plan, recruitment of men and officers and agreements with USA, the Soviet Union and UK for the modernization and equipment of the three Services.

The defence plan, which emphasizes the long-term nature of the plan for national preparedness against any renewed threat of aggression from any quarter, provides for a larger and more modern Army of 8,25,000 men and a 45-squadron modern Air Force. It also provides for replacement of the Indian Navy's over-aged ships, improvement of road communications in the border areas and other connected measures.

The programme of recruitment of men and officers for the Indian Army is now almost complete, except for some deficiencies in the medical and engineering branches. Nearly 3,00,000 men and more than 10,000 officers have been recruited, involving detailed screening of well over a million volunteers. Recruitment of Emergency Commission officers has been discontinued.

Side by side with increasing the size of the Army, the Army authorities have been concentrating on the expansion and modernization of training facilities. The introduction of new mountain divisions has meant specialised training to toughen up the soldier and give him greater mobility. Special steps have also been taken to enable the soldier to fight more effectively at high altitudes and in mountainous terrain.

Vigorous action has been taken to provide greater fire power to the troops by introducing new weapons such as self-loading rifles, lighter and longer-range mortars and lighter and better mountain guns. Attention has also been paid to improving communications, expanding the net-work of border roads and other connected facilities.

Various steps have been taken to achieve the target of a modern 45-squadron Air Force. These include the acquisition of additional aircraft from abroad, more intensive development of aircraft manufacture within the country, expansion of training facilities in all branches of the Air Force, construction of new airfields and renovation of the existing ones.

Installation of static radars along the country's northern border is likely to be completed by the end of this year.

While the Indian Navy has enjoyed a comparatively lower priority in the scheme of national defence, steps have been taken to increase its potential in the long run.

An Agreement signed recently between the Government of India and the United Kingdom will facilitate the production of frigates at the naval dockyard in Bombay.

A welcome addition to the fleet's air arm has been two Alouette helicopters purchased from France. For the first time in the maritime history of the country, an up-to-date modern hydrographic vessel, **INS Darshan** built by the Hindustan Shipyard at Visakhapatnam, will be commissioned into service with the Indian Navy.

The National Cadet Corps scheme now covers over 13,00,000 boys and girls in the senior and junior divisions—all able-bodied male college students have now to undergo a uniform three-year course of compulsory military training.

Development in the field of defence production during the past year has been more significant than during any previous year. The first of the four new ordnance factories proposed to be set up under the defence plan went into production in July this year to manufacture 7.62 mm ammunition urgently required for the semi-automatic Ishapore rifles and other arms. A 3-mm aircraft ammunition project went into production at Khamaria near Jabalpur in April this year. The first HF-24 supersonic Mach-I fighter aircraft were handed over to the Indian Air Force at Bangalore in May this year.

The past year also witnessed the conclusion of Agreements with USA and Russia for the supply of defence equipment in the coming years. The Agreement with the Soviet Government envisages the manufacture of MIG-21 aircraft in India.

(*The Times of India*, New Delhi)

[Prev. ref. 5773:INI:A]

D. IAC Agreement With Air Ceylon: Air Ceylon and Indian Airlines Corporation (IAC) have decided on October 14 an agreement covering the pooling of revenues of their existing air services.

A Ceylonese delegation arrived in New Delhi on October 13 to discuss the terms of the agreement with IAC. The discussions included ground handling of each other's services and technical collaboration.

Ceylon's delegation was led by Mr. J. P. Obeyesekera, Parliamentary Secretary to the Finance Ministry.

Air Ceylon, which has ordered an Avro-748, is likely to begin its service on the Colombo-Madras sector by the middle of November. IAC is already operating Viscount services on the route.

Air Ceylon is also planning to introduce a non-stop Colombo-Bombay service in February, 1965. IAC will begin Viscount services on this route in April, 1965.

(*The Hindustan Times*, New Delhi)

E. Envoy To Switzerland: According to an announcement by the External Affairs Ministry on October 19, Mr. Vishnuprasad Chunilal Trivedi, formerly Joint Secretary in the Ministry of External Affairs, has been appointed Ambassador of India to Switzerland.

He is expected to assume charge of his new assignment early in 1965.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 4214:INI:D]

F. Import Policy For July-December, 1964: According to the import policy for the period July-December, 1964, announced by the Commerce Ministry in New Delhi on October 14, established importers will be allowed to import the quotas already licensed to them under the annual licensing scheme without any cut.

So far their annual licences were subject to a half-yearly review and a cut in quotas, if necessary.

The Ministry of Commerce announcement also exempted established importers from the formality of getting their annual licences endorsed for the second half-year. Such licences are deemed to have been extended automatically.

While these are no major concessions to established importers, they undoubtedly help to remove hurdles in the way of expeditious import of goods and cut down red-tapism to the minimum in the import control organization.

In cases where fresh annual licences were yet to be issued, the Ministry made it clear that the annual licences would be issued for their total yearly entitlement. The licences would be suitably endorsed to permit the import of the goods in one lot within the validity period of the licence.

The import policy for the year 1964-65 as such was announced in April, 1964 itself. A separate announcement will, however, be made in due course in regard to changes, if any, in the policy to be followed in respect of actual users during the current half-year.

[Prev. ref. 5790:INI:H]

G. Prices Of Foodgrain For Producers Fixed: The Central Government announced on October 13 producers' prices for standard varieties of rice and wheat for the 1964-65 season. It also declared ranges of producers' prices for gram, jowar,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

bajra and maize within which State Governments would be authorized to fix the prices.

Under the new price system for paddy and rice, there are, first, producers support prices at which the Government will be prepared to buy all paddy offered at declared assembling points. Then there are maximum statutory prices of paddy which are higher by Re. 1 per quintal than the support prices. If paddy prices tend to rise above the maximum prices the Government will step in to requisition paddy at these prices.

Announcing the new prices, the Central Food and Agriculture Minister, Mr. C. Subramaniam, said that these would give the producer a substantially higher return than at the existing level or at the average level of the last three years except in the case of a few pockets where the prices became excessively distorted. At the retail level the rice prices would come down slightly.

For example, the consumers' price of the standard akkullu variety of rice in Andhra will be 71 paise a kilogram as against the present ruling price of 72 paise. In the case of Madras, the decrease will be 2 paise from the ruling 73 paise. In the case of Bangalore, the consumers' price of the standard variety of rice will come down from 78 paise to 71 paise. In Bombay, too, there will be a slight fall from the ruling price of 73 paise for the standard variety.

Mr. Subramaniam also pointed out that as a result of the new price structure, the wholesale index in regard to foodgrain should come down from the existing 146 to anywhere between 125 and 130.

He stressed the need to give wide publicity to these prices. There should be a mass movement to increase price consciousness. The Government would give every possible encouragement to the consumers' price resistance movement.

He said that in several cases the Government had fixed prices for producers at levels higher than those recommended by the Jha Committee. In the case of Maharashtra, a price of Rs. 39 per quintal of paddy had been recommended. The State Government had already fixed Rs. 41. This matter would be discussed with the Maharashtra Chief Minister.

The margin allowed to wholesalers ranges from 1.52 per cent to 2 per cent. For rice retailers the margin will range from 4 to 7 per cent, including the transport costs.

The Government has statutorily fixed ex-mill wholesale prices, wholesale prices at consuming centres and retail prices of rice. State Governments are being authorised to determine rice prices at the three stages for different varieties and at different places and enforce them along with paddy prices from appropriate dates, depending upon the arrival of the new crop.

INDONESIA

A. Text Of Indonesia-USSR Communique: The following is the text of the *communique* issued in Moscow on October 1 at the end of President Sukarno's visit to the Soviet Union:

[A brief account of the talks which Dr. Sukarno had with the then Soviet Prime Minister, Mr. N. Khruschev, and other Russian leaders appeared on page 6142.]

"During these talks, an exchange of views was held on matters pertaining to the development and further consolidation of ties of friendship and co-operation between the Republic of Indonesia and the Soviet Union. It was evident that Indonesian-Soviet relations which are based on the principles of equality, mutual benefit and mutual respect for each other's sovereignty are developing successfully for the common good of the peoples of both countries.

"The two sides also exchanged views on several international problems of current importance and this exchange showed that both Indonesia and the Soviet Union hold closely identical views on the majority problems of the present time.

"Both Indonesia and the Soviet Union confirmed that the principles of peaceful co-existence constitute the only correct and sound basis of which to develop the relations between States of different social and political systems as terms. These principles are fully in conformity with the interests of all nations, and serve the efforts to consolidate the peace and security of all States. Both sides emphasized that the principle of peaceful co-existence between States of different social, political systems do not imply the pacification of classes between the exploiter and the exploited, between the colonizer and the colonized.

"Both sides agreed that in the present situation there is no task more important than that of the struggle against imperialism, colonialism, and neo-colonialism to achieve a lasting and enduring world peace.

"The forces of peace-lover obviously are in need of new steps towards the elimination of the danger of nuclear war.

"Both sides are convinced that to achieve an enduring peace in the world, the implementation of general and complete disarmament will be of decisive importance. The attainment of solutions to the problem of disarmament will enable the diversion of the tremendous funds now being allocated for military purposes towards peaceful purposes which will benefit the elevation of the standards of living of peoples of all countries and especially the newly independent States.

"Both sides concurred that the Moscow Agreement on the prohibition of nuclear arms test in the atmosphere, the accord reached between the USSR Government and the Government of USA, and endorsed by the UN General Assembly on the prohibition to launch into orbit objects equipped with nuclear weapons, and the decision that has been agreed upon to reduce the production of nuclear products for military purposes has contributed to the general relaxation of tension in international relations.

"The Soviet Government highly appreciates the outstanding role of President Sukarno in uniting all forces in the world, which are fighting against imperialism, colonialism, and neo-colonialism.

"President Sukarno holds in high regard the unceasing efforts of the Head of the Soviet Government Khruschev in the struggle for peace and friendship among nations. He stressed the importance of the Soviet Government's proposal on the abstention of the use of force by all States in solving territorial and border disputes, as contained in the message of Khruschev calling for the establishment of an international agreement on the peaceful solution of territorial and border disputes.

"Both sides stressed the urgent need for the eradication of foreign military bases, and the withdrawal of foreign troops stationed outside their own territories as these not only increase suspicion amongst States and harm the national interest of the States where these troops are stationed, but also continue the great danger of eruption of serious military conflicts.

"Both sides resolutely condemned colonialism and neo-colonialism in all its forms and manifestations, and re-iterated their common determination to fight for the speedy implementation of the principles of the UN Declaration on the granting of independence to colonized States and peoples.

"Both sides expressed their full support towards all peoples fighting for their national liberation and strongly condemn all efforts obstructing the free national development within States that have already achieved their political independence.

"Both sides expressed the hope that the African-Asian Conference which will be convened next year will succeed in uniting all forces of the anti-imperialist and anti-colonialist front, in order to contribute to the struggle for the maintenance of peace.

"Indonesia and the Soviet Union hope that the Conference of Non-Aligned States, which will be convened shortly in Cairo, will succeed in uniting all progressive forces in the world in order to step up the struggle against imperialism, colonialism, and neo-colonialism, and thus to contribute to the solution of international problems and to the consolidation of friendship among nations.

"Both sides expressed their concern over the prevailing tensions that exist in some areas of the world. They paid special attention to the aggravated situation in South-East Asia caused by the interference of the imperialist States into the domestic affairs of States in that part of the world.

"The Republic of the Soviet Union condemns the aggressive military actions of the imperialists in South Viet-Nam, the provocative actions against the Democratic Republic of Viet-Nam, as well as the subversive actions of the reactionary forces in Laos.

"The Soviet side re-iterated its support towards the liberation struggle of the people of North Kalimantan. The Soviet people together with the Indonesian people and all other peoples oppose the neo-colonialist project of 'Malaysia' and other neo-colonialist projects in Africa and Asia, and in conformity with this stand, Soviet people support and assist Indonesia in its just struggle against all kinds of neo-colonialism.

"The Soviet Government re-iterated its conviction to the peaceful solution of the German problem, stressing that the signing of a German Peace Treaty and the conversion on that basis of West Berlin into a demilitarized and free city would in the present situation justify as a turning point for the improvement of the situation in Europe and in the whole world.

"The Government of the Republic of Indonesia agrees that the German problem should be solved through peaceful negotiations amongst the German people themselves on the basis of the reality of the existence of two Germanies.

"Both sides strongly condemn the intervention of imperialist States in the domestic affairs of Congo.

"Both sides express their support towards the struggle of the Cyprus people to defend their independence, territorial integrity and sovereignty. Both sides maintain that the nationals of Cyprus of both Greek and Turkish origin should be given the opportunity to arrive at an agreement amongst themselves free from outside interference.

"The Republic of Indonesia and the Soviet Union express their resolute and full support towards the struggle of the heroic Cuban people to consolidate the independence and sovereignty of their fatherland, and condemn all aggressions against those endeavours of the Cuban people.

"During the meetings and talks held between the leaders of Indonesia and the Soviet Union, the question of further expanding and strengthening the co-operation between the two States was considered.

"The common desire was expressed to intensify the implementation of Indonesian-Soviet Agreements on Trade, Economic Co-operation and Cultural Exchange. Agreement was reached to increase the defensibility of Indonesia through the purchase of additional equipment for the Armed Forces of Indonesia.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"Both sides furthermore are of the same sincere desire to further develop Indonesian-Soviet relations in the political, economic, and cultural fields.

"The Government of the Republic of Indonesia and the Government of USSR have special attention for the maintenance and development of personal contacts between the leaders of the two States.

"Both sides are convinced that the present successful visit of the President of the Republic of Indonesia, Dr. Sukarno to the Soviet Union will contribute to the furthering, development and consolidation of the bonds of friendship between the Republic of Indonesia and USSR."

IRAN

A. Oil And Gas Discovery: It was stated on October 9 that Iranian Oil Participants had announced the discovery of two new oil-fields in South Iran.

At Fars, 19 miles north-east of the Agha Jari and six miles north-east of the Karani fields, oil had been found in the Asmari limestone deposits at a depth of 8,806 feet.

On a test, the well flowed oil at about 4,000 barrels a day. At Rag-e-Safid, 22 miles south-east of the Agha Jari and 16 miles north-east of Hendijan, gas had been discovered in one well and drilling on a second well had reached 11,859 feet. Both wells would be drilled deeper to investigate the possibilities of lower horizons.

(*Middle East Economic Digest*, London)

[Prev. ref. 5897:IRN:A]

ISRAEL

A. Russian Property Sold To Israel: A contract worth $4,500,000 for the sale of Russian property in Jerusalem and other parts of the country to the State of Israel was signed in Jerusalem on October 7.

According to the London **Times**, the Soviet Government's title to the property was dubious as it was owned by the Russian Orthodox Society, an organization for the relief and assistance of pilgrims to the Holy Land. Russia dissolved the Society in 1917 and neither the British administration in Palestine nor the State of Israel recognized the Soviet Government as legal heirs. The Israelis had now altered their position.

The Times despatch said: "From the Israel point of view, the political importance of the transaction lies mainly in the fact that two-thirds of the payment is to be in kind, delivered over two years. Israelis hope this will be a lever for the resumption of trade, which was interrupted in 1956 when the Soviet Union abrogated a citrus-for-oil Barter Agreement to penalize the Israelis for attacking Egypt in Sinai.

"Arab Governments have protested strongly against the transaction, which implies Soviet recognition of Israel's sovereignty over her sector of divided Jerusalem.

"Another noteworthy factor is that the contract was signed in Jerusalem, Russia, like Britain and the United States, has not recognized Jerusalem as Israel's Capital because it contradicts United Nations resolutions for the internationalization of the city."

The despatch added: "After prolonged negotiations the Israel Government has signed an agreement by which it pays Russia more than £1,500,000 for all the Society's properties. In the days of the mandate the Russian compound included a gaol and a hospital. Today the gaol has gone and Ministries have moved in, but the place retains a character and beauty of its own. It is worth settling the title to so valuable a piece of real estate, and Israel will have to pay only a third of the total amount in cash, the rest being settled in goods, mostly citrus fruit.

"Mrs. Golda Meir, the Foreign Minister, has said she hopes the agreement will open a new chapter in Israel's relations with Russia. This is being optimistic. There have been a few other straws in the wind to indicate that the Russians are slackening their hostility towards Israel, but they have so far all concerned minor matters. This Summer, for example, an exchange of orchestras from the two countries was arranged. It may be that the present deal will open the way for a resumption of exports by Israel to Russia, the flow of which was stopped at the time of Suez as a form of sanctions and has remained blocked ever since."

(*The Times*, London)

B. Reduction In Income-Tax: A message on October 9 said that the Cabinet had approved an amendment to the income-tax law which raises the level of personal allowances as follows:

Bachelor from I£250 to I£400; married man from I£1,050 to I£1,7000; wife I£500 to I£800; and each child from I£250 to I£375 to a flat rate of I£500.

The new tax scales will be retro-active from April 1, 1964 and it is estimated that tax refunds totalling I£25,000,000 will have to be made to wage earners alone.

The Ministry of Justice is still studying clauses in the Bill concerning the income of Israelis abroad and foreign residents in Israel. All money earned from work performed inside Israel will be taxable, though a foreigner working for less than three months in Israel may be granted exemption.

The Governor of the Bank of Israel, Mr. David Horowitz, again attacked the Government's economic policy, which he said had resulted in a constantly mounting foreign trade deficit. Referring to the reductions in income-tax, he said that the increased spending power would bring about a further increase in the import of consumer goods and provide additional handicaps for exports.

[Prev. ref. 5888:ISR:B]

JORDAN

A. Central Bank Starts Operations: The Central Bank of Jordan started operating on October 1 by taking over the monetary commitments of the Jordanian Currency Board as they stood at closing time the day before.

Dr. Khalil al-Salem, the Governor of the Bank, said that the notes now in circulation would be regarded as currency issued by the Central Bank. The Currency Board's sterling assets have been taken over by the Central Bank together with the functions of the Currency Control Directorate which include the issue of foreign exchange permits for import payments and personal transfers.

(*Middle East Economic Digest*, London)

KUWAIT

A. First Annual Report Of Kuwait Chamber Of Commerce: For the first time since its inception in 1959, the Kuwait Chamber of Commerce and Industry issued its annual report early in October. It covered economic conditions in the country during 1963.

It noted a fall in consumers' purchasing power during 1963 of anything between 7 to 19 per cent (the exact figure cannot be calculated) and a fall in stock prices to a more realistic level than those prevailing in recent years. The Government took the initiative in developing industrial projects and completed plans for the construction of the Shuaiba power station and the gas pipeline from Burgan to Shuaiba, both of which will supply power for the much needed industrial zone.

Demolition for re-planning purposes led to a severe housing shortage in 1963 with a consequent increase in rents. The area of land under construction rose by 23.8 per cent over 1962 to a total of 1.3 million square metres.

After quoting statistics of oil production and revenue and foreign trade, the report examined the role played by the joint stock companies in Kuwait's economy. During the year under review seven new companies were formed with Government participation—the Kuwait Petrochemicals Company, the Kuwait National Fisheries Company, the American Company for processing and distributing food products, the Kuwait Aviation Fuelling Company, the Kuwait Limestone Company, the National Insurance Company and the Kuwait Flour Mills Company. In all, there are 20 joint stock companies in Kuwait of which one—Kuwait Airways—is entirely State-owned and three others—Kuwait Limestone Company, Kuwait Aviation Fuelling Company and Kuwait Asbestos Company—do not offer their shares for public subscription.

During 1963 the banking and investment companies all showed good profits, but there was keen competition in the insurance field; the Kuwait Insurance Company showed a modest net profit of KD30,046 and announced plans to venture into life insurance. Gulf Insurance showed a net profit of only KD2,780 for an 18-month period and Al-Ahlya a loss of KD1,799 during the last six months of the year. (Kuwaiti Dinar = £).

The Kuwait Oil Tanker Company negotiated the purchase of two more 53,000 long tons capacity tankers, bringing its fleet up to three. Production was suspended for a time at the cement plant owned by the National Industries Company for the installation of new machinery which will increase capacity to 100,000 tons annually and reduce production costs. There was a net profit at the year's end of KD256,258 and the Company plans to branch out into the manufacture of prefabricated houses. The Kuwait Flour Mills Company hopes to start production by the end of this year and is experimenting in the processing of by-products such as bran and crushed wheat. The Asbestos Company started production on a three-shift basis in mid-1963, and made a net profit of only KD3,074, 10 per cent of which was distributed to the workers as an incentive bonus. Despite competition from TV which led to a drop in profits of KD35,898 to KD341,827, the Kuwait National Cinema Company plans to build three more cinemas.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The total nominal capital of Kuwait's joint stock companies (excluding Kuwait Airways) is KD60,661,260 divided into 7,475,474 shares and up to December 31, 1963, owned by 85,452 Kuwaiti shareholders. Of the authorised capital the Government owns KD28,211,280, i.e 46.5 per cent and the private sector KD32,449,380, i.e. 53.5 per cent. The actual paid-up capital amounted to KD32,169,679 and unpaid capital to KD28,491,581 which is expected to be paid during the next four years. The Government's share in the paid-up capital totalled KD10,729,323 and that of the private sector KD21,440,355.

The report declared that it would be at least three more years before the joint stock companies would be in a position to contribute an appreciative ratio of the national income and that the country would continue for some years to be dependent on revenue derived from the oil industry. In order to increase the private sector's contribution to the national income the joint stock companies must increase their activities abroad and the growth of the local market must continue at an annual rate of 5 per cent.

(*Middle East Economic Digest*, London)

MALAYSIA

A. Tengku Abdul Rehman's Letter To Cairo Conference Of Non-aligned Countries: *In a statement issued in Kuala Lumpur on September 25, the Prime Minister, Tengku Abdul Rehman, said he had written to all Heads of Governments participating in the Cairo Conference of non-aligned Powers asking for a fair hearing should the Indonesian delegation attack Malaysia.*

He pointed out that Malaysia had consistently supported national independence movements, opposed racialism and had called for universal backing to the Charter of Human Rights.

He contended that Malaysia had every right to be invited to the Cairo Conference. Though this had not been done, he said, the Conference should not used as a forum against Malaysia.

He said: "The very defination of non-alignment has been so stretched that many more countries have been included in the list of invitees. Cuba is regarded as a non-aligned nation though her alignment to the Communist bloc is evident. So also are several other South American countries whose defence treaties with USA do not in essence include them as non-aligned. Thus what seems clear to me as the pre-requisite to an invitation to the Conference is not that that nation has defence treaty with either a Western country or Communist bloc country, but whether the nation has declared its intention to be non-aligned or believe in the pursuit of a policy of non-alignment, in conformity with the broad-based definition of the principles of non-alignment as contained in the Cairo criteria which was adopted for the purpose of issuing the invitations to the Conference.

"Malaysia's interpretation of a non-aligned nation is that the nation has and exercises an independent foreign policy. This is essential for a non-aligned nation. Malaya and now Malaysia has consistently supported movements for national independence so long as such movements uphold the principles of the United Nations Charter. She has shown such evident support in the case of West Irian when I visited various world capitals, lending my efforts at mediations between Holland and Indonesia.

"Malaysia's support for independent movements in the United Nations with particular reference to Portuguese Angola and the former provisional government of Algeria is well known and has the backing of all non-aligned nations. Nor should it be forgotten, a matter of considerable interest, that Malaya took the initiative in drawing the world's attention to the evils of apartheid in South Africa and solicited world support for the upholding of the Charter of Human Rights.

"In this regard although it is agreed that Malaysia has both military agreement and foreign bases, this arrangement is significantly different from such multilateral military alliances as S-EATO, NATO, Warsaw Pact, CENTO or the ANZUS Treaty. Malaysia's agreement with Britain is bilateral and for mutual defence and not concluded in the context of any East-West conflict, either party has the power to abrogate it. Furthermore, the Manila Agreement accepted the fact that these bases would not be used in the context of Great Power conflicts.

"The desirability of Malaysia's present defence arrangements with Britain and other associated Commonwealth countries is made the more evident in the context of military aggression, infiltration and sabotage activities conducted by her stronger neighbour who is attempting to subvert the economic progress of this nation. It is thus only natural for her to turn to friendly countries in order to preserve her sovereignty and territorial integrity from a country who believes that might is right and who refuses to accept the findings of United Nations.

"Malaysia has, therefore, all along been following a policy of non-alignment as enunciated in the Cairo criteria and intends to pursue this independent policy of non-alignment. In view of this, Malaysia has every right to be invited to attend the second Conference of non-aligned nations in Cairo next month.

"Unfortunately, owing to some unknown reasons this is not to be. I sincerely hope, however, that the Conference should not be used as a propaganda forum against us at a time when we are not in a position to reply in our own defence."

(*The Malayan Times*, Kuala Lumpur)

[Prev. ref. 6082:MAL:A]

B. Possibility Of More Taxes: The Finance Minister, Mr. Tan Siew Sin, indicated on October 10 that he might increase taxes in the next Budget to pay for expansion of the armed forces "because of Indonesian aggression."

He said: "Our people must be prepared to endure some inconvenience as a result of the defence measures. Some may even have to suffer hardship because Malaysia and Indonesia have severed commercial relations.

"This in fact has happened already. Many more people may have to bear sacrifices which affect their pockets and this, in the present context, may be the most painful of all."

He said it was most unlikely that President Sukarno would plunge into total war; it was more possible that he would continue the present tactics of subversion and terrorism.

(*The Malayan Times*, Kuala Lumpur)

PAKISTAN

A. British Loan For Purchase Of Ships: Pakistan and Britain signed on October 13 an Agreement for a British loan of £2,800,000 to purchase two cargo and passenger ships.

The Agreement was signed in Karachi by Mr. Osman Ali, Secretary, Economic Affairs Division, and Sir Morrice James, British High Commissioner in Pakistan, for their respective Governments.

According to a Press release of the British Information Service, the two new ships of about 6,000 tons dead-weight with 17 knots speed are to be used to improve the coastal shipping services.

The loan, given outside the aid to the Pakistan Consortium, has a repayment period of 15 years.

The loan was part of the assistance Britain has provided to Pakistan's Second Five-Year Plan.

(*Dawn*, Karachi)

[Prev. ref. 5932:PAK:B]

B. New Pay-Scales Of West Pakistan Railway Officers: The following new consolidated pay-scales of West Pakistan railway officers were published on October 14:

Railway Service Class I:

Motive powers and mechanical-engineering (including Electricity) Department (junior-scale): 450-50-1000 plus technical pay of Rs. 50 per mensem for those possessing an engineering degree or diploma recognized as equivalent to the engineering degree for the purpose of direct recruitment to Class 1 posts.

Medical Department (senior scale): 750-75-1500 plus technical pay of Rs. 100 per mensem for medical graduates.

Transportation (Traffic and Commercial Department (senior scale): 750-75-1500.

Superintendent Railway Telegraph: 750-75-1500.

Transportation (Traffic) and Commercial Department (junior scale): 450-50-1000.

Stores Department (senior scale): 750-75-1500 plus technical pay of Rs. 100 per mensem for those possessing an engineering degree or diploma recognized as equivalent to the engineering degree for the purpose of direct recruitment to Class 1 posts. Technical pay admissible only to the incumbents of the posts.

Stores Department (junior scale): 450-50-1000 plus technical pay of Rs. 50 per mensem for those possessing an engineering degree or diploma recognized as equivalent to the engineering degree recruitment to Class 1 posts. For which technical qualifications are prescribed for direct recruitment.

Watch and Ward Department (senior scale): 450-50-1000.

Railway Service Class II:

Lower Gazetted service: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for those possessing an engineering degree or diploma recognized as equivalent to the engineering degree for the purpose of direct recruitment to Class 1 posts of respective engineering departments.

Assistant Surgeon: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for medical graduates.

Bacteriologists: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for medical graduates.

Radiologist: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for medical graduates.

Dental surgeon: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for medical graduates.

Assistant Medical Officer: 350-35-525|40-925 plus technical pay of Rs. 25 per mensem for medical graduates.

West Pakistan Railway Board:

Chairman: 3000.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Vice-Chairman: 2750: Admissible only if it is a combined post of Vice-Chairman-cum-General Manager, otherwise Rs. 2300-100-2600.

Member, Railway Board: 2300-100-2600.

Chief Planning and Progressing officer: 2000-100-2200. Length of service 17 years.

Secretary, Railway Board: 2000-100-2200. Length of Class I service 17 years.

Deputy Chief Procurement and Development officer: 1600-50-1700. Length of Class I service 13 years. For officers who were in the junior administrative grade before appointment to this post or would have held a junior administrative grade before appointment to this post or would have held a junior administrative grade post in their parent department but for appointment to this post.

Deputy Chief Finance and Budget Officer: 1600-50-1700. Length of Class I service 13 years (as in the above case).

Officer on Special Duty (Rates): 1600-50-1700 13 years (as in the above case).

Senior Administrative Grade:

Chief Engineer (open line): 2000-100-2200 (17 years).

Chief Engineer (survey and construction): 2000-100-2200 (17 years).

Chief Engineer: 2000-100-2200.

Chief Engineer (Development): 2000-100-2200 (17 years).

Chief Operating Superintendent: 2000-100-2200 (17 years).

Chief Mechanical Engineer: 2000-100-2200 (17 years).

Chief Mechanical Engineer Workshop: 2000-100-2200 (17 years).

Chief Commercial Manager: 2000-100-2200 (17 years).

Chief Controller of Stores: 2000-100-2200 (17 years).

Chief Controller of Purchases: 2000-100-2200 (17 years).

Chief Personal Officer: 2000-100-2200.

Chief Medical and Health Officers: 2000-100-2200 (17 years).

Junior Administrative Grade:

Divisional Superintendent: 1600-50-1700 (13 years).

Chief Officer (Administration and Budget): 1600-50-1700 (13 years).

Deputy Chief Engineer: 1600-50-1700 (13 years).

Deputy Chief Engineer (Signal): 1600-50-1700 (13 years).

Officer on Special Duty: 1600-50-1700 (13 years).

Chief Research Officer: 1600-50-1700 (13 years).

Chief Electrical Engineer: 1600-50-1700 (13 years).

Deputy Chief Mechanical Engineer: 1600-50-1700 (13 years).

Officer on Special Duty (Electrical): 1600-50-1700 (13 years).

Deputy Chief Operating Superintendent: 1600-50-1700 (13 years).

Deputy Chief Commercial Manager: 1600-50-1700 (13 years).

Chief Superintendent (Watch and Ward): 1600-50-1700 (13 years).

Deputy Chief Personnel Officer: 1600-50-1700 (13 years).

Deputy Chief Controller of Stores: 1600-50-1700 (13 years).

Deputy Chief Controller of Purchases: 1600-50-1700 (13 years).

Medical Superintendent of Cairn's Hospital: 1600-50-1700 (13 years).

List of Special Pays West Pakistan Railway Board:

Deputy Chief Procurement and Development Officers: 275.

Deputy Chief Finance and Budget Officer: 275.

Officer on Special Duty (Rates): 275.

Senior Procurement and Development Officer: 220.

Senior Finance and Budget Officer: 220.

Liaison Officer to Minister for Railways: 220:

Track Supply Officer: 110.

Executive Engineer (General): 110 (for so long as the incumbent of this post, doing the Civil Defence work in addition to his duties.

Works Manager, Carriage and Wagon shops: 110.

Works Manager, Loco shops: 110.

Works Manager (Diesel), Karachi: 110.

Works Manager (Diesel), Rawalpindi: 110.

Works Manager (Construction): 110.

Mechanical Engineer (Training): 100.

Divisional Electrical Engineer (Workshops): 110.

Manager, Steel shop: 110.

Chemist and Metallurgist: 110.

Assistant Works Manager, Signal shops: 60.

Assistant Research Officer: 60.

Assistant Surgeon, Walton Training School: 60 (for so long as the incumbent of this post works as First Aid instructor in addition to his duties.

C. Maulana Abul Ala Maudoodi Released: The Full Bench of the West Pakistan High Court in Lahore unanimously accepted on October 9 the *habeas corpus* petition challenging the detention of Maulana Abul Ala Maudoodi and 43 other leaders of the Jamaat-i-Islami under the West Pakistan Maintenance of Public Order Ordinance.

The Bench held the detention illegal and ordered the immediate release of the detenus. The Bench was specially constituted to hear the petition.

(*Dawn*, Karachi)

[Prev. ref. 6001:PAK:C]

VIET-NAM (RVN)

A. "Provisional" Constitution: A "Provisional" Constitution prepared by the National Council was released on October 20.

It set up a Security Council comprising high officials, among others, with authority to handle military affairs. Its authority ranged from the right to declare Martial Law to power to "proclaim cease-fires or negotiate in the war situation."

The Security Council's structure is a compromise between pressure for a strictly civilian regime and demands of Maj-Gen. Nguyen Khanh, the caretaker Premier, for an independent military establishment.

The document said its Chairman would be the Chief of State, with the Premier as Deputy Chairman. The others would be the Armed Forces Minister and the Chief of Staff. Two of the four members would be military men and possibly three if the present Chief of State, Maj-Gen. Duong Van Minh, was re-appointed by the new civilian regime.

Informed sources said General Khanh, who apparently would step down from the Premiership, was expected to be named Armed Forces Minister. In that position he presumably would have control over the Chief of Staff.

Otherwise, the blueprint seemed to call for a conventional European-style parliamentary government.

The Information Ministry said the Constitution came into force immediately, but General Khanh's administration was still in office.

The Constitution is provisional until a permanent Constitution is drawn up in 1965 by a still-to-be-created National Assembly.

Until the Assembly is set up, the High National Council will act as the legislative arm of the Government. With the appearance of the Assembly, it will become a Senate.

The Constitution did not say whether the Assembly was to be elected or appointed.

Earlier on October 16, Major-General Nguyen Khanh insisted that the forthcoming civilian Government should reserve "a place of honour" in its ranks for the armed forces.

The General, who met the High National Council, was reported to be displeased with the role assigned to the Army under the draft of a new Constitution that he was shown at that time.

(*The Statesman*, Calcutta and *The Times*, London)

[Prev. ref. 6083:RVN:A]

B. Treason Trial: Thirteen senior military officers and seven civilians went on trial in Saigon on October 15 charged with treason.

They were accused of attempting to overthrow the Khanh Government on September 13.

A prosecution statement credited Gen. William C. Westmoreland, Commander of US forces in Viet-Nam and his Chief of Staff, Maj-Gen. Richard Stilwell, with a major role in preventing the coup. "If it had not been for the intervention of Generals Westmoreland and Stilwell there would have been bloodshed."

The two Generals persuaded the rebels not to attack Tan Son Nhut air force base after the air force refused to join the rebels. Nearly 4,000 Americans are stationed there.

Only 16 defendants were present as the trial opened. Four of the seven civilians are still at large and apparently, will be tried in absentia.

The defendants were headed by the former Interior Minister, Brig-Gen. Lam Van Phat, accused of being the mastermind, Maj-Gen. Duong Van Duc, former 4th Army Corps Commander, Brig. Len Duong Ngong Ngoc Lam, former Mayor of Saigon and Col. Huynh Van Ton (former 7th Division Commander).

When the trial was announced, Gen. Khanh had said that the defendants faced the death sentence.

Best known of the civilian accused is Mr. Tran Quock Buu, close associate of the former Diem regime. Four of the other civilians are still at large.

Meanwhile, the former Chief of Staff, General Cao Van Vien, was named commander of the third tactical region, which covers the Capital.

The new Commander, considered a friend of General Khanh, belongs to the group of "young officers" who foiled the attempted coup.

Earlier on October 7, South Viet-Nam's highest ranking General left the country as part of a deal to stabilize the political situation.

He was Lt-Gen. Tran Thien Khiem, former Defence Minister and Commander-in-Chief of the armed forces in General Nguyen Khanh's Government.

His departure had been requested by young Army Generals, who had saved General Khanh from being toppled in a coup.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

These Generals regarded Khiem as an obstacle to their plans for re-organizing the armed forces and Government.

General Khiem later reached Hong Kong.

ASIA OUTSIDE ASIA

A. Third International Conference On Peaceful Uses Of Atomic Energy: The third International Conference on Peaceful Uses of Atomic Energy opened in Geneva on August 31.

The Conference attendance of approximately 3,800 delegates included 1,780 Governmental representatives and advisers from 77 countries, 40 representatives of 10 organizations associated with United Nations, and an estimated 2,000 unofficial observers from about 30 countries sent by individual firms, Governmental agencies, educational institutions, scientific organizations and internationally-sponsored nuclear projects.

In addition, approximately 450 representatives of the information media—Press, radio, television, newsreel, and photo services—were accredited.

The Conference received messages of greetings from the Heads of States and Governments of a number of countries, including the Soviet Union, the United States, Britain, France, Canada and the United Arab Republic.

The Conference was opened at the Palais des Nations by Mr. Vasili S. Emelyanov of USSR, who had previously been designated as President of the Conference by the UN Secretary-General, U Thant.

Participants were welcomed by the President of the Swiss Confederation, Mr. Ludwig von Moos, and they then heard addresses by the Secretary-General, the Conference President, and the Director-General of the International Atomic Energy Agency (IAEA), Mr. Sigvard Eklund.

The speakers reviewed progress in the practical application of nuclear energy achieved since the previous atomic conferences held in 1955 and 1958, and they expressed hope that the current Conference would help increase international co-operation concerning problems still to be solved.

The Secretary-General, U Thant also stressed the need for the Conference to help the developing countries profit from nuclear progress, and he expressed belief that peaceful uses of the atom would eventually be regarded "as the work of all mankind rather than the exclusive preserve of particular nations".

Presidential Address:

The President of the Conference, Mr. V. S. Emelyanov, noted that 1965 would mark the 20th anniversary of the release of atomic energy on a practical scale.

He reviewed the work accomplished by the first and second Conferences, in 1955 and 1958, and assessed the experience acquired in the course of the last six years of intensive scientific research.

Today, he continued, there was no longer any doubt that atomic reactors could be put to practical use to generate electricity, or any doubt about the outlook for the practical use of atomic energy in ship propulsion. He expressed his conviction that atomic power would find its way into air transport, too, and that within the next 15 to 20 years atomic power would play a vital part in the over-all energy balance of many countries.

Mr. S. Eklund's Address:

Mr. S. Eklund, Director-General of IAEA, stated that within the last year the competition between nuclear and conventional sources of power had entered a new phase, with nuclear power in a strong position.

The current Conference would make available up-to-date information which should help utilities or power boards in taking policy decisions regarding the route to follow in their future programme.

He pointed out that the economy drive by Governments would certainly foster regional and international co-operation. Indeed, several countries had signed bilateral agreements for work on similar problems, thus making joint use of costly experimental facilities. He expressed the hope that, in the future, support would be given to "true regional projects for the benefit of a number of countries."

India Justifies Move To Augment Nuclear Power:

Mr. M. Dayal of India's Atomic Energy Department said on September 5 that developing countries like India with high conventional fuel costs in regions of growing power demand would have to instal more nuclear power capacity to meet the demand economically.

In a paper on integration of nuclear power stations in net-works with special reference to the developing countries, he said that in India hydro-energy, if available in regions of load demand, provided the cheapest source of power. If the hydro-projects were of the storage type, installed capacity should be designed for low plant factor operation—the time the plant was actually producing power.

This provided the most economic way of meeting power system peaks as the additional installed cost of hydro-units was relatively small. Hydro-plant factors as low as 15 per cent had been suggested for India.

Mr. Dayal cited the Tarapur atomic power station, expected to begin feeding power into India's west coast system in 1968. By then, the system's total installed hydro-capacity would be 996 mw and would be working at an average plant factor of 40 per cent. The thermal and nuclear station taking the entire base load, could easily be made to operate at an annual load factor of 70 and 80 per cent respectively.

The fuelling costs for Tarapur were expected to be the equivalent of between 2.1 and 2.62 mills per kwh (one mill is 1/10th of a US cent). Fuelling cost for a coal-fired station in the system would be a minimum of 5.85 mills per kwh. Allocating additional energy requirements equivalent to only 7.5 per cent plant factor for a 380 mw station would add about Rs. 2.5 million to fuel costs of a nuclear station but at least Rs. 7 million to fuel costs of a coal-based station. Thus, the saving to the system in using the nuclear power station would be more than Rs. 4 million per year even for this marginal allocation of energy.

Conference Ends:

The Conference ended on September 9.

The President of the Conference, Mr. V. S. Emelyanov of USSR, expressed the hope that "every atom split and every atom fused shall serve the cause of peace".

He said that, although the Third Conference had been smaller than its two predecessors in 1955 and 1958, this in no way diminished its importance, and the interest and depth of discussion it had aroused had exceeded expectations.

Governmental Scientific Exhibition:

Formal sessions of the Conference were supplemented by a governmental scientific exhibition.

Displays covering 7,600 square metres of floor space showed atomic energy at work in industry, agriculture, medicines, meteorology, shipping and other phases of life in 18 countries.

Exhibits were provided by the Governments of Australia, Belgium, Canada, Czechoslovakia, Denmark, West Germany, France, India, Italy, Japan, the Netherlands, the Republic of South Africa, Sweden, Switzerland, USSR, the United Kingdom and the United States.

(*United Nations*, *The Times*, London, *The Times of India*, Bombay and *The Statesman*, Calcutta)

[Prev. ref. 2293:AOA:A]

B. Commonwealth Education Conference: The third Commonwealth Education Conference opened in Ottawa on August 21. It was presided over by Mr. Vincent Massey, former Governor-General of Canada.

A proposal by Mr. Massey that the 1967 World Fair facilities in Montreal be turned into a Commonwealth study centre afterwards was favourably received.

Addressing the opening session, India's Education Minister, Mr. M. C. Chagla, pleaded for a concerted drive to eliminate illiteracy throughout the Commonwealth.

He said that a target should be set so that one-quarter of the world's population would have all the benefits of modern education.

His proposal was one of many put forward at the opening session of the two-week meeting, attended by about 200 representatives of 33 Commonwealth countries and territories.

Mr. Susana Hassan, Ghana's Deputy Minister of Education urged the Conference to study the creation of a Commonwealth scheme of training overseas and steps to provide a training plan for women in such fields as home economics and nursing education.

Addressing a plenary session of the Conference on August 27, Britain's Minister of State for Education and Science, Sir Edward Boyle, said that Britain was to expand her assistance in many directions to further Commonwealth educational co-operation. Britain expected her expenditure in this field to increase substantially as a result of the Conference.

He told a news conference on August 27 that the total amount of money the British Government was prepared to devote to Commonwealth educational co-operation between 1965 and 1970 would be more than twice that spent in the past five years.

He recalled that he had said that Britain's direct aid towards education in the Commonwealth, including expenditure on various co-operative schemes, amounted last year to £20,500,000.

He said that if Britain had not planned any fresh schemes in Commonwealth education she would continue spending about £10,000,000 over the next five years. However, the fresh proposals he had detailed in his speech and the extensions to existing schemes would add another £3,000,000 to £4,000,000 to the expenditure.

Progress Of Scholarship And Fellowship Plan:

The highlight of the work of one of the Committees of the Conference examining all aspects of the successful Commonwealth Scholarship and Fellowship Plan was the unanimous agreement that there should be no increase at present in the total of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

1,000 scholarship awards, but that there should be a period of consolidation, at any rate between now and the next Education Conference.

Sir Douglas Logan, Principal of the University of London and Chairman of the Committee reviewing the operation of the Plan, informed a plenary session of the Conference that 924 scholars were studying in 1963-64 in different Commonwealth countries, and that the goal of 1,000 awards agreed at Oxford in 1950 was within sight. He added that Britain had exceeded her own target of 500 current awards.

The Plan had won an enviable reputation in a relatively short time because of the high academic quality of the scholars. It was amply fulfilling the expectations of its founders, and in the not-too-distant future would "justly merit further extension."

Conference Ends:

Mr. M. C. Chagla, who arrived in London after the conclusion of the Conference, said on September 4 that India would play a more active part in the educational programmes for students from African countries.

It was found in Ottawa that most of the African countries were unable to take advantage of the Commowealth scholarships which were for post-graduate studies. They pointed out that their greatest need was for undergraduate scholarships and in this field India could help. He had said so in Ottawa.

The Ottawa Conference had indicated that greater help in the matter of school and college equipment could be expected from the more developed countries of the Commonwealth.

Two of the main conclusions were the importance of technical and secondary education for developing countries.

(*The Times*, London, *The Hindu*, Madras and *BIS*)

[Prev. ref. 4431:INI:C]

C. Commenwealth Co-operation In Economic Matters—Annual Report Of CEC: The 10th annual report of the Commonwealth Economic Committee (CEC), published in London on October 6, highlighted the tangible benefits of Commonwealth co-operation in the exchange of ideas and information.

For instance, in August, 1963 the Committee published a review of "Cement in the Commonwealth" which showed that the annual use of this material in the Commonwealth increase by no less than 15,000,000 tons between 1951 and 1960, and that by 1965 a further rise of some 11,000,000 tons could be expected.

The Committee is now engaged on a similar report on fish in the Commonwealth.

Its report on the third year of the Special Commonwealth African Assistance Plan, published in February, 1964, showed that technical assistance was very considerably expanded in 1962-63, while capital aid amounted to some £52,000,000.

In the popular series on "Commonwealth Development and its Financing", a study of India was published. Others on Jamaica, Tanganyika, Sierra Leone, Malaysia and Uganda are in preparation.

The report showed the diversity of questions on economic topics which the Committee answered on behalf of Governments and others concerned with Commonwealth trade and production. For example, Australian meat ranchers benefited from information about meat shortages in Western Europe. The Committee was also able to send Argentine importers details of the harvest seasons for apples and pears grown in various Commonwealth countries.

Apart from the meat and fruit inquiries, the Committee said that industrial concerns in Briain, New Zealand, the United States and Sweden had asked about wool and other industrial fibres, and Pakistan had inquired about British imports of mango products.

(*UK High Commission*, New Delhi)

[Prev. ref. 5578:AOA:G]

D. Assault On Afro-Asian Diplomats In New York—Protest Memorandum To U Thant: The Afro-Asian Group at United Nations officially addressed the UN Secretary-General, U Thant, on September 24 protesting against racial incidents in New York involving Afro-Asian diplomats and asking him to take measure to insure diplomats with adequate security.

The official memorandum, signed by members of the Group, was presented to U Thant with a request that it should be published by him as an official document.

The memorandum expressed the hope that U Thant would be able to bring "this unpleasant situation to an end" and thus make it unnecessary for the Group to consider further steps to be taken in this regard before the General Assembly.

The memorandum was approved by the Group at a meeting on September 24.

It was reported that voices were raised at the meeting that if the US Government was unable to take measures to assure the security of UN diplomats then perhaps the remedy would lie in shifting the headquarters away from USA.

Diplomatic sources did not believe this to be a serious move, but they felt that the fact that it was being seriously suggested in the meetings of the Afro-Asian Group was indicative of their present concern over the issue.

There had been a number of incidents in New York involving particularly African diplomats. African and Asian diplomats have been increasingly concerned over their safety following an assault on Mr. Youysouf Gueye, First Secretary of the Mauritanian Mission, on August 30 while he was taking an evening stroll just outside the official residence of the Mayor of New York. He was assaulted by White youths with beer bottles.

In the memorandum the Group said that it was determined to use every effort within its means to end "these intolerable incidents impairing the dignity of the Organization". The protection of diplomats against any assault or threat was the right of every diplomat accredited to United Nations and effective measures should be taken to secure this.

A delegation of the Afro-Asian Group had discussed the situation informally with U Thant. By making a formal protest and by having it published the Group hoped to bring pressure to bear upon USA.

The issue came into the open on September 29 with the publication of the Group's letter to U Thant.

The letter was made public by Mr. John Boureima Kabore, Ambassador of Upper Voita, the Group's chairman for the month.

Shortly thereafter the US delegation made public its reply to the Secretary-General on the same subject.

Mr. Kabore told a news conference that the latest incident involving a Mauritanian diplomat was the last in a series of incidents in which Afro-Asian diplomats had suffered indignity in New York. They had been living in a state of "terror" because of the physical assaults on them or the insults they had been subjected to in restaurants and public places in New York and sometimes even while entering the UN buildings.

He said that many of the incidents were perhaps because of their diplomatic position. He referred to the burning of a car bearing a diplomatic number plate.

The US Ambassador, Mr. Adlai Stevenson, in his letter to U Thant expressed regret for such incidents, but asserted that these incidents did not reflect the attitudes and actions of the vast majority of New Yorkers or the State or Federal authorities.

He said that the prosecution of the assailant of the Mauritanian diplomat would depend on the diplomat's willingness to to testify (which, in turn, might involve his willingness to renounce his diplomatic immunity).

He added that USA was willing to consider taking further steps, and asked for full co-operation of all missions accredited to UN "to assure that the rights and obligations of the diplomatic community are fully recognized."

(*The Statesman*, Calcutta and *The Times of India*, Bombay)

E. Malta Attains Independence: One-hundred-and-sixty-four years of British rule in Malta ended on September 21.

The Duke of Edinburgh handed over the constitutional instrument of Malta's independence and read a message from Queen Elizabeth welcoming Malta to the Commonwealth. The ceremony took place in Valletta, capital of the Island.

The Duke said that Malta had never been an outpost for aggression, and would continue to be a bastion for peace "so long as Malta and Britain at any rate remain bound by a Treaty willingly agreed to."

He was speaking at the formal swearing-in ceremony of the Governor-General, the Prime Minister and the Ministry on the first day of the fortress Island's independence.

Fireworks, bonfires and peals of church bells marked Malta's independence at midnight.

The midnight ceremonies culminated in the lowering of Britain's Union Jack and the hoisting of Malta's new National Flag of red and white with an inset George cross—the honour awarded to the Island for its wartime gallantry.

Thus came the end of British rule over the 122 square-mile Colony and its 330,000 people.

(*The Times*, London)

F. World's Largest Bomber Built By USA: The *XB-70*, a prototype inter-continental bomber capable of flying at three times the speed of sound, successfully completed its first test flight in California on September 21 when it flew from Palmdale to Edwards Air Force Base.

The event was described as a turning point in aviation history, but as the aircraft was unlikely to be put into service with the Strategic Air Command, its main contribution would be felt most in the construction of supersonic civil aircraft.

The 275-ton aircraft, believed to be the largest aircraft ever built, has a range of 5,000 miles and is designed to carry 20,000 lbs of bombs at a speed of 2,000 miles an hour at an altitude of 70,000 feet. Its elongated fuselage makes it look like a paper dart.

Its development costs to date are estimated at $1,500 million. This figure had impressed Mr. R. McNamara, the US Defence Secretary, who had shown little enthusiasm for the project. The original order for three aircraft was reduced to one, after design and construction difficulties, after 10 years of development.

G. New Microscope Invented In USA: A microscope which sees the unseen and tells scientists what it is, was described in Washington on October 15.

The instrument, the creation of inventors in USA and abroad, is called an electron microscope. It shoots a beam of electrons at a target as small as 1,000 million millionth of a gramme and enables scientists to determine its chemical make-up by the tell-tale x-rays it gives off.

American, British and Japanese scientists outlined a wide range of uses and potential uses for the instrument at a symposium held in connexion with the meeting of the Electro-Chemical Society in Washington.

Dr. Gunji Shinoda of Osaka University said Japan was using the electron microprobe to expose impurities in steel tubing. The "atomic detective" found out that the impurities were coming from liners in steel furnaces, with the result that better liners are being developed.

Dr. Theodore of the Cavendish Laboratory, Cambridge, said British scientists had used the probe to identify weak spots in exotic space-age metals and that biologists hoped to adapt it to determine the difference between normal and cancerous cells.

Dr. K. F. J. Heinrich of the US National Bureau of Standards said the probe showed up defects in tiny microminiaturized electronic circuits not otherwise detectable, samples pollution in the air, exposes faked works of art, and may identify better materials for lasers.

Dr. Heinrich and Dr. Shinoda said museum curators had employed the instrument to detect traces of titanium oxide, an ingredient of modern pigments unknown to Renaissance painters, in faked paintings attributed to the old masters.

The instrument incorporates the technical features of the scanning electron microscope invented in Germany, the x-ray spectroscope developed in France and Sweden, and radiation detectors developed in US.

The first working model was built in France in 1950, based on a description by J. Hiller of USA.

[Prev. ref. 2646:AOA:B]

H. Sound Waves In Eye Operation—US Doctors' Achievement: Doctors of the Walter Reed Army Hospital in Washington on September 22 used sonar, a technique more usually associated with submarines, in the course of an eye operation.

They used it to plot the exact location of a piece of brass a quarter of an inch long, which became lodged in an eight-year-old boy's eye. Brass being non-magnetic cannot be lifted out by conventional methods, and it was feared that if the mote was left where it was it would corrode, necessitating the removal of the entire eye.

In the operation the brass was located by bouncing sound waves off it and plotting its position on a tiny oscilloscope near the patient's head. The echoing device, which was developed by Dr. Nathaniel P. Bronson, of Manhattan Eye and Ear Hospital in New York, is able to come within five milli-metres of the object. Tiny extractors on the tip are then used to lift the object out.

(*The New York Times*)

I. World Population Forecast: World population, approximately 3,000,000,000 in 1960, will rise to 5,300,000,000 to 6,800,000,000 by the year 2000, according to "plausible long-range" projections contained in a United Nations report on world population prospects, released in New Delhi on September 25.

A figure near 6,000,000,000, or double the 1960 number, "seems to be the most likely expectation", according to the study.

The world total by the year 2000 could, however, rise to a level 2.5 times the 1960 figure—to 7,410 million—if the 1960 fertility rate were to continue and if mortality were to go on decreasing at the rates which prevailed during the 1950's, an assumption, "not considered likely to be borne out by future developments".

The study noted that "it is highly probable that events will occur which will bring about changes in the present population trends". 'Certain tendencies of development can now be discerned which have fairly definite implications for the near future, and their possible implications for the more remote future are also calculable, though with varying degrees of uncertainty".

The publication, **Provisional Report on World Population Prospects, as Assessed in 1963**, was prepared by the Population Branch of the UN Department of Economic and Social Affairs and is being circulated among Governments, selected demographic institutes and individual experts for comments and suggestions. On the basis of comment received, a final report will be prepared for publication in the UN series of population studies. In 316 pages of text and tables, the report pointed out that:

(1) In nearly all developing countries, there remains considerable scope for rapid decreases in the death rate, so that the prevailing tendency is one of accelerating population growth;

(2) The population of most developing countries is now increasing at annual rates ranging from about 1.0 per cent to 3.5 per cent, whereas the rates of most developed countries are between 0.5 and 1.7 per cent;

(3) The population of Latin America by the end of the century would be 3.6 times as large as in 1960; Africa and South-East Asia would each have more than three times as many inhabitants, East Asia 2.3 times as many; those of Oceania, North America and the Soviet Union would nearly double; and Europe's population would be increased by one-third;

(4) By the year 2000, the share of world population in the now less developed areas would rise from 71 per cent in 1960 to 81 per cent. Very high population densities would be attained in East Asia and South Asia, surpassing the density in Europe;

(5) Migration in the future would probably tend to be on a reduced scale and the relative demographic importance of the population movements would be even slighter;

(6) The developed countries are undergoing a progressive increase in the proportion of aged persons in the population, which is resulting in a gradual slowing-down of population growth.

The report noted that world population growth had "conspicuously accelerated", due to the immediate effects of mortality decline, and may accelerate further for the same reason. "It is inevitable, however, that this growth must eventually slow down, if fertility does not decline, but the prospect of eventual slowing down of the population growth is removed to a more distant future, and the eventual size of the population will be still much larger".

Following an introductory section, the report contained a summary of population growth in the major world areas up to the year 2000. It noted that in the four major areas that were now more developed—Europe, the Soviet Union, North America and Oceania—between 30 and 60 per cent would be added to the 1960 population figure in the next 40 years, the most likely increase being 50 per cent. In the less developed areas, the increase for the same period was estimated at between 95 and 150 per cent, the most likely increase being 120 per cent.

A section of the publication dealt with future population projections up to the year 2000 by eight major areas—East Asia, South Asia, Europe, the Soviet Union, Africa, Northern America, Latin America and Oceania.

Included in this section was a report on population estimates for mainland China. It gave the following figures on the population estimate for mainland China:

1960 — 648.1 million
1980 — 916.8 million
2000 — 1,210.0 million

World population projections had been prepared by United Nations on three previous occasions—1951, 1954 and 1957.

J. Asian Resurgence Of Cholera: According to figures issued in Geneva on October 5 by the World Health Organization, a general resurgence of cholera was experienced in Asian countries in 1963, with many more cases and deaths than were registered in any of the past five years.

There were 65,157 cases and 21,755 deaths, the corresponding figures for 1963 being 41,575 and 12,016.

As in other years, India and East Pakistan were the areas worst affected, with 55,069 cases (more than 90 per cent of them in India) as against 28,182 cases in 1962. Indonesia had a serious epidemic; the Philippines, Burma, and Thailand each had more than 20,000 cases. Throughout last year South Viet-Nam was reported free of cholera, but 17,559 cases were notified there between January 5 and July 25 this year.

The El Tor strain of cholera, first identified at the Red Sea pilgrimage quarantine station of that name, has been spreading in the western Pacific since 1961. Previously regarded as a non-quarantinable disease, this strain is now classed as a form of real cholera, necessitating full quarantine meaures. In 1963, El Tor cholera was reported from South Korea and from most countries of the Malayan peninsula.

Two cases in Japan were traced to air transport over the year as a whole, a high incidence of the disease was registered in certain towns adjacent to ports and airports. Calcutta, for example, had 4,592 cases.

November 25—December 1, 1964

Regd. No. D-727
Vol. X No. 48

BURMA

A. Indian Embassy Suspends Issue Of Migration Certificates: The Indian Embassy in Rangoon announced on October 27 that it was suspending with immediate effect till the end of January, 1965 acceptance of applications for emergency certificates from Indian nationals intending to migrate to India.

A special Press release issued by the Embassy said it had organized speedy issue of travel documents to intending migrants and from July 1 this year, 56,000 emergency certificates had been issued by the Embassy.

The current schedule of sailings up to December 5 this year, the release said, would carry approximately 40,000 persons and was fully booked. The next schedule would be announced shortly.

The Embassy was now allotting accommodation for a further 16,000 cases at present with them. "It will take about three to four months to arrange for the despatch of all that number of persons."

It explained that an applicant who received his emergency certificate now "cannot be accommodated till about April, 1965. An emergency certificate is valid only for six months. After that it has to be renewed. This causes considerable inconvenience to all concerned. To avoid this, the Embassy will suspend acceptance of applications for emergency certificate till the end of January next year. Applications will be accepted normally thereafter."

The Press release said applications already made to various volunteer centres in Rangoon and not yet submitted to the Embassy would be returned, but registered in "serial order and given priority as soon as acceptance of applications is resumed."

CAMBODIA

A. Aggression Charge Against USA: The Head of State, Prince Norodom Sihanouk, complained to the UN Secretary-General, U Thant, on October 24 about what he termed as the "latest grave American aggression" against his country.

He sent similar complaints to the Soviet leaders, Mr. L. Brezhnev and Mr. A Kosygin, and President de Gaulle of France.

In his message, Prince Norodom charged that Viet-Namese planes, with American backing, had strafed a border village on October 20, killing eight Cambodians.

He accused USA and South Viet-Nam of "premeditated aggression" against his country and called for a convention of the 14-nation Geneva Conference on Indo-China to study his charges.

At the same time, the Cambodian Government in a call to the British Foreign Secretary, Mr. Patrick Gordon Walker, for reconvening the Geneva Conference said it hoped for a "more realistic understanding" on the part of the new British Government.

The Khmer Press Agency said the Cambodian Government had warned Britain that if reconvening of the Geneva Conference was obstructed any more, it would have serious consequences on the maintenance of peace in Indo-China of which Britain was one of the guarantors.

Fresh Charges Against USA And Viet-Nam (RVN):

The Government alleged on October 25 that three South Viet-Namese aircraft had bombed Anlong-Kres, a village in Cambodia's Kompong Cham province, for the second time in five days.

The second attack was directed mainly against defences installed by the Cambodian army after the last attack. One Cambodian soldier was killed and four soldiers and a civilian were wounded.

A **communique** said that the stepping up of military activities against Cambodia clearly showed the wish of Cambodia's neighbour and "her allies to provoke a general conflict throughout South-East Asia."

A third bombing attack by Viet-Namese aircraft was alleged on October 26. A **communique** said that the bombardment had been carried out by "two aircraft of the F-101 type belonging to American aviation" which had machine-gunned the Cambodian army's defensive positions established at Anlong-Kres after "the first aggression of October 20."

At the same time the Cambodian Ministry of Information announced that three helicopters protected by 15 aircraft from South Viet-Nam had taken part in an operation to recover the bodies of the crew of a two-engined plane which had been brought down in front of a military post at Dak Dam, Eastern Cambodia.

The Head of State, Prince Norodom Sihanouk, conferred with top officials on October 26 following the reported bombings.

Later, the Government warned that it would return blow for blow all violations of the Cambodian border with South Viet-Nam either by South Viet-Namese or American personnel.

The official Khmer Press Agency said two Viet-Namese aircraft were spotted by radar and chased by the Cambodian fighters on October 26, about a dozen kilometres inside the Cambodian territory near Peam Montea village, 50 miles south-east of Pnom Penh.

In a statement, the Government warned that if further violations of the border took place, Cambodia would cease diplomatic relations with USA and recognize the National Liberation Front as the shadow Government of South Viet-Nam.

Admission Of Air Attacks:

American and Viet-Namese spokesmen admitted in Saigon on October 28 that intensified Viet-Cong activity from bases inside Cambodia had forced South Viet-Namese and American aircraft to fire against Cambodian targets.

The American mission spokesman, Mr. Barry Zorthian, confirmed that a United States Air Force C-123 transport plane that was shot down on October 24 was flying over Cambodia when it was hit, and that the fire it received came from heavy machine-guns in Cambodian territory. Eight Americans were killed when the plane went down. Armed American helicopters circling over rescue operations around the wreckage returned fire against a Cambodian village and military camp.

The South Viet-Namese Government presented formal apologies for another incident on October 20 in which Viet-Namese aircraft strafed a Cambodian village near the frontier.

Both the United States and South Viet-Nam, in calling the incidents "regrettable," nevertheless implied that they were unavoidable as long as the Viet-Cong used Cambodia as a sanctuary from which to pursue their war in South Viet-Nam.

"The steps necessary to eliminate these regrettable incidents include the termination of hostile activity by the Viet-Cong in (border) areas," Mr. Zorthian told newsmen in a carefully worded statement.

[Two difficulties, one of politics and one of geography, make the border problem particularly delicate. Geographically, the problem over most of the length of the 575-mile frontier is that the border is not discernible either on the ground or from the air. It passes through desolate mountains and flooded delta land. The political difficulty is that it is not, and perhaps cannot be, determined whether fire from Cambodian territory is coming from Cambodian troops or Viet-Cong units inside Cambodia.]

Cambodian Protest To UN:

Cambodia informed the UN Security Council on October 28 that it could only rely on "appropriate action by friendly Governments" to halt what it described as acts of aggression by USA.

The "friendly Governments" were not identified.

The same day (October 28), Cambodia denied that Cambodian military forces were in any way responsible for the death of an American officer captured near the Cambodian-Viet-Namese border on October 22.

US Army Capt. Herman Y. Towery had been captured by unidentified troops who crossed over the border from Cambodia. His body and those of two of his Viet-Namese companions were found on October 24 on the Viet-Namese side of the frontier.

The Government statement said if Cambodian forces had captured an American officer and Viet-Namese soldiers, "it would have been in Cambodia's interest to keep them alive in order to present them to the International Control Commission and the Press as evidence of a violation of Cambodian territory."

Further rift between USA and Cambodia became evident on November 2 following reports which quoted American sources as saying that the wives and children of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the small American Embassy staff in Cambodia were leaving the country.

The reports said the evacuation was a precautionary measure after the recent shooting down of a US transport plane and the border incidents.

On November 3, Russia expressed its concern to USA over clashes along Cambodia's border with South Viet-Nam.

America in turn called on the Soviet Union to avoid any step which would make the border situation worse.

In Washington, a State Department spokesman said: "The Secretary of State expressed the concern of the US Government at the continued use by the Viet-Cong of the Cambodian-Viet-Namese border area."

British sources reported on November 4 that the Soviet Union had officially proposed to UK that the 1954 Geneva Conference be reconvened to guarantee the neutrality and territorial integrity of Cambodia.

According to the sources, the Soviet proposal was conveyed earlier in the day (November 4) by the Russian Ambassador, Mr. Alexander Soldatov, to Britain's Foreign Secretary, Mr. Patrick Gordon Walker.

Mr. Gordon Walker asked whether the Soviet Union still intended to assume fully its role as co-Chairman (with Britain) of the Geneva Conference.

The British Government, the sources added, would not take action on the Soviet proposal till it received the clarification which it had sought.

Earlier, on November 2 in Bangkok, the Thai Deputy Defence Minister, Air Chief Marshal Dawee Chullas Apya, told newsmen that the situation in Cambodia was worsening because of growing Chinese influence. He believed USA would take some measures against Cambodia after the Presidential elections.

Meanwhile, China warned USA that it could not "ignore any acts of aggression endangering the security of Cambodia."

The **New China** news agency published on November 2 a recent exchange of letters between Prince Norodom Sihanouk and the Chinese leaders, in which the Cambodian Prince had condemned alleged US-South Viet-Nam attacks on his country and warned that "hereafter it is impossible for us to suffer new aggressions passively; it is impossible for us not to strike back, whatever the consequences."

CEYLON

A. Colombo Plan Annual Report: According to the annual report for 1963-64 of the Colombo Plan Council, population explosion and fluctuating world markets and prices pose serious problems for the Colombo Plan countries in South and South-East Asia, although their economic development programmes have gathered momentum.

In these circumstances, the Council expressed its conviction that "technical co-operation in the Colombo Plan region should be intensively pursued to make the most effective use of the growing resources for such programmes within the region as well as of the opportunities provided through the aid of more developed member-countries."

Besides, the rapid development of training at the professional and middle levels "is essential to create the base of competent personnel who shall carry forward future development and occupy significant places in expanded and diversified economies."

The report said India occupied a key position during the year in the context of intra-regional training and was the major donor of training places within the region, having provided 284 places—77 per cent of the total.

Malaysia ranked as the second largest donor, followed by Pakistan, Burma, Ceylon and the Philippines.

The total number of training places within the region from the inception of the Plan to June this year was 3,058.

Nepal, Ceylon and Burma made good use of training facilities, while Cambodia and Laos made little use, owing "partly to language difficulties."

There was, on the whole, a "notable expansion" of training facilities within the region. However, the increased facilities were not fully exploited "regionally."

Technical assistance under the Plan during the year was characterized by "flexibility and elasticity." The assistance met (1) the widely varying technological requirements of countries of different stages of economic development and (2) the changing technological requirements of each country from the basic fields to the more sophisticated.

Common bonds such as historical ties, geographical location and languages were among the major factors which influenced the flow of technical assistance. For example, India took in a large proportion—63 per cent—of trainees from Nepal and a considerable number from Ceylon.

The major donor of training places was USA, which provided 2,164 places—48 per cent of the total.

Training places were provided in a wide variety of fields—engineering, technical education, civilian use of nuclear power, agriculture, medicine, industrial management, public and business administration and social services.

Education accounted for the largest number of training awards and the accent was increasingly on technical and vocational skills and practical experience rather than on mere acquisition of university degrees. Administration, agriculture and forestry continued to occupy second place.

The services of 948 experts were made available to the region during the year as compared to 870 last year. Of the experts, 562 were provided by USA. India was the second largest donor of experts with 106. India also accounted for taking in the largest number of experts (157), followed by Viet-Nam (137) and Nepal (123).

The trend towards long-term experts, noticed during the last five years, continued.

Maldive Islands and Afghanistan became members of the Council during the year, raising its strength to 22.

(*The Times of Ceylon*, Colombo)

[Prev. ref. 5509:CEY:B]

B. Rail Disaster: Twenty-one passengers were killed and about 180 injured—56 of them seriously—when a number of bogies of the Colombo-bound Talaimannar Express derailed between Ambepussa and Mirigama, about 30 miles from Colombo on October 17.

The train consisted of eight passenger bogies and 14 wagons. Three of the passenger bogies were badly damaged.

Passengers who were pinned under the wrecked coaches could not be extricated until a break-down special reached the scene of the accident.

(*The Hindu*, Madras)

CHINA

A. Notes To All Countries On Atomic Blast: China sent on October 18 to Governments around the world a statement explaining why it had detonated its first atom bomb and calling for a "summit" conference to ban all nuclear weapons.

The statement, signed by the Prime Minister, Mr. Chou En-lai, and sent to Heads of Governments was word for word the same as that issued on October 16 in announcing the explosion of the bomb (see page 6148).

President Johnson of USA, with which China has no diplomatic relations, also received the Chinese Premier's letter. It was delivered in an exchange between the Chinese and US Embassies in Warsaw.

President L. B. Johnson's Interview:

In a televised interview, President Johnson said on October 18 that, according to US intelligence advice, the detonation of the Chinese nuclear device took place at a test site near a lake called Lop Nor, in the Takla Makan desert of the remote Central Asian province of Sinkiang.

The building of that test site had been known to US Intelligence for several years and the rapid pace of work there gave a clear signal that a nuclear test was about to take place.

He accused the Chinese of carrying out their nuclear weapons programme "even as their economic plans collapsed and suffering of their people became enormous." "No American should treat this matter lightly. This explosion remains a fact—sad and serious. We must not and we will not ignore it."

He re-affirmed US defence commitments in Asia and said that the "overwhelming" strength of USA would be available to countries which required support against the threat of nuclear blackmail.

He said that the lesson of Lop Nor was that nuclear weapons could spread. "We must continue to work against it—and we will."

Signing Of Partial Test Ban Treaty—China Rejects US Proposal:

On October 22, China rejected President Johnson's suggestion that it should join the three-Power partial nuclear test ban Treaty and said its own anti-bomb proposal was "practical, reasonable, easily feasible and involves no question of control."

The Chinese rejection of Mr. Johnson's public declarations that Peking should agree to the Treaty now that it had exploded its own bomb was contained in an editorial in the **People's Daily**.

At the same time, the Chinese regime promised, "we shall not use these weapons to intimidate others and embark on any adventure. Nor shall we use them as a membership card to join the nuclear club and do anything to jeopardize the interest of the people's revolutions the world over or that of world peace. Socialist China can be trusted."

China's bomb explosion on October 16 made it the fifth world nuclear Power along with USA, Russia, France and Britain.

Despite Peking's assertion it will not use its newly acquired nuclear power to intimidate others, the **People's Daily** carried a side editorial on its front page warning that "those who play with fire will get themselves burnt." It re-affirmed China's "all-out support" for the Communist insurgents of South Viet-Nam and

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Laos, condemned the Johnson Administration's authorisation of "hot pursuit" by its aircraft into China and North Vietnam and said: "One should be fully alert against US adventure of extending the war into Indo-China."

The newspaper said: "China is by no means obsessed by the idea of possessing nuclear weapons. It will stop developing them as soon as US imperialism does so."

It added: "Mr. Johnson may try deceit, intimidation or slander, but he cannot make the Chinese people budge from their stand."

US Stand:

On October 23, a US State Department spokesman declared that "the channels for dialogue" between China and the older nuclear Powers were open.

The Department Press Officer, Mr. Robert McCloskey said it "would be all right" with the United States if the Chinese were invited to Geneva disarmament talks.

The UN Secretary-General, U Thant had suggested on October 22 that the United States, the Soviet Union, Britain, France and China should meet in 1965 to discuss a total nuclear test ban and nuclear weapons control measures.

Mr. McCloskey said USA interpreted U Thant's proposal to be for a "dialogue" among the nuclear Powers, including China.

"The channels for a dialogue are open", he said. "The British, French and Soviet Governments are represented in Peking, and we (the United States) have periodic talks with the Chinese Communists in Warsaw."

At the same time, he said that although the channels were open to the Chinese, "we haven't heard anything constructive from them yet."

U Thant's View:

The UN Secretary-General, U Thant, said at a news conference in New York on October 22 that the Chinese test explosion was "deplorable" and "regrettable," particularly in the context of the UN General Assembly resolutions and the Moscow Test Ban Treaty, which had been overwhelmingly endorsed by UN.

U Thant suggested that talks among the nuclear Powers—USA, the Soviet Union, Britain, France and China—might be useful and worthwhile.

He said that in his view 1965 might be congenial for such a dialogue and this could supplement disarmament attempts.

He declined to assess the effect of China's entry into the "nuclear club" upon UN recognition of Peking, which will come up in the forthcoming General Assembly. This was entirely a matter for the members to decide.

Cambodian Proposal:

Meanwhile, on October 21 Cambodia proposed the inscription of the question of Chinese representation on the agenda of the forthcoming UN General Assembly.

The Cambodian-sponsored additional item was entitled "restoration of the lawful rights of the People's Republic of China in the United Nations." An explanatory memorandum was expected to follow.

The item was inscribed in 1963 at the instance of Albania. Albania and Cambodia had co-sponsored the resolution on the subject before the General Assembly, which was rejected by 57 votes to 49, with 12 abstentions.

(*The Times*, London, *The New York Times* and *The Statesman*, Calcutta)

B. Campaign Against "Revisionism": In a broadening campaign against "revisionism", another prominent intellectual of the Chinese Communist Party has come under attack.

Mr. Feng Ting, head of a philosophy association in Peking and Deputy Chairman of the Philosophy Department at Peking University, has been singled out for criticism in letters addressed to Red Flag, the theoretical journal of the Central Committee.

Peking Radio in a Chinese language broadcast reported publication of the critical letters in a review of the authoritative party journal.

The substance of the complaint against Mr. Feng was not stated. However, the method of criticism was similar to that employed initially against Mr. Yang Hsien-Chen, a member of the Central Committee who was President of the Higher Party School until 1961 (see page 6065).

Mr. Yang was accused of propagating revisionist philosophy according to Soviet tenets in lectures as late as last April at the Higher Party School, which is a senior ideological institution. Mr. Yang, in philosophical terms, was said to have condoned unity with the then Soviet Premier, Mr. N. Khruschev's leadership of the Soviet Party, reconciliation with USA and termination of the class struggle.

The charges lodged against Mr. Yang and his supporters have served to jolt members of the party and intellectuals generally into a more rigid observance of doctrines laid down by Mr. Mao Tse-tung, the Party Chairman.

This may have been the motive of the campaign against Mr. Yang. However, analysts also speculated that Mr. Yang was selected as the first prominent victim in a purge of party and cultural leaders who had failed to free themselves of all Soviet ideological influence.

The Yang controversy has been compared to the 1931 Stalin purge of Professor Deborin, a leading Soviet philosopher and his followers. In making the comparison, the Chinese Press said that the revisionist philosophy of Deborin had become an "ideological instrument in the hands of an anti-party group."

(*The New York Times* and *The Times of India*, Bombay)

[Prev. ref. 6065:CHI:B]

C. Mr. Chou En-lai's Criticism Of Late Mr. Nehru And India: The Prime Minister, Mr. Chou En-lai, not only made it clear to a Ceylonese parliamentary delegation in Peking recently that his Government would not budge an inch from its position on the border dispute with India, but also indirectly accused President Nasser of UAR of double-talk on the issue.

In a two-hour talk with the delegation, he was said to have called the late Indian Premier, Mr. Jawaharlal Nehru "the most arrogant man" he had ever met.

Mr. Chou said: "I have met Mr. Khruschev, I have met Mr. Chiang Kai-shek, I have met American generals, but I have never met a more arrogant man than Mr. Nehru. I am sorry, but this is true."

According to one of the delegates, Mr. Edmund Samarakody, leader of a pro-China group in the Trotskyite Sama Samaj Party, Mr. Chou said that Mr. Nehru was "almost implacable. In fact, your Prime Minister, (Mrs. Bandaranaike) had decided, shortly after the Colombo Powers' Conference, to carry the proposals first to India. But Mr. Nehru insisted that she should go to China. That is why she came to China first."

The interview took place before the conference of non-aligned nations met in Cairo and Mr. Chou was said to have shown concern that the Sino-Indian border issue was being raised there. "It is the Indian Prime Minister and Marshal Tito who are most anxious to raise it. It would be wrong to bring up the issue because China is not represented at the Conference."

A member of the 13-man Ceylonese delegation said Mr. Chou had asserted that "during my visit to Cairo, President Nasser told me that India's stand now is most unreasonable and it was now turning a deaf ear to the Colombo Powers."

Asked by Mr. Samarakody whether he expected India to seek a settlement of the border issue soon in view of its uncomfortable economic position, Mr. Chou was said to have replied: "I cannot say definitely, but I am hopeful that before long this border dispute will reach a definite settlement."

He was said to have shown his anger against Mr. Khruschev by calling him a liar. "He will lie to your face," he was reported to have bitterly remarked.

He took objection to the Soviet Union supplying armaments to India, but argued that they could not be used on the Himalayas. "Therefore, Pakistan's fears that arming India would be a potential threat to her is quite reasonable."

He told the delegation that India wanted to use the border dispute to divert the people's attention from unsettled economic conditions. China could not have any conflict with the people of India. Her conflicts were against imperialists who were threatening her.

He gave a history of the events that led to the border conflict and said: "China has withdrawn 20 kilometres behind the line of actual control. At no cost will we withdraw any more. Now it is up to India."

He maintained that the Colombo proposals should be the basis for negotiations. China would not depart any more from its original position.

(*The Times of India*, Bombay)

[Prev. ref. 5496:INI:A]

D. Loan To Congo (Brazzaville): President Alphonse Massemba-Debat of Congo (Brazzaville) stated on October 12 that China had granted his country an interest-free loan equivalent to 5,000 million francs (about £7.3 million).

The loan was part of an Economic Agreement between the two countries signed during the President's recent visit to Peking.

(*The Times*, London)

E. Trade Protocol With Afghanistan: The *New China News Agency* reported on October 25 that China and Afghanistan had signed a Goods Exchange Protocol for 1964-65.

Under the Protocol signed in Kabul, Afghanistan would supply China with lapis-lazuli, dried fruit and nuts in exchange for Chinese goods of equivalent value.

INDIA

SUMMARY: Mrs. S. Bandaranaike's Visit; NDC Meeting; Mrs. I. Gandhi's Talks With Soviet Leaders; IDA Credit; Code Of Conduct For Ministers.

A. Issue Of "Stateless" People In Ceylon—Mrs. S. Bandaranaike's Visit: The Ceylonese Prime Minister, Mrs. Sirimavo Bandaranaike, arrived in New Delhi on October 22 for talks with the Indian Prime Minister, Mr. Lal Bahadur Shastri, on the future of people of Indian origin in Ceylon.

Mrs. Bandaranaike and Mr. Shastri drove together to Rashtrapati Bhavan after she was given a warm welcome at Palam airport. Later, she called on the President, Dr. S. Radhakrishnan. The Minister for External Affairs, Sardar Swaran Singh, had a brief preliminary exchange of views with her.

[There are 11,40,000 persons of Indian origin in Ceylon. About 1,40,000 have been given Ceylonese citizenship. About 29,000 hold Indian passports. The status of the remaining 9,71,000 has been a matter of dispute. The Ceylonese Government contended that they are Indian nationals. India had rejected this claim. Under the Nehru-Kotelawala Agreement of 1954 a guarantee was given to those having Indian passports that they would be allowed to continue to be in employment in Ceylon till they reached the age of 55. But subsequently the guarantee was applied only to those who had applied for Ceylonese citizenship and been rejected and then applied for Indian citizenship which was granted. This variation was regarded by the Indian Government as a variation of the Agreement. Most of these people are plantation workers who have contributed immensely to Ceylonese prosperity over the decades. Ceylon feels that the grant of citizenship to these people will mean a denial of economic opportunities to the indigenous population.]

The delegation led by Mr. Shastri consisted of Sardar Swaran Singh, Mr. V. Ramaiah, Madras Minister for Works, Mr. C. S. Jha, Commonwealth Secretary, Mr. B. K. Kapur, Indian High Commissioner in Ceylon, Mr. B. N. Lokur, Law Secretary, Dr. K. Krishna Rao, Director of the Legal and Treaties Division of the Ministry of External Affairs, Mr. N. P. Alexander, Deputy Secretary, Ministry of External Affairs, and Mr. N. Raj Kumar, Second Secretary, Indian High Commission in Colombo.

The Ceylonese delegation led by Mrs. Bandaranaike consisted of Mr. T. B. Ilangaratne, Minister for Internal and External Trade and Supplies, Mr. Felix Dias Bandaranaike, Minister for Food, Fisheries and Agriculture and Parliamentary Secretary to the Minister for Defence and External Affairs, Mr. H. S. Amerasinghe, Ceylonese High Commissioner in New Delhi, Mr. N. Q. Dias, Permanent Secretary to the Ministry of Defence and External Affairs, Mr. W. T. Jayasinghe, Controller of Immigration, and Emigration, Mr. S. Jayaweera, Assistant Secretary, Ministry of Defence and External Affairs and Mr. R. Wanasundara, Legal Adviser, and Mr. K. B. Vikramasinghe, Private Secretary to the Minister for Internal and External Trade and Supplies.

State Dinner:

At a dinner given by him on October 22 in honour of Mrs. Bandaranaike, Mr. Lal Bahadur Shastri called on countries not possessing nuclear weapons to unite and make a concerted effort to build up public opinion against these instruments of destruction.

He made a pointed reference to the explosion of a nuclear device by China. He said: "The recent explosion of an atom bomb by China has created a stir which is undoubtedly a matter of concern to all of us. However, we have always held the view that the use of nuclear weapons should be banned by agreement and all nations in the world should unite to save humanity from destruction. I feel also that those countries which do not possess nuclear weapons, in Europe, Asia, Africa, should unite and make a concerted effort to build up necessary public opinion. This should have an impact on the countries which are in possession of nuclear weapons. I must admit that we are passing through a most difficult period in international relations and we have to act wisely and as far as possible in co-operation with each other."

He said to Mrs. Bandaranaike: "Your visit, Madam Prime Minister, is an event of immense pleasure to us. Ceylon is so close to us geographically and also to our hearts. We have had the honour of welcoming you here previously. You took the trouble of being here last at the time of the passing away of my great and eminent predecessor, Pandit Jawaharlal Nehru. It was so gracious of you to have come on that occasion and sympathised with us in our national loss and bereavement.

"I know how friendly Jawaharlalji was to the Ceylon Government and to the Ceylonese people. Long before India and Ceylon got their independence Jawaharlalji had visited Colombo and as a fighter for freedom he was given a great welcome in your country. Everyone of us knows how close and near he was to your distinguished husband, Mr. Bandaranaike. We cherish our friendship with Ceylon and it is our earnest hope that the bonds of unity will become stronger in future and that we will try to be helpful to each other. I deem it a great privilege to welcome you, Madam Prime Minister, to our country and I wish to convey to you personally and to your distinguished colleagues our happiness at your being with us.

"It is very good of you, Madam Prime Minister, to have decided to visit India at this time. We have a small problem between our two countries and I know both of us believe that it should be possible to settle it. It is not unoften that problems arise between the neighbouring countries but they should also be settled in a friendly manner. I do not want to go into any details as we will be having a series of discussions during the next few days. However, both you and we have to make earnest efforts towards bringing about a settlement. If we agree in principle on the important aspects of the problem, the details could perhaps be easily worked out.

"Our thinking on many vital problems in the international field has been common and we have worked together in co-operation in the United Nations and other international gatherings. Recently I have had the good fortune of meeting you in Cairo at the time of the non-aligned Conference. There was a general agreement in our approach and the Conference arrived at many important and vital decisions."

He added: "I must, however, say that for our countries which have recently attained their freedom it is most important that they should develop economically. We have to deal with the problems of poverty and unemployment, of industrial and agricultural development. I know, Madam Prime Minister, you fully believe in it and are already engaged in this task.

"Our problems here in India are enormous, but we are trying to tackle them as effectively as we can. We believe in a planned economy and we are in the midst of our Third Five-Year Plan. It is our earnest effort that through the completion of our Plans, we should be able to give a better and prosperous life to our men, women and children. To me sometimes, many other things pale into insignificance when I realise that the difficulties of the 460 million people have to be successfully and effectively tackled. Let us hope that we will be able to wage war against poverty and unemployment and that we are able to build up a new social order to give real relief to our people. It is also essential that the under-developed countries should try to help and co-operate with each other for improving the standard of living of their peoples. I know you feel equally strongly on the question of peace and of economic development of Asian and African countries. We all wish you well.

"May I, Madam Prime Minister, once again convey to you and your colleagues our deep personal regards and our best wishes for the progress and prosperity of the people of Ceylon."

The following is the text of Mrs. Bandaranaike's speech:

"I am grateful to you for the kind welcome you have accorded us today, for the friendly sentiments which you have expressed and the generous hospitality extended to us this evening. A visit to Delhi has always been an occasion to look forward to. You have received me here on my first visit abroad shortly after I assumed office. I came here again in January, 1962, with the proposals of the six non-aligned countries on the border dispute. Every time I have been received with the utmost cordiality and my recollections of Delhi have always been recollections of charm, of kindness and of extraordinary hospitality. We are aware, Mr. Prime Minister, and you have left us in no doubt, that we are among friends.

"Mr. Prime Minister, as you would know, I was here yet another time—in May this year for a sadder purpose—to be present at the obsequies of your great leader, Mr. Jawaharlal Nehru. With his death India has lost one of her greatest sons and all of us in Asia are the poorer for the loss of a statesman and leader whose vision and ideals have left an enduring imprint on the history of our times.

"I had the good fortune to meet you, even though somewhat briefly, during the Conference of non-aligned countries in Cairo earlier this month. There, I was re-assured that our two countries have much in common on most of the problems and issues which yet confront especially the countries of Asia and Africa and also the wider world. I am hopeful that in the next few days we shall have other opportunities of coming to know you, Mr. Prime Minister, and also your distinguished colleagues.

"Besides a more informal exchange of views on such problems as occupied us in Cairo, I have come to Delhi this time mainly for the purpose of seeking a settlement of a problem which has exercised the minds of our two countries for almost 25 years. This problem, Mr. Prime Minister—the problem of the status of people of Indian origin in Ceylon—is perhaps the only one on which we have held differing views.

"I am confident, Mr. Prime Minister, that if, during the conversations which we shall have in the next few days, we approach the problem with the same understanding and spirit of friendship which has always influenced the relations between our two countries, a mutually acceptable solution will be within our reach.

"We have too much in common in our history, our traditions, our culture and our outlook for the future to allow any problem to affect these far more abiding ties."

Reception By Indo-Ceylon Friendship Association:

Speaking at a reception given on October 26 by the Indo-Ceylon Friendship Association, Mrs. Banda-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ranaike expressed the hope that a lasting solution of the problem of people of Indian origin in Ceylon would be found before she left for home.

She said she was sure Mr. Lal Bahadur Shastri also was "as anxious as ourselves" to find a solution to the problem. "If we can find a lasting solution, India and Ceylon will prove to the world that the lasting friendship that has marked the relationship between our two countries for centuries has been genuine."

She said the problem of people of Indian origin in Ceylon had been troubling Ceylon for 25 years and had now become vital. The Ceylonese were getting restless. They were suffering economically and wanted a permanent solution. A solution, she hoped, would be found as a result of the strong historical and cultural ties binding the two countries.

Mrs. Bandaranaike's two Cabinet colleagues, Mr. T. B. Ilangaratne and Mr. Felix Dias Bandaranaike, also expressed the hope that a solution would be reached on the basis of mutual friendship.

Describing the problem as a "legacy of imperialism," Mr. Ilangaratne said a solution could be found given trust on both sides.

Stressing the commonness of the two countries, he said India and Ceylon were "the two countries in Asia which could boast of being the most democratic."

Mr. Bandaranaike said the problem of the Stateless in Ceylon was the only problem between India and Ceylon. Even an argument could take place on a basis of friendship and the two countries had demonstrated they had the capacity for this. Whatever the problems and arguments, the basic approach of both India and Ceylon were so constructed as to lead to a mutual desire for the good of both.

He added: "Over here, our two countries have demonstrated mutual friendship and the degree of friendship has satisfied me."

Mrs. Bandaranaike was presented with several ancient manuscripts written in Sinhalese on palm leaves as gifts on behalf of the Association. They included the Gita, Amarkosh, a dictionary, and a treatise on Ayurveda. She was also presented with a brass peacock, India's national bird.

Future Of People Of Indian Origin In Ceylon—Agreement Reached:

On October 29, the Prime Ministers of India and Ceylon reached agreement on the future of the "Stateless" people of Indian origin in Ceylon, thus settling a long-standing problem which had often strained relations between the two neighbours.

Under the Agreement, which was signed on October 30, India will take back 5,25,000 of the 9,75,000 people whose status is in dispute. Ceylon will grant full citizenship rights to 3,00,000 settlers.

The status of the remaining 1,50,000 people will be determined at another series of talks early in 1965.

The repatriation of those who are to get Indian citizenship will be spread over 15 years.

Political circles in New Delhi hailed the Agreement as the first significant achievement of the five-month-old Shastri Government in international relations. India was first seized of the settlers' problem in 1939 when Mr. Jawaharlal Nehru was deputed by the Congress to visit Ceylon to study it in all its aspects.

The Agreement marked the conclusion of talks between Mr. Lal Bahadur Shastri and Mrs. Sirimavo Bandaranaike lasting six days. The talks were threatened with breakdown at least twice. However, their determined efforts to reach an amicable settlement bore fruit. Both delegations went through prolonged bouts of hard bargaining and arrived at the final commitments after resiling from their positions in a spirit of give and take.

The Minister for External Affairs, Sardar Swaran Singh, during his visit to Colombo a few weeks earlier, had made the initial move to tackle the problem and reached an understanding on the proportion of the "Stateless" people who would be given the citiizenship of either country. The tentative proposals made by him had envisaged India's responsibility for 3,00,000 persons. Ceylon was not, however, willing to grant citizenship to more than 1,00,000.

Joint Communique:

A joint *communique* was signed on October 30 by Mr. Shastri and Mrs. Bandaranaike shortly before the Ceylonese Premier's departure for Colombo.

Copies of two letters exchanged between them which together with the **communique** constitute the agreement reached over the future of Stateless people of Indian origin in Ceylon, were released the same day.

The Agreement provides for the establishment of a joint committee of officials to supervise the working of the Agreement. (Mr. Shastri said later that if necessary a ministerial-level body might also be formed.)

The registration as citizens of 300,000 "Stateless" persons by Ceylon and the repatriation of 5,25,000 others to India will "keep pace with each other" under the Agreement.

The Ceylonese Government will grant to the persons repatriated the same facilities as are enjoyed by citizens of other States "except facilities for remittances".

The Ceylon Government has agreed that the maximum amount of assets which any family shall be permitted to repatriate shall not be reduced to less than Rs. 4,000.

The following is the text of the joint *communique*:

"At the invitation of the Prime Minister of India, Mr. Lal Bahadur Shastri, the Prime Minister of Ceylon, Mrs. Sirimavo Bandaranaike, visited Delhi from October 22 to 29. The Prime Minister of Ceylon was accompanied by Mr. T. B. Ilangaratne, Minister of Internal and External Trade and Supply, Mr. Felix Dias Bandaranaike, Minister of Agriculture, Food and Fisheries and the Parliamentary Secretary to the Minister of Defence and External Affairs, Mr. N. Q. Dias, the Permanent Secretary to the Ministry of Defence and External Affairs, and other officials of the Government of Ceylon.

"The Prime Minister of Ceylon, assisted by Mr. T. B. Ilangaratne, Mr. Felix Dias Bandaranaike, the High Commissioner for Ceylon in India. Mr. H. S. Amerasinghe, and Mr. N. Q. Dias, and other officials of the Government of Ceylon, and the Prime Minister of India assisted by the Minister of External Affairs, Sardar Swaran Singh, the Minister of Works in the Government of Madras, Mr. V. Ramaiah, the Commonwealth Secretary, Mr. C. S. Jha, the High Commissioner of India in Ceylon, Mr. B. K. Kapur, and other officials, held discussions on the outstanding issues relating to the problem of persons of Indian origin in Ceylon.

"The talks were frank and friendly and were held in an atmosphere of mutual understanding. The discussions were characterized by a sincere desire on the part of both Prime Ministers to arrive at a mutually satisfactory, equitable and honourable settlement of the problem, without prejudice to their respective earlier positions.

"In their search for a solution to the problem, the two Prime Ministers agreed to a fresh approach to the problem. They of 975,000 persons, Ceylon will accept as Ceylon citizens 300,000 and India 525,000 persons. The status of the remaining 150,000 persons of Indian origin in Ceylon was left for determination at a subsequent meeting of the Prime Ministers in Ceylon at an early date.

"It was agreed that the admission to Ceylon citizenship of the 300,000 persons and the repatriation of the 525,000 persons should be spread over a period of 15 years and that the two processes should keep pace with each other. The text of the agreement in the form of exchange of letters between the two Prime Ministers is being released separately.

"During the visit, opportunity was taken by the two Prime Ministers to make a general survey of the international situation in the light of recent developments and their possible consequences on the situation in Asia and on the problems of peace and disarmament.

"The Prime Minister of Ceylon conveyed to the Prime Minister of India her warm appreciation of the friendly welcome and hospitality extended to her and members of her delegation. The Prime Minister of India expressed the great pleasure of the people and the Government of India at the Prime Minister of Ceylon's visit to India."

Main Features Of Agreement:

The letters exchanged between Mr. Shastri and Mrs. Bandaranaike laid down the main features of the Agreement as follows:

"(1) The declared objective of this agreement is that all persons of Indian origin in Ceylon who have not been recognized either as citizens of Ceylon or as citizens of India should become citizens either of Ceylon or of India.

"(2) The number of such persons is approximately 975,000 as of date. This figure does not include illicit immigrants and Indian passport-holders.

"(3) 300,000 of these persons, together with the natural increase in that number, will be granted Ceylon citizenship by the Government of Ceylon; the Government of India will accept repatriation to India of 525,000 of these persons together with the natural increase in that number. The Government of India will confer citizenship on these persons.

"(4) The status and future of the remaining 150,000 of these persons will be the subject matter of a separate agreement between the two Governments.

"(5) The Government of India will accept repatriation of the persons to be repatriated within a period of 15 years from the date of this agreement according to a programme as evenly phased as possible.

"(6) The grant of Ceylon citizenship under paragraph 3 and the process of repatriation under paragraph 5 shall both be phased over the period of 15 years and shall, as far as possible, keep pace with each other in proportion to the relative numbers to be granted citizenship and to be repatriated, respectively.

"(7) The Government of Ceylon will grant to the persons to be repatriated to India during the period of their residence in Ceylon the same facilities as are enjoyed by citizens of other States (except facilities for remittances) and normal facilities for their continued residence, including free visas. The Government of Ceylon agrees that such of these persons as are gainfully employed on the date of this agreement shall continue in their employment until the date of their repatriation in accordance with the requirements of the phased programme or until they attain the age of 55 years, whichever is earlier.

"(8) Subject to the exchange control regulations for the time being in force which will not be discriminatory against the persons to be repatriated to India, the Government of Ceylon agrees to permit these persons to repatriate, at the time of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

their final departure for India, all their assets including their provident fund and gratuity amounts. The Government of Ceylon agrees that the maximum amount of assets which any family shall be permitted to repatriate shall not be reduced to less than Rs. 4,000.

"(9) Two registers will be prepared as early as possible—one containing the names of persons who will be granted Ceylon citizenship, the other containing the names of persons to be repatriated to India. The completion of these registers, however, is not a condition precedent to the commencement of the grant of Ceylon citizenship and the process of repatriation.

"(10) This Agreement shall come into force with effect from the date hereof and the two Governments shall proceed with all despatch to implement this Agreement and, to that end, the officials of the two Governments shall meet as soon as possible to establish joint machinery and to formulate the appropriate procedures for the implementation of this Agreement."

[Prev. ref. 6075:CEY:A]

B. National Development Council Meeting—Mr. Lal Bahadur Shastri's Address: Inaugurating a two-day meeting of the National Development Council in New Delhi on October 27 the Prime Minister, Mr. Lal Bahadur Shastri, called for the establishment of basic consumer industries in the public sector to meet the needs of the common man.

Only then, he said, could the people be assured that the shortages they had been experiencing in the recent past would not become chronic.

The Council was called to consider the preliminary memorandum on the Fourth Five-Year Plan.

In his address, Mr. Shastri explained the need to ensure that the momentum of efforts for a better life for the common man was being maintained in the Fourth Plan.

For this purpose, he wanted the Government to enter the business of manufacturing cloth, sugar, cement and drugs so as to ensure that these essential goods were available in adequate quantities and at reasonable prices. Such industries in the public sector would also yield better profits and offer scope for larger employment.

He did not indicate whether the Industrial Policy Resolution would be suitably amended to provide for the Government's participation in the production of consumer goods in a big way.

He, however, re-iterated that the basic objective was socialism which meant an immense growth of the public sector. Heavy industries would continue to be the backbone of economic development. Steel and machinery must be produced in larger quantities.

Care, however, had to be taken to secure the utmost out of the investment on heavy industry in the shortest possible time. Planning of heavy industries in the Fourth Plan had to be on the basis of performance. Only then would planning become real and accurate.

He announced that he had, in consultation with the Planning Commission, decided to constitute an ad hoc body consisting of scientists, engineers, economists and other experts to help the Planning Commission on a part-time basis.

The intention was not to have yet another advisory body, nor a body which would meet for a day or two at long intervals, but to get people to work on the Plan.

It was proposed to call this body the National Planning Council. It would consist of 15 to 20 members. The Deputy Chairman of the Planning Commission would be the Chairman of the Council.

Appealing for co-operation in the discharge of his responsibilities, he suggested that the Council should meet at more frequent intervals—every two or three months—until the Fourth Plan was finalised.

He confessed that progress in the first two years of the Third Plan had been "very slow." The sluggishness in growth made it necessary to redouble the efforts in the coming years.

Stressing the importance of agriculture, he called for a programme of concrete action. Such a programme must be based on available resources and facilities and not on what might be done in ideal conditions.

In this context, he referred to the lack of co-ordination and guidance at the district level and urged the State Chief Ministers to restore to the district officer the status of a co-ordinator of all Governmental activities in the district and confer on him the responsibility for guiding all the efforts undertaken on behalf of the Government—Central or State.

This toning up of administration was essential to ensure control over prices, a more equitable distribution of available supplies and all the other things proposed to impart stability to the economy.

He also stressed the need for the States to mobilize resources to the maximum. He suggested that the Council might set up a sub-committee to consider this important matter in detail.

As regards the collection of revenue from farmers, he felt that new taxes would be received better if they were given the appearance of a betterment levy.

He also urged the States to remove disincentives to export promotion and create export-consciousness in their areas to enable the country earn more foreign exchange.

Discussion On Fourth Plan:

On October 27, the State Chief Ministers began discussion on the Fourth Plan memorandum submitted by the Planning Commission.

Mr. Shastri's concern for the common man was not reflected in the speeches of the Chief Ministers who were pre-occupied with State allocations. Hardly any of them even formally endorsed his suggestion for manufacturing essential goods like sugar, and cement drugs in the public sector.

They harped on an increase in outlays on irrigation, power and transport without suggesting how and from where the additional resources were to be found.

They were allergic to the suggestion for larger tax effort in the States and complained that they were already burdened with interest on Central loans and committed expenditures.

Few had any comment to offer on the suggestions of the Central Finance Minister, Mr. T. T. Krishnamachari, for mobilizing larger resources by the States through taxation.

Nine Chief Ministers and one State Finance Minister took part in the discussion which related to the objectives and size of the Plan and its administration and implementation. Some of the participants touched upon the problem of agricultural production.

Representatives of Maharashtra, Gujerat, Madras, Jammu and Kashmir, Rajasthan, Orissa, Uttar Pradesh, West Bengal, Assam and Madhya Pradesh spoke on October 27. Madhya Pradesh was represented by its Finance Minister.

Some of the Chief Ministers were understood to have pleaded for greater flexibility in the allocation of funds between the Centre and the States. They desired a change in the basis and pattern of Central assistance.

It was, therefore, decided that a special session of the Council should be convened soon to discuss this proposal.

The Planning Commission's memorandum indicated the allocation as between the Centre and the States on the basis of the present pattern. This would undoubtedly change if, for example, some States wanted the Centre to take over the responsibility for certain irrigation or power projects.

There was, however, general agreement among the Chief Ministers on the desirability of the Centre taking over certain projects but they did not show an appreciation of the implications of such a proposal. Some of them seemed to imply that a few major projects in the States' sector might be taken over by the Centre without the size of the State Plan or Central assistance being reduced. Some others wanted the allocation for backward areas to be increased but could not suggest sources from which the necessary funds could be raised.

The Council, therefore, decided to constitute four sub-committees to go into problems relating to agriculture and irrigation, resources, industry, power and transport and social services respectively. Each committee would have eight to nine representatives of the States.

Memorandum Of Planning Commission Approved:

On October 27, the Council generally endorsed the size, objectives and strategy of the Fourth Five-Year Plan as proposed by the Planning Commission.

The overall outlay for the Plan has been proposed at a range of Rs. 21,000 crores to Rs. 22,500 crores and a rate of economic growth of about 6.5 per cent is aimed at in the period 1966-71.

Chief Ministers of nine States and the Finance Minister of Madhya Pradesh took part in the discussion on the size, objectives, strategy, priorities and pattern of investment of resources for the Fourth Plan as well as on administration and Plan implementation.

The Council accepted Mr. Lal Bahadur Shastri's suggestion to form four sub-committees comprising State Chief Ministers or their nominees to go into (1) resources, (2) agriculture, (3) industry, power and transport and (4) social services.

The sub-committee on sectoral programmes may suggest some changes in the outlays within the overall Plan, its size or in the order of priorities.

The question of the States raising resources for the Fourth Plan and the existing pattern of financial relations between the Centre and the States prominently figured in the discussion.

A special meeting of NDC would be called to consider the basis of allocations for the Fourth Plan as between the Centre and States and also the pattern of assistance. Some of the Chief Ministers pleaded for greater flexibility in the existing financial arrangements between the Centre and the States.

The total Fourth Plan outlay, as suggested in the memorandum and accepted by the Council, was Rs. 22,500 crores with a "firm commitment" of only Rs. 21,500 crores. Of this, the public sector outlay varied between Rs. 14,500 and Rs. 15,500 crores. Projects worth Rs. 1,000 crores are to be taken up "if the economy improved and resources can be mobilized" in the second half of the Plan.

The Council recognized that the rate of growth in the next Plan needed to be higher than had been assumed for the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Third Plan to make up the leeway caused by shortfalls and the rise in prices, and to improve the per capita income.

Accordingly the aims of the Fourth Plan should be: not less than 5 per cent annual growth in agriculture with an overall growth rate of 6 per cent; ensuring availability of inputs for agriculture; providing for continued expansion of transport, power, metals, mining, chemicals and machine-building industry and provision of adequate employment.

An official handout did not refer to the Prime Minister's suggestion that consumer goods be manufactured in the public sector. But it said that one of the aims of the Fourth Plan was "enlarging the supply of essential consumer goods such as cotton textiles, sugar, kerosene, cement, drugs and medicines".

The Council felt that all possible steps should be taken to accelerate progress early in the Fourth Plan period to mobilize additional resources and take adequate advance action.

It agreed that top priority should be given to agriculture and a concerted programme for family planning started immediately on an extensive scale.

It felt that the provisions suggested in the memorandum for power, major irrigation, transport and industries had not been stepped up adequately as had been done in the case of agriculture and social services.

The Council was, therefore, of the view that the sectoral allocations and priorities needed to be re-examined in the light of the immediate need to step up productivity. Accordingly, the financial allocation indicated in the memorandum should be treated as tentative.

The composition of five sub-committees on resources; industries, power and transport; social services; agriculture and irrigation and on hill areas was announced on October 28. West Bengal had representation on three.

During a brief intervention on October 28, the Central Home Minister, Mr. G. L. Nanda, stressed the need to tone up administration for the success of the Plan and argued that it should be possible to add one per cent to the rate of growth by merely streamlining the administration.

He said that it was in the country's interest that if work was not properly done, "somebody should be made answerable for it".

From all available accounts, some of the Chief Ministers went a step further from the positions taken by the Food Ministers of several States at their last conference in demanding greater freedom of action for the States.

In one of the most forceful speeches made during the session, the Andhra Chief Minister, Mr. Brahmananda Reddi, reportedly pleaded that the Centre, instead of trying to strait-jacket the States, should encourage greater autonomy in their respective spheres.

Similar views were expressed by the West Bengal Chief Minister, Mr. P. C. Sen, in milder words, in another context. He suggested that apart from agriculture which should receive the greatest emphasis, priorities for other sectors should be left to the States to decide.

The Prime Minister, in his concluding remarks, made a fervent appeal to the Chief Ministers not to view some of the issues before them as something like a conflict between the Centre and the States.

He said: "We sometimes talk about the differences between the States and the Centre. May I appeal to the Chief Ministers to avoid public statements on such matters as they create a good deal of confusion in the public mind."

Progress In Agriculture—Planning Commission's Note:

In a Note prepared for the meeting of the National Development Council, the Planning Commission admitted that performance in the agricultural sector had been woefully short of expectations.

This had been largely responsible for limiting the increase in consumption standards of the people and for "the abnormal increase in prices."

The Commission noted that although aggregate investment targets would have been achieved in financial terms, several physical targets of production and capacity set for the Third Plan would not be reached by 1965-66.

A large part of the investments that had been undertaken would start yielding "the expected benefits in the initial years of the Fourth Plan."

National income, according to the Commission, had gone up by less than 10 per cent in the first three years of the Plan as against the increase of about 30 per cent assumed for the five-year period up to 1965-66.

With better performance, especially in the agricultural sector, in the remaining years of the Plan period, the Commission felt the national income in 1965-66 may be around Rs. 17,400 crores (at 1960-61 prices) rather than Rs. 19,000 crores.

Discussing what the Note characterized as the imbalance reflected in recent price increases, the Commission said that this was because of two elements—the natural factors affecting agricultural production, and the delays in securing maximum output from past investments.

The Commission felt that the basic needs of the nation remained as compulsive as at the beginning of the Third Plan and, if anything, more pressing on account of the slow progress of the economy in recent years.

The Fourth Plan, it argued must ensure that in spite of unanticipated difficulties in the immediate past, the move towards a better life for the common people maintained its momentum.

C. Mrs. Indira Gandhi's Talks With Soviet Leaders: The Central Minister for Information and Broadcasting, Mrs. Indira Gandhi, visited Moscow in the last week of October when she had talks with Soviet leaders, including the new Prime Minister, Mr. Alexei Kosygin.

Moscow reports quoting authoritative sources said that Mr. Kosygin had informed Mrs. Gandhi that Mr. N. Khruschev had not been blamed for his policy of aid and friendship towards India and this policy would be continued by the new Soviet leadership.

[Reports had appeared in the Western Press that one of the charges against Mr. Khruschev was his commitment to give economic and defence aid to India particularly after the Chinese invasion.]

According to Moscow reports, Mr. Kosygin assured Mrs. Gandhi that no change in the Soviet policy towards India was envisaged in any attempt to please China or Pakistan. The Soviet Union would continue to support India on the Kashmir issue. No change was contemplated in the scale or nature of Soviet aid to India. In other words, there would be no cuts in economic aid or military supplies promised under the previous month's Defence Assistance Agreement.

After her return to New Delhi, Mrs. Gandhi told a news conference on November 2 that Mr. Khruschev's exit would not make any difference to Russian economic and military aid to this country.

In fact, she said, she had been assured that the Soviet leaders would like to give more aid.

Co-operation with and assistance to India was not a "one-man" policy but one that had been formulated by the Government as a whole while Mr. Khruschev was in office. Similarly, the Soviet attitude in regard to Kashmir would also remain unchanged.

She said she did not have any specific discussion in Moscow on the India-China border dispute, but the general reaction of the Soviet leaders was the same as before. "They have upheld our case."

[Prev. ref. 6099:INI:A]

D. Canadian Aid For Kundah Hydro-electric Project: India and Canada signed in New Delhi on November 2 an Agreement for the construction of the third stage of the Kundah hydro-electric project in Madras.

Under the Agreement Canada will contribute a sum not exceeding $ (Canadian) 22.2 million to meet the foreign exchange cost of the construction of three additional power houses with a total installed capacity of 190,000 kw.

The programme envisages addition of an extra generating unit in each of the two existing power houses to increase their combined capacity by 55,000 kw, construction of additional storage and diversion works in the Kundah river and its tributaries and erection of transmission lines and sub-stations.

Canada has also agreed to the use of the rupee counterpart funds generated by the sale of commodities received from that country under the Colombo Plan to the extent of $5,000,000 for the first two stages and $25 million for the third stage of the project.

Canada had given $22 million of assistance for the construction of the first and second stages of the project.

The latest Agreement was signed by Mr. P. Govindan Nair, Additional Secretary of Finance, and Mr. Roland Michener, Canadian High Commissioner in India.

[Prev. ref. 5834:INI:I]

E. Trade Protocol With Rumania: An Indian trade delegation led by Mr. S. V. Ramaswamy, Deputy Minister of Commerce, signed on November 2 in Bucharest a protocol with a Rumanian trade delegation led by Mr. M. I. Voicu, Deputy Minister of Foreign Trade.

The protocol extended Schedules A and B to the existing Agreement to 1965.

The negotiations envisaged an increase of trade by about 15 per cent from the 1964 level.

The Indian exports include iron-ore, cotton textiles, handloom goods and various manufactured goods, including engineering goods, besides items like coffee, tea, jute products, tinned fruits, juice and a number of new items. The Rumanian exports include plant and machinery, fertilizers, caustic soda, soda ash and petroleum products, besides several other machinery items and industrial raw material.

F. IDA Credit For Railways: India will receive a development credit of $62 million from the International Development Association (IDA) to finance imports of steel and components for the railway development programme.

The loan was negotiated by a delegation headed by Mr. D. C. Baijal, Chairman of the Railway Board, during its recent visit to USA. The delegation included Mr. Jaganathan, Financial Commissioner, Railways and a few experts.

The IDA credit will finance the import of steel and components needed for the manufacture of locomotives, electric multiple units, coaches and wagons, track and signalling equipment and other material for the electrification programme. Orders for the equipment are to be placed on the basis of global tenders.

The delegation was understood to have negotiated two other loans amounting to about $31 million—one from the Export-Import Bank and the other from AID. The loans will be utilized for the procurement of components for the manufacture of diesel locomotives and purchase of diesel shunter locomotives. They are expected to materialise shortly.

The IDA credit of $62 million is for a term of 50 years, with repayment of the principal beginning on September 15, 1974. Thereafter, one per cent of the principal will be repayable annually for 10 years and three per cent will be repayable annually for the next 30 years.

The credit is free of interest, but a service charge of .75 per cent per annum on the amount withdrawn and outstanding will be made to meet IDA's administrative costs.

The credit brings the total of IDA funds made available to the Railways to $129.5 *million, including a credit of $67.5 million extended in March, 1963.*

In addition, India has received $378 million in the form of six loans from the World Bank during the last 15 years for the railway development programme. Thus, the World Bank and IDA have advanced loans and credits totalling over $500 million (Rs. 240 crores) to the Railways. This represents less than 10 per cent of the Railways' capital at charge which is Rs. 2,500 crores.

According to the latest figures, the railway investment programme in the Third Plan will involve an expenditure of Rs. 15,815 crores. Of this, Rs. 2,74 crores ($575 million) will be in foreign exchange.

G. Air Agreement With USA —Notes Exchanged: The Governments of India and USA exchanged in New Delhi on October 26 new Notes under the 1956 Indo-United States Air Transport Services Agreement.

The new Notes, which replace clarifying Notes concluded at the time of the Air Agreement in 1956, are intended to facilitate continued development of air services between the two countries.

Under the Notes, Air India will be able to expand its flights during the Winter months on a daily basis and thus maintain a year-round daily service to New York. Air India is introducing its new daily schedule to New York with immediate effect.

The US Ambassador, Mr. Chester Bowles, signed the Notes on behalf of USA and Mr. V. Shankar, Secretary, Ministry of Civil Aviation, signed on behalf of India.

[Prev. ref. 3385:INI:G]

H. Diplomatic Appointments: It was officially announced in New Delhi on November 1 that Mr. Bhim Sen Sachar, former Governor of Andhra Pradesh, had been appointed High Commissioner for India to Ceylon.

He is expected to assume charge of his new assignment before the end of the year.

Mr. Badruddin Tyabji, former Vice-Chancellor of Aligarh University, has been appointed Ambassador to Japan.

Before taking over the Vice-Chancellorship, Mr. Tyabji was Special Secretary in the External Affairs Ministry.

Mr. P. Ratnam, formerly Indian Ambassador to Chile, has been appointed Ambassador to Indonesia.

He is expected to assume charge of his new assignment before the end of the year.

Mr. S. K. Banerji, till recently Additional Secretary in the Ministry of External Affairs, has been appointed Ambassador to West Germany.

(*The Times of India*, New Delhi)

[Prev. ref. 6068:INI:H]

I. Joint Tea Sale Drive With Ceylon: As a result of talks between the Ceylon Minister for Internal and External Trade and Supply, Mr. T. B. Ilangaratne and India's Commerce Minister, Mr. Manubhai Shah in New Delhi on October 27, it was decided that both countries should try jointly to promote the sale of tea in the principal tea-consuming countries and also in other regions where joint promotion had not been undertaken so far.

To take the necessary measures for the development, pricing and sales promotion of tea industry and trade of the two countries, the Ministers agreed that a joint Tea Commission should be set up. The Commission, which will consist of three senior officials of each Government, will meet periodically.

The importance of Britain, which is the largest consumer of tea in the world, in a joint promotion campaign was recognized.

It was agreed that efforts should continue to be made by the Governments of Ceylon and India to secure substantial reduction in the internal duties on tea in West Germany.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5528:INI:O]

J. Code Of Conduct For Ministers —Details: The code of conduct for Ministers, which the Government has approved, lays down that before assuming office as Minister, a person should disclose details of his assets and liabilities and his business interests as well as those of members of his family.

The details to be disclosed include particulars about immovable property, shares, debentures, cash holdings and jewellery.

This code, which is over and above the relevant provisions of the Constitution, the Representation of the People Act and other laws, will be enforced by the Prime Minister in the case of Central Ministers. The Prime Minister or the Home Minister will receive declarations in the case of State Chief Ministers and the Home Minister or the Chief Minister concerned in the case of State Ministers.

In the code, which embodies some recommendations in the Santhanam Committee's report on corruption (see page 5790) the family of a Minister has been defined as comprising his wife and any person related to him by blood or marriage or wholly dependent on him.

The Prime Minister, Home Minister or the Chief Ministers should adopt suitable procedures, according to the merits of each case, to deal with or determine any alleged or suspected breach of this code.

A person will be required to sever connexions, "short of divesting himself of the ownership", with the conduct and management of business, and give up all interests in concerns which supply goods and services to the Government or its undertakings of which he is in charge as Minister, or whose business depends primarily on licences, permits, quotas or leases received from the Government.

During his tenure of office, he will have to submit returns of his assets and liabilities every year, refrain from entering into any transaction with the Government in respect of immovable property and from joining or starting any business. He should report to the Prime Minister or the Chief Minister if any member of his family sets up or shares the conduct and management of a business.

No Minister, the code lays down, should accept himself, or through a member of his family, contributions for any purpose —political, charitable or otherwise. He should not associate himself with fund-raising drives except for a registered society or a political party.

He should not accept valuable gifts from any one other than close relatives, nor should any member of his family accept gifts from a person with whom he may have official dealings. The Minister's family members should not be allowed to contract debts which might embarrass or influence him in the discharge of his official duty.

While on tour, a Minister should, as far as practicable, utilize official accommodation or stay in his own house or recognized hotels and discourage lavishness or ostentation in parties given to him.

(*The Statesman*, New Delhi)

[Prev. ref. 6077:INI:D]

K. Mr. H. C. Dasappa Passes Away: The Central Minister for Industry and Supply, Mr. H. C. Dasappa, died in New Delhi early on October 29 after a heart attack. He was 69.

He had returned only a few days earlier from a visit to Zambia where he led an official delegation for the Independence Day celebrations in that country.

He had also visited Kenya and Uganda where he met the national leaders and discussed with them matters relating to industrial collaboration.

Temporary Appointments:

Pending the appointment of a successor to Mr. H. C. Dasappa, the President on October 31 placed the two Ministers of State in the Ministry of Industry and Supply to be temporarily in charge of the different departments.

Accordingly, Mr. T. N. Singh, Minister for Heavy Engineering, was put in charge of the Department of Industry also in the Ministry.

Mr. K. Raghuramaiah, Minister for Supply, is temporarily in charge of the Department of Supply and Technical Development.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

While Mr. T. N. Singh was already in full charge of the Department of Heavy Engineering and had now been asked to take additional charge of the Department of Industry, Mr. Raghuramaiah was placed in full charge of a department that had been in his charge subject to the overall control of the Cabinet Minister.

[Prev. ref. 5559:INI:D]

L. **NCAER On Fourth Plan Strategy:** In a report on the strategy for the Fourth Five-Year Plan, released in New Delhi on October 24, the National Council of Applied Economic Research (NCAER) suggested rationing in urban areas to ensure a more equitable distribution of scarce consumer goods, particularly foodgrains.

Simultaneously, it also called for a programme of public works in rural areas.

It said that rationing was inevitable in a developing economy in which foodgrains and other essential goods were bound to be in short supply.

According to the report, the Government should undertake the responsibility for providing a minimum consumption of foodgrains to all within the Fourth Plan itself.

The Council believed that despite a five per cent growth rate in agriculture and a 6.5 per cent growth rate in the national income as postulated in the Fourth Plan draft, this objective could be achieved by the present distribution system.

Rationing should be viewed not as a temporary measure for the year during which stress is felt but as a "permanent mechanism" in a developing economy.

The report called for shifts in policies and formulation of specific programmes to give content to the Prime Minister, Mr. Lal Bahadur Shastri's pledge to provide essential goods to the masses at reasonable price. The establishment of a rationing system on a more firm basis would in time make it more efficient and hence less costly.

According to the Council, in a rural area, a different approach would need to be adopted since there was a large surplus of poor and ill-fed man-power. This man-power was a potential capital asset and could be utilized for increasing capital formation in the rural areas.

The Council stressed that utilization of this surplus man-power in the rural areas was not only a very urgent task, but also rewarding. If organized properly, it could, within a span of five years, provide the workers sufficient income to enable them to have a minimum level of food consumption.

The surplus man-power in the rural areas, the Council said, should be utilized through a nation-wide rural public works programme. It recommended that the workers should be paid in foodgrains (about 75 per cent) as well as in cash.

It emphasized that the current thinking in the Government had been mainly in terms of reducing inequalities between the rich and the moderately rich. This had missed the real issue, which was that millions in the country lack income even for a minimum level of food consumption. According to the Council, this was the real cause of poverty and also of disparity.

An advantage of the rural public works, which would be organized in close co-ordination with other agricultural and related programmes, would be that through adding to the pace of capital formation, it would further increase both agricultural and industrial output. While the rural works would be conducted essentially at the village and district levels, the programme itself should be conceived as a national programme and the organization to handle it must be built on national lines.

The Planning Commission, the report maintained, had been unable to get over the traditional thinking in regard to unemployment. The concept of the backlog of unemployment in the rural sector was of doubtful value. The so-called unemployment in rural areas was really serious under-employment.

To cull out a category of backlog out of this, the report said, had no statistical basis and it only took the attention away from the basic nature of the problem as it was found in rural areas. The approach to this problem should be in terms of providing employment opportunities to all those who seek employment from the rural areas at least to the extent that would ensure them a minimum consumption of foodgrains.

The Council also suggested that the Plan itself should contain a method by which, if there was a shortfall in the growth rate of the agricultural sector, proper co-ordination measures could be taken to ensure that the injury to the rest of the economy was minimized.

The Council pleaded for "definite measures" to be taken to ensure a five per cent growth rate in agriculture over the Plan period, "making full allowance for the weather factor."

It recommended that there should be no attempt to slow down the pace of expansion in mass education.

It pointed out that the Fourth Plan export target of Rs. 5,100 crores falling short of the requirements of Rs. 5,500 crores of maintenance imports had suggested that the Industrial Policy Resolution should be amended with a view to giving due importance to industries with export potential.

The Council's suggestion in regard to the investment and outlay targets were more or less in line with the Planning Commission's current thinking. The Council postulated a rate of growth of 6.3 per cent per annum for the Fourth Plan and put the level of investment required for the achievement of this rate of growth at Rs. 18,520 crores and the level of total outlay at Rs. 20,765 crores at 1960-61 prices.

With a view to ensuring that prices do not get out of hand, the Council said that anticipatory action would be required in fiscal, monetary and other areas. It was not merely increases in investment that brought about an inflationary situation, but increases in expenditures, whether on investment account or otherwise, that brought about inflation.

(*The Hindustan Times*, New Delhi)

[Prev. ref. 5860:INI:K]

M. **Goa To Remain Union Territory For 10 Years:** The Prime Minister, Mr. Lal Bahadur Shastri said at a news conference in Bombay on November 2 that Goa would remain a Union Territory for 10 years.

A decision to this effect, he said, was taken by the Congress Parliamentary Board two months before the first General Election in December, 1963 in the former Portuguese Colony.

He said the meeting had also been attended by the late Mr. Nehru. The Board was of the unanimous opinion that this period was necessary for the economic development of Goa.

[The subject had assumed importance following a re-iteration of this decision by the Central Minister for Railways, Mr. S. K. Patil, in Panjim two days earlier. Strong protests had been made not only by the SSP and the spokesman of the Maharashtrawadi Gomantak, the ruling party in Goa, but also by the Chief Minister, Mr. D. Bandodkar, who had said that a resolution recommending Goa's immediate merger with Maharashtra would be moved in the next Assembly session to be followed by an agitation if the resolution was not implemented. Mr. Bandodkar had had talks with Mr. Shastri on the subject and Mr. Shastri said that he had advised Mr. Bandodkar "to go slow in the matter."]

Mr. Shastri said that the Central Government was fully aware of the views and feelings of both Hindus and Christians in Goa and there appeared to be "an acute difference of opinion". It would be neither correct nor fair to take an immediate decision as the gulf would widen. He said it would be advisable to let Goa grow and develop, and he hoped wiser counsels would prevail so as to "carry all people of Goa to a common objective."

Asked if it was not better to make policy announcements—apparently a reference to Mr. Shastri's declarations at the recent meeting of Chief Ministers and the National Development Council—only before Parliament, he said decisions on vital issues could hardly be delayed. However, Parliament's approval would naturally be obtained. "Otherwise the Government goes."

On November 6, the Congress General Secretary, Mr. G. Rajagopalan, released to the Press the Congress Parliamentary Board's resolution on Goa.

Mr Rajagopalan's statement came in the wake of the controversy which flared up following Mr. S. K. Patil's recent statement in Panjim. The Defence Minister, Mr. Y. B. Chavan, had publicly demanded an expeditious decision on Goa's future.

The resolution dated April 7, 1964 said: "The Board considered the future of Goa and decided that it should be made clear that for the coming 10 years Goa will continue as Union Territory. There should be no change in the present status. After that, the views of the people of Goa will be ascertained in regard to the question of merger and the final decision will be taken in accordance with their wishes."

Mr. Patil's proposal for a plebiscite after the 10-year period was evidently based on the reference in the resolution to the ascertainment of the views of the people. He subsequently explained that the plebiscite proposal was his own, and the Parliamentary Board could consider other alternatives and accept the most practicable one.

Mr. Rajagopalan stated that Mr. Chavan was not present at the meeting at which the Board passed the resolution. Mr. Nehru, Mr. Lal Bahadur Shastri, Mrs. Indira Gandhi, Mr. Morarji Desai, Mr. Jagjivan Ram and Mr. Patil were present at the meeting. Mr. Kamaraj presided.

However, following the usual procedure, the resolution was circulated to members for confirmation at the next meeting. Mr. Chavan was present at that meeting.

Mr. Rajagopalan declined to say whether Mr. Chavan had objected to the resolution or whether the confirmation was unanimous.

The Board had decided not to release the resolution to the Press immediately to avoid wrong interpretation and the possibility of delegations being led for or against the stand taken by it.

It was thought better to let a member of the Board announce the decision when he went to Goa. That was how Mr. Patil made the announcement in Panjim. Mr. Patil had consulted the Congress President and the Prime Minister before leaving for Goa.

[Prev. ref. 5028:INI:E]

N. **Additions To Jammu And Kashmir Cabinet:** Three more Cabinet-rank Ministers—Mr. G. L. Dogra, Mr. Mohammed Ayub Khan and Pir Giasuddin—and two Ministers of State—Major Piara Singh

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and Mr. A. M. Tariq—were added on October 22 to the Jammu and Kashmir Council of Ministers headed by Mr. G. M. Sadiq.

This raised the strength of the Council of Ministers to 10—five of Cabinet rank, including the Premier, and five Ministers of State. Mr. Mohammed Ayub Khan was already a Minister of State.

The new Ministers were sworn-in by the Sadr-i-Riyasat, Mr. Karan Singh, at the palace on October 22.

Major Piara Singh was a Deputy Minister in the Bakshi Cabinet. Since he and Mr. Tariq, MP, are not members of the State Legislature, they have to seek election to it in due course.

An eleventh-hour development the previous night partly changed the pattern of the Cabinet as now expanded. It was learnt that the former Premier, Mr. Shamsuddin, who was offered a Cabinet Minister's post, wanted the Deputy Premiership, but since there is no provision in the State Constitution for a Deputy Premier, Mr. Sadiq was unable to agree to it.

Another reason which had weighed with Mr. Sadiq against acceding to Mr. Shamsuddin's demand was the seniority of Mr. G. L. Dogra. While Mr. Shamsuddin first became a Cabinet Minister in 1957, Mr. Dogra had been a Cabinet Minister much earlier. Mr. Dogra was not only a Cabinet Minister in the first Bakshi Cabinet, but was also a Minister holding the portfolio of Finance in the first popular Ministry formed in the State in 1948.

Mr. Dogra will be in charge of Finance, Law, Industries and Commerce. Mr. Ayub Khan will be Revenue Minister with Transport as one of the departments under his charge.

There was practically no change in the portfolios of Mr. Sadiq and Mr. D. P. Dhar.

The three Ministers of State, Kushak Bakula, Mr. Harbans Singh Azad and Mr. Tariq, who was attached to the Premier, would hold the Departments of Ladakh Affairs, Food and Agriculture, and Information and Tourism, respectively. Major Piara Singh, who was attached to the Finance Minister, would be Minister of State for Industries and Commerce. Mr. Ghulam Rasool Kar, Minister of State for Works and Power, was attached to the Home Minister.

(*The Statesman*, New Delhi)

[Prev. ref. 5716:INI:L]

O. Plant Source For Manufacture Of Hormones Discovered: The base material for the manufacture of hormones has been found in the country by the Botanical Survey of India.

The Indian plant is likely to be the biggest and easily available source of an alkaloid used in the manufacture of hormones. This discovery will enable the country to turn out hormone preparations which will be within the reach of the poorest.

The source was traced to the fruit of solanum khasianum var. Chatterjeeanum, a plant popularly known as 'junglee bin' in Kalimpong, 'karchindra kara' in lower Bhutan and 'mul thumbai' in Tamil.

The solasodine content of the fruit of the plant is more than five per cent. The richest source of the alkaloid known so far are leaves of solanum aviculare, a plant found in Soviet Russia. This plant grows in abundance in Khasia and Jaintia Hills, Lohit, Subansiri and Kameng Frontier, Divisions, 24 Parganas, Darjeeling, Mayurbhanj and the Nilgiris. It looks like a brinjal plant and grows about one metre high. It has thorny stems. It fruits profusely throughout the year. Its fruit is yellow in colour.

(*The Hindustan Times*, New Delhi)

P. Damage By Floods: According to official reports, floods this year have affected 70,00,000 people, damaged crops and property worth nearly Rs. 80 crores, and taken a toll of more than 180 lives and 3,000 cattle.

About 70,00,000 acres were under water at one time or the other in the past few months. Fifty per cent of the flooded areas was under standing crops.

The worst affected States were Bihar, Assam, Uttar Pradesh, Andhra Pradesh, the Punjab, Rajasthan and Delhi.

In Andhra Pradesh the damage was estimated at Rs. 30 crores. The severest floods occurred in the last week of September when heavy rains inundated large areas in Krishna and Godavari districts, breaching irrigation tanks and causing havoc in and around Macherla town. Nearly 3,00,000 acres of land under paddy was inundated.

Damage was widespread in Bihar where nearly 40,00,000 people were affected. The rivers in spate were Bagmati, Kamla and Gandak which flooded about 30,00,000 acres, nearly half of which was under wheat and paddy crops. The Kosi river did not do much damage.

A notable feature this year was the flooding of small rivers such as the Ghaggar and the Sahibi Nadi in the plains by an unprecedented rainfall. These rivers, flowing through the Punjab, Delhi and Rajasthan, caused much suffering throughout the Monsoon months.

The districts worst hit in the Punjab were Rohtak, Karnal, Patiala and Sangrur. The swollen Sahibi Nadi and the Ghaggar caused havoc in the Hanumangarh, Suratgarh and Anupgarh regions of Rajasthan.

The Centre has appointed a high-power technical committee to suggest flood protection measures in Punjab, Delhi and Rajasthan. Flood warning systems are being strengthened.

(*The Times of India*, New Delhi)

[Prev. ref. 6141:INI:G]

Q. Supreme Court Upholds Validity Of 17th Amendment To Constitution: The Supreme Court held on October 30 that the Constitution (17th Amendment) Act was valid and dismissed six writ petitions filed by Mr. Sajjan Singh and others against the State of Rajasthan, the Punjab and the Union of India.

The Chief Justice, Mr. P. B. Gajendragadkar, delivered the main judgment of the Court.

The Court also held that since the impugned Act was valid, the 44 land reform Acts passed by various States and added to the Schedule Nine of the Act should be treated as valid.

The six petitioners along with others who intervened at the stage of the hearing had been affected by one or the other of the Acts added to the Ninth Schedule of the Constitution.

The Constitution (17h Amendment) Act made amendments to Article 31A of the Constitution. Article 31A and 31B were added to the Constitution of India with retrospective effect by the Constitution (First Amendment) Act 1951, because the legislative measures adopted by certain States for giving effect to the policy of agrarian reform which was accepted by the party in power had to face a serious challenge in the courts of law on the grounds that they contravened the fundamental rights guaranteed to the citizens by the Constitution. These Articles were introduced in the Constitution by Parliament while appeals by those who had been affected by the State legislation and by certain other zamindars were pending in the Supreme Court.

In 1955 Article 31A was amended by Parliament by the Constitution (Fourth Amendment) Act 1955 with the object of widening the scope of agrarian reform and conferring on the legislative measure immunity from a possible attack that they contravened the fundamental rights of the citizens. This amendment protected the legislative measure in respect of certain other items of agrarian reform and social welfare legislation which affected the proprietory rights of certain citizens. "Article 31B expressly provided that none of the Acts and regulations specified in the Ninth Schedule nor any of the provisions shall be deemed to be void or even to have become void on the ground that they were inconsistent with or took away or abridged any of the fundamental rights."

Notwithstanding these amendments, certain other legislative measures adopted by different States giving effect to the agrarian policy of the party in power had effectively been challenged. The Madras Land Reforms (fixation of ceilings on land) Act 1961, Kerala Agrarian Relations Act 1961, Rajasthan Tenancy Act 1955, Maharashtrian Agricultural Land (ceiling and holding) Act 1961 were struck down.

Parliament therefore enacted Section 3 of the impugned Act by which 44 Acts have been added to Schedule 9. Parliament desired that agrarian reform in a broad and comprehensive sense must be introduced in the interests of a very large section of Indian citizens who lived in villages and whose financial prospects were integrally connected with the pursuit of progressive agrarian policy.

The Chief Justice, Mr. Gajendragadkar, said: "If the effect of the amendment made in the fundamental rights on the powers of the High Courts described by Article 226 was indirect, incidental or otherwise of insignificant order it may be that the proviso will not apply, and in dealing with the constitutional question of this character the courts generally adopt a test which is described as pith and substance test and if this test is applied to the amendment made by the impugned Act it would be clear that Parliament was seeking to amend the fundamental rights solely with the object of removing any possible obstacle in the fulfilment of social economic policy in which the party in power believes."

As the effect of the amendment on the area covered by the powers of the High Court under Article 226 was incidental and of insignificant order, the impugned Act did not purport to change the provisions of Article 226, and therefore it fell under the substantive part of Article 368 and did not attract clause (B) of the proviso.

Further, Article 368 conferred on Parliament the right to amend all the provisions of the Constitution including the provisions relating to fundamental rights.

R. "Mt Rathong" Climbed: Capt. Ahluwalia and three others climbed *Mt Rathong* (21,911 feet), a virgin peak in the Sikkim Himalayas, on October 29.

The news was flashed to New Delhi by the leader of the 22-man expedition, Col. B. S. Jaswal, Principal of the Himalayan Mountaineering Institute.

Capt. Ahluwalia, Everest hero Nawang Gombu, Uahtoo Dorjee and another Sherpa, Angkami, stayed on the peak for 35 minutes and hoisted the flags of the Indian Union, Nepal, Sikkim and the Himalayan Mountaineering Institute.

A second summit party of seven under Sonam Gyatso left for Rathong on October 30.

The object of the expedition was to select the final team for the Indian Everest

Digitized by Arya Samaj Foundation Chennai and eGangotri

expedition in 1965. This was the first time that an expedition had tried to climb Rathong from the Nepal side and succeeded.

(*The Statesman*, Calcutta)

JAPAN

A. Mr. H. Ikeda Resigns From Premiership: The Prime Minister, Mr. Hayato Ikeda, announced on October 25 his decision to resign.

Radio Japan, reporting this, said the Premier, now undergoing treatment for precarious malignant infection of the throat, had announced his decision from his hospital room within minutes of his doctor's statement that Mr. Ikeda needed protracted treatment.

Part of his statement read: "Aware of the responsibilities as Prime Minister, I have decided to resign both as the President of the Liberal Democratic Party and Prime Minister. I have just asked party leaders to choose a successor to myself promptly and in an amiable manner. Recent developments, both here and abroad, have prompted me to make this decision and avoid causing the slightest sense of insecurity among the nation."

In one of the bitterest contests of his long political career, Mr. Ikeda was recently (see page 5981) elected President of the ruling Liberal Democratic Party for a third two-year term.

The 66-year-old statesman, who became Prime Minister in July, 1960, had been instrumental in achieving Japan's unprecedented economic growth. Known to be pro-West, Mr. Ikeda's policy towards China had been one of trading with that country but no recognition.

His replacement, according to the Japanese Press and politicians, was not going to be an easy task. The international situation directly affecting Japan had changed greatly since Mr. Ikeda's re-election. Besides, his successor must be able to deal with the emergence of China as a nuclear menace.

Mr. Ikeda's two rival contenders in his party, Mr. Eisako Sato and Mr. Aiichiro Fujiyama, were reported to be willing to reconsider the China policy. Both of them are, like Mr. Ikeda, strongly pro-Western Japanese statesmen.

Mr. Fujiyama, who was on a round-the-world tour after meeting Mr. N. Khrushchev in Moscow only a few days before the latter's resignation, cut short his trip and was back in Tokyo soon after Mr. Ikeda made known his decision to leave office.

Mr. Ikeda's announcement touched off a fierce struggle for power among Mr. Ichiro Kono, Mr. Sato and Mr. Fujiyama.

Mr. Kono, an aggressive, political handyman, helped get Mr. Ikeda re-elected and the retiring Prime Minister was said to want him to take over. However, he may lose in a straight party fight.

B. Re-emergence Of Industrial Combines: Japan's giant industrial empires, which the US occupation forces had disbanded as undemocratic after World War II, are staging a vigorous comeback.

The shadows they cast on industry are almost as huge as they themselves were two decades ago.

The two decades, however, have brought about some changes. Especially the managing systems at the top have undergone drastic changes —from "family dictatorship" to "consultations" among the executives.

Outstanding among them were Iwasaki, Mitsui and Sumitomo. The Iwasaki were better known as "Mitsubishi" (three diamonds)—the brand carried by scores of corporations directed by the family.

Things got started in the latter part of the 19th century. Each of the three families began to build up a cluster of corporations. Each covered almost every branch of business—banking, insurance, chemical, textile, electric, machinery, ship-building and shipping.

The Government built factories copying those in Western nations and gave them to be known as "Zaibatsu families" installed their members as the highest executives of other firms they controlled.

After the War the occupation forces purged the Zaibatsu families from the Japanese industrial picture and confiscated the shares they held to control corporations.

As the nation began rebuilding its economy from the post-War shambles, the former Zaibatsu corporations embarked on a search for unity. The managers got together for regular consultations on various levels—beginning with the chairman and president level.

The most conspicuous was the rebirth of Mitsubishi Heavy Industries on June 1. With the nation's biggest work force of 79,000, it is expected to hit a total sale of $1 billion this year.

The new firm controls 63 per cent of the market in paper-making machinery, 46 per cent in boilers for power plants, 40 per cent in boilers for factories and 28 per cent in shipbuilding.

(*The Times of India*, New Delhi)

C. Mr. H. Ikeda's Assailant Sentenced: A High Court in northern Japan confirmed on October 8 a lower court decision and sentenced a Japanese Rightist to five years' imprisonment for attempted murder of the Prime Minister, Mr. Hayato Ikeda in November, 1963.

Takao Ishimoto (25), President of the Japan Patriotic Youth's Association, was convicted of trying to attack Mr. Ikeda with a knife as he was about to leave the rostrum of a hall in Kohriyama city, northern Japan.

The incident followed an election campaign speech on November 5, 1963.

(*The Japan Times*, Tokyo)

[Prev. ref. 5564:JAP:A]

KOREA (South)

A. Moves For Re-unification Of Country: For the first time since the days of Dr. Syngman Rhee, moves for the unification of Korea have been openly and officially made in South Korea, following the return of South Korean athletes from the Tokyo Olympics which North Korea boycotted.

The Prime Minister, Mr. Chung Ilk Won told the National Assembly on October 26 that an organization to work for unification of the divided country would be established under the Government soon. Members of the ruling and Opposition Parties submitted a joint resolution to the National Assembly on October 27 calling for the establishment of a meeting place for families separated between North Korea and South Korea across the 38th Parallel.

The moves were touched off when the famous North Korean woman athlete, Sin Kim Dan, holder of the world record for the women's 400 metres sprint, was not given more than five minutes in Tokyo to see her father, who had come from South Korea. Miss Sin had to leave together with the North Korean Olympic delegation which had been refused participation in the Olympics because of its earlier participation in the GANEFO games.

The incident has given a 'human' touch to a basically political issue. A leading Seoul newspaper started serialised articles entitled 'Way for Unification.' Never before had the South Korean Press so openly and unequivocally advocated reunion of the two Koreas.

It is estimated that some three million of the 30 million population in South Korea have their families in North Korea.

(*The Times of India*, Bombay)

[Prev. ref. 5456:KRN:A]

MALAYSIA

A. Fresh Landings By Indonesians: Singapore reports said on October 29 that a group of Indonesians had landed that morning (October 29) by boat near the border of Malacca and Johore States in south-west Malaysia.

This was the fourth Indonesian landing in Malaysia. Sea landings were made near Pontian on August 17, paratroopers were dropped over Labia on September 2 and another landing was made on September 9.

The reports said Malaysian security forces, helped by British and Commonwealth units, had conducted the operations against the Indonesians.

In Canberra, the Australian Defence Minister, Mr. Shane Paltridge, announced that Australian troops were taking part in the action against the new landing by infiltrators.

A spokesman for the Department of External Affairs said Australia viewed the latest violation of Malaysian territory with concern.

New Zealand troops were also rushed to the area in case they were needed to help security forces.

The Deputy Malaysian Prime Minister, Tun Abdul Razak, said he would discuss defence aid for Malaysia during his forthcoming talks with the British Prime Minister, Mr. Harold Wilson.

In London the British Foreign Secretary, Mr. Gordon Walker said that the United States was behind Britain in defending Malaysia and that USA would give more aid to Malaysia for meeting the Indonesian threat. He said this on his return from a trip to USA.

A Malaysian Army spokesman said on October 31 that Indonesia had established a forward invasion base against Malaysia on Bengkalis, a swampy island off the east coast of Sumatra.

The spokesman told newsmen that the 52-man Indonesian force which had landed was destroyed in the Merlimau area of south-west Malaya. He said it came from the island, about 20 miles away across the Straits of Malacca.

Indonesian Stand:

Meanwhile, the Indonesian Acting President, Dr. R. Subandrio, said in Djakarta that Indonesia was still willing to conduct peace talks with Malaysia but without preconditions.

He asserted: "Up to this moment we do not know about the possibilities to have talks with Malaysia. If they (Malaysian leaders) want to talk, it's all right. We can talk. If they do not want to talk, it is all right with us too."

An Indonesian Foreign Office spokesman declared on November 2 that there had been no initiative on the part of the Indonesian Government to hold peace talks.

The spokesman stated that it was the Malaysian Premier, Tengku Abdul Rehman who had made persistent appeals for peace talks.

The spokesman also stressed that Indonesia was now in a "favourable position" in her "crush Malaysia" campaign and felt she would only prejudice her position by going to the conference table.

The spokesman was commenting on a statement by the Malaysian Deputy Premier, Tun Abdul Razak reportedly rejecting an Indonesian offer for peace talks "without prior conditions."

He said Indonesia was "very satisfied with the present turn of events and any attempt from whatever sources to bring about negotiations will be responded satisfactorily provided there are no preconditions."

According to a Reuter message from Kuala Lumpur, it was announced that British and Malaysian military aircraft had flown together on November 2 in a leaflet raid over Indonesia.

This was the first retaliatory action from Malaysia in the two-year unofficial war with Indonesia.

An official statement said aircraft had dropped "thousands" of leaflets warning Indonesians not to engage in any fresh raids against the Malayan peninsula.

In Singapore, a British military spokesman said some British aircraft and crew had taken part in the raid. He explained that the operation was "planned and conceived by the Malayans, but we provided them with some planes."

The leaflets dropped over Indonesia contained a message from a captured Indonesian Lieutenant.

Soviet Support To Indonesia:

The Soviet Government newspaper *Izvestia* on October 30 accused UK, USA, Australia and New Zealand of increasing tension in the Malaysia-Indonesia dispute.

News of contingents of British troops arriving in the area came in nearly every day. Australia and New Zealand had sent a "considerable quantity" of troops and warships to the troubled area.

It said: "The world public can see clearly who bears the responsibility for the tense situation in this region, fraught with a threat to peace and security to South-East Asia".

The *Izvestia* article, under the heading "Where Are The Blood-hound Rockets Aimed", charged that British bases in Malaysia had threatened Indonesia with nuclear weapons.

(*The Times*, London, *The Malayan Times*, Kuala Lumpur and *The Statesman*, New Delhi)

B. Pattern Of Indonesian Subversion—White Paper: A Government White Paper has detailed the pattern of alleged Indonesian subversion in Sabah and Sarawak before and after the formation of Malaysia in September, 1963.

The White Paper's main conclusion was that the Indonesians had failed in their objective of building up a local grass-root dissident movement in the two States. They were, therefore, shifting their objective to one of creating "alarm and despondency" in Eastern Malaysia to force political concessions from the Federation.

The official document relied heavily on the testimony of more than 60 Indonesian guerrillas captured in the two States. It was estimated that eight Indonesian infantry and marine commando battalions and 12 units of irregular forces were spread along the Malaysian Borneo borders. Units varied from 25 to 125 men.

A total of 214 incidents in the two Borneo States involving Indonesian terrorists were catalogued. The first incident occurred at Tebedu in Sarawak's First Division, on April 12, 1963 when a group estimated at 30 strong, led by an Indonesian Army officer, attacked a security post, killed a member of the Security Forces and captured weapons and ammunition.

Many of the "volunteers" sent out in the early phase of Indonesia's military confrontation were apparently pressed into joining the "volunteer units", casually trained in army camps in Indonesian Borneo and sent on their hazardous missions on the dictates of Djakarta's political requirements.

About 1,000 Chinese youths belonging to Sarawak's underground Communist Party (In official jargon, the Clandestine Communist Organization) were believed to have crossed into Indonesian Borneo for training in subversion. Those captured among this group, however, gave an impression of Indonesian equivocation in associating them with the volunteer groups sent into Malaysia. Some of them were given Iban names and no exclusively Chinese volunteer units were formed.

The White Paper speculated that the Indonesian authorities had probably felt that their help to Malaysian Chinese Communists would make their country unpopular with the majority of the Sarawak people. Also, in view of the Indonesian distrust of the Chinese, the authorities might not have wished to advertise their support for a Chinese movement.

In Sabah, the White Paper traced Indonesian subversion back to the setting up of an Indonesian consulate in Jesselton in January, 1962. The Consulate was alleged to have set out to assume control over nearly 20,000 Indonesian immigrant labourers on plantations and in timber camps. Several Indonesian-inspired local subversive organizations were formed, apparently without much success, and a system of secret travel passes arranged for Indonesian countries. One such pass was discovered last March inside a cake of soap aboard a barter trading vessel about to leave Tawau for Indonesia.

The White Paper linked the intrusion of particular Indonesian volunteer groups with Djakarta's objective of extracting political concessions from Malaysia at the conference table. At least two volunteer groups, it said, were despatched after President Sukarno had declared a "cease-fire" on January 23 this year. Two days after the Manila three-nation "summit" meeting, a force of 70 was contacted in Sarawak and four military formations invaded the State within two weeks of the publication of the UN report on the Borneo territories and Malaysia's formation. With the approach of the three-nation "summit" meeting in Tokyo last June, determined incursions were made into Sarawak.

SAUDI ARABIA

A. Nine Oil Wells Begin Production: The major part of Aramco's $11,500,000 development programme was completed on October 1 when nine wells in the South Ghawar area went into production.

The 66-mile pipeline connecting the wells was completed the previous month, leaving only two more wells to be drilled before the programme's scheduled deadline of Spring, 1965.

[Prev. ref. 5732:SUA:B]

SYRIA

A. General Petroleum Authority's Budget: The Budget of the Syrian General Petroleum Authority for 1964 was published in the official *Gazette* early in October, 1964.

Revenue was estimated at £S120,081,600 of which £S78,644,400 would come from sales of locally refined products; £S33,780,700 from sales of imported products; £S7,301,700 from export sales of products and £S335,000 from miscellaneous sources.

On the expenditure side, £S98,894,000 would be spent on the purchase of refined products; £S16,101,000 on the consolidated Budget; £S4,635,000 on general administration; and the surplus of £S451,800 was to be allocated to the development Budget. (£S11 = £).

ASIA OUTSIDE ASIA

A. Weather Satellite "Nimbus" Stops Working: It was reported on September 23 that the American weather satellite *Nimbus*, which was launched in August to take photographs of the Earth and cloud formations, had stopped working.

American scientists said this was due to the failure of its solar power system. In its brief life, Nimbus took more than 27,000 photographs, including evidence of volcanic activity in the Antarctic.

ASIAN RECORDER

December 2—8, 1964

Regd. No. D-727
Vol. X No. 49

AFGHANISTAN

A. **Budget Approved:** The National Assembly has approved the State Budget for the new financial year.

The country is facing a severe shortage of foreign exchange. The Budget is to be balanced by increasing revenues and reducing expenditure and loan payments and greater attention devoted to the production and marketing of agricultural and industrial produce.

A preliminary list of luxury items, the import of which is to be banned, has also been announced.

(*Middle East Economic Digest*)

[Prev. ref. 5447:AFG:C]

B. **New Transmitter:** Equipment for a 100-kw medium-wave transmitter in Kabul will be bought through credits provided by West Germany.

The new transmitter will strengthen Kabul Radio's coverage of the country and neighbouring areas and will cost about 18 million Afghanis (126 Afghanis= one pound sterling).

(*Middle East Economic Digest*)

[Prev. ref. 5976:AFG:A]

BURMA

A. **New Envoy To China:** Sama Duwa Nawng, the former Kachin State Minister, has been appointed Burmese Ambassador in Peking in place of U Maung Kyaw Win, who returned to Rangoon.

Samagyi, as he is affectionately known by his colleagues, was a loyal adherent of the Anti-Fascist People's Freedom League, which later split into two factions. He supported the Union Party faction led by U Nu, the former Prime Minister, under whose administration he became Burma's President-elect. But 10 days before his installation as President in 1962 the Army took over control.

Samagyi, now 50, was made chief of Sama Hills Tract by the British Government at the age of 15. In 1947 he co-operated with Bogyoke Aung San in bringing about unity of the frontier areas people with the Burmese, and later became deputy counsellor for frontier areas in Governor Sir Hubert Rance's Executive Council. After Independence he was appointed Kachin State Minister and Minister for National Solidarity.

(*The Statesman*, Calcutta)

CAMBODIA

A. **Soviet Arms Aid:** Russia has delivered a new shipment of fighter aircraft and arms to Cambodia.

Prince Norodom Sihanouk, the Chief of State, had asked for the Soviet arms, together with Chinese and French weapons, to replace the American equipment of his Army and Air Force.

Prince Norodom cancelled the United States military aid programme in November, 1963 and since then much of the American equipment had deteriorated because of lack of spare parts.

(*The Times*, London)

CHINA

A. **Renewed Call For World Conference On Disarmament:** While several world leaders voiced concern over the Chinese nuclear test explosion (see page 6148), the *People's Daily* of Peking re-iterated on October 22 China's call for a world conference to discuss the destruction of nuclear weapons, but declared that "China must have its own nuclear weapons as long as US imperialists have theirs."

Since the atomic test the Chinese Press had been dominated by messages of congratulation, mostly from abroad, but the leading article was the first important Chinese statement on its implications since the Government statement announcing the explosion.

Observers said the article echoed the sentiments of many of the congratulatory messages which saw the Chinese test as a blow against "the United States nuclear monopoly", or in some cases against "the monopoly of nuclear Powers."

The article, which was partly addressed to President Johnson, said: "Although possession of nuclear weapons does increase our defence capabilities, our sense of security at no time depends on nuclear weapons." The more thoroughly the US nuclear "monopoly" was broken "the greater will be the possibility of completely prohibiting and thoroughly destroying nuclear weapons".

"Having developed nuclear weapons, we shall pursue, as we did in the past, the foreign policy of peace. We shall not use these weapons to intimidate others and embark on any adventure."

On October 26, the Vice-Premier and Foreign Minister, Marshal Chen Yi, was quoted in an interview published in the Paris weekly, **L'Express** as saying that China wished to possess nuclear weapons "to break the nuclear monopoly so that these armaments may be destroyed.".

The interview quoted Marshal Chen Yi as saying: "We maintain and we will continue to maintain that the atomic bomb is without importance. China decides on her foreign policy according to the principles of aspiration toward peace and building of socialism for 700 million people and not whether or not to possess nuclear weapons. It is man who manufactures nuclear weapons, and not the contrary. Therefore it is man who will eliminate them since he will always occupy

Asked about a possible conflict with USA, he said: "We will never abandon our right to atomic weapons and we fear nothing. While opposing every unjust war and aspiring toward peace, we will never hesitate to participate in a just war, be it conventional or nuclear. We will not weaken. But think of how far we are from the latest nuclear techniques and think of the arms stockpiled elsewhere."

Commenting on Sino-American relations, he said: "USA wants to bury us. It occupies military bases all over the world. It admits to 400. In fact it has 4,000 or pretty nearly that. If USA withdraws from its bases, it would cause everywhere an immense relief, especially in South-East Asia, but USA will withdraw nothing."

Gen. de Gaulle's Support:

The French President, Gen. Charles de Gaulle, welcomed on October 30 the Chinese proposal for a world conference on nuclear disarmament.

In a message to Mr. Chou En-lai, he said France was ready "at any moment" to participate in any "serious negotiations" among the Powers concerned.

He noted France's past efforts to obtain an agreement on the elimination of the vehicles carrying nuclear weapons. France, however, had not participated in the talks in Geneva on nuclear disarmament.

His statement was in reply to a letter from Mr. Chou En-lai dated October 17 in which France was informed of China's first successful atomic test on October 16 and of the Chinese proposal for a nuclear disarmament conference.

The statement came at a time when French-Chinese relations had been stagnant. The French had got nowhere, they conceded, in their attempts to lead the Chinese Government into serious political talks on the situation in South-East Asia.

However, the French Government felt that China's explosion of an atomic bomb and its confidence that it would soon be able to produce nuclear weapons created a new situation in which the West, meaning France, should take the initiative.

General de Gaulle said his Government would "study with attention." Mr. Chou's "declaration expounding China's point of view on the problem of nuclear armament."

He added: "On her part, France has not ceased during all of the past years to pronounce herself in favour of veritable disarmament which naturally means that priority should be given to nuclear disarmament. On this subject whenever the occasion arose she has made detailed propositions concerning in the first place elimination of vehicles serving, or liable to serve, the transportation of nuclear arms."

"These propositions," he continued, "took into account the difficulty that is existing today in assessing stockpiles of such devices."

(*The Times*, London, *The Statesman*, Calcutta and *The New York Times*)

B. **Japan Socialist Delegation's Visit:** Fifteen members of the Japan Socialist Party, led by Mr. Tomomi Narita, the Party Secretary-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

General, visited Peking in the third week of October.

It was the largest mission the party had sent abroad. (The party had always stood for recognition of the Peking regime.)

The delegation had talks with Mr. Mao Tse-tung, the Prime Minister, Mr. Chou En-lai, and other leaders.

Japanese newspapers reported from Peking that there had been serious disagreement between the visiting group and the Chinese on "ideological questions." It was stated that the Japanese spokesmen were particularly critical of the explosion of an atomic device by China on October 16, the day the party arrived in Peking.

A Joint Statement issued in Peking on October 20 admitted that the two sides disagreed on nuclear policy. (Japanese opinion is overwhelmingly against nuclear testing.)

Japan and China are engaged in "independent struggles to safeguard the sovereignty of their countries and world peace," the Statement declared.

"These struggles are objectively also the common struggle against the United States imperialist policies. The famous statement of Inejiro Asanuma that United States imperialism is the common enemy of the Japanese and Chinese peoples correctly points out this fact. Therefore, both sides are resolved to continue their struggle to inherit and develop the Asanuma spirit." (See page 2629).

It added: "The forces of socialism, national independence, democracy and peace in the world have greatly surpassed those of imperialism headed by the United States."

It added that the Japanese people opposed American military bases in Japan and Okinawa, the "stationing" of United States nuclear submarines in Japan and the introduction of new fighter planes in Japan.

The chief signers of the Statement were Mr. Tomomi Narita, head of the delegation and secretary-general of the Japan Socialist Party, and Mr. Chang Hsi-jo, President of the Chinese People's Institute of Foreign Affairs.

Though Japanese Press representatives credited the visiting Socialist mission with holding heated arguments on nuclear testing with Chinese leaders, there was dismay in Tokyo that the Party, which opposed all tests, refrained in the Statement from affirming its opposition to the recent Chinese test, and went on to agree with Peking's proposal for a conference to ban all nuclear weapons.

Tokyo commentators felt that a new facet of independence was reflected in the Statement's admission that both sides differ in "the field of thought and in standpoints". However, differences would not interfere, they also agreed, with their mutual support and co-operation to develop the "Asanuma spirit" (on a 1959 visit to Peking the late Mr. Asanuma, the Secretary-General of the party, said that "the common enemy" of the Chinese and Japanese peoples was American imperialism).

The Japanese socialists also made a reaffirmation that the Formosa-Japan Peace Treaty should be abrogated, and that Formosa's emancipation was an internal affair of China. In return they gained Chinese acquiescence in the assertion that a Soviet-Japanese Peace Treaty would be conducive to peace in Asia.

(*The Japan Times*, Tokyo, *The Times*, London and *The New York Times*)

[Prev. ref. 2629:CHI:B]

C. Soviet Leaders' Message: The official *Hsinhua* news agency reported on November 2 that the new Soviet leaders had sent a message to the leaders of China expressing the hope for the consolidation of "the solidarity of the Soviet and Chinese Communists and the solidarity of the entire international Communist movement on the basis of Marxism-Leninism and proletarian internationalism."

The news agency quoted a letter, sent by the Soviet Premier, Mr. Alexei Kosygin, the Soviet Communist Party First Secretary, Mr. Leonid Brezhnev, and the Soviet Head of State, Mr. Anastas Mikoyan.

The Soviet message was in reply to the Chinese leaders' congratulations to Mr. Kosygin and Mr. Brezhnev on their appointment as the Soviet Premier and First Secretary of the CPSU, and on the success of the **Voskhod** space flight.

(*The Hindu*, Madras)

D. British Industrial Exhibition: The President of the British Board of Trade, Mr. Douglas Jay, opened in Peking on November 2 the British Industrial Exhibition.

The Exhibition was the biggest ever held by a Western country in the Chinese People's Republic with 230 British firms displaying mainly capital goods, machinery, and scientific equipment for industry and agriculture.

The Exhibition occupied four large halls and the courtyard of the white colonnaded exhibition centre, topped by a slender spire built by the Soviet Union in 1954.

The opening ceremony was attended by Mr. Yeh Chi-chuang, the Chinese Minister of Foreign Trade, British businessmen, foreign diplomatists, and Chinese trade and commerce officials.

Speaking before cutting the red ribbon under a large Union Jack and the scarlet flag of China, Mr. Jay said: "It is an earnest of the supreme importance Her Majesty's Government attaches to a reinvigorated British export drive and not least to expansion of trade with China that one of the United Kingdom Prime Minister's first decisions was one that enables me to be here today."

The Exhibition was being mounted at a propitious time for the expansion of Sino-British trade. Britons had seen with admiration the talents, skills, and courage of the Chinese authorities and people in surviving the hard times resulting from the weather disasters of 1959 to 1961. "We have been very glad to note that now China has once again resumed purchasing machinery and capital equipment on a larger scale, she is looking to Britain as a possible supplier."

Calling for mutual benefit from a fruitful exchange of ideas at the British fair, he said: "The more we exchange both goods and ideas the better will be the hope of peaceful co-existence between our countries."

Mr. Nan Han-chen, President of the Council for the Promotion of International Trade, said in reply: "We are willing to work together with our British friends to liquidate all obstacles so as to expand Chinese-British trade." "United States imperialism is always creating artificial barriers in an attempt to hinder the development of trade between this country and your own".

Observers said these remarks indicated that China might offer to take big imports from Britain while seeking to persuade the United Kingdom to disregard NATO rules regarding the embargo on strategic goods and credits, and American regulations forbidding the export to China of goods with American-made components.

Unlike the recent French technical exhibition at the same centre, which displayed scientific instruments used in nuclear physics, the two-week British Exhibition had no nuclear equipment—either industrial or for research.

Vehicle exhibits included cranes, agricultural vehicles, and a large Leyland bus.

It had taken the sponsors, the Sino-British Trade Council, and the organizers, Industrial and Trade Fairs, 15 months of negotiations after the initial approval of the authorities in order to obtain the site and arrange the necessary labour and supplies. Above all great pains had been taken to ensure that the Chinese Government was fully satisfied with the range of equipment to be demonstrated. Consumer goods had been rigorously excluded and the list had been carefully checked to avoid mutual disappointments.

The organizers' target was an eight-fold increase in exports to $100 million a year, but everyone connected with the fair was anxious to stress that orders for capital goods came in only slowly and after prolonged periods of bargaining and negotiation on specifications.

During the visit to Peking, Mr. Jay had talks with the Prime Minister, Mr. Chou En-lai, and other Chinese leaders.

Later, Mr. Jay said his talks were friendly and encouraging. He and the exhibitors were pleased with the progress of the fair.

(*The Times*, London)

[Prev. ref. 5378:CHI:D]

INDIA

SUMMARY: A-ICC Resolutions; Mr. Lal Bahadur Shastri's Visit To UAR; CPI Conference; Demarcation Of Assam-East Pakistan Border; Rice Agreements.

A. A-ICC Resolution On International Affairs And Food: Formally opening the All-India Congress Committee (A-ICC) session in Guntur (Andhra Pradesh) on November 7 the Congress President, Mr. K. Kamaraj declared that the Central and State Governments were not interested in carrying on controversies about the manner in which the food situation was to be dealt with, but were anxious to fully co-operate with each other and tackle this problem.

He said the greatest challenge the nation was facing at present was the food shortage. Several decisions had already been taken by the Central and State Governments to meet the situation. Food from surplus States was being rushed to the deficit areas.

He called upon Congressmen to co-operate with the Government in meeting the food situation.

Resolution On International Affairs:

On November 8, the A-ICC unanimously adopted the official resolution on international affairs after all the amendments had been withdrawn.

The Prime Minister, Mr. Lal Bahadur Shastri, said during the debate on the subject that India would not enter into competition with other countries in making atomic bombs. It was a tremendous economic burden which India could not undertake consistent with her policy of building up the economic prosperity of her people.

He said he was making the statement after giving careful thought to the impli-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

cation of the Chinese nuclear explosion. "We have to be clear in regard to two matters: first, India will pursue her policy of non-alignment and, secondly, we will try to eliminate the threat and terror of nuclear weapons rather than enter into competition with other countries to make or produce atom bombs here."

He said that while considering these big issues the people should not get nervous as thereby the country would lose on every front. It was most important that every paise was spent on economic development and strenuous efforts were made to build up democratic socialism in the country. For internal and international reasons I do not think India has any alternative but to pursue the policy of peace without any fear or terror from China or any other country which possessed nuclear weapons."

He said that India was wedded to the policy of non-alignment and peaceful co-existence and could not think of going under a nuclear umbrella. "We cannot become economic or political slaves of any country. We must preserve our independence at any cost."

"If any one thinks that by having one atom bomb we will be able to compete with great nuclear Powers then there is no one wiser than he."

Some members had also argued, he said, in favour of alignment with Power blocs. This was not an easy matter which could be decided upon lightly. "I am most afraid of any kind of alignment which might lead to infringement of our sovereignty."

Quoting eminent scientists, he said they were unanimously of the view that they should not have invented the atomic bomb and that the atomic energy should have been used only for peaceful purposes. They also did not know whether it would be possible for the developing countries to bear its cost. An atom bomb cost about Rs. 40 crores to Rs. 50 crores.

The resolution passed by the A-ICC deplored the recent nuclear explosion by China and said that it ran counter to the efforts by nations of the world towards non-proliferation of nuclear weapons and towards arms control and reduction.

It also re-iterated full support to the Government's foreign policy based on world peace and co-operation and its pursuit of peaceful co-existence, non-alignment, opposition to colonialism and racialism and rapid progress towards general and complete disarmament.

At the same time, it said it was the nation's duty while continuing to adhere to the policy of peaceful negotiation "to be prepared to prevent and foil aggressive attempts wherever they come from."

The following is the text of the resolution:

"The A-ICC re-affirms its determination to pursue, in every possible manner, the objectives of general and complete disarmament including prohibition of use of nuclear power for non-peaceful purposes. The vast advances in science which can do so much for the prosperity and well-being of humanity should be exploited only for the purpose of peaceful development and progress of mankind. The A-ICC declares that efforts be redoubled for the development of the peaceful uses of atomic energy for the prosperity and well-being of the Indian people.

"The A-ICC deplores the recent nuclear explosion conducted by the People's Republic of China. This runs counter to the patient efforts being made by the nations of the world to reach agreement towards non-proliferation of nuclear weapons and other measures of arms control and reduction.

"The A-ICC welcomes the declaration of the non-aligned nations at the Cairo Conference and its call for the elimination of colonialism and racialism, its full support to the United Nations, achievement of general and complete disarmament. It also welcomes the declaration that all States should honour the sovereignty and territorial integrity of all countries, great and small, and respect frontiers as they existed when the States gained independence.

"The A-ICC welcomes the emergence to independence of the new States of Malawi, Malta, Zambia and supports the nationalist movements in Angola, Mozambique and Southern Rhodesia. The A-ICC condemns the policy of racialism pursued by South Africa and strongly deplores death sentences passed on the nationalist leaders in South Africa."

On Food Policy:

On November 8, the A-ICC endorsed the Government's food policy on an official resolution which, however, left the issue of rationing still open for discussion by the State Chief Ministers in New Delhi on November 17 and 18.

The Central Food and Agriculture Minister, Mr. C. Subramaniam, told the Committee that the Chief Ministers were expected to take "firm decisions" on the mechanism of building up sizable buffer stocks out of surpluses from the coming harvest and on controlled distribution.

He said that the building up of buffer stocks and regulation of distribution and consumption had become essential if the country had to be spared a "catastrophe" on the food front.

He referred to the question of introducing "controlled distribution" in major cities and industrialized urban areas and said that this could not be put off because of the expected bumper harvest. If a complacent view was taken now and regulatory measures were not adopted "we will have to face greater difficulties next year."

On the question of zones, he indicated that the question for decision before the Chief Ministers would be whether the entire country should be treated as one zone or each State as a zone to facilitate the acquiring of surplus from each State for the purpose of building up stocks.

He warned that despite the expected bumper harvest, the country would be deficit in food during the next four or five years. Therefore, a long-term food policy covering purchase, movement and distribution should be formulated. "Such a policy should give us strength and strategy to pull through the period of deficit." While imports would continue, the scarce foreign exchange position with regard to rice imports had also to be kept in view. An import programme for fertilizers was also necessary as at present only 50 per cent of the requirements of fertilizers were met.

The following is the text of the resolution:

"The All-India Congress Committee at its last meeting held in New Delhi in August, 1964 had given considerable thought to the food situation then existing and had taken certain decisions. The Committee notes with satisfaction that since then the Government of India, in consultation with the State Governments, has taken various steps in pursuance of these decisions. For instance, the producer's prices have already been fixed for rice, wheat, jowar, bajra, maize and gram. In respect of rice, maximum wholesale and retail prices have also been fixed.

"The Committee notes that while these prices have been fixed at present on an ad hoc basis, the Government of India proposes to set up shortly a permanent commission for the purpose of determining prices of cereals, after a due consideration of the various factors involved. The Committee also notes with satisfaction that with a view to ensuring the supply of foodgrains to the people the Government of India has decided to set up a Foodgrains Corporation and that a Bill for the establishment of this Corporation is to be put through during the coming session of Parliament.

"With the arrival of the new crop in the market, ordinarily better supplies should soo be available to the people, but the situation will still have to be watched continuously and with great care. The Committee notes that in order to augment supplies, the Government proposes to continue the import of wheat as well as of rice to the maximum extent possible. The Committee further notes that the import of rice especially involves certain difficulties such as immediate payment in foreign exchange. Moreover, the availability of rice in other countries for purchase by India is also limited.

"The Committee is of the view that a reserve of foodgrains should be built up by the Government to feed the fair price shops and to ensure that there is a steady and well-regulated supply of foodgrains to the consumers. It is, therefore, important that the Government should also make direct purchases from the cultivators at the prices duly fixed and announced.

"The Committee considers it essential that the policy decisions taken by the Government of India should be properly and effectively implemented by the administration. It is necessary that the purchase of foodgrains from the farmers on the one hand and the eventual sale to the people on the other should be effected at the prices fixed by the Government.

"The Committee is glad to note that the Government of India has issued an Ordinance to make sure that there is effective implementation of their price policy by dealing with the offenders firmly and quickly. The Committee would like to emphasize that there is no cause for any scare or undue anxiety. The recent crops are good and the coming months can be faced with confidence.

"The Committee recognizes that while the aforesaid decisions of the Government of India will enable them to deal with the immediate problems pertaining to the food situation, the only long-term solution of this problem is increased agricultural production. The Committee, therefore, notes with satisfaction that the Government has laid great stress on high priority being given to agricultural production during the balance of the Third Plan period and also during the Fourth Plan.

"Planning in regard to agricultural production is, however, only the first step. The real task will have to be performed in the fields and farms. The timely supply of the various inputs in the form of seeds, fertilizers, pesticide, cement, steel, etc., shoud be assured to the farmer. A campaign for increased food production has to be organized and in this the role of the Congress committees and indeed of every Congressman is very important.

"The A-ICC suggests that in each Pradesh a food committee should be set up which should draw up a regular programme of action. The workers should be requested to help in the purchase of foodgrains from the cultivators. Every care should, however, be taken to ensure that it does not involve any kind of coercion. This casts a heavy responsibility on Congressmen and the A-ICC expects that they will take up this task in right earnest in a spirit of service to the people.

"There has to be a concerted drive in the coming years to deal with the problem of food and to ensure adequate production within the country. This requires the framing of a well co-ordinated and comprehensive programme of action and ceaseless efforts to implement the same. It is the bounden duty of the Government to so direct their economic and administrative policies as to ensure that the basic needs of the people are met and that they are able to secure their essential requirements at reasonable prices.

"The Committee wholeheartedly endorses the principles and policies on the basis of which the Government has decided to tackle the various facets of the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

food problem. However, a complacent view must not be taken and determined efforts must continue to be made towards both increased agricultural production as well as equitable distribution of the available food supplies to the people.

"The Committee also wishes to express its feelings of gratitude to the people all over the country who have shown remarkable understanding and forbearance in a difficult situation. Their co-operation will greatly strengthen the efforts of the Government and will enable them ultimately to stabilize the economy of our country and give real relief to the people."

Organizational Amendments Adopted:

The A-ICC concluded its session on November 9 after adopting organizational amendments and discussing some non-official resolutions relating to ceiling of urban property, the stay of Ministers on tour in circuit houses or dak bungalows and the problem of refugees.

The Committee adopted the first resolution with an amendment by a Congress Working Committee member, Dr. Ram Subhag Singh, while two others were not pressed by movers after it was stated by Dr. Singh that the resolution of Mr. Bibhuti Misra on the question of Ministers' stay was not practicable for implementation and by the Central Steel Minister, Mr. Sanjiva Reddi that in view of the impending Home Ministers' Conference where the problem of refugees would be reviewed it would not be opportune to adopt the resolution.

The resolution on refugees which was moved by Mr. P. R. Chakravarti, a delegate from Bihar, demanded appointment of a committee to study the various problems of rehabilitation of refugees and Government assessment of property left behind by refugees in East Pakistan and payment of compensation to them. It was surprising that none of the delegates from West Bengal which was most affected by the problem took part in the discussion of the issue.

In the discussion on the resolution on ceiling of urban property moved by Mr. Chakravarti, oblique references were made to socialism. A delegate from Andhra, Mr. V. Reddy, said no definite steps towards socialism had been taken during the last 17 years. Like Mr. Chakravarti who spoke passionately for a ceiling on urban property in view of abysmal poverty in the country, Mr. Reddy said such a ceiling was indispensable commensurate with the ceiling imposed on agricultural land.

Mr. Misra supported forcefully the cause propounded by the previous two speakers. Mr. K. K. Shah, former General Secretary, said a ceiling on urban property would mean nationalization of the entire private sector. His point was that it would not be possible to get as much income under the proposed measure as it was possible under the highest rates of taxation.

Some sort of compromise was struck on the issue at the instance of Dr. Ram Subhag Singh who referred to the election manifesto of 1962 and suggested an amendment. The amended resolution that was adopted was "suitable legislation be enacted to introduce a ceiling on urban property commensurate with the ceiling imposed on agricultural land in terms of the election manifesto of 1962."

During the discussion on organizational amendment of Article 1 and rules thereunder attempts were made by delegates to see that 20 or 30 members in a block were made eligible to elect a delegate against 50 proposed in the official amendment, that the election of one-third of Congress Working Committee members was made by proportionate representation through a single transferable vote and that the Central Election Committee be made permanent instead of its constitution before the General Election as at present. All their attempts failed following strong defence of the existing arrangements by Mr. S. K. Patil, who piloted the organizational amendment measures.

Following a closure motion, 59 other non-official resolutions fell through. Two were declared out of order in view of the adoption of the official resolution on food.

[Prev. ref. 6052:INI:A]

B. Mr. Lal Bahadur Shastri's Visit To UAR: The Prime Minister, Mr. Lal Bahadur Shastri, arrived in Cairo on October 2 to attend the second Conference of non-aligned nations, which opened on October 5.

President Nasser of the United Arab Republic was present at the airport to receive Mr. Shastri—an honour which had seldom been given to other Heads of Governments.

Twenty guns boomed in salute as the Air-India plane with Mr. Shastri and party touched down at Cairo's international airport.

In a statement at the airport, Mr. Shastri said that it would be his endeavour to pursue the policy of non-alignment and peaceful co-existence and in particular to maintain and develop further "close and friendly ties with this great country."

He was most happy to recall that the UAR under President Nasser and India under the leadership of Mr. Jawaharlal Nehru had moved on the same path in many important matters.

He extended to President Nasser and the people of UAR "the most cordial and affectionate greetings from the Government and the people of India."

He said he was happy that his first visit outside India should be to this ancient land—a land whose long history had contributed so much to enrich the culture and civilization of the world. The ties that bound India and UAR were old and strong and friendship between the two countries had continued since ages. "I am, therefore, grateful to President Nasser for his kind invitation to visit this great country."

After the airport ceremonies, Mr. Shastri, accompanied by President Nasser, drove in a motorcade along a six-mile route through the city to Tahira Palace. Large crowds cheered Mr. Shastri as his car drove slowly past. Mr. Shastri acknowledged the greetings with folded hands.

Reception By Indian Embassy:

President Nasser broke another tradition on October 3 when he visited the Indian Embassy to attend a reception in honour of Mr. Lal Bahadur Shastri. This was the first time that the UAR President had been to an Embassy reception in Cairo.

The reception, given by the Indian Ambassador in Cairo, Mr. S. N. Haksar and his wife, was a glittering affair. Indian sweets were made specially for the occasion and the band of the Dogra Regiment had come specially from Gaza to be in attendance. The top crust of UAR society was present. President Nasser had come with his wife.

This was the fourth time Mr. Lal Bahadur Shastri and President Nasser had met. Three of these meetings had been devoted to political talks.

The Joint Communique:

A joint *communique* was issued in Cairo on October 6 at the end of Mr. Lal Bahadur Shastri's visit.

In the **communique**, President Nasser expressed concern that it had not been possible for negotiations to take place on the Sino-Indian border conflict on the basis of the Colombo proposals and hoped further efforts would be made by friendly countries in the interests of a peaceful settlement of the dispute.

The **communique** said that both leaders had expressed their conviction that border disputes should, in all cases, be resolved by negotiations and not by resort to force of arms.

They expressed the hope that the differences between India and Pakistan would be resolved peacefully by direct negotiations between the two parties without any external interference.

The **communique** reviewed the talks between President Nasser and Mr. Shastri and said: "The President and the Prime Minister re-affirmed their faith in the policy of positive non-alignment and in principles of peaceful co-existence and reiterated their conviction that nations should respect each other's territorial integrity and sovereignty."

They "welcomed the convening of the Conference of non-aligned nations as a positive step towards further lessening world tensions and strengthening of forces of peace".

"Prime Minister Shastri welcomed the great advance made by Arab nations in all directions and especially towards the unity of Arab people, which is a positive step towards the strengthening of international peace and security.

"He agreed that the Palestine problem and Jordan waters issue constitute a source of tension and threat to peace in West Asia.

"In this context he re-iterated the support given by India to the just claims of Arab countries to the waters of river Jordan and to the rights of Palestine refugees."

Mr. Shastri welcomed the emergence of free States in Africa and the recent positive steps towards unity and collaboration in that continent.

The **communique** added: "The President and the Prime Minister re-affirmed their conviction that general and complete disarmament under effective international control was vitally important for the survival of humanity and peace and progress of mankind.

"The partial test ban Treaty which was signed by over 100 nations is a signal achievement. It is, however, a matter of regret that some Powers have not yet subscribed to it and the President and the Prime Minister expressed the hope that in the interest of lasting peace they would also do so immediately.

"The President and the Prime Minister considered it highly important that the partial test ban Treaty should be extended to underground tests as well.

"They noted with satisfaction the close co-operation between the delegates of the UAR and India in the efforts being made at the disarmament talks at Geneva to achieve progress towards a treaty on general and complete disarmament."

It added: "With the background of their own freedom struggles, the United Arab Republic and India are in full sympathy with the aspirations for independence of people whose territories are still under colonial rule.

"Both countries re-iterated their full support for forces of nationalism in Angola, Mozambique, South Africa, Southern Rhodesia, Aden, the Arab South and other countries still to attain their freedom.

"The President and the Prime Minister re-affirmed their firm resolve to continue and enlarge the existing close co-operation between the UAR and India in all fields of inter-State activity.

"They welcomed the steps recently taken to enlarge trade and economic re-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

lations, promote co-operation in cultural, scientific and technical and other fields.

"They expressed the hope that these growing exchanges and mutual co-operation and assistance will continue to guide the future relations of the two countries to their mutual benefit.

"President Nasser expressed admiration for the progress India had made over the decade of planned development."

(*The Egyptian Gazette*, Cairo)

[Prev. ref. 5245: INI: A]

C. **All-India CPI (Leftist) Conference:** The All-India Conference of the Leftist section of the Communist Party of India (CPI) began in Calcutta on October 31 in a tense atmosphere caused by the arrest of 25 delegates to the Conference, all from West Bengal, the previous day.

The organizers described the Conference as the CPI's Seventh Congress on their own assumption that they represented the party. They said that the Rightists, who are in the party's official positions, had forfeited the right to be called Communists.

More than 400 delegates and 100 observers from all over the country attended the Conference, which had a three-member presidium comprising Mr. Jyoti Basu, Mr. A. K. Gopalan and Mr. T. Nagi Reddy.

Mr. P. Sundarayya, who hoisted the red flag to mark the inauguration of the Conference, told the delegates that the arrests in West Bengal indicated what future awaited the Communists in India and the Communists should be prepared for new sacrifices. "Let the Government know that we are not cowed down by arrests and repression. We take up the challenge."

Mr. E. M. S. Namboodiripad moved a resolution criticizing the arrests and said that if by arresting a few West Bengal delegates the Government wanted to disorganize the Conference, it was under an illusion. There had been some speculation that he and Mr. Jyoti Basu had differences with many other delegates.

Mr. Ramamurthi, who supported the resolution, said that the arrests in West Bengal represented "the first salvo of the Government" attack on the Communists. The Government, he alleged, had grown panicky over "the growing influence" of the Communists, despite administrative repression and the slander campaign let loose by the Dange clique.

Adopted unanimously, the resolution on arrests said that "these arrests are intended to sabotage the work of the Congress."

As the Conference was in progress, some Communists took out a procession in protest against the arrests.

The Conference also adopted resolutions paying respect to martyrs who had laid down their lives "in the interests of the common people of India," and on the deaths of Mr. Nehru, Mr. Ajoy Ghosh and leaders of the international Communist movement.

In the absence of Mr. Promode Das Gupta, Secretary of the West Bengal unit of the party, who was among those arrested, Mr. Jyoti Basu read the address of welcome to the delegates. It said: "On the eve of fiercer class struggles the militant people of West Bengal and Calcutta feel assured to have you in their midst as fellow fighters and comrades in the same struggle."

Stand On Kerala Elections:

On November 1, the Conference adopted a resolution endorsing the line of action initiated by the party-men in Kerala for forming a united front of opposition parties to fight the election to the State Assembly scheduled to be held in March, 1965.

The resolution said that the rebel Congressmen in Kerala were trying to bring back the same old "discredited Congressmen's regime" in a new form after entering into an electoral alliance with the Muslim League and the SSP.

A Government formed by such an anti-Communist coalition, it said, would not solve the problems of Kerala as the rebel Congressmen had already made it clear that they had no difference with the Congressmen on any question of policy.

It expressed the hope that the efforts made by the left Communists to form a United Front would succeed and that the people of Kerala would vote that United Front to power and allow it to function for a full term of five years.

Resolution On Political Organization:

On November 6, the Conference released a political resolution which made an open admission of the failure of the Communist Party to mobilize public opinion in its agitation against the ruling party on the issues of food shortage and soaring prices.

This failure was attributed to the attempt of the Dange group to impose its "class collaborationist and revisionist policies."

The resolution declared that the Dange group was "increasingly getting exposed and isolated" and the Communist Party (the Leftists) had freed itself from its clutches.

Among the issues facing the people were listed soaring prices, taxation, dearness allowance, bonus, retrenchment, unemployment, eviction from land and distribution of land. These issues were bringing larger and larger sections of the people into action.

The resolution said that party members should take into account the mood of the people and give concrete slogans on its basis and give effective leadership to their struggles in order to secure relief for the people and improve their living conditions.

It dealt with only "the tasks of the party in the present situation." The party's long-range programme, based on what is known as the "Tenali draft"—a 100-page document—was finalized on November 6.

It accused the Government of landing the country's economy in a deep crisis after nearly two decades of Congress rule and its attempt to build capitalism, without attacking positions of foreign capital and without carrying out land reforms in the interest of the peasantry and agricultural labourers.

The sharpest expression of this crisis, according to the resolution, was the food crisis and the soaring prices of all commodities of daily consumption.

After analysing the implementation of the Plans, and the Government's failure on the industrial and agricultural front, it said: "Far from creating a self-generating economy, the country is today dependent on imperialist aid in respect of even food and for maintaining production in the existing industries."

It concluded that as a direct consequence of the policies of the Congress Government, "the entire administration down from the ministerial level is reeking with corruption. Crores of rupees allocated to various schemes are going down the drain into the cesspool of corruption."

On the draft proposals of the Fourth Plan, the resolution said that by proposing an outlay of Rs. 21,000 crores, the Government was only seeking to "lull the people with the promise of doubling the rate of economic growth."

It pointed out that there was "no change in the basic policies" of the Government, which continued to be the capitalist path of development. This path could not solve the country's basic problems of economic dependence and backwardness, of poverty and unemployment.

It outlined the tasks ahead of the party by building it "on the secure foundation of Marxism-Leninism as the initiator, builder and leader of mass movements and struggles."

The Conference gave the slogan "People's Democratic Front," to which all sections of the people should be mobilized for mass actions against the policies of the Government and organized into class organizations.

For this purpose, the Conference entrusted its Central Committee to call a meeting of trade unions and kisan sabhas within two months to draw up a line of action.

The Communist Party, it said, must have no hesitation to go into joint action with any party or group on "concrete issues in defence of the masses and of peace, independence and anti-colonialism."

However, there was no question of a "general united front with the ruling Congress Party or parties of Right reaction and communalism."

It stated that non-alignment with its "anti-imperialist content," as enshrined in the declaration of the Cairo Conference, was not safe if the Government of India's "trend of shifting its policies further to the Right is not arrested."

The Conference also adopted a resolution demanding the scrapping of the Government's decision on the Bonus Commission recommendations and withdrawal of the concessions awarded to employers.

It urged the working class to launch a country-wide campaign demanding immediate payment of 10 per cent of the annual earnings as minimum bonus.

In another resolution the Conference asked the Government to review its stand on the situation in Laos and Malaysia. It felt that India as Chairman of the International Commission on Laos had failed to play its role and shielded "American imperialists."

The Left faction of the CPI would retain its name as "the Communist Party of India" and would not make any change with regard to the party flag also.

A "declaration" issued by the CPI said that 422 delegates, representing 104,421 party members had participated in the seventh congress. This was 60 per cent of the total membership on CPI's rolls at the time of its sixth party congress.

The declaration expressed the confidence that "rethinking among those, who today remained formally with the Dange group" would soon take place and that also "those who are remaining unattached, will join us in the course of the next few months during the next stage of our struggle".

On International Affairs:

A resolution passed by the Conference on November 7 urged the Government to "take the initiative to contact the Government of China to break the present deadlock over the border dispute and to arrive at an acceptable basis on which negotiations can start."

The resolution expressed the hope that the Chinese Government would also "take initiative to bring about a settlement of the border dispute in the interest of both countries and the entire people of Asia."

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Mr. M. Basavapunniah, who released the resolution to the Press, explained that it was no use going into the question of the Colombo proposals, and India should not wait for the Chinese to take the initiative.

Asked what should be the next step if China did not respond favourably to Indian suggestions for negotiations, he said that China would have to reckon with world reaction if it did not accept a "reasonable proposal."

Denying that in the resolution the responsibility for breaking the deadlock was assigned in a greater measure to India, he said that as citizens of India they could demand of their Government steps which they could not ask the Chinese Government to take.

In reply to another question, he said that in the political-organizational report, they had described the Sino-Indian border dispute as a "war". In the Congress, some delegates had objected to the use of this term, but the objections were ruled out. The use of the term "dispute" did not, therefore, take away the seriousness of the problem.

Noting that the Government of India was prepared to favourably consider the suggestion that it should start negotiations with China without prejudice to its claims if no civilian posts remained in the demilitarized zone of Ladakh, the resolution suggested that Indian and Chinese representatives should meet to explore the possibility of opening negotiations "on this basis or any other basis."

The resolution said that continuance of the deadlock between the two biggest countries of Asia would only harm the cause of Afro-Asian and anti-imperialist solidarity which had become all the more urgent in view of the "brazenness with which US imperialism had extended the operation of Seventh Fleet into the Indian Ocean area, the Anglo-US efforts to establish military bases in Indian Ocean islands and the flagrant interference of US imperialists, military and otherwise, in many countries of Asia." The deadlock had also serious economic, political and other implications "for our country and people".

Other Resolutions:

In another resolution, the Conference demanded the immediate repeal of the State of Emergency as, in its opinion, there was no justification for the continuance of the Emergency two years after *de facto* cease-fire had been effected on the border.

The State of Emergency was being utilized, it alleged, for suppressing the working class, the peasants and the Opposition.

In a resolution on Congo, the Conference asked the Government to give up its "equivocal" stand and join the other Afro-Asian countries in demanding the immediate withdrawal of the American forces from the country.

It passed separate resolutions on Rhodesia, Angola and Mozambique.

In his briefing, Mr. Basavapunniah said that all talk of Left Communists resorting to an armed struggle were "infantile nonsense." Their objective was to preserve parliamentary democracy and defend it against all attacks.

He saw no reason for their present policy developing into the insurrectionist policy of 1948. The "errors" of 1948 were not so much in policy as in the incorrect reading of the political situation and the sectarian over-emphasis of the movement. Moreover, a majority of the members were in the age group of 40-60. It should be conceded to them that they had learnt by experience.

Within a few days they were going to write to the Communist Party of the Soviet Union asking for recognition as the Communist Party of India and asserting their right to be invited to the proposed conference of world Communist parties.

He said that they would ask the Chief Election Commissioner to allot them the election symbol of the undivided CPI in the coming election in Kerala. They would base their claim on the fact that of the total votes polled by Communist candidates in the last general election, a majority were cast in favour of those who were in the Left group.

He said that the immediate task of the Left Communists would be to agitate for a reduction of food prices and steps to curb the price rise.

Election Of Office-bearers:

Meanwhile, the newly-appointed Central Committee of the Left CPI, at its first meeting on November 8, unanimously elected Mr. P. Sundarayya as General Secretary of the "party".

It also appointed a nine-man politbureau, consisting of Mr. M. Basavapunniah, Mr. E. M. S. Namboodiripad, Mr. A. K. Gopalan, Mr. P. Ramamurthi, Mr. Jyoti Basu, Mr. Promode Das Gupta, Mr. Harkishen Singh Surjeet, Mr. B. T. Ranadive and Mr. P. Sundarayya.

(*The Statesman*, Calcutta and *The Times of India*, New Delhi)

[Prev. ref. 5952:INI:B]

D. CPI (Rightist) National Council Session: The National Council of the Communist Party of India (Rightist), meeting in Trivandrum on November 4, passed a resolution re-iterating its earlier demand that "in the changed conditions of today the proclamation of national Emergency should be forthwith withdrawn and the Defence of India Act and Rules revoked without delay."

The resolution expressed its "indignation and protest" against what it called the continued misuse of DIR by the Government for arresting and detaining without trial persons belonging to opposition political parties and leaders and workers in different States.

It said that DIR had been used recklessly to put down even peaceful and constitutional agitations by the people on economic issues like food scarcity and rising prices and workers' struggles for bonus, and trade union recognition.

It referred to the detention of a number of Communists since the start of the national Emergency, the detention of Leftist Communists in Calcutta on October 30 and 31 and the use of DIR in connexion with food satyagraha and said: "The National Council emphatically protests against all these lawless arrests and detentions and demands immediate release of all the persons involved therein."

The Council, in another resolution, also expressed its "great sense of horror and resentment" at the news of the killing of nearly 400 striking jute mill workers by hired hooligans at Khalishpur in the Khulna district of East Pakistan.

It said that "such organized barbarity is unprecedented in the annals of the labour movement." It hoped the various international trade union organizations would take "due note of the inhuman repression against the Pakistani workers and will take necessary steps to render them whatever relief and assistance is possible."

It also adopted a resolution "viewing with grave concern the alarming food situation in Kerala."

It "strongly" condemned "the inefficient and callous handling of the food situation in the State by the Central and State Governments."

In a resolution adopted on November 8, the National Council welcomed the recent Agreement between India and Ceylon on the question of "Stateless" persons of Indian origin in the Island.

The resolution said that "despite its unsatisfactory features, the Agreement should be welcomed by all persons standing for Indo-Ceylonese friendship and solidarity."

The Chairman of the Party, Mr. S. A. Dange said that the general line of the party in regard to the coming elections in Kerala was to build a "democratic front of the progressive forces" with the aim of defeating the Congress. The party had also to see with whom it made friendship to bring about this defeat.

He said that his party did not wish to ally with communal organizations or Right-wing reactionary forces. He added that they would also have nothing to do with the "Kerala Congress" (formed by Congress dissidents).

Stand On Mr. N. Khruschev's Resignation:

In a statement on the recent resignation of Mr. N. Khruschev from Premiership in the Soviet Union, the National Council said on November 10 that the change in the Soviet leadership "should have been made with better attention to its repercussions on world opinion."

It said: "The bald announcement of Mr. Khruschev's resignation and its acceptance, unaccompanied as it was by any appreciation of his services or even a hint of errors or other compelling reasons that necessitated his resignation apart from reasons of health and age which everyone took to be a minor factor in the development heightened the concern felt everywhere."

The Communist Party of India, as also many other brother parties in the world, shared with progressive world opinion the "surprise and shock" at Mr. Khruschev's resignation.

The Council affirmed that the leadership of the party and the Government was the internal matter of the concerned party. But it became a matter of concern for the whole world and all parties when it reflected world policies and affected the lives of millions.

As leader of CPSU and the Soviet Union, Mr. Khruschev had come to be identified with all world events in a personal way also.

"The rigidity and cold aloofness of the previous regime of personality cult days had been changed to friendliness and warmth. Even certain informality and humane mannerisms stood out under the stewardship of Mr. Khruschev in relations of the Soviet Union with friends and friendly countries. Hence, the change was bound to evoke worldwide interest and anxiety.

"It was also during the period of his leadership that friendship between India and the Soviet Union grew deeper and remained unshaken despite the India-China border conflict."

However, the policy statements of the new leadership had served a great deal in allaying the anxiety felt by Communist parties and friendly countries.

"Nevertheless, the National Council feels that the manner and method of the change of leadership once again highlighted the question of the functioning of socialist democracy and the need for further discussion on the subject."

The Council said that it would continue to determine its programme and policies on the basis of Marxism-Leninism, Moscow Statements of 1957 and 1960 and experience of the party and the people in the historical conditions obtaining in India.

It maintained that the party had always

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

"refused to be swayed either by reformism or by dogmatic adventurism."

(*The Hindu*, Madras and *The Hindustan Times*, New Delhi)

[Prev. ref. 5907: INI:B]

E. Chinese Allegations Of Intrusions Into Tibet—Indian Denial: In a Note to the Chinese Government on November 6, India repudiated the Chinese allegations of Indian intrusions into Tibet, contained in a Chinese Foreign Office Note dated September 28, as "nothing but fabrications, pure and simple."

These allegations, the Indian Note said, were "designed to meet the ends of China's propaganda and to keep up tension on the Sino-Indian border."

The Chinese Note had mentioned Tungchula, Peilungla, and Tagi Pass as points at which Indian forces were alleged to have crossed the boundary. "These names do not correspond to the names of any of the passes that the Government of India are aware of on this well-known Sikkim-Tibet border."

The Note stated that the rough map of the so-called Indian intrusions, which was published in Peking Review of October 9, along with the text of the Chinese Note, did not give the co-ordinates of these passes.

It also rejected the Chinese charge that Indian troops had built military structures, 11 on the Chinese side and seven on the boundary, at the so-called Tungchula Pass, saying that it was "totally baseless fabrication".

In a separate Note, presented to the Chinese Embassy on November 6, the Government of India once again lodged its protest against the intrusion by a Chinese patrol into Sikkim on August 27.

F. Use Of American Arms By Pakistan On Kashmir Border—Indian Charge: A spokesman of the Indian External Affairs Ministry said in New Delhi on November 6 that there was evidence that Pakistan had for quite some time been using American military equipment on the cease-fire line in Kashmir.

The spokesman made this statement while categorically denying a Daily Telegraph report sent from Murree in West Pakistan that India was using arms received from USA on the Kashmir front.

Answering questions, the spokesman said the attention of the US Government had been drawn in the past to Pakistan's use of the US equipment on the Indo-Pakistan border. "We are definitely not using any of the American equipment on the cease-fire line. We are committed not to use it. On the other hand, we have evidence that Pakistan has for quite some time past been using American equipment."

G. Soviet Equipment For Farakka Barrage Project—Agreement Signed: Under an Agreement signed in Calcutta on November 4, the Soviet Union has agreed to supply equipment for the construction of the Farakka Barrage.

The first consignment of equipment will reach the project site by March, 1965.

The Agreement was signed by Mr. V. P. Molotkov and Mr. M. P. Elistratov on behalf of the Trade Representation of USSR in India and Mr. D. Mukherjee, Chief Engineer of the Farakka Barrage project.

Mr. Zavelev, Soviet Deputy Trade Representative, announced that Soviet foreign trade organizations would send experts to advise the project authorities.

H. Demarcation Of Assam-East Pakistan Border: Agreement on the demarcation of the Chittagong hill tracts and the Mizo hills sector of the Assam-East Pakistan border was reached at a three-day conference of officers of the Survey of India and the Survey of Pakistan, which ended at Shillong on November 5.

It was agreed at the conference to demarcate the 200-mile-long border consisting of rivers and hilly portions in this very difficult terrain. The boundary includes part of the Karnafuli River.

[Pakistan had earlier constructed a dam on the Karnafuli River at Kaptai in East Pakistan. This had resulted in a controversy between the two Governments as to the level of the water astride the boundary and the areas likely to be flooded by the waters of the Karnafuli.]

[Prev. ref. 3593:INI:B]

L. Rice Agreements With Cambodia And Thailand: The Central Food Minister, Mr. C. Subramaniam said in Coimbatore on November 6 that the Government had entered into Agreements with Cambodia and Thailand for the supply of 25,000 tons of rice each to India.

The Government had signed an Agreement with UAR for 70,000 tons of rice and negotiations were under way with Pakistan for the supply of 15,500 tons.

He told correspondents that the question of introducing rationing was a matter for the Chief Ministers to decide.

He said that till December, it would not be possible to increase the present quota of rice per family per week, irrespective of the size of the family. He would, however, consider increasing the quota of wheat.

M. Essential Commodities (Amendment) Ordinance Promulgated: The President promulgated on November 5 the Essential Commodities (Amendment) Ordinance providing for the summary trial of traders and public servants contravening orders issued under the Essential Commodities Act.

Summary trials will be conducted by first class or presidency magistrates specially empowered for this purpose. There will be no right of appeal except where the sentence of imprisonment exceeds one month or the fine imposed exceeds Rs. 2,000.

Simultaneously with the promulgation of the Ordinance, the Central Home Ministry issued a notification specifying that foodstuffs in relation to Section 12(A) of the Essential Commodities Act would include edible oilseeds and oils.

The Prime Minister, Mr. Lal Bahadur Shastri, had told the National Development Council on October 26 that an Ordinance to provide for the summary trial of profiteers would be promulgated.

The following is the text of the Ordinance:

"Whereas Parliament is not in session and the President is satisfied that circumstances exist which render it necessary for him to take immediate action.

"Now, therefore, in exercise of powers conferred by Clause (1) of Article 123 of the Constitution, the President is pleased to promulgate the following Ordinance:

"I. (1) This Ordinance may be called the Essential Commodities (Amendment) Ordinance, 1964. (2) It shall come into force at once.

"II. During the period of operation of this Ordinance, (1) The Essential Commodities Act, 1955, shall have effect as if after Section 12 the following Section had been inserted, namely:

"12A (1) Notwithstanding anything contained in Sub-Section (1) of Section 260 of the Code of Criminal Procedure, 1898, any magistrate of the first class specially empowered in this behalf by the State Government or any presidency magistrate shall try in a summary way all offences relating to the contravention of any such order made under Section 3 as the Central Government may by notified order specify in this behalf, and the provisions of Chapter XXII of the said Code shall, as far as may be apply to such trial,

"Provided that in the case of any conviction under this Section, it shall be lawful for the magistrate to pass a sentence of imprisonment for a term not exceeding one year.

"(2) Notwithstanding anything contained in Section 414 of the Code of Criminal Procedure, 1898, there shall be no right of appeal by a convicted person in any case tried, summarily under this Section, in which the magistrate passes a sentence of imprisonment not exceeding one month or of fine not exceeding Rs. 2,000 or both.

"III. The Criminal Law Amendment

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Act, 1952, shall have effect as if after Section 8 the following Section had been inserted, namely:

"8A. (1) Where a special judge tries any offence specified in Sub-Section (1) of Section 6 alleged to have been committed by a public servant in relation to the contravention of any such order made under Section 3 of the Essential Commodities Act, 1955, as may be specified by the Central Government by a notified order made under Section 12A of that Act, then notwithstanding anything contained in Sub-Section (1) of Section 8 of this Act or Sub-Section (1) of Section 260 of the Code of Criminal Procedure, 1898, the special judge shall try the offence in a summary way and the provisions of Chapter XXII of the said Code shall, as far as may be, apply to such trial;

"Provided that in the case of any conviction under this Section, it shall be lawful for the special judge to pass a sentence of imprisonment for a term not exceeding one year.

"(2) Notwithstanding anything contained in this Act or in the Code of Criminal Procedure, 1898, there shall be no appeal by a convicted person in any case, tried summarily under this Section, in which the special judge passes a sentence of imprisonment not exceeding one month or of fine not exceeding Rs. 2,000 or both.

"Under Section 3 of the Essential Commodities Act, if the Central Government is of the opinion that it is necessary or expedient to do so for maintaining or increasing supplies of essential commodities or for securing their equitable distribution and availability at fair prices, it may by order provide for regulating or prohibiting their production, supply and distribution and trade and commerce in them.

"Under Sub-clause 2 of the Section, the Government may issue orders providing for the control of prices at which any essential commodity may be bought or sold, for regulating by licences, permits or otherwise the storage, transport, distribution, disposal, acquisition, use or consumption of any essential commodity and for prohibiting the withholding from sale of any essential commodity ordinarily kept for sale.

"Under the same Sub-clause of Section 3, the Government can also regulate financial transactions relating to foodstuffs, require persons engaged in the supply or distribution of, or trade and commerce in, any essential commodity, to maintain and produce for inspection such books, accounts and records relating to these as may be specified.

"Under Section 3(A) the Government can also by notification fix the prices at which any foodstuffs are to be sold in any particular locality."

[Prev. ref. 6090:INI:B]

N. Movement Of Rice To Kerala: A Food Ministry spokesman said in New Delhi on November 7 that the Centre was moving over 80,000 tons of rice to Kerala by special trains and ships on a "top priority basis", to meet the food crisis in that State.

He added that 10,000 tons of rice was already in transit by special trains from Orissa and should be reaching the State "very soon."

Another 5,000 tons was being moved immediately from a Central depot in Andhra Pradesh.

Special trains would carry to the State another 5,000 tons of rice from Punjab and 4,000 tons from Madhya Pradesh.

Other details of rice movement to the State for the month, as given by the spokesman, were as follows: Kerala would get 20,000 tons of rice from Andhra; Madras would supply 20,000 tons from the Kuruvai crop grown in the Thanjavur area, (Madras, in turn, was getting an allotment of 10,000 tons of rice from the Centre).

One ship was already unloading 2,000 tons of Pakistani rice at Kozhikode. Another ship, the Jagmitra, was loading 5,000 tons of rice at Karachi and it was expected to reach a Kerala port in five or six days. Two ships from USA were expected to reach Kerala in the third week of November with 12,500 tons of rice.

The spokesman said steps had been taken to ensure that there were sufficient supplies to meet the needs of informal rationing in the State. Informal rationing was introduced on November 1 in the municipal towns of Kerala. Other areas were expected to be covered by the end of the month.

The Centre had supplied 230,000 tons of rice to Kerala till the end of October.

[Prev. ref. 6090:INI:B]

O. Tuticorin Harbour Project Inaugurated: The Prime Minister, Mr. Lal Bahadur Shastri formally opened on November 5 the construction of the Rs. 15-crore Tuticorin harbour project.

Mr. Shastri in a short speech observed that the construction of major ports in India indicated that the country was fast developing industrially and trade and commerce were on the increase.

He noted with pleasure that work connected with the project had been entirely designed by Indian engineers, but he said India had not enough technical personnel and technical knowledge in harbour engineering.

He added: "I do not want to discourage our engineers, but I would suggest, though we have made great progress in the matter of civil, mechanical and electrical engineering, we should have a first rate cadre of port engineers". Foreign experts on technical matters connected with port development should be consulted, if necessary.

Mr. J. I. Coilpillai, Chief Engineer and Administrator of the Tuticorin Harbour Project, explained to newsmen that the scheme involved the construction of six berths, including an oil berth, as the first stage, capable of being expanded to 17 berths later. The scheme was estimated to cost approximately Rs. 14 crores and is expected to be completed by the end of 1969.

Two breakwaters, each about 11,000 feet in length, are proposed to be constructed 4,000 feet apart, so as to form a basin about 9,000 feet by 4,000 feet. The breakwaters will be of the rubble type, and the large stones required for this purpose will be quarried and conveyed from two quarries.

Smaller sized ones will be quarried and conveyed by road from the quarries at Hattaparai, about 20 miles from Tuticorin. The larger stones will be quarried and conveyed by rail from quarries near Ahbasamudram, 60 miles away. It is estimated that a total of three million tonnes of stones will have to be quarried and conveyed from these quarries. The alignment and orientation of these breakwaters have been designed on the basis of the model experiments conducted at the Central Water and Power Research Station, Poona. The harbour is designed for a draught of 30 feet. But it is expected that at least a one-end berth will have a draught of 32 feet.

The width of the harbour entrance has been tentatively fixed as 400 feet clear at sea-bed level. The location of the entrance, which is at present proposed on the eastern side, will be decided after considering wave directions, intensity and other factors based on the model experiments conducted at the CWPS station at Poona.

A metre-gauge railway link will be provided from Milavitan railway station to the harbour site for a length of 12 miles. An expressway taking off from the Tuticorin-Palamcottah road at Mile 28 will connect the harbour with Tirunelvelly and Tiruchendur. This expressway and rail track will be carried on the inner side of the south breakwater to connect the wharves. For this purpose a portion of the 200 feet width within the harbour basin close to the southern breakwater will be filled with sand and the rail and road connexions will be taken on this to the wharves.

The harbour estate will consist of an area of about 2,500 acres and will have its own township. The quarters, now constructed, will house the construction staff and, later the harbour's maintenance staff. The water supply required for the harbour will be 500,000 gallons on completion and 1,000,000 gallons later. The Government of Madras has already proposed to take up a scheme to supply about three million gallons per day exclusively for the harbour area.

Mr. Coilpillai added that the work on the project was put in hand towards the end of 1963, and works, estimated at Rs. 1 crore, were completed during 1963-64. While narrating the salient features of the construction of the Tuticorin harbour project, he added that the rail link from Milaviation railway station up to the Harbour Point had just been completed and trial runs had been made.

[Prev. ref. 3056:INI:L]

P. Campaign Against Unaccounted Money And Tax Evasion: India's chief tax-collector—the Chairman of the Direct Taxes Board, Mr. J. P. Singh—called a news conference in New Delhi on November 7 to announce the start of a two-pronged campaign against the twin evil of unaccounted money and tax evasion.

He declared that the Government had decided to intensify the search and seizure of black money on the one hand, and to treat with leniency those tax-evaders who might choose to make voluntary disclosures of their concealed incomes on the other—a stick and carrot approach.

He made it clear, however, that only genuinely voluntary disclosures would qualify for lenient treatment; any tax-evader caught at his tricks would not be able to make a "voluntary" disclosure.

In implementing its policy on voluntary disclosures the Government would avoid the pitfalls which had come to light more than a decade ago when a similar experiment was tried by Mr. Mahavir Tyagi, then the Central Minister for Revenue.

At that time, a lot of black money was declared by tax-evaders in the names of their relatives to whom the money did not really belong. By adopting this device, the tax-dodgers were able to pretend that the money was loaned to them or their companies, and they were thus able to pay themselves much more interest than the tax they had to pay to the Government. A repetition of these tactics would not be possible now.

One of the new measures to ferret out unaccounted money, announced by Mr. Singh, was an increase in the amount of cash awards to those giving information about concealed incomes of others.

Hitherto, this incentive had had no impact, largely because of the paltry reward. It had now been increased to thrice to four times the present limit. The pro-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

cedure for its payment had also been simplified.

Mr. Singh said the Government was also thinking of setting up a separate intelligence unit in the Income-Tax Department in order to accelerate the detection of tax-evasion.

Through their out-door survey the Income-Tax authorities had detected a large number of people who should have been paying tax but were not. They were mostly self-employed traders or shopkeepers, although some small private firms were also detected which were not deducting tax from the salaries of their employees.

Newspaper hawkers and pan-sellers had accumulated a lot of wealth on which no tax had ever been paid—like in New Delhi where some of them owned houses in posh localities.

He hoped that at the end of the current year, the number of people on the tax register would exceed two million; this would mean an increase of more than half-a-million over 1963.

It was only some months earlier that the Government had begun to use its powers for search and seizure of black money. As a result of raids on 88 premises belonging to 51 parties, black money in cash or gold worth Rs. 92,00,000 had been seized. Only a third of it belonged to film artistes, although the searches in relation to them had received the maximum publicity.

According to Mr. Singh, the impression that the searches for black money were tapering off was incorrect; what was happening was that the search parties were going out of their way to avoid publicity.

Q. **New Governors Of States:** A Rashtrapati Bhavan *communique* said on November 9 that Dr. P. V. Cherian, a former Chairman of the Madras Legislative Council, had been appointed Governor of Maharashtra and Mr. K. C. Reddy as Governor of Madhya Pradesh.

The communique stated: "The President has been pleased to make the following appointments:

"Dr. P. V. Cherian to be Governor of Maharashtra in the vacancy caused by the resignation of Mrs. Vijayalakshmi Pandit.

"Mr. K. C. Reddy to be Governor of Madhya Pradesh in succession to Mr. H. V. Pataskar.

"It is expected that Dr. Cherian will assume charge on November 20 and Mr. Reddy towards the end of the year."

(*The Times of India*, New Delhi)

[Prev. ref. 5742:INI:J]

R. **Oil Refineries At Madras And Haldia To Be Set Up:** The Central Government formally decided on November 4 to set up oil refineries at Madras and Haldia and to invite the American International Oil Company for collaboration in the construction and capital structure of the Madras project.

This ended a long-drawn-out series of negotiations in which the list of prospective collaborators ran to 15 but was towards the end narrowed to three or four.

The main rivals of American International, which is a partner of the National Iranian Oil Company, were Gulf of US and the Kuwait Government. Burmah-Shell too had entered an attractive bait, but fell behind in the race some weeks later.

The decision in favour of American International—which was tentative in the sense that the Government had only chosen it for further negotiations—came after a long discussion of the merits of the various offers. The matter was decided only late in the evening when a Cabinet sub-committee pronounced in favour of American International.

The sub-committee was headed by the Central Home Minister, Mr. G. L. Nanda and included the Finance Minister, the Foreign Minister and the Minister for Petroleum and Chemicals.

A decision had to be taken because the National Iranian Oil Company, sponsors of American International, had suggested this as a deadline.

Apart from providing the technical and financial assistance needed for the 2.5-million-ton Madras refinery, the collaborating firm has offered to mobilize a dollar loan for building fertilizer and petrochemical factories.

They may be given the contract for the supply of crude oil on a long-term basis pending the outcome of India's efforts to secure a source of crude oil supply in Iran. The first stage in this respect is expected to conclude by the end of the year when the result of India's efforts to secure an offshore oil concession in partnership with ENI and Philips is likely to be known.

(*The Times of India*, New Delhi)

[Prev. ref. 5861:INI:O]

IRAN

A. **Borrowing From US Banks Approved:** The Majlis (Parliament) passed on October 25 a Bill authorizing the Government to borrow $200 million from United States banks for strengthening Iran's defences.

The United States Government agreed to guarantee the loan and is extending to Iran an additional $50 million grant for military purchases.

The whole sum would cover the purchase of jet aircraft, tanks, armoured cars, and a frigate.

The purchases were part of a plan announced by the Shah two years ago to increase the mobility and fire-power of Iran's Army.

The Prime Minister, Mr. Hassan Ali Mansour, presenting the Bill, said the strengthening of the Iranian Army was necessary because of recent international developments. He hoped Iran-Soviet relations would not be affected by the changes in the Soviet Union.

Referring to the Chinese nuclear explosion, he hoped this would not create new anxieties for other nations and added that Iran looked to the Western Powers, and especially to the United States and Britain, to act to ensure world peace.

He said the Middle East and Persian Gulf regions were of vital importance to Iran. In what was regarded as a reference to President Nasser of the United Arab Republic, he spoke of "ambitious men who disturb world peace and the security of other nations." He said the Iranian Army was ready to reply to any violation of Iran's rights.

(*The Times*, London)

[Prev. ref. 5839:IRN:A]

B. **Inland Route To Caspian Sea:** The 224-mile Volga-Baltic Canal has been officially commissioned after a five-month trial period and the Soviet cargo ship *Kubatly* recently arrived in Szczecin after completing her first trip from an Iranian port on the Caspian Sea.

With the opening of this new transit route, Iranian goods destined for Northern Europe can be sent by truck to Bandar Pahlavi for reloading aboard steamers which will take them through the Caspian Sea and the Volga River to the Baltic Sea without transhipment. The USSR Government has agreed to allow a 10 per cent reduction in freight charges on Iranian exports using this route and it has already been announced that the two countries are to carry out joint improvements at Bandar Pahlavi.

The Volga-Baltic Canal is longer than the Suez and Panama Canals together and can take ships of up to 5,000 tons.

(*Middle East Economic Digest*, London)

[Prev. ref. 3550:AOA:M]

C. **Religious Leader Expelled:** The Iranian religious leader, Ayatollah Khomeini, has been exiled from the country.

He was reported to have gone to Turkey. An announcement said on November 4 that the decision to banish Khomeini was taken "on the basis of reliable information and sufficient evidence of his instigations against the nation's interests, security, independence, and territorial integrity".

Khomeini, a persistent critic of the Government whose centre of activity was the religious city of Qom, had in the past few weeks spoken harshly of a Bill extending diplomatic immunity to American military advisers in Iran.

The Bill was passed by both Houses of Parliament, but not before it had occasioned a debate in the Lower House, where it was approved by 13 votes.

Mr. Hassan Ali Mansour, the Prime Minister, defending the Bill in the Senate on October 31, said that 38 other countries had granted American military advisers similar immunity. He attacked those who —"in the party and from the pulpit"— were criticizing the measure.

The arrest of Khomeini for political speeches in mosques sparked off three days of rioting in June, 1963. He was kept under house arrest for 10 months before returning to his native Qom in April.

IRAQ

A. **Agreement To Form United Political Command With UAR:** Iraq and the United Arab Republic have decided that constitutional unity between the two countries should be implemented with the minimum delay in the spirit of the Agreement of May 26, 1964.

According to the Governments of the two countries, it has been proved that "the correct way to establish unity is to unify the political activities and formation of a unified political command...."

The following is the text of the Agreement:

Article 1: A united political command for the UAR and Iraq shall be formed. It will be the highest political authority in the two countries.

Article 2: The duties of the United Political Command shall be:

(1) To follow all objective steps for the implementation of the constitutional

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

unity between the two countries within a period of two years.

(2) To follow all objective steps for the implementation of the political unity between the socialist unions in the two countries.

(3) To control foreign policy, armed forces and defence problems, economic planning, culture, information, guidance and education, and national security.

(4) To discuss the internal problems of the countries and to find the proper solutions thereto and to supervise the implementation of the decisions taken.

Article 3: The United Political Command shall be formed by the Presidents of the two Republics with at least six members from each of the two countries. It will have the right to order the formation of any groups deemed to be proper for the conduct of its affairs.

Article 4: The United Political Command shall convene once every two months but may convene at any time if necessity arises.

Article 5: The decisions of the United Political Command shall be binding on the two countries upon their issue, excepting those which require approval of the Legislative Bodies.

Article 6: This Agreement shall come into force upon its approval by the Legislative Bodies of the two countries.

(*The Iraqi Embassy*, New Delhi)

[Prev. ref. 5897:IRQ:A]

ISRAEL

A. De-salination Agreement With USA: A dual-purpose nuclear plant, which will provide between 175 and 200 megawatts of electricity and distil 125 million to 150 million cubic inches of sea-water a year is envisaged for Israel.

The recommendations were made by a joint team of technologists appointed after an agreement in Washington last June between President Johnson and the Israel Prime Minister, Mr. Levi Eshkol, for co-operation in research on desalination of sea-water.

The next step will be an engineering study due for completion in the middle of 1965, Experts say that provision of a reactor of between 1,000 and 1,500 thermal megawatts required for the dual-purpose plant would not be any problem.

However, the capacity of the distillation plant envisaged would be more than 100 times greater than the largest unit in operation anywhere in the world.

The joint team suggested that construction of a prototype desalting plant may be necessary for the successful and economic design of a full-scale model.

Israel will need more water by the end of the decade, when she will have tapped practically all her conventional and semi-conventional sources. The team said the proposed plant would "offer an attractive solution for Israel's short-term water problems and ... would constitute a significant contribution to the development of the art of desalting and further its application in other parts of the world."

(*The Times*, London)

[Prev. ref. 5706:ISR:A]

B. New Town In Galilee: Carmiel in Galilee, Israel's new town, was formally inaugurated on October 29 at a ceremony attended by the Prime Minister, Mr. Levi Eshkol. The town is planned for a population of 50,000.

While the return to the soil had been one of the fundamental aims of the Jewish national revival movement, he pointed out that Israel could not be a mainly agricultural people.

He said: "Only the expansion of the industrial basis of our economy will enable us to absorb those who will return to the homeland.

"From this point of view, Carmiel is symbolic: both as a centre of industry, handicrafts and tourism, and as an urban centre for a large agricultural area in western Galilee. Carmiel and the agricultural development of Galilee constitute a single project to revive the area for the benefit of all its inhabitants, old and new, Jews and Arabs.

"The true interests of every inhabitant of this area lie in development, which will bring with it employment and prosperity for all, and not in the barren defense of backwardness and stagnation..."

He said that Jewish settlement in Galilee had been uninterrupted. "Until the very day the State was established, the last surviving Jewish settlement, whose inhabitants never went into exile, held fast to the soil of Galilee.

"The expansion of Galilee's capacity to absorb immigration and the enhancement of its role in the development of the country constitute an additional link joining the revival of the past of our land and our people with the building of their future."

The Minister of Housing, Mr. Yosef Almogi, said: "This rocky hillside—desolate since the Second Temple, is entering upon a new era of life and activity."

He announced that he had reached an agreement with a world-renowned prefabricated housing firm for the erection of a plant to produce 1,000 houses a year at Carmiel.

(*The Israeli Digest*, Jerusalem)

C. Campaign Against West German Statute: The Knesset has adopted a resolution giving expression to Israel's intention to rally all nations victimized by Nazi brutalities in a campaign against the West German Statute of Limitations, which will prevent bringing war criminals to justice after May, 1965.

The resolution urged the countries concerned to proclaim that there should be no time-limit for the prosecution of those crimes, and called on the Bonn Government not to apply it.

The House also expressed "disappointment and regret" at the failure of the Bonn Government to take adequate measures to withdraw the German scientists who had been helping Egypt to develop rockets and other weapons for aggression against Israel.

The resolutions were adopted by 51 to two with 33 abstentions.

The coalition parties defeated a more strongly worded Opposition resolution which sought to commit Israel to a more active political crusade against the West German Government.

[Prev. ref. 5888:ISR:A]

JORDAN

A. New Mining Law: Under a new mining law that has come into effect, all minerals found in Jordan, regardless of their location, are the property of the State and applications for investigating permits and prospecting licences will be dealt with by the Director of the Department of Geological Research and Mining.

Following the discovery and registration of minerals, the Minister of National Economy, with the approval of the Council of Ministers, will grant a mining right. Investigation permits, prospecting licences and mining rights may not be granted to foreigners except by special agreements concluded between them and the Minister with the consent of the Council of Ministers.

The new law replaced the mining law of 1926 and the quarries law of 1953.

(*Middle East Economic Digest*, London)

B. Development Of Aqaba: A plan to promote Aqaba as a first-class Winter resort was launched in the third week of October when King Hussein opened Jordan's first water carnival.

Some 10,000 people attended the two-day event, including foreign tourist agency officials who were guests of the Ministry of Information. American and Lebanese experts pronounced Aqaba beach "most suitable for international water skiing."

King Hussein also inaugurated work on a housing project near Aqaba consisting of 1,000 houses to accommodate 25,000 people. The scheme covers an area of 125 acres, expropriated for the purpose by the Aqaba Port Authority, and will take two years to complete at a cost of JD1 million. The houses will be sold on ten-year mortgages.

(*Middle East Economic Digest*, London)

KUWAIT

A. New Labour Law: A new Labour Law governing workers in the private sector has been promulgated, which, for the first time in Kuwait, gives workers the right to form trade unions.

No non-Kuwaiti may join such a union unless he has lived in Kuwait for a period of five years after the passing of this law. Unions are prohibited from engaging in political, religious or ideological matters but have the right to join any Arab or international labour federation whose interests are held to be in common with theirs.

The law provides for compulsory conciliation and arbitration in labour disputes, but nowhere mentions the possibility of strike action. The overall terms of employment set out in the law are comparable with those prevailing in Western Europe and in some cases, such as the payment of compensation for dismissal owing to redundancy and the payment of full wages for six months during illness, Kuwait is ahead of Western countries. Women workers doing the same job as men are to be paid equal wages.

Workers of the Kuwait Oil Company at Ahmadi have already applied to the Ministry of Social Affairs and Labour for permission to form a union. At the end of 1963 the Kuwait Oil Company employed 3,596 workers of whom 1,179 were Kuwaitis, 1,303 other Arabs and 1,109 Indians, Pakistanis and other nationalities.

MALAYSIA

A. Measures To Beat "Speculative" Imports: The Government has extended protective tariffs under the Malaysian Common Market to 101 commodities under 24 classifications.

The comprehensive list, published simultaneously in all the State capitals on October 24, covers a wide range of goods from rubber and synthetic products to household items such as eggs, cigars, cheroots and liquid soaps.

The Central Government also announced precautionary measures to regulate the levels of imports of the specified items.

The controls necessary in each of the six customs areas—the States of Malaya (except Penang), Sabah, Sarawak and the three free ports of Singapore, Penang and Labuan—promulgated on the recommendations of the Tariff Advisory Board, vary from area to area and are more extensive where the danger of speculative imports is greatest.

Public inquiries will be held to consider the inclusion of these items within the Malaysian Common Market. The first hearing opened in Kuala Lumpur on November 23, the second in Singapore on November 30, and the third and fourth in Kuala Lumpur again on December 7 and 14 respectively. Traders and manufacturers wishing to be heard were asked to inform the Board.

In the six Customs areas, goods at present moving from one area to another are subject to Customs duty, regardless of whether they are made in Malaysia, or imported originally and subsequently transferred. Once the Common Market is established in respect of any commodity, a common Customs duty would be applied on foreign imports at the point of entry into Malaysia. Such duty-paid goods as well as Malaysian manufactures can move freely within Malaysia without being subject to licensing or Customs duty.

The Government statement said: "Publication of this notice could provide an opportunity for 'speculative' imports to be stock-piled in the free-ports and low-duty areas of Malaysia. It is quite clear that during the period of the Tariff Advisory Board is considering inclusion of the commodities within the Malaysian Common Market, and pending a final decision by the Central Government on the Board's recommendations, an opportunity is created for speculators to import abnormally large quantities of the commodities concerned into the free ports as well as low-duty areas in anticipation of the Common Market being established.

"Abnormal or speculative imports would seriously affect industries and employment within Malaysia as they would render ineffective the tariff protection for Malaysian industries since they would have been imported either free of duty or on payment of low-duty before the Common Market is established. Similarly, traders in high-duty areas would have been imported either free of duty or on payment of low-duty before the Common Market is established. Similarly, traders in high-duty areas would be faced with unfair competition from duty-free stocks that have been built up prior to the Common Market. Speculative imports could also complicate the revenue-earning arrangements between the Central and Singapore Governments, and finally, these stocks could force a delay in the establishment of the Common Market in any commodity until abnormal stocks of such commodity have been exhausted.

"To counter these dangers, the Tariff Advisory Board has recommended and the Governments have agreed to take temporary precautionary measures by regulating the levels of the imports. Quotas, where specified, have been carefully designed to take account of both normal consumption needs and known stocks already existing within the country."

(*The Malaysia High Commission*, New Delhi)

B. Leaflet Raid Over Indonesia: In what was described as the first retaliatory action from Malaysia in the undeclared war with Indonesia, British and Malaysian military aircraft flew together on November 2 in a leaflet raid over Indonesia.

An official statement said aircraft dropped thousands of leaflets warning Indonesians not to engage in any fresh raids against the Malayan peninsula.

In Singapore, a British military spokesman said some British aircraft and crews had taken part in the raid. He explained that the operation was "planned and conceived by the Malaysians", but "we provided them with some planes".

The United Nations had been informed of the leaflet raid, the Malaysian Foreign Ministry said. The raid denoted no change in policy, but was designed to inform Indonesians that they should not plead ignorance of the true situation if they were sent into Malaysia and seized.

The Prime Minister, Tengku Abdul Rehman described the leaflet raid as a great success. He told newsmen that about 2,500,000 leaflets had been dropped, but declined to say precisely where.

It was generally presumed that the targets were in East Sumatra and islands in the Java Sea near Singapore.

He said the crews of the aircraft had seen flashes below, but could not be sure they were hostile gunfire. All the aircraft returned safely. He agreed that the raids were a violation of Indonesian air-space, "but they had a peaceful intent, and were not like the Indonesian paratroop drop at Labis (a south Malayan railway town) where they sent men to kill us".

The leaflet contained an appeal by the captured officer in command of an airborne landing force at Labis, Second Lieutenant Soetikno Tjitrosomarto, who said he was "lucky to be alive", and listed the numbers killed and captured in raids on Malaysia.

"None of the tasks assigned by the authorities in Djakarta have been carried out, and the whole campaign is a complete flop", the Lieutenant's statement said. "Those who have died have died for nothing.

"We were told by the high authorities in Djakarta that we would be welcomed by the local people as liberators. But what actually happened was that the people treated us as aggressors and assisted the Malaysian security force to capture us.

"I see that the people of Malaysia live in a prosperous State and are free and give full support and absolute loyalty to the Malaysian Government. It is rather the people of Indonesia who need to be liberated from poverty and misery."

The leaflet raid followed three Indonesian guerrilla assaults on south Malaya in less than three months. Altogether, 256 Indonesians and Malaysian renegades had come ashore. The casualty list so far was 47 Indonesians and five members of the Malaysian-Commonwealth forces killed, 185 Indonesians captured, and four allied soldiers wounded.

For the whole unofficial war, which opened with rebellion in Brunei, British Borneo, in 1962, the number of dead was believed to be around 400.

[Prev. ref. 6126:MAL:A]

C. New TV Project: The Minister for Information and Broadcasting, Mr. Senu bin Abdul Rehman, opened on October 1 a (M)$600,000 television station in Kedah State.

He said that people in the northern states of Malaya would now be able to enjoy the most modern mass-communications facility available in Malaysia. Television in developing countries was considered an urban luxury, intended mainly for the people in the cities and towns. But, he said, "the Malaysian Government wants to make it an amenity not only for towns but also for rural people, who are the backbone of our economy and social system."

"Television would be an important instrument of our social revolution. It would be a means of informing the people about the progress in the various sectors of our national life and about progress outside Malaysia."

He said that television service in Kuala Lumpur and other places had already made good progress in quality and variety of the programmes.

MONGOLIA (Outer)

A. Mr. J. Tsedenbal's Visit To Poland: The Prime Minister, Mr. Jumjagiin Tsedenbal, visited Poland from October 23 to 29 at the head of a party and Government delegation.

The delegation was given a warm reception wherever it went. Mr. Tsedenbal and his party, apart from visiting educational, agricultural and industrial centres, held talks with the Polish Premier, Mr. W. Gomulka and other Polish leaders.

Speaking at a rally arranged in honour of the visiting delegation, on October 28, Mr. Gomulka said: "Mongolia is a living example of the truth that under-developed countries that enter the road of socialist development can, with the assistance of the countries of the Socialist camp, liquidate their centuries-long backwardness and attain a dynamic rate of development on this road."

Mr. Gomulka, also made a reference to his recent meeting with the new Soviet leaders. He said he was fully satisfied with their explanation of the background to Mr. Khruschev's dismissal and the reasons for it. He said that Mr. Khruschev had presided over the meeting which voted him out of office and there were "justified grounds" why his resignation was accepted. The changes in Moscow were in keeping with "Leninist principles of internal party democracy."

He called upon Russia and China to settle their differences.

Joint Communique:

A joint *communique*, issued on October 20 on the talks between the Mongolian delegation and Polish leaders, said:

"Problems connected with the further development of the Polish-Mongolian political, economic and cultural co-operation, as well as with the relations between the Polish United Workers' Party and the Mongolian People's Revolutionary Party, were discussed during the talks. The participants in the talks carried out also

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

an exchange of opinions of the current problems of the internal situation and the international Communist and workers' movement. The talks were conducted in a friendly atmosphere and they confirmed the complete unanimity of views of both sides in all problems under discussion.

"The two sides stress that the liquidation of the dangers of thermo-nuclear war and the preservation of peace constitute the key problem of the present times. The policy of the Socialist countries aimed at the practical implementation of the policy of peaceful co-existence of States with different social systems, as well as the active struggle of the peaceful and democratic forces of the world, are the basic factors influencing the development of the international situation.

"The struggle for the preservation of peace and peaceful co-existence is linked inseparably with the striving of nations for freedom, independence and social progress. In co-operation with the Soviet Union and other Socialist countries and with all forces of peace and progress, the Polish People's Republic and the Mongolian People's Republic are striving for international agreement arresting the armaments race and the creation of conditions for peaceful co-operation between nations.

"The Mongolian side states with satisfaction that the proposals put forth by the Government of the Polish People's Republic, concerning the creation of an atom-free zone in Central Europe and the freeze of nuclear armaments in Central Europe are pervaded by sincere concern of Poland for alleviating the international tension and the consolidation of universal security. The two sides have stressed the necessity of a peaceful settlement of border disputes among States on the basis of the existing frontiers, recognition of the two German States and the commitment of the two German States to renounce nuclear weapons and enter the road of disarmament.

"In the interest of peace in Europe and the entire world, it is necessary to strive for the conclusion of a Peace Treaty with the two German States and the regulation of the problem of West Berlin. The two sides state that West German militarism, which is striving for the revision of the existing frontiers and the absorption of the German Democratic Republic, constitutes one of the chief obstacles on the road to international detente. Ignoring the experience of history and the growing resistance of world public opinion, the United States is giving direct support to these aspirations of West German imperialism.

"The creation of the so-called multilateral nuclear forces sponsored by the United States would open for the German Federal Republic access to nuclear weapons and constitute a serious threat to peace in Europe and the world.

"The two sides are for complete and immediate liquidation of the rotten colonial system and for the granting of independence to all countries and nations which are still under foreign domination. Poland and Mongolia support the efforts of the nations of Africa and Latin America in their struggle for freedom and national independence, they are in solidarity with young independent States fighting for the consolidation of their political and economic independence, condemn determinedly the policy of neo-colonialism.

"Poland and Mongolia have welcomed with satisfaction the resolutions of the Conference of non-aligned countries in Cairo.

"The two sides stress the necessity of the restoration to the Chinese People's Republic of her rightful place in United Nations. An end should also be put to the occupation of Taiwan by the United States.

"The two sides are for the development of peaceful international economic co-operation, free from any discrimination, in the name of the consolidation of peace and the acceleration of the progress of the developing countries.

"The representatives of the Polish United Workers' Party and the Mongolian People's Revolutionary Party state with satisfaction that the two parties are developing a close brotherly co-operation based on the common ideology of Marxism-Leninism. The two sides consider that the ideological differences existing in the ranks of the Communist movement should not be carried to the relations between States. The Polish United Workers' Party and the Mongolian People's Revolutionary Party stress that the determined strengthening of the unity and cohesion of the entire socialist community and the international Communist and workers' movement on the basis of the principles of Marxism-Leninism and proletarian internationalism constitutes the basic condition of the successes."

The communique was signed on the Polish side by Mr. Wladyslaw Gomulka, and Mr. Jozef Cyrankiewicz, and on the Mongolian side by Mr. Jumjagiin Tsedenbal.

(Polish Facts On File)

NEPAL

A. Progress Of Indian-aided Projects—Communique: Greater participation by the Nepalese Government in the execution of Indian-aided projects in the country was one of the important decisions reached at the two-day talks between the official delegations of the two countries which ended in Khatmandu on October 30.

The talks were held to review the progress of these projects.

[Indian-aided projects in Nepal are at present executed either directly by the Indian Aid Mission or through autonomous boards in which the Nepalese Government is also represented. The Aid Mission came into being in 1956. Lately, Nepal had been insisting that she should have a greater say in the execution of these projects. There had also been a demand to associate an adequate number of Nepalese technical personnel with these projects at the execution stage. When the Indian Foreign Minister, Sardar Swaran Singh, came to Nepal, a periodic review of Indian-aided projects was decided upon "to ensure their expeditious implementation". The talks which ended on October 30 were in accordance with this decision.]

The Indian delegation at the talks was headed by Mr. M. C. Kaul, Joint Secretary, External Affairs Ministry. Eleven Indian officials, including the Director of the Indian Aid Mission, Mr. D. R. Kohli, participated in the talks. The 11-member Nepalese delegation was led by Mr. Begh Bahadur Thapa, Economic Planning Secretary. According to spokesmen of both delegations, both sides were satisfied with the talks and there was no disagreement at any stage.

While the talks covered all Indian-aided projects in Nepal, there was a special discussion on the Trisuli hydel project, which is scheduled to go into operation in 1965.

According to a joint communique issued at the end of the talks, it was agreed that various boards, now responsible for the implementation, should continue to function as an administrative device to provide forums for decisions, co-ordination and review only. Execution would become the responsibility of the Nepalese departments. The functioning of the boards and the need for their continuance would be reviewed from time to time.

The delegations decided that members of the Indian Aid Mission, who were advisers to the Nepalese Government, would be given the necessary facilities by the departments. The engineering division of the mission engaged in the construction of a number of projects would be transferred to the Nepalese Government.

It was also agreed that major projects like the Trisuli, the proposed Sunauli-Pokhra road, Chatra canal and the Khatmandu water supply would continue to be the responsibility of agencies of the Indian Government entrusted with their execution.

The two delegations agreed that suitable Nepalese personnel be made available both for active duty and training on the Indian-aided projects so that they would be in a position to take over and maintain the projects after their completion.

The Government of Nepal agreed to take the necessary steps to select and recruit personnel from among the young Nepalese returning from India after completing various courses of study and training in technical and specialized fields.

B. Progress Of Lhasa-Khatmandu Road: The Lhasa-Khatmandu Road linking the capitals of Tibet and Nepal will be opened for traffic by the end of December.

Hitherto Nepal's contact with the outside world was by a mountain road to India.

The only Chinese-aided project in Nepal, the road is estimated eventually to cost Rs. 4.75 crores.

The other projects promised by China—a cement factory, a paper mill and leather works—have not materialized. The Chinese have expressed their inability to fulfil these commitments.

About 500 Chinese have been working on the road project employing local labour. They are being retained in the mountain Kingdom for another year to make the road a black-top all-weather highway.

For the time being the 104-km section of the Road on the Nepal side connecting Khatmandu with the Tibetan border at Kodari Pass can be used only by jeeps and light vehicles.

With the opening of the Road, the travelling time between Khatmandu and Lhasa will be reduced to three or four days. At present, travel by the traditional mule tracks takes three weeks.

The Nepalese believe that the Road will help in increasing their trade with China. There is, however, apprehension that it will be used much more to smuggle into Tibet essential goods needed for the occupation army there. Cement, steel and kerosene are the commodities in short supply in Tibet. These are now being smuggled into Tibet through caravan routes. Nepal depends entirely on India for its supply of these articles.

ASIAN RECORDER

December 9—15, 1964

Regd. No. D-727
Vol. X No. 50

BURMA

A. Restoration Of Mandalay Regalia: Britain returned to the Burmese Government on November 13 the priceless gold "Mandalay Regalia" captured when Mandalay fell to the British and Indian forces in the Third Burmese War of 1895.

Mr. Patrick Gordon Walker, Britain's new Labour Foreign Secretary, handed to the Chairman of the Burmese Revolutionary Council, General Ne Win, a sheathed dagger in London. Known as Than Lyet, it is the most important historical and sentimental object in the art collection.

Mr. Gordon Walker told General Ne Win: "I hope you will receive it not only as a token of the whole Regalia but also as a symbol of the increasingly close relations between our two countries to which we attach very great importance.

"May our future friendship always be as close as the sheath and the dagger".

General Ne Win, who was in London on a private visit, said that the handing back of the Regalia would "add another firm knot to the ties of friendship already existing between our two countries."

The Regalia is the most important single collection of Burmese art in existence, consisting of 167 ceremonial articles, mostly in gold, and dating from the 18th and 19th centuries. They include ewers, salvers, urns, and many large receptacles (some in the form of sacred geese), as well as various articles of apparel worn by Burmese kings and queens.

The most important object from an historical and sentimental point of view is one of the plainest. It is a sheathed dagger known as Than Lyet, revered in Burmese tradition as one of the five emblems of Buddhist kingship, and said to have been handed down by the founder of the dynasty, King Alaungpaya of Shwebo (1752-60) to his successors.

Other articles of special interest are gold title-plates worn on ceremonial occasions by kings and queens of Burma, including King Bodawpaya (1781-1819), King Mindon (1853-1878), and King Thibaw (1878-1885). Of particular beauty is a large vessel carved in solid amber in the form of a sacred goose (hansa). Most of the goldwork is elaborately ornamented in a style which, though borrowed freely from Indian and sometimes from European tradition, is yet individual to Burma in its general character.

The Regalia was seized by military command from the palace of the Alaungpaya dynasty when Mandalay fell to British and Indian forces in the Third Burmese War of 1885. In the following year the Regalia was brought to the United Kingdom for display in the Colonial and Indian Exhibition in London.

When the Exhibition closed, the Secretary of State for India appointed a sub-committee to advise on its disposal, the intention then being to sell it by public auction in partial recompense for the costs of the military campaign. However, the sub-committee emphasized the unique historical interest of the Regalia and this persuaded the Secretary of State for India to ensure preservation of the collection intact.

(*The Nation*, Rangoon and *The Times*, London)

B. New Envoy To France: U Zahre Lian, former Minister of Chin Affairs and founder of the Chin Congress, has been appointed Burmese Ambassador to France.

After the 1960 General Election he was first made Minister for Chin Affairs and later Minister for Housing.

U Lian (41) was the third Minister of U Nu's Government to be made an Ambassador. The other two were U Ba Saw, now in Moscow, and Sama Duwa Sinwa Nawang, Ambassador-designate to China (see page 6171).

(*The Nation*, Rangoon)

C. Income-tax Act Amended: The Income-Tax Act has been amended to include a special provision for the purpose of levying tax on the owner or charterer of ships on account of carriage of all passengers, livestock or goods shipped out of the country.

An official announcement said: "The amendment is notwithstanding anything contained in other provisions of the Income-Tax Act for levy of tax in case of any person residing out of Burma and carrying on business as owner or charterer of a ship".

(*The Statesman*, Calcutta)

CAMBODIA

A. Prince Norodom Sihanouk's Call For Four-Nation Conference—Independence Day Celebrations: In a speech marking Cambodia's 11th year of Independence from French colonial rule, the Head of State, Prince Norodom Sihanouk, said on November 9 that his political movement—Sangkum—was asking all "the parties and patriotic movements of North and South Viet-Nam and Laos to attend a conference to discuss American role in South-East Asia."

He called such a conference "the best method of compelling the United States to accept a peaceful solution for our region and so prevent the war in South Viet-Nam from degenerating into an international conflict that would sound the knell for humanity."

At the end of his address, Prince Norodom sent greetings to the Neo Lao Haksat, the political arm of the Pathet Lao, and to the National Liberation Front of South Viet-Nam.

Western observers agreed that members of the Neo Lao Haksat and the National Liberation Front would accept the invitation. They felt also that plans for the conference probably had been laid during his recent visit to China.

After he finished speaking Prince Norodom walked from the reviewing stand to the Independence monument, a block away. There, with delegations from France, China, North Viet-Nam and Eastern Europe, he re-kindled the symbolic flame. On the steps below, guards released cages of doves and cut loose pink, blue and bright green balloons.

Thousands of people lining the streets greeted Prince Norodom enthusiastically.

The principal guest of honour at the Independence Day celebrations was China's Deputy Premier and Foreign Minister, Marshal Chen Yi.

Exhibition Hall Opened:

On November 11, Prince Norodom formally opened an exhibition hall dedicated to Cambodian arts, agriculture and industry.

In a prepared speech on the occasion, he thanked the countries which had given economic aid.

He said: "If we do not find one (a solution to a troublesome soft spot in the economy) our country will be forced either to align itself with the very rich United States so that they can meet the annual deficit of our national budget—as they have done for instance with Thailand—or open its doors to Communism which has approved methods for cases of this kind.

"Our failure would in any case be the end of the non-alignment of our regime."

He did not go through the full text of his speech because of heavy rain. He guided the diplomatic corps and other special invitees through the hundreds of wall graphs and show-cases, explaining how well Cambodia had done since its Independence 11 years ago.

(*The New York Times* and *The Times of India*, Bombay)

[Prev. ref. 5840:CAM:A]

B. Britain Urged To Resign As Co-Chairman Of Geneva Conference: The Government, in a *communique* issued on November 6, demanded that Britain should resign from her role as co-Chairman of the Geneva Conference on Indo-China.

It denounced what it termed a "new British plot to hinder the calling of a conference" on Cambodia.

The **communique** recalled that the British Foreign Office, replying to the Soviet demand for a conference on Cambodia, had asked if the Soviet Union was willing to fulfil the function of co-Chairman under the 1954 Agreements.

The Government said it considered the British demand was made to gain time in order to ascertain the United States attitude.

CEYLON

A. Prorogation Of Parliament And Newspaper Bills: The Governor-General prorogued Parliament from November 13 to 20 on the advice of the Prime Minister, Mrs. Sirimavo Bandaranaike.

Mrs. Bandaranaike said on November 13 that the prorogation of Parliament had been found necessary "to correct the procedural shortcomings" on two important measures that had recently been presented in Parliament.

These two measures were the Bill for the establishment of a Press Council and a Press Tribunal and the appointment of a Press Commissioner as well as the Bill to take over the Lake House group of newspapers. With the prorogation of Parliament, these Bills, along with others before the Parliament, lapsed.

She said that her Government proposed to re-introduce these Bills when Parliament reassembled on November 20.

The step was described by Opposition leaders as "an abuse of machinery of Parliament". Some of them demanded that Parliament be dissolved and fresh elections held immediately.

Mr. Philip Gunawardene, leader of the Mahajana Eksath Peramuna, pointed out that this was the second time the Government had resorted to prorogation of Parliament to tide over a crisis.

He said that no prorogation could solve an economic and political crisis and demanded that Parliament be dissolved and a free and impartial election held and the Press permitted to operate as a free Press.

Mr. S. J. Chelvanayagam, leader of the Federal Party, said that the dissolution of Parliament was the correct course to adopt.

The Press Bill, he said, was important enough to be left to the decision of the people in a General Election.

(*The Hindu*, Madras)

[Prev. ref. 6123:CEY:A]

B. Separate Register For Citizens Of Indian Origin: In a lengthy statement made in the Senate on November 10, the Prime Minister, Mrs. Sirimavo Bandaranaike, claimed that the Agreement concluded with India on persons of Indian origin in Ceylon (see page 6163) was in every respect a great advance over the Agreement concluded in 1954 by the then Prime Minister, Sir John Kotelawala.

She said that first India had undertaken to confer Indian citizenship on those who were to be repatriated and secondly, Ceylon was not now bound to offer any inducement to would-be repatriates. Further, concept of State-lessness would not bedevil a solution of the problem.

She said: "During my discussions with the leaders of the Opposition parties, it was agreed that those granted Ceylon citizenship should be placed on a separate electoral register. When they are on a separate register it will be possible for them to select their representatives. This arrangement will also safeguard the political interests of the indigenous population.

"The question of separate electoral register for persons of Indian origin who are registered as Ceylon citizens was not discussed at the Delhi conference as this is a matter solely for determination by our sovereign Parliament. The Indian Government extended the greatest co-operation in the attempts to find a solution. The closest co-operation and collaboration between the two Governments is essential for the successful implementation of the Agreement. Equally essential is the co-operation and support of all the political parties and the people."

She said that people of Indian origin in Ceylon behaved as a separate community, hardly intermingling with the indigenous population. "It is our hope and desire that in due course of time those granted Ceylon citizenship will get culturally assimilated with the people of the area in whose midst they live."

She cited statistics of the total population of persons of Indian origin which "should disprove the fantastic figures cited by Mr. K. M. P. Rajaratne and Mr. R. G. Senanayake". According to the Prime Minister's figures, a total of 1,15,135 persons have obtained Ceylon citizenship under the Indian and Pakistani Citizenship Act and 6,000 under the Ceylon Citizenship Act since 1953. A total of 1,31,878 Indians have left Ceylon for good since 1953. The balance of persons of Indian origin now in Ceylon is 9,87,461.

She said that a Bill to control acquisition of land by non-Ceylonese had already been introduced in Parliament. A Bill to control employment of non-Ceylonese would be introduced shortly. A third Bill to enable Government to eliminate the menace of illicit immigration by the issue of identity cards to all persons over the age of 18 would also be submitted to Parliament.

The repatriation of persons of Indian origin under the Indo-Ceylon Agreement would begin from 1965.

On the preparation of registers of persons to be repatriated and to be granted Ceylon citizenship, she pointed out that the Indian official delegation, which was in Ceylon in September, 1964, considered the basis of selection of persons of Indian origin, who were to be granted Ceylon citizenship and Indian citizenship.

"Due to the complete information available at my Ministry" she said, "I do not expect any delay or difficulty in preparing the registers for the 825,000 persons, whose status has been settled."

She thanked the Indian Prime Minister, Mr. Lal Bahadur Shastri, the other Ministers associated with him in the talks and the Indian officials "who made it possible to complete these talks within a short space of six days by their willingness to meet our delegation at any time of the day or late at night and sometimes even during the small hours of the morning."

Details:

According to a report published in *The Statesman* (Delhi and Calcutta) on November 12, about 50,000 registered citizens of Indian origin will be taken off the general electoral register and placed on a separate register along with the 3,00,000 to be granted citizenship under the new Indo-Ceylon Agreement.

For this purpose, the Ceylon Government will shortly place before Parliament a motion to amend the Constitution.

Of the 1,34,000 registered under the Indian and Pakistani Citizenship Act, about 50,000 are over 18 years of age. They were placed on the general electoral register following an amendment to the Constitution in 1959. This amendment was incorporated in the Constitution on the recommendation of a Parliamentary Select Committee headed by the former Premier, Mr. S. W. R. D. Bandaranaike.

Earlier, in terms of one of the provisions of the Indian and Pakistani Citizenship Act, people of Indian origin who were registered under the Act were placed on a separate electoral register for 10 years from 1954. But the 1959 amendment superseded that provision. During the March and July, 1960 general elections, the votes of these citizens of Indian origin, newly transferred to the general register, the deciding factor in several upcountry constituencies. The Government is now seeking to remove them again from the general electoral register.

In this separate General Elections they will have, the number to be elected may be limited to four or five.

Commenting on the move to have a separate electoral register for people of Indian origin, Mr. S. Thondaman, MP, who is a leader of the most influential trade union representing estate workers said: "One cannot imagine that a Government which has an international reputation for fighting the apartheid policies of South Africa would ever think of discriminating so blatantly against a section of its citizens. The move to oust 50,000 citizens from the electoral register is shocking. To say the least, what is contemplated is definitely against the spirit of the recent Delhi pact."

Mr. A. Aziz, President of the Democratic Workers' Congress, which represents mainly plantation workers of Indian origin, said that "it is reprehensible for the Prime Minister to go back on the spirit of the agreement when the ink has hardly dried on the signature."

He called the step "undemocratic and slightly uncivilized."

Criticism By Ceylon Democratic Workers' Congress:

The Ceylon Democratic Workers' Congress denounced on November 27 the Indo-Ceylonese Agreement on the future of people of Indian origin in Ceylon and charged its authors with treating the settlers as "a commodity rather than human beings in an effort to solve a political tangle."

The Congress, one of the two main organizations representing the interests of plantation workers of Indian origin, pointed out three defects in the Agreement:

(1) It contained a provision for compulsory repatriation which denied to the people the right to choose between Ceylonese and Indian nationality.

(2) The aim of a full and final settlement has not been achieved as the future of 1,50,000 people was still left in the balance.

(3) Even the future of the 8,25,000 people which it claimed to have settled was left in suspense for 15 years as they were denied their fundamental rights and their children employment rights during their stay in Ceylon, while the children of even those who were to be absorbed by Ceylon were not assured of these rights during the interim period.

In a resolution, the Congress appealed to the Governments of India and Ceylon to take these facts into consideration while hammering out a procedure for implementing the Agreement "so that the positive aspects of the Agreement could be realised."

The resolution assailed the Ceylonese Government for deciding to "repatriate such a large number of workers, not only throwing the principles of human justice to the winds but also failing to realize the dangers that might befall Ceylon's economy as a result of the departure of those able-bodied and well-equipped workers who would be an asset, particularly in view of the need for accelerating farm output."

The resolution made the following suggestions:

(1) Initially, people should be allowed to choose their nationality.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(2) If, in doing so, the numbers do not conform to the figures in the Agreement, the two Governments, in consultation with representatives of the "State-less," should devise a workable procedure to make up the difference either way.

(3) The Ceylon Government should grant citizenship to 3,00,000 people on completion of the prescribed register. The Government of India should issue Indian nationality certificates or other travel documents to the 5,25,000 persons to be repatriated to India.

(4) The people to be repatriated should have the right to leave for India if they so desire even in excess of the number arrived at on an evenly phased basis.

(5) The children of those remaining in Ceylon during the 15-year period or up to the age of 55 years as envisaged by the Agreement should be given every employment facility until their repatriation.

(6) People who desire to send their families or children for education to India in advance of their repatriation should be given facilities to make remittance from their earnings until their final departure.

(7) Those who are to be repatriated should be given facilities to travel freely between India and Ceylon pending their final departure.

(8) The Government of India should organize State-aided rehabilitation programmes for the repatriates.

Indian Reaction:

In New Delhi, official circles were surprised by Mrs. Bandaranaike's announcement that the Indian settlers to be granted Ceylonese citizenship would be placed on a separate electoral register, distinct from the general list of voters of Ceylon.

A Government spokesman said it violated the understanding reached between the two Prime Ministers in October, 1964 on the grant of Ceylonese citizenship to the people of Indian origin. The spirit underlying the Shastri-Bandaranaike Agreement was that these people would not be subjected to any kind of discrimination. But Mrs. Bandaranaike's statement implied that the Indian settlers to be granted Ceylonese citizenship would be constituted into a separate class of voters unable to participate in that country's general election on an equal footing with the rest of the population.

The announcement of the Ceylon Government's decision to maintain a separate register for citizens of Indian origin came in for bitter comment in India. Indian critics of the measure felt that the separate register would create a group of second class citizens.

Ceylon Clarification:

Following the criticisms, the First Secretary of the Ceylon High Commission in New Delhi, Mr. D. Samarasekera, gave the following clarification in a letter to the Indian Press:

"The Ceylon Government's proposal to place on a separate electoral register persons of Indian origin who have already been registered as Ceylon citizens under the Indian and Pakistani Residents (Citizenship) Act as well as those who are to be accepted as Ceylon citizens under the Indo-Ceylon Agreement of October 30, 1964 has been criticised in sections of the Indian Press as being discriminatory. It has even been implied that the proposal offends against the spirit of the recent Agreement.

"The High Commission for Ceylon in India would like to place the proposal in its correct perspective for the benefit of the Indian public, lest any misconception should provoke controversy and prejudice the smooth implementation of the Agreement of October 30, 1964.

"The proposal which is now impugned is not of recent origin. In January, 1954, the late Pandit Nehru agreed that all persons of Indian origin who are registered as Ceylon citizens under the Indian and Pakistani Residents (Citizenship) Act may be placed by the Government of Ceylon on a separate electoral register, particularly in view of the fact that the bulk of them do not speak the language of the area in which they reside. This arrangement was to last for a period of only ten years. On that occasion, the Government of Ceylon also agreed that 'in certain constituencies where the number of registered citizen voters is not likely to exceed 250, they shall be put on the national register.'

"The device of a separate electoral register far from being an odious form of discrimination could, in the case of closely-knit and homogeneous groups like the Indian community in Ceylon, give them the incalculable advantage of electing persons of their own choice and of their own group who would more effectively represent their special interests and aspirations and thereby vastly promote and accelerate the process of assimilation into the surrounding society.

"On the other hand, the inclusion of these persons in the general electoral register would diffuse and dissipate their voting strength to an extent that would completely obviate the hope and the possibility of direct and authoritative representation of their interests.

"Special representation of minority interests, secured through the exercise of the same franchise as is accorded to the general body of electors, and not through official nomination, is of the true essence of democracy. It should not be confused with communal representation of the type that was fostered under colonial legislatures. I can find no greater authority in support of this proposition than the Indian Constitution itself.

"In conclusion, **verbum sapienti**, persons of Indian origin who secure Ceylon citizenship will have exactly the same rights as other citizens of Ceylon, except that, for the time being, the voters among them will be on a separate electoral register."

CHINA

A. Mr. Chou En-lai's Visit To Moscow: The Prime Minister, Mr. Chou En-lai, arrived in Moscow on November 5 at the head of a seven-man party and Government delegation for talks with Soviet leaders and to attend the celebration of the 47th anniversary of the October Revolution.

Observers said the fact that Mr. Chou En-lai and not a lesser figure represented China was a significant development. The talks, it was stated, were made possible by the removal from power of Mr. N. Khruschev.

[Mr. Chou last visited Moscow in October, 1961, when he attended the 22nd Congress of the Soviet Communist Party. This was before the emergence of the Sino-Soviet dispute. The last time the Chinese and Soviet leaders held publicly announced meetings at a high level was in July, 1963 when a Chinese delegation spent more than two weeks in Moscow in fruitless talks with Mr. Mikhail Suslov, the chief Soviet ideologist.]

The Soviet Prime Minister, Mr. Alexei Kosygin, was at the airport to greet Mr. Chou and other members of the delegation, which included Marshal Ho Lung, a Deputy Prime Minister.

On the eve of the Chinese leader's arrival, **Pravda** re-affirmed Russia's view on peaceful co-existence, and the non-violent development of world communism. [China has claimed that dependent territories and peoples can be liberated and world socialism achieved only by warlike means. This has become one of the bitterest issues dividing the two Capitals.]

The article indicated that while the new Soviet leadership wanted to stem the flow of abuse and ideological argument between Peking and Moscow, it was not prepared to yield on their basic principle of peaceful co-existence.

The new Soviet regime appealed on November 6 to the leaders of world communism to discuss their differences at a new conference of communist parties.

Mr. L. Brezhnev, the Soviet party leader, made the appeal in an address to 6,000 party workers in the Kremlin.

Behind him, listening impassively, sat Mr. Chou En-lai, one of the men to whom the Soviet appeal was chiefly addressed.

Mr. Brezhnev re-iterated many of Mr. Khruschev's policies, including some which have been under attack by the Chinese. But he did so in carefully measured and conciliatory terms without polemical overtones. The potentially divisive passages of the speech were completely overshadowed by the emphasis on the need for unity within the communist camp.

The Soviet leaders considered it their "sacred duty" to strengthen the unity of the communist world, he said. The way to bring this about was to seek a common point of view. There was an "urgent necessity" for a new world conference of communist parties.

He repeatedly emphasized the equality of all members of the communist bloc and declared that no communist party or government should try to impose its will on other parties and countries.

He defended the past foreign policy of the Soviet Union as "consistent and immutable" as well as correct from the point of view of true Leninism. He listed the principal aspects of this foreign policy in the following order of priority: unity of the communist camp; friendship and support of the national liberation movements fighting against imperialism and colonialism; co-operation with the non-aligned States of Asia, Africa, and Latin America; peaceful co-existence; and "delivering mankind from war."

His speech contained the first reversal of a specific policy of Mr. Khruschev—a move to enhance the importance of private farming as an effective form of raising agricultural output and a decision to continue increased capital investment in agriculture and in farm implement and fertilizer factories as well as in retail trade and consumer services, long a neglected sector of the Soviet economy.

Acknowledging that "farm production still falls short of the growing requirements of our society", he declared: "It would be wrong to disregard the potentialities of private plots cultivated by collective farmers, industrial workers, and office employees to satisfy their personal requirements. Unwarranted limitations have been imposed in this sphere in recent years.... These limitations have now been removed."

Mr. Chou stared stonily ahead without applauding when Mr. Brezhnev expressed readiness to develop Soviet-American relations in the interests of world peace. He had joined vigorously in the general ap-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

plause when Mr. Brezhnev vowed to maintain " the glorious Soviet Army" at the highest level necessary for defence.

After visiting the Lenin mausoleum, Mr. Chou went to Stalin's grave in a gesture which underscored the fact that his visit in itself had not dispelled the basic ideological disagreement between the communist parties of the two countries. Stalinization is an important issue in the disagreement.

Talks With Soviet Leaders:

Mr. Chou En-lai's talks with Soviet leaders were held in utmost secrecy.

Moscow reports quoting a reliable Soviet source said on November 13 that Mr. Chou En-lai and the Soviet leaders had agreed to adjourn *sine die* the preparatory meeting of 26 Communist Parties scheduled for December, 1964.

The source added that the resumption of bilateral talks between representatives of the Soviet and Chinese Communist Parties in Peking early in 1965 had been envisaged. However, it was indicated that no definite decision had been taken on that point.

Mr. Chou En-lai left for Peking on November 13. His talks with the Russians on world Communist policy seemed to have taken some of the sting out of their ideological quarrel.

But a communique issued three hours before the Chinese were due to leave said that their talks with the Moscow leadership had proceeded in a "frank and comradely atmosphere."

The statement on the Sino-Soviet meetings, issued by Tass, said that the entire seven-man Chinese delegation, headed by Mr. Chou En-lai took part in the talks.

The Soviet side consisted of Mr. Leonid Brezhnev, Party leader, Mr. Alexei Kosygin, Prime Minister, the Soviet President, Mr. Anastas Mikoyan, Mr. Nikolai Podgorny, a leading member of the Soviet Party Presidium, Mr. Yuri Andropov and Mr. Boris Ponomarev, both experts in relations with other Communist parties, and Mr. Andrei Gromyko, Soviet Foreign Minister. (The New China News Agency also reported that meetings had taken place, and listed the participants, but without any remark on how the talks had gone).

The same day (November 13) Pravda underlined three aspects of Soviet Union's policy: its friendly ties with India, its support for the Partial Test Ban Treaty and non-proliferation of atomic weapons and its policy of peaceful co-existence with capitalist States.

It had been re-iterating almost every day the basic tenets of Soviet policy.

Observers said such re-iteration was a very clear indication that Russia was firm, despite the talks Mr. Chou was then having with the Soviet leaders.

[Prev. ref. 5376:CHI:A]

B. Mr. Dean Rusk On US Policy: The US Secretary of State, Mr. Dean Rusk, warned China on November 11 that if she was not prepared to leave her neighbours alone in South-East Asia "there is trouble ahead."

In a television interview, he said: "We have made it very clear we are not going to pull away and leave South-East Asia to be overrun by these people from the north."

There were no basic changes in US policy towards China. It would be up to the Chinese communists to change their policies before any relaxation of tensions could be affected.

He said: "We feel that they must come to the decision to leave these people alone in South-East Asia. If they do not, then there is trouble ahead. If they will, then there are not any problems there that cannot be solved by the ordinary processes of discussion with the nations of South-East Asia."

Asked in what circumstances it would be possible for USA to join China in disarmament talks, he said that the possibility of taking immediate steps that would open up prospects for serious talks leading to the reduction in arms "is not something on the immediate horizon."

He expressed the view that there was need for some progress in the disarmament talks already under way in Geneva. "We've seen very little interest on the part of Peking in disarmament".

As for the view that if China were admitted to United Nations it would be easier to deal with her, he said: "I am very doubtful about that. In the first place, the United Nations is not a reform school." China's militant doctrine and harsh policy had caused great problems within the Communist world itself, apart from the concern it had created in the 'free world.'

He re-affirmed that USA had no intention of turning over 11 million 'free' people of Formosa to the Chinese Communist regime. When this was made clear to Peking at the various Ambassadorial talks since 1955, the talks had produced no forward motion.

He said it was up to China to decide whether she was prepared to have peaceful relations with her neighbours and the rest of the world. "If they are not prepared to do so, I think we should not encourage them by rewarding them for a policy contrary to the prospects of peace."

He said that he had not seen much blue sky ahead in the attitude of Peking. China had attacked India, and was putting pressures on her neighbours in South-East Asia, and continued to refuse to renounce the use of force in the Formosa Straits.

Opposition To Sale Of British Aircraft To China:

A US State Department spokesman said in Washington on November 11 that USA remained opposed to the sale of aircraft to China by Britain.

The Press Officer, Mr. Robert J. McCloskey, commenting on Press reports that two British manufacturers were said to be trying to sell jets to China, said: "We are only aware of the Press report."

Asked if there was communication in the past between the US Government and Britain when a British firm sold Vickers Viscount short-range jet aircraft to China, he replied: "Yes, we stated our opposition to that transaction, which was in keeping with our policy of trade with China and the British Government is aware of our position." The US position remained unchanged.

Australia Suggests "Detente" With China:

Australia's Defence Minister, Mr. Paul Hasluck, said in London on November 12 that the first priority in Asia was to establish with China the same kind of *detente* which the Western allies had achieved with the Soviet Union.

Mr. Hasluck was in UK for talks with British Ministers and to attend the Colombo Plan Conference on November 17.

In a prepared statement he said world peace since the last War had depended mainly on a detente between the Soviet Union and the Western alliance, under which the countries of Europe had been able to prosper.

"Today in Asia, however, the actual and potential power of China and its aggressive policies pose enormous and growing problems to the whole world.

"In order to establish in Asia the sort of conditions under which Western Europe has developed in the past few years, we first must establish the same sort of detente with the Power that is the major cause of fear among the nations of Asia today."

He said the aim must be to give Asian countries the opportunity to develop their political, economic and social structures in the ways of their choosing without fear of aggression. Freedom from fear could not be achieved in Asia by a nuclear deterrent alone. There were many situations in Asia where nuclear arms would be irrelevant.

He added: "A combination of the nuclear deterrent and the carefully calculated use of conventional means of defence will be required for some time in Asia."

C. Skull Of Ape-man Found: A well-preserved skull of an ape-man believed to be 500,000 to 600,000 years old has been discovered at Kungwangling, about 36 miles from Sian, in Central China.

Peking Radio said that Chinese palaeontologists estimated that the skull and mammal fossils found with it belong to the early middle pleistocene period, possibly earlier than Peking Man, which is 400,000 to 500,000 years old.

(*The Times*, London)

INDIA

SUMMARY: Mr. Nehru's Birth Anniversary; Trade With Eastern Europe; Army Appointments; Northern Zonal Council Meeting.

A. Mr. J. Nehru's Birth Anniversary Celebrations: The late Prime Minister, Mr. J. Nehru's 75th birth anniversary was celebrated throughout the country on November 14.

On the occasion the President, Dr. S. Radhakrishnan released Jawaharlal Souvenir volumes at Vigyan Bhavan. The volumes entitled "Jawaharlal Nehru, a Pictorial Album", and "The Emerging World" were published by the Jawaharlal Nehru Souvenir Volumes Committee, headed by the Vice-President, Dr. Zakir Hussain.

Dr. Radhakrishnan said that what had stirred the young Nehru was Garibaldi, the Italian liberator, whose biography he had received as a good conduct prize while in school in England. Garibaldi had inspired Mr. Nehru to work for the freedom of his country. And when he returned from England he was attracted to Mahatma Gandhi who championed a novel way to attain freedom. Mr. Nehru then was an impetuous, angry young man, but Gandhiji "toned him down."

Dr. Radhakrishnan said Mr. Nehru had realized that political freedom would not be complete without ensuring economic and social equality. He turned to science as an instrument for the betterment of mankind. He wanted the people to cultivate a scientific approach to eradicate the various ills, social as well as economic.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The 260-page volume, "The Emerging World", contains articles from Dr. Radhakrishnan, Dr. Albert Schweitzer, Miss Pearl Buck, Mr. Ilya Ehrenburg and other distinguished personalities. The foreword was also written by Dr. Radhakrishnan.

A 40-minute film on Mr. Nehru's interview with an American in 1958 was also shown.

Mr. Lal Bahadur Shastri's Broadcast:

In a broadcast to the nation on November 14, the Prime Minister, Mr. Lal Bahadur Shastri said that it was only through science and technology that India could lift herself out of the centuries of stagnation and the depths of poverty.

At the same time, he said, it should not be forgotten that science and rationalism, divorced from human values, could produce ruthless efficiency symbolized by the atom bomb.

It was not enough to have the mind of a scientist if one did not have the heart of a humanitarian. It was the greatness of Mr. Nehru that he had them both.

He said that Mr. Nehru had only one thought in his approach to international problems—to promote peace. He did not take up positions calculated to help India in one way or another but rather he thought of humanity as a whole. The same peaceful approach was to be found even when India herself was a party to dispute.

"Twice in his life-time India was exposed to naked aggression. Even while fighting invaders with the force of arms and the gallantry of our soldiers he never abandoned the peaceful approach.

"He went to the UN over Pakistan's aggression. For Nehru no other course was possible, for he believed in peace and in settling international disputes through peaceful methods. 'We cannot be enemies for ever' he declared, referring to Pakistan in 1950. This is as true today as it was when he uttered it. And in the same spirit of peace he accepted the Colombo proposals regarding the Chinese invasion. We must, he used to say quoting Gandhi, look at international problems not with bloodshot eyes but with eyes which are clear.

"His scientific approach was not something different from his human approach, but it was an integral part of it. He was at once a visionary and a scientist."

Mr. Shastri added: "It will be for the youth of today to assume the responsibility tomorrow of running the affairs of this great country. And so, to the youth of the country on the 75th birth anniversary of Jawaharlalji, I say, the future is yours. Let the humanism and the scientific spirit which Jawaharlalji had in such abundance enrich your hearts, ennoble your minds and guide your actions."

(*The Statesman*, New Delhi)

[Prev. ref. 5879:INI:A]

B. Trade With East European Countries—Trade Delegation's Visit: A 25 per cent increase in India's trade with four East European countries is expected as a result of the recent visit of an Indian trade delegation to these countries.

The delegation, led by the Deputy Minister for Commerce, Mr. S. V. Ramaswamy, recently returned after a four-week tour of Czechoslovakia, Rumania, Bulgaria and Hungary.

Addressing a news conference in New Delhi on November 15, Mr. Ramaswamy described his mission as "fruitful" and said that he expected the trade with the four countries to go up from about Rs. 41.5 crores a year at present to Rs. 52 crores in 1965.

The delegation reviewed the working of the Trade Agreements with these countries and explored possibilities of increased trade in 1965.

The most important achievement of the delegation, according to Mr. Ramaswamy, was the interest it created in Eastern Europe for Indian heavy engineering goods, particularly railway wagons. Czechoslovakia wanted to buy about 1,500 wagons and a delegation from that country was already in India to work out the details of the deal. Hungary also was keen to buy Indian wagons and its delegation was due to arrive in India on November 19 for negotiations. These countries were impressed with the tremendous progress made by India in the field of industry and its capacity to export a variety of manufactured goods, chemical intermediates and equipment. For instance, Czechoslovakia had for the first time learnt with interest that India could export vitamin intermediates and hormone intermediates.

The trade with Czechoslovakia from January to October, 1964 was worth Rs. 15 crores each way. This was expected to go up to Rs. 24 crores in 1965.

Czechoslovakia had agreed to utilize all its funds in India for buying goods in this country.

India would buy from Czechoslovakia more tractor components and spare parts.

The trade with Rumania in the first nine months of 1964 was not up to expectations, but the delegation had completed arrangements for a step-up of purchases on both sides during the remaining months. The trade in 1965 was expected to be worth Rs. 8 crores, representing a 15 per cent increase. The delegation was able to strike a deal with Rumania for import by that country of Indian iron-ore worth Rs. 4.1 crores in 1965 as against Rs. 2.6 crores in 1964. Textile exports, including handlooms, from India would be worth Rs. 1.5 crores. India would buy from Rumania 10,000 tons of caustic soda, another 10,000 tons of heavy and light soda ash, urea worth Rs. 40,00,000 and axle oil for railways worth Rs. 90,00,000.

The trade with Bulgaria, worth about Rs. 4.5 crores each way now, was expected to rise to Rs. 5.5 crores in 1965. India would import zinc worth Rs. 30,00,000 and buy larger quantities of caprolactum, a raw material for making nylon. Bulgaria had agreed to import more iron-ore from India.

The trade with Hungary was likely to go up from Rs. 12 crores each way this year to Rs. 14.5 crores in 1965. India's exports would continue to be mainly cotton textiles, footwear, chemical products and engineering goods. Hungary would buy larger quantities of these in 1965.

(*The Times of India*, New Delhi)

[Prev. ref. 5750:INI:G]

C. Telephone Link With Malawi: According to a statement in Blantyre on November 14, Malawi has opened a direct telephone link with India.

Formerly, telephone calls to India were routed through Salisbury and London.

(*The Times of India*, New Delhi)

D. Imports Of Rock Phosphate—Agreement With Jordan: India and Jordan signed a long-term Agreement in Amman on November 15 providing for increased imports of rock phosphate into India.

The Agreement, valid till the end of 1967, also provides for an increase in the export of Indian goods to Jordan.

It was also agreed that an Indian mission should be established in Jordan shortly.

(*The Statesman*, New Delhi)

[Prev. ref. 5854:INI:E]

E. Diplomatic Appointments: Mr. Bhagwan Khemchand Massand, Indian High Commissioner to Australia, has been appointed Ambassador to Chile.

Mr. S. Krishnamurthi, Joint Secretary in the Central Finance Ministry, has been appointed High Commissioner to the Republic of Zambia.

Mr. Krishnamurthy (49) is expected to assume charge of his new assignment early in 1965.

(*The Statesman*, New Delhi)

[Prev. ref. 6102:INI:H]

F. Army Appointments: Lt.-Gen. S. H. F. J. Manekshaw took over on November 16 as General Officer Commanding-in-Chief, Eastern Command, in place of Lt.-Gen. P. P. Kumaramangalam.

Lt.-Gen. Kumaramangalam relinquished the post early in November to take over as the Deputy Chief of the Army Staff.

Lt.-Gen. Manekshaw was earlier General Officer Commanding-in-Chief, Western Command, at Simla.

(*The Times of India*, New Delhi)

[Prev. ref. 6029:INI:H]

G. Northern Zonal Council Meeting: Presiding over a meeting of the Northern Zonal Council in Jaipur on November 12 the Central Home Minister, Mr. Gulzari Lal Nanda, appealed to the States forming the Zone to make vigorous efforts to mobilize their financial and physical resources to meet the needs of the Fourth Five-Year Plan.

He said that efficient administration of Plan projects and raising of the standards of administration generally were indispensable for the realisation of the Plan targets.

As many of the problems facing this zone are inter-linked, he suggested that the entire area should be regarded as one region for the purpose of "forward planning."

He drew attention to floods and water-logging which had impeded the development of many areas in this region. He said that adequate provision should be made by the State Governments for flood control and anti-waterlogging measures.

He referred to the special development needs of the border hill areas and the work done there. While the development of these areas had been satisfactory, there were "shortfalls in key sectors of development, particularly under agriculture and irrigation."

He also referred to the serious food shortage in the country, the rise in the prices of essential commodities and the steps taken by the Central Government to curb profiteering.

The meeting was attended by the Chief Minister of the Punjab, Mr. Ram Kishen, the Home Minister, Mr. Darbara Singh, the Public Works Minister, Mr. Rizk Ram; the Premier of Jammu and Kashmir, Mr. G. M. Sadiq, Mr. G. L. Dogra, the Finance Minister of Kashmir, and Mr. Ayub Khan, Revenue Minister; the Rajasthan Chief Minister, Mr. Mohanlal Sukhadia, Mr. Mathura Das Mathur, the Planning Minister, Mr. Bal Krishna Kaul, the Finance Minister; Mr. Bhagwan Sahay, Lt-Governor of Himachal Pradesh; and Bawa Bachittar Singh, the Mayor of Delhi.

Decisions:

On November 12, the Council approved the recommendation of its

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Standing Committee to have uniform sales-tax in the member-States and replace sales-tax with additional excise duty.

It also accepted the recommendations of the Committee pertaining to uniformity in excise policy, including the limits of retail sale and private possession of liquor. But this would be subject to the restriction proposed by the representatives of Delhi that movement of liquor between Faridabad and Delhi, even to the extent of permissible limits of retail sale and private possession, should be regulated by permits.

The Council accepted all the recommendations made by the Chief Secretaries' Committee. One proposal was to establish three zonal institutions to impart training in revenue, police and accountancy to administrative service personnel of North Zone States.

It was tentatively decided to hold the next meeting of the Council in May-June, 1965 in Srinagar.

During the discussions the Punjab Chief Minister, Mr. Ram Kishen agreed to release 3 mw more of power to Kashmir.

He said that vehicles registered in Kashmir and plying on the Jammu-Pathankot road would be exempt from passenger and goods tax if Kashmir gave the same concession to Punjab vehicles.

The Lt-Governor of Himachal Pradesh, Mr. Bhagwan Sahay, said that in his territory the problem of corruption was not of such magnitude as to justify the establishment of a vigilance commission.

The Mayor of Delhi, Bawa Bachittar Singh, claimed that as a result of measures taken by the Government, most malpractices had ceased and the situation in Delhi had improved radically.

(*The Statesman*, New Delhi)

[Prev. ref. 3002(corrected):INI:E]

H. Plan For Modernization Of Railways: A New Delhi despatch on November 15 said that the Indian Railways proposed to go off steam in a phased programme of three to four decades.

A beginning would, however, be made with tapering off the manufacture of steam locomotives with a view to ceasing their production by 1970-71.

With growing accent on modernization of railways, the Railway Board was said to feel that steam locos should be replaced by diesel and electric locos, operationally more efficient and economical.

Railways in many advanced countries had gone ahead with the switchover, leaving James Watt's discovery of steam energy for other uses.

In India, a large coal-producing country, the switch-over was not that easy. It would take many years to manufacture the requisite number of diesel and electric locos for replacing steam locos.

However, the present idea is to reduce progressively the manufacture of steam locomotives at the Chittaranjan locomotive works and stop their production completely by the end of the Fourth Five-Year Plan.

The average life of a steam locomotive is about 40 years and reckoned on this basis, the Indian Railways should be off steam in the beginning of the next century.

Manufacture of steam locos at Chittaranjan began in 1950. The original target was to produce 96 broad-gauge main line goods locos. This target was subsequently raised to 169 locos a year. The revised target was reached in 1957-58 and even surpassed later.

At present, the Indian Railways have more than 10,600 steam locos against 349 diesel and 217 electric locos.

The limitations of steam energy are its low hauling capacity, limited speed, use of steam even when the train is not running, and longer time taken for acceleration and de-acceleration.

Even in the Second Five-Year Plan, the Railway Board found it necessary to resort to diesel and electric traction to cope with the phenomenal increase in freight traffic in the coal-steel belt in Eastern India.

By the end of the Third Five-Year Plan, the Railways are likely to operate about 500 diesels on the broad-gauge and 167 on the metre-gauge. It was estimated tentatively that in the Fourth Plan about 1,200 diesel locomotives (both B.G. and M.G.) would be required.

The Varanasi loco factory would go into production by 1967-68 and would produce 150 locos a year. Later it could produce up to 250 diesel locos a year. Hence, it was expected that the Railways' requirements would be met fully by this factory.

As regards electric locos, the Fourth Five-Year Plan requirements were estimated at 500 by 1970-71.

The Chittaranjan locomotive works has already turned out 21 DC electric locos and has taken up the manufacture of AC locos which will be required in larger numbers as the electrification programme is carried out. At present, the majority of the electric locos on the Railways are imported.

By the end of the current (Third) Plan period, Chittaranjan would have produced 90 electric locos. The rate of production by 1965-66 is likely to be 72 a year. Plans for expanding the production capacity to 150 electric locos a year are under consideration.

According to the Railway Board, one diesel or electric locomotive is equal to more than two steam locos in terms of efficiency. Hence, it was believed that if the Railways want to substitute diesel and electric locos for steam locos on all major lines, it could not be done in a few years.

It was stated that 70 per cent of the additional freight traffic in the Third Plan had been carried by diesel and electric locos and a major portion of the increased freight in the next Plan period would also be carried by these.

At present, the Railways are putting diesel and electric locos to use mainly for freight traffic, but the day is not far off when even long-distance passenger trains will be hauled by these locos.

The motto of the Railways, according to the Railway Board, is to assure passengers "travel without tears."

(*The Times of India*, New Delhi)

[Prev. ref. 5056:INI:O]

I. Kiriburu Iron-ore Project Inaugurated: The Vice-President, Dr. Zakir Hussain, inaugurated in Kiriburu (Orissa) on November 12 the Kiriburu iron-ore project, one of India's most modern and mechanized ore mining institutions designed to boost up the country's export trade.

Mr. N. Sanjiva Reddi, the Central Minister for Steel and Mines, who welcomed the guests, requested the Japanese delegation leader to consider the possibility of starting a steel plant in India with Japanese aid.

Speaking on the occasion, Mr. Leonid Weiss, Counseller for Economic Affairs, US Embassy in India, said that India's iron reserves were eight times more than those of USA. India had great and rich reserves of iron-ore which could make a great contribution to the development of the country's economy.

The President, Dr. S. Radhakrishnan in a message to the National Mineral Development Corporation and those who had contributed to the fulfilment of the project said: "The execution of a scheme of such magnitude in so remote an area is an achievement of which those who have contributed to bringing this project to fulfilment can justly be proud."

He added: "The long-term arrangement for the supply of ore to Japan will be a further link between our two countries to the mutual benefit."

The Prime Minister, Mr. Lal Bahadur Shastri, said in a message that the Kiriburu project was an "outstanding example of international co-operation" and expressed the hope that the completion of the project would further foster and strengthen India's trade relations with Japan.

He added: "The Kiriburu iron-ore mine is a part of a multi-purpose project involving the expansion of port facilities at Visakhapatnam and provision of rail links over a distance of 200 km and is an outstanding example of international co-operation with financial assistance in the form of yen credit from Japan and a loan from the US President's fund for Asian economic development."

He congratulated the National Mineral Development Corporation and the staff and workers of the Kiriburu project on the successful completion of the project.

[Prev. ref. 5777:INI:Q]

J. Nagaland An "Independent" State—Rebel Leaders' Claim: Rebel Naga leaders claimed on November 16 that Nagaland had never been part of India and should be considered a sovereign, independent State.

In a letter given to the Naga Peace Mission, they said that the area had been forcibly annexed by the British Army, and it could not be claimed that the right of conquest had been transferred from Britain to India.

They added: "We have never been conquered by the Indian Army or ruled by the Indian Government."

They said that if the Government of India could not agree to the claim of independence, it should be referred to the International Court of Justice or any other international body by India or any other nation.

The letter, signed by all three rebel leaders taking part in the Chedema peace talks, was in reply to a request by the leader of the Central Government delegation, Mr. Y. D. Gundevia, to state the terms which could be considered for a political settlement.

The three-page reply contained the following 12 points:

"(1) Our right of self-determination belongs to us separately as a people of sovereign independence from the same British imperialism which first overpowered Naga resistance a century ago. Up to that time the Naga people had never been conquered. Their territory had never been conquered. It was forcibly annexed by the British.

"(2) We declared our determination to be independent before the grant of independence to India in 1947. We were never conquered by the Indian Army or ruled by the Indian Government.

"(3) Since 1947, in spite of all the bloodshed and violence that has been inflicted upon us by the Indian armed forces, we have not been conquered by the Indian Army, nor can it be claimed that the right of conquest was transferred from the British to India.

"(4) One of the declared principles for which World War II was fought and was enshrined in the Atlantic Charter was that populations could not be transferred from the jurisdiction of one State to another without their consent. This is a

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

principle which has been vindicated by the UN in subsequent emancipations of people from imperialism and colonialism in Asia, Africa and South America.

"(5) Therefore, in demanding recognition of our independence, we are demanding nothing more than what India herself demanded and herself heroically struggled for under the historic slogan of Swaraj.

"(6) The tale of suffering and violence that has followed in the wake of India's attempt to subjugate the Naga people and to rule their territory by military occupation has been told in many documents submitted by us to the Nagaland peace mission and by scores of villages all over Nagaland visited by Rev. Michael Scott and some of them visited by Mr. Chaliha and Mr. J. P. Narayan.

"(7) We have asked that these documents be reproduced and communicated to the Government of India delegation together with the report and comments of Mr. Scott as those of an outside observer, and, if they wish to make them, those of Mr. Chaliha and Mr. Narayan as Indians of well-known integrity and independence of view.

"(8) Many of the documents referred to above represent the tragedy of Nagaland since India's independence which has not yet been told. It should be told, for without it the side depicted by the chief delegate of Government of India at Chedema would, to say the least, be incomplete.

"(9) The consequences of suppressing the truth of what has been happening in Nagaland during these past years have been tragic, not only for the Nagas but for the Indian people also, and have nullified so much of effort and material wealth which have been expended in Nagaland in an endeavour to vindicate the name and prestige of sovereign, independent India.

"(10) By devices of legal sophistry, it may be argued that the Naga people's sovereignty was transferred by Acts of British Parliament to that of India, in which the Naga people were not represented, but this would not be in accordance with moral right with the experience of history or with the concept of sovereignty accepted by international jurists today.

"(11) If this is denied, let India herself in the name of justice and peace submit this case to the International Court of Justice or let any nation among those concerned in the UN to uphold the right of peoples to self-determination submit the matter to an international body for an advisory opinion or an adjudication of any matter which must surely be a matter of great consequence to humanity in the necessary task of bringing the rights of peoples within the scope of rule of law and if bringing the right of self-determination of deprived peoples within the reach of those people by peaceful procedures.

"(12) Whatever be the outcome of our long political conflict with India at such human cost, peace and people's (rights) everywhere will still require to be vindicated. To this end our struggle (whether by war or law) will, we trust, have played some part."

Sardar Swaran Singh's Comment:

The Minister for External Affairs, Sardar Swaran Singh, said on November 17 that the claim made by Naga hostile leaders that the Naga region had never been a part of India was absolutely intolerable and would never be accepted by the Government.

He told the Rajya Sabha that he was waiting for official information about the Naga hostile leaders' letter embodying this claim and the demand for complete independence, which had been handed over to the Peace Mission in Nagaland. After finding out the exact stand of the hostiles, the Government would take a considered decision on the question.

He was replying to a series of indignant questions on the report regarding the hostile leaders' letter to the peace mission. Mr. A. B. Vajpayee (Jan Sangh) also asked how more than 1,000 armed Nagas managed to cross into Pakistan recently. Sardar Swaran Singh said he had no information that the armed rebels had actually crossed into East Pakistan. It was reported that they were trying to do so. If anything of this kind happened, it would be a flagrant violation of the peace terms.

He said that during the negotiations the peace terms had, by and large, been observed. However, some complaints of intimidation of peaceful Nagas by the hostile elements had been received. A strong warning was then given that such intimidation would not be tolerated.

Sardar Swaran Singh stated in the Lok Sabha on November 18 in reply to a call-attention notice by 20 members that the talks between the hostiles and a Government of India Mission at Chedema had not broken down. He pleaded with the members not to press for a pronouncement until after the next round of talks which were due to be held some time after November 27.

He affirmed having received a letter from the Naga underground leaders demanding an independent and sovereign Nagaland. But he categorically declared that such a demand was untenable. He also turned down the hostiles' demand for third party observers at the Chedema peace talks.

No Affinity Between Nagas And Indians—Rev. M. Scott's Allegation:

In a statement on November 17, Rev. Michael Scott drew a distinction between Nagas and Indians as two different people.

He said that violent means of conflict had brought about what he described as a tragic dilemma that had existed between the Nagas and the Indians for so long.

He justified the underground Nagas having brought in the element of international ethics in consideration of the problem.

He called the cease-fire agreement between the Government of India and the underground Nagas as an international cease-fire agreement.

He said that despite complaints from both sides regarding the observance of cease-fire and conditions of the agreement, "it must be in fairness of things that not a shot has been fired by either side and this is a marked contrast to the observance of cease-fire agreements elsewhere in the world."

Mr. Lal Bahadur Shastri's Comment:

The Prime Minister, Mr. Lal Bahadur Shastri, said in Lucknow on November 16 that Rev. Michael Scott's statement that there was no affinity between Indians and Nagas defeated the very purpose of peace efforts in Nagaland.

He said that he took "strong exception" to Rev. Scott's statement and added that he would inquire about it when Rev. Scott returned from Kohima.

He said that Rev. Scott, being a member of the Peace Mission, "cannot make such a statement."

He appealed to the Naga leaders to give serious thought to the question of Nagaland before the peace talks broke down.

He assured them that his Government was desirous of settling the dispute peacefully across the table.

He said, "He (Rev. Scott) is one of the members of the Peace Mission along with Mr. Jaya Prakash Narayan and the Chief Minister of Assam, Mr. Chaliha. He is not there in an individual capacity and hence he cannot make such statements as in that case he defeats the very purpose of peace efforts. I shall ask Rev. Scott about it when he returns from the mission."

He said that Nagaland was part and parcel of India. "We have accepted it as a State like other States in the Indian Union. It will have an Assembly duly elected and we have also assured the Nagas to protect their culture."

He said that India was keen on solving the question of Nagaland by peaceful means and negotiations and the Naga leaders would commit "a blunder" if they ignored India's peace efforts. "I am told that there are two sections of the Nagas and the one in the majority is in favour of a peaceful settlement in the interests of the people. But the other section is reported to have crossed over to Burma and other places to get some arms. In an armed conflict the border guards may fight but the people in general suffer.

"I do feel that the Naga leaders will think seriously over the problem before the peace talks break down."

He added that during the lifetime of the late Prime Minister, negotiations with the Naga leaders had started and in recent days they had made much headway. "I want to assure the Nagas that we are desirous of settling disputes peacefully across the table and this is the only democratic way to settle a dispute."

Area Between Kohima And International Boundary Declared "Disturbed":

The Governor of Nagaland has declared the area between Kohima and the international boundary "to be a disturbed area".

The recent crossing of 1,300 Naga hostiles to East Pakistan was viewed with serious concern both by the Government and the Nagaland Peace Mission.

The Chief Commissioner of Manipur by an order on November 19 declared the whole area of Ukhrul sub-division, three miles from the international border, to be a disturbed area for a period of two months with immediate effect.

K. Mr. K. R. Arya Appointed Minister In Rajasthan Cabinet: Mr. Kumbha Ram Arya was sworn-in on November 14 as a Minister in the Rajasthan Cabinet by the Governor, Dr Sampurnanand, at Raj Bhavan in Jaipur.

The Sukhadia Ministry now has nine Ministers and 10 Deputy Ministers.

Mr. Arya was allotted the portfolios of Revenue and Relief and Rehabilitation. The Revenue portfolio had been held by Mr. Sukhadia and the Relief and Rehabilitation Department under the charge of Mr. Bhika Bhai.

Mr. Arya was recently elected to the State Legislative Assembly in a by-election.

While no major re-shuffle of portfolios was made, the Transport Department was transferred from Mr. Haribhau Upadhyaya to the Minister of Planning, Mr. Mathura Das Mathur.

Mr. Mathur also took over the Printing and Stationery Department from Mr.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

N. **Sangeet Natak Akademi Awards:** *The President, Dr. S. Radhakrishnan, distributed the Sangeet Natak Akademi's annual awards to eminent artistes at a function in New Delhi on November 12.*

While complimenting the award-winners, he asked them not merely to guard the country's artistic inheritance but to advance it.

Birju Maharaj, at 27, was the youngest recipient of the Sangeet Natak Akademi's award this year. The oldest award-winner, K. N. Chinnaswamy Iyer (82), could not attend the function.

There was one woman among the new fellows and one among the award-winners.

The following were the new fellows of the Akademi:

Mr. P. V. Rajamannar (63), Chairman of the Sangeet Natak Akademi from 1953 to 1961; Mr. T. L. Venkatarama Aiyer (71), an eminent musicologist; Dr. V. Raghavan (56), Professor of Sanskrit at Madras University; Mr. Birendra Kishore Roy Choudhury (61), musician and musicologist; Mr. B. R. Deodhar (62), Chairman of the Gandharva Mahavidyalaya Mandal; and Mrs. C. Saraswathi Bai (70), one of the foremost exponents of Harikatha Kalakshepam.

The award-winners were: Birju Maharaj (27), Kathak; Haradi Rama Ganiga (62), Yakshagana; Mrs. K. Venkatalakshamma (58), Bharata Natyam; P. Mani Madhava Chakiar (65), Chakiar Koothu; Keshav Trimbak Date (75), stage acting; T. S. Rajamanikkam (58), direction; Rahimuddin Dagar (63) and Chittoor Subramanyam (64), vocal music; and K. N. Chinnaswamy Iyer (82), instrumental music.

Shivkumar Joshi (48), Vasant Shankar Kanetkar (41) and Gopala Rao Amancharia (57) received prizes in play-writing.

INDONESIA

A. **New Indonesian Company In Amsterdam:** A formal ceremony was held in Amsterdam on October 8 to mark the founding of a new company which would act as the central chartering office for ships on behalf of Indonesian shipping.

Partners in the company are the Department of Central Bank Affairs, the Department of Trade, the Department of Sea Communications, the Central Trading Company at Hamburg, Initrade at Rome and Indonesische Fracht GMBH at Dusseldorf.

The company's capital will be about 1,000,000 guilders of which about 400,000 guilders will be issued immediately.

The head office will be at Amsterdam and eventually branch offices will be established elsewhere in Europe.

(*Information Service Indonesia*)

[Prev. ref. 6069:IND:A]

B. **British Nationals Advised To Leave:** The British Government has advised British subjects to consider whether they should remain in Indonesia.

A British Foreign Office spokesman said on November 13: "In the light of recent events in South-East Asia, the British Government has for some time been advising British subjects to consider whether they should remain in Indonesia or make arrangements for their wives and children to return to the United Kingdom.

"This was a routine measure of precaution.

"The British Government has no desire to exacerbate relations in the area but has a duty to protect and advise British subjects living overseas."

Authoritative British sources said that it was not the British Government's intention to encourage British subjects, engaged in essential services in Indonesia, to leave for home.

The sources said that the advice was given in September, 1964 after the Security Council debated the Indonesian "confrontation" policy against Malaysia.

Asked why the advice had not been made public, the sources said that the British Government was anxious to avoid exacerbating the situation and increasing tension. The British Government, therefore, did not give a public warning but merely conveyed it discreetly to British subjects in Indonesia.

The sources said that as a result of British advice a number of British subjects had made private arrangements to leave.

The sources said that the number of British subjects in Indonesia, including those in the British Embassy, at the end of July was 752. At the end of September, the total was 443.

[Prev. ref. 6043:IND:A]

JAPAN

A. **Mr. Eisaku Sato Elected Prime Minister:** Mr. Eisaku Sato was elected on November 9 Prime Minister by the Diet in succession to Mr. Hayato Ikeda, who had resigned after four years and four months in office (see page 6169) because of a throat tumour.

Mr. Sato announced on November 9 that he was keeping the Cabinet unchanged, except for the post of Chief Cabinet Secretary, to be assumed by Mr. Tomisaburo Hashimoto.

Mr. Ichiro Kono, Mr. Sato's closest rival for the succession, remained a State Minister, when some had expected him to become Deputy Prime Minister, and the third candidate, Mr. Aiichiro Fujiyama was left out altogether.

Informed sources said that the speed with which the Cabinet was formed was partly to forestall further factional pressure within the Liberal-Democratic Party, already divided by the struggle for succession.

Mr. Sato was born 63 years ago into a middle-class family, the second son of a sake brewer in Tabuse, a small town on the Inland Sea coast. He was a colleague at high school of Mr. Hayato Ikeda, though their paths soon parted—Mr. Ikeda going into the Finance Ministry, and Mr. Sato graduating in law at Tokyo University to enter the less glamorous Ministry of Railways. He stayed there for the next 28 years, marrying the niece of Mr. Matsuoka, Foreign Minister in the Konoye Cabinet who walked out of the League of Nations and signed the Axis pact.

While his brother, Mr. Nobusuke Kishi became a wartime Minister, Mr. Sato stayed on unnoticed in the railways. After 1945, amid the purges of General MacArthur's occupation, came Mr. Sato's chance for rapid promotion. He became Deputy Minister for Transport and had such success in negotiating with and calming turbulent railwaymen that he was offered a chance of a Diet seat by the Socialists then in power. Mr. Sato declined, and soon afterwards, on the fall of the Socialists, was picked out—along with Mr. Ikeda—by Mr. Yoshida, the conservative elder statesman, to be Cabinet Secretary.

Under such a patron he has hardly ever looked back. He was elected to the Diet in 1949 and held a succession of ministerial and party posts—the latter are often promotions in Japan.

In 1954 the Public Procurator sought to question him in connexion with a shipbuilding bribery case, but Mr. Yoshida, then Prime Minister, exercised the Government's right to waive proceedings, even though this case, with others, led to the final downfall of the Yoshida Cabinet. Once the Diet session was over the Government relaxed its waiver, and interrogations continued sporadically until an amnesty for political offences marked Japan's entry into United Nations in 1956.

Mr. Sato stayed loyal to Mr. Yoshida in the party wilderness and accompanied him on his world tour in 1954. When his brother gained power in 1957 Mr. Sato at last joined the Liberal Democratic Party (formed in 1955) and the Government. Until Mr. Kishi's fall in 1960 he was a pillar of the Cabinet, and during his two years as Finance Minister was known as Mr. Kishi's "chief of staff".

In spite of his close association with his brother's handling of the Security Treaty ratification, which led directly to the rioting in 1960, such are the ways of Japanese politics that Mr. Sato was able to contend the succession with Mr. Ikeda. He did so unsuccessfully again this year, and gained his chance through Mr. Ikeda's untimely illness.

During the Ikeda administration he served two years as Minister of International Trade and Industry, and then as Minister of State in charge of science, technology, atomic energy, Hokkaido development, and Olympic affairs—a multifarious post which he lost after his defeat in this Summer's party election.

Policy Statement: A prompt assertion that Japan would have a stronger voice in international affairs came on November 10 from Mr. Sato, the new Prime Minister.

At his first news conference, his assertions were mostly implicit, as he was at pains to proclaim his adherence, with nuances, to Mr. Ikeda's policies.

He made it clear enough, however, in answer to several questions that he felt that Japan's voice had not hitherto been in proportion to its economic strength. He did not think it was enough to leave the balance of peace with the nuclear guardians.

"Japan, Canada and West European countries which do not possess their own nuclear weapons should make more use of their right to a say in the international sphere", he said. "It is here that our own foreign policies have scope for development."

He mentioned Asia specifically as one area which Japan should no longer regard from purely the trade point of view; instead it should realize that efforts to reduce world tensions there were urgently needed. He listed China and normal relations with South Korea as his Cabinet's most pressing problems.

He regretted the Chinese atomic test. He said he was not denouncing China for it, but wondered why it had not utilized its scientific efforts in the cause of peace. However, if China, through being a member of the nuclear club, could contribute to relaxing tensions, he thought that might be a good idea.

To say there were two Chinas would be an interference in domestic policies, he said. Japan also had a Peace Treaty with the Nationalist regime—"whether fortunately or unfortunately, I do not know". They would not forget General Chiang Kai-shek's generosity towards Japan after the last War, "but we should not deal with this problem by sentiment alone".

Economic and cultural exchanges with Peking would be advanced, but "the basic issues are difficult" and could not be discussed lightly.

He was unimpressed by recent Left-wing demonstrations with a firm statement that the visit of the US nuclear-powered submarines "is quite natural", now that Japan had been assured that there were no radio-active hazards, or at least that none would go undetected.

Unexpectedly he went out of his way to commend as respectable the condemnation by the Japan Socialist Party in China recently of all nuclear tests. This never emerged in the Joint Statement in Peking (see page 6171). Mr. Sato said it provided common ground for talks on the matter with the Government.

He gave a firm commitment that he would never allow nuclear weapons to be brought into Japan; he denied that he would be high-handed with the Opposition; and he promised he would add "harmony" to the Ikeda doctrines of "patience and tolerance".

(*The Times*, London and *The Japan Times*, Tokyo)

B. Demonstrations Against Visit Of N-powered Submarine: Demonstrations were held throughout Japan by Socialists and students on November 12 protesting against the first visit to the country of a US nuclear-powered submarine.

The 2,552-ton Sea Dragon nosed her way through heavy rain to dock at the Tokyo base.

As 1,800 policemen dealt with some 2,000 Socialists and students outside the base, demonstrators in Tokyo broke the windows of armoured police cars and blocked traffic on main streets.

The national police estimated that about 27,000 Left-wingers staged demonstrations in 23 other Japanese cities.

They said that 37 policemen were hurt, many of them by flying stones, 34 students were arrested and at least nine students injured.

About 12,000 persons attended a protest rally in Tokyo organized by Communist-led organizations. The crowd marched without incident through the streets to the Diet building to submit petitions against the Sea Dragon's visit.

Thirteen armoured cars blocked the three main gates of the park where the rally was held.

In Kobe, about 3,700 students clashed with 800 policemen guarding the United States Consulate. The police said that 18 policemen were slightly injured and 16 students arrested.

Organizers of the demonstrations alleged that visits by nuclear-powered submarines were the first step towards the introduction of nuclear weapons into Japan.

(*The Statesman*, Calcutta)

[Prev. ref. 6058:JAP:A]

C. Shipping Incentive: The Japanese Government is planning to introduce direct tax reductions in 1965 for domestic importers who favour Japanese-owned shipping.

The incentives disclosed on November 4 envisage a budgetary tax cut of some 4,000 million yen which would be made through exemptions on profits for those firms preferring to "ship Japanese".

One example cited is that oil and steel concerns which imported more than half their foreign needs in Japanese vessels would enjoy tax exemptions on profits equivalent to 10 per cent of the freight charges.

The move is yet another intended to reduce Japan's chronic $350 million annual freight account deficit, which forms a large part of the overall invisible trade deficit. There is some doubt how far this proposal, which departs from previous practices of tax postponement, can be aligned with international commitments and national tax requirements.

It is probably being aired to sound reactions of foreign shipowners, who are likely to feel increasingly sharp competition in this flourishing trade as the Japanese fleet grows rapidly.

(*The Times*, London)

[Prev. ref. 5849:JAP:B]

D. Rise In Exports: Japan's October (1964) exports rose to a new post-War high of $691,580,000, according to statistics based on bank certification of export declarations, exceeding the previous record of $652,707,000 reached three months earlier.

Exports during October were 10.2 per cent above the previous month and 29.1 per cent over the same month of 1963.

The improvement was attributed chiefly to a steady growth in sales to the United States, a sharp advance in exports to the Soviet Union and Australia, active ship deals and smooth progress in sales of chemical fertilizers, machinery, steel products, and man-made textiles.

The Trade Ministry said it was expecting a decline of about $5 million in exports to Britain as a result of the import surcharge. Total exports in the current financial year ending March 31, 1965 were likely to reach about $7,200 million.

(*The Japan Times*, Tokyo)

[Prev. ref. 6125:JAP:D]

E. Expulsions From Communist Party: The Japan Communist Party's organ *Akahata* (*Red Flag*) announced on November 12 the expulsion from the party of 10 members who had criticized its pro-Peking trend.

Twelve members, signing themselves as "a cultural group", had issued statements criticising the party leadership for "extremist prejudices and bureaucratic leadership", pointing to its toeing of the Chinese line.

Two of them, Mr. Arata Togo, a sculptor, and Mr. Miyajina, a movie cameraman, had since then agreed to undertake "self-criticism" and had been forgiven.

Those expelled included Dr. Akashitide, philosopher and former professor at Tokyo University, Mr. Hiroshi Roma, a novelist well-known for his description of life in the old imperial army, and Miss Ineko Sata, also a writer.

(*The Statesman*, Calcutta)

[Prev. ref. 5996:JAP:A]

KOREA (South)

A. British Assistance For Nuclear Project Sought: The Minister for Industry, Mr. Chung Hun Pak, said in Seoul on November 28 that South Korea wanted British help in building a nuclear power plant by 1970.

He was speaking before he left at the head of an economic mission on a 40-day visit to Europe.

He said he would ask for assistance in the nuclear power project in formal talks with British officials.

(*The Times*, London)

LAOS

A. Alleged Military Provocations —Soviet Accusation Against USA: On November 10 *Izvestia* accused USA of increasing military provocations in Laos and instigating the preparation of a major Rightist offensive.

In an article entitled "Who is stirring up trouble?" Izvestia said: "Disturbing news is coming from Laos. Recently, USA and its agents have increased military provocations directed against the Neo Lao Haksat (pro-Communist Pathet Lao troops) and against the population living in the regions controlled by patriotic forces.

"As is stressed by the statement of the Neo Lao Haksat Armed Forces High Command, the Rightist group, acting in co-operation with South Viet-Namese authorities and at the direct instigation of the Americans, is now launched on the preparation of a major offensive in central and southern Laos."

Izvestia cited Neo Lao Haksat statements and the charge of increased activity by US planes based in Laos and South Viet-Nam and infantry concentrations by the Laotian Rightists.

It quoted the Neo Lao Haksat statement that these operations "represent a serious violation of the cease-fire order of June 24, 1962."

MALAYSIA

A. Tengku Abdul Rehman's Retaliation Warning To Indonesia: In a statement in the November 8 issue of *Merdeka*, the official organ of the United Malay National Organization (UMNO), the Prime Minister, Tengku Abdul Rehman, gave a warning of immediate retaliation if Indonesia bombed Malaysia and declared: "The time has come when blood must be repaid with blood."

He said that during the leaflet drop on Indonesian bases, the Djakarta regime's claims of heavy aerial defences had proved to be empty. Indonesian forward bases could have been easily destroyed. Members of the Royal Malaysian Air Force, who dropped the pamphlets, had appealed to him for a bigger role in facing Indonesian aggression. Indonesia might try to drop leaflets in Malaysia but if the Indonesian leaders lost their heads "they might even bomb us and we shall retaliate immediately." Anti-aircraft gun sites had been established round Kuala Lumpur and their state of readiness had been tested at the week-end.

Letter To Security Council:

Meanwhile, the following letter was delivered by Malaysia's Ambassador to USA, Dato Ong Yoke Lin, to the President of the Security Council on October 31:

"I have the honour on the instructions of my Government to submit to you for the information of the Security Council details of further acts of blatant and inexcusable aggression committed by Indonesia against Malaysia since the conclusion on September 17, 1964 of the Security Council debate on my Government's complaint of Indonesian aggression. These details are set out in the attached annexure.

"I regret to have to address you again on this matter so soon after the Security Council had considered my Government's complaint of September 3, but my Government has found it necessary to draw the Council's attention to the increasingly grave and dangerous situation created by the continuing and deliberate acts in the landing by sea of an estimated number of 55 heavily armed invaders in the early morning of October 29, on the border between the states of Johore and Malacca on the south-west coast of mainland Malaysia.

"These acts of barefaced aggression are in violent contravention of the United Nations Charter and constitute a cynical defiance of the provisions of the Norwegian draft resolution which was endorsed by nine out of the 11 Security Council members at its 1152nd meeting on September 17, 1964. In committing these acts, Indonesia is furthermore violating the principles of the Charter of the Organization of African Unity, of the Bandung Declaration and of the Declaration of the Conference of Non-Aligned Countries of October 10, 1964, all of which call upon States to refrain from the threat or use of force and to respect the territorial integrity and political independence of other States.

"In drawing the Security Council's attention to this grave situation my Government wishes in particular to emphasize that there is mounting evidence that Indonesia is determined to continue its policy of armed aggression against Malaysia, thereby provoking the people of Malaysia and wantonly increasing the risk of major hostilities in the region.

"I should be grateful if this letter together with its annexure is published as a Security Council document."

Three lists were attached to the letter giving details of alleged Indonesian aggression and capture of Indonesian arms.

Re-iteration Of British Support:

Speaking at the annual luncheon in London of the Malaysian Commercial Association, an organization of British companies trading in Malaysia, the Minister of State for Commonwealth Relations, Mr. Cledwyn Hughes, declared on November 12 that Britain was determined to go on supporting Malaysia in her struggle to maintain her independence and territorial integrity in the face of Indonesian attacks.

He said that Malaysia knew she could count on the sympathetic support of the Commonwealth as a whole, and on the direct and active assistance of Britain, Australia and New Zealand.

Dealing with Indonesia's "confrontation" policy against Malaysia, he described the last Indonesian landing on the mainland of Malaya as "a fiasco". Virtually the entire band of 52 men, more than half of them paratroops of the Indonesian Air Force, were successfully mopped up within 36 hours.

"But fiasco or not," he added, "this fresh attempt was, as the Malaysian Government put it in their letter to the United Nations Security Council, a 'cynical defiance' of the overwhelming consensus of the Security Council as expressed in the resolution vetoed by the Russians when the Council met in September to consider Malaysia's complaint about the earlier landings.

"I wish I could say that I could foresee an early solution to the problem created by Indonesia's hostility towards Malaysia. The quarrel is not one of Malaysia's making nor of ours, but a solution can only flow from the calling off of 'confrontation', and this will require an Indonesian change of heart, of which we can see no sign as yet.

"Meanwhile, we have our obligations to discharge. As the Foreign Secretary said in a statement to British journalists on October 22, we are not trying to determine what will happen in that part of the world, but we are determined to go on supporting Malaysia in her struggle to maintain her independence and territorial integrity against Indonesia attacks.

"We have a Treaty obligation to assist our Commonwealth partner in her external defence, and we mean to discharge this. Malaysia may not be one of the most powerful of nations in the military sense, but she knows that she can count on the sympathetic support of the Commonwealth as a whole, and on the direct and active assistance not only of ourselves but of Australia and New Zealand too."

B. Philippines' Claim To Sabah—Sabah Assembly Votes Against Talks: The Sabah Legislative Assembly unanimously passed a motion on November 2 urging the Central Government not to engage in further talks with the Philippines over its claim to Sabah.

The Assembly unanimously put on record that the people of Sabah had chosen to link their destiny with that of Malaysia and that their decision was irrevocable.

The motion was moved by the Chief Minister, Dato Donald Stephens who said the claim had no legal basis. The motion was supported strongly by other Assemblymen.

The motion read: "The Assembly having taken note of exchanges that have been taking place in recent months regarding sovereignty of this State between the Central Government of Malaysia and the Government of Philippines Republic expresses its concern that notwithstanding the clear voices in which the people of Sabah in whom alone that sovereignty rests have on more than one occasion in the past spoken directly and through their elected representatives in this Assembly that they have irrevocably taken decision to join Malaysia as a constituent State these exchanges are permitted by the Central Government to take place.

"This Assembly now once again places on record its unshakeable conviction that the people of Sabah have already chosen to link their destiny with that of Malaysia and that this decision is irrevocable, whatever theoretical claims to sovereignty over Sabah is alleged by any other state to exist in itself; that this Assembly further requests the Central Government in Kuala Lumpur not to engage in any talks with any State designed directly or indirectly to modify or nullify this irrevocable decision of the people of Sabah who are sovereign in their own State."

NEPAL

A. Dr. Tulsi Giri's Visit To Yugoslavia: A joint *communique* issued in Belgrade on November 6 at the end of the Chairman of the Nepal Council of Ministers, Dr. Tulsi Giri's seven-day visit to Yugoslavia said that President J. B. Tito had accepted an invitation to visit Nepal.

The communique said that Yugoslavia and Nepal had decided to raise their diplomatic missions to Embassy rank.

It supported the proposal for a World Disarmament Conference under UN auspices and stressed the need for greater efforts to achieve general and total disarmament.

It also welcomed the Moscow Agreement on a limited test ban and suggested that all the Governments should join it.

During the talks, Mr. Peter Stambolic, President of the Federal Executive Council, and Dr. Tulsi Giri emphasized the significance of United Nations for the non-aligned countries and said the world Organization should be adapted to the changing world situation.

B. "Ganesh" Peak Climbed By Japanese Expedition: Five members of the Kyoto University Himalayan expedition were reported on November 8 to have climbed the 7,200-metre-high *Ganesh* Peak.

The climbers reached the summit, known as **Annapurna III**, in two groups on October 13 and 15.

The three members who reached the summit on October 13 were H. Yoshino, M. Kumura and U. Ageta.

On October 15, Prof. Higuchi and S. Yigeo reached the summit, accompanied by Sherpas Karim and Mimgma Tsering.

C. Indian Aid For Chatra Canal Project: Under an Agreement signed in Khatmandu on November 2, India will give Nepal Rs. 4 crores for the Chatra canal project.

To be executed by the Kosi project authorities, it will irrigate 182,000 acres of

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

land in Nepal's Morang district with Kosi water.

The project envisages the construction of the head regulator at Chatra and a 35-mile-long main canal with 16 distributaries.

The Indian Aid Mission has completed nine projects providing irrigation for 44,000 acres of land. Six more are to be completed in 1965 with an irrigation potential of 70,000 acres.

The Agreement was signed by the Indian Aid Mission Director, Mr. D. R. Kohli, and the Nepal Government's Planning Secretary, Mr. Begh Bahadur Thapa.

D. **Envoy To USSR:** The appointment of Mr. Damodar Shamsher as Ambassador to USSR was officially announced on November 1.

He replaced Mr. Jharendra Narain Singh who took over as Foreign Secretary.

The diplomatic re-shuffle was necessitated by the resignation early this year of Nepal's Ambassador to USA and Permanent Representative at UN, Mr. M. P. Koirala. That post was filled in October by Maj-Gen. P. B. Khetri, till then Foreign Secretary.

(*The Times of India*, New Delhi)

[Prev. ref. 3956:NEP:C]

E. **Yeti's Footprints Discovered:** Mr. Peter Taylor, an Australian mountaineer, recently returned from *Langtang Lirung* in western Nepal, on October 25 revived the Yeti legend by saying that he had seen thousands of footprints of a two-legged creature on snow beyond an altitude of 20,000 feet.

He told newsmen in Khatmandu that he had photographed the footprints.

Asked if they were Yeti's footprints, he said: "I am quite sure it is part of the Yeti legend. But I am not sure, none is sure, whether the Yeti exists."

The footprints, which were nine inches long and four inches wide, showed impressions of four toes, one of them longer than the rest.

Mr. Taylor and Ang Tempa, sherpa leader, sighted the footprints on the morning of October 4. The footprints disappeared when the snow started melting next day.

The footprints showed that the creature had descended from a narrow pass into the Langtang Valley overlooking Tibet and later returned to the pass.

Mr. Taylor added that a lieutenant of the Nepalese Army, who had acted as liaison officer of the expedition, was so scared of the footprints that he would not talk about them.

Ang Tempa said he could not recall seeing any creature that could leave such footprints.

Mr. Taylor claimed that he had found a new south-western route to the 23,770-foot Langtang peak. He said he had gone up to an altitude of 20,000 feet.

PAKISTAN

A. **New Constitution Promulgated In "Azad" Kashmir:** A Jammu despatch on November 10 said that the recently-promulgated Constitution of the so-called "Azad" Kashmir debars migrants from Kashmir, now living in various towns of Pakistan, from participating in the administration of "Occupied Kashmir".

They have also been disallowed to participate in the elections of Basic Democracies in Pakistan. This has caused widespread resentment among the migrants who style themselves as "Stateless" citizens.

Gen. Chaudhury Ghulam Abbas, a supporter of Kashmir's accession with Pakistan, has accused Pakistan of designs to grab "Azad Kashmir" by denying these rights to the migrants. The "Azad Kashmir" Muslim Conference has fully endorsed this statement.

In his speech at Muzaffarabad, Gen. Ghulam Abbas, who was the former head of the "Azad Kashmir" Government, made some startling disclosures highlighting his "struggle" against the high-handedness of the Pakistani authorities during the last several years.

He revealed that once he had to tell Mr. Akhtar Hussain, the then Pakistan Minister for Kashmir Affairs: "I will continue to treat Manzur Qader, Foreign Minister, as our enemy even if you imprison me for 20 years under the Martial Law".

Gen. Ghulam Abbas, who presided over the public meeting at Rawalpindi last May to greet Sheikh Abdullah, also said: "In a way I had betrayed my friend Sheikh Abdullah that time. I did not disclose to him how Kashmiris were being humiliated in Pakistan."

His patience, he said, was now exhausted. He would never permit Kashmir's integration with Pakistan. He only favoured its accession in regard to three subjects: defence, foreign affairs, and currency. "And till accession is achieved properly, Kashmir will remain independent and we will resist every attempt to integrate her with Pakistan."

He also disclosed that Mr. K. H. Khurshid was recently dislodged as President of "Azad Kashmir" for his leanings towards an independent Kashmir.

SAUDI ARABIA

A. **Crown Prince Feisal Proclaimed King:** Crown Prince Feisal, who is also the country's Prime Minister, was proclaimed King on November 2.

An official broadcast over **Mecca Radio** said that the Council of Ministers and Consultative Assembly had decided to depose King Saud and proclaim Prince Feisal king.

The statement said the two councils met at 4.30 a.m. and considered a petition by members of the Royal Family to the ulema (religious leaders). The petition conveyed the Saudi family's decision to dethrone King Saud and proclaim his brother, Prince Feisal, "King of country and Imam of the Muslims," and asked the ulema to rule on this from the view-point of Muslim law.

The ulema met on October 31 under the Mufti of Saudi Arabia. The conference on November 2 considered their ruling and decided to depose King Saud and ask Prince Feisal to accept his public proclamation as King.

The effect of all this should be to seal King Saud's eclipse. For 6½ years the two brothers had seesawed, but for the past seven months Crown Prince Feisal had had full governing powers, his elder brother remaining nominal ruler only. The Crown Prince had been approached before to have himself proclaimed king, but had refused. More than once it was thought that King Saud would go into complete seclusion, partly on account of ill-health, but he had a way of re-appearing.

The two men are among the 33 sons of King Abdul Azız Ibn Saud, who created Saudi Arabia and died in 1953. Before his death Feisal and other sons had agreed that the eldest son, Amir Saud, should succeed. Saud is 62 and Feisal was born in 1905.

After five years of King Saud's rule, Crown Prince Feisal was given overriding authority in the Government, but two years later his elder brother made himself Prime Minister. In October, 1962, after the revolution in Yemen created a crisis for Saudi Arabia, Crown Prince Feisal once more took control. The uneasy relationship continued, and after King Saud had been to Cairo for the first Arab "Summit" meeting last January there was a showdown. King Saud's supporters, chiefly his own sons, were outweighed by Crown Prince Feisal's both in the palace and among the ulema and tribes.

Crown Prince Feisal's more modern policy of internal government is set on its course and a reformation challenge abroad by princes led by a half-brother, Prince Talal, has long since petered out, the princes concerned having been glad to return to their country.

The latest declaration took care to present Crown Prince Feisal as the religious head as well as the secular ruler. This is obviously important in a country where the holy cities of Mecca and Medina are situated.

Crown Prince Feisal has also not had good health, and already there is speculation on who will succeed him. King Saud is expected to retain his considerable income, but it is not known whether he will stay in Saudi Arabia.

The new King gave a pledge to speed up economic, social and administrative reforms in Saudi Arabia. He also promised, in an address to the nation, to steer his country's foreign policy towards closer co-operation with other Arab countries and non-aligned nations.

He said that he had refused to be proclaimed King before, not to avoid responsibility but in the hope that "things would take their natural course". "Now that God has granted us the blessing of stability we shall double our efforts towards the achievement of target reforms in all domains—political, administrative and economic."

He declared that Saudi Arabia supported disarmament and attempts to spare humanity the hazards of destructive arms. She called for self-determination for all peoples, and settlement of internal problems peacefully on a basis of justice and right. She sought the utmost co-operation with Arab States, implementation of resolutions of the two Arab summit conferences this year, and the "liberation of all parts of the Arab homeland still under imperialism".

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

She supported the United Nations Charter and the resolutions of the Bandung and non-aligned conferences.

He ordered the present Cabinet to remain in office. Prince Khalid bin Abdul Aziz, Deputy Prime Minister, and other Ministers were asked to continue in their posts.

[Prev. ref. 5804:SUA:A]

B. Steel Pipe Manufacturing Project: The Foreign Investment Commission of the Ministry of Trade and Industry has recommended that approval be given to a project for setting up a plant to manufacture steel pipes under the terms of the Foreign Investment Law.

The pipes would be used in Saudi Arabia and neighbouring countries and the company concerned has requested protection for the new industry by the imposition of an import ban on similar products. This is being given careful consideration by the Government.

Mr. Ahmad Zaki Yamani, Saudi Oil Minister, recently called for the formation of a committee of Riyadh businessmen to study the possibility of constructing a 156-mile pipeline to transport natural gas from the Uthmaniyah gas-oil separation plant to Riyadh, where it would be used as fuel for the Riyadh power station and for domestic purposes. The scheme is not a new one and preliminary studies have already been made by the Oil Ministry.

(*Middle East Economic Digest*)

C. Uranium Find: An announcement in Riyadh on October 21 said that uranium ore had been discovered on the Red Sea coast, about 230 miles north of Jeddah.

(*Dawn*, Karachi)

THAILAND

A. Conference Of Asian Economic Planners: Steps to harmonize Asian development efforts were urged by Asian economic planners who met in Bangkok from October 20 to 26.

At the Conference, sponsored by ECAFE, the delegates observed that in the current UN Development Decade, economic progress in almost all Asian countries had been "disappointing." The rates of growth in the first half of the Decade had dropped below the planned rate, and also below the rates achieved in the 'fifties except for one or two countries. To reverse this process, Governments would have to "identify themselves more closely" with planning processes, it was suggested. Planning bodies should be closely associated with public opinion through universities, business organizations, etc. Workers and peasants should be well aware of national planning goals and activities.

As a first step towards "harmonization" of national development plans, the delegates proposed pooling of information and experiences in planning and setting up of working group of experts from different countries who would examine development plans in their initial stage. National plans could thus be drawn up to fit into wider regional planning efforts.

They also suggested the setting up of a permanent body within ECAFE to provide a standing machinery for co-ordination of development plans.

The delegates found the difficulties in economic development planning were caused by inadequate or misleading statistical information, absence of sufficient number of trained administrators and technical personnel, ineffective utilization of domestic saving and foreign exchange, and insufficient emphasis on intensification of agricultural production.

The Conference welcomed the establishment within ECAFE of a Regional Centre for Economic Projection and Programming. Support was also forthcoming for the proposed Asian Development Bank which, it was stated, would help to co-ordinate specific regional projects.

Opening the Conference, the Thai Prime Minister, Mr. Thanom Kittikachorn, described it as an Asian summit meeting on economic development and planning and emphasized the operation and practical aspects of development planning. He stressed the benefit the Asian countries could gain through closer regional co-operation.

U Nyun, Executive Secretary of the UN Economic Commission for Asia and the Far East, said that the 1964 United Nations Conference on Trade and Development in Geneva had set the stage for tackling "north-south" economic problems of the world for the first time. The developing countries had expressed community of interests in pursuing their economic goals through joint action. The industrialized countries had joined the developing countries in their effort to find constructive solutions.

The idea of economic planning adopted in Asian countries in the 1950's, he said, was an attempt to break away from century-old stagnation. Some countries had achieved remarkable success in speeding up economic development especially in the latter half of the decade. The 4 per cent growth rate of the 1950's compared favourably with the virtual stagnation of the pre-world war period. The pace of economic progress, however, had slowed down more recently. The economic growth in the region (excluding Australia, Japan and New Zealand) had fallen short of planned targets and also dropped below the growth rates of the 1950's. Food production in particular had not been able to catch up with the population growth and the deteriorating terms of trade had aggravated the situation still further.

The economic policy makers, he said, must ask themselves if this slowing down was only of a temporary nature or whether it pointed to more deeply seated difficulties. It was imperative for Asia's economic planners to identify the obstacles obstructing economic progress and devise means to remove them.

He observed that national planning authorities were aiming at a considerable higher growth rate, viz., 6 per cent for a period up to 1980. The Asian planners would have to design policies and measures for necessary structural changes to bring the growth rates within reach.

The inescapable and cheerless conclusion, he said, was that unless strong remedies were successfully applied, the relative position of economic welfare in the region would deteriorate further. This economic reality had to be faced squarely. He called for co-operation among the countries of the region, but said that the initiative for harmonization of economic policies and plans would have to come from the Governments themselves.

The Conference elected Dr. Pu I. Ungphakorn of Thailand Chairman, and Mr. T. P. Singh, Secretary of the Planning Commission of India and Dr. M. N. Huda of Pakistan as Vice-Chairman. Represented at the Conference were: Afghanistan, Burma, Ceylon, Formosa, France, India, Indonesia, Iran, Japan, Republic of Korea, Malaysia, Mongolia, Nepal, Netherlands, New Zealand, Pakistan, Philippines, Republic of Viet-Nam, Thailand, USSR, United Kingdom and the United States. The Federal Republic of Germany and Israel participated in a consultative capacity.

[Prev. ref. 5761:IRN:A]

B. Anti-Government Plot Alleged: The armed forces were placed on the alert on November 9 after the police had uncovered what was said to be a plot to overthrow the Government.

The Deputy Prime Minister and Minister of the Interior, General P. Charusathien, said the step had been taken because of "internal and external dangers."

The alert was a precautionary measure to maintain peace and order. Communists had stepped up their aggressive activities, mainly in countries around Thailand, he said, and in Thailand they had increased subversive activities and incitement of anti-Government feeling.

(*The Times*, London)

C. Effect Of Chinese Atomic Explosion On Extinct Volcano: According to the President of Thailand's National Research Council, Lt.-Gen. Phya Salvitaran Nithet, shock waves from nuclear explosions in China may activate an extinct volcano in northern Thailand which had been extinct for the last 60 years.

The existence of the volcano, situated in Narn province, adjoining Laos, was found 60 years ago by a survey party.

Gen. Nithet said that the effect of the Chinese nuclear explosion on October 16 on the extinct volcano was now being studied. Graphs of the shocks of the recent nuclear blast taken by the Chiengmai seismographic station, the world's third most sensitive station, had been sent to USA for evaluation of its intensity. If the study showed danger of a fissure in the volcano which would re-activate it, people in the locality would be given a warning.

(*The Statesman*, Calcutta)

[Prev. ref. 6148:CHI:A]

D. Kra Canal Project Shelved: The Government has shelved an ambitious plan to cut a major shipping canal across the Kra peninsula.

The National Security Council has also dissolved the canal study committee.

The plan would have involved cutting across the peninsula in southern Thailand, linking the Indian Ocean and South China Sea and shortening the East-West shipping route which now goes around the southern tip of the peninsula at Singapore.

ASIAN RECORDER

December 16—22, 1964

Regd. No. D-727
Vol. X No. 51

PAKISTAN

A. Election Of 'Basic Democrats': Heavy polling was reported from West Pakistan on October 31 as electors cast their votes on the first of a ten-day voting period for the election of a 80,000-member electoral college, which will choose the new President in elections due in March, 1965.

The electoral college will also return members of the National Assembly and the Provincial Assemblies of East and West Pakistan.

In the first phase of the election, an estimated two crore voters in West Pakistan returned 40,000 "Basic Democrats" who will form one-half of the members of the Electoral College.

The second phase will open in January, 1965, when the 80,000-member Electoral College will give their choice in favour of either of the two main contestants for the office of the Head of State—President Ayub Khan representing the ruling Muslim League and Miss Fatima Jinnah of the five-party Combined Opposition.

Riots:

Violence marred polling in Karachi on November 7 and the police had to order a lathi charge in Khudad Colony.

A mob of hirelings pulled down tents of Opposition candidates, and generally ran away before police intervened and restored order.

A Press release of the Opposition quoting a report from Landhi, a Karachi suburb, said that a queue of the Opposition voters was attacked, stoned and dispersed by the Conventionist League (ruling party) Party supporters. More than a dozen persons were injured. Four of them were admitted to hospital. An election fracas also took place in the federal area.

Two more persons were shot dead in an election brawl in Lahore on November 4, raising the known death toll in the poll in West Pakistan to 10.

In another incident in Lahore the same day, Mansur, a defeated candidate, received bullet wounds when, it was alleged, he was fired at by his rival Hatimshah. Mansur was removed to hospital in a precarious condition.

In other election fracas, two persons sustained stab injuries when they were attacked by supporters of their rival candidate in Mozang area of Lahore. Twenty-nine persons had received minor injuries in election clashes in various parts of Lahore earlier.

Forty-three persons died and 500 received injuries during the 10-day polls in West Pakistan, which ended on November 9.

This was revealed in Karachi on November 16 by Maulana Maudoodi, leader of the Jamaat-i-Islami.

He told a news conference that figures of the dead and injured quoted by him were based on Press reports and revealed the "dangerous and anti-democratic" trends in the country's political life.

He said the situation which had led to violence and brawls, augured ill for the future of democracy in the country and should be avoided in the ensuing second and third phases of the elections.

He claimed overwhelming victory for candidates of the Combined Opposition in the elections.

Polling In East Pakistan:

The 10-day polling for the election of 40,000 Basic Democrats was held in East Pakistan from November 10 to 19.

Out of these, 2,500 candidates were elected unopposed.

It was not known how many of the 1,20,000 candidates held party tickets. But both the Government Party (Conventionist Muslim League) and the Combined Opposition claimed a majority of them as their own.

Nine persons, including an Opposition candidate, were injured in an election clash in Chittagong on November 10.

In Narayanganj, two Opposition candidates disappeared following a clash on November 8 between their supporters and the rival group. Opposition newspapers alleged that the candidates had been kidnapped by the other party.

About 78 per cent of registered voters took part in the polling—that is, 21 million out of a total of 27 million voters.

A Dacca message on November 10 said that a number of important members of the ruling Conventionist Muslim League had been defeated on the first day of polling (November 10).

Among the notable defeats were: Mr. Ali Amjad Khan, sitting member of the Pakistan National Assembly, who lost to a milk-man in Dacca, and Syed Muhaseen Ali, Treasurer of the Provincial Conventionist Muslim League.

Electoral Rules:

With 2½ months left for the Presidential election by 80,000 Basic Democrats, the Central Government made public on November 18 elaborate rules in consultation with the Chief Election Commissioner.

These rules, in pursuance of the Presidential Election Act passed by the National Assembly three months earlier, made provision for issuing identity cards to each of the 80,000 Basic Democrats, who will have to produce them before the presiding officers at polling booths so as to eliminate impersonation and other malpractices in the Presidential election.

According to the Act, not more than four candidates, including the present incumbent of the Presidential office, can run for the Presidency.

The rules also indicated election symbols, including "aeroplane", "bicycle", "flower", "horse", and "lamp.

Blind or otherwise physically disabled electors could take their companions in marking ballot papers, or by the presiding officer if they so choose, provided that such companions are not electors themselves.

By this Act, each Presidential candidate is entitled to receive Rs. 100,000 for his or her campaign, but if any candidate retires from the contest, he or she will have to refund the sum to the Government.

The rules also provided for appeal against rejection of nomination.

President Ayub Khan Retires From Army:

An extraordinary issue of the Defence Ministry *Gazette* of Pakistan on November 8 announced the retirement from service as from February 16, 1960 of the President, F-M Ayub Khan.

The Gazette was dated October 20, 1964. It did not indicate any reasons for the belated announcement that the President had been put on the pension list retrospectively.

An official spokesman of the Combined Opposition parties, supporting Miss Fatima Jinnah as Presidential candidate, said the move had been taken to satisfy the constitutional provision which bars the President from holding an office of profit during his tenure.

A Karachi despatch on November 14 said that the post facto legalization of an apparent constitutional disqualification of four years was certain to be exploited by the Opposition Parties in the weeks ahead.

Mahmudul Huq Usmani, member of the Central Committee of the Combined Opposition parties, contended that such a belated administrative manoeuvre had no legality behind it.

It was pointed out that a Field-Marshal does not retire in Britain or in America where he is known as the Five-Star General.

Article 115 of the Constitution clearly forbids the President from holding any office of profit. This, said a commentator, was bound to cause political uproar and may hurt his chances of election.

In any case, the argument that he had been holding an office of profit since the day of commencement of the Constitution till October 20, when the Defence Ministry placed him on the pension list, was of considerable weight and could not be lightly brushed aside.

"Revolution If Miss Jinnah Wins"—President Ayub Khan's Warning:

President Ayub Khan told a news conference in Dacca on November 8 at the end of his eight-day tour of East Pakistan that there would be a second revolution if the Opposition Parties came to power.

Though he based his prediction on the premise that the Opposition regime would be tyrannical and people would not tolerate oppression, the menacing tone underlying his statement could not escape attention.

He told the news conference that he would hand over the reins of powers to the Opposition should it win elections, because "that is the constitutional position."

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

He, however, added: "But if they continue their injustice and tyranny and bring back the chaos that existed before the revolution (military take-over), there may be another revolution."

According to him, the Martial Law regime was "mild and humane", but the next "revolution will be much harsher."

However, ten days later, he denied that he had any intention to re-impose Martial Law.

A Rawalpindi despatch on November 18 said that with the challenge to him from the Combined Opposition parties growing, particularly in the East Wing, President Ayub Khan had come out in defence of himself against "misrepresentation and vilification" by the rival Presidential candidate, Miss Fatima Jinnah.

He assured Pakistanis that he had no desire to re-impose Martial Law.

Rebutting Miss Jinnah's charge that he was keen to "rule by force in complete disregard of the law of the land", he said that if this were the case he would not have voluntarily withdrawn the Martial Law administration two years ago and set the country on the course of general election in accordance with democratic processes.

He charged the politicians supporting Miss Jinnah with not holding any election in Pakistan until 1958, when he assumed power.

Vilification Of India In Election Campaign Alleged:

On November 18, India lodged a protest with the Pakistan Government against persistent attempts by members of the Government and leaders of the ruling Party to involve *India in the election campaign.*

A Karachi despatch to an Indian newspaper said:

"The latest instance which is also the most blatant in its cynical disregard to international etiquette, is a full-page advertisement in the Karachi paper, **Dawn.**

"The advertisement, which carries extracts from editorial comments on Pakistan's general elections by several Indian newspapers carries the headline—Why do Pakistan's enemies want Ayub defeated?

"The answer to the question runs thus: 'Because Hindu India wants Pakistan to relapse into instability and chaos; because Pakistan's enemies hate Ayub for making Pakistan strong and respected in the world; because India fears Ayub and considers him the biggest obstacle to Hindu conquest of Pakistan.'

"The advertisement was issued by the Pakistan Muslim League, the President of which is Mr. Ayub Khan himself."

The previous week, Mr. Abdul Waheed Khan, Central Minister of Information, spoke at an election rally of "Indian designs" in regard to the elections.

The same theme that India was engaged in aiding the Opposition Parties had been repeated by Khan Bahadur Habibullah, the Home Minister, and others.

The Acting Indian High Commissioner, Mr. Vijaya Raghavan, on November 18 called on the Pakistan Foreign Office and handed over the protest Note.

He also drew the attention of the Foreign Ministry officials to the disrespectful language employed by the Foreign Minister, Mr. Z. A. Bhutto, the previous week when he had described the late Indian Premier, Mr. Nehru, as "ambitious, cynical and senile".

(*Dawn*, Karachi, *The Times of India*, Bombay and *The Statesman*, Calcutta)

TURKEY

A. Mr. F. C. Erkin's Visit To USSR: The Foreign Minister, Mr. Feridun Cemal Erkin, paid an official visit to the Soviet Union from October 30 to November 6.

Observers attached much significance to the visit. They saw in the visit the beginning of a new phase in the relations between the Soviet Union and Turkey.

A **communique** issued in Moscow on November 6 on the visit said: "The exchange of opinions showed that the views of the Soviet Government and the Government of the Turkish Republic coincide on the need of contributing in every way to the establishment of a lasting peace and relaxation of international tension."

It said both sides had reached agreement to "promote the consolidation of good-neighbour relations between the two countries on the principles of respect for independence, territorial integrity and equality." They "regard the policy of peaceful co-existence of States with different social systems as a way to the achievement of these lofty goals."

The **communique** noted that the talks which he concluded with the Soviet leaders proceeded in a friendly atmosphere. They confirmed the great importance of the consolidation of United Nations, noted the need of strict abidance by the UN Charter.

Both sides went on record for the peaceful settlement of the Cyprus issue on the basis of respect for the sovereignty and territorial integrity of the Republic of Cyprus and observance of the lawful rights of the two national communities.

The two sides also discussed Soviet-Turkish trade and expressed a desire for using all opportunities for its development. The Soviet Union will increase its imports of Turkish goods such as tobacco, nuts, and citrus fruit. Turkey, for its part, will import more Soviet goods she needs, particularly machinery and equipment.

Turkish officials said in Ankara on November 4 that they expected a Cultural Agreement to be signed between Turkey and the Soviet Union. A Turkish draft Agreement had been submitted to the Russians.

This provides for the exchange of artistes, actors, musicians, and scientists, which has in fact been going on already for some years. This would be the first Cultural Agreement signed between the two countries. Informed sources said that the Russians had proposed an exchange of students between the two countries, but that the Turks had refused this, presumably on the ground that such an exchange would expose their students to ideological subversion.

Turkish Press reports on Mr. Erkin's visit were optimistic on the subject of getting Soviet support for the Turkish position on Cyprus. They took the line that the Soviet Government had confirmed its opposition to enosis (union with Greece) and some papers suggested that the Russians also favour the Turkish thesis of a Federation of Cyprus, based on the separation of the Turkish and Greek communities.

Mr. Metin Toker, son-in-law of Mr. Ismet Inonu, the Turkish Prime Minister, writing for the Istanbul newspaper **Hurriyet**, said that the Russians favour federation for Cyprus because their own regime in the Soviet Union is a federation in which 15 different nations live side by side.

There is also talk of increased trade between the two countries and the possibility of Soviet economic aid for various Turkish projects. Turkey is examining the question of selling to Russia exports which she cannot get the West to buy.

[Prev. ref. 4413:TUR:A]

B. New Rail Project: A new railway line 62 miles long in Eastern Turkey was opened on October 25 to passenger traffic by Mr. Ismet Inonu, the Prime Minister, bringing one of the major development projects of the Central Treaty Organization (CENTO)—the linking of the rail systems of Turkey and Iran—a stage nearer completion.

The railway from Europe towards the east, which previously ended at the Turkish town of Mus, has now been extended to Tatvan, on the western shore of Lake Van. The route will continue from there by train ferry across Lake Van to link up with the Iranian railways at Sharafkhaneh.

It is expected to complete the link by 1967, making it possible for the first time to travel from London to Tehran by train without having to go through the Soviet Union.

The opening ceremony at Tatvan was attended by six Ministers of the Turkish Government, the Secretary-General of CENTO, Dr. Abbas Khalatbary, the British Ambassador, Sir Denis Allen, and representatives of the United States, Iran and Pakistan.

Vessels to act as train ferries across Lake Van are being built in Istanbul. They will later be transported to Tatvan and assembled on the Lake. The water crossing of about 50 miles from Tatvan to the town of Van on the eastern side of the Lake will take about 3½ hours. Construction of the 30-mile section from Van to Khotur on the Iranian frontier will begin next Summer and will connect with the stretch being built westwards by Iranian engineers. The United States announced a loan of $10,500,000 for this section earlier this year.

The most difficult part of the new line, from the construction point of view, has been between the Iranian frontier and Sharafkhaneh, the Iranian railhead from Tabriz. Here 80 miles of track have had to be blasted through almost impenetrable mountains. In one 11-mile section three million tons of rock had to be displaced, and the stretch includes 126 bridges and four major tunnels.

Here the line rises in only 20 miles from below sea level to 10,000 feet up in the mountains of western Iran, in a series of spirals. About half the stretch is now completed. For this section the United States made a loan of about $8 million this year. Britain, which has taken an interest in the railway throughout, has supplied £100,000 worth of bulldozers, excavators and other equipment.

When completed in 1967, the railway will have great economic importance through the development of untapped mineral and agricultural resources in Eastern Turkey, and in bringing life to inaccessible regions. It will also provide a valuable new trade outlet for Iran, to Istanbul and Europe.

(*The Times*, London)

C. Proceedings Against Authors: Proceedings have been opened against nine well-known Turkish writers, including Yashar Kemal, author of the best-selling novel *Memed, My Hawk*, after a protest march by the writers against the banning of a Turkish translation of a book by the 18th-century French Revolutionary author, Babeuf.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The nine writers made a silent protest march across Istanbul, and laid a wreath on the statue of Kemal Ataturk, at Taksim Square, in the centre of the city. They were detained by the police on a charge of contravening the law governing demonstrations.

Meanwhile, there has been a violent reaction by the Right-wing Press to the publication by the Left-wing weekly **Yon** (Direction) of some poems written by the Turkish communist poet, Nazim Hikmet.

Hikmet, probably Turkey's greatest poet of the century, spent most of his life either in prison or in exile. He died last year.

The newspaper **Yeni Istanbul**, organ of an extreme Right-wing faction of the Opposition Justice Party, asserted on November 2 that the present rapprochement between Turkey and the Soviet Union was encouraging communist elements in Turkey.

(*The Times*, London)

VIET-NAM (RVN)

A. Election Of Head Of State And Premier: The High National Council at a meeting in Saigon on October 24 chose Mr. Phan Khac Suu, a 63-year-old engineer and elder statesman, as Head of State.

The Council, a 17-man body appointed in August to set up a Government, maneuvred for days before naming a Head of State.

After several false starts, the Council rejected Maj-Gen. Duong Van Minh, who almost until the last minute was considered the most likely choice.

Mr. Suu's election was welcomed by the US Ambassador, Gen. Maxwell D. Taylor and the American Mission as "another positive step towards the objective of establishing an effective civilian Government."

Leaders of the country's two main religious groups—the Buddhists and the Roman Catholics—voiced a similar view. Two religious delegations paid formal calls on the Council, the body set up to draft the new Constitution and elect the Head of State.

Mr. Suu designated Mr. Tran Van Huong, a 61-year-old nationalist politician, as Premier.

Mr. Huong replaced Maj-Gen. Nguyen Khanh, who had led a "caretaker" Government since he was forced to step down amid rioting and confusion in Saigon late in August.

Mr. Suu, the fifth Head of State in the country's 10 years of existence as an independent ratio, was officially installed on October 28. The ceremony brought to an end 360 days of military rule.

In a brief ceremony in Gia Long Palace, Mr. Suu accepted the resignation of Maj-Gen. Nguyen Khanh as Premier and the resignations of all the Ministers of the "caretaker" Government that had ruled the country on an interim basis.

Maj.-Gen. Duong Van Minh also submitted the resignation of the military triumvirate that had accumulated the functions of Head of State at the height of the political rioting that toppled General Khanh's Presidential regime two months before.

Mr. Tran Van Huong formally took charge as Premier on October 31.

In keeping with the terms of the new Constitution, Mr. Huong was selected by the Head of State, Mr. Phan Khac Suu. Mr. Huong must present a summary of his policies to the 17-member Council before it approves him.

New Government Formed:

Mr. Tran Van Huong completed on November 4 formation of the new Government and presented the Cabinet list to the Head of State, Mr. Suu.

The Cabinet includes 14 members, among whom are two Ministers of the outgoing Cabinet headed by Gen. Khanh.

Maj.-Gen. Nguyen Khanh, the outgoing Premier, will be Commander-in-Chief of the armed forces, but he is not in the Cabinet.

The new Foreign Minister is Mr. Pham Dang Lam, who was Secretary-General of the Foreign Affairs Ministry under the Diem regime and was Minister in the short-lived Government that followed the expulsion of President Diem a year ago.

Neither of the main religious groups, the Buddhists and the Roman Catholics, was enthusiastic about the selection. It appeared that there would be criticism also from political and student groups.

Several prominent politicians associated with Mr. Huong declined to take part in the Government, apparently feeling that it lacked necessary support from the main pressure groups.

Some of the new Ministers had held high civil service posts in the Diem administration.

A United States Mission spokesman in Saigon described the formation of the Government as "a further orderly step in the programme announced on August 27 to establish a sound new basis for government in this country."

He said the support of the entire nation would be required in facing the "critical tasks of eliminating the Viet-Cong threat and developing the nation."

The new Government includes:

Premier and Minister of National Defence—Mr. Tran Van Huong;

First Deputy Premier and Minister of Interior—Mr. Nguyen Luu Vien;

Second Deputy Premier and Governor of the National Bank—Mr. Nguyen Xuan Oanh;

Minister of Foreign Affairs—Mr. Pham Dang Lam;

Justice—Mr. Lu Van Vi;

Information—Mr. Le Van Tuan;

Economic Affairs—Mr. Nguyen Duy Xuan;

Finance—Mr. Luu Van Tinh;

Rural Affairs—Mr. Ngo Ngoc Doi;

Public Works—Mr. Le Si Ngac;

Culture and Education—Mr. Phan Tan Chuc;

Health—Dr. Tran Quang Dieu;

Social Welfare—Mr. Dam Sy Hien;

Labour—Mr. Nguyen Huu Hung; and

Minister at the Premier's Office—Mr. Pham Van Toan.

The new Government found itself faced with a challenge to its authority immediately after its formation.

The acting Chairman of the High National Council, Dr. Nguyen Xuan Chu, announced his resignation over the new civilian Government.

His grounds were that the Cabinet did not enjoy the people's confidence and contained personalities connected with the old regime.

A Cabinet of "technicians" had some justification during the first military junta's rule, with policy-making functions tightly in the army's hands; a repeation of the exercise in the present circumstances was another matter.

This was not entirely Mr. Huong's fault. The small coterie of acceptable politicians who have not been besmirched by the past did not wish to prejudice their political future by early association with a shaky administration.

Mr. Huong, therefore, had to content himself with a purely functional Cabinet.

(*The Statesman*, Calcutta and *The New York Times*)

[Prev. ref. 6106: RVN: A]

B. Floods: About 1,000 persons lost their lives in floods in Central Viet-Nam in the second week of November.

Refugees poured into major cities and American officials reported that up to 45,000 were homeless in the city of Da Nang alone. Viet-Cong guerrillas shot low-flying helicopters carrying out relief missions, but no casualties were reported.

Special security checks were set up for refugees moving into the cities in an attempt to prevent Viet-Cong agents mingling with them. Mass immunization programmes were undertaken at refugee centres.

The floods struck the central coastal plain a few days after the harvesting of a good rice crop had been completed.

Military units mostly turned from combat to relief operations with US Army helicopters playing a key role.

Several outlying districts of Binh Dinh province were in a serious plight, and an American spokesman said medical help was needed. In the neighbouring Quang Ngai province 70 to 90 per cent of the coastal plain, where more than 500,000 people live, was under water.

United States Army Lieutenant-Colonel John C. Hughes, Commander of the 52nd Aviation Battalion, which had been flying helicopter missions in Binh Dinh, said: "We are being shot at more than 50 per cent of the time by Viet-Cong."

(*The New York Times* and *The Times*, London)

C. Viet-Cong Attack On American Base: On November 1 four US personnel were killed and 32 wounded when Viet-Cong guerrillas attacked the Bien Hoa air base, 30 kilometres north-east of Saigon.

Reports said that 27 aircraft were set on fire when about 100 mortar shells fell on the air base in less than 15 minutes. The bombardment seemed to have been prepared carefully, judging by the accuracy of the shooting. The firing came from only one position situated in a jungle area some 3,300 metres north of the Bien Hoa base.

The alarm was given soon after the shelling started. Simultaneously sky-raiders took off to neutralize the Viet-Cong positions, but the guerrillas seemed to have withdrawn immediately after their attack. Viet-Namese Government land forces went into action after the attack, pursuing the Viet-Cong.

The Bien Hoa base is the biggest in South Viet-Nam which accommodates several squadrons of B-57 bombers and sky-raider fighter-bombers as well as an unknown number of U-2 reconnaissance planes.

US military sources said the attack on the key US installation at Bien Hoa could be repeated at a dozen or more bases in South Viet-Nam.

"What is surprising is that the Viet-Cong did not strike sooner", an American Major at Bien Hoa said. "When it suits them, I am sure, they will do it again".

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

On November 2, the US President, Mr. Lyndon Johnson, sought means to tighten defences against mortar attacks such as raked the Bien Hoa air base. He immediately replaced the jet bombers destroyed in that strike.

The President's post-attack steps were announced by the White House after a 75-minute meeting between Mr. Johnson and top aides including the Secretary of State, Mr. Dean Rusk, the Secretary of Defence, Mr. Robert McNamara, and others.

The US Administration tended to regard the affair as serious because of the loss of life and planes, but not as a major development in the long-drawn-out war against the insurgents. It was seen as an episode of a type difficult to prevent in such a war where the enemy had many opportunities for such hit-and-run surprise attacks.

Authoritative sources said that "appropriate further steps" were being considered by the US advisers in Saigon in co-operation with the Viet-Namese Government.

Mass Raids On Guerrilla Base:

Air Force fighter bombers launched on November 7 mass raids with 50-lb bombs, rockets and napalm against a communist guerrilla base, 12 miles north-east of Bien Hoa. The base was later reported to have been wiped out.

The raids were in retaliation for the November 1 mortar attack by Viet-Cong forces on Bien Hoa air base in which six Americans were killed or wounded and 28 aircraft damaged or destroyed (see above).

The Air Force Commander, Brig.-Gen. Nguyen Cao Ky, who flew on one mission himself, said the raids were highly successful.

An Air Force spokesman said three separate air strikes were ordered against the Communist base over a ten-hour period. The attacking force of 24 Sky-raiders met Communist ground fire, but received no damage.

Reconnaissance planes which flew over the area later reported that the base had been wiped out.

The Air Force spokesman said the Viet-Cong base had included about 150 buildings and an ammunition dump.

Government Casualties In Guerrilla Warfare:

An American military spokesman said in Saigon on October 18 that Government forces had lost 11,215 dead or wounded in 14 weeks. This equalled the casualties for the first six months of the year.

Observers called the figure unprecedented for such a short period in the guerrilla war.

Viet-Cong casualties for the same period were 5,355 compared with 9,000 for the six months of the year.

The spokesman said, however, that an estimated 75 per cent of the Viet-Cong casualties were fatalities compared with the Government's 25 per cent.

On October 24, a US military spokesman said an American Air Force C-123 transport plane with seven men aboard was brought down by Viet-Cong ground fire in the rugged Quanc Du province, 100 miles from Saigon. The aircraft caught fire after crashing and rescue planes saw ammunition aboard it exploding.

North Viet-Nam Complaint To ITSC:

Meanwhile, on October 7, the North Viet-Namese Army High Command complained to the International Truce Supervisory Commission (ITSC) that 180 fishermen had been killed and 200 wounded in bombing and strafing attacks made on a fishing fleet in North Viet-Nam by aircraft of the South Viet-Nam Air Force.

The complaint, routed through Col. Ha Van Lau of the North Viet-Nam liaison mission, to Mr. M. A. Rahman, Indian Chairman of ITSC, said that some 400 fishermen were fishing as usual in Ong Keo river in the border province of Bien Hoa a week before when the group of vessels came under air attack. As villagers were assisting the survivors, the planes returned and attacked the fleet for a second time. The whole area then came under artillery fire from South Viet-Nam military contingents.

The incident was described as a bloody massacre by the North Viet-Namese who saw US instigation in the bombings.

The Note asked the Commission to condemn the incident as a violation of the Geneva Agreement by the Khanh administration and USA.

The Commission was also requested to take urgent steps to ensure from the South Viet-Nam authorities immediate medical care for the victims of the attack and compensation for their families.

(*The Statesman*, Calcutta, *The Times of India*, Bombay and *The New York Times*)

[Prev. ref. 5933:RVN:A, 6022:RVN: B, 6106:RVN:A]

D. Request To UN For Arbitrator: South Viet-Nam has asked the UN Secretary-General, U Thant, to appoint a renowned jurist as arbitrator between South Viet-Nam and Cambodia.

The request was made in a Note dated November 3, but published on November 12.

The main task of the arbitrator will be to put a stop to the repeated border incidents between the two countries.

South Viet-Nam said the incident of October 28 in which eight Cambodians were killed by shots fired from planes had been caused through an error by the pilot and by the nuclear delineation of the border.

The Note repeated the suggestion that the border be marked and an international police force be entrusted with its supervision.

(*The Statesman*, Calcutta)

[Prev. ref. 6052:CAM:A]

ASIA OUTSIDE ASIA

SUMMARY: "Summit" Conference Of Non-aligned Countries; Mr. N. Khruschev Resigns From Soviet Premiership; Mr. L. B. Johnson Elected US President; Nobel Prizes.

A. "Summit" Conference Of Non-Aligned Countries In Cairo: The Second Conference of Heads of States or Governments of non-aligned countries began on October 5 in the Cairo University Auditorium.

President G. A. Nasser of UAR, as Head of State of the host country, inaugurated the Conference, welcoming the delegations of 46 African, Asian, European and Latin American countries, together with 10 delegations of observers. Representatives of 10 liberation organizations, including the Palestine Liberation Organization, and a large number of diplomats were also present.

President Nasser said this was one of a chain of conferences of international importance, others being those held in Bandung, Addis Ababa and Belgrade.

Referring to the first Non-aligned "Summit" Conference held in Belgrade in 1961, he said the main issue then had been war and peace. World tension and the 'cold war' were at their height and there was a danger of a devastating nuclear catastrophe. Imperialism in Africa was fighting to maintain its position and nuclear tests were resumed on the same day the Conference met in Belgrade.

He paid tribute to the memory of the late Mr. Jawaharlal Nehru of India who, at that Conference, had made an appeal for freedom. There had been vast changes since then. Tensions had relaxed and many people had obtained their freedom. Many voices were heard now which said that non-alignment had lost its raison d'etre in view of the relaxation of tensions between the two world blocs.

But, he said: "First, non-alignment is not bargaining in the struggle between the two camps, seeking to get as many concessions from each as possible. This is not the case as we spent our greatest effort to reduce that strife.

"Second, non-alignment is not a policy which seeks to isolate itself from world problems. We have contributed to discussing these problems and proposed solutions."

He said that changes in the international situation did not affect the policy of non-alignment, which in the final issue was a grouping for peace based on justice. This aim had not yet been achieved. But some ground had definitely been covered. There was great progress in the scientific field and in the means of nuclear destruction and nuclear missiles carried by rockets. Every one had realised there was no alternative but either living in peace or the suicide of the human race.

He added: "Imperialism in all its forms must be eliminated. Imperialism is an explosive element in our time. There are vast differences between the standard of living of the developed and the underdeveloped countries.

"For many centuries past, our wealth was taken from us. We demand justice in a world which is becoming closer together and as one. The operation of confrontation against the peoples which aim at liberation and advancement must stop.

"The small wars are there in South America, Asia and Africa. Trade in mercenaries is being carried on without caution or shame. The United Nations must be ready to fulfil the hopes of all nations like China whose place is empty in the United Nations".

Agenda:

The Foreign Ministers of the non-aligned countries had earlier approved the draft agenda of the Conference.

An official spokesman said that the meeting had unanimously decided to accept Zambia as a full member and give the right to the members of the regional organizations, namely, the Arab League and the Organization of African Unity, to deliver speeches at the Conference.

It was also decided by the meeting that two committees should be formed. The first

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

was the Political Committee and the other was the Economic and Cultural Committee.

The following subjects were included in the agenda of the Conference:

(1) General discussion of the international situation.

(2) The preservation of world peace and security, supporting this peace and developing the positive role of new countries and the national movements in the settlement of international problem.

(a) Undertaking joint action for the liberation of satellites as well as destroying imperialism, neo-colonialism and colonialism;

(b) To respect the right of peoples to self-determination to denounce the use of force in preventing peoples from enjoying this right;

(c) Racial discrimination and segregation policy;

(d) The settlement of differences without threatening or using force, in accordance with the UN principles;

(e) The respect of the sovereignty of countries and the unity of their territories, and the problems of divided nations;

(f) Peaceful co-existence and the control of its principles by the UN;

(g) Complete and total disarmament, the use of atomic energy for peaceful purposes, ban on all nuclear tests, establishment of denuclearized zones, prevention of the spread of nuclear weapons and total destruction of existing nuclear weapons;

(h) Foreign military pacts, troops and bases; and

(i) The UN, its role in international affairs, implementation of its resolutions, and modification of its Charter.

(3) Economic development and co-operation.

(a) Effects of disarmament on world economic development;

(b) The UN Trade and Development Conference.

(4) Cultural, scientific and educational co-operation, and re-inforcement of world and regional organizations working to this end.

(5) Other topics.

Main Speeches:

A warning of impending conflict between the powerful, wealthy nations of the world and the under-developed countries was sounded at the Conference on October 6.

The Conference heard the Indonesian President, Dr. Sukarno, Marshal Tito of Yugoslavia and the Tunisian President, Mr. Habib Bourguiba, outline the possible conflict as a military one or an economic explosion between the world's well-fed minority and the hungry majority.

President Sukarno sprang a surprise by what was thought in Cairo as a projection of the Chinese thesis that peaceful co-existence was a problem between Powers of unequal strength and not between those of equal strength.

He asked how co-existence could be applied to situations in Malaysia, Cyprus, Viet-Nam and Cambodia, complaining that in all these cases military bases and sometimes economic institutions too, which were established by forces trying to maintain the vested interests of the old order of the world, were being used against developing countries.

In a speech, considered by observers as accepted in favour if Peking, he told the non-aligned statesmen that "peaceful co-existence cannot be imposed." "Peaceful co-existence must be and always will be practised in the concrete condition of balance of forces. There will be peaceful co-existence between developing countries and imperialist States only when we can face them with equal strength." The main purpose of the Conference was to improve the lot of mankind. "Do not we all dream of a new world?"

Stressing the results achieved by the non-aligned nations since the Bandung meeting in 1955, he observed that "new forces are emerging" in the world.

He urged the setting up of a Co-ordinating Committee to work for "genuine liberation of the newly independent people."

He denounced what he called the "new forms of intervention" by the Great Powers.

President Tito of Yugoslavia called on the Conference "to demand resolutely that a beginning should be made in solving the question of general disarmament."

He referred to all the demands continually voiced by the non-aligned nations —eradication of colonialism and racial discrimination, sanctions against South Africa and aid to developing countries being an obligation of the developed countries—and warned that "events have occurred of late, which jeopardize the relaxation of tensions that has already been achieved."

He re-iterated Mr. Khruschev's thesis that border conflicts should be solved in a peaceful manner through negotiations between the countries directly concerned, and called for a solution to the German problem by direct talks between the two German States.

On racial discrimination, he said: "Racial discrimination and its most odious form, apartheid, in the Republic of South Africa, are a disgrace to mankind today. We must strive to have the sanctions against the Government of the Republic of South Africa, demanded by the United Nations and the Organization of African Unity put into effect."

He said there had recently been interference in the affairs of South-East Asia, Congo and Cuba. There had even been unjustified military interference. He expressed concern over what he described as "interference in South-East Asia because it threatened a spread of the dispute."

He suggested that the Conference should study the adoption of the policy of peaceful co-existence through UN.

President Bourguiba of Tunisia warned the non-aligned countries not to belittle the "new atmosphere of relaxed tensions between East and West, no matter how limited it may be."

But one of the world's great problems was the increasing gap between the prosperous minority and the hungry majority. "If this situation continues, we fear the weak and hungry peoples will have no course open but revolution. We must take action now before it is too late."

The Laotian Premier, Prince Souvanna Phouma condemned the "brutal type of foreign intervention" which, he said, his strife-torn nation had undergone. "Old and new imperialism are as alike as two brothers."

He called on the Conference to ask all the signatories of the 1962 Geneva Agreements on Laos to abide by its terms and help bring peace to South-East Asia.

He urged "concerted action" by the non-aligned nations to foster disarmament and the banishment of any threat or use of force in settling disputes.

He thanked India for what he said was her understanding of Laos' problems, and helping us to regain neutrality."

Mr. Lal Bahadur Shastri's Speech:

The Indian Prime Minister, Mr. Lal Bahadur Shastri, told the Conference on October 7 that the "time has now come to formulate a positive programme in the furtherance of peace."

He said: "We are meeting in this celebrated capital of a historic land. It is our esteemed friend, President Gamal Abdul Nasser who—together with President Tito and Prime Minister Sirimavo Bandaranaike —took the welcome initiative which has brought us all to Cairo from the four corners of the globe.

"Many of my distinguished colleagues have referred feelingly to the passing away of one of the founding fathers of the non-aligned movement, namely, our late Prime Minister, Pandit Jawaharlal Nehru. His departure has left an aching void in the hearts not only of his own countrymen but also in those of all the peace-loving peoples of the world. There is perhaps not one of us who does not miss his presence in this Conference, to whose aims and aspirations he had contributed so much. His voice, alas, is silent; but his message will continue to inspire all those striving for peace, international understanding and the freedom and dignity of man.

"It is indeed a unique gathering that we have here. What unites us and brings us together is not any pact, not any alliance, not even a common allegiance to any particular dogma or doctrine. By being non-aligned we have asserted and proclaimed the right to think for ourselves and to speak for ourselves. Our voice is not an echo. It is the authentic voice of the people we represent and for whom we speak. And we and our people share and agree upon certain ideals and certain objectives. First and foremost, we believe in peace, in the settlement of all disputes through peaceful means, in the abolition of war and more particularly nuclear war. Secondly, we believe in freedom—freedom for the people of each country to follow their destiny without external interference, and above all, we believe in the dignity of man as an individual, whatever his race, colour or creed, and his right to a better, fuller, and richer life.

"The non-aligned nations have the supreme task to chalk out in the light of the latest developments in the world a programme of action which should be followed in pursuit of their common objectives. The time has now come to formulate a positive programme in furtherance of peace. The main elements in the programme in our view should be the following five points:

"(1) Nuclear disarmament;

"(2) Peaceful settlement of border disputes;

"(3) Freedom from foreign domination, aggression, subversion and racial discrimination;

"(4) Acceleration of economic development through international co-operation; and

"(5) Full support for the United Nations and its programmes for peace and development.

"Many of those assembled here might recall how strongly the first Non-aligned Nations' Conference at Belgrade felt on the subject of nuclear tests and how separate missions were sent to USA and to USSR to persuade them to desist from further tests. With this background in mind, this Conference should consider the recent disturbing indications which suggest that China is about to explode a nuclear device.

"I would propose that we might consider sending a special mission to persuade China to desist from developing nuclear weapons. I say this not because India and China have their differences today; these differences must sooner or later be resolved. But the threat to humanity from one more country having nuclear

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

weapons at its disposal is a far more serious matter.

"We in India stand committed to use atomic energy only for peaceful purposes and even though in a purely technical and scientific sense, we have the capacity of developing nuclear weapons, our scientists and technicians are under firm orders not to make a single experiment, not to perfect a single device which is not needed for the peaceful uses of atomic energy. Despite all our differences, may I venture to take this opportunity of appealing through this Conference to China to accept a similar discipline."

Referring to countries under colonial rule, he said: "While we stand pledged to the right of self-determination for dependent territories under colonial rule, I would like to sound a note of caution. Self-determination is the right of any country that is dominated by another. But there can be no self-determination for different areas and regions within a sovereign and independent country, for this would lead only to fragmentation and disruption, and no country's integrity would be safe."

Other Speeches:

President Ahmed Ben Bella of Algeria proposed the convening of a new non-aligned conference to discuss primarily the problems of economic development.

He also advocated the convening of a World Disarmament Conference.

He vigorously supported UN, which he termed as an instrument of peace, and advocated its strengthening. "Democratization of UN will be reached if the widest possible circle of Asian, African and Latin American countries take their seats in UN."

He also supported China's admission to UN.

President Kwame Nkrumah of Ghana submitted a five-point proposal:

(1) The non-aligned countries should appeal to UN and request it to adopt a declaration to abolish all remnants of colonialism and imperialism. All dependent countries should be immediately granted independence.

(2) The UN's peace role should be expanded.

(3) The 77 nations which drew up the declaration on economic development at the recent Geneva Conference on Trade and Development should extend its scope in the interests of more rapid economic development.

(4) China should be admitted to UN before the end of the year.

(5) All kinds of nuclear tests, including underground tests, should be banned.

Nigeria's Minister of State, Mr. Bamali Nuhu, said that the Conference should concentrate on "a sober re-appraisal of world problems" instead of propagandistic declarations.

He said that the Nigerian Government was "concerned at the short-sighted, intransigent attitude of the rulers of South Africa". It was "dedicated to restoration of human dignity there."

He asked the Conference to support a move for stopping all trade with South Africa and declare the situation in that country "a threat to international peace and stability."

The Prime Minister of Burma, Gen. Ne Win, said the world faced an "ominous prospect of fall-out from yet more nuclear tests to come" and urged non-aligned countries to work for a complete halt to all nuclear testing.

Speculation in USA that Peking was near to exploding its first nuclear device had an impact among delegates but none, including Gen. Ne Win, condemned China by name.

President Tubman of Liberia warned the Conference that it was not enough that the danger of nuclear war should create an era of superficial peace. A new spirit must prevail over the world because man could not live in fear of war.

Expressing his country's belief in justice, freedom and independence, he said that non-aligned nations must form an effective moral force and great international road on which nations would find amicable settlement of disputes and a world peace based on justice and equality.

Rejecting the idea that the interests of one nation entitled it to interfere politically and militarily in the affairs of a neighbouring or distant country, President Sekou Toure of Guinea said that non-alignment should prevent the division of the world into spheres of influence.

The Conference should affirm that no nation was more responsible than another in international politics. Big Powers should be made to understand the collective will for real independence which makes impossible any phenomenon of imperialism.

The Cambodian Prime Minister, Prince Norodom Kantol, attacked US policy and warned that the Indo-China problem could develop into a world war.

The tragedy of Indo-China was caused by the blunder of Big Powers refusing to fulfil the letter and spirit of the Geneva Agreement. The USA had "violated" the Agreement when it tried to replace the withdrawing French forces and sent military personnel of its own, falsely called experts, to take part in the "fighting" in South Viet-Nam.

The Ceylon Prime Minister, Mrs. Sirimavo Bandaranaike, told the Conference on October 8 that conditions were not ripe for fresh action by the Colombo Powers to solve the Sino-Indian dispute. But they would continue contacts with each other so as to settle this problem peacefully.

She proposed that the Conference accept a resolution on denuclearization of Africa, the Indian Ocean and South Atlantic.

She also proposed that non-aligned countries codify the principles of peaceful co-existence and follow this up at the UN General Assembly with a corresponding draft resolution.

ways to safeguard peace and security not only for ourselves but for all.

"This Conference, which is taking place three years after the first meeting in Belgrade and which is developing the sign of vigorous growth of non-alignment, has the task not only to re-affirm the policy of non-alignment but also to develop it."

Crown Prince Hassan Al Reda of Libya declared his country's support for all liberation movements, asserting that "Libya has suffered a great deal from imperialism and its evils."

He requested that the Conference support the Palestine Liberation Committee recently formed with the aim of restoring Palestine Arabs to their former homes.

King Mahendra of Nepal extended Nepal's support for the fight against colonialism everywhere.

He claimed that the spirit generated at the first Non-aligned Conference in Belgrade in 1961 was "one of the factors in the improved international climate today."

President Makarios of Cyprus said that since Cyprus had become independent she had been subjected to pressure to drop her policy of non-alignment. But she had maintained her faith in non-alignment.

He said if what had been announced about the imminence of China exploding a nuclear bomb were true, it was a matter which caused concern. He agreed with the Indian Prime Minister, Mr. Lal Bahadur Shastri, that the Conference should address an appeal to China to refrain from conducting nuclear tests.

Homage To Mr. Nehru:

The Conference observed a minute's silence in memory of the late Indian Premier, Mr. Jawaharlal Nehru on October 7.

President Kwame Nkrumah of Ghana suggested the commemoration. He said: "The Conference missed the wise counsel of Mr. Nehru."

Mr. Lal Bahadur Shastri told the Conference that Mr. Nehru's "departure has left an aching void in the hearts of not only his own countrymen but also in those of all peace-loving peoples of the world."

President Johnson of USA in his message to the Conference, referred to the late President Kennedy's role in obtaining the Nuclear Test Ban Treaty and contribution to world peace and said: "Another great peace-maker, Mr. Jawaharlal Nehru, has also been taken from us. But his visions for a better world were never more alive than now."

Emperor Haile Selassie of Ethiopia paid tribute to Mr. Nehru and said that Mr. Nehru's death was an "inestimable loss to mankind."

Conference Ends:

The Conference ended at midnight on October 10, after approving its resolutions.

President Nasser thanked the delegates for their presence and congratulated them on the resolutions.

He said: "May the flags of peace based on justice be flown higher and higher, casting their shadow on the entire world and may peace and God's mercy be on you."

President Ahmed Ben Bella proposed the addition of a passage to the statement embodying the Conference's resolutions. The passage, which was approved by the Conference at the closing sitting, expressed the Conference's conviction that the formation of the Organization of African Unity constituted an important contribution towards the consolidation of peace in the world and towards the support of the policy of non-alignment and peace in the world.

Under the Algerian leader's proposal, the Conference also declared that the Organization of African Unity's activities should be co-ordinated for the protection of the mutual interests of the African countries within the frame-work of economic, cultural and social development and within the scope of international co-operation.

Resolutions:

Under the title "Programme for Peace and International Co-operation", the Conference published on October 11 its resolutions.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The resolutions, in part, were as follows:

"The Conference undertook an analysis of the international situation with a view to making an effective contribution to the solution of the major problems which are of concern to mankind in view of their effects on peace and security in the world.

"To this end and on the basis of principles embodied in the Belgrade Declaration of September, 1961. The Heads of State or Government of the non-aligned countries proceeded in an amicable, frank and fraternal atmosphere to hold detailed discussions and an exchange of views on the present state of international relations and the predominant trends in the modern world.

"The Heads of State or Government of participating countries note with satisfaction that nearly half of the independent countries of the world have participated in this second non-aligned conference....

"The principles of non-alignment, thanks to the confidence they inspire in the world, are becoming an increasingly dynamic and powerful force for the promotion of the peace and welfare of mankind.

"The participating Heads of State or Government note with satisfaction that thanks to the combined efforts of the forces of freedom, peace and progress, this second Non-aligned Conference is being held at a time when the international situation has improved compared with that which existed between the two Power blocs at the time of the historic Belgrade Conference.

"The Heads of State or Government of the non-aligned countries are well aware, however, that despite the present improvement in international relations and notwithstanding the conclusion and signature of the Treaty of Moscow, sources of tension still exist in many parts of the world.

"This situation shows that the forces of imperialism are still powerful and that they do not hesitate to resort to the use of force to defend their interests and maintain their privileges. This policy, if not firmly resisted by the forces of freedom and peace, is likely to jeopardize the improvement in the international situation and the lessening of tension which has occurred, and to constitute a threat to world peace.... The Conference reaffirms that interference by economically developed foreign States in the internal affairs of newly independent or developing countries and the existence of territories which are still dependent constitute a standing threat to peace and security.

"The Heads of State or Government of the non-aligned countries, while appreciative of the efforts which resulted in the holding of the United Nations Conference on Trade and Development, and mindful of the results of that Conference, nevertheless note that much ground still remains to be covered to eliminate existing inequalities and relationships between industrialized and developing countries.

"....The Heads of State or Government have arrived.... at a common understanding of various problems with which the world is now faced and a common approach to them. Re-affirming the basic principles of the Declaration of Belgrade, they express their agreement upon the following points:

"Section 1: Concerted action for the liberation of countries still dependent, elimination of colonialism, neo-colonialism and imperialism;

"The participants in the Conference deplore that the declaration of United Nations on granting independence to colonial countries and peoples has not been implemented everywhere and call for unconditional, complete and final abolition of colonialism now.

"At present a particular cause for concern is the military or other assistance extended to certain countries to enable them to perpetuate by force colonialist and neo-colonialist situation....

"Exploitation by colonialist forces of difficulties and problems of recently liberated or developing countries, interference in the internal affairs of these States and colonialist attempts to maintain unequal relationships, particularly in the economic field, constitute serious dangers to these young countries.

"The Conference condemns all colonialist, neo-colonialist and imperialist policies applied in various part of the world.

"On the rapidly deteriorating situation in Congo, the participants:

"(1) Support all efforts being made by the Organization of African Unity to bring peace and harmony speedily to that country,

"(2) Urge the ad hoc commission of the OAU to shirk no effort.... to achieve national reconciliation in Congo,

"(3) Appeal to the Congolese Government and all combatants to cease hostilities immediately....

"(4) Urgently appeal to all foreign Powers at present interfering in the internal affairs of the Democratic Republic of Congo, particularly those engaged in military intervention in that country, to cease such interference....

"(5) Affirm full support for.... the OAU's ad hoc commissions....

"(6) Call upon the Government of the Democratic Republic of Congo to discontinue the recruitment of mercenaries immediately and expel all mercenaries of whatever origin who are already in Congo to facilitate an African solution.

"..... The process of liberation is irresistible and irreversible. Colonized peoples may legitimately resort to arms to secure the full exercise of their right of self-determination and independence if the colonial Powers persist in opposing their natural aspirations.

"Participants in the Conference undertake to work un-remittingly to eradicate all vestiges of colonialism, recognize nationalist movements of peoples which are struggling to free themselves from colonial domination.... and urgently call upon the colonial Powers to negotiate with their leaders.

"Portugal continues to hold in bondage by repression, persecution and force in Angola, Mozambique, so-called Portuguese Guinea and other Portuguese colonies in Africa and Asia millions of people....

"The Conference declares its determination to ensure that peoples of these territories accede immediately to independence without any conditions or reservations.

"The Conference condemns the Government of Portugal for its obstinate refusal to recognize the inalienable right of the peoples of those territories to self-determination and independence....

"The Conference:

"(1) Urges the participating countries to afford all necessary and material support —financial and military—to freedom fighters in the territories under Portuguese colonial rule;

"(2) Takes the view that support should be given to the revolutionary government of Angola in exile and nationalist movements struggling for the independence of Portuguese colonies....;

"(3) Calls upon all participating States to break off diplomatic consular relations with the Government of Portugal and take effective measures to sever all trade and economic relations with Portugal....

"The countries participating in the Conference condemn the policy of the racist minority regime in Southern Rhodesia.... urge all States not to recognize the independence of Southern Rhodesia if proclaimed under the rule of the racist minority and give favourable consideration to according recognition to an African nationalist Government-in-exile....

"The Conference calls upon the United Kingdom to convene immediately a constitutional conference.... for the purpose of preparing a new Constitution based on the one-man, one-vote principle....

"The Conference re-affirms the inalienable right of the people of South-West Africa to self-determination and independence and condemns the Government of South Africa for its persistent refusal to co-operate with United Nations in the implementation of pertinent resolutions of the General Assembly.

"The Conference recommends that United Nations should guarantee the territorial integrity of Swaziland, Basutoland and Bechuanaland and should take measures for their speedy accession to independence....

"Participants in the Conference call upon the French Government.... to enable French Somaliland to become free and independent....

"The Conference condemns imperialistic policy pursued in the Middle East and in conformity with the Charter of United Nations decides to:

"(1) Endorse the full restoration of the rights of the Arab people of Palestine to their homeland and their inalienable right to self-determination;

"(2) Declare their full support to the Arab people of Palestine in their struggle for liberation from colonialism and racism.

"The Conference condemns the continued refusal of the United Kingdom Government to implement the United Nations resolutions on Aden and the protectorates providing for the free exercise by peoples.... of their right to self-determination and calling for the liquidation of the British military base in Aden and the withdrawal of British troops from the territory.

"The process of liberation is irresistible and irreversible. Colonised peoples may legitimately resort to arms to secure the full exercise of their right to self-determination and independence if colonial Powers persist in opposing their natural aspirations. All international conflicts must be settled by peaceful means in such a manner that justice and legistimate rights are not impaired."

It recommended the UN General Assembly to adopt the declaration on the principles of peaceful co-existence.

Under the Section on respect for sovereignty of States and their territorial integrity, the Conference called upon all countries to respect the sovereignty, independence and territorial integrity of Cyprus, and refrain from threat or use of force or intervention.

It declared that Cyprus was entitled to "unrestricted sovereignty and independence" and her people must be enabled to determine freely the country's political future on the basis of the self-determination principle. The Conference also recommended the elimination of foreign bases in Cyprus.

It urged the conclusion of an agreement by the Great Powers on general, complete disarmament. They declared readiness to abstain from manufacturing, acquiring or experimenting with nuclear weapons and invited all countries to subscribe to a similar undertaking, and close ports and aerodromes to any ships and planes used by the Powers for dispositioning nuclear weapons.

The Conference hoped it would be possible to create denuclearized zones in Africa, Latin America, parts of Europe and in the oceans of the world by agreement of all States in such areas or bordering the oceans.

It urged the evacuation of Guantanamo base in Cuba and declared that the establishment of new bases in the Indian Ocean would constitute a menace to peace, security and independence in this region.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar.

Digitized by Arya Samaj Foundation Chennai and eGangotri

It called for the "liquidation of the British military base in Aden" and backed "the struggle of the people of Aden and the protectorates."

It also made an accusation of "British colonialism" in Oman. It condemned the "manifestation of colonialism and neo-colonialism" in Latin America, calling for self-determination in that region.

It urged independence for British Guiana and regretted that Martinique, Guadaloupe and other Caribbean islands were still not self-governing.

It declared that peaceful co-existence between States with differing social and political systems "is both possible and necessary". States must abstain from all use of the threat of force against the territorial integrity and political independence of other States. "A situation brought about by the threat or use of force shall not be recognized."

The Tshombe Affair:

A Congolese special jet liner, carrying the country's controversial Premier, Mr. Moise Tshombe, was unable to land at Cairo airport on October 5 and had to seek landing facilities at Athens.

According to an airport source, the airport authorities radioed a message to the pilot of the aircraft that it could not be given landing rights if Mr. Tshombe was aboard and that in that case it should proceed to the next port. However, according to a Reuter report from Cairo, the Egyptian authorities denied that Mr. Tshombe's plane was turned away from Cairo airport. The report quoted "authoritative local sources" as saying that the plane had been diverted because an American private plane had radioed that it was in difficulties over Port Said and wanted to make an emergency landing at Cairo.

The aircraft, a Boeing, was bringing Mr. Tshombe to Cairo where he intended to lead his country's delegation to the Non-Aligned Conference despite a cable sent by Heads of the three of the sponsoring States—UAR, Yugoslavia and Ceylon—to President Kasavubu, making it clear that Mr. Tshombe would not be welcome at the Conference. The cable had requested Mr. Kasavubu to attend the Conference personally and not to send or bring Mr. Tshombe to avoid difficulties which could impede the normal work of the Conference.

The cable had been dispatched after a majority decision in the Political Committee of the Conference of Foreign Ministers on October 4 against Mr. Tshombe's participation.

Security guards held Mr. Tshombe in diplomatic quarantine in Cairo while leaders of the non-aligned nations met for the second day.

Police and security men ringed El Orouba palace, on the Cairo outskirts, where the Congolese Prime Minister was driven after a 45-minute wait at Cairo airport. They refused to allow Congolese diplomats in to see him, and guards told all comers that "the palace is in quarantine." Even the Congolese Charge d'Affaires was refused admittance, despite arguments with the police and sitting on the kerbside outside the palace in a fruitless wait.

The UAR Government told Mr. Tshombe on October 7 that he would not be allowed to leave Cairo until the staff of the UAR Embassy in Leopoldville were given safe conduct to leave Congo.

Egyptian and Algerian diplomats, whose Embassies had been surrounded by armed Congolese soldiers for 48 hours, were allowed to leave Leopoldvile on October 8.

They sailed from the Congolese Capital aboard two ferry boats bound for Brazzaville, Capital of the former French Congo, less than three miles away across the Congo River. All movement in and out of the two Embassies had earlier been halted to retaliate against the UAR's treatment of Mr. Tshombe in Cairo.

Mr. Tshombe, held a virtual prisoner in Cairo for the last two days, was earlier reported to have ordered his aides to free the staffs of the guarded UAR and Algerian Embassies in Leopoldville.

Mr. Tshombe arrived in Athens on October 9 from Cairo and told newsmen that his treatment by Egyptian authorities had been "inhuman".

He said he was "happy to be in a free country."

Asked if Egypt was a free country, he laughed and replied: "I don't know, but the treatment rendered by the Egyptian authorities was inhuman."

[Prev. ref. 6154:CHI:B]

B. Mr. N. Khruschev Resigns From Soviet Premiership—New Appointments: The official Soviet news agency *Tass* announced on October 16 that Mr. Nikita Khruschev had stepped down as Russia's Prime Minister and Communist Party leader on grounds of old age and ill-health.

Mr. Leonid Brezhnev, former Soviet President and a senior member of the Party Secretariat, took over Mr. Khruschev's key role as the Party's First Secretary. Mr. Alexei Kosygin, First Deputy Prime Minister, succeeded him as Chairman of the Council of Ministers (Prime Minister).

Both had been closely associated with Mr. Khruschev during most of his 11 years as Russia's strong man.

Mr. Khruschev was present at the special meeting of the top members of the Party Central Committee which took the decisions.

The change in Soviet leadership followed a day of unconfirmed rumours that Mr. Khruschev was being ousted.

The Soviet Communist Party newspaper Pravda indicated on October 16 that the Party would continue to carry out policies of de-Stalinisation and economic improvements under its leadership.

The official announcement about the plenary meeting of the Central Committee said: "A plenary meeting of the Central Committee of the Soviet Communist Party was held on October 14.

"The plenary meeting of the Central Committee granted N. S. Khruschev's request to be relieved of his duties as the First Secretary of the Central Committee, member of the Presidium of the Central Committee and Chairman of the Council of Ministers of the Soviet Union in view of his advanced age and deterioration of his health.

"The plenary meeting of the CPSU Central Committee elected L. I. Brezhnev First Secretary of the CPSU Central Committee."

The appointment of Mr. Kosygin to the post of Prime Minister was made at a meeting of the Presidium of the Supreme Soviet.

The official announcement about this meeting said: "The Presidium of the Supreme Soviet of the Soviet Union met on October 15 with Comrade A. I. Mikoyan, the President of the Presidium of the Supreme Soviet of the Soviet Union, in the chair.

"The Presidium of the Supreme Soviet of the USSR discussed the question of Chairman of the Council of Ministers of the USSR.

"The Presidium of the Supreme Soviet of the USSR granted the request of Nikita Sergeyevich Khruschev on his relief from the duties of Chairman of the Council of Ministers of the USSR in view of his advanced age and deterioration of health.

"The Presidium of the Supreme Soviet of the USSR appointed Comrade Alexei Nikolayevich Kosygin as Chairman of the Council of Ministers of the USSR, releasing him from his duties of First Vice-Chairman of the Council of Ministers of the USSR.

"The decrees by the Presidium of the Supreme Soviet of the USSR on the relief of Comrade N. S. Khruschev from his duties as Chairman of the Council of Ministers of the USSR and on the appointment of Comrade A. N. Kosygin as Chairman of the Council of Ministers of the USSR were adopted unanimously by the members of the Presidium of the Supreme Soviet of the USSR.

"Members of the Presidium of the Supreme Soviet warmly congratulated Comrade A. N. Kosygin on his appointment to the post of Chairman of the Council of Ministers.

"Comrade A. N. Kosygin heartily thanked the Central Committee of the Communist Party of the Soviet Union and the Presidium of the Supreme Soviet of the Soviet Union for the confidence shown him and gave the assurance that he would do his utmost to discharge his duties."

Mr. Brezhnev, who is 57, is a commanding personality, and a powerful speaker. He had for some months been regarded as a hot favourite to succeed Mr. Khruschev—since July, in fact, when he gave up the largely ceremonial duties of President of the Soviet Union. That position, which he took over in 1960, is now held by Mr. A. Mikoyan. Mr. Brezhnev left it to concentrate on his important duties as Secretary of the Central Committee of the Soviet Communist Party.

He was born at Dneprodzerzhinsk, in the Ukraine, on December 19, 1906, the son of a steelworker. He began work at the age of 15. He studied land reclamation and irrigation in his spare time, and became a land surveyor.

In 1927 he lived and worked in the Urals and within three years became deputy head of the region's agricultural administration. He joined the Communist Party in his native town the following year.

The year of Stalin's great purge, 1937, was the turning point in Mr. Brezhnev's career. He was elected deputy mayor of Dneprodzerzhinsk in that year and took up full-time party work, becoming first secretary of the Dnepropetrovsk regional committee. He thus began his political life alongside Mr. Khruschev, who in 1939 had been sent from Moscow to Kiev, the Ukrainian capital, to run the republic's party organization.

The two men worked closely together during the War when Mr. Khruschev was a political commissar with the Soviet Army in the Ukraine and Mr. Brezhnev one of his assistants. Soon after the War, Mr. Brezhnev was promoted party overlord of the Moldavian Republic, and in 1952 he became a candidate member of the Communist Party Presidium.

After Stalin's death in 1953 he was dropped from the Presidium and returned to his wartime task as deputy head of the chief political administration of the armed forces. His fall from grace was only temporary, however, and in 1956 he again became a candidate member of the Presidium.

The following year proved crucial to his later career, for he came out in support of Mr. Khruschev in the struggle for power with the "anti-party group", which finally resulted in the expulsion from the party of Molotov, Malenkov, and others. Soon afterwards he became a full member of the Presidium.

Mr. Alexei Nikolayevich Kosygin, who succeeds Mr. Khruschev as titular head

of the Soviet Government (but without the power that Mr. Khruschev was able to exert as party leader) is 60. Mature, quiet-spoken, and lacking much of the natural exuberance that his predecessor brought to the post, he is accustomed to wielding great administrative powers, although he has always recognized their limitations, and has been careful never to challenge the authority of those above him.

He became First Deputy Prime Minister in 1960, three years after he had become a Minister of the Soviet Union. Mr. Kosygin was one of Zhdanov's proteges, and it was possibly only because of his expertise in light industries that he survived the fall of his sponsor after the death of Stalin.

Born in Leningrad in 1904, the son of a worker, Kosygin joined the Red Army and fought in the civil war. He first joined the Communist Party in 1927, and began a special study of textile engineering. In this capacity he has played a leading role in the development of textile production and the growth of light industries in the Soviet Union.

In 1946 he was made a deputy chairman of the Soviet Council of Ministers, and Minister of Light Industry two years later. As deputy chairman of the Council he was the youngest member of the Politburo, predecessor of the Presidium.

He became a candidate member of the Presidium in 1952, and in 1956 a first deputy chairman of the State Economic Commission, with ministerial rank. In 1955 he visited Britain with a Russian trade delegation.

Charges Against Mr. N. Khruschev:

Pravda stated on October 17 that Mr. Khruschev had been replaced because of "hare-brained scheming", hasty decisions and "armchair methods".

Pravda made it clear the Kremlin's new leaders intend to press forward with plans for an international conference in December "of all Communist parties" to deal with topical problems of peace, Socialism and unity. But there was no mention of Russia's ideological quarrel with China. The conference was originally proposed by Mr. Khruschev—to be held next Summer—to discuss the Sino-Soviet dispute, but Peking's leaders had said they would boycott it.

It underlined that Soviet policy remained based on the "general line" worked out at post-Stalin Party Congresses.

It described the Soviet Communist Party as an "enemy of subjectivism and drifting in Communist construction."

"Hare-brained scheming, immature conclusions and hasty decisions and actions divorced from reality, bragging and phrase-mongering, commandism and unwillingness to take into account the achievements of science and practical experience are alien to it.

"The construction of Communism is a live, creative undertaking and it does not tolerate armchair methods, personal decisions and disregard for the practical experience of the masses."

The Tass version of the editorial did not make it clear whether Mr. Khruschev was mentioned by name. But Moscow observers interpreted the criticism as referring to the ex-Premier's tenure of office.

The editorial said: "In following its general course, the Party has been irreconcilably and consistently opposing and continues to oppose the ideology and practice of personality cult which is alien to Marxism-Leninism, alien to the very nature of our Socialist system."

The editorial was headlined "immutable Leninist general line of the CPSU."

It said the Communist Party was taking all measures to strengthen the defensive potential of the Soviet Union and to safeguard the security of the entire Socialist community.

The Party "regards it as its duty to do its utmost to safeguard the peaceful labour of the people, to avert a world thermo-nuclear war, to set a course towards a solution of international disputes through negotiation, to improve and develop relations with all countries in the interests of peace, to develop international co-operation in the sphere of the economy and science and technology."

On foreign policy, it said the Party's general line "is the struggle for peace and international security, the application of the principle of peaceful co-existence between States with a different social order advanced by Lenin."

Foreign Communists Re-assured:

On October 26, foreign communists were re-assured that Russia's new leaders wanted their relations with other Parties to be based on equality.

An editorial in the Government newspaper Izvestia, headed "Co-operation of Equals", laid great stress on the need for unity and solidarity in the Communist camp.

The assurances came as three leading members of the French party were reported to have held talks on October 26 with top Soviet party officials.

The French were the first of a number of Western party delegations visiting Moscow to seek explanations of why and how Mr Khruschev was replaced.

Communist opinion in Eastern Europe was reported to be angered and disturbed and was pressing for an answer, demanding to know the reasons for Mr. Khruschev's dismissal.

The Czechoslovak Central Committee issued a declaration expressing shock and surprise over his dismissal and praising his great merits for bringing about significant changes both inside the Soviet Union and within the communist world at large.

All these changes, the Czechoslovak communist leaders said, had been closely connected with his name, and his resignation had therefore caused in the minds of many people "deep thinking and apprehension".

Although Mr. W. Gomulka, of Poland, and Mr. J. Kadar, of Hungary, had been re-assuring themselves and their countrymen that there would be no changes in Soviet policy, their cautious public pronouncements gave more than a hint of their personal apprehension and of their disapproval of the way in which Mr. Khruschev was forced to relinquish his post.

Mr. Gomulka gave the Russians a broad hint that should Mr. Khruschev's dismissal be followed by an anti-Khruschev campaign, he would not acquiesce in it, nor would his party join in personal condemnation of Mr. Khruschev.

Never since the War had Soviet leaders been exposed to such a public outcry and outright criticism inside their own bloc and among their own followers. The Italian communists, always more outspoken, had publicly demanded that the new leaders in Moscow should reveal the truth.

East European leaders had, by implication, raised the same demand. An increasing number of them were pressing for a meeting of communist leaders, and even those who had earlier doubted the usefulness of a conference as envisaged by Mr. Khruschev, were saying that a meeting of communist leaders should be convened as urgently as possible.

President Johnson's Comment:

President Johnson said on October 16 that Mr. Khruschev's fall "may or may not be a sign of deeper turmoil or may be a sign of changes in policies to come."

He told a mass political rally at Madison Square Garden: "You will see in your papers the changes and uncertainties in this big world in which we live which give great weight to our need for a stable, sure, steady course on the basis of a tested and bipartisan foreign policy."

Mr. Johnson, after making his first reference to the changes in Soviet leadership, said: "We do not want to bury any one and we do not intend to be buried ourselves."

Mr. Anatoly Dobrynin, the Soviet Ambassador to USA assured President Johnson on October 16 that the new Soviet leaders would continue a policy of peaceful co-existence with the West.

Mr. Johnson on October 18 sent greetings to the new Soviet Premier, Mr. Alexei Kosygin.

He said: "I extend greetings to you on your designation as Chairman of the Council of Ministers of the Union of Soviet Socialist Republics. Our countries bear heavy responsibilities for the maintenance of world peace. It is my hope that our Governments will work constructively in attempting to resolve the urgent international problems facing us in the world."

Chinese Reaction:

A Tokyo despatch on October 17 said that the elimination of Mr. Khruschev from the leadership of the Soviet Union had brought about a prompt and noticeable change in the attitude of China towards Moscow.

The change was revealed in the message of greetings sent by the top Chinese Party and Government leaders to the new Soviet Communist Party First Secretary, Mr. Brezhnev, and the new Premier, Mr. Kosygin, which also contained a new call for rapprochement between the two countries and parties "on the basis of Marxism-Leninism and proletarian internationalism".

The message said: "We, on behalf of the Chinese people, the Communist Party of China and the Chinese Government extend to you our warm greetings."

The message expressed joy "at every progress made by the great Soviet Union, the Communist Party of the Soviet Union and the Soviet people on their road of advance" and the unity of "the Chinese and Soviet parties and our two countries on the basis of Marxism-Leninism and proletarian internationalism."

It concluded: "May the fraternal, unbreakable friendship between the Chinese and Soviet peoples continuously develop."

C. Anniversary Of Russian Revolution—Mr. L. Brezhnev's Policy Statement: The Soviet Union paraded new monster rockets through the Red Square of Moscow under the eyes of top Communist world leaders gathered in the Soviet Capital to celebrate the 47th anniversary of the Great October Revolution on November 7.

The Soviet military authorities wheeled five new types of rockets out of their secret armouries—one of them the biggest ever shown publicly in the Soviet Union.

Mr. Leonid Brezhnev, the new Soviet Communist Party Chief, who presided over the festivities, and Marshal Rodin

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Malinovsky, Soviet Defence Minister, speaking on the occasion, re-affirmed the Soviet Union's dedication to peaceful co-existence.

Mr. Brezhnev, in a major policy speech, maintained the Soviet line of peaceful co-existence and for holding a world conference of Communist Parties without any basic concessions to China.

He declared himself against the dissemination of nuclear weapons and reiterated the Soviet line that Soviet nuclear power was sufficient to protect all of the socialist camp countries.

He said that more realistic and thorough efforts would be made to solve economic and agricultural problems and to restore "the truly Leninist norms in the life of our party." The Party's "Central Committee and the Soviet Government deem it to be their duty to carry out certain steps to perfect economic management, doing this cautiously, without fuss or haste."

[Observers took this reference to "caution" and condemnation of "fuss and haste" as an indirect slam at Mr. Khruschev.]

More specifically, Mr. Brezhnev confirmed the abolition throughout USSR of "unwarranted restrictions" on the individual plots of land cultivated by collective farmers. [These restrictions had been imposed in Mr. Khruschev's time.]

He said USSR considered it necessary that all pending international problems should be settled step-by-step. "We are for disarmament, but we are against the creation of multilateral nuclear forces animated by a spirit of revenge. To the adventure-seekers, we say: 'Hands off Cuba'. For, this is a demand made not only by the Soviet people, but also by all honest folk on earth. We demand the return of Taiwan to its Motherland and the re-unification of the two Viet-Nams."

To the West, he offered peaceful co-existence which the Chinese reject, increased trade, and disarmament, including measures like the 1963 Moscow Test Ban Treaty which the Chinese, who now have their own A-bomb device, refused to sign.

To the Communist movement he offered more flexibility, declaring that no one party had the right to "impose experience" on other parties and countries.

[His remarks were taken as an open invitation to the Chinese to try to reach an agreed line with the Russians, although he made no major concessions to the Chinese on matters of principle.]

He said the party's slogan should be: "everything in the name of man, everything in the name of man, everything for the benefit of man," contrasting sharply with China's position that Communists should pay more attention to spreading violent revolution and less to the welfare of the Soviet people.

He said the Soviet Party believed "that in present conditions a world war is not inevitable," adding, "peace on earth can be ensured."

Russia, he said, wanted to "consolidate the cause of peace." The US Presidential election showed the majority of American people cherished the idea of peace. "The defeat of the American ultras is a good lesson for all the partisans of adventures and cold war."

Albania was the only Communist country which failed to send a top-ranking delegation. China was represented by her Prime Minister, Mr. Chou En-lai.

The five new additions to this year's display of Soviet military hardware comprised two groups of what appeared to be free-flight field artillery weapons, a high-altitude anti-aircraft weapon and two surface-to-surface rockets—one of them about 85 feet long and 10 to 12 feet in diameter.

A Tass description of the anti-aircraft missiles said they could "destroy any fast-flying targets in the air, no matter if they fly at high or low altitudes, regardless of the time of year, day or night, in rain, snow and fog." It said they also were proof against radio counter-measures.

Indian Messages:

The President of India, Dr. S. Radhakrishnan, and the Prime Minister, Mr. Lal Bahadur Shastri, sent greetings to Russia on the occasion of the anniversary of the Great October Revolution.

Dr. Radhakrishnan's message said:

"The Government and the people of India join me in conveying to Your Excellency and to the Government and people of the USSR our warm congratulations and greetings on the happy occasion of the anniversary of the Great October Revolution, as well as our sincere good wishes for your personal health and happiness and for the welfare and continued advancement of your people.

"I have brought back many pleasant memories of my recent visit to your great and friendly country and feel sure that the personal contacts thus established will greatly strengthen the bonds of friendship so happily existing between India and the USSR."

Mr. Shastri in his message said:

"On the great occasion of the 47th anniversary of the Great October Revolution, I have much pleasure in extending to Your Excellency the cordial felicitations of my colleagues in the Government of India, to which I add my own, together with our best wishes for your continued good health and for the progress and prosperity of the people of your country.

"I take this opportunity to re-iterate the hope that the friendly relations and close co-operation existing between our two countries will continue to strengthen in the cause of world peace and progress."

(*Tass, The Statesman*, Calcutta and *The Hindustan Times*, New Delhi)

[Prev. ref. 4307:CHI:A]

D. Mr. Lyndon B. Johnson Elected US President: President L. B. Johnson was swept back to power on November 4 for the next four years by a massive majority over his Republican opponent, 55-year-old Senator Barry Goldwater.

In routing the Senator for Arizona, President Johnson vastly improved upon the thumping 11,000,000-vote majority which Mr. Franklin Delano Roosevelt had secured over his rival, Mr. Alf Landon, in 1936.

Senator Goldwater carried only six States out of 50. They were the five States in the South—Alabama, Mississippi, South Carolina, Louisiana, Georgia and his home State, Arizona.

Mr. Johnson won the Presidency at 9 a.m. New York time on November 3 when, even as polling on the Western sea-board was still in progress, he had already captured the necessary minimum of 270 out of a total 438 electoral college votes. At that stage, Mr. Goldwater had only 25.

The final figures in the electoral college votes were: L. B. Johnson 486 and Barry Goldwater 52.

One of the most crushing blows for the Goldwaterites was the fall of California whose 40 electoral college votes Mr. Johnson won. Mr. Goldwater's strategy for victory by combining Southern segregationist votes with Western votes collapsed when one populous Western State after another joined the Eastern sea-board States to give Mr. Johnson a landslide victory.

The Johnson victory was as overwhelming as most of the pollsters had forecast. With the count nearly complete, Mr. Johnson's popular vote (42.1 million) far exceeded the previous record (35.5) million rolled up by Dwight Eisenhower against Adlai Stevenson in 1956. In plurality (15.6 million) and in percentage of the popular vote (61.3) he broke the records (11 million and 60.8 per cent) set by Franklin Roosevelt against Alfred Landon in 1936. (Presidents Roosevelt and Johnson are the only Democrats elected by majorities of the popular vote since the Civil War.) In electoral vote (486 to 52) the Johnson performance was surpassed only by the Roosevelt landslide (523-8) in 1936.

Mass Desertions:

The overall figures on the Goldwater vote also told a remarkable story.

Senator Goldwater got about 26 million votes, or 7.5 million fewer than Richard Nixon in his hairbreadth defeat four years ago. That indicated massive desertions by the Republicans.

In the 1936 elections, President Roosevelt had mustered 27,751,597 votes against his rival's 16,679,583 votes.

Fifty-six-year-old Mr. Johnson, the first Southerner to come to the White House in an election, also created a precedent by claiming victory before his opponent conceded defeat.

Mr. Johnson's great popular vote was interpreted as a vote for peace, sobriety and responsibility. Although Mr. Goldwater campaigned on the issue of socialism, many regard Mr. Johnson as a truer conservative than Mr. Goldwater, who was regarded as really an extreme Right-winger both in his domestic and foreign policies.

The Democratic Vice-Presidential candidate, the well-known liberal, Mr. Hubert H. Humphrey, was automatically elected with Mr. Johnson.

Congressional Elections:

Side by side with his Presidential victory, the Democrats romped home to a majority in Congress. They held the Senate and the House of Representatives.

In the House of Representatives, with all 435 seats contested, the Democrats scored a net gain of at least 39 to assure President Johnson of the biggest Democratic majority since the 333-102 margin at the high point of the Roosevelt New Deal in 1936.

The new line-up as compared with the old is:

	New	Old
Democrats	296	257
Republicans	139	178

In the main the Democratic victories represented gains for the moderate and liberal forces in the House. Where the Republicans gained—chiefly in the South—conservatives of that party simply replaced Democratic conservatives.

In the Senate, the Democrats improved on their top-heavy majority. They won 27 of the 35 races and led in one of the two still in doubt.

The following is the new line-up:

	New	Old
Democrats	68	66
Republicans	32	34

Among the more dramatic Senate races, former Attorney-General Robert F. Kennedy rode the Johnson tide to victory in New York over the incumbent Kenneth

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Keating. This was Mr. Kennedy's first bid for elective office, and he thus joined in the Senate his younger brother, Edward, who won re-election easily as expected in Massachusetts.

The Republicans won eight of the 25 gubernatorial races, for a net gain of one State house. This put the comparative line-up as follows:

	New	Old
Democrats	33	34
Republicans	17	16

The big Republican winner was Mr. George Romney, who captured a second term in Michigan and thrust himself into the front line of 1968 Presidential possibilities.

World Comment:

The news of President Johnson's victory was received in New Delhi with great satisfaction.

Official reaction to the re-election of the American President for a fresh four-year term was summed up in a brief statement by the Prime Minister, Mr. Lal Bahadur Shastri, that "the cause of peace, co-existence and disarmament would get added impetus".

The Indian President, Dr. S. Radhakrishnan and Mr. Shastri sent messages felicitating Mr. Johnson on his victory and expressing confidence that under his leadership the friendly relations between India and USA would grow stronger.

Dr. Radhakrishnan's message said: "The people of your great country have shown abounding faith and confidence in your dedicated and distinguished leadership. Please accept our warmest felicitations and good wishes. We in India look forward to close and friendly relations between our two countries and to working to promote co-operation and understanding between nations and to further the causes of world peace, progress and prosperity which we all hold dear."

Mr. Lal Bahadur's message said: "On behalf of the people and the Government of India I want to convey to you our warmest felicitations and good wishes on your election to the high office of the President of the USA. Your great and memorable victory demonstrates the massive support of the American people.

"The world today needs peace and international understanding. Upon these depends the future of the entire humanity. There is no doubt that under your leadership the USA will continue to make its weighty contributions towards these noble objectives. The close and friendly relations between our two countries will, I am confident, grow stronger in the years to come. May I take this opportunity to wish you all success in the great task that awaits you."

Moscow Radio said that American voters had chosen the "more moderate and sober policy".

The commentary, signed by Tass foreign affairs commentator, Mikhail Sagatelian, said the unusual feature of this year's elections was that the American people had to reply for the first time to the question whether a man who had openly rejected the policy of seeking to settle international problems by peaceful means should be admitted to the White House. The Republican candidate, Senator Barry Goldwater, had instead proposed to press the button of nuclear warfare.

"By the impressive vote in favour of Johnson, the American people have given a very clear reply to this question. It has shown which policy it has chosen and what acts it expects from its new President". Mr. Johnson's victory was truly "a great victory for the United States."

Pope Paul, in a telegram of congratulations, said: "We pray to God Almighty to grant Your Excellency strength in the direction of the grave responsibilities confided in you, and we invoke abundant blessings from the Lord on yourself and on the noble nation of the USA."

Asian leaders were among the first to react to Mr. Johnson's victory.

The Malaysian Prime Minister, Tengku Abdul Rehman told newsmen that it was "a very, very good thing."

He added: "I have met him and he is a very good chap. I believe his policy of peaceful co-existence is going to ensure peace in this world, so long as it is accepted by others".

The Japanese Prime Minister, Mr. Hayato Ikeda wished President Johnson a successful second term.

He said: "It is the earnest desire of the Japanese people to promote world peace, freedom and justice in wholehearted co-operation with the people of the United States".

The opposition Socialist and Democratic Socialist parties in their statements expressed the hope that he would follow the policy of peace.

President Sukarno of Indonesia in his message said: "May God Almighty guide and strengthen you in your task of leading your nation towards further progress and emancipation and towards peace and social justice in the world".

In Seoul, the South Korean President, Gen. Park Chung Hee expressed the hope that America would be "more respected and trusted under the strong leadership of Mr. Lyndon B. Johnson".

His statement urged the new administration to maintain its strong anti-Communist policy and dynamic strategy in the Far East and South-East Asia.

Chinese leaders criticized the views expressed by Mr. Leonid Brezhnev, First Secretary of the Soviet Communist Party, on the US Presidential election results.

In his address on the Soviet Revolution Day in Moscow, Mr. Brezhnev had said that the American people by electing Mr. Lyndon Johnson had shown their desire for peace and that the defeat of the American "ultras" contained a lesson for the advocates of adventurism.

But in Peking, according to the Kyodo News Agency, Mr. Liu Ning-yi, a member of the Chinese Communist Party Central Committee, told a rally celebrating the Bolshevik anniversary: "We cannot agree with this kind of talk."

The Agency quoted him as saying that both Mr. Johnson and Senator Barry Goldwater were birds of the same feather and the future policy of the Johnson administration with which Mr. Brezhnev offered to continue peaceful co-existence would inevitably turn out to be one of "out and out aggression."

[Prev. ref. 5600:AOA:A]

E. USSR Launches Three Cosmonauts In One Space-ship: On October 12 at 10.30 A.M. (Moscow time) the Soviet Union, for the first time, orbited by means of a new powerful launch vehicle a piloted spaceship named *Voskhod (Sunrise)*, with three men on board. The spaceship was commanded by Colonel Vladimir Komarov, an engineer; the other two were Boris Yegorov, a doctor, and Konstantin Feoktistov, a scientist.

The aims of this historic flight were: to test the multi-seat piloted spaceship; check the capacity for work and interaction during space flight of a group of cosmonauts consisting of specialists in different fields of science and technology; to carry out scientific, physical and technical investigations in the conditions of a space flight; to continue the study of the effects of different factors of space flight on man's organism; and to carry out extended medico-biological research in the conditions of a long flight.

These studies were made with the help of the instruments on board the spacecraft with the direct participation of a scientific worker, a cosmonaut and a space doctor.

The satellite spaceship **Voskhod** had been put into an orbit close to the prescribed one. According to preliminary data, the period of revolution of the spaceship round the Earth was 90.1 minutes. Its perigee was 178 kilometres and apogee 409 kilometres. The inclination of the orbital plane to the plane of the Equator was about 65 degrees.

Two-way radio communication was maintained with the spaceship. The ship's crew reported that they withstood quite well the launch and the transition to weightlessness.

Reports from the spaceship were transmitted to Earth on frequencies 143.625; 17.365; and 18.035 megacycles. The spaceship also carried a transmitter "signal" functioning on the frequency 19.9944 megacycles. All systems on board the spaceship functioned normally.

As heard from a taped recorded broadcast by **Moscow Radio**, Mr. Khruschev congratulated the spacemen and wished them a safe landing. "Well done...carry out your tasks well for our Motherland." **Moscow Radio** broke the news to people by giving its "singsong" signal indicating the coming of an important announcement.

As it flew over Africa, the spaceship radioed greetings to African people "fighting for their freedom and independence."

Tass said the three cosmonauts had sent the following radiogram to the Communist Party Central Committee, the Soviet Government and the Premier, Mr. Khruschev:

"Hereby we report to the Central Committee of the Communist Party of the Soviet Union, the Soviet Government and to Nikita Sergeyevich Khruschev personally: The crew feels fine, the ship's systems are functioning normally, the flight is proceeding successfully. Many thanks to the Soviet people, to our own Party and Government for the trust extended to us."

During their second orbit the three astronauts sent the following message to the Tokyo Olympic athletes:

"Flying over Tokyo we convey ardent greetings to the youth of the world participating in the 18th Olympic Games which are called upon to play a big role in strengthening the co-operation and mutual understanding of sportsmen of all continents in the rapprochement of peoples and in consolidating the cause of peace".

The cosmonauts also sent a message to the American people as they flew over the United States on October 12.

The message said: "From aboard the spaceship **Voskhod**, we convey our best wishes to the industrious American people and wish the people of the United States of America peace and happiness."

Space-ship Lands Safely:

The three Soviet cosmonauts landed safely on October 13 at a pre-assigned spot in USSR after completing 16 orbits in their historic flight.

A **Moscow Radio** commentator told the world of the safe landing of the space passenger ship and said that all the three members of the crew were feeling well. They had successfully completed a set programme of scientific exploration and safely come down to a pre-designated spot at 10-47 a.m. Moscow Time (1-17 p.m. IST).

Izvestia, the Government newspaper, revealed that the ship was brought down by a newly-evolved system, with the whole capsule lowered to the Earth by its own parachutes.

The new technique made it unnecessary for the spacemen to catapult out of the craft.

Izvestia quoted the ship's un-named designer as saying that advance planning provided for a "soft" landing with speed at time of impact reduced to zero or "very little."

It also disclosed that the crew had asked to stay in space for another day to make their studies "more precise." The request was turned down by the designer, who insisted that the flight programme must be adhered to.

A **Tass** correspondent in a dispatch from the flight control centre said Col. Komarov had been ordered during the 17th orbit to end the flight. The pilot reported the switching on of instruments and braking facilities.

The first to report to the ground the successful conclusion of the flight was *Pilot Mikhailov. "I am seeing an object entering dense clouds,"* he radioed to ground stations at 10-40 a.m.

Ground reports kept pouring in. In the pre-assigned landing area, numerous planes and helicopters were on patrol, ready to drop parachutists to meet the cosmonauts on the ground.

At 10-57 a.m., 10 minutes after landing, the pilots reported: "The object is visible on the ground, well visible, and cosmonauts, three, beside it. They are walking about, walking briskly. Congratulations to all, to all."

Although this announcement said in effect that only a 24-hour flight had been planned, a later announcement said that the flight was to test the stresses and strains on man during a long flight.

Tass said the cosmonauts had faced a "tense" session of scientific study in their instrument-packed capsule. During the third and fourth loops physiological studies were conducted according to the flight programme. The blood pressure of the cosmonauts was measured, lung ventilation was determined, and blood tests made. The cosmonauts' ability to work was also tested according to a specially developed system. While making the fourth loop of the Earth **Voskhod's** crew had their dinner.

During the sixth loop the ship's commander took his bearings by the stars. At the same time cosmonaut Feoktistov determined the ship's position by using means of astro-orientation. The experiment passed successfully. Cosmonaut-doctor Yegorov rested during the sixth loop.

During the seventh loop the commander of the ship and the scientist-cosmonaut continued their observations. They tested the manual system of orientation. The cosmonauts had their supper at the end of the seventh orbit.

The Soviet central television net-work transmitted four times on October 12 live pictures from aboard **Voskhod.**

World Comments:

The US Secretary of State, Mr. Dean Rusk, on October 12 complimented Russia on her latest space achievement, but warned that Americans must not let such undertakings "become a monopoly of those who might destroy our freedom".

He said the Soviet Union's accomplishment "is another very substantial achievement in space. I know all Americans join in the compliment.

"We must make freedom prevail—and triumphant—without a great war, if possible. For there won't be much freedom anywhere if most of the northern hemisphere is reduced to a cinder heap."

Pointing out that "a nuclear exchange is a possibility," he said: "We and our allies are determined to deter or defeat aggression in any form."

The UN Secretary-General, U Thant, sent Mr. N. Khruschev a telegram of congratulations on the launching.

He said: "I regard this as one more step forward in the exploration and conquest of outer space for the benefit of mankind."

President S. Radhakrishnan of India congratulated the Soviet leaders on the launching of *Voskhod.*

His message said: "Delighted to hear of the launching of your spaceship with three men on board. Another marked achievement. Congratulations to those on board and the Soviet leaders, President Mikoyan and Prime Minister Khruschev on this signal achievement".

British scientists were not wholly taken by surprise by the launching of *Voskhod* which they regard as "an embryonic space station".

Mr. Kenneth Gatland, Vice-President of the British Inter-planetary Society, said in London that those in touch with Soviet space technology were aware that over the past three years the Russians had been quietly testing new launching vehicles.

"There can be little doubt", he added, that "the **Voskhod** is the forerunner of a vehicle which will enable manned flight around the Moon and back to Earth within three years".

Previous Flights:

Astronauts in other previous Soviet orbital missions were Major Yuri Gagarin, Major Gherman Titov, Major Andrian Nikolayev and Col. Pavel Popovich.

Four Americans had so far orbited the Earth: Lt.-Col. John H. Glenn, Lt.-Commander Malcolm Scott Carpenter, Commander Walter M. Schirra and Major Gordon Cooper. In addition there were sub-orbital flights by Commander Alan B. Shepard (May 5, 1961) and Maj. Virgil Grissom (June 21, 1961).

The following is a time-table of manned orbital shots by USSR and America:

Major Gagarin: April 12, 1961, one orbit; 26,000 miles.

Major Titov: August 6, 1961—17 orbits; 7,35,000 miles.

Lt-Col. Glenn: February 20, 1961—three orbits; 81,000 miles.

Lt-Comm. Carpenter: May 24, 1962—three orbits; 81,250 miles.

Major Nikolayev: August 11, 1962—64 orbits; 2,010,000 miles.

Col. Popovich: August 12, 1962—48 orbits; 1,247,000 miles.

Commander Schirra: October 3, 1962, eight orbits; 1,70,000 miles.

Major Cooper: May 15, 1963—22 orbits; 5,95,000 miles.

Col. Bykovsky: June 14, 1963—81 orbits.

Lt. Tereshkova: June 16, 1964—48 orbits.

It was in May this year that Russia had told the World Space Science Congress at Florence that new problems must be solved before there were more ambitious manned space flights. The United States had said that it planned to begin two-men space-ship flights late in 1964 or in 1965. The reports presented by both the countries were interesting. The American report said that 56 satellites and 1,000 weather and research rockets had been launched by USA in 1963. Russia listed 21 satellite and 114 rocket launchings.

(*Tass* and *The Statesman*, Calcutta)

[Prev. ref. 5388:AOA:B]

F. UN General Assembly Session Postponed: The UN Secretary-General, U Thant, officially announced on November 4 the postponement of the UN General Assembly from November 10 to December 1.

Ninety-nine countries, including 41 original sponsors, agreed to the postponement move which was mainly aimed at providing the United States and the Soviet Union time, after the American Presidential elections, to negotiate over Article 19 of the UN Charter and avoid confrontation.

India, though not sponsoring the adjournment move, voted in favour.

Meanwhile, the Afro-Asian group decided by a consensus against any postponement of the Assembly's general debate which traditionally begins the day after the election of the President. The West Europeans were reported to have been asking for such a postponement on the ground that the NATO ministerial meetings were to be held in Paris in December.

The Afro-Asians, however, had decided that there was no need to depart from the tradition and further agreed that if possible, the general debate should be concluded in December itself.

[Article 19 provides that any country whose arrears exceed its assessments for two preceding years would lose the right to vote in the Assembly. It is the US claim that the Soviet Union, among others, has attracted the penalty under this Article by its refusal to pay its assessed contribution to the costs of the UN peacekeeping operations. The Soviet Union and nine other countries, mostly from Eastern Europe, are in this position, and according to the United States they had lost their vote from January this year and this should be enforced. If the United States contention were true, then France will also lose her vote from January, 1965 on the same grounds.]

ASIAN RECORDER

December 23—31, 1964

Regd. No. D-727
Vol. X No. 52

INDIA

SUMMARY: Mr. Y. B. Chavan's Visit To UK; Measures To Meet Chinese Threat; Army "Coup" Foiled In Bhutan: Governors' Conference.

A. British Military Aid—Mr. Y. B. Chavan's Visit To U.K.: A *communique* issued in London on November 20 at the end of the Defence Minister, Mr. Y. B. Chavan's nine-day visit to UK, said that Britain had agreed in principle to provide the necessary foreign exchange, loans and technical help for building an Oberon class submarine for the Indian Navy.

Oberon class submarines are among the most modern weapons of their type in service with the Royal Navy and the cost of building one in India is estimated at about Rs. 4.5 crores.

Until the submarine gets operational with the Indian Navy, which will take a minimum of three years, the British Government will provide one of its own submarines for a few months each year for anti-submarine training. In addition, Indian naval cadets may visit the UK for the same purpose.

Mr. Chavan, according to the communique, also signed an Agreement for a loan of £4.7 million which the British Government would make available to India over the next four years to help finance the re-building of the Mazagaon dockyard in Bombay and the construction of three Leander class frigates.

The loan may be repaid over a period of 12 years. The British commitment for the 10-year frigate project may eventually swell to £14 million.

The British Government was believed to have listened "most sympathetically" to India's request for three Daring class destroyers to replace the ageing ships of that type in the Indian fleet. Britain, however, has only seven Daring class destroyers. Whitehall, therefore, offered Mr. Chavan Weapon class destroyers instead from Britain's Mothball fleet. India, however, has no use for these ships of World War II vintage.

The British Government, according to the communique, pointed out that it was engaged in "an urgent review of its own defence policy" and gave the assurance that in the light of the overall review, the Indian requirements would be further considered.

Britain also agreed to help India in establishing a filling factory at Chanda and for the modernization of its ordnance establishments. Negotiations would be pursued for the purchase from Britain of Sea Hawk fighters for India's aircraft carrier and Hunter aircraft as well as the development of a light tank and of an Orpheus Mach-II engine for an improved version of HF-24 supersonic fighter.

The communique committed Britain's new Government "to support India as a Commonwealth partner against external threats." British Ministers also assured Mr. Chavan of their "desire to co-operate with the Indian authorities in solving problems relating to defence supplies."

The British Government "would continue to aid India, within limits of available resources, in its efforts to improve her defences."

Mr. Y. B. Chavan's Statement In Parliament:

In a statement in Parliament on November 26, Mr. Chavan listed the spheres in which the British Government had promised to help India's defence efforts.

He said his discussions in London had "disclosed a wide measure of agreement in regard to the size of the Chinese threat and the measures required to meet it."

Among the concrete achievements of his mission he mentioned the grant of a £4.7 million loan for the expansion of the Mazagon dockyard and the construction of three Leander class frigates there, loan for a period of two to three months in the year of a Royal Navy submarine for the next few years and provision of technical assistance in the field of defence production.

As regards India's intention to acquire a submarine of its own, he said Britain had "indicated its willingness to provide facilities to enable us to place an order for a modern submarine". However, he added that a final decision in this respect would be possible only after details of British "assistance" towards the construction of this submarine were settled.

He also gave details of the inconclusive discussions he had regarding India's request for three destroyers or frigates to replace some of the over-age ships in the Indian Navy.

The following is the text of his statement:

"I rise to make a statement on my visit to the United Kingdom during the period November 12 to 21.

"As the Members of the House are aware, I was to have visited the United Kingdom on my return journey from the US in June, 1964, but this visit could not take place as I returned to India direct on hearing of the sudden passing away of Mr. Nehru. It was then agreed with the British authorities that my visit to the United Kingdom should be postponed until after the general elections in that country. Subsequently, it was decided in consultation with the British authorities that I should visit the United Kingdom during the period November 12 to 21, 1964.

"The purpose of my visit to the United Kingdom was to: (a) explain to the British authorities the basis and content of the Indian Defence Plan for the period 1964-69; (b) seek financial and technical assistance from the British Government for the implementation of the Indian Defence Plan; and (c) more specifically seek their assistance for the modernization of the Indian Navy which had several over-age ships needing replacement.

"My discussions with the British Ministers were most cordial and disclosed a wide measure of agreement in regard to the size of the Chinese threat and the measures required to meet it. The British authorities expressed their keen desire to assist us in solving our problems relating to defence supplies.

"They are willing to provide technical assistance in the field of defence production to enable us to undertake in India the manufacture of several defence equipments of British origin.

"They have also indicated that they would consider sympathetically our request for aid towards the licence fee normally charged by the British Government in respect of manufacture, technical assistance etc., and as a first case in point have accepted our request in respect of the technical assistance fee for supplying equipment to the Chanda Filling Factory.

"On the general question of financial assistance and provision of credits for purchase in the United Kingdom of military hardware, production equipments and components for indigenous production, the British authorities indicated that they would continue to help India within the limits of their available resources.

"It has not been possible to reach an agreement on the scale of future assistance on this matter, since the British Ministers were currently engaged in a review of their defence and financial policies. I am confident that after these reviews are completed by the British Government, it will be possible to reach an agreement with them on this matter.

"I explained in considerable detail the urgent need of the Indian Navy for a minimum number of three destroyers or frigates for replacing some of the over-age ships in the Indian Navy and I requested that the British Government should consider making available to us on loan three destroyers from their operational reserve on the understanding that these destroyers would be returned to them if they were urgently required by the Royal Navy for meeting any emergency situation.

"There was considerable discussion in regard to the type of frigates which can be made available by the British Government and which will suit the Indian requirements and the conditions on which they should be made available.

"The British authorities pointed out that it would not be possible for them to release three frigates of the same class from their operational reserves. I have indicated that at least a minimum number of two frigates should be made available to India immediately. They have given an assurance that our request would be considered in the light of the review of their defence policy which they were currently engaged in.

"In the statement placed before this House on September 21, 1964, I had referred to the offer by the British Government of a loan for meeting the external costs, during the first four years, of the programme for the expansion of facilities in the Mazagon Dock and for the construction of three Leander class frigates in that yard.

"During my visit to the United Kingdom I was able to finalize the terms of this credit and to sign a Loan Agreement for the sum of £4.7 million. A copy of this Agreement is placed on the table of the House for the information of the Members of the House.

"I also discussed with the British authorities the extent of assistance that would be available for increasing the anti-submarine capability of the Indian Navy. They have indicated their willingness to provide facilities to enable us to place an order for a modern submarine on one of the British shipyards.

"However, a final decision can only be taken after details of the assistance that can be made available by the British au-

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

thorities for the construction of this submarine have been settled. This is under discussion with the British authorities.

"In the meanwhile, they have agreed to provide us a Royal Navy Submarine for a period of two to three months each year for the next few years to train our Navy personnel in anti-submarine warfare.

"In addition to the Secretary of State for Commonwealth Relations and Secretary of State for Defence with whom I held detailed discussions, I called on Prime Minister Wilson and some other members of his Cabinet. During my stay in the United Kingdom and throughout my discussions with the British authorities, I was struck by the amount of goodwill they had for us.

"There is also a keen desire on their part to help us in building up our defences. I am quite confident that more concrete results will be forthcoming as a result of these discussions after the British Government had an opportunity to complete the review of their defence and financial policies."

(*The Times of India* and *The Hindustan Times*, New Delhi)

B. Measures To Meet Chinese Threat—Mr. Y. B. Chavan's Address To Army Commanders' Conference: The Defence Minister, Mr. Y. B. Chavan, inaugurated the biennial Army Commanders' Conference in New Delhi on November 30.

He said on the occasion that the Chinese had used the last two years to entrench themselves further across India's northern frontiers and they were now massed in much larger numbers than during October-November, 1962.

Militarily, the threat posed by China in 1962 still continued. Politically too, China continued to remain intransigent and showed no inclination to accept the Colombo proposals for an amicable settlement of the border dispute.

Mr. Chavan also referred to the recent explosion of a nuclear device by China and said that this new development needed to be evaluated carefully from the military point of view.

Turning to Pakistan, he said that armed intrusions continued across the cease-fire line in Jammu and Kashmir as well as the Tripura border. The abrupt postponement by Pakistan of the Indo-Pakistan Home Ministers' Conference and the virtual cancellation of the Conference that was to be held to discuss cease-fire problems were quite indicative of the present mood of the Pakistan Government.

He also spoke on India's five-year defence plan and said that it would involve a total outlay of Rs. 5,000 crores, with a foreign exchange component of Rs. 682 crores. "It is important to realise," he stressed, "that the major effort for the implementation of a defence plan of such a magnitude will be undertaken by the people of India." The foreign assistance which India sought was only in respect of the foreign exchange component and technical 'know-how.'

He said he was quite heartened to note during his visits to USA, USSR and UK that "our appreciation of the extent and nature of the Chinese threat and the steps which we are taking for our defence build-up are generally accepted by all the three countries."

After referring to the main features of defence aid from the three countries, he referred to the recent political changes in the Soviet Union and said that India had been assured at the highest level that the supplies promised by USSR would continue to flow according to the Agreements entered into by the two Governments.

He also mentioned the progress being made in the production of defence materials in the country and went on to refer to efforts made by the Border Roads Development Organization to improve road communications with different parts of northern borders.

C. Indian Trainer Jet Aircraft Manufactured: A modern trainer jet aircraft, designed and produced entirely with Indian resources, had its inaugural flight at Bangalore on December 12.

Built at Hindustan Aircraft Limited, now Bangalore branch of Hindustan Aeronautics Limited, the jet aircraft HJT-16 will offer admirable and basic intermediate training facilities for IAF pilots directly on a jet plane. They are at present being trained progressively on HT-2 Harvard and Vampire aircraft.

The Hindustan trainer jet fitted with the latest equipment of a modern fighter aircraft, except armaments, will by itself provide all the combined training facilities of the HT-2 Harvard and Vampire taking IAF officers and airmen through the final stage of piloting up to high-speed flight.

At present, the HJT-16 is powered by Viper II turbo-jet engine manufactured by Bristol Siddeley Engines Ltd. of UK. HAL is also working on a prototype of an engine which could be fitted in this aircraft.

The first batch of 24 aircraft required by IAF will be produced by the end of 1966.

D. Navy Takes Over Garrisoning Of Andaman And Nicobar Islands: It was made known in New Delhi on November 29 that as a result of a top-level decision by the Central Government, the Navy had taken over the garrisoning of Andaman and Nicobar Islands, hitherto the responsibility of the Army and the armed police.

This change-over was found necessary because of the need to keep a constant watch on the long and widely dispersed chain of islands, especially in view of the possibility of clandestine activity by Chinese submarines and other vessels.

A number of Andaman islands are completely or practically uninhabited. A lesson of World War II, especially in the Pacific, is that it can be suicidal to leave the uninhabited islands unwatched. A potential enemy can surreptitiously occupy them long before the outbreak of hostilities.

In order that the Navy could garrison the Andamans effectively and that the naval ships could be serviced and repaired without having to return to Visakhapatnam, Bombay or Calcutta, an advanced naval base was being developed at Port Blair.

Plans to build two wholly indigenous landing craft for use in the Andaman islands were in an advanced stage, and the construction of the vessels was likely to begin soon.

E. India Not To Manufacture Atom Bomb—Mr. Lal Bahadur Shastri's Statement In Lok Sabha: The Prime Minister, Mr. Lal Bahadur Shastri said in the Lok Sabha on November 24 that the Government's decision not to make the atom bomb was based on practical and realistic considerations—especially the disastrous consequences such a venture would have on the economy at its present age—and not merely on moral grounds.

Sharing the Members' concern at the threat posed by the Chinese nuclear blast, he said the Government's present stand should not be regarded as a permanent one. No Government could afford to adopt a static approach though individuals could do so.

But before the Government changed its position, he said, the question should be viewed carefully and calmly from every aspect. Parliament's supremacy on such matters was unquestionable. He appealed to the Members to keep the bomb issue above party politics.

His intervention in the foreign affairs debate was a reflection of the Government's concern at the strong criticism voiced in the House, even by a sizable number of Congressmen, against what the critics described as Government's "inactivity." He limited his observations to the economic non-feasibility of a bomb venture in India, in which he agreed wholly with Mr. M. R. Masani (Swat.)

He avoided any reference to the defence aspect of the atom bomb in the context of the Chinese blast, a consideration which led Mr. Masani, Mr. Frank Anthony and Acharya J. B. Kripalani to suggest a nuclear immunity arrangement with either or both of the nuclear giants—the United States and/or the Soviet Union.

In a pointed reference to the likelihood of China arming itself with conventional weapons with nuclear warheads, Mr. Shastri agreed it was a serious question which deserved the fullest consideration.

Reaction:

Mr. Lal Bahadur Shastri's speech in the Lok Sabha—his second major performance since he became Prime Minister—evoked widespread acclaim.

He spoke for no more than half-an-hour; at no stage was there any waning of interest in what he had to say. This was because many of Mr. Shastri's listeners—belonging to both sides of the House and including both the protagonists and antagonists of the Indian nuclear bomb—detected a slight but significant shift in the Prime Minister's stand.

At the A-ICC session at Guntur Mr. Shastri's rejection of the demand to manufacture an Indian bomb was not only clear but conspicuously categorical and sweeping.

In his subsequent public speeches, too, he had been taking the stand that India should not make the bomb under any circumstance, and that to make the bomb would be suicidal for India.

On November 24, he was equally steadfast in upholding the policy of not making the bomb on the ground that it would be beneficial to both India and mankind. But he noticeably shed the sweeping features of his earlier pronouncements.

He not only conceded Parliament's right to reverse this policy, but went on to admit that this policy or any other could not be everlasting. Individuals might, he said, but nations could not take a rigid and inflexible stand for all time to come.

He also said that there was no reason why, while abjuring the bomb, India should not acquire all the nuclear knowledge and 'know-how' which was developing in the world.

Furthermore, he conceded the urgent need to consider the problem—raised forcefully during the debate by Mr. Frank Anthony—of nuclear warheads for conventional weapons.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

With one or two exceptions all those who commented on the shift of emphasis in the Prime Minister's speech welcomed the fact that without giving up his basic stand, Mr. Shastri was responding to parliamentary and public criticism of taking inflexible and dogmatic postures on the threat posed by China's nuclear bomb.

Mr. Lal Bahadur Shastri On Mahatma Gandhi And The Bomb:

Again on November 29, Mr. Lal Bahadur Shastri opposed the plea that India should manufacture the atom bomb in view of the recent Chinese explosion.

Addressing a public meetng after unveiling a life-size bronze statue of Mahatma Gandhi in the Town Hall compound in Meerut, he said that "we should not forget the mesage of Gandhi in this respect."

If the message of Gandhi was truly followed by the world, the threat of a nuclear war could be eliminated.

He said that while India was against the manufacture and use of atomic weapons, the Government was fully aware of its responsibility regarding the security of the country. "I am fully aware of this responsibility and I want the people to leave this job completely to the Government. How can we support the demand for the destruction of nuclear weapons if we ourselves talk of manufacturing the atom bomb?"

India would continue to work for nuclear disarmament and organize world opinion against the manufacture of atomic weapons. Those who demanded that the country should manufacture the atom bomb forgot that it would entail very heavy expenditure and lead to disastrous results.

He asked the people not to be scared by the Chinese explosion. If the Chinese used atomic weapons that would lead to their own destruction.

[Prev. ref. 6149:CHI:A]

F. Development Of Nuclear Arsenal By India—Dr. H. J. Bhabha's Opposition: In an interview in Bombay on November 17, the Chairman of the Atomic Energy Commission, Dr. Homi J. Bhabha, said he was against India being stampeded into developing a nuclear arsenal merely because China had detonated a nuclear device.

He declared he was in favour of a continuance of the country's long-established policy of using atomic energy for peaceful purposes and is of the opinion that the programme in this regard should be accelerated.

He dismissed the criticism that his UN Day broadcast over AIR on nuclear disarmament gave the impression that he supported nuclear weapons policy for India as totally misplaced. On the contrary, the burden of his argument was that the Big Powers under the aegis of United Nations must take concrete steps towards nuclear and general disarmament within a couple of years in view of the emerging prospect of a fairly rapid proliferation of nuclear weapons in the absence of any accepted international restraints.

While re-iterating his view on the Indian position, he emphasized the importance of doing away with certain misconceptions so that the right decision was taken in this country for the right reason.

India was far advanced in nuclear technology and was both technologically and economically capable of developing nuclear capacity. If the test of nuclear capability lay in the possession of plutonium or Uranium-235, then India, which was among the very few countries if not the only country outside the nuclear-club, and China qualified, Germany, Sweden and Japan had the necessary technological 'know-how' but did not hold plutonium or U-235. An Indian plutonium plant was commissioned at Trombay earlier this year.

The cost of nuclear weapons, he said, also needed to be properly understood. The US Atomic Energy Commission had officially released certain cost estimates for atomic explosions for peaceful blasting and excavation for water diversion, flood control, constructing harbours and canals. A 10-kiloton explosion (equivalent to 10,000 tons of TNT) would, according to this estimate, cost Rs. 17,50,000 and a two-megaton explosion (equivalent to two million tons of TNT) Rs. 30,00,000. The cost of producing and delivering such a concentrated load of explosive power would, therefore, be far cheaper than that in respect of a corresponding quantum of conventional explosive.

This same point was made in Dr. Bhabha's and Dr. Kothari's book entitled, **Nuclear Explosions and their Effects** published by the Government of India in 1956. It was there stated that "in terms of destructive power, a nuclear weapon is the cheapest thing the world has yet seen—cheaper than conventional weapons by a factor of hundreds, if not thousands."

Dr. Bhabha said that a great deal of research and development had already gone into India's Atomic Energy Establishment over the past decade and a larger programme was proposed during the Fourth Plan. The essential point then was not that India was technologically incapable of making nuclear weapons, or could not afford these in a purely economic sense, or could not deliver them, or had nowhere to test them but that it was determined not to produce these on larger political considerations.

This self-abnegation by a country with advanced nuclear capability must therefore be regarded as resting on a position of strength which deserved fuller recognition. If, for instance, the "nuclear Powers" were concievably to meet as an inner group to discuss nuclear disarmament, then India would quite clearly qualify to be at the negotiating table.

G. Army "Coup" Foiled In Bhutan: Reports reaching Gangtok on November 26 said that the King of Bhutan had smashed a plot to turn the army against him in the second serious challenge to his power in eight months.

The reports linked with the plot the name of the Prime Minister, Mr. Lhendup Dorji, then in London.

Within 24 hours of his return to the Capital from Switzerland, where he had gone for treatment, the King ordered the arrest of some alleged plotters, including two top army officers and four civilian officials.

The Secretary-General, Col. Penjo, the Deputy Commander of the Bhutan Army, and six other senior civilians fled the country shortly before the King returned.

The name of one arrested army officer was given as Col. Lam Dorji. He was in charge of the army after the Deputy Commander, Brig. U. Tangbi, fled.

The plot was alleged to have been hatched when the King left for Switzerland in October. He had issued instructions that the army should take the oath of allegiance to the country and the King. But in his absence the acting Prime Minister, Lhendup Dorji, ignoring his instructions, asked the army to take the oath of allegiance to the King, the country and the Prime Minister. It was stated that Mr. Dorji had persuaded some army officers to pledge that they would leave Bhutan should occasion arise for him to leave the country.

Meanwhile, a Calcutta report said that two of the fugitives from Bhutan were seen in Kalimpong. Some others were said to have reached Nepal. One of the fugitives, the Deputy Army Chief, Brig. Tangbi had been promoted and confirmed in his post five months earlier.

[In April, 1964, the King was faced with a similar threat to his power (see page 5798). When he was away for treatment, his Prime Minister, the late Mr. Jigme Dorji, was assassinated. He took swift action on his return and ordered the arrest of the conspirators. Brigadier Namgyal, suspected to have masterminded the conspiracy, was tried and executed.]

Arrests:

According to reports reaching Calcutta on November 26, a number of young officials had been arrested in Bhutan. Among them were the Deputy Secretary-General, Dawa Tshering, the Quarter-Master General, Agye Tshering, and Col. Lam Dorji, who remained in charge of the army when the Deputy Army Chief, Brig. Tangbi, fled Bhutan four days earlier. Two others were of Chinese origin but Bhutanese nationals.

Dawa Tshering, who had recently returned from London, where he had been a representative of Bhutan at the Colombo Plan Exhibition, had met the King in Calcutta and proceeded immediately to Bhutan. He was promoted to his present high rank when Mr. Lhendup Dorji, who was Bhutan's Secretary-General, became acting Prime Minister.

Conditions in Bhutan were reported to be calm if not normal, with the King in full command of the situation. But it was an open secret that the young ruler's life may be in danger as the full extent of the new crisis that had developed in Bhutan during his absence had yet to be disclosed.

From what was immediately known it partly had to do with the recent arrest and allegedly shabby treatment of a King's favourite. Who issued the orders and for what reason was not known. Fearing the consequences, all those concerned had fled. But there would appear to be considerations far more serious to cause so many officials to flee the country for fear of their lives. It was known, for instance, that they considered themselves liable to be charged with treason.

Unconfirmed reports said that Brig. Ugyen Tangbi with three others had entered Eastern Nepal, where they had been apprehended by the Nepalese authorities. What was known was that the King was anxious that Brig. Tangbi return to Bhutan, where apparently all charges against him would be dropped. It was considered unlikely that he would return of his own free will, although he had a reputation of being one of the King's most loyal officers.

Ever since the public execution of his predecessor, Brig Bahadur Namgyal, at whose trial he was chief prosecutor, Brig Tangbi was known to have been living under constant strain. Indeed, much of the uneasy fear that stalks Bhutan today could be traced to the intimidating public execution of those responsible for the assassination of the late Prime Minister, Mr. Jigme Dorji.

It was, besides, more than a little possible that what even then appeared to be coup against the Dorji family had gone on smouldering and was now working swiftly to fulfilment. The King, who despite his ill-health quashed a serious crisis

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

then, may well settle this: he has his people's loyalty and affection to help him.

But the present and rather confused situation was not to be lightly dismissed. It was loaded with dangerous possibility, since where a domestic crisis of this kind could almost be ignored in a country of similar size anywhere else, Bhutan's strategic position made it vitally important to India. Large concentratons of Chinese troops had long been reported on Bhutan's northern border.

[Contrary to popular belief the Indo-Bhutan Treaty has no defence clause. On the contrary it has been made clear on more than one occasion that the Bhutanese Government does not desire the protection, or presence in Bhutan, of Indian troops. This has in no way damaged most friendly relations between the two countries. Indeed, a small cadre of Indian officers with their headquarters in the capital have been responsible for the training of the Bhutanese army and all arms and equipment have been supplied by India. During the 1962 invasion of neighbouring N-EFA by the Chinese, Bhutan's army not only readied itself to resist the Chinese but offered its meagre military resources to India.]

King Takes Over Government:

It was announced on November 27 that the King of Bhutan had taken over "full responsibility of the country's administration", a function that was temporarily entrusted to Mr. Lhendup Dorji.

The information was circulated to the Press in a Press release issued by what appeared to be a new Bhutanese Government *Information Department* in Calcutta.

The statement said that the King had placed his half-brother, Dasho Wangchuk, "in charge of the army in addition to his civil duties".

It claimed that the situation was "fully under control".

The following is the text of the statement issued by the Bhutan Information Department:

"The situation in Bhutan is fully under control. Inquiries that have been made with regard to two army and four civilian officers who left the country some days ago show that they did so under an exaggerated sense of fear of action to be taken against them on the King's return from Switzerland for dereliction of duty during his absence.

"It has not, however, at any time been the intention of the King to take summary or excessive action against his officers, and there was no occasion for them to flee the country, pending the King's return.

"Their sudden departure necessitated tightening of security measures along the frontier, including the checking of travellers leaving or entering Bhutan. The checking officers have however been instructed that the least possible inconvenience is caused to bona fide movement of traffic.

"The report that several arrests of high-level officers have taken place is not correct. The Deputy Secretary-General was questioned at a traffic checkpost in keeping with general security. He was in due course allowed to proceed to his headquarters, where he has resumed his duties."

Nepal's Foreign Minister, Mr. Kirtinidhi Bisht, said on arrival in Calcutta from Khatmandu on November 27 that he had no knowledge of the arrest of Bhutan's absconding Deputy Army Chief, Brig. Ugyen Tangbi, with other Bhutanese officials in Nepal. Till his departure from Nepal his Government had had no communication from the Bhutan Government about these officials.

Mr. Lhendup Dorji's Statement:

Mr. Lhendup Dorji said in London on November 28: "As far as I am aware, there has never been any question of a challenge to the King's authority or any wavering in loyalty to his person.

"I am at present on three months' leave in Europe and at the complete disposal of the King at any time."

The following is the text of Mr. Dorji's statement:

"I would like to clarify some points in the conflicting accounts appearing in the British Press on recent events in Bhutan. This is not the first time that news from inside Bhutan has reached the outside world in a garbled and misleading form. Anyone who knows the country and its rather rudimentary internal and external communications will appreciate how easily fact and rumour can become confused.

"I hold the office of Secretary-General for Planning and Development and, during the King's illness and absence from Bhutan, I was appointed acting Prime Minister. The King has now returned to Bhutan and this naturally involves a re-allocation of functions.

"As far as I am aware, there has never been any question of a challenge to the King's authority or any wavering in loyalty to his person.

"One newspaper refers to Bhutan as 'an Indian protectorate'. This is not the case. Bhutan remains an independent sovereign State. Her very close relationship and friendship with India and the fact that India lends powerful support to her development schemes have never been interpreted by Bhutan as implying any diminution of sovereignty. That India has always accepted this interpretation is the basis of the cordial understanding which links the two Governments.

(*The Statesman*, Calcutta, *The Times of India* and *The Hindustan Times*, New Delhi)

[Prev. ref. 5798:INI:B]

H. Appointment Of Indo-Naga Commission—Rev. Michael Scott's Appeal: In a statement in New Delhi on November 23, Rev. Michael Scott, a member of the Nagaland Peace Mission, pleaded for the appointment of an "Indo-Naga Commission" for a full and objective inquiry into "all that has happened" in Nagaland.

He said he had submitted a great deal of written material and considered opinions to the Prime Minister, Mr. Lal Bahadur Shastri in good faith as requested by many Naga people. "I hope that it may now be possible for a full and impartial Indo-Naga Commission of Inquiry to be appointed."

He said one of the reasons why the Naga conflict had not been solved all these years was "the failure of the Press and of politicians to insist on a full and objective inquiry into all that has happened there and what has gone wrong."

He denied that he had told the Press or any one else that Indians and Nagas were "fundamentally different" and they should be separated, or that the signing of the "Cease-fire" in Nagaland was an international agreement or that he was a foreign observer.

He said he had never thought of him-

Mr. J. P. Narayan's Statement:

In a statement in New Delhi on November 22, Mr. Jaya Prakash Narayan said it was far more important to have friendly rather than discontented and hostile Nagas along the Indian frontiers. This would deprive foreign Powers of possible opportunities of interference.

The manner in which the Naga problem was settled would have its impact on "the other border people and border kingdoms."

He also believed that a military solution of the Naga problem would involve "large-scale extermination of the Naga people," which on any account would be undesirable. "It is my view," he said, "that there must be fresh and courageous thinking" of the Naga question.

The following is the text of his statement:

"It was some months ago that I had suggested that an all-party parliamentary delegation should visit Nagaland in order to study the situation. But so far neither any delegation has gone nor any member on his own had found it necessary to visit that trouble spot of the country to see things for himself. And yet, everyone seems to be ready with impassioned words and censure for all and sundry.

"The excitement appears to be on three counts: (A) Certain alleged remarks of Rev. Michael Scott, (B) crossing over of Naga underground groups into Burma and their heading towards Pakistan, and (C) underground demand for a sovereign independent Nagaland. It should have been possible and certainly more helpful to deal with these matters with patience and understanding.

"The Rev. Michael Scott has already disowned the remarks attributed to him. I should add that he is a friend of India and is as anxious as anyone else to find a satisfactory solution of the Naga question.

"As for Naga groups going towards Pakistan, it is, indeed, a serious matter and not only the Foreign Secretary as leader of the Government of India delegation but also the Peace Mission has taken a serious view of the matter and will pursue it further. That Parliament should be concerned over it is natural.

"But as far as the Naga demand for a sovereign independent State is concerned, it should have caused no surprise, much less excitement. That demand has been before the country all these 17 years. That the underground Naga leaders should have opened political negotiations by re-iterating that demand should have caused no surprise in any well-informed quarters.

"The very purpose of instituting a cease-fire and the peace talks and allowing the Peace Mission to function in Nagaland was to find out if there was a way to build a bridge between the position of Naga hostiles and that of Government of India, namely, that Nagaland was part of the Union.

"The Peace Mission has been working on the assumption that it was possible to find such a way. It is easy to terminate the peace talks and renew the violent struggle; but before that is done it is necessary to take stock of the situation, weigh carefully the consequences that might follow and then take a final decison.

"I, therefore, plead for cool and far-sighted reasoning on this question.

"The experience of the past 17 years has proved that no one can defend the Naga hills and Nagaland borders better than the Nagas themselves. It is, therefore, essential in the interests of India, particularly in the interests of her defence, to satisfy the Nagas so that they would be relied upon to be on our side.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Underground Nagas' Conditions for Peace:

Meanwhile, the Naga underground delegation to the peace talks has suggested five steps to facilitate the laying down of arms by underground Nagas.

The steps were set out in a letter written on November 12 by Mr. Zashie Huire, chief delegate of underground Nagas to the peace talks and addressed to the Nagaland Peace Mission. The steps are:

(1) The Indian armed forces should be withdrawn completly from Nagaland. Peace in Nagaland could be restored only after the withdrawal of the Indian armed forces. The "Federal Government of Nagaland" (underground) would not endorse the deployment of the Indian armed forces along Nagaland border before a political settlement was worked out.

(2) To assist the Peace Mission in supervising the task of complete withdrawal of the Indian armed forces, an impartial peace corps should be formed of friendly countries in addition to the present Nagaland Peace Mission members.

(3) After the withdrawal of the Indian forces, the Government of India should recognize formally that Nagaland was a sovereign independent nation and that this continued to be the Naga contention. Any further talks to resolve the issue should be based on this contention.

(4) After the complete withdrawal of the Indian forces and the formal recognition of the Nagas' contention that Nagaland was a sovereign independent State, the "Federal Government of Nagaland" would proceed to put its arms in the safe custody of the proposed peace corps under reasonable terms for the furtherance of the tasks of world peace, as suggested by the Peace Mission.

(5) To facilitate the speedy working of the proposed views, the "Federal Government of Nagaland" re-iterated the need for the presence of overseas observers at this crucial stage, as requested in their previous communications to the Peace Mission.

State Legislature's Opposition To Naga Demand For Independence:

Spokesmen of both the parties in the Nagaland State Legislature, namely, the ruling Naga Nationalist Party and the Opposition Democratic Party, have declared their opposition to the demand of the Naga hostiles for independence.

In separate statements in Kohima on November 21, they termed the demand unrealistic and appealed that peace talks should continue for an early amicable settlement.

A prominent member of the Naga Nationalist Party, who did not want to reveal his identity in view of the unsettled conditions prevailing in the State, and who was a member of the former Interim Body, constituted before the General Elections, said the hostiles' demand was impossible economically and impracticable politically.

He added: "The Nagas are Indians first and last and those who encourage this independence demand should know fully well that it would pave the way for Nagaland to be swallowed by Communist China."

Movement Of Naga Hostiles To East Pakistan:

Meanwhile, reports reaching Kohima on November 20 said that nearly 1,700 Naga hostiles were moving towards East Pakistan through thick jungle along Manipur's border with Burma.

The reports said that the Nagas had been seen moving in two columns, along the outer perimeter of the international frontier. They had crossed into Burma through dense forests near the border and were marching south with comparative ease as the Indian security forces could not operate in areas beyond the three-mile buffer.

Informed sources said this was one of the largest batches of hostiles going to East Pakistan, where a school was reported to have been opened for training them in guerrilla warfare.

The Chief Commissioner of Manipur declared with immediate effect Churachandpur and Tengnowpal sub-divisions of Manipur bordering Burma disturbed areas for three months.

An order published in a Gazette Extraordinary said that the sub-divisions were "in such a disturbed and dangerous condition that use of armed forces in aid of civil power was necessary."

It as earlier order, the Chief Commissioner had declared Ukhrul sub-division to be a disturbed area.

Official sources said that taking advantage of the cease-fire in Nagaland, the hostiles had recruited villagers and had taken them to Burma from where they had walked over to East Pakistan.

Armed hostiles were also visiting villages in various parts of Nagaland and extorting money from the people in violation of the Truce Agreement.

Increased stockpiling of food and other supplies had been noticed of late. At Chazuba village, 10 miles from Kohima, the hostiles forcibly collected Rs. 2,000 in cash and kind. Timber contractors of Dimapur were reported to have been threatened and asked to contribute Rs. 15 per tree to the hostiles' fund.

In recent weeks, more and more Naga hostiles wearing olive green uniforms and displaying arms were moving in the villages. They were apparently trying to impress on the people that they were well-equipped. The hostiles had also organized practice firing of rifles and light machine-guns at Gawki, about 20 miles from Kohima.

[Prev. ref. 6188: INI: J]

I. **Governors' Conference:** Opening the annual two-day Conference of Governors in New Delhi on November 24 the President, Dr. S. Radhakrishnan expressed concern at the mass influx of refugees from East Bengal, the return of large numbers of people of Indian origin from neighbouring countries and the "sharp increases" in prices.

He made only a brief reference to external affairs. "Our relations with China and Pakistan are still unsatisfactory and we should do our best to improve them".

Reviewing the situation in the States, he said that dissensions within the ruling party in UP had "unhappily continued" and there had been "serious acts of indiscipline" by students in Orissa.

He devoted a good part of his address to the food problem and the rising prices. The wholesale price index had risen by 15.4 per cent since the beginning of the current financial year and consumer prices had also shown a similar increase. "Such sharp increases in the price level within a short period of time cannot but cause hardships, particularly to fixed income groups."

The past year had seen "considerable political activity" in several States. Among these he listed the change of governments in Kashmir, Punjab, Kerala and Goa.

He referred to Sheikh Abdullah's release and the withdrawal of the charges against him. This, he said, had been done as a measure of conciliation and for creating a better political atmosphere in the State. "I regret, however, that there has been very little improvement in the situation."

He also took note of the steps taken by the Central Government to implement the recommendations of the Santhanam Committee on corruption in the Central Services, including the appointment of a Vigilance Commissioner.

While farm output was low, industrial production during the current year was likely to maintain and perhaps improve the rate of growth achieved in 1963-64.

He made a reference to the death of Mr. Nehru and on behalf of all the Governors present assured the Prime Minister, Mr. Lal Bahadur Shastri of "our full co-operation in the immense tasks that he has assumed as Prime Minister".

All the State Governors except those of Madras and West Bengal were present.

Review Of National Developments:

The highlight of the proceedings of the Conference was a review of national and international developments by the Prime Minister, Mr. Lal Bahadur Shastri.

Mr. Lal Bahadur Sastri admitted that the situation in Kashmir had not turned out as anticipated. In particular, Sheikh Abdullah's activities had caused concern.

On Nagaland, while pointing out that people got worked up unnecessarily on issues like Mr. Jaya Prakash Narayan's statement supporting independence for the Nagas, he stated flatly that there was no question of such a demand being entertained in any form.

The morning session of the conference was devoted almost exclusively to the consideration of the economic situation. The two main speakers were Mr. Asoka Mehta, Deputy Chairman of the Planning Commission, and the Central Finance Minister, Mr. T. T. Krishnamachari.

In the afternoon, the Conference discussed the food situation. The Central Food Minister, Mr. C. Subramaniam, introduced the subject with a review which incorporated the decisions taken by the Government in consultation with the States Chief Ministers.

The theme of Mr. Asoka Mehta's 20-minute survey of the economic situation was that the outlook was not entirely gloomy. While the country had done poorly in agriculture and consumer goods, important strides had been taken in transport, communications, power and capital goods. The production shortfalls in agriculture and consumer goods were inter-linked: the latter suffered also because production of cotton, oilseeds and some other agricultural items failed to come up to expectations. Two major shortfalls were noticed on the agricultural front, namely, in irrigation and the supply of fertilizers. Both aggregated roughly to around two-thirds of what had been planned.

Mr. T. T. Krishnamachari pointed out that recent increases in the field of prices had re-inforced the Government's determination to eliminate deficit-financing completely from the Fourth Plan.

His main theme, however, was the future food policy. Both Australia and Japan had adopted State trading in foodgrain. This was the step which India too would have to adopt.

Conference Ends:

The Conference ended on November 25 after a plea for an effective role by Governors had been made by Mr. A. V. Pataskar (Governor of Madhya Pradesh) and had been followed by brief references by others.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

This led Mr. Lal Bahadur Shastri to jspeak to them in assuring words and describe how vital the Government of India considered their role in keeping the Centre posted with the goings-on in States.

The last day's sitting was devoted to a political survey, after the Central Home Minister, Mr. G. L. Nanda, had given his assessment. Though he said he considered the law and order position satisfactory, he listed two "disturbing factors"—revival of communal forces and the apparent ascendancy of pro-Chinese Communists and their bid to capture the party forum.

He discerned an attempt to exploit the supposed grievances of minorities for unhealthy ends and narrated how some good-intentioned people had been enticed by communal leaders. In this he saw faint signs of the re-building of the Muslim League.

The Madhya Pradesh Governor, Mr. H. V. Pataskar, reported that the dacoity menace was on the wane but the incidence of kidnapping had gone up.

Mr. G. L. Nanda gave details of the drive against corruption and stressed that earnest efforts in this regard would improve the image of India abroad.

Dr. Sampurnanand said he had fears about the country getting a bad name through exaggerated talk of corruption and cited a BBC broadcast saying that one out of every 45 Indians was corrupt.

Mr. Nanda did not accept this view, nor did he see any reason for the apprehension that officials would be demoralized. The problem, he pleaded, must be faced and solved.

J. Kashmir's Special Status In Union—Government Not To Abrogate Article 370 Of Constitution: A despatch on December 1, 1964 said that after re-examining the constitutional and political aspects of the matter, the Central Government had decided not to agree to the abrogation of Article 370 of the Constitution at this stage.

Article 370, which governs Kashmir's special status in the Indian Union, was debated in the Lok Sabha where an Opposition member had moved for its repeal. The resolution received much support in the House.

This was not the first time that the issue had been raised, but, following the debate in the Lok Sabha, the Government studied its implications afresh and had come to the conclusion that the time was not yet ripe for the abrogation of the controversial provision.

The Jammu and Kashmir Premier, Mr. G .M. Sadiq and the Home Minister, Mr. D. P. Dhar, who visited New Delhi, had prolonged discussions on this subject with the Prime Minister, Mr. Lal Bahadur Shastri and the Home Minister Mr. G. L. Nanda. There was complete unanimity of view on this issue between the State and the Centre.

During the week's study, the Government's legal experts had expressed the opinion that the way Article 370 was phrased, its abrogation would involve considerable constitutional difficulties.

Under the Constitution, Article 370 can "cease to be operative" provided the "Constituent Assembly of the State" makes a recommendation to that effect to the President. The State Constituent Assembly, it was pointed out, no longer existed and before dissolving itself it did not transfer this power to its successor, the State Legislative Assembly.

This difficulty was not insurmountable inasmuch as Parliament could delete the Article through an amendment of the Constitution. However, recourse to this method might cause resentment in the State.

Legal obstacles apart, the Centre felt that abrogation of the Article at this stage would create for it and the State Government certain avoidable political difficulties. Anti-Indian elements in Pakistan and Kashmir were likely to seize upon the abrogation as an opportunity for launching a propaganda offensive against India and the State Ministry which may lead to unhappy political repercussions.

The process of the State's integration with the rest of the country was proceeding steadily and "abrupt" measures such as the abrogation of Article 370 were not necessary immediately. During the past five months, the Centre's jurisdiction had been extended to Jammu and Kashmir in respect of several new subjects. Mr. Sadiq, who himself strongly favours the State's speedy integration was credited with the view that under the existing circumstances it might be better to "erode" Article 370 than to abrogate it.

Mr. G. L. Nanda's Statement In Lok Sabha:

The Central Home Minister, Mr. G. L. Nanda, announced in the Lok Sabha on December 4 that the Centre would soon be competent to proclaim Presidential rule in Jammu and Kashmir in case of an emergency.

He also announced the Government's decision to apply to the State Articles 356 and 357 of the Constitution which set out the mechanism for this step and to give Parliament the power to make laws for the State during a break-down of the Constitutional machinery.

Central jurisdiction was also to be extended to the State in regard to four more items. These included organization of the High Court, regulation of the affairs of trading corporations and price controls.

In addition, provisions relating to elections were planned to be applied to the State. A Bill changing the nomenclature of "Sadr-e-Riyasat" to "Governor" was now before a Select Committee of the State Legislature.

Mr. Nanda assured the members that the Government shared their concern and sense of urgency for fuller integration of Kashmir. Then followed a mild hint—"I hope I will not be misunderstood if I ask for a different approach." Having thus mollified the sentiments of the House he said: "Mr. Prakash Vir Shastri's Bill is defective, it is wrong, it will have to be set aside. It defeats its own purpose."

His argument was two-fold. Article 370 did not stand in the way of the State's integration. On the contrary, it could be used to accelerate this process. Its repeal would cause a void in the administrative relationship between the Centre and the State. The Article, he explained, regulated and affirmed progressive application of the Constitution; it did not shut it out.

He added: "It is not a wall. It is a tunnel. A good deal of traffic has passed already, more will pass now." At the most, it was a movable partition.

Secondly, he argued, the repeal of Article 370 would not mean an automatic abrogation of the various "qualifications and restrictions" on other constitutional provisions. He assured that, with time, more steps would be taken to extend Central jurisdiction. In fact, some of these were urgently called for because of the demand in the State for benefits under Central laws. He, however, considered it inexpedient to give any "hasty assurance" in regard to a Presidential Order on specific points as demanded by Mr. N. C. Chatterjee.

According to Mr. Nanda, Article 370 had been unnecessarily made much of in raising doubts about Kashmir's position. This was his frank opinion, keeping in view "the national interest alone" and not out of fear of somebody or because of any weak-kneed policy. "Every move has to be carefully considered so as to fit it into a comprehensive strategy."

Mr. Prakash Vir Shastri's Bill for the repeal of Article 370, which gives Kashmir a special status, had received considerable support. The Bill was, however, negatived—23 votes for, with 157 against. Members from Jammu and Kashmir abstained from voting.

Mr. G. M. Sadiq's View:

The Jammu and Kashmir Premier, Mr. G. M. Sadiq told newsmen in Jammu on December 12 that abrogation of Article 370 according special status to Kashmir was beyond the jurisdiction of the State Government. "It will be presumptuous on my part to ask Parliament to do so".

He said the question of repealing the Article was essentially a constitutional rather than a political issue and "I feel some time or the other, the Government of India will have to refer it to jurists for examination".

K. Indo-Pakistan Home Ministers' Conference Postponed: The Pakistan Home Minister, Mr. Habibullah Khan, told newsmen in Karachi on November 19 that the Indo-Pakistan Home Ministers' Conference would not be held before the Presidential election in March, 1965.

The Conference was to have begun in Rawalpindi on November 23 but was postponed at Pakistan's request.

[Prev. ref. 5799:INI:G]

L. World Conference For Peace And International Co-operation: The World Conference for Peace and International Co-operation, which concluded its five-day session in New Delhi on November 18, issued an appeal to all Governments not engaged in the atomic race and willing to join with them to meet without delay and demand a total ban on all atomic arms and weapons of mass destruction.

This conference of all Governments, the appeal said, should also demand an immediate end to the manufacture of atomic weapons and to all forms of testing of these arms; the destruction of existing stocks and to study, in conjunction with the peoples' measures and actions necessary to achieve these aims.

The World Peace Conference, attended by delegates from 40 countries and 12 international organizations, expressed its "deep appreciation" to the statement by the Prime Minister of India in his address to the Conference according the full support of his Government for peaceful co-existence, disarmament and international co-operation, its determination not to manufacture nuclear weapons and its intention to pursue the policy and, where possible, extended the area of non-alignment as an instrument for world peace.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

On disarmament the Conference called for an end to the arms race and for immediate practical steps towards the goal of complete and general disarmament under effective international control.

It "deplored" the test explosions, which had emanated from or were planned by France and China, and earnestly urged them and any other country that might be planning or contemplating nuclear tests to desist from such projects.

The United States proposal for the establishment of a multilateral nuclear force within NATO was described as an "extremely dangerous move" and the conference called on various peace organizations in the NATO countries for a united demonstration in Paris at the December (1964) session of the NATO Council.

The Conference also demanded the creation of nuclear-free zones as a means of diminishing tension in critical areas.

It expressed its belief in the observance of five principles for the alleviation of world tensions. These principles were: (1) respect for the sovereignty of all States, big or small, and the security of their territory; (2) respect for international law and international obligations; (3) settlement of all problems among neighbouring countries—including border problems, through peaceful negotiations; (4) abstention from the use of force in international relations; and (5) peaceful co-existence as laid down in Bandung and re-affirmed in Belgrade and Cairo Conferences of non-aligned States.

It expressed its full support for the programme of peace and international co-operation adopted by the Cairo Conference and said: "This declaration underlines the fact that non-aligned countries are contributing in a very decisive manner to the struggle against war and imperialism, colonialism and neo-colonialism. The programme is a detailed and concrete programme of fact."

M. **Kuwait Premier's Visit:** The Crown Prince and Prime Minister of Kuwait, Sheikh Sabah al Salim al Sabah, was given a warm welcome when he arrived in New Delhi on November 17 on a 13-day State visit.

The Prime Minister, Mr. Lal Bahadur Shastri, who received him at Palam airport, told the visiting dignitary: "We greatly cherish our relationship with Kuwait which has existed for many centuries".

The Crown Prince expressed confidence that "with the leaders of India we shall foster our co-operation and cement the friendly relationship existing between our two countries and peoples".

State Dinner:

At a State dinner on November 17 in honour of the Crown Prince of Kuwait, Mr. Lal Bahadur Shastri expressed the hope that India and Kuwait would participate in joint ventures fruitful for both the countries.

Discussions were now going on in regard to Indo-Kuwaiti industrial collaboration. "I do hope that these discussions will succeed."

Mr. Shastri hoped that the trade relations between Kuwait and India would further expand. He thanked Kuwait for lending support to India at the time of the Chinese aggression.

Sheikh Sabah al Salim al Sabah said in reply that India and his country had deep affiliations from the past. The friendliness, affection and understanding built through these years formed the "basis of the present spontaneous similarity of approach" of the two countries to basic international problems.

Civic Reception:

At a civic reception given to Sheikh Sabah al Salim al Sabah in New Delhi on November 18, Mr. Lal Bahadur Shastri said India and Kuwait would hold talks in a day or two to decide on a principle that would guide the collaboration of the two countries on some major projects.

He said once the principle was evolved details of projects would be worked out later in New Delhi and in Kuwait.

He said that prosperous Kuwait was ever willing to help developing countries and had, indeed, assisted several Arab States. When he had suggested collaboration on projects, both in India and Kuwait, the Crown Prince had reacted favourably. Such collaboration, could be both at the State and private levels.

He recalled Kuwait's support for India when it was attacked by China and also referred to the Sheikhdom's "clear opinion" on the Chinese atomic blast. It was time, he said, that all countries which did not possess nuclear weapons should raise their voice against atomic tests and armament.

The Crown Prince, replying to an address of welcome, said the human values for which Mahatma Gandhi and Mr. Nehru had stood were the basis of Kuwait's declared policy at home and in the international field.

He said Kuwait was a small country, but it upheld the principles of peace with justice, friendship with understanding and prosperity with benevolence.

He also announced the donation of Rs. 1,00,000 to the Nehru Memorial Fund.

Reception By Jamait-ul-Ulema-i-Hind:

On November 18, the Jamait-ul-Ulema-i-Hind held a reception in honour of Sheikh Sabah al Salim al Sabah.

Speaking on the occasion, the Kuwait Prime Minister urged the Indian Muslims to serve their country and religion as true followers of Islam.

A donation of Rs. 50,000 was announced for the Jamait-ul-Ulema-i-Hind on behalf of the Kuwait Prime Minister for the promotion of its religious and educational activities in the country.

On November 19, Sheikh Sabah al Salim al Sabah left New Delhi on a tour of the country.

He left India for Kuwait on November 30.

[Prev. ref. 5846:INI:G]

N. **Mr. M. C. Chagla On Language Policy:** The Central Education Minister, Mr. M. C. Chagla, defended in the Lok Sabha on December 11, 1964 the Government's language policy and declared that he would not "ram Hindi down the throats of the people of South India."

He appealed to the House and especially to the protagonists of Hindi who had accused him of going back on the language policy, not to do anything which might undermine national unity. "Let us go slow and take the South and other parts of India with us. I will not be a party to forcing Hindi on the South, West Bengal or any other part of the country."

Taking strong exception to the charges against him, Mr. Chagla said that he had not made even an iota of change in the Government's language policy which had been approved by Parliament. There was no question of his initiating any new policy.

The Government was agreed that regional languages should ultimately become the media of instruction in universities, but the transition from English to regional languages should be "careful, well-thought-out and after full preparation."

He warned against attempts to destroy the English language which acted as a link between different parts of the country. "We must work for a day when Hindi—our national language, becomes the link language. But till that day English must continue. Let us pursue a policy which will not harm national unity."

He characterised as a "complete lie" the allegation that he was not supporting the propagation of Hindi. He listed the measures taken to spread Hindi in non-Hindi speaking areas. He quoted extensively the reports of various Education Commissions and other expert bodies which said that English should continue as long as Hindi and the regional languages were not sufficiently developed to replace it. They had also said that English should be retained as it was the only means of preventing India's isolation from the world. If fissiparous tendencies were not to develop, there was strong need for the country to have a common language. The Kunzru Committee in its report in 1957 had stated that the switch-over from English to Indian languages should not be hasty and should be preceded by adequate preparation. The Radhakrishnan Commission was of the view that it would neither be desirable nor feasible to create a void by abandoning the language now in use.

He added that the Centre's policy had received full support from the conference of Chief Ministers in 1961. The conference had passed a resolution saying that unless there was an all-India language, teachers and students would not be able to immigrate from one university to another. The cause of education would suffer for want of a common linguistic link. Change-over to Hindi and regional languages would be effective when such languages were developed adequately for purposes of modern education. Till that happened, English would continue.

O. **Government's Food Policy In Kerala—Censure Motion In Lok Sabha Defeated:** The Lok Sabha defeated on November 17 by 180 votes to 42 an Opposition adjournment motion seeking to censure the Government for the food shortage in Kerala.

During the debate, members from Kerala gave vent to their feelings at the conditions created by the rice shortage in the State. The members took the Government to task for its failure to avert the crisis.

The manner in which the Central Food and Agriculture Minister, Mr. C. Subramaniam, came forward at the end "to share the feelings of anguish and the sense of shame at the way in which the Kerala situation had developed", however, blunted the Opposition attack somewhat. The result was that the reply of the Communist sponsor of the motion, Mr. H. N. Mukerjee, lost much of its sting.

Earlier, Mr. Subramaniam had said that there was no case for an adjournment motion, but the cue was not evidently taken by his party members. The usual promptitude with which Congress members vote down an Opposition move was lacking when the Speaker, Mr. Hukam

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Singh, wanted to know if the House favoured a discussion on Mr. H. N. Mukerjee's motion.

Explaining the Government's approach later, Mr. Subramaniam gave the assurance that movement of rice and wheat to Kerala during the last two weeks of November and in December had been planned properly to avoid a repetition of what had happened.

He briefly reviewed the measures adopted since he took over as Food Minister in June. After the discontinuation of procurement levies in Andhra and Madras, rice prices had shown a downward trend. He had hoped that the trade would co-operate and prices would not go beyond the then existing levels. After a few weeks, however, prices began to rise again. Then it was decided to fix prices for producers, retailers and wholesalers. In the Southern Zone they were fixed in such a way that rice from Andhra and Tanjore would move into Kerala. Traders seemed to be satisfied with the prices fixed but this was short-lived because they were accustomed not to reasonable margins of profit but to speculative profits. So conditions became difficult again.

At that time price control in Kerala was unfortunately relaxed, Merchants were able to operate outside the fixed price levels. This led to large-scale movement of rice into the State. The Governments of Andhra and Madras were alarmed that their position would become difficult. Their fears were genuine. The result was the imposition of informal restrictions on the movement of rice from these two States. He then met the Chief Ministers of the southern States and all of them came to the conclusion that Madras and Andhra should take the responsibility for moving sufficient stocks to Kerala.

Mr. Subramaniam said that the next step he took was to discuss with the Kerala authorities the enforcement of controls on distribution. The machinery for this purpose was being set up. It was estimated that 80,000 tons of foodgrains would have to be sent to the State every month on the basis of 12 ounces per adult per day for two-thirds of the population (the rest being producers). Later, however, it was felt that it would not be possible to get enough stocks from Andhra and Madras to give even half this ration. This position was made clear to the Governor of Kerala. It was also made clear to him that informal rationing would have to be introduced only gradually. By the time ration cards had been issued, the State Government decided to bring the whole population under rationing. This created a new situation. So it was felt that instead of 80,000 tons the State would require 120,000 tons a month. Half of this would be rice and half wheat.

He said it was about this time that he left for Manila. (This had been severely criticised by some Opposition members). He regretted this and said that he went because plans for movement of food to Kerala and for informal rationing had been finalised.

At one stage during his speech, the Swatantra leader, Mr. N. G. Ranga, demanded that the Minister should resign. Mr. Subramaniam said at the end of the speech that it would be very easy for him to take this step because it would mean a relief. But it would also mean shying away from duty. He would not prefer to do it. "I mean to face the situation and, if possible, succeed."

(*The Times of India*, New Delhi)

[Prev. ref. 6088:INI:A]

P. National Food Policy Approved By State Chief Ministers: After nearly five months of intermittent discussions, the State Chief Ministers gave their unanimous consent on November 18 to a national food policy, which was later approved by the Congress Working Committee.

Under the new policy—essentially a compromise between conflicting regional interests—the procurement target for rice for the Central pool in 1965 is to be raised to over two million tonnes, a buffer stock of 500,000 to one million tonnes of rice is to be built up and, perhaps for the first time, all coarse grains will be brought under a national system of food distribution on a State-to-State basis.

The long-drawn-out controversy over statutory rationing in big cities was also ended. Calcutta—at the insistence of the West Bengal Chief Minister, Mr. P. C. Sen—will have statutory rationing. Bombay, Kanpur and Ahmedabad will continue with the present system of informal rationing.

The cities of Madras, Hyderabad and Bangalore may have, if the concerned States so desire, a new system of "regulated distribution" of foodgrains which, according to reliable sources, is merely a compromise in terminology with the opponents of statutory rationing. Pending the introduction of the new system, these cities too may continue with informal rationing.

The States have been requested to extend informal rationing to other cities also.

The new policy was also understood to have resolved the reported differences at the highest level in Government over the quantum of rice imports during the coming year. Tentatively it was proposed to import during 1965 about 250,000 tonnes of rice under PL 480 from USA. Another 250,000 tonnes may be imported, if necessary, on payment of Rs. 15 crores in foreign exchange.

It was decided that each State, whether surplus or deficit, should launch a procurement drive to mop up the marketable surplus of rice and coarse grains and meet its internal needs.

The surplus States would, besides, procure in all over two million tonnes of rice for the Central pool from which, besides building a buffer stock, the needs of the deficit States would be met.

The contributions of the surplus States to the pool would be: Andhra Pradesh 800,000 tonnes, Madhya Pradesh 400,000 tonnes, Orissa 300,000 tonnes, Madras 200,000 tonnes and Punjab 250,000 tonnes. UP would make a small contribution.

Procurement in Madhya Pradesh and Orissa would be made by the Centre, while in Andhra the task would be left to the State Government.

Every State producing coarse grains, whether surplus or deficit, would be required to contribute 25 per cent of it for export to other States on State-to-Sate account.

Inter-State movement of gram would be free all over the country after March, 1965. Till then it would be on a State-to-State basis under restricted quotas. The interim arrangement had been made in deference to the pressing requests of Mr. M. L. Sukhadia, the Rajasthan Chief Minister.

Movement of all pulses and edible oils would be free all over the country.

A decision on the policy to be followed about wheat will be taken in March, 1965 just before the next rabi harvest.

To meet the fears of the deficit States and also to check trade malpractices, it was decided that all State-to-State movement would not be only on Government account. Unlike last year, private millers would have no hand in it. All procurement and exporting for the deficit States would be done by official agencies.

The Congress Working Committee discussed the Chief Ministers' proposals at two sittings. The first meeting, heard a long statement from the Central Food and Agriculture Minister, Mr. C. Subramaniam, on the discussions of the Chief Ministers.

Official Assessments Of Food Production: The latest official assessments anticipate that the over-all increase in food production in the first four years of the Third Five-Year Plan will be around 155,24,000 tonnes against the Plan target of 239,56,000 tonnes.

Only three States—Punjab, Andhra Pradesh and Madras—are expected to fulfil the Plan target in respect of increased food production.

When the first four years of the Plan are completed in 1965, these States would have achieved more than 75 per cent of the target. While Punjab is likely to top the list, having achieved 88 per cent of the target, Assam and Bihar, with less than 50 per cent achievement, are likely to be at the bottom.

Gujerat, Madhya Pradesh, UP and West Bengal are expected to achieve a little more than 50 per cent of the Plan target at the end of the year, while the remaining five States would have fulfilled between 60 and 70 per cent.

The tardy pace of progress in Assam, Bihar, Gujerat, Madhya Pradesh, UP and West Bengal is attributed to the snags in the full implementation of minor irrigation works and fertilizer distribution programmes.

In Gujerat, although the targets for minor irrigation, soil conservation and supply of improved seeds and green manuring are likely to be achieved, the programmes for dry farming, land reclamation and distribution of chemical fertilizers have not made much headway.

The annual rate of growth of agriculture is the lowest in West Bengal—less than one per cent. Against the Third Plan target of 14,49,000 tonnes of additional food production, the production achieved at the end of the first four years of the Plan will be about 8,25,000 tonnes.

In UP, food production declined steadily during the first three years of the Plan. Although the trend now seems to have been arrested there will be a very large shortfall in the Third Plan production target.

Additional food production in Bihar during the first four years of the Plan is likely to be 9,76,000 tonnes as against the Plan target of 20,27,000 tonnes. On the basis of the present estimates, the achievement during the Plan period is likely to be 14,02,000 tonnes.

In Madhya Pradesh, additional production during the first four years of the Plan is likely to be 9,62,000 tonnes as against the Plan target of 16,68,000 tonnes.

(*The Statesman* and *The Hindustan Times*, New Delhi)

[Prev. ref. 6151:INI:G]

Q. Food Production And Population Growth—FAO Expert's Forecast: The Director of the Statistics Division of FAO, Dr. P. V. Sukhatme, told a seminar on food and health in Bombay on November 25 that at the present rate of population growth, India would have to double its food output by 1980 and increase food yields four-fold by the turn of the century.

He placed India's current food deficit in terms of economic grain equivalent at 47 million tons. The deficit was made up of 10 million tons in cereals and pulses, 9 million tons of fruits and vegetables, 10 million tons of milk, 2 million tons in

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

other animal products and a little over one million tons of fats and oils.

The task before the country was not only to wipe out the deficit, but also to provide for additional population. The annual increase of India's population was of the order of 10 million. This implied that India would have to raise her annual food availability by 4½ million tons, in terms of economic grain equivalent, merely to satisfy the needs of additional population.

Should the population grow to 680 million by 1980, as visualized by UN, India would need to provide 110 million tons to feed the additional population. In other words, India would have to double her total food supplies in order to achieve minimum goal of nutrition by 1980. The food supplies that would be needed by the year 2000 would be four-fold.

In reality the picture was likely to be darker because the indications were that population might be growing faster than under the present assumption. Secondly, the nutritional goal assumed was too modest and unlikely to bring about any appreciable reduction in the incidence of malnutrition.

Dr. Sukhatme said, given the necessary inputs and incentives, there should be no insuperable difficulty in increasing India's output to the required extent well before 1980. The attainment of the milk target was likely to present a problem, but here again experimental evidence left little room for doubt that milk yields could be doubled, or even trebled, through better feeding and management and long-range programme of improvement through animal breeding.

But how was India to feed her enormous cattle population, much of which was either undernourished or malnourished, or both? It was doubtful whether the food supplies needed could be raised internally without drastic measures such as the removal of excess cattle.

Should India's performance over the next Plan period show that it would be futile to achieve the short-term goal of nutrition even by 1980, it would be necessary to intensify the movement towards smaller family size and to initiate a policy towards the removal of excess cattle.

India's current birth rate of about 40 per thousand had to be reduced by half. A reduction of this order was hardly feasible, especially among rural people, the majority of whom were illiterate. India was thus left with the only hope of improving the levels of nutrition of India's people and that was to realize the agricultural potential as quickly as possible.

(*The Times of India*, Bombay)

[Prev. ref. 5973:AOA:B]

R. **Food Corporation Bill Passed:** The Lok Sabha passed on November 25 the Food Corporation Bill, seeking to establish the Food Corporation of India to take up State trading in grain and other food-stuffs on an appreciable scale.

The Corporation will have an equity capital of Rs. 100 crores, with powers to borrow on Central Government guarantee. It will function as an autonomous organization, working on commercial lines but within the frame-work of an overall Government policy.

The Food Minister, Mr. C. Subramaniam, said in reply to the debate in the third reading stage that the Corporation would function as the "real friend" of the farmer.

He re-iterated that the basic policy of the Government was to ensure remunerative prices for farmers.

He rejected Mr. Prakash Vir Shastri's suggestion that food prices should be allowed to fall by the interplay of free market operations. This would only mean that in a bumper crop year prices would drop so low that the farmer's return was less. In other words, the farmer's incentive to produce more would be killed.

He denied Mr. Shastri's charge that he (Mr. Subramaniam) had shown special favour to Madras, Mysore and Andhra Pradesh in the matter of grain allotments.

In a statement giving "the Objects and Reasons" of the Corporation, Mr. Subramaniam described it as "the first organized attempt to take up State trading in foodstuffs on an appreciable scale."

The Corporation will also build up buffer stocks. It will deal primarily in the purchase, storage, movement, distribution and sale of grain. Provision has also been made in the Bill enabling the Corporation to deal in other foodstuffs if considered necessary by the Government.

The Corporation is expected to secure for itself a "strategic and commanding position" in the country's grain trade.

It provides that the management of the Corporation shall vest in a board of directors. In discharging its functions, the board of directors "shall act on business principles having regard to public interest and shall be guided by such instructions on questions of policy as may be given to it by the Central Government."

The board of directors will consist of a chairman, a managing director, three directors representing the Central Ministries of Food, Finance and Co-operation, Managing Drector of the Central Warehousing Corporation and six other directors.

The Government may also appoint one or more advisory committees to advise the Corporation.

The Bill was passed by the Rajya Sabha on December 2.

(*The Statesman*, New Delhi)

[Prev. ref. 6091:INI:B]

S. **Dr. B. R. Sen On Food Crisis:** The Director-General of FAO, Dr. B. R. Sen, told a news conference in Bombay on November 30 that the present trend of thinking that the food crisis in India was of temporary character and that, once a good harvest was in, the corner would be turned, was based on a too optimistic and complacent an assumption.

The crisis, he said, lay deep in India's growing economy. It needed long-term treatment and a continued and well-thought out long-term policy, both for food production and distribution.

He suggested the setting up of a high-level Agricultural Commission for a very comprehensive and detailed probe of Indian agriculture in all its inter-related aspects and at various levels—village, block, district and State.

He said there had been no comprehensive inquiry into Indian agriculture since the Linlithgow Commission in 1924-28.

The terms of reference of such a commission should be.

(1) Authoritative review of the statistics of food production and consumption;

(2) Quantitative assessment of major factors responsible for the recorded increase in food production;

(3) Present state of under-nutrition and malnourishment among the population;

(4) Food needs for 1970, 1980, 1990 and 2000, taking into account minimum nutritional requirements and the population growth on the basis of present demographic trends; and

(5) Assessment of the effectiveness of present measures to solve the food problem.

T. **Purchase Of Rice From UAR:** India signed in Cairo on November 19 an Agreement for the immediate purchase of 71,000 tons of rice from UAR.

(*The Egyptian Gazette*, Cairo)

(Prev. ref.

U. **World Food Programme Aid:** Under two Agreements with India signed on November 3, the World Food Programme of UN would assist a scheme to provide double-toned milk to low-income groups in Delhi, and a project for improved feeding of dairy cows in Andhra Pradesh.

The cost of aid to the Delhi scheme is estimated at $309,400 and of assistance to the Andhra project is $256,000.

The World Food Programme was established by United Nations and the Food and Agriculture Organization in 1961 and came into operation on January 1, 1963. WFP provides aid to three types of projects: using food as an aid to economic and social development; assisting in pre-school and school feeding; and meeting emergency food needs. Approximately $100 million in food, service and cash are being distributed through UN channels over a three-year period to developing areas to meet the above needs. Projects in India for which WFP assistance, in agreement with the Government, is now being given include increasing milk production in Anand; intensive egg and poultry production and marketing in Babugarh.

V. **Diplomatic Appointments:** It was officially announced in New Delhi on November 28 that Mr. Samarendranath Sen, India's Ambassador at Algiers, had been appointed Ambassador to the Lebanon.

Mr. Abid Hasan Safrani, Ambassador to Senegal, has concurrently been appointed Ambassador to Upper Volta with residence at Dakar (Senegal).

Mr. Vishnuprasad Chunilal Trivedi, Ambassador-designate of India to Switzerland, has concurrently been appointed India's Minister to the Vatican with residence at Berne (Switzerland).

(*The Hindustan Times*, New Delhi)

[Prev. ref. 6166:INI:H]

W. **Three Loan Agreements With USA:** The Governments of India and USA signed in New Delhi on November 30 three Agreements providing for US loans totalling $60.3 million (Rs. 28.7 crores) to promote the development of industry, power generation and transport in India.

The first loan provides for $50 million to be used by the Government of India to finance the import of a broad variety of commodities required to maintain existing facilities and expand both agricultural and industrial production.

The second loan amounts to $7.2 million and will meet the cost of acquiring 25 broad-gauge diesel locomotives by the Indian Railways.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

The third loan, amounting to $3.1 million will be used to procure and install an 89,100-kw generator at the Sharavathi hydro-eectric project in Mysore.

All three credits were extended by the US Agency for International Development. They are repayable in dollars over a 40-year period, with no repayments called for during the 10-year grace period.

(*The Statesman*, New Delhi)

[Prev. ref. 6116:INI:E]

X. West German Loans To Industrial Corporation: The West German Bank for Development has granted a loan of DM10 million to the Industrial Credit and Investment Corporation of India and DM5 million to the Small-scale Industries Corporation.

Agreements for both were signed in New Delhi on November 25.

The West German Bank had already given loans of DM80 million to Indian corporations.

(*The Statesman*, New Delhi)

[Prev. ref. 6054:INI:C]

Y. Canadian Aid Programme. India will receive goods and services worth $39 million from Canada under its 1964-65 aid programme.

Of this, $22 million will be in the form of grants, $10 million in soft loans and $7 million in food.

(*The Statesman*, New Delhi)

[Prev. ref. 5907:INI:C]

Z. Trade With USSR—Letters Exchanged: A 50 per cent increase in Indo-Soviet trade during 1965, as compared with the current year was agreed to in Letters exchanged between the representatives of the two countries in New Delhi on November 18.

At talks held with Indian officials, the Russian delegation agreed that trade during 1965 should be of the value of about Rs. 125 crores in each direction.

This meant, incidentally, that the trade targets agreed to under the earlier long-term Agreement would be reached a year ahead of schedule.

About 40 per cent of the total exports to Russia during 1965 will be of manufactured goods, particularly engineering products.

(*The Statesman*, New Delhi)

[Prev. ref. 5631:INI:D]

A(I) Development Of Asnapani Coal Mine—Agreement With British National Coal Board: The Government of India has reached agreement with the British National Coal Board on the terms of collaboration for developing the Asnapani coal-mine in east Bokaro (Bihar).

The agreement covers the administrative set-up of the project, utilization of indigenous equipment, training of Indian technicians and facilities for British personnel.

The British Board was represented in the talks with Indian Government officials by its Chairman, Lord Robens, and Mr. M. V. Sheppard, Director-General of Production.

(*The Statesman*, New Delhi)

[Prev. ref. 5860:INI:L]

B(I). Central Allocation For Mining Industry: The Central Commerce Minister, Mr. Manubhai Shah announced in Panjim on November 21 that the Central Government had allocated Rs. 2 crores foreign exchange yearly for Goa's mining industry to enable it to import equipment, components and spares.

He said Goa had "iron-ore in abundance, entrepreneurs with vision and an ocean close by"—three factors which should help them convert "red gold into yellow gold."

India was now exporting 12 million tonnes of ore and it should not be difficult to achieve the Fourth Five-Year Plan target of 25 to 30 million tonnes by 1970-71. A recent survey had shown that India had about 110,000 million tonnes of high grade ore deposits.

While announcing the foreign exchange allocation, he urged local mine-owners to make the best use of the available indigenous equipment.

(*The Times of India*, Bombay)

[Prev. ref. 5474:INI:K]

C(I). Iron-ore Plant Commissioned In Goa: A Rs. 2-crore plant for upgrading exportable iron-ore was commissioned on November 21 at Pale, 40 miles from Panjim (Goa), by the Central Commerce Minister, Mr. Manubhai Shah.

The ceremony marked the mechanization of the Pale mining area in Goa, operated manually till then. The mechanization is expected to raise the annual ore output of the mine from 300,000 tons to more than 500,000 tons.

The mechanical plant at Pale mines is capable of processing 250 tons of crude ore into high grade exportable ore per hour. The crude ore mined in Goa has an iron content of about 55 per cent.

Some 70 iron-ore mines are being exploited in Goa by various private licensees. Most of them are manually operated.

The iron-ore deposits of Goa have been unofficially estimated at 500 million tons. A detailed mapping of the region by the Geological Survey of India is now under way. Last year's exports of iron-ore from Goa were around 6.7 million tons.

Mr. Shah also laid the foundation-stone of a plant to convert iron-ore fines into pellets for the export market. The pelletization plant, which will cost around Rs. 4 crores, is expected to go into production early in 1966.

The pelletization plant, the first to be set up in South-East Asia, will produce 1,700 tons of iron-ore pellets per day or about 550,000 tons a year.

(*The Times of India*, Bombay)

[Prev. ref. 5775:INI:Q]

D(I). Coal Seams In Ramgarh Discovered: Twenty-two coal seams, some of superior quality, have been located by the Indian Bureau of Mines in the Ramgarh coalfield in Bihar.

The seams have been located after detailed explorations by intensive drilling in four notified blocks comprising an area of 70.84 square km.

The location of these seams is considered important in view of their proximity to the proposed site of the Bokaro Steel Plant. Besides, the exploitation of the seams will help achieve the production targets of coking coal during the Third and Fourth Plan periods.

The Bureau has, for the first time, established systematic co-relation of 16 of the 22 coal seams. Of the 22 workable coal seams, particularly four seams have attracted special attention for their superior quality, coking property and appreciable thickness. These seams have moderate to strong coking properties.

On the basis of investigations, proved reserves of 270.351 million tonnes of coal have been estimated, of which 82,223 million tonnes are quarriable and the rest can be exploited by underground mining. Of the total reserve of coal, 70,574 million tonnes are of good quality and the remaining 199,777 million tonnes are of inferior grade.

(*The Times of India*, Bombay)

[Prev. ref. 5860:INI:L]

E(I). Korba Aluminium Project—Agreement On Procedure Signed With Hungary: An Agreement setting out the procedure for preparing a project report on the proposed aluminium project at Korba in Madhya Pradesh was signed in New Delhi on November 17 by representatives of the Government of India and the Hungarian Government.

The project report will be prepared in two stages. The first part of the report, which will include the economic assessment of the resources, will be presented in 10 months. On the basis of this report the Government of India will take a final decision on the scope and capacity of the project.

The final report will be presented within 18 months from the date the Agreement on the project report becomes effective.

The National Industrial Development Corporation will act as the technical consultancy bureau for the Government of India and the executing agency for the project.

The Korba project will have a capacity to manufacture 1,20,000 tonnes of alumina and 30,000 tonnes of aluminium metal per annum.

The Hungarian Government has already offered credit to cover the foreign exchange component of the project.

(*The Times of India*, New Delhi)

[Prev. ref. 5582:INI:H]

F(I). Progress Of Indian Oil Corporation: The Chairman of the Indian Oil Corporation, Mr. P. A. Gopalkrishnan, said in Bombay on November 21 that the Corporation was likely to become the largest oil company in the country in another six or seven years.

Addressing the Corporation's annual general meeting, he said they had increased the tankage and also built many new depots. The Corporation could now handle a sale of more than two million kilo litres. During 1963-64, it sold 1.17 million kilo litres of oil products as against 0.62 million in the previous year, while it sold 26,488 tons of petroleum coke as against 11,498 tons. The operational cost per kilo litre had come down from Rs. 30.16 to Rs. 29.21.

The report and accounts of the Corporation for the year ended March 31, 1964 showed that its sales increased from Rs. 21.35 crores to Rs. 52.43 crores. After providing Rs. 19,52,000 (Rs. 31,31,000) for depreciation, Rs. 21,20,000 (Rs. 2,80,000) for taxation and Rs. 55,85,000 (Rs. 15,01,000) for interest charges, the net profit was Rs. 83,57,000 (Rs. 59,60,000). The net profit worked out to 17 per cent of the paid-up capital of Rs. 3.22 crores in 1962-63.

The Corporation had done some preliminary work on the marketing of special products such as insecticides and rubber spray oils. It was considering the setting up of a laboratory for testing petroleum

[Prev. ref. 5632:INI:K]

G(I). **New Chief Justice Of Madras High Court:** It was announced in New Delhi on November 21 that the President had transferred Mr. Justice P. Chandra Reddy, Chief Justice of the Andhra High Court, as Chief Justice of the Madras High Court.

He took the place of Mr. Justice Ramachandra Iyer who had been permitted to retire.

Next day (November 22), Mr. Justice Chandra Reddy was sworn-in as acting Governor of Madras in place Mr. Jayachama Rajendra Wadiyar who went abroad for three months.

(*The Hindu*, Madras)

H(I). **Re-shuffle Of Madhya Pradesh Cabinet:** The Madhya Pradesh Chief Minister, Mr. D. P. Mishra, effected in Bhopal on November 30 a major re-shuffle in the portfolios of his Cabinet colleagues.

Education was given to Mr. N. R. Dixit, who was holding Commerce and Industry which now goes to Dr. S. D. Sharma, till now Education Minister. Tourism which was part of Industries, was taken over by the Chief Minister himself as also Archaeology which was part of Education. The Languages Department, till now held by Dr. Sharma, was given to Mr. N. S. Shukla, Minister for Finance.

Rani Padmavati Devi, who was Minister for Social Welfare, became Minister for Local Self-Government (urban). Social Welfare went to Mr. G. N. Singh who was in charge of Local Government.

The Chief Minister himself took over the Panchayat Department which had been separated from Local Self-Government.

Mr. Mishra said that the re-shuffle had been made keeping in view the experience gained during the 14-month working of the Ministry.

He also decided that each Minister of State should be attached to a senior Cabinet member and should, in addition to his portfolio, look after part of his senior's work. The Irrigation Minister, Mr. R. P. Sharma, would be attached to Mr. N. R. Dikshit. The Jails Minister, Mr. Ved Ram, would be attached to the Food and Civil Supplies Minister, Mr. Gautam Sharma. The Power Minister, Mr. Sajjan Singh Vishnar, would be attached to the Chief Minister and would look after Panchayats. The Public Works Minister, Mr. Parmanandbhai Patel, would be attached to the Rehabilitation Minister, Raja Naresh Chandra Singh. The Health Minister, Dr. Ramacharan Rai would be attached to the Commerce and Industries Minister, Mr. S. D. Sharma. The Revenue Minister, Mr. K. B. L. Sharma is to look after natural resources. The Labour Minister, Mr. Shyam Sunder Patidaw, would be attached to the Development Minister, Mr. Mishrilal Ganguwal, and look after Economics and Statistics.

(*The Statesman*, New Delhi)

[Prev. ref. 5690:INI:K]

I(I). **Supreme Court Verdict On Legislature-Judiciary Conflict—UP Legal Committee's Report:** The Legal Committee of the UP Vidhan Sabha, which was appointed by the Speaker, Mr. Madan Mohan Verma, to study the implications of the Supreme Court's opinion on the legislature-judiciary conflict (see page 6215), declared on November 27 that the opinion was derogatory to the prestige and dignity of Parliament and the State Legislatures.

This opinion would not only make the smooth functioning of the House impossible but also reduce parliamentary democracy to a mere mockery. The Committee called upon the State Legislatures and Parliament to sit together and clear the mist that had been created by the Supreme Court's opinion so that the smooth functioning of these bodies might be ensured without any hindrance, obstruction and interference from outside.

It decided to contact the Speaker of the Lok Sabha, Mr. Hukam Singh, and Speakers of various State Legislatures and call an all-India convention of legislators to discuss the issue.

[The Supreme Court while giving its verdict in the Presidential reference on the tussle between the UP Vidhan Sabha and th Allahabad High Court had opined that Mr. Justice Sehgal and Mr. Justice Beg of the Lucknow Bench of the Allahabad High Court had not committed contempt of the Vidhan Sabha by admitting a writ petition filed by Mr. Keshav Singh, a Socialist worker of Gorakhpur, who was sentenced to seven days' imprisonment by the Vidhan Sabha for a breach of privilege and that the judiciary was competent to examine the privileges of legislatures.]

Reacting sharply to the pronouncement of the Supreme Court, the Legal Committee stated that the opinion "betrays a subtle attempt on the part of the judiciary to expand its jurisdiction and usurp those powers which were intended to be given exclusively to Houses of Parliament and State Legislatures. The interpretation given by the Supreme Court is not in accordance with the letter and spirit of the Constitution and does not reflect the real intentions of the framers of the Constitution. As such, the opinion is not binding on any one.

It added: "Article 194(3) and Article 105(3) were so explicit and clear that there could be no room for any other interpretation except that Parliament and State Legislatures enjoyed the same powers, privileges and immunities that were enjoyed by the British House of Commons at the time of the commencement of the Constitution.

"The most important and essential ingredient of the privileges of the House of Commons is its power to commit anyone for its contempt by a general warrant without being subject to judicial review."

(*National Herald*, Lucknow)

[Prev. ref. 6215:INI:A]

J(I). **Exposition Of Holy Relics St. Francis Xavier:** The holy relics of St. Francis Xavier were exposed for public veneration on November 24 in Velha Goa by the Papal Internuncio, Mgr. James Robert Knox, at a solemn ceremony in the basilica of Bom Jesus.

By nightfall more than 7,000 people were estimated to have visited the shrine.

(*The Times of India*, Bombay)

K(I). **All-India Radio To Acquire High Power Transmitters:** Central Minister for Information and Broadcasting, Mrs. Indira Gandhi, announced in the Lok Sabha on December 14, 1964 that the Government had decided to acquire a "super high-power" medium-wave transmitter as well as two short-wave transmitters of 250-kw capacity each.

Replying to a special debate started by Mrs. Renuka Ray, she listed a series of reasons, technical and political, for reversing the earlier Government decision to drop the proposal for a high-power (1,000 kw) medium-wave transmitter and acquire two small short-wave transmitters only.

Mrs. Gandhi declared that the new transmitters would be used not merely for the "negative" purpose of counteracting Chinese and Pakistani propaganda but positively to "project India and its policies."

There were expression of dissatifaction when she disclosed that it would take about two years to acquire and set up the new transmitters—the super-powerful transmitter at Calcutta and the short-wave ones in Delhi.

Thereupon, she promised to try to accelerate the establishment of these transmitters, but added that it might not be possible to reduce the period below 18 months. She added that the transmitters would be acquired from rupee payment countries.

She said the decision taken in October, 1964 not to go in for a "super high-power" transmitter had been reversed because experts considered such a transmitter preferable to short-wave one "for the limited purpose of efficient broadcasts to countries like Tibet, Sikkim and Bhutan in the north, and Burma, Thailand, Malaysia and part of Indo-China in the south-east." The decision taken in October, 1964 to acquire three short-wave transmitters—two of 250 kw power and one of 10 kw—still stood.

These transmitters, which were to have been acquired in lieu of the super high-power medium-wave transmitter, would be installed in Delhi and would be used to cover Pakistan, Afghanistan, Saudi Arabia, and the North-East Africa as well as China, the Soviet Union and several African countries.

(*The Statesman*, New Delhi)

[Prev. ref. 5406:INI:J]

L(I). **Working Of Ministry Of Information And Broadcasting—Inquiry Committee Appointed:** Central Government has set up a 10-member Committee to evaluate the work being done by various units of the Ministry of Information and Broadcasting.

Mr. Asok Chandra is Chairman of the Committee.

The Committee will, if necesary, avail of the Services of experts in different fields of mass communication as consultants.

The other members are Mr. Nath Pai, MP, Mr. M. S. Gurupadaswamy, MP, Dr. L. M. Singhvi, MP; Mrs. Kamala Chaudhri, MP; Mr. V. C. Shukla, MP; Mr. Sasan Zaheer; Mr. Asok Mitra; Mr. M. Chalapathi Rau and Dr. Hazari Prasad Dwivedi.

Miss Mehra Masani, Director of Programmes, Directorate-General, All-India Radio, will be secretary to the Committee.

The terms of reference of the Committee are:

(1) To determine and define the role of the Ministry of Information and Broadcasting in terms of the Government's responsibility and functioning in mass communications;

(2) To examine and evaluate the operations of various media units of the Ministry;

(3) To examine and assess in general terms the current and projected activities of the other Governmental agencies engaged in mass communications;

(4) To indicate the extent to which these operations, policies, etc., in each of the units meet the standards of an efficiently functioning unit in terms of the present objectives of the unit, and the objectives of such a unit as determined in terms of the Government's responsibility and functioning in mass communications;

(5) To recommend appropriate changes, where necessary, to be made in various media units;

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

(6) To determine the desirability and feasibility of instituting a system of co-ordinating all Government activities in mass communications and specify what form such co-ordination should take; and

(7) To draft a specific practicable programme of mass communications, with detailed reference to the media, facilities, personnel, funds and time required for implementation of the programme.

(*The Times of India*, New Delhi)

[Prev. ref. 5953:INI:C]

ASIA OUTSIDE ASIA

A. "Mariner III" Mission To Mars Fails: The first American bid to send a *Mariner III* space-craft on a 8½-month picture-taking journey near the planet Mars was declared "a complete failure" on November 6.

The Project Manager, Mr. Jack James, said: "I'm afraid it is a complete loss. There's no hope now."

Officials of the National Aeronautics and Space Administration (NASA) told a news conference they believed that the trouble came about five minutes after launching.

They said a 300-lb dome-shaped heat shroud, designed to protect the payload from overheating in the first minutes of flight through the Earth's atmosphere, apparently came partly off the craft. The hanging shroud caused several ascending problems.

(*The New York Times*)

[Prev. ref. 5192:AOA:F]

B. Weather Satellite "Nimbus" Stops Working: It was reported on September 23 that the American weather-satellite *Nimbus*, which was launched in August to take photographs of the Earth and cloud formations, had stopped working.

American scientists said this was due to the failure of its solar power system. In its brief life, Nimbus took more than 27,000 photographs, including evidence of volcanic activity in the Antarctic.

(*The New York Times*)

[Prev. ref. 6085:AOA:D]

C. Soviet Trade With Middle East In 1962 And 1963: The following trade statistics available on September 4, 1964 show the Soviet Union's trade with Middle East countries in 1962 and 1963 in millions of roubles:

Country	Total Trade		Export		Import	
	1962	1963	1962	1963	1962	1963
Total for all countries	12,137.4	12,898.0	6,327.2	6,545.2	5,809.9	6,352.8
Afghanistan	58.3	58.0	35.5	40.4	22.8	17.6
Iraq	50.2	43.8	46.8	39.1	3.4	4.7
Iran	29.3	37.4	14.5	21.4	14.8	16.0
Lebanon	7.5	5.1	3.9	4.1	3.6	1.0
Syria	10.9	24.6	4.7	11.8	6.2	12.8
Turkey	8.8	14.2	3.9	7.8	4.9	6.4
Yemen	3.5	4.5	2.1	3.0	1.4	1.5
Algeria	0.8	5.2	0.7	4.6	0.1	0.6
Ethiopia	1.9	2.8	0.8	1.0	1.1	1.8
Libya	1.9	3.0	1.7	2.3	0.2	0.7
Morocco	10.5	17.9	5.1	8.8	5.4	9.1
Sudan	19.0	27.7	9.4	12.2	9.6	15.5
Tunisia	3.7	6.2	1.7	3.7	2.0	2.5
United Arab Republic	158.7	232.9	93.0	121.7	65.7	111.2
Total	365.0	483.3	223.8	281.9	141.2	201.4

UAR is the Soviet Union's most important trading partner in the Middle East. The other noticeable feature in these trade figures is the extremely small figure of Iraqi exports to the Soviet Union compared with imports which places her in the position of having the largest imbalance of trade with the Soviet Union. Otherwise there is a remarkable balance of trade between the Soviet Union and the Middle East as well as with individual countries, and Soviet trade with the region continues to expand.

(*Middle East Economic Digest*, London)

[Prev. ref. 6085:AOA:B]

D. Nobel Prizes For 1964: It was officially announced on October 14 that the 1964 Nobel Peace Prize had been awarded to Rev. Martin Luther King, the American Negro leader.

Dr. King was the second Negro leader to win the Prize in four years. The 1960 award was given to Chief Albert Luthuli, the South African nationalist leader.

Dr. King, born in Atlanta, Georgia, at 35 was believed to be the youngest winner of the Peace Prize. His latest book, "Why We Can't Wait", dealing with the Negro's struggle for civil rights in America, was published in London in September, 1964.

The Prize will amount to 273,000 Swedish kronor ($53,123) this year.

Dr. King took his doctor's degree in theology at the University of Boston and served later as a Baptist minister. In 1955 he was chosen to lead the Negro boycott of the Montgomery (Alabama) buses. Since then he has served as a Negro leader.

The Caroline Institute in Stockholm on October 15 decided to award the Nobel Prize for Medicine in 1964 jointly to two German-born scientists—Professor Konrad Bloch and Professor Theodor Lynen.

The award was for their discoveries concerning the mechanism and regulation of cholesterol and fatty acid metabolism. The amount of the Prize they share is £18,820.

Professor Bloch (52) went to USA in 1936 and was later naturalized. In 1954 he became the first Professor of Biochemistry at Harvard University. Previously in 1950 he was Assistant Professor and later Ordinary Professor of Biochemistry at the University of Chicogo.

Professor Lynen, born in Munich in 1911, is Director of the Biochemical Institute to the University of Munich and Director of the Max Planck Institute for Biochemistry, which has produced three Nobel Prize winners. The winner of the Chemistry Prize in 1928, Professor Hernrich Wieland, is his father-in-law.

Mr. Jean-Paul Sartre said in Paris on October 22 that he was refusing the award of the Nobel Prize for Literature.

It had been assumed in Paris that Mr. Sartre was going to refuse the Prize, and there had been considerable speculation on his motives.

Mr. Sartre has written novels, plays, essays and philosophical works; he has edited magazines; he even founded a political party—the Reassemblement Democratique Revolutionnaire—a Marxist party opposed to the communists.

He outlined his views on existentialism in L'Etre et Le Neant, published in 1943, and later incorporated them in his novels. Best known among these are La Nausee, and the still unfinished tetralogy Chemins de la Liberte.

An American and two Russians were jointly awarded the Nobel Prize for Physics for work leading to the development of high intensity light beams usable for purposes ranging from drilling to surgery.

They were Prof. Charles Townes, of the Massachusetts Institute of Technology, who received half of the 273,000 kronor (about £19,000) and Prof. Nikolai Basov and Aleksander Proshorov, of Moscow's Lebdev Physics Institute, who shared the other half.

The three men won the Prize for "fundamental work in the field of quantum electronics, which has led to the construction of oscillators and amplifiers based on the Maserlaser principle".

The Maser principle allows for light waves to be focused into a narrow, high intensity beam which can be applied for purposes ranging from drilling to surgery.

The Swedish Royal Academy of Science said Prof. Townes, born in South Carolina in 1915, was a professor of physics at Columbia University in New York when with his collaborators he reported his first results on Maser in 1951 and on the applications to visible light in 1958.

Prof. Basov, born in 1922, joined the Lebedev Institute in 1948, and Prof. Proshorov became associated with the Institute two years earlier.

The Academy said: "Together these two, independent of Prof. Townes, developed their ideas about Maser action, which were then reported at a conference in Moscow in January, 1953—research work which was subsequently expanded in a number of Russian publications in the following years."

Miss Dorothy Crowfoot-Hodgkin of Oxford University (UK) was awarded the Prize for Chemistry for her "determinations by X-ray techniques of the structures of important bio-chemical substances".

FIRST QUARTERLY INDEX

January 1—April 1, 1964

(COPYRIGHT)

This is the FIRST QUARTERLY INDEX of ASIAN RECORDER for 1964 covering the period January 1 to April 1, 1964 (issues No. 1 to 13 of Vol. X).

It has been compiled on the Dictionary Method and arranged alphabetically with certain form-headings under different countries.

The Security Council debate on Kashmir is dealt with under India, Pakistan and UN. The Arab "Summit" Conference on Jordan waters issue features under A as well as Israel and the participating Arab countries. The Malaysia issue appears under Malaysia, Indonesia and Philippines.

The abbreviations for countries as well as the usual form-headings are given in the explanatory note on how to use the INDEX pasted on the inside of the back-cover of the binder under the heading INDEX EXPLAINED.

SECOND QUARTERLY INDEX

April 2—June 30, 1964

(COPYRIGHT)

This is the SECOND QUARTERLY INDEX of ASIAN RECORDER for 1964 covering the period April 2 to June 30, 1964 (issues No. 14 to 26 of Vol. X).

It has been compiled on the Dictionary Method and arranged alphabetically with certain form-headings under different countries.

ECAFE Annual Session at Tehran is dealt with under UN and Iran. International Conference against Apartheid features under South Africa and England. S-EATO Ministerial Council meeting at Manila appears under Philippines and alphabet S. Non-aligned Nations Conference—Preparatory Meeting at Colombo is dealt with under Ceylon and alphabet N. UN Security Council meeting on Kashmir issue features under UN, Pakistan and India. WHO Assembly at Geneva is dealt with under alphabet W and UN.

The abbreviations for countries as well as the usual form-headings are given in the explanatory note on how to use the INDEX pasted on the inside of the back-cover of the binder under the heading INDEX EXPLAINED.

Issued with September 23—29, 1964 Regd. No. D-727

Number 39

THIRD QUARTERLY INDEX

July 1—September 29, 1964

(COPYRIGHT)

This is the THIRD QUARTERLY INDEX of ASIAN RECORDER for 1964 covering the period July 1 to September 29, 1964 (issues No. 27 to 39 of Vol. X).

It has been compiled on the Dictionary Method and arranged alphabetically with certain form-headings under different countries.

The 17-nation Disarmament Conference in Geneva is dealt with under United Nations, alphabet U and the participating countries. The UN Conference on Trade and Development is given under United Nations, and alphabet W. The Commonwealth Prime Ministers' Conference features under UK, under alphabet C and under the participating countries. The 14-nation Conference on Laos is dealt with under Laos, USSR, UK, USA and China. The Gulf of Tonkin incidents are dealt with under Viet-Nam (DR), USA and Viet-Nam (RVN).

The abbreviations for countries as well as the usual form-headings are given in the explanatory note on how to use the INDEX pasted on the inside of the back-cover of the binder under the heading INDEX EXPLAINED.

Issued with December 2—8, 1964 Regd. No. D-727
Number 49

INDEX EXPLAINED

For easy use of material in ASIAN RECORDER, a Dictionary Index is provided.

The material is arranged alphabetically by countries under the following main form-headings: Accidents and Disasters, Agriculture, Atomic Energy, Civilization and Culture, Commerce and Industry, Communications, Constitution, Defence, Education, Elections, Finance, Fine Arts, Foreign Relations, Health and Hygiene, International Meetings, Labour and Labour Classes, Land Reforms, Legislation, Planning, Politics and Government, Religion, Social Conditions and Sport.

To find the exact location of a text, you can see under the first alphabet of the first word of an item, or under the country to which an item refers under the appropriate form-heading.

This is how it is done. After describing the item in a slugline, its page-number given, followed by the abbreviation of the country and the index alphabet allotted to it, each separated by a colon.

Example: (Under I)

INDIA

INTERNATIONAL MEETINGS

Asian Lawyers' Conference 45 : INI : U

In the case of material listed under ASIA OUTSIDE ASIA and SPORT, individual countries and items are mentioned alphabetically. Besides, SPORT is listed under the respective countries.

The following are abbreviations of the countries:

Aden	—ADN	Iran	—IRN	Muscat	—MUS
Afghanistan	—AFG	Iraq	—IRQ	Nepal	—NEP
Asia Outside Asia	—AOA	Israel	—ISR	Pakistan	—PAK
Books on Asia	—BOA	Japan	—JAP	Philippines	—PHI
Burma	—BUR	Jordan	—JOR	Ryukyus	—RYK
Cambodia	—CAM	Korea (North)	—KRN	Singapore	—SGP
Ceylon	—CEY	Korea (South)	—KRS	Saudi Arabia	—SUA
China	—CHI	Kuwait	—KUW	Sport	—SPO
Ethiopia	—ETP	Laos	—LAO	Thailand	—THI
Formosa	—FOR	Lebanon	—LEB	Turkey	—TUR
Hong Kong	—HGK	Malaya	—MAL	Viet-Nam (DR)	—VND
India	—INI	Maldives	—MLD	Viet-Nam (RVN)	—RVN
Indonesia	—IND	Mongolia	—MON	Yemen	—YEM

The index is intensive, easy to consult and understand. Many *see* and *see also* cross-references are provided so that readers can find what they want easily and quickly.
